1. About this Manual

1.1 Introduction

This manual is designed to help you quickly get acquainted with the Relationship Pricing module of Oracle FLEXCUBE.

It provides an overview to the module, and provides information on using this module of Oracle FLEXCUBE.

Besides this User Manual, you can find answers to specific features and procedures in the Online Help, which can be invoked, by choosing 'Help Contents' from the Help Menu of the software. You can further obtain information specific to a particular field by placing the cursor on the relevant field and striking <F1> on the keyboard.

1.1.1 Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office clerk	Input functions for contracts
Back office managers/officers	Authorization functions
Product Managers	Product definition and authorization
End of day operators	Processing during end of day/ beginning of day
Financial Controller/Product Managers	Generation of reports

1.1.2 Organization

The manual is organized in the following manner:

Chapter 1	<i>About this Manual</i> gives a brief introduction of the module, the audience it addresses and the organization of the various chapters. It also includes the list of related documents to be referred, if any, and the conventions used in the document.
Chapter 2	<i>Customer Relationship Pricing</i> explains the maintenances required to provide services to customers based on the total business that the customer conducts or could potentially conduct.

Conventions Used in this Manual

Important information is preceded with the  symbol.

2. Customer Relationship Pricing

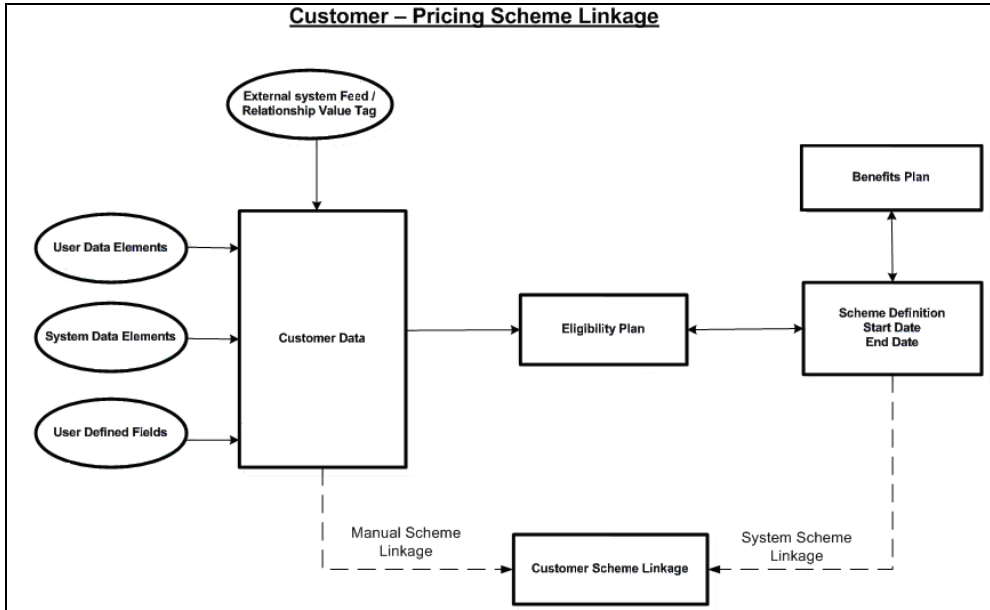

2.1 Introduction

Relationship pricing is the pricing of services offered to a customer based on the total business that the customer conducts or could potentially conduct. In this case, a set of eligible customers is offered a special pricing over and above the standard product pricing. This is commonly implemented by way of discounts, rebates, or offsets against standard pricing. A combination of products wrapped as a product bundle could also be offered to customers. Pricing benefits are offered to customers based on customer relation, product bundling or a combination of both. For e.g., for keeping a minimum daily balance of \$2,500, a bank may offer its customers a fee waiver-off on credit cards, lines of credit, checking and savings, as well as 100 free trades and bonus interest rates on savings accounts.

Pricing benefits are offered to customers as a variance over the standard product pricing. A pricing scheme is defined and details like eligibility criteria, validity period, and the benefits of the scheme are maintained. The relation between different components involved in relationship pricing can be explained as follows:

1. User Data Elements (UDE) are defined to extract data from Oracle FLEXCUBE
2. External relationship values of customers are captured using relationship value tags (RVT). The RVT value can also be extracted from external systems
3. System Data Elements (SDE) are defined to be used in the special pricing rules
4. User defined fields are maintained to be used in the pricing rules
5. Eligibility criteria to identify the set of customer to avail the benefits of the scheme are defined using the values of UDE, SDE, RVT, and UDF
6. Pricing variance rules are defined based on which the scheme benefits are offered to customers
7. Scheme benefits are applied to eligible customers based on their eligibility and also based on the product bundle the customer has opted for

The following diagram displays the relation between various components involved in the calculation of relationship pricing.

The various maintenances required to provide relationship pricing to customers is explained in the subsequent sections.

2.2 Maintaining User Data Elements

You can maintain the data elements to be used to compose pricing scheme rules in 'Relationship Pricing - User Data Elements' maintenance screen. You can invoke this screen by typing 'CODUDEM' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The data elements could be relevant fields from tables in the database or could be complex stored procedures derived from values of other UDEs or constant values.

The screen appears as shown below:

The screenshot shows a web browser window titled "Relationship Pricing - User Data Elements Maintenance-Detailed -- Web Page Dialog". The main content area is titled "User Data Element (UDE)". It contains the following fields and controls:

- UDE Code * (text input)
- UDE Description * (text input with a help icon)
- UDE Basis * (dropdown menu with "Query" selected)
- UDE Datatype * (dropdown menu with "Numeric" selected)

Below these fields are two tabs: "Query" (selected) and "Function". Under the "Query" tab, there is a large text area for the "SQL Statement", a "Validate Query" button, and an "Error" text area. At the bottom of the dialog, there is a "Fields" tab and a footer area containing the following information:

- Input By: OFSSCOMAKS
- Date Time
- Modification Number
- Authorized (checkbox)
- Open (checkbox)
- Authorized By
- Date Time
- Cancel button

You can maintain the following details in this screen:

UDE Code

Specify a unique alphanumeric code for the User Data Element

UDE Description

Specify a suitable description for the User Data Element

UDE Basis

Select the basis for deriving the UDE value from the drop-down list provided. The options available are as follows:

- Query - the UDE value is derived using a PL/SQL query on Oracle FLEXCUBE database, which returns a single value
- Function - the UDE value is derived using pre-defined database functions returning a particular value. You need to provide proper inputs to the function to return the UDE value

UDE Datatype

Select the data type of the UDE value from the drop-down list provided. The possible options are as follows:

- Numeric
- String
- Date

2.2.1 Specifying Query Details

If you have selected 'Query' as the basis for deriving UDE value, you need to specify the SQL query statement to return the UDE output value.

You can frame the query statement using one or more database tables in Oracle FLEXCUBE. You can also use aggregate functions and multiple conditions in the where clause of the SQL statement. You need to provide customer number as an input to the query and the result of the query will be the UDE value.

You can validate the query statement by clicking the 'Validate Query' button. Any errors in the query statement will get displayed in the 'Error' field.

Example

UDE to get the number of accounts opened for a customer in the logged in Branch can be defined as follows:

Select count (1) from STTM_CUST_ACCOUNT

Where Cust_No = @CUSTOMER_NO

And branch_code = global.current_branch;

2.2.2 Specifying Function Details

If you have selected 'Function' as the basis for deriving UDE value, you need to specify the parameters related to the function in the 'Function' tab.

The screenshot shows the 'User Data Element (UDE)' configuration window. The 'Function' tab is selected. The 'Function Name' is 'CUST_DLY_BOOK_BAL'. Below it, a table lists parameters for the function:

Parameter Name	UDE	Constant
<input type="checkbox"/> P_CCY		
<input checked="" type="checkbox"/> P_CUST_NO	SHRAV1	56

The 'Fields' tab at the bottom shows input and authorized fields:

Input By	Date Time	Modification Number	Open
Authorized By	Date Time		Authorized

You can specify the following details here:

Function Name

Select the database function you wish to use from the pre-defined set of functions available in the option list.

