This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS. Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Ce logiciel et la documentation qui l'accompagne sont protégés par les lois sur la propriété intellectuelle. Ils sont concédés sous licence et soumis à des restrictions d'utilisation et de divulgation. Sauf stipulation expresse de votre contrat de licence ou de la loi, vous ne pouvez pas copier, reproduire, traduire, diffuser, modifier, accorder de licence, transmettre, distribuer, exposer, exécuter, publier ou afficher le logiciel, même partiellement, sous quelque forme et par quelque procédé que ce soit. Par ailleurs, il est interdit de procéder à toute ingénierie inverse du logiciel, de le désassembler ou de le décompiler, excepté à des fins d'interopérabilité avec des logiciels tiers ou tel que prescrit par la loi.

Les informations fournies dans ce document sont susceptibles de modification sans préavis. Par ailleurs, Oracle Corporation ne garantit pas qu'elles soient exemptes d'erreurs et vous invite, le cas échéant, à lui en faire part par écrit.

Si ce logiciel, ou la documentation qui l'accompagne, est livré sous licence au Gouvernement des Etats-Unis, ou à quiconque qui aurait souscrit la licence de ce logiciel pour le compte du Gouvernement des Etats-Unis, la notice suivante s'applique:

U.S. GOVERNMENT END USERS. Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

Ce logiciel ou matériel a été développé pour un usage général dans le cadre d'applications de gestion des informations. Ce logiciel ou matériel n'est pas conçu ni n'est destiné à être utilisé dans des applications à risque, notamment dans des applications pouvant causer des dommages corporels. Si vous utilisez ce logiciel ou matériel dans le cadre d'applications dangereuses, il est de votre responsabilité de prendre toutes les mesures de secours, de sauvegarde, de redondance et autres mesures nécessaires à son utilisation dans des conditions optimales de sécurité. Oracle Corporation et ses affiliés déclinent toute responsabilité quant aux dommages causés par l'utilisation de ce logiciel ou matériel pour ce type d'applications.

Oracle et Java sont des marques déposées d'Oracle Corporation et/ou de ses affiliés. Tout autre nom mentionné peut correspondre à des marques appartenant à d'autres propriétaires qu'Oracle.

Intel et Intel Xeon sont des marques ou des marques déposées d'Intel Corporation. Toutes les marques SPARC sont utilisées sous licence et sont des marques ou des marques déposées de SPARC International, Inc. AMD, Opteron, le logo AMD et le logo AMD Opteron sont des marques ou des marques déposées d'Advanced Micro Devices. UNIX est une marque déposée d'The Open Group.

Ce logiciel ou matériel et la documentation qui l'accompagne peuvent fournir des informations ou des liens donnant accès à des contenus, des produits et des services émanant de tiers. Oracle Corporation et ses affiliés déclinent toute responsabilité ou garantie expresse quant aux contenus, produits ou services émanant de tiers, sauf mention contraire stipulée dans un contrat entre vous et Oracle. En aucun cas, Oracle Corporation et ses affiliés ne sauraient être tenus pour responsables des pertes subies, des coûts occasionnés ou des dommages causés par l'accès à des contenus, produits ou services tiers, ou à leur utilisation, sauf mention contraire stipulée dans un contrat entre vous et Oracle.

Accessibilité de la documentation

Pour plus d'informations sur l'engagement d'Oracle pour l'accessibilité à la documentation, visitez le site Web Oracle Accessibility Program, à l'adresse <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Accès aux services de support Oracle

Les clients Oracle qui ont souscrit un contrat de support ont accès au support électronique via My Oracle Support. Pour plus d'informations, visitez le site <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> ou le site <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> si vous êtes malentendant.

Using This Documentation

- **Overview** – Provides late-breaking information about Oracle Virtual Networking host driver, version 5.1.0 for Red Hat-compatible kernel for Oracle Linux and Oracle Virtual Networking host driver for UEK kernel (embedded driver).
- **Audience** – System administrators, authorized service providers, and users who have experience in administering advanced networks.
- **Required knowledge** – Advanced experience in using Oracle Virtual Networking host drivers for Oracle Linux.

Product Documentation Library

Documentation and resources for this product and related products are available at <http://www.oracle.com/goto/Oracle-Virtual-Networking/docs>

Feedback

Provide feedback about this documentation at <http://www.oracle.com/goto/docfeedback>

Late-Breaking Information

These topics provide late-breaking information about version 5.1.0 of the Oracle Virtual Networking host drivers for Oracle Linux.

