This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Purpose

This guide is designed to help user quickly get acquainted with the features and functionality of **Oracle Banking Retail Deposits Cloud Service**. It provides an overview to the product and the steps involved in the creation and the maintenance of Retail Deposits.

Audience

This user guide is intended for the following end Users / User Roles in a Bank:

Table User Roles

| User Role | Functions |
|---------------------------------------|------------------------------------------------|
| Back Office Clerk | Input functions for contracts |
| Back Office Managers/Officers | Authorization functions |
| Product Managers | Product definition and authorization |
| End of Day Operators | Processing during End of Day/ Beginning of Day |
| Financial Controller/Product Managers | Generation of reports |

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

| Convention | Meaning | |
|------------|----------------------------------------------------------------------------------------------------------------------------------------|--|
| boldface | Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary. | |
| italic | Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values. | |
| monospace | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. | |

Related Documents

The related documents are as follows:

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table Abbreviations

| Abbraviation | Definition |
|--------------|----------------------------------------|
| Abbreviation | Definition |
| ATM | Automated Teller Machine |
| BBAN | Basic Bank Account Number |
| CASA | Current and Savings Account User Guide |
| ECA | External Credit Approval |
| EOD | End of Day |
| GL | General Ledger |
| IBAN | International Bank Account Number |
| LOV | List of Values |

Table (Cont.) Abbreviations

| Abbreviation | Definition |
|--------------|------------------------------|
| MMDA | Money Market Deposit Account |
| TD | Term Deposit |

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Basic Actions

This topic describes about basic actions that can be performed on a screen.

Table Basic Actions

| Action | Applicable Stages | Description | |
|---------|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Approve | Approval | The system displays a section where approval remarks if any can be input. Click OK to submit. The transaction is sent to the Host system through OBRH. The Host system validates the transaction again and the transaction is created if all the validations are successful. If the transaction fails, the transaction is moved to Handoff retry stage, and user can view the error message. In this stage, the authorizer can retry or reject the transaction. On reject, the transaction is sent back to the maker to modify or delete it. | |
| | | Note: The maker checker validation will be provided if the same maker tries to approve the transaction. | |
| Audit | Initiation, Approval and Hand off Retry | Audit details provide the logs of users who have acted on the transaction, the transaction date, and the time for all stages that the transaction has passed through. | |
| Back | Initiation, Approval, and Hand off Retry | In case the user missed to specify or need to modify the details in the previous segment, click to navigate to the previous segment. | |
| Cancel | Initiation, Approval and Hand off Retry | Cancel operation cancels the transaction input midway without saving any data. The user is alerted that the input data would be lost before confirming the cancellation. | |

Table (Cont.) Basic Actions

| Action | Applicable Stages | Description |
|------------|--------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Change Log | Approval | When the authorizer clicks on the Change Log button, the system displays the changes made to the transaction in a pop-up window. By default, the change log is set to display only modified values. The Change Log button has two options, they are, All and Updated . The All button displays both modified and non-modified fields and the Updated button displays only the modified fields. The old and new values are displayed so that the authorizer can compare or verify the values and decide on further action. Also, the new values appear is red for easy recognition. |
| Close | Initiation, Approval and Hand off Retry | Users can close the transaction input screen. The system displays a warning message to the user that any unsaved data would be lost. User can either choose to ignore the message and close the screen or choose to 'save and close' the transaction. |
| Delete | Initiation | Delete operation deletes the transaction without saving any data. The user is alerted that the input data would be lost before confirming the deletion. |
| Document | Initiation, Approval and Hand-off Retry | The maker of the transaction can click on 'Document' to upload documents that are relevant to the transaction. Once uploaded, the documents are available for viewing during authorization or by the maker. |
| Host Error | Hand Off Retry | Hand off Retry' comes into use whenever a transaction input from the mid-office system fails authorization due to Host System rejection. The authorizer of the transaction can view the reason for Host rejection and take appropriate action. |
| i icon | Initiation, Approval and Hand-off Retry | To view the Customer details such as the photograph, signature, customer ID, Account Branch, and balance, the 'i' icon is used. The 'i' icon becomes active once the maker of the transaction inputs the account number and tabs out of the field. The 'i' icon is useful to inquire customer information about both the debit and the credit account numbers. |
| Maximize | Initiation, Approval and Hand off Retry | User can maximize the transaction input screen. |
| Minimize | Initiation, Approval and Hand-off Retry | Users can minimize the transaction input screen. When the screen is minimized, it appears as to a separate tab within the same web page. |

Table (Cont.) Basic Actions

| Action | Applicable Stages | Description |
|-------------------|--------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Overrides | Initiation, Approval and Hand-off Retry | If override messages had appeared during initiation stage and they were accepted by the maker during submission, the Overrides button appears in the Initiation screen if the transaction is subsequently rejected by the authorizer. |
| | | On the Override Details section, click Decline to go back to the transaction screen to modify or cancel it, or click Accept to complete the initiation stage and move the transaction to the approval stage. The Overrides button is displayed in the Approval and Hand-off retry stage if there were any override messages generated during initiation and accepted by the maker. When the Overrides button is clicked, the system displays the overrides accepted by the maker. |
| | | After verifying the transaction and override details, the authorizer can either approve or reject the transaction. Existing Approve Transaction section is modified to display the overrides if any overrides are raised during the initiation submits. |
| Reject | Approval and Hand off Retry | When an authorizer chooses to reject a transaction, the 'Reject' icon is used. The system displays a pop-up screen to capture the Rejection remarks if any. Click OK for the transaction to be routed back to the initiation stage. Subsequently, the maker can modify or delete the transaction details. |
| Remarks | Initiation, Approval and Hand-off Retry | 'Remarks' can be used either by the maker or the authorizer of the transaction to optionally capture useful information about the transaction. |
| Reset | Hand off Retry | The reset button clears all the details displayed on the screen and allows input or selection of a different customer number. |
| Retry | Hand off Retry | The possibility of retrying a transaction arises when transaction input from the mid-office system fails authorization due to Host System rejection. Such host-rejected transactions will be present in the Hand off Retry queue in the Task Wizard. The Retry option is available only to the authorizer. Upon 'Retry', the transaction is sent to the host once again through Oracle Banking Routing Hub. Optionally, the authorizer can also 'Reject' the transaction in which case it is routed back to the maker. |
| Save and Close | Initiation | In case a transaction has to be closed midway due to a lack of sufficient information, the maker of the transaction can choose this option. On 'Save and Close', the input details are saved and the transaction screen is closed. Saved transaction details will be available in 'My task'. Users can select the transaction from 'My Task' and proceed with the transaction or delete it. |
| Submit | Initiation | After submitting the initiation stage, the system validates the transaction with the host and displays the errors or overrides if any. In case of an error, you can modify and resubmit or cancel the transaction. In case of an override, you can modify and resubmit or proceed with the transaction by accepting the overrides. |

