Supported Configurations for BEA Products with Spring Framework

Contents

Support for Spring Framework

This page is no longer active. The information on the Spring Framework versions that are supported by a particular WebLogic Server release can be found in the Supported Configurations overview page for each WebLogic Server release. Specifically, refer to the Spring Framework Support section of the Supported Configurations overview page. For example, for WebLogic Server 10.3, the Spring Framework Support information is in *Supported Configurations for WebLogic Server 10.3*.