Click the 'Get Parameter' button to get the parameters linked to the function name selected.

Parameter Name

All function parameters, which can be mapped to an existing UDE or a constant value to arrive at the required output, get displayed here

You can specify either a UDE code or a constant value as input for the function parameter

UDE

Specify the UDE code to be used as a value for the function parameter

You can specify the '@CUSTOMER_NO' keyword as a parameter value

Constant

Specify a constant value of the function parameter

You cannot close a UDE record if it is used in Eligibility Criteria maintenance or in Variance Rule maintenance.

2.2.3 Viewing UDE Details

You can view the details of UDEs maintained and search for a UDE in the 'Relationship Pricing – User Data Elements Summary' screen. You can invoke this screen by typing 'COSUDEMT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screen appears as shown below:

The screenshot shows a web application window titled "Relationship Pricing - User Data Elements Maintenance-Summary -- Web Page Dialog". The window contains a search interface with the following elements:

- Authorization Status: Authorized (dropdown)
- Record Status: (dropdown)
- UDE Code: (text input field)
- Search buttons: Search, Advanced Search, Reset
- Records per page: 15 (dropdown)
- Page navigation: 1 of 1, Go to Page
- Table with columns: Authorization Status, Record Status, UDE Code
- Legend for Authorization Status: A - Authorized, U - Unauthorized
- Legend for Record Status: C - Closed, O - Open
- Exit button at the bottom right

Authorization Status	Record Status	UDE Code
A	O	SHRAV1
A	O	LDNOCON
A	O	REWARD_POINTS

You can search for a UDE value in this screen by specifying any of the following:

Authorization Status

Select the authorization status of the record you want to search for, from the drop-down list provided. The options possible are:

- Authorized
- Unauthorized

Record Status

Select the status of the record which you want search for, from the drop-down list provided. The options possible are:

- Open
- Closed

UDE Code

Select the code of the data element you want to search for, from the option list provided

Click the 'Search' button to search for records according to the search criteria specified. You can also perform an advanced search using combinations of conditions by clicking the 'Advanced Search' button.

2.3 Maintaining Relationship Value Tag Codes

A customer can avail the benefits of a scheme offered by your bank, based on certain attributes like credit card reward points, bonus points etc. You can maintain these attribute tags in the 'Relationship Value Tag Code Maintenance' screen. The values for these attribute tags can be specified either manually or uploaded from an external system.

You can invoke this screen by typing 'CODRVMT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screenshot displays a web page dialog titled "Relationship Value Tag Code Maintenance-Detailed -- Web Page Dialog". The main content area shows a form with two input fields: "RVT Code" with the value "RCS" and "RVT Description" with the value "RCS". Below the form is a "Fields" section containing the following information: "Input By" (ABH4), "Date Time" (7/3/2000 15:33:26), "Modification Number" (1), and two checkboxes: "Open" (checked) and "Authorized" (unchecked). An "Exit" button is located in the bottom right corner of the dialog.

You can specify the following details in this screen:

RVT Code

Specify a unique code for customer relationship value tag.

RVT Description

Specify a suitable description for the relationship value tag.

You cannot close an RVT record if it has been used for any customer-RVT code mapping.

2.3.1 Viewing RVT Code Details

You can view the details of the RVT code and also search for a desired code in the 'Relationship Value Code Maintenance Summary' screen. You can also invoke this screen by typing 'COSRVMT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screen appears as shown below:

The screenshot shows a web application window titled "Relationship Value Tag Maintenance-Summary -- Web Page Dialog". At the top, there are two dropdown menus: "Authorization Status" and "Record Status". Below them is a text input field for "RVT Code" containing the value "RCS". A search bar is located below the input field, with buttons for "Search", "Advanced Search", and "Reset". To the right of the search bar, there are controls for "Records per page" (set to 15) and "1 of 1" pages, along with a "Go to Page" field. Below the search bar is a table with the following data:

Authorization Status	Record Status	RVT Code	RVT Description
U	O	RCS	RCS

At the bottom of the screen, there are two legend boxes. The first is titled "Authorization Status" and lists "A - Authorized" and "U - Unauthorized". The second is titled "Record Status" and lists "C - Closed" and "O - Open". An "Exit" button is located in the bottom right corner of the window.

You can specify any of the following details to perform a search.

Authorization Status

Select the authorization status of the record you want to search for, from the drop-down list provided. The options possible are:

- Authorized
- Unauthorized

Record Status

Select the status of the record which you want search for, from the drop-down list provided. The options possible are:

- Open
- Closed

RVT Code

Select the code of the relationship value tag you want to search for, from the option list provided.

Click the 'Search' button to search for records according to the search criteria specified. You can also perform an advanced search using combinations of conditions by clicking the 'Advanced Search' button.

2.4 Maintaining Values for Relationship Tags

You can maintain the values for the relationship tags either manually or you can upload the same from an external system. You can maintain the values manually using the 'Customer Relationship Value Tag Code Maintenance' screen.

You can invoke this screen by typing 'CODCURVT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screenshot shows a web page dialog titled "Customer Relationship Value Tag Code Maintenance -- Web Page Dialog". The form contains the following fields and values:

- Customer Number * 00000803
- Customer Name SYNDICATEBANK
- RVT Code * FLXCUBE
- RVT Description 10.1
- RVT Code Value * 123
- Source Code ACUMENFT2

At the bottom of the dialog, there is a "Fields" tab and a section for user and system information:

- Input By: JVOTH
- Authorized By: (empty)
- Date Time: (empty)
- Modification Number: (empty)
- Authorized: (empty)
- Open: (checkbox)
- Authorized: (checkbox)
- Cancel button

You can specify the following details in this screen:

Customer Number

Select the name of the customer for whom you want to specify the relationship tag value from the option list provided

Customer Name

Customer name gets displayed automatically once you specify the customer number

RVT Code

Select the relationship tag code for which you want to specify the value, from the option list provided

RVT Description

Relationship tag description gets displayed once you specify the RVT code

RVT Code Value

Specify a value for the relationship tag selected

Source Code

Select the source code for the desired external system, from the option list provided

2.4.1 Viewing Relationship Tag Value Details

You can view the details of the relationship tag values and also search for a desired value in the 'Customer Relationship Value Code Maintenance Summary' screen. You can invoke this screen by typing 'COSCURVT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Customer Relationship Value Tag Code Summary -- Web Page Dialog

Authorization Status: Record Status:
Customer Number: RVT Code:
Source Code:

Search | Advanced Search | Reset | Records per page: 15 | 1 of 1 | Go to Page

Authorization Status	Record Status	Customer Number	RVT Code	RVT Code Value	Source Code
A	O	1080108	RTVR	500	

Authorization Status: A - Authorized, U - Unauthorized
Record Status: C - Closed, O - Open

Exit

You can specify any of the following details to perform a search.

Authorization Status

Select the authorization status of the record you want to search for, from the drop-down list provided. The options possible are:

- Authorized
- Unauthorized

Record Status

Select the status of the record which you want search for, from the drop-down list provided. The options possible are:

- Open
- Closed

Customer Number

Select the customer number whose relationship value you want to search for, from the option list provided.

RVT Code

Select the relationship value tag code you want to search for, from the option list provided

RVT Code Value

Select the relationship value you want to search for, from the option list provided

Click the 'Search' button to search for records according to the search criteria specified. You can also perform an advanced search using combinations of conditions by clicking the 'Advanced Search' button.

