This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related software documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT END USERS. Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Ce logiciel et la documentation qui l'accompagne sont protégés par les lois sur la propriété intellectuelle. Ils sont concédés sous licence et soumis à des restrictions d'utilisation et de divulgation. Sauf disposition de votre contrat de licence ou de la loi, vous ne pouvez pas copier, reproduire, traduire, diffuser, modifier, breveter, transmettre, distribuer, exposer, exécuter, publier ou afficher le logiciel, même partiellement, sous quelque forme et par quelque procédé que ce soit. Par ailleurs, il est interdit de procéder à toute ingénierie inverse du logiciel, de le désassembler ou de le décompiler, excepté à des fins d'interopérabilité avec des logiciels tiers ou tel que prescrit par la loi.

Les informations fournies dans ce document sont susceptibles de modification sans préavis. Par ailleurs, Oracle Corporation ne garantit pas qu'elles soient exemptes d'erreurs et vous invite, le cas échéant, à lui en faire part par écrit.

Si ce logiciel, ou la documentation qui l'accompagne, est concédé sous licence au Gouvernement des Etats-Unis, ou à toute entité qui délivre la licence de ce logiciel ou l'utilise pour le compte du Gouvernement des Etats-Unis, la notice suivante s'applique :

U.S. GOVERNMENT END USERS. Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

Ce logiciel ou matériel a été développé pour un usage général dans le cadre d'applications de gestion des informations. Ce logiciel ou matériel n'est pas conçu ni n'est destiné à être utilisé dans des applications à risque, notamment dans des applications pouvant causer des dommages corporels. Si vous utilisez ce logiciel ou matériel dans le cadre d'applications dangereuses, il est de votre responsabilité de prendre toutes les mesures de secours, de sauvegarde, de redondance et autres mesures nécessaires à son utilisation dans des conditions optimales de sécurité. Oracle Corporation et ses affiliés déclinent toute responsabilité quant aux dommages causés par l'utilisation de ce logiciel ou matériel pour ce type d'applications.

Oracle et Java sont des marques déposées d'Oracle Corporation et/ou de ses affiliés. Tout autre nom mentionné peut correspondre à des marques appartenant à d'autres propriétaires qu'Oracle.

Intel et Intel Xeon sont des marques ou des marques déposées d'Intel Corporation. Toutes les marques SPARC sont utilisées sous licence et sont des marques ou des marques déposées de SPARC International, Inc. AMD, Opteron, le logo AMD et le logo AMD Opteron sont des marques ou des marques déposées d'Advanced Micro Devices. UNIX est une marque déposée d'The Open Group.

Ce logiciel ou matériel et la documentation qui l'accompagne peuvent fournir des informations ou des liens donnant accès à des contenus, des produits et des services émanant de tiers. Oracle Corporation et ses affiliés déclinent toute responsabilité ou garantie expresse quant aux contenus, produits ou services émanant de tiers. En aucun cas, Oracle Corporation et ses affiliés ne sauraient être tenus pour responsables des pertes subies, des coûts occasionnés ou des dommages causés par l'accès à des contenus, produits ou services tiers, ou à leur utilisation.

# Important Information About the Sun Dual Port 10GBase-T ExpressModule

---

These product notes contain information about new features, known limitations, and documentation information for the Sun Dual Port 10GBase-T ExpressModule from Oracle.

New issues are added to the product notes as needed. Be sure to read the most recent version of the product notes that is available on the web. For the most recent version of the product notes, go to the Oracle documentation portal at the following site:

[http://www.oracle.com/pls/topic/lookup?ctx=SDP\\_10GbE-PCIe2.0-EM\\_BASE-T](http://www.oracle.com/pls/topic/lookup?ctx=SDP_10GbE-PCIe2.0-EM_BASE-T)

**Important:** The Sun Dual Port 10GBase-T Adapter was formerly named the Sun Dual Port 10 GbE PCIe 2.0 Low Profile Adapter, Base-T. The former product name might still appear in the product and document. This product name change does not indicate any change in product features or functionality.

---

## Intel 10 GbE Driver Support for Linux and Windows

Information on the Intel 10 GbE drivers for Linux and Windows, including tools and documentation, is at the following web site:

<http://www.intel.com/support/network/adapter/10gbe>

---

# Hardware and OS Software Support

The Sun Dual Port 10GBase-T ExpressModule is supported on various hardware platforms running either the Oracle Solaris (SPARC or x86), Linux, or Windows operating environment.

