

Oracle® Fusion Middleware

Domain Template Reference

11g Release 1 (10.3.6)

E14138-11

November 2011

This document provides information about WebLogic domain and extension templates, which are Java archive (JAR) files that contain the files and scripts required to create or extend a WebLogic domain.

Table 1–3 (Cont.) Files Included in a Template

Filename	Description
template-info.xml	Provides template identification information, such as the template name, software version, type of template (domain or application), author, description, and so on. This file also includes template dependency information (if applicable).
was-variable.xml	This file is specific to FMW product installations in a WebSphere environment, and is ignored in a WebLogic Server environment.