2.5 Maintaining Eligibility Plan

You need to maintain the eligibility criteria based on which a customer can avail the benefits of scheme. Eligibility criteria can be defined based on various customer attributes maintained as User Data Elements (UDE) or pre-shipped set of System Data Elements (SDE) and it helps to identify the target customers for a scheme. The eligibility criteria can be defined using customer RVT codes also. You can maintain the eligibility criteria for a scheme in 'Relationship Pricing Eligibility Plan' screen.

You can invoke this screen by typing 'CODELPLN' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can maintain the following details in this screen:

Eligibility Plan ID

Specify a unique ID for the eligibility plan

Eligibility Plan Description

Specify a unique description for the eligibility plan

RDE Code

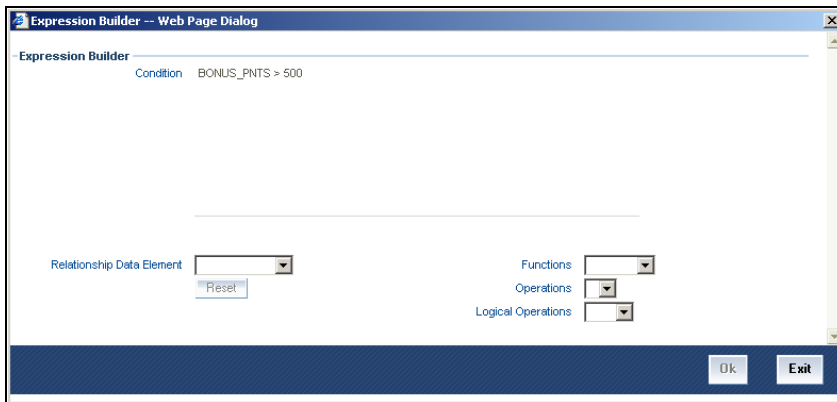

Select the relationship data element to be used to build the eligibility criteria expression. All system data elements, user data elements, and customer RVT codes are available for selection in the option list provided.

RDE Parameter Value

Specify a value for the relationship data element selected

2.5.1 Creating Eligibility Condition

You can build the condition to be evaluated to verify the eligibility of a customer by clicking the 'Expression Builder' button. The 'Expression Builder' screen is displayed.

You can specify the following details to build the eligibility criteria expression:

Condition

Specify the eligibility evaluation condition, using the relationship data elements, functions, operations, and logical operations provided.

Relationship Data Element

Select the relationship data element to be used to build the eligibility condition. The RDE codes specified in 'Relationship Pricing Eligibility Plan' screen are displayed in the drop-down list provided.

Functions

Select the mathematical function to be used to build the eligibility condition. The following options are available:

- Abs
- Greatest
- Round
- Trunc
- Floor
- Ceil
- Power
- Mod

Operations

Select the operator to be used to build the eligibility criteria expression. The following options are possible:

- + (Addition)
- - (Subtraction)
- * (Multiplication)
- / (Division)

Logical Operations

Select the logical operator to be used to build the eligibility criteria expression. The following options are possible:

- AND
- OR
- <
- <=
- >
- >=
- <>

2.5.2 Viewing Eligibility Plan Details

You can view the details of the eligibility plans and also search for a desired plan in the 'Relationship Pricing Eligibility Plan Summary' screen. You can invoke this screen by typing 'COSELPLN' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screen appears as shown below:

Authorization Status	Record Status	Eligibility Plan ID	Eligibility Plan Description	Condition
A	O	RP_BONUS_POINT	RP_BONUS_POINT	BONUS_POINTS > 500
A	O	PLAN1	Eligibility Plan1	LDNOCON = 45
A	O	EL_BONUS	EL_BONUS	BONUS_PNTS > 500
A	O	PLAN	Plan1	CUST_SSN = 123

You can specify any of the following details to perform a search.

Authorization Status

Select the authorization status of the record you want to search for, from the drop-down list provided. The options possible are:

- Authorized
- Unauthorized

Record Status

Select the status of the record which you want search for, from the drop-down list provided. The options possible are:

- Open
- Closed

Eligibility Plan ID

Select the eligibility plan you want to search for, from the option list provided.

Click the 'Search' button to search for records according to the search criteria specified. You can also perform an advanced search using combinations of conditions by clicking the 'Advanced Search' button.

2.6 Maintaining Pricing Variance Rule

You can maintain the price or rate variance rules at module level where you can specify the rule conditions based on the module specific attributes available. You can specify multiple conditions based on which the preferential variance for eligible customers can be derived. You can define the variance rule in 'Relationship Pricing Variance Rule Maintenance' screen.

You can invoke this screen by typing 'CODVARRL' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Relationship Data Element	RDE Parameter Value
RVT1	

Expression Builder

Input By: AKS1 Date Time: 7/3/2000 14:15:38 Modification Number: 1 Open
Authorized By: AKS1 Date Time: 7/3/2000 14:15:39 Authorized

You need to specify the following details in this screen:

Variance Rule ID

Specify a unique ID for the variance rule

Variance Rule Description

Specify a suitable description for the variance rule

Module

Select the module to which you wish to associate the variance rule, from the option list provided

Variance Rule Basis

Select the price component based on which you want to define the variance rule. The following options are available:

- Interest
- Charge
- Commission
- Fees

Variance Rule Type

Select the type of the value being returned by the variance rule, from the option list provided. The following options are available for selection:

- Fixed Rate - applicable if you have selected 'Interest' as Variance Rule Basis. Variance rule returns a fixed rate, in this case, which can be used for pricing computation
- Fixed Amount - variance rule returns a fixed amount, which can be used for pricing computation
- Variance Rate – applicable if you have selected 'Interest' as Variance Rule Basis. Variance rule returns the variance rate over the base rate computed, which is added to or subtracted from the base rate
- Variance Amount - returns the variance amount to be added to or subtracted from the base rate
- Percentage - returns a percentage to be applied to the base amount or base rate computed to arrive at the final value

The options 'Fixed Amount' and 'Variance Amount' are not applicable if you have specified 'Interest' as Variance Rule Basis

Variance Currency

Select the currency associated with the variance rule from the option list provided. You need to specify this if you have selected 'Fixed Amount' or 'Variance Amount' as Variance Rule Type.

2.6.1 Specifying Relationship Data Elements

Relationship Data Element is a collection of UDE, SDE (module specific and customer specific) and Customer RVT codes which is used to build the variance rule. You can maintain the following details to build the variance rule:

Relationship Data Element

Select the relationship data element to be used to build the variance rule. The option list contains all SDEs, UDEs, and customer RVT codes, available for selection.

RDE parameter value

Specify a value for the RDE parameter selected

2.6.2 Specifying Conditions for Variance Rule

You can build the expressions and specify conditions to derive the variance rule using the 'Expression Builder' screen.

Click the 'Expression Builder' button to invoke the 'Expression Builder' screen.

Condition	Result
RVT1 >1000	2

Relationship Data Element: [Dropdown]
Reset [Button]
Function: [Dropdown]
Operators: [Dropdown]
Logical Operators: [Dropdown]
Ok [Button] Exit [Button]

You can specify the conditions for deriving the variance rule, in this screen

Condition

Specify the condition for building the variance rule

Result

Specify the result of the execution of the variance rule, in terms of rate or amount

Relationship Data Element

Select the RDE to be used to build the variance rule expression. All the RDEs selected previously for this variance rule are displayed in the option list.

Function

Select the mathematic function to be used to build the variance rule, from the drop-down list provided. The following options are available:

- Abs
- Greatest
- Round
- Trunc

- Floor
- Ceil
- Power
- Mod

Operators

Select the operator to be used to build the variance rule expression. The following options are available:

- + (add)
- - (subtract)
- * (multiply)
- / (divide)

Logical Operators

Select the logical operator to be used to build the variance rule expression. The following options are available:

- AND
- OR
- <
- <=
- >
- >=
- <>

You can specify any number of conditions using combinations of mathematical functions, operators, and logical operators.

Example

The following example demonstrates the building of a variance rule.