Table (Cont.) Basic Actions

| Action | Applicable Stages | Description |
|---------------------------|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Auto Authorizatio n | Initiation | Auto authorization can be configured for the branch servicing screens by creating a Rule based on life cycle code. The steps to create the Auto authorization as follows: |
| | | Create the fact value as LIFECYCLECODE. |
| | | Create Rule to enable Auto authorization for any servicing screen and add the expression in Rule for that screen's lifecycle code. While creating a Rule the product processor should be given as DEPOSIT and fact should be selected as LIFECYCLECODE. |
| | | For Example: |
| | | IF (LIFECYCLECODE == TDPOMN) |
| | | output |
| | | Section1 LEVEL:0 |
| | | 3. Create or modify a Rule Group with Name ApprovalRuleGroup and map the Rule(s) created in the step (2). |
| | | You can define one single Rule for all the screens and add the expression for the life cycle code or you can define individual Rule for each screen and map to the Rule group. |
| | | Note: For more information, refer to the Oracle Banking Common Core User Guide to create Fact, Rule and Rule Group. |

Table (Cont.) Basic Actions

| Action | Applicable Stages | Description |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Multi-Level Authorizatio n | Initiation | Multi-level authorization can be configured for the branch servicing screens by creating a Rule based on life cycle code. The steps to create the Multi-level authorization as follows: 1. Create the fact value as LIFECYCLECODE. |
| | 2. Create Rule to enable Multi-level authorization for any servicing screen and add the expression in the Rule for that screen's lifecycle code. While creating a Rule the product processor should be given as DEPOSIT and fact should be selected as LIFECYCLECODE. For Example: IF (LIFECYCLECODE == TDPYIN) output Section1 LEVEL:1~DSR_FA_TDPAYIN_AUTH, LEVEL:2~DSR_FA_TDPAYIN_AUTH | |
| | | Note: If customer wants to use separate Functional Activity Code for each Level then Rule output need to be define like LVELE:1~ <functional_activity_code1>, LVELE:2~<functional_activity_code2></functional_activity_code2></functional_activity_code1> |
| | | 3. Create or modify a Rule Group with name ApprovalRuleGroup and map the rule(s) created in the step (2). Note: You can define one single rule for all the screens and add the expression for the life cycle code or you can define individual rule for each screen and map to the rule group. Note: The maker checker validation will be provided if the same maker tries to |

Prerequisite

Specify User Name and Password, and login to Home screen.

1

Configurations

This topic contains the following **Configurations** as subtopics:

- Retail Deposits Business Product
 Users can classify the customer accounts of the bank into different groups and assign
 each group an identifying code.
- Deposit Pay-in Maintenance
 The deposit pay-ins to be done by GL, user needs to maintain the GL details through the Deposit Pay-in Maintenance screen.

1.1 Retail Deposits Business Product

Users can classify the customer accounts of the bank into different groups and assign each group an identifying code.

Each group is referred to as a **Business Product** and is maintained in the **Retail Deposits Business Product Configuration** screen. User also define certain common fields applicable to the accounts in this business product, such as the General Ledger lines to which the accounts in this report to facilities granted to the account holders.

Business Product definition and various features are captured across the following subscreens covered as subtopics.

- Basic Details
- Features
- Deposits
- Interest Charges
- MIS Details
- Provisioning and GL Details

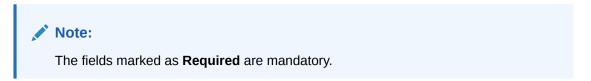

This topic contains the following subtopics:

- Create Business Product
 - This topic describes the systematic instructions to create business product. The maintenance screen allows the user to configure business product parameters.
- View Business Product

This topic explains the systematic instructions to view the list of configured business product parameters.

1.1.1 Create Business Product

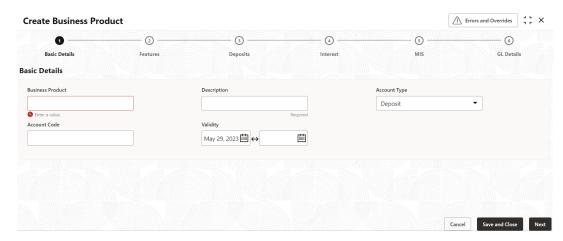

This topic describes the systematic instructions to create business product. The maintenance screen allows the user to configure business product parameters.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click Retail Deposits Business Product. Under Retail Deposits Business Product, click Create Business Product.

The Create Business Product screen displays.