- [“What's New in This Release” on page 9](#)
- [“Minimum Requirements” on page 9](#)
- [“Downloading and Installing the Host Drivers” on page 11](#)
- [“Known Issues” on page 14](#)

What's New in This Release

This version of host drivers provides the following new functionality:

- Support for Oracle Linux 7, both unbreakable enterprise kernel (UEK) and Red Hat-Compatible Kernel (RHCK).

Local boot on hosts is supported in this release. PXE, SAN, and iSCSI boot are not supported.

Minimum Requirements

These topics provide minimum system requirements for the host drivers.

- [“Supported OS Levels” on page 9](#)
- [“Supported HCAs” on page 10](#)
- [“System Limitations and Restrictions” on page 10](#)

Supported OS Levels

The 5.1.0 release of the host drivers were tested with and support Oracle Linux 7 UEK3 and Red Hat compatible kernel.

Although Red Hat Enterprise kernels are supported, Oracle Virtual Networking host drivers are tested and qualified on Oracle Linux with RHEL-compatible kernels, not Vanilla Red Hat Enterprise Linux ISO images, which is distributed from official Red Hat Enterprise.

Supported HCAs

This host driver release supports Oracle HCAs as well as third - party manufacturers' HCAs with the requirement that the HCAs use the required version of firmware. Refer to the HCA's product notes for latest firmware versions.

The following Oracle HCAs are supported.

Supported Oracle HCAs	Documentation
Sun InfiniBand Dual Port 4x QDR PCIe Low Profile Host Channel Adapter M2	http://docs.oracle.com/cd/E19241-01/index.html
Sun InfiniBand Dual Port 4x QDR PCIe Express Module Host Channel Adapter M2	http://docs.oracle.com/cd/E19157-01/index.html
Oracle Dual Port QDR InfiniBand Adapter M3	http://docs.oracle.com/cd/E40985_01/index.html

For third-party HCAs, refer to the manufacturer's documentation for the required firmware version.

System Limitations and Restrictions

- [“Virtual Resources Supported” on page 10](#)
- [“Boot Methods” on page 11](#)

Virtual Resources Supported

This release of the host drivers supports the following number of virtual resources for each host.

I/O Resource	Maximum of Type
vNICs	<ul style="list-style-type: none"> ■ Eight 10-Gbps vNICs ■ Sixteen 1-Gbps vNICs ■ Four jumbo vNICs, either 1-Gbps or 10-Gbps vNICs with a 9014-byte MTU

I/O Resource	Maximum of Type
	<ul style="list-style-type: none"> ■ Four iSCSI vNICs (for iSCSI storage) ■ Eight PVI vNICs ■ PVI vNICs and standard vNICs can be configured in any combination as long as they are within the maximum limit supported
vHBAs	<ul style="list-style-type: none"> ■ Eight vHBAs ■ Four multipath vHBAs

Boot Methods

This host driver release supports only the local boot from server's hard driver. PXE and SAN boot are not supported on both UEK and RHC kernel.

Downloading and Installing the Host Drivers

These topics describe how to download and install the host drivers for UEK and RHCK.

Oracle virtual networking supports both UEK and RHCK that are distributed with Oracle Enterprise Linux ISO. The following table describes the installation and configuration differences between the two kernels.

UEK	RHCK
Oracle virtual networking host drivers are embedded with Oracle Linux 7.0 OS.	Oracle virtual networking host drivers are unbundled and not embedded into Oracle Linux 7.0 OS.
Host drivers are not stand-alone RPMs that you need to install.	Host drivers are a separate, stand-alone package (for example, an individual RPM) that you must install after the OS is installed.
Embedded host drivers must be activated. You must install <code>userspace_RPM</code> to activate the host drivers.	After the host driver package is installed, you must reboot the host to load the host driver package into memory.

- [“Enabling Host Drivers on Embedded Kernels” on page 11](#)
- [“Install Host Drivers for Red Hat-Compatible Kernels” on page 14](#)

Enabling Host Drivers on Embedded Kernels

- [“Installing Host Drivers for Unbreakable Enterprise Kernel” on page 12](#)
- [“Activate Oracle Virtual Networking Service” on page 13](#)
- [“Verify That the Server Is Detected by the Oracle Fabric Interconnect” on page 13](#)

Installing Host Drivers for Unbreakable Enterprise Kernel

You install `orclovn-user` RPM for UEK either by using an automated installer, such as Yum, or manually.

- [“Install Host Drivers \(Yum\)” on page 12](#)
- [“Install Host Drivers \(Manually\)” on page 12](#)

▼ Install Host Drivers (Yum)

Before installing the host drivers, make sure the following prerequisites have been completed:

- The Yum repository is reachable through the network by the Oracle Linux server.
- The Yum service is running correctly.
- You have root access to the Yum repository.