To obtain a list of the currently supported hardware and operating environment versions, go to the product web page at:

<http://www.oracle.com/goto/sun-dual-port-pcie-20-gigabit>

---

# OS Patches and Updates

Before you patch the current OS due to version differences, you should update the entire OS image, if possible, on both the client system and the server system. If you cannot update the entire OS image, download the latest patch that contains the software driver from:

<http://support.oracle.com/>

---

# Known Issues

Each known change request (CR) is listed by its synopsis and its CR number. Each entry describes the issue and provides a workaround, if one is available. Check the latest status of CRs at:

<http://support.oracle.com>

## Sun Dual Port 10GBase-T ExpressModule Firmware Semaphore Acquire Mechanism Needs To Be Optimized in the ixgbe(7D) Driver (CR 7148426)

When more than two Sun Dual Port 10GBase-T ExpressModule ports are present in the system, network performance might be degraded. The degradation increases as the number of ports increase.

**Workarounds:** Depending on the operating system and platform, download and apply the latest patch.

- **Oracle Solaris SPARC:** 148169-02
- **Oracle Solaris x86:** 148170-02

## Links Do Not Work Correctly After Running Oracle VTS and Internal Loopback Test Fails (CR 7147018 and CR 7008767)

Performing an internal network loopback test with Oracle VTS on Sun Dual Port 10GBase-T Ethernet Networking cards might result in a test failure and improperly working links. This issue affects all of the Sun Dual Port 10GBase-T Ethernet Networking cards (Oracle PNs: 7100488, 7100563, 7100490, and 7100492).

**Workaround:** Avoid using Oracle VTS network loopback test. If you ran the test and the links are not working properly, try the following solutions, depending on the operating system.

For the Oracle Solaris 10 OS, perform these steps:

1. Reboot the system.
2. Power cycle the system.
3. Download, and apply the latest patches.

If downloading the latest patch does not solve the issue, contact your Oracle service provider.

For the Oracle Solaris 11 OS, update the system with the latest service patches.

## net0 Has No Link After Oracle Solaris svn\_174 Boot From Port 0 (CR 7097919)

The Sun Dual Port 10GBase-T Ethernet Networking cards might fail to bring up links if you boot the Oracle Solaris 10 OS or the Oracle Solaris 11 OS using a network boot image.

This issue only affects Sun Dual Port 10GBase-T Ethernet Networking cards with these part numbers:

- 7100488
- 7100490
- 7100492
- 7100563

**Workaround:** Boot the system from a local disk or optical media, or boot the system by using an alternative NIC adapter.

**Fix:** Download and apply the appropriate updates:

- Oracle Solaris 11 OS: Latest service updates
- Oracle Solaris 10 OS (SPARC): Patch 148169-02
- Oracle Solaris 10 OS (Oracle x86): Patch 148170-02

## Creating Thousands of VLANs Runs the System Out of Memory (CR 7145327)

The Sun Dual Port 10GBase-T ExpressModule supports up to 4094 VLANs. When you create a VLAN (or vnic), the system creates 16 `mac_rx_fanout_worker` threads for that VLAN. When you create close to the maximum number of VLANs on a sun4v system, the `dladm(1M)` command might hang because additional virtual memory cannot be allocated, so a deadlock between memory requests occurs.

**Workaround A:** Override the `segpsize` value in the `/etc/system` file by adding the following line:

```
set segkpsize=524288
```

**Workaround B:** Add the following line to the `/etc/system` file:

```
set mac:mac_rx_fanout_10g_boost=8
```

# AER Multiple Corrected Errors (CR 7157354)

Before you hot swap the Sun Dual Port 10GBase-T ExpressModule, you must press the ATTN button so that the system powers down the slot. During this operation, you might see AER multiple-corrected errors. You can safely ignore these messages.

## Sun Dual Port 10GBase-T ExpressModule Connected To Netgear JGS524 Switches Are Unable To Establish a Link (CR 7055438)

The links can not be established when the ports on the Sun Dual Port 10GBase-T ExpressModule are connected to Netgear JGS524 Gigabit Switches with Marvell PHY. The Marvell PHYs used on these switches are not fully compliant with IEEE specs.

There is no work around or fix for this problem. Customers are advised not to connect the Sun Dual Port 10GBase-T ExpressModules to Netgear JGS524 Gigabit Switches.