Figure 1-1 Create Business Product - Basic Details

3. Specify the fields on the Basic Details screen.

Table 1-1 Basic Details - Field Description

| Field | Description |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Business Product | Specify the business product code to be maintained. This indicates the class code or template code. This code is referenced during the deposit creation. |
| Description | Specify the description for the business product. |
| Account Type | Specify the account as Deposit . This is the default value. |

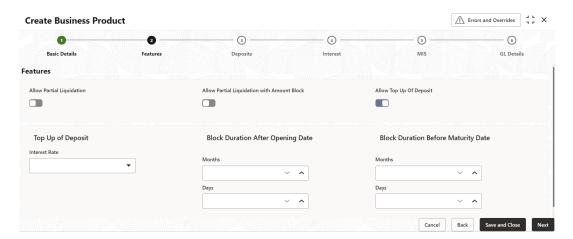

Table 1-1 (Cont.) Basic Details - Field Description

| Field | Description |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Account Code | As per your bank's requirement, you can choose to classify business products into different account codes. The bank can decide the way the business products are to be assigned to different account codes. An account code can consist of a maximum of four characters. |
| | The business product or an account code can be part of the customer account mask. |
| | If the customer account mask consists of an account code, the value in this field is used as part of deposit account number generation. |
| Validity | Specify the validity period of the business product by specifying the start date and the end date. End date is optional. |

4. After specifying the fields in the Basic Details screen, click Next.

The Features screen displays.

Figure 1-2 Create Business Product - Features

5. Specify the fields on **Features** screen.

Table 1-2 Features - Field Description

| Field | Description |
|---------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Allow Partial Liquidation | Switch this toggle ON to indicate that partial redemption is allowed. If Allow partial Liquidation is toggle OFF , then partial redemption will not be allowed on deposits under this business product. The default value is OFF . |
| Allow Partial Liquidation with Amount Block | Switch this toggle ON to indicate that partial liquidation is allowed for the deposits with amount blocks. If the deposit is linked partially then partial liquidation of the deposit will be allowed only if you select this toggle. The default value is OFF . |

Table 1-2 (Cont.) Features - Field Description

| Field | Description |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Allow Top Up Of Deposit | Switch this toggle ON to indicate that you can top-up funds to an existing deposit. The default value is OFF. If this is toggle ON, the below values are displayed. Top Up of Deposit Block Duration After Opening Date Block Duration Before Maturity Date |
| Top Up of Deposit | User can top-up an existing deposit by adding funds to the deposit account. |
| Interest Rate | Select the interest to be applied on the top-up deposit, from the drop-down list. The list of values as follow: Current - Select this option to apply the current interest rate of the deposit on the top-up amount. As on Opening Date - Select this option to apply the interest rate based on the slab as on the value date of deposit opening. If top-up is made to a deposit after rollover, the rate as on rollover date will be considered for rate pick up. As on Top Up Value Date - Select this option to apply the interest rate based on the slab as on the value date of the top-up. |
| Block Duration After Opening Date | User can specify the duration for which the deposit top up has to be blocked after the account opening date. The block duration after Opening date (Days/Months) should not be greater than the maximum tenor at the business product. |
| Months | Specify the number of months for which the deposit top-up has to be blocked after the account opening date. |
| Days | Specify the number of days for which the deposit top-up has to be blocked after the account opening date. |
| Block Duration Before Maturity Date | User can specify the duration for which the deposit top-up has to be blocked before the account maturity date. The top-up can be done any time before the maturity date (i.e. in term) of the deposit if there is no block duration defined. The block duration before maturity date (Days/Months) should not be greater than the max tenor at the business product. |
| Months | Specify the number of months for which the deposit top-up has to be blocked before the deposit maturity date. |
| Days | Specify the number of months for which the deposit top-up has to be blocked before the deposit maturity date. |

6. After specifying the fields in the **Features** screen, click **Next**.

The **Deposits** screen displays.

Click **Add** button in the **Applicable Tenor Configuration**. The **Add Tenor Applicability** screen displays.

Figure 1-8 Add Tenor Applicability

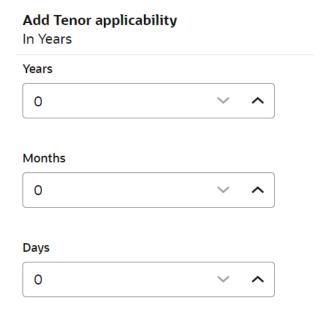

Table 1-3 Tenor Parameters - Field Description

| Description |
|------------------------------------------------------------------------------------------------------------------------------------------------------|
| This section determines the list of applicable tenors for a business product and also the minimum, maximum and default tenor for a business product. |
| |

Table 1-3 (Cont.) Tenor Parameters - Field Description

| Field | Description |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Applicable Tenor Configuration | Click on Add to specify multiple tenors that are applicable for the business product. If Applicable Tenors are defined for a business product then the deposit can be created only with one of the tenors mentioned in the configured list. The deposit creation will fail in case the deposit is booked with any other tenor not part of the maintained list. |
| Years | Specify the tenor value in Years . |
| Months | Specify the tenor value in Months . |
| Days | Specify the tenor value in Days . |
| Minimum Tenor | Specify the minimum tenor for which deposits should be created under this business product. If the deposit is booked for a tenor that is less than the minimum tenor then the deposit creation fails with an appropriate error message. If applicable tenor is configured, then it needs to be made sure that the minimum tenor is less than the least value of the configured applicable tenors. |
| Days | Specify the minimum tenor in terms of days. |
| Months | Specify the minimum tenor in terms of months. |
| Years | Specify the minimum tenor in terms of years. |
| Default Tenor | User can define a tenor for the deposits that are opened under the business product. Deposits opened under the business product will automatically acquire this tenor. However, user can change the tenor to suit the requirements of a specific deposit. The default tenor should be within the minimum and maximum range specified. The default tenor is mandatory for a business product. If applicable tenors are also configured, then one of the |
| | applicable tenors needs to be captured as a default tenor. |
| Days | Specify the default tenor in terms of days. |
| Months | Specify the default tenor in terms of months. |
| Years | Specify the default tenor in terms of years. |
| Maximum Tenor | Specify the maximum tenor for which deposits can be created under this business product. If the deposit is booked beyond the maximum tenor then the deposit creation fails with an appropriate error message. If applicable tenor is configured, then it needs to be made sure that the maximum tenor is more than the max value of the configured applicable tenors. |
| Days | Specify the maximum tenor in terms of days. |
| Months | Specify the maximum tenor in terms of months. |
| Years | Specify the maximum tenor in terms of years. |

- After specify the details in the Add Tenor applicability screen. Click Add or Add Another button to include the tenor applicability details in the Tenor Parameters section in the Deposits screen.
- 8. Specify the fields on Rate Chart Parameters in Deposits screen.