A variance rule needs to be set up to derive beneficial interest rates for customers based on loan amount. If the loan amount is greater than 250,000 then interest rate needs to be decreased by 1% and if the loan amount is greater than 500,000 then the decrease should be 1.5%.

For the above rule, the setup can be as follows

Setup	Values
Module	LD
RDE	TXN_AMOUNT
Variance Rule basis	Interest rate
Return type	Percentage
Condition1	TXN_AMOUNT > 250000 AND TXN_AMOUNT < 500000

Setup	Values
Result 1	-1
Condition2	TXN_AMOUNT >= 500000
Result 2	-1.5

2.6.3 Viewing Variance Rule Details

You can view the details of the variance rule and also search for a rule for a specific module or type in the 'Relationship Pricing Variance Rule Maintenance Summary' screen. You can invoke this screen by typing 'COSVARRL' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screen appears as shown below:

The screenshot shows the 'Relationship Pricing Variance Rule Maintenance -- Web Page Dialog' window. It features several search filters at the top: Authorization Status (dropdown), Record Status (dropdown), Variance Rule Id (text input with 'ABCD'), and Variance Rule Type (dropdown). Below these is a search bar with 'Search', 'Advanced Search', and 'Reset' buttons, along with 'Records per page' (set to 15) and 'Go to Page' (set to 1 of 1). The main area contains a table with the following data:

Authorization Status	Record Status	Variance Rule Id	Variance Rule Description	Variance Rule Basis	Variance Rule Type	Module
A	O	ABCD	dasd	I	F	MM

At the bottom left, there are two legend boxes: 'Authorization Status' with 'A - Authorized' and 'U - Unauthorized', and 'Record Status' with 'C - Closed' and 'O - Open'. An 'Exit' button is located at the bottom right of the window.

You can specify the following details to search for a variance rule:

Authorization Status

Select the authorization status of the record you want to search for, from the drop-down list provided. The options possible are:

- Authorized
- Unauthorized

Record Status

Select the status of the record which you want search for, from the drop-down list provided. The options possible are:

- Open
- Closed

Variance Rule ID

Select the variance rule you want to search for, from the option list provided

Module

Select the module for which you want view the variance rule details, from the option list provided

Variance Rule Basis

Select the basis of the variance rule which you want to search for, from the option list provided. The following options are available:

- Interest
- Charge
- Commission
- Fees

Variance Rule Type

Select the type of the variance rule you want to search for, from the option list provided. The following options are available for selection:

- Fixed Rate
- Fixed Amount
- Variance Rate
- Variance Amount
- Percentage

Click the 'Search' button to search for records according to the search criteria specified. You can also perform an advanced search using combinations of conditions by clicking the 'Advanced Search' button.

2.7 Maintaining Benefit Plan

You can define the benefits offered to eligible customers on availing a scheme, in the 'Relationship Pricing Benefit Plan' screen. Benefits can be defined in terms of any of the following:

- Preferential interest rates for loan products
- Beneficial charges/fees for various transactions
- Preferential commission variance
- Preferential rates for periodic interest and charges

You can define benefits at module level, for more than one product and price component combination. You can invoke this screen by typing 'COBENFT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screen appears as shown below:

Product *	Price Component Type	Price Components *	Benefit Type	Variance Type	Variance Currency	Variance
ENAM	Interest	MM_CLAS1	Variance	Fixed Rate	USD	

You can specify the following details in this screen:

Benefit Plan ID

Specify a unique identification for the pricing benefit plan

Benefit Plan Description

Specify a suitable description for the benefit plan

Module

Select the module for which you want to maintain the benefit plan from the option list provided

Priority Number

Specify the priority number to be associated with the benefit plan for the selected module

The priority number specified should be unique across all benefit plans for a given module

2.7.1.1 Specifying Pricing Benefit Details

You can specify the following pricing preferences for the benefit plan:

Product

Select the product to which you want to associate the benefit plan from the option list provided. All the valid product codes for the selected module are displayed in the list.

Price Component Type

Select the type of the price component from the drop-down list. The following options are available:

- Interest
- Charge
- Fee
- Commission

Price Components

Select the price class components to be associated with the benefit plan. The option list displays the valid price class components maintained, based on the product code and price component type specified.

Example

For an LD Product if you select the price component type as Interest, the price components list will display Interest Class components mapped to the LD product.

If you specify price component type as Charge, the price components list will display Charge Class components.

Benefit Type

Select the type of benefit from the drop-down list. The following options are available:

- Variance – a price variance is offered as benefit to the customer
- Waive – a price component waive-off is offered as benefit to the customer

Waive-off benefit is applicable for price components of type charges, fees and commission.

Variance Type

Select the type of variance to be attached to the benefit plan. This is applicable if you have specified 'Variance' as the benefit type. The following options are available:

- Fixed Rate - fixed rate will be applied over the computed base rate computed
- Variance Rate - variance rate will be either added to or subtracted from the base rate computed
- Fixed Amount - fixed amount will be applied over the computed price amount
- Variance Amount - variance amount will be added to or subtracted from the base amount computed
- Percentage - percentage of base rate or amount computed will be increased or decreased from the base rate or amount

Variance Currency

Select the currency associated with fixed amount or variance amount, from the option list provided.

Variance Value

Specify the value related to variance. This is applicable if you have selected 'Variance' as the benefit type.

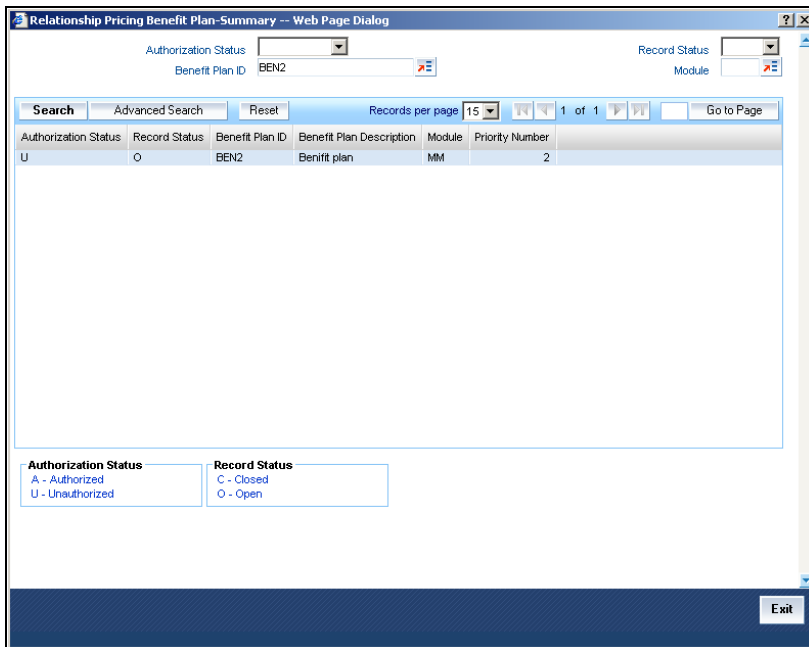

Variance Rule

Select the variance rule ID to be associated with the benefit plan, from the option list provided.

 Once you select a variance rule ID, the type of the variance rule gets defaulted in the benefit plan and you cannot change this

2.7.2 Viewing Benefit Plan Details

You can view the details of the benefit plan and also search for a benefit plan for a specific module in the 'Relationship Pricing Benefit Plan Summary' screen. You can invoke this screen by typing 'COSBENFT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Authorization Status	Record Status	Benefit Plan ID	Benefit Plan Description	Module	Priority Number
U	O	BEN2	Benefit plan	MM	2

You can search for a benefit plan by specifying the following fields:

Authorization Status

Select the authorization status of the record you want to search for, from the drop-down list provided. The options possible are:

- Authorized
- Unauthorized

Record Status

Select the status of the record which you want search for, from the drop-down list provided. The options possible are:

- Open
- Closed

Benefit Plan ID

Select the benefit plan you want to search for, from the option list provided.

