Oracle Fabric Monitor Release Notes

This document provides late-breaking information about Oracle Fabric Monitor version 1.2.0. Topics include:

- "Minimum Requirements" on page 1
- "Known Issues" on page 2
- "Issues Resolved" on page 3

Minimum Requirements

Oracle Fabric Monitor is an optional component for Oracle Fabric Manager. The plug-in enables viewing of historical throughput data of the servers, devices, and clouds of the fabric.

These software versions are compatible with the plug-in:

- **Oracle Fabric Manager** – Version 4.3.0 or later
- **MySQL** – Version 5.6.12 or later.
- PostgreSQL – Version 9.1

Known Issues

Number	Description
18651730	**Page Error While Loading One Month's Data If Oracle Fabric Manager Has Been Idle** If Oracle Fabric Manager has been left idle for more than several hours, setting the date range of Oracle Fabric Monitor to one month or greater might cause this error message to be displayed: Errors on this webpage might cause it to work incorrectly **Workaround**: Click Close and reload the page from the web browser. The new dates and respective data are displayed.
18481553	**Fatal Error When Clicking on Oracle Fabric Monitor if Oracle Fabric Manager Has Been Idle** If Oracle Fabric Manager has been left idle for more than several hours, after login, clicking on Oracle Fabric Monitor might cause a fatal error, with the message: Oracle Fabric Manager encountered an issue. Please check the logs or refresh the page and try your action again. Upon clicking OK, the user is logged out. Logging in again and clicking Oracle Fabric Monitor repeats the error. **Workaround**: Restart the Oracle Fabric Manager services by typing the `service xms restart` command at a `root` user prompt.
18473565	**Scroll Bar and Up and Down Arrows Not Working Properly** Some web browsers have the ability to zoom a web page by holding down the Ctrl key and rolling the scroll wheel on the mouse upward. When this action is done, and Oracle Fabric Monitor is zoomed in, the scroll bars for the main Oracle Fabric Monitor window, the panes, and the Legend boxes might not be displayed properly. Additionally, movement of the scroll bars might not be possible. **Workaround**: Adjust the screen to the default size and do not attempt to zoom Oracle Fabric Monitor.
16337855	**Xsigo Fabric Performance Monitor Is Deleted When Oracle Fabric Manager is Upgraded** Oracle Fabric Monitor 1.2.0 requires Oracle Fabric Manager 4.3.0. When Oracle Fabric Manager 4.2.0 with the Xsigo Fabric Performance Monitor 1.1.0 plugin is upgraded to Oracle Fabric Manager 4.3.0, Xsigo Fabric Performance Monitor is removed from the plug-ins menu and shows a version mismatch in the Plugin Manager. However, Xsigo Fabric Performance Monitor is still installed. **Workaround**: If you are upgrading from Xsigo Fabric Performance Monitor to Oracle Fabric Monitor: 1. Upgrade Oracle Fabric Manager from 4.2.0 to 4.3.0. 2. Perform the upgrade as described in the Oracle Fabric Monitor User's Guide.

Issues Resolved

Number	Description
16338187	**Xsigo Fabric Performance Monitor Failed to Pull Historic Data Older Than a Month** Xsigo Fabric Performance Monitor could not display data of any type that was older than one month. Oracle Fabric Monitor uses a different method of acquiring, retrieving and presenting data, so this bug is no longer applicable. Oracle Fabric Monitor can display data older than one month.