Table 1-4 Rate Chart Parameters - Field Description

| Field | Description |
|------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Rate Chart Parameters | This determines if rate chart is applicable for the business product and the premature redemption details for the deposits if rate chart is allowed. |
| Rate Chart Allowed | Switch this toggle ON to indicate that the system should calculate deposit interest based on the floating rate maintained. If user select this toggle, the system will pick interest rates based on different tenors, amount slab, currency and effective date for a deposit. The default value is OFF . |
| Rate Chart Tenor | Specify the value by which the tenor maintained should be considered. User can select one of the following values: Days - If user select this, the rate chart tenor will be considered as days for all deposit under this business product. Months - If user select this, the rate chart tenor will be considered as months for all deposit under this business product. The default value is Days. |
| Interest Rate Based On Cumulative Amount | Switch this toggle ON to indicate that the system should arrive at the interest rate of a new deposit using the cumulative amount of other active deposits, under the same business product, customer, and currency. The default value is OFF . |
| Interest Rate for Redemption Amount | Select the interest rate to be applied for the redemption amount, from the drop-down list. The list of values are as follow: Continue Existing As on Opening Date As on Redemption Date Special Rate Code As on Rate Revision Events The default value is Continue Existing. |
| Special Rate Code | Specify the special rate code for the redemption amount. |
| Interest Rate After Redemption | Select the interest rate to be applied after redemption of deposit, from the drop-down list. The list of values are as follows: Continue Existing As on Opening Date As on Redemption Date As on Rate Revision Events The default value is Continue Existing. |

9. Specify the fields on **Maturity Instructions** in **Deposits** screen.

Table 1-5 Maturity Instructions - Field Description

| Field | Description |
|-----------------------|---------------------------------------------------------------------------------------------------|
| Maturity Instructions | This determines the default maturity instructions for accounts opened under the business product. |

Table 1-5 (Cont.) Maturity Instructions - Field Description

| Field | Description |
|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Auto Rollover | Switch this toggle ON to automatically rollover the deposits on maturity date. The default value is OFF . |
| Month-End Maturity Deposit | Switch this toggle ON to indicate that the deposit is a month-end maturing deposit (i.e., the deposit matures on the last working day of the month). The default value is OFF . |
| Re-pick up Business Product Tenor on Rollover | Switch this toggle ON to enable re-pick up of the business product tenor on rollover. During rollover, the system will pick up the default tenor of the business product. The default value is OFF . |
| Maturity Notice Period | Specify the number of days before which the customer notification is to be sent for deposit maturity. |
| Close on Maturity | Switch this toggle ON to close the deposit account on maturity date and transfer the amount as per the pay-out details maintained for the deposit. The default value is OFF . |
| Cascade Month-End Maturity Date | Switch this toggle ON to cascade the month end maturity date of the deposit. If not selected then, the maturity date will fall in line with the account open date. The default value is OFF . |
| Grace Period For Renewal | Specify the grace period for renewing a deposit. This option is applicable only for deposits whose interest and principal is moved to unclaimed GLs upon maturity. In other words, grace period will not be applicable on the maturity date in case of auto rollover or closure of the deposit. |

10. Specify the fields on Maturity Holiday Treatment in Deposits screen.

Table 1-6 Maturity Holiday Treatment - Field Description

| Field | Description |
|-------------------|------------------------------------------------------------------------------------------|
| Holiday Treatment | This determines the holiday treatment if the maturity of the deposit falls on a holiday. |

Table 1-6 (Cont.) Maturity Holiday Treatment - Field Description

| Field | Description |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Holiday Calendar | Select the holiday calendar applicable to the business product from the drop-down list. This list displays the following values: • Ignore - Select this option to ignore all other holiday parameters for the business product. By default, this option is selected. • Branch - Holiday calendar will be based on the branch holiday maintenance of the respective branch. • Currency - Holiday calendar will be based on the currency maintenance done at bank level for the respective currency. • Both Branch and Currency - Holiday calendar is based on both branch and currency holiday maintenance. The holiday calendar is used to arrive at the maturity date. The holiday calendar defined at the business product is applicable to all deposits opened under the business product. User cannot modify the Holiday Calendar if there are active accounts under the business product. The default value is Ignore. |
| Holiday Movement | Select the working day to which the holiday should be moved from the adjoining drop-down list. This list displays the following values: No Change - If you select this option, then there is no change in the maturity date. By default, this option is selected. Previous Working Day - In case the computed maturity date is a holiday, then system moves the maturity date to the previous working day for the corresponding Holiday Calendar chosen. Next Working Day - In case the computed maturity date is a holiday, then system moves the maturity date to the next working day for the corresponding Holiday Calendar chosen. Holiday movement is adjusting the next maturity date when the maturity date falls on a holiday, based on the Holiday Calendar chosen. Holiday Movement is not applicable if you select Ignore option for Holiday Calendar. |
| | User cannot modify the Holiday Movement if there are active account under the business product. The default value is No Change . |