Module

Select the module for which you want to view the benefit plans from the option list provided.

Click the 'Search' button to search for records according to the search criteria specified. You can also perform an advanced search using combinations of conditions by clicking the 'Advanced Search' button.

2.8 Maintaining Pricing Scheme

You can maintain the details of the pricing scheme in the 'Relationship Pricing Scheme Maintenance' screen. You can invoke this screen by typing 'CODSCHME' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screen appears as shown below:

The screenshot shows a web page dialog titled "Relationship Pricing Scheme Maintenance-Detailed". It contains several sections:

- Pricing Scheme ID:** HYHEV7
- Pricing Scheme ID Description:** HY66
- Scheme Validity Details:**
 - Scheme Start Date: 7/3/2000
 - Scheme End Date: 7/4/2000
 - Benefit Validity Period: (empty)
 - Benefit Validity Basis: (empty)
 - Scheme Advice Description: (empty)
 - Scheme Status: Active
- Validity Type:** One-Time
- Eligibility Type:** Benefits Validity Period
- Apply For:** New Customer
- Execution Type:** Manual
- Benefit End on Scheme Expiry

Below these fields is a table with two tabs: "Benefit Details" and "Eligibility Details". The "Benefit Details" tab is active, showing a table with the following data:

Benefit Plan ID *	Benefit Plan Description
HS_BEN_PLN2	GCGHCFD

At the bottom of the dialog, there is a "Fields" section with the following information:

Input By: SHRAVANI Date Time: 7/3/2000 16:45:05 Modification Number: 1
Authorized By: SHRAVANI Date Time: 7/3/2000 16:45:05

There are checkboxes for "Open" and "Authorized", and an "Exit" button.

You can maintain the following details specific to the scheme in this screen:

Pricing Scheme ID

Specify a unique ID for the pricing scheme

Pricing Scheme ID Description

Specify a suitable description for the pricing scheme

Scheme Start Date

Specify the effective start date of the pricing scheme. Select the start date by clicking the adjoining calendar icon

Scheme End Date

Specify the end date of the scheme. Select the end date by clicking the adjoining calendar icon

Benefit Validity Period

Specify the period through which the benefits will be made available to the customer, in terms of days, months or years. This date is applicable under the following conditions:

- Scheme ceases to exist, but benefits are given to the customers for a period of time
- Scheme is active, but the benefits are given to the customers for a short period of time

Benefit Validity Basis

Select the basis of specifying the validity period, from the drop-down list provided. The following options are available:

- Days
- Months
- Years

Scheme Advice Description

Specify a suitable description for the scheme advice

Scheme Status

Status of the scheme is displayed as 'Active', by default

The status of the scheme changes to 'Expired', on the end date specified for the schema

Validity Type

Select the way of applying the scheme benefits from the drop-down list. The following options are available:

- One-Time – benefits are made available to eligible customers only once
- Renewable – scheme benefits are made available to the customers till the expiry of the scheme
- Perpetual – benefits offered to eligible customers continue to be available to the customers even if they fall out of the eligibility conditions

Eligibility Type

Select the duration of the benefit validity from the drop-down list. The following options are available:

- Benefits Validity Period
- Scheme Validity Period

Apply For

Select the customers for which the pricing scheme is applicable, from the drop-down list. The following options are available:

- New customer
- All customers
- Existing customers

A customer is identified as new or existing based on their creation date and scheme start date

Execution Type

Select the type of application of the pricing scheme, from the drop-down list. The following options are available:

- Manual
- Automatic

Benefit End on Scheme Expiry

Select this checkbox to indicate that the customer scheme benefits expire on reaching the scheme end date, in cases where the validity period exceeds the scheme end date.

2.8.1 Specifying Benefit Details

You can select the benefit plans to be applicable for a pricing scheme in the 'Benefit Details' tab. The following details related to the benefit plan are displayed:

- Benefit Plan ID
- Benefit Plan Description

Select the checkbox against any desired benefit plan to make it a part of the pricing scheme

2.8.2 Specifying Eligibility Details

You can specify the eligibility details of the pricing scheme in the 'Eligibility Details' tab.

Relationship Pricing Scheme Maintenance-Detailed ... Web Page Dialog

Pricing Scheme ID * TEST002
Pricing Scheme ID Description * Testing Screen

Scheme Validity Details

Scheme Start Date * 7/3/2000
Scheme End Date * 7/5/2000

Cancel

You can specify the following details related to eligibility:

Eligibility Plan ID

Select the eligibility criteria for a customer to avail the benefits of a scheme, from the option list provided. All valid eligibility plans are displayed in the list

Eligibility Revision Frequency

Select the frequency at which the eligibility plan gets revised, from the drop-down list. The following options are possible:

- Daily
- Weekly
- Fortnightly
- Monthly
- Quarterly
- Half Yearly
- Yearly

First Revision Date

The date on which the first execution of the eligibility plan happened, is displayed here

Last Revision Date

The last revision date of the scheme eligibility is displayed here

Next Revision Date

The date on which next revision of the eligibility plan should happen is displayed here. This value is arrived at, based on the last revision date and the revision frequency specified.

2.8.3 Viewing Pricing Scheme Details

You can view the details of the pricing scheme and also search for a scheme in the 'Relationship Pricing Scheme Maintenance Summary' screen. You can invoke this screen by typing 'COSSCHME' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Authorization Status	Record Status	Pricing Scheme ID	Pricing Scheme ID Description	Scheme Start Date	Scheme End Date	Validity Type	Apply

You can search for a pricing scheme by specifying any of the following fields:

Authorization Status

Select the authorization status of the record you want to search for, from the drop-down list provided. The options possible are:

- Authorized
- Unauthorized

Record Status

Select the status of the record which you want search for, from the drop-down list provided. The options possible are:

- Open
- Closed

Pricing Scheme ID

Select the pricing scheme you want to search for, from the option list provided

Scheme Start Date

Specify the start date of the pricing scheme you want to search for

Scheme End Date

Specify the end date of the pricing scheme you want to search for

Validity Type

Select the validity type of the pricing scheme you want to search for, from the drop-down list provided

Apply For

Select the customers for which the pricing scheme you want to search for is applicable, from the drop-down list. The following options are available:

- New customer
- All customers
- Existing customers

Execution Type

Select the type of application of the pricing scheme you want to search for, from the drop-down list. The following options are available:

- Manual
- Automatic

Click the 'Search' button to search for records according to the search criteria specified. You can also perform an advanced search using combinations of conditions by clicking the 'Advanced Search' button.

2.9 Maintaining Customer Scheme Linkage

You can link a customer to a pricing scheme in the 'Customer Scheme Manual Linkage' screen. The benefits of the scheme are applied to the customer for the validity period specified.

You can invoke this screen by typing 'CODCUSCM' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

<input type="checkbox"/>	Scheme ID *	Scheme Description	Benefit Start Date *	Benefit End Date *
<input type="checkbox"/>	CL_SCH_01	CL_SCH_01 for Promotion	7/3/2000	11/3/2000

You can specify the following details in this screen:

Customer Number

Select the customer for whom you want to link the pricing scheme, from the option list provided. All customers who have opted for relation pricing are displayed in the list.