You use the `yum install` command to install the kernel and Oracle Virtual Networking user space application from the Yum repository. Using Yum, you do not install the software from the Oracle server or the Oracle Fabric Interconnect.

● Install the Oracle Virtual Networking user space application.

For example:

```
# yum install orclovn-user.x86_64
```

▼ Install Host Drivers (Manually)

If you are not using an automated update manager, you can install the kernel like any other software. Before installing the host drivers, ensure that the following prerequisites are met:

- The Oracle Linux OS or Oracle VM hypervisor is installed on the server, including all require patches and updates.
- All RPMs for Oracle Virtual networking are downloaded to the Oracle Linux servers' hard drive. For information about kernel and kernel firmware sites, see *Oracle Virtual Networking Host Drivers for Oracle Linux and Oracle VM Installation Guide*.
- You have root access on the server.

When manually installing the RPMs, you load the UEK2 or UEK3 firmware, kernel, and Oracle Virtual Networking user space application by using the `rpm -ivh` command. Using the manual installation procedure, you install the software directly from the server, not the Oracle Fabric Interconnect.

1. Download Oracle Virtual Networking user space RPM from:

http://public-yum.oracle.com/repo/OracleLinux/OL7/addons/x86_64/getPackage/orclovn-user-6.0.r7588-1.el7.x86_64.rpm

2. Install the Oracle Virtual Networking user space application.

For example:

```
# rpm -ivh orclovn-user-6.0.r7588-1.el7.x86_64.rpm
```

▼ Activate Oracle Virtual Networking Service

Enable the Oracle Virtual Networking service, which is named `xsigo`.

1. Turn on the Oracle Virtual Networking service.

```
# chkconfig xsigo on
```

2. Verify that the Oracle Virtual Networking service is on.

```
# chkconfig --list xsigo
```

```
xsigo 0:off 1:off 2:on 3:on 4:on 5:on 6:off
```

3. Enable the `ovn.service` service.

```
# systemctl enable ovn.service
```

4. Run the setup script to load OVN modules.

```
# /opt/xsigo/bin/orclovn-setup --install
```

5. Reboot the host.

By default, the `orclovn-user` package chooses the first UEK kernel from your current `grub.conf` file. Wait until the host reboots, and then proceed to the next section.

▼ Verify That the Server Is Detected by the Oracle Fabric Interconnect

Verify that the server is detected from the Fabric Interconnect after the server has completed the reboot.

● Locate the server.

```
# show physical-server
name      guid          descr port      os
version   server-profile
-----
```

```
halfdome 2c903000451d1 jammu:ServerPort7 Linux/3.8.13-35.2.1.el7uek.x86_64/  
x86_64 2.9.1000/3.0.0 halfdome
```

▼ Install Host Drivers for Red Hat-Compatible Kernels

1. Remove any InfiniBand stack that is earlier than version 1.5.3.2.
2. Remove the existing host drivers.
3. Download the suitable drivers from:

http://download.oracle.com/otn-pub/otn_software/xsigo/5.1.0-LX.zip

4. Install the host driver.

For example:

```
# rpm -ivh xsigo-hostdrivers-kmod-3.10.0_123.el7.5.1.0.LX-native.x86_64.rpm
```

5. Enable the `ovn.service` service to start at boot time.

```
# systemctl enable ovn.service
```

6. Reboot the host.

7. Verify that the server is detected by the Oracle Fabric Interconnect.

```
# show physical-server
```

```
name      guid          descr port      os  
version   server-profile
```

```
-----  
halfdome 2c903000451d1 jammu:ServerPort7 Linux/3.8.13-35.2.1.el7uek.x86_64/  
x86_64 2.9.1000/3.0.0 halfdome
```

Known Issues

The following known issues are for this release of Oracle Virtual Networking host drivers for Oracle Linux 7.

Bug ID	Description
19974945	Cannot Remove Softline With Driver Uninstalled

Bug ID	Description
19435287	<p data-bbox="342 373 1390 447">When the <code>ovn.service</code> is enabled at host bootup, it creates a symbolic link to load at boot time. However, when the host drivers are uninstalled, the symbolic link should be removed, but it is not. While the symbolic link remains, this problem is cosmetic and does not affect system functionality.</p> <p data-bbox="342 457 743 478">Getting Continuous XSCORE Logs on Console</p> <p data-bbox="342 506 1325 554">When a server profile is attached to a host, continuous <code>xscore</code> messages can be logged on the server's management console. This problem is cosmetic and does not affect system functionality.</p>