Table 1-6 (Cont.) Maturity Holiday Treatment - Field Description

| Field | Description |
|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Maturity Date Movement Across Months | Select the maturity date movement across months from the drop-down list: Allowed - The maturity date is moved across months. If the computed maturity date falls on a Holiday, then the maturity date can be moved to the next or previous working day, based on the holiday movement option, even if it falls in a different month. By default, this option is selected. Previous/Next Working Day of the Same Month - After moving the maturity date, if the adjusted maturity date falls in the previous/next month, then the system moves the maturity date forward or backward to the next/previous working day of the same month. No Change in Maturity Date - If the adjusted maturity date falls on next/previous month, then the system ignores the movement and considers the computed maturity date as the maturity date even it falls on a holiday. Maturity date across months is applicable only when the maturity date is adjusted to previous or next working day. The default value is Allowed. |
| Adhoc Holiday Change | Select the adhoc holiday change from the drop-down list. The list displays the following values: Change Maturity Date and Generate Advice - System updates the maturity date and the rollover maturity date as per the deposit holiday calendar maintenance, generates an advice to the customer. By default, this option is selected. Generate Advice - System generates an advice on deposits having maturity date falling on a holiday. No Action - If this is selected, the maturity date does not change. In this case the system will not generate advices for the deposit. The adhoc holiday change is the change in branch and currency holiday calendar after opening the deposit due to adhoc change in holiday or branch transfer of the deposit. System ignores the value of Adhoc Holiday Change if you select the Ignore option for Holiday Calendar. The default value is Change Maturity Date and Generate Advice. |
| Applicable Deposit Tenor | Select the deposit tenor, applicable to the deposit for interest rate pick-up, from the drop-down list. This list displays the following values: Original Tenor - If you select this option, then the system considers the tenor which is defaulted from the business product or modified at the account level. By default, this option is selected. Deposit Tenor - If you select this option, then the system considers the tenor based on the adjusted maturity date. The default value is Original Tenor. |

11. Specify the fields on **Preferences** in **Deposits** screen.

Click ${f Add}$ button in the ${f Add}$ Preferences. The ${f Add}$ Deposit Amount Currency screen displays.

Figure 1-9 Add Deposit Amount Currency

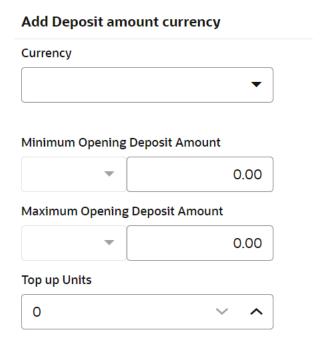

Table 1-7 Preferences - Field Description

| Field | Description |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Currency Code | Select the applicable currency from the drop-down list for which the minimum and maximum opening deposit amount is to be maintained. |
| Minimum Opening Deposit Amount | Specify the minimum opening deposit amount for the deposit product. If the deposit funding amount is less than minimum opening deposit amount, then the system will reject the deposit creation. |

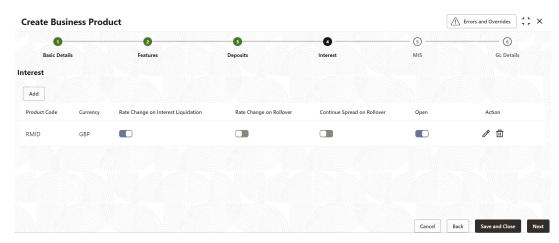

Table 1-7 (Cont.) Preferences - Field Description

| Field | Description |
|-------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Maximum Opening Deposit Amount | Specify the maximum opening deposit amount for the deposit product. If the deposit funding amount is greater than the maximum opening deposit amount, then system will reject the deposit creation. |
| Top up Units | Specify the top-up units for the deposit product. The top- ups done on the deposit product should be basis the units if configured. Eg: If top-up unit is USD 500, then top-up can be done for UDS 500, USD 1000, USD 1500 etc. |
| Redemption Interest Payout General Ledger | Specify the intermediary GL Code to which the redemption proceeds (Principal, interest, penalty, and tax) will be credited when the redemption interest payout option is Principal Payout. The net amount credited or debited from this GL during the redemption will be paid as redemption principal proceeds. |
| Deposit Funding Options | Specify the option(s) through which the deposit can be funded. When the deposit is opened, a validation ensures that the deposit is funded only through the selected option(s). The available options are General Ledger and Savings Account . |

- After specify the details in the Add Deposit Amount Currency screen. Click Add or Add Another button to include the deposit amount details in the Preferences section in the Deposits screen.
- **12.** After specifying the fields in the **Deposits** screen, click **Next**.

The Interest screen displays.

Figure 1-10 Create Business Product - Interest

13. Specify the fields on Interest screen.

Click the **Add** button in the **Add Interest Details**. The **Add Interest** screen displays. For more information on fields, refer to the field description table below.

Table 1-8 Interest - Field Description

| Field | Description |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Code | Specify the interest product code that should be linked to the account. The adjoining option list displays all valid Interest and Charge (IC) products available in the system. User can select the appropriate one. |
| Currency | Select the Currency from the drop-down list defined for the interest product. |
| Rate Change on Interest Liquidation | Switch this toggle ON , then on every interest liquidation new rates are picked up for the interest calculation. However, you cannot toggle this switch once authorized. |
| Rate Change on Rollover | Switch this toggle ON to re pick up the rate activity on the rollover of deposit. The rate is picked up for fixed and rate chart allowed deposits. |
| Continue Spread on Rollover | This is defaulted based on the Interest and Charges product. Switch this toggle ON to enable continued variance on rollover. The system will default account variance as current value to the rollover deposit for the next cycle. If you toggle OFF this, then the account variance will not be carried forward to the next rollover cycle. |
| Open | Switch this toggle ON to make the product applicable. More than one IC product may be applicable for a business product at the same time. The default value is ON . |

- After specify the details in the Add Interest screen. Click Add or Add Another button to include the interest parameters in the Interest screen.
- **14.** After specifying the fields in the **Interest** screen, click **Next**.

The MIS screen displays.

Figure 1-11 Create Business Product - MIS

15. Specify the fields on **MIS** screen.

Table 1-9 MIS - Field Description

| Field | Description |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| MIS Group | Select the MIS group applicable for the deposit business product from the selection list. The list is populated based on the MIS configuration maintained in common core. |
| Description | The system displays the description. This is auto populated. |
| SECTOR | Specify the sector to be associated. |
| SECTOR Description | The description of the sector is displayed. |

16. After specifying the fields in the **MIS** screen, click **Next**.

The GL Details screen displays.

Figure 1-12 Create Business Product - GL Details

17. Specify the fields on **GL Details** screen.

For more information on fields, refer to the field description table below.