Customer Name

Name of the customer gets displayed, once you select the customer number

Scheme ID

Select the scheme ID to be linked to the customer number, from the option list provided

You can link more than one scheme to a customer number

Scheme Description

The description associated with the scheme gets displayed, once you select the scheme ID

Benefit Start Date

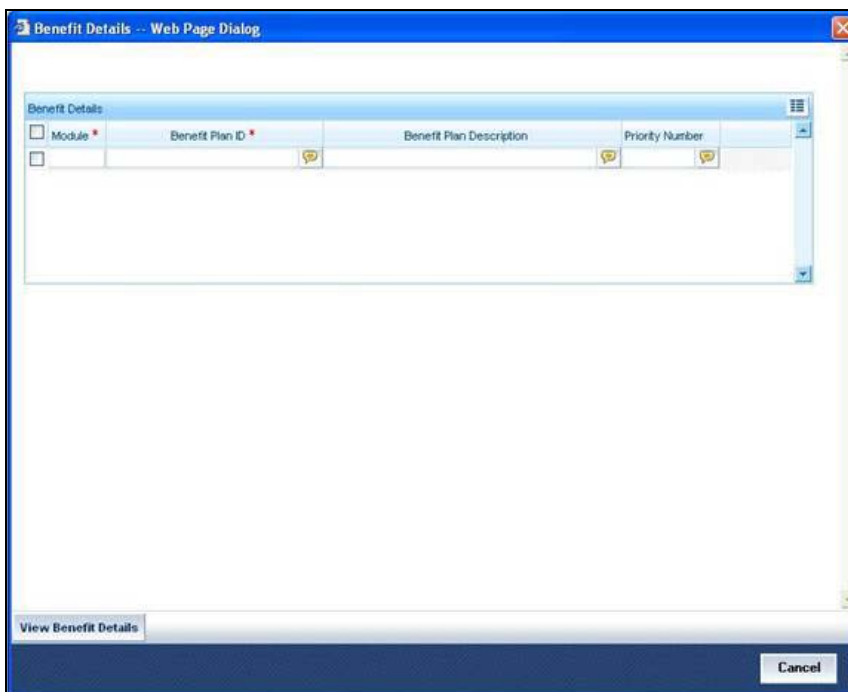

Specify the date on which the scheme benefits starts to be applied for the customer

Benefit End Date

Specify the date on which the scheme benefits cease to exist for the customer

2.9.1 Viewing Benefit Plans

Select a benefit scheme and click the 'View Benefit Plan' button to view the benefit plans associated with the selected scheme.

The following details related to the benefit are displayed:

- **Module** - module to which the benefit is related
- **Benefit Plan ID** - unique identification of the benefit plan
- **Benefit Plan Description** - description linked to the benefit plan ID
- **Priority Number** - priority number assigned to the benefit plan

2.9.2 Viewing Pricing Benefit Details

Select a row in 'Benefit Details' and click the 'View Benefit Details' to view the details associated with the selected benefit plan. The following screen is displayed.

The screen appears as shown below:

Product	Price Component Type	Price Components	Benefit Type	Variance Type	Variance Currency	Variance
AKLC	Charge	LC-SWMFTIS	Variance	Fixed Amount	USD	

Input By AKS2 Date Time 7/3/2000 15:45:49 Modification Number 1 Open
Authorized By AKS2 Date Time 7/3/2000 15:45:49 Authorized **Exit**

The details associated with the selected benefit plan are displayed here

If the benefit selected in 'Benefit Details' screen is related to Consumer Lending module, the following screen gets displayed.

The screen appears as shown below:

Promotion Code * PR01
Promotion Start Date 7/3/2000
Promotion Desc Promotion1
Promotion End Date

Preferences Components

Fields

Input By ABH1 Date Time 7/3/2000 11:43:34 Modification Number 1 Open
Authorized By ABH2 Date Time 7/3/2000 11:45:02 Authorized

The following details related to the benefit plan selected are displayed:

- Benefit or promotion plan identification and description
- Start date and end date of the promotion
- Tenor details and the holiday period details
- Related UDEs and corresponding values
- Schedule details of the principal and interest components

2.9.3 **Viewing Linkage Details**

You can view the details of customer scheme linkages and also search for a customer in the 'Customer Scheme Manual Linkage Summary' screen. You can invoke this screen by typing 'COSCUSCM' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screen appears as shown below:

Authorization Status	Record Status	Customer Number
A	O	AAA111
A	O	CUS102CUS

You can specify any of the following details to perform a search

Authorization Status

Select the authorization status of the record you want to search for, from the drop-down list provided. The options possible are:

- Authorized
- Unauthorized

Record Status

Select the status of the record which you want search for, from the drop-down list provided. The options possible are:

- Open
- Closed

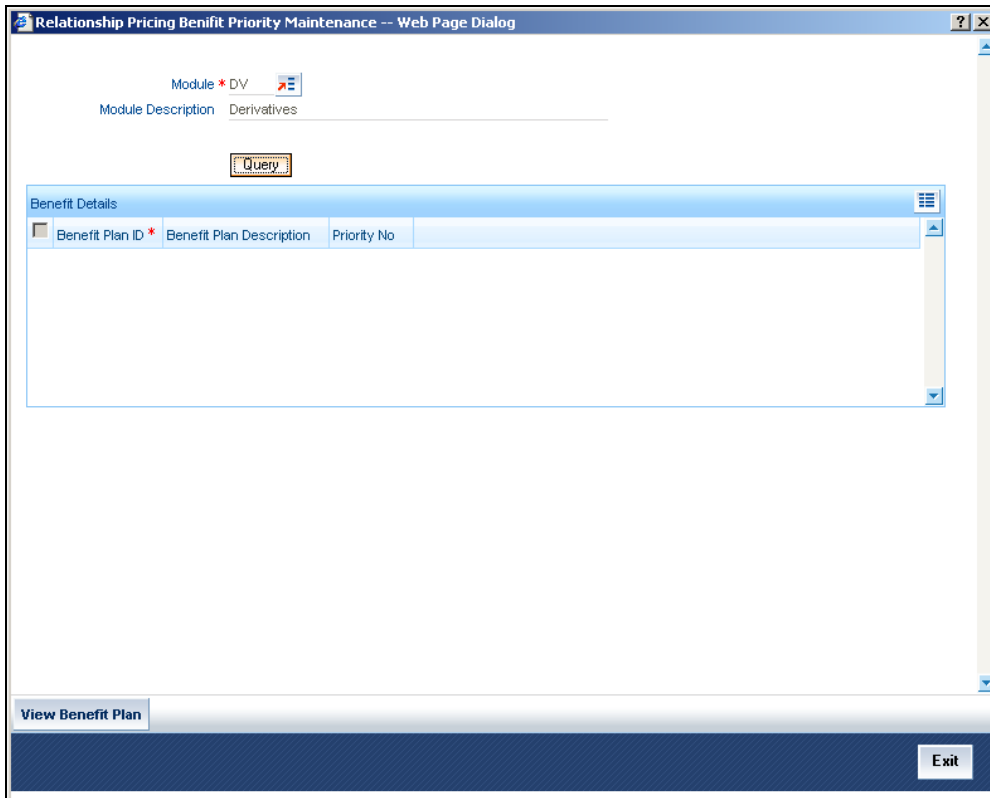

Customer Number

Select the customer number whose relationship value you want to search for, from the option list provided.

Click the 'Search' button to search for records according to the search criteria specified. You can also perform an advanced search using combinations of conditions by clicking the 'Advanced Search' button.

2.10 Changing Benefit Plan Priority

You can modify the priority value associated with a benefit plan for a given module in the 'Relationship Pricing Benefit Priority Maintenance' screen. You can invoke this screen by typing 'COBENPR' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You need to specify the following details to change the priority of a benefit plan.

Module

Select the module for which you want to change the benefit plan priority number. All modules for which benefit plans are defined are displayed in the option list.

Module Description

The description associated with the selected module is displayed here

Benefit Plan ID

Select a module and click the 'Query' button to view the valid benefit plan IDs for that module

Benefit Plan Description

The description associated with the benefit plan ID is displayed here

Priority

The priority number linked to the benefit plan is displayed here. You can change the priority number in such a way that it remains unique for a benefit plan within a given module.

2.10.1 Viewing Benefit Plan Details

Select a benefit plan ID and click the 'View Benefit Plan' button to view the details of the selected benefit plan

2.11 Changing Customer Scheme Linkage Status

You can view and change the status of customer scheme linkages in the 'Customer Scheme Linkage Status Change' screen. All the schemes linked to the customer are displayed in this screen, with the respective status.

