# Supported Configurations

## Supported Configurations for Microsoft Exchange (using WebLogic Exchange Service)

[Table 1](#) contains a list of the supported Operating Systems (OS), the Active Directory, and the MAPI subsystem for Microsoft Exchange using WebLogic Exchange Service.

**Table 1 Supported Configurations for Microsoft Exchange Using WebLogic Exchange Service**

	OS	Active Directory	MAPI Subsystem
MS Exchange 2000	Windows 2000 SP4	Windows 2000 SP4	2000 Admin
MS Exchange 2000	Windows 2000 SP4	Windows 2000 SP4	2003 Admin
MS Exchange 2000	Windows 2000 SP4	Windows 2003 SP1	2000 Admin
MS Exchange 2000	Windows 2000 SP4	Windows 2003 SP1	2003 Admin
MS Exchange 2003	Windows 2003 SP1	Windows 2003 SP1	2000 Admin
MS Exchange 2003	Windows 2003 SP1	Windows 2003 SP1	2003 Admin

For all configurations and versions, Administrative tools are the minimal requirement for the MAPI subsystem.

The following service packs are recommended for the MAPI subsystem:

- 2000 Admin – Service Pack 3 + Post-SP3 Update Rollup
- 2003 Admin – Service Pack 1

## Supported Configurations for Microsoft Exchange (using WebDAV)

[Table 2](#) contains a list of the supported OS and the Active Directory for Microsoft Exchange using WebDAV.

**Table 2 Supported Configurations for Microsoft Exchange Using WebDAV**

	OS	Active Directory
MS Exchange 2000 SP3+Rollup	Windows 2000 SP4	Windows 2000 SP4
MS Exchange 2000 SP3+Rollup	Windows 2000 SP4	Windows 2003 SP1
MS Exchange 2003 SP1	Windows 2003 SP1	Windows 2003 SP1
MS Exchange 2000 SP3+Rollup FE/BE	Windows 2000 SP4	Windows 2000 SP4
MS Exchange 2003+SP1 FE/BE	Windows 2003 SP1	Windows 2003 SP1

FE – Front-end server

BE – Back-end server

## Supported Configurations for Lotus Domino (using WebLogic Domino Service)

[Table 3](#) contains a list of the supported OS for Lotus Domino using the WebLogic Domino Service.

**Table 3 Supported Configurations for Lotus Domino Using Domino Service**

	OS
Lotus Domino R5	Windows NT SP4
Lotus Domino R5	Windows 2000 Server SP3

**Table 3 Supported Configurations for Lotus Domino Using Domino Service**

	<b>OS</b>
Lotus Domino R5	RedHat Linux 8.0
Lotus Domino R6	Windows NT SP6a
Lotus Domino R6	Windows 2000 Server SP3
Lotus Domino R6	Windows 2003 Server
Lotus Domino R6	RedHat ES 4.0 <sup>1</sup>
Lotus Domino R6	RedHat Linux 8.0
Lotus Domino R6.5	Windows NT SP6a
Lotus Domino R6.5	Windows 2003 Server SP3
Lotus Domino R6.5	Windows 2003 Server
Lotus Domino R6.5	RedHat ES 4.0*
Lotus Domino R6.5	RedHat Linux 8.0

1. Used with "compat-libstdc++-33-3.2.3.i386.rpm" installed.