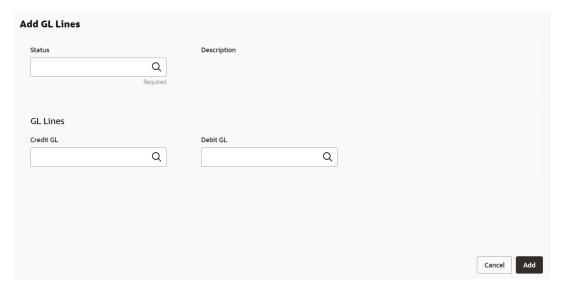

Table 1-10 GL Details - Field Description

| Field | Description |
|------------|-----------------------------------------------------|
| Natural GL | The following values are available – Credit Debit |

18. Click the Add icon to add an entry for GL.

The Add GL Lines screen displays.

Figure 1-13 Create Business Product - GL Details_Add GL Lines

19. Specify the fields on Add GL Lines screen.

For more information on fields, refer to the field description table below.

Table 1-11 Add GL Lines - Field Description

| Field | Description |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Status | Specify the status. Click the search icon to open the Status window. Select from the list of status associated and click to add the status in the field. |
| Description | The system displays the status description. |
| Credit GL | Specify the GL to which the account balance should belong. Click the search icon to open the Credit GL window. Select and click to add the entry. |
| Debit GL | Specify the GL to which the account balance should belong. Click the search icon to open the Debit GL window. Select and click to add the entry. |

20. After specifying all the details, click **Save & Close** to complete the steps or click **Cancel** to exit without saving.

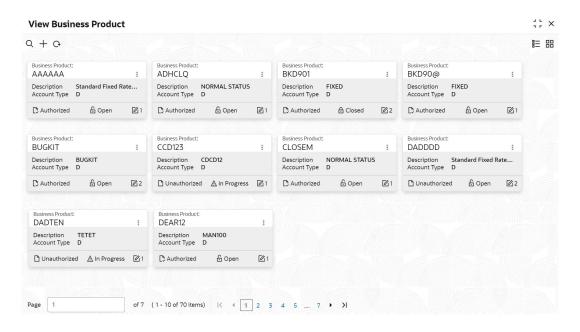

1.1.2 View Business Product

This topic explains the systematic instructions to view the list of configured business product parameters.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click Retail Deposits Business Product. Under Retail Deposits Business Product, click View Business Product.

The View Business Product screen displays.

Figure 1-14 View Business Product

For more information on fields, refer to the field description table below.

Table 1-12 View Business Product - Field Description

| Field | Description |
|----------------------|-----------------------------------------------------------------------------------------------------------------------|
| Business Product | Displays the business product. |
| Description | Displays the description of the business product. |
| Account Type | Displays the type of deposit account. |
| Authorization Status | Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized |
| Record Status | Displays the status of the record. The available options are: Open In Progress Closed |
| Modification Number | Displays the number of modifications performed on the record. |

1.2 Deposit Pay-in Maintenance

The deposit pay-ins to be done by GL, user needs to maintain the GL details through the Deposit Pay-in Maintenance screen.

To link appropriate GLs in case the pay in option chosen is pay in by GL, user need to maintain the **Branch Code**, **Pay-In Option**, and **General Ledger Code**.

This topic contains the following subtopics:

Create Payin Maintenance

This topic describes the systematic instructions to create pay-in maintenance.

View Payin Maintenance
 This topic explains the systematic instructions to view the list of payin maintenance parameters.

1.2.1 Create Payin Maintenance

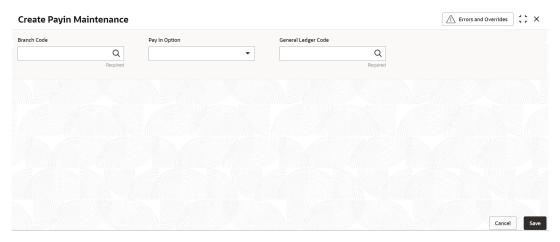

This topic describes the systematic instructions to create pay-in maintenance.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click Deposit Payin Maitenance, under Deposit Payin Maitenance, click Create Payin Maintenance.

The Create Payin Maintenance screen displays.

Figure 1-15 Create Payin Maintenance

3. Specify the fields on Create Payin Maintenance screen.

Table 1-13 Create Payin Maintenance - Field Description

| Field | Description |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Branch Code | Specify the branch code for which user want to maintain payin parameters. Click Search icon, it displays all valid branch codes maintained in the system. User can select the appropriate one. |

Table 1-13 (Cont.) Create Payin Maintenance - Field Description

| Field | Description |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Pay In Option | Select the pay in option from the drop-down list. The list of values are as follow: Pay in by GL - While creating a deposit, if the pay-in option is specified as GL then the GL maintained at the maintenance screen should be selected. If the offset account for pay in is not specified then GL account maintained in the pay-in maintenance screen is defaulted, thus creating a Deposit. Pay in by Cash - While creating a deposit, if the pay in option is specified as Cash and the offset account for pay in is not specified then the system debits the GL account specified in maintenance screen, thus creating a Deposit. |
| General Ledger Code | Specify the GL code that should be picked up by the system for the Deposit pay in. Click Search icon, it displays all valid GLs maintained in the system. User can select the appropriate one. |

 After specifying all the details, click Save to complete the steps. Or, click Cancel to exit without saving.

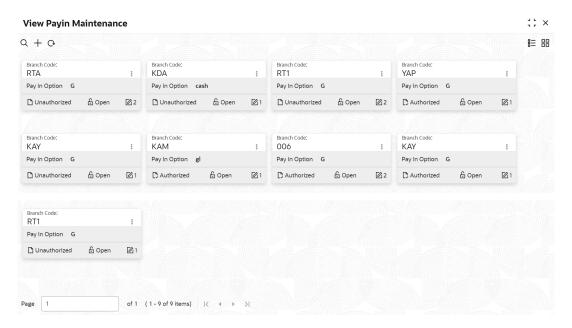

1.2.2 View Payin Maintenance

This topic explains the systematic instructions to view the list of payin maintenance parameters.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations or .
- Under Configurations, click Deposit Payin Maintenance. Under Deposit Payin Maintenance, click View Payin Maintenance.