You can invoke this screen by typing 'CODSCMST' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Scheme ID	Eligibility Plan ID	Benefit Start Date	Benefit End Date	Linkage Status	Previous
CUSTAGE	CUST_AGE	2000-08-22	2000-10-21	Active	Active

You can specify the following details in this screen:

Customer Number

Select the customer whose scheme status you would like to change, from the option list provided

Scheme ID

Select the ID of the scheme whose status you want to change, from the option list

Scheme Description

The description associated with the scheme gets displayed, once you select the Scheme ID

2.11.1.1 Viewing Scheme Details

The following details related to the scheme are displayed.

- Scheme ID
- Eligibility plan ID
- Benefit start date and end date

- Linkage status and the status of previous linkage
- Linkage Date
- Date of last status change and the reason for change

Linkage Status

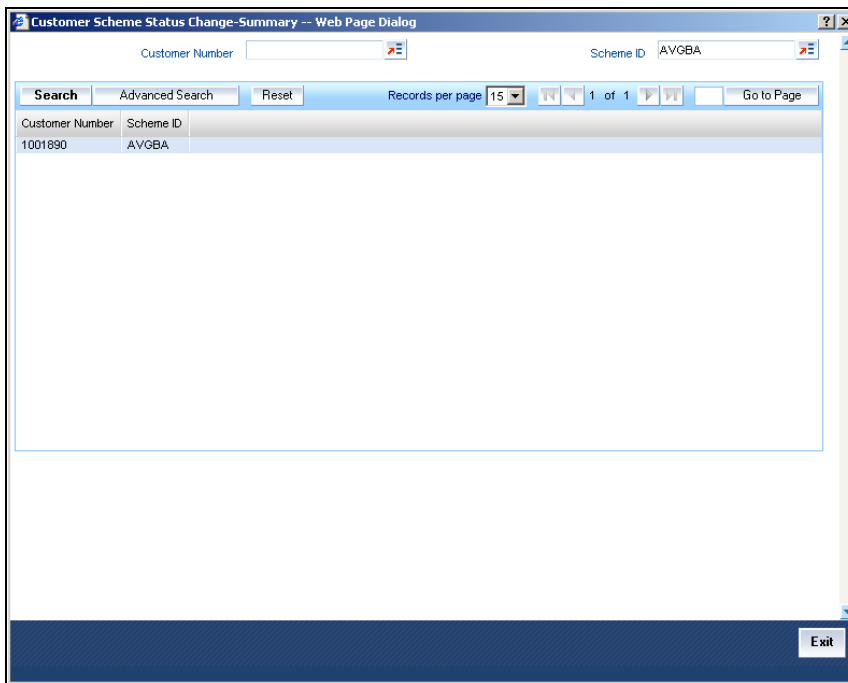

Select the status of the scheme linkage from the drop-down list provided. The following options are available:

- Active
- Waiting for Acceptance
- Expired
- Expired/Renewable
- Rejected

2.11.2 Viewing Status Change Details

You can view the details of scheme linkage status and also search for a linkage in the 'Customer Scheme Status Change Summary' screen.

You can invoke this screen by typing 'COSSCMST' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify any of the following details to perform a search

Customer Number

Select the customer number you want to search for, from the option list provided

Scheme ID

Select the scheme ID you want to search for, from the option list provided

Click the 'Search' button to search for records according to the search criteria specified. You can also perform an advanced search using combinations of conditions by clicking the 'Advanced Search' button.

2.12 Viewing Customer Scheme Linkages

You can view the schemes linked to a customer number in 'Customer Scheme Linkage Query' screen. You can invoke this screen by typing 'CODSCMQY' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screen appears as shown below:

Scheme ID	Eligibility Plan ID	Benefit Start Date	Benefit End Date	Linkage Status	Previous Linkage Status	Linkage Date	Last
-----------	---------------------	--------------------	------------------	----------------	-------------------------	--------------	------

Customer Number

Select the customer whose scheme linkages you would like to change. All valid customer numbers with scheme linkages are displayed in the option list.

Linkage Status

Select the linkage status of the scheme which you want to modify. The following options are available:

- All
- Active
- Waiting for Acceptance
- Expired
- Expired/Renewable
- Rejected

Click the 'Query' button to get the details of the schemes attached to the customer in 'Scheme Details'.

Scheme ID

All scheme IDs linked to the selected customer are displayed

Eligibility Plan ID

The eligibility plan ID maintained for the scheme is displayed here. For manual linkages the eligibility plan ID is displayed as MANUAL

Benefit Start Date

The date when the scheme was applied to the customer is displayed

Benefit End Date

The end date of the benefits received by the customer is displayed here

Current Status

The current status of the scheme application to the customer is displayed here. The following values are possible:

- Active
- Expired
- Expired/Renewable
- Waiting for Acceptance
- Rejected

You can change the status of the scheme linkages under the following conditions:

- Reject – this status can be selected if the current status of scheme linkage is any of the following:
 - Active
 - Waiting for Acceptance
 - Expired/Renewable

On rejection, the linkage status changes to 'Rejected'

- Accept - this status can be selected if the current status of scheme linkage is 'Waiting for Acceptance'. On acceptance the linkage status changes to 'Active'

Status Change Reason

The reason for changing the status is indicated here

Last Status Change Date

The date on which the customer scheme linkage status was last changed, either by the system or manually, is displayed here

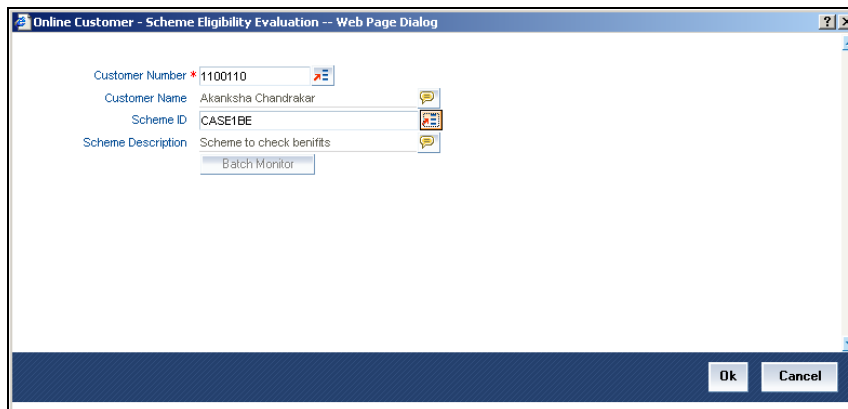

Previous Linkage Status

The previous status of linkage, in case the current linkage status is changed manually or by system, is displayed here

2.13 Evaluating Customer Scheme Online

You can perform an online evaluation of customer eligibility for a scheme using the 'Online Customer – Scheme Eligibility Evaluation' screen. All eligibility plans associated with active schemes are evaluated and if the customer is eligible for a scheme, then customer scheme linkage gets established.

You can invoke this screen by typing 'CODELEBT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screenshot shows a web page dialog titled "Online Customer - Scheme Eligibility Evaluation -- Web Page Dialog". It contains the following fields and controls:

- Customer Number * 1100110 (with a dropdown arrow)
- Customer Name Akanksha Chandrakar (with a dropdown arrow)
- Scheme ID CASE1BE (with a dropdown arrow)
- Scheme Description Scheme to check benefits (with a dropdown arrow)
- Batch Monitor (button)
- Ok (button)
- Cancel (button)

You need to specify the following details to evaluate the customer eligibility for a scheme:

Customer Number

Select the customer number for which you would like to evaluate scheme eligibility, from the option list provided.