The View Payin Maintenance screen displays.

Figure 1-16 View Payin Maintenance

For more information on fields, refer to the field description table below.

| Record Status | Displays the status of the record. The available options are: Open In Progress Closed |
| Modification Number | Displays the number of modifications performed on the record. |

Operations

This topic contains the following **Operations** as subtopics:

Overview of Deposit Services

The **Deposit Services** module facilitates doing various transactions on Term Deposit accounts.

Deposit View

You can use the screen under the **Deposit View** menu to view a 360 view of a TD account.

TD Transactions

You can use the screens under the **Transactions** menu to initiate deposit services transactions. A deposit with a fixed tenure or term is called as time deposit or Term Deposit (TD). This topic deals with transactions of a term deposit.

TD Maintenances

You can maintain the TD account details in this section. A deposit with a fixed tenure or term is called as time deposit or Term Deposit (TD).

TD Inquiries

A deposit with a fixed tenure or term is called as time deposit or Term Deposit (TD). This chapter deals with inquiries of a term deposit.

Prior Maturity Notices in Deposits

This topic describes the details of prior maturity notices in depositss.

2.1 Overview of Deposit Services

The **Deposit Services** module facilitates doing various transactions on Term Deposit accounts.

About Main Menu

The **Deposit Services** is grouped into several menus. It is a large panel divided into groups of menu items, which simplifies the navigation.

2.1.1 About Main Menu

The **Deposit Services** is grouped into several menus. It is a large panel divided into groups of menu items, which simplifies the navigation.

The menu items are grouped based on the type of operation to be performed. In addition, the **Menu Item Search** helps to search and select a specific screen to navigate to any screen from the main menu items. The main menus are listed below:

Figure 2-1 Deposit Services Mega Menu

Table 2-1 Menu Items

| Menu Item | Description |
|--------------|--------------------------------------------------------------------------------------|
| Transactions | Teller or Supervisor can use to initiate term deposit account opening. |
| Maintenance | Teller or Supervisor can use to perform the deposit services maintenance activities. |
| Inquiries | Teller or Supervisor can use to perform the deposit services inquiries. |

2.2 Deposit View

You can use the screen under the **Deposit View** menu to view a 360 view of a TD account.

This topic contains the following subtopic:

Deposit 360

You can get an 360-degree view of a customer's term deposit account using the **Deposit 360** screen.

2.2.1 Deposit 360

You can get an 360-degree view of a customer's term deposit account using the **Deposit 360** screen.

The fields marked as **Required** are mandatory.

The various sections are:

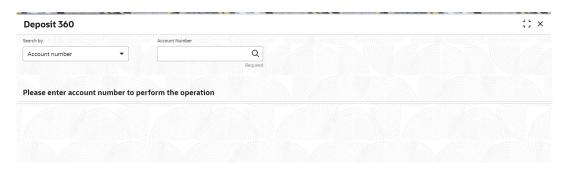

- Deposit Information
- Account holders
- Account details
- Balances
- Instruction set
- Redemption Simulation
- Amount Block Details
- Rollover History
- Interest Rate Changes
- Overdue Transactions
- Recent Transactions
- Frequent Actions

To view the term deposit details:

On the Home screen, from the Retail Deposit Services mega menu, under Term
 Deposits and Deposit View, click Deposit 360 or specify Deposit 360 in the search icon bar and select the screen.

The **Deposit 360** screen is displayed.

Figure 2-2 Deposit 360

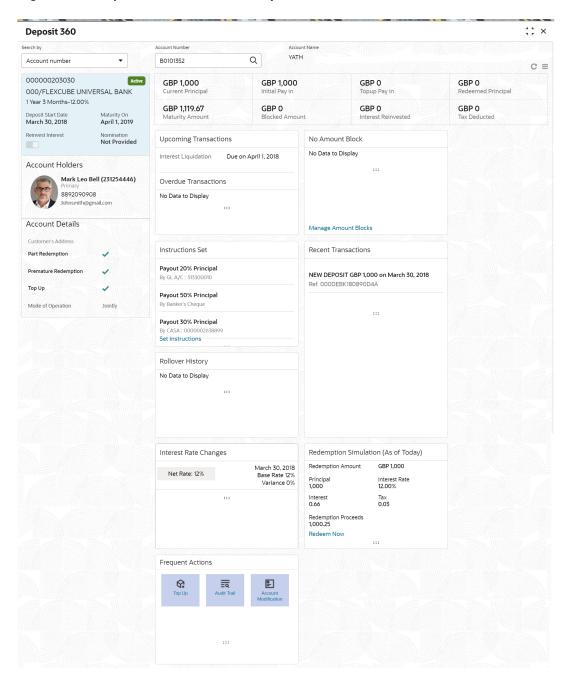

On the Deposit 360 screen, click the Search icon or specify the Account Number and press the Tab or Enter key.

The details are displayed in the dashboard.

Figure 2-3 Deposit Details for Term Deposit

3. You can view the TD details of the account holder in the dashboard displayed. For more information on fields, refer to the field description table.