Customer Name

The name of the selected customer is displayed here

Scheme ID

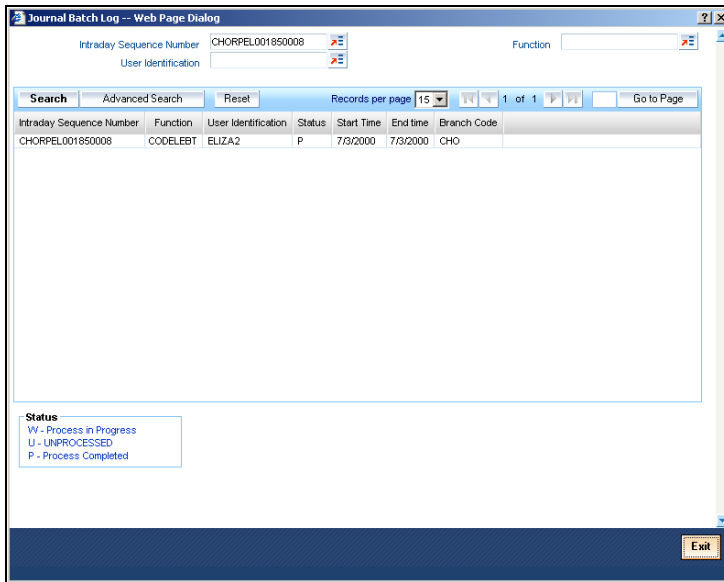

Select the scheme ID for which you want to perform eligibility evaluation, from the option list provided

Scheme Description

The description associated with the selected scheme is displayed here

Click the 'Ok' button to submit the batch for processing. After submitting the batch, click the 'Batch Monitor' button to view the status of the batch. The status of the process is displayed in the 'Journal Batch Log' screen.

The screen appears as shown below:

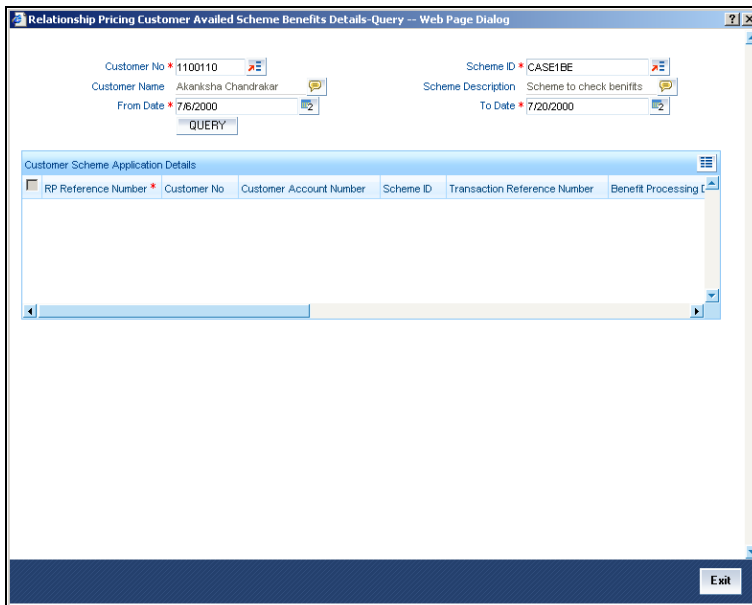

The status of the process can be any of the following:

- W – Process in Progress
- U – Unprocessed
- P – Process Completed

2.14 Viewing Customer Availed Scheme Benefits

You can view the details of the benefits availed by the customers in the 'Customer Availed Scheme Benefit Details' screen. You can invoke this screen by typing 'CODCUSCH' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screen appears as shown below:

You need to specify the following to view the benefit details availed by the customer:

Customer Number

Select the customer number for which you would like to view the benefit details

Customer Name

The name of the selected customer is displayed here

Scheme ID

Select the scheme availed by the customer, whose details you want to view

Scheme Description

The description associated with the selected scheme is displayed here

From Date

Specify the date from which the scheme is applicable for the customer

To Date

Specify the date up to which the scheme is applicable to the customer

Click the 'QUERY' button to view the following details related to the benefits availed by the customer.

- Customer Number
- Customer Account Number
- Transaction Reference Number
- Benefit Processing Date
- Scheme ID
- Benefit Plan ID
- Eligibility Plan ID
- Price Component
- Benefit Type
- Variance Type
- Variance Value
- Variance Currency
- Original Computed Price
- Final Price
- Price Currency

2.15 Processing Relationship Pricing Batch

Relationship pricing batch evaluates the eligibility criteria for customers who have opted for relationship pricing, and links the schemes applicable to the customers. The customer linkage status also gets changed during the batch. This batch is run at the head office level, during EOD, after marking End of Financial Input (EOFI).

The batch process involves the following main activities:

- Changing scheme status
- Evaluating scheme eligibility
- Applying scheme benefits

The linkage status of customers, whose benefits have expired, will change to 'Expired' during EOD as part of the batch

2.15.1 Changing Scheme Status

The status change of the scheme happens before the evaluation of the scheme eligibility. On the end date of the scheme, the status of the scheme changes to 'Expired'. If the scheme has the 'Benefits End on Scheme Expiry' option enabled, then all the related customer scheme linkages will be marked as 'Expired'.

2.15.2 Evaluating Scheme Eligibility

All the active schemes with first revision date or next revision date less than or equal to application date are considered for eligibility evaluation.

Following validations are carried out for schemes with different validity types:

- **Perpetual validity** – customers created within the benefit period are not considered for eligibility evaluation
- **One-time validity** – customers created within the benefit period are considered for eligibility evaluation. If the customer does not satisfy the eligibility conditions, then the benefits will not be given to customer again. The status of such customer scheme linkages will be marked as 'Expired'.
- **Renewable validity** – customers created within the benefit period are considered for evaluation. If the customer does not satisfy the eligibility conditions, then the benefits will not be given to customer till the customer becomes eligible again. The status of such customer scheme linkages will be marked as 'Expired'/'Renewable'.

The eligibility evaluation is carried out as follows in case of new customers and existing customers:

2.15.2.1 New Customers

Following conditions need to be satisfied for a new customer to avail the benefits of relationship pricing schemes:

- Customer should have opted for relationship pricing
- Customer creation date should not be less than the scheme start date
- Customer should satisfy the eligibility criteria associated with scheme eligibility plan

Customer scheme linkage is established with status as 'Active' if the scheme execution type is 'Automatic'. The status will be 'Waiting for Acceptance' if the scheme execution type is 'Manual'.

2.15.2.2 Existing Customers

For existing customers, the customer creation date should be less than scheme start date.

At the end of the batch process, the next revision frequency for the scheme eligibility gets updated based on revision frequency.

Note the following:

- Eligibility evaluation will not happen for customers who already have the schemes linked to them, after the benefit validity period, if the scheme eligibility type is Benefit Validity period.
- Eligibility evaluation will happen for customers who already have the schemes linked to them, after the benefit validity period, if the scheme eligibility type is Scheme period.
- Eligibility evaluation will not happen till the end of the benefit period, for customers whose schemes have been manually linked

2.15.3 Applying Scheme Benefits

The benefits of the scheme are applied to customers only after the eligibility evaluation of the scheme during EOD. The eligible customers can avail the benefits of the scheme only from next branch working day. The following activities are involved in the application of scheme benefits for eligible customers:

- The system checks if the customer is eligible for any scheme benefits for the product and price component associated with the transactions or contracts involved, and for eligible customers the pricing process is changed based on the benefit type.
- If the customer has more than one benefit plan for the same product and price component combination, then benefit plan with the least priority number is taken up for processing.
- If the benefit plan type is waive-off, then the price component computation is done and the final price will be waived off.
- If the benefit plan is of variance type, then the variance rate or amount is applied. If a variance rule is attached to the price component, then the variance rule is evaluated to get the variance rate or amount.
- After applying benefit variance, the final rate or amount will be checked against the minimum and maximum limits set at module product level.