Table 2-2 Deposit 360 - Field Description

| Eield | Description | |
|---------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| Field Search By | Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name. Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email. A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked. For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. | |
| | Note: The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. | |
| <product name=""></product> | Displays the product name from the product master. | |
| <deposit status=""></deposit> | Displays the deposit status. The options for the status are: • Active • Matured • Closed | |
| <td account="" number=""></td> | | Displays the TD account number. |
| Branch | Displays deposit branch. | |
| <deposit -="" interest<br="" term="">Rate></deposit> | Displays the term for the deposit and interest rate for the deposit. | |
| Deposit Start Date | Displays the value date of the deposit. | |
| Maturity On | Displays the maturity date of the deposit. | |
| Re-invest TD | Displays if the interest from the TD is to be re-invested in the same deposit or paid out. | |
| Nomination | Specify if a nominee is registered or not. | |
| Account Holder | This widget displays the account holder details. | |
| Name | Displays the name of the account holder of the TD. | |
| Customer ID | Displays the customer ID of the holder. | |
| Relationship | Displays relationship as Primary/Secondary. | |
| Mobile Number | Displays the mobile number of the customer. | |

Table 2-2 (Cont.) Deposit 360 - Field Description

| Field | Description |
|---------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Email ID | Displays the email ID of the customer. |
| Account Details | This widget displays the account details. |
| Customer's Address | Displays the address of the primary customer. |
| Part Redemption | This option will be selected if part redemption is allowed for the TD product. |
| Premature Redemption | This option will be selected if premature redemption is allowed for the TD product. |
| Top up | This option will be selected if a top-up is allowed for the TD product. |
| Mode of Operation | Displays the mode of operation chosen for the deposit. |
| Current Principal | Displays the currently remaining principal balance in the deposit. |
| Initial Pay in | Displays the initial payin done to create the deposit. |
| Topup Pay in | Displays the subsequent top-ups done. |
| Redeemed Principal | Displays the principal redeemed in case any premature redemptions have happened. |
| Maturity Amount | Displays the proceeds that will be paid out on maturity. This value will be net of tax. |
| Blocked Amount | Displays the total block amount on the deposit. |
| Interest Paid out or Interest Reinvested | Displays the amount and currency for the reinvested or paid out interest. |
| | Note: If the interest if of reinvest type, then the field name is displayed as Reinvested Interest. If the interest if of paid out type, then the field name is displayed as Paid out Interest. |
| Tax Deducted | Displays the tax deducted. |
| Upcoming Transactions | This widget displays the details of upcoming transactions. |
| Overdue Transactions | Displays the details of overdue transactions. |
| Redemption Simulation (As of Today) | This widget displays the remdemption simulation of the day for the TD account. Click the View Error Details link to view the error message. |
| Instructions Set | This widget displays the set of instructions set on the TD account. |
| | Note: To create new set of instructions for the TD account, click the Set Instructions ink. For more information, refer Term Deposit Payout Modification screen. |
| Recent Transactions | This widget displays the details of the recent transactions performed on the account. |

Table 2-2 (Cont.) Deposit 360 - Field Description

| Field | Description |
|---------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <number> Amount Blocks</number> | This widget displays the amunt block details of the account. |
| | Note: To manage the amount blocks, click the Manage Amount Blocks link. For more information, refer View and Modify Amount Block screen. |
| <currency amount=""></currency> | Displays the currency and amount of block. |
| Block <number></number> | Displays the block number. |
| Туре | Displays the block type. |
| Expiry | Displays the expiry date of the block. |
| Interest Rate Changes | This widget displays the rate changes if any for the interest applied on the account. |
| Net Rate | Displays the net rate percentage of interest. |
| <date></date> | Displays the date of interest rate change. |
| Base Rate | Displays the base rate percentage of interest. |
| Variance | Displays the variance percentage of interest. |
| Rollover History | This widget displays the rollover history of the account. |
| <currency amount=""></currency> | Displays the currency and amount of rollover. |
| <component></component> | Displays the rollover component. |
| <date></date> | Displays the from and to date of the rollover. |
| <tenure></tenure> | Displays the tenure of rollover. |
| Frequent Actions | This widget displays the frequent actions that were performed on the account. Note: The actions are displayed as links. You can click the link and the related screen is opened in a new page. |

Note:

- You can also launch the screens for performing various transactions on the
 account by clicking the **Menu** icon. A list of links displays under various
 menus. Click the required link from the list that displays. For more
 information on how to perform the transactions using the links, see the
 respective chapters. For image reference, see Mega Menu screenshot.
- If the latest updates of the TD account performed is not displayed on the screen, you can refresh the screen by clicking the **Refresh** icon. The screen is refreshed and the latest changes are displayed.

2.3 TD Transactions

You can use the screens under the **Transactions** menu to initiate deposit services transactions. A deposit with a fixed tenure or term is called as time deposit or Term Deposit (TD). This topic deals with transactions of a term deposit.

This topic contains the following subtopics:

- Term Deposit Account Opening
 - You can open a Term Deposit account and simulate its creation by providing funds from Account, and Ledger modes or a combination of Account and Ledger modes.
- Top Up

You can perform a TD top-up transaction using this screen.

Redemption

Redeem a Term Deposit using the **Term Deposit Redemption** screen. The redemption proceeds can be credited to Current and Savings Account, New Term Deposit, Banker's Cheque, Demand Draft, or Ledger. The user can redeem the Term Deposit in full or in part.

2.3.1 Term Deposit Account Opening

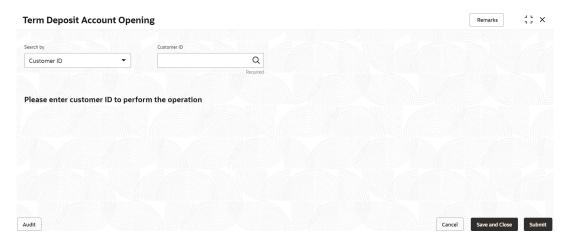

You can open a Term Deposit account and simulate its creation by providing funds from Account, and Ledger modes or a combination of Account and Ledger modes.

 On the Homepage, from the Retail Deposit Services mega menu, under Term Deposits and Transactions, click Account Opening, or specify Term Deposit Account Opening in the search icon bar and select the screen.

The **Term Deposit Account Opening** screen is displayed.

Figure 2-4 Term Deposit Account Opening

On the Term Deposit Account Opening screen, specify the customer number in the Customer ID field, and press Enter or Tab. In the ${\it Term\ Deposit\ Account\ Opening\ }$ screen, all available TD account deposit accounts are displayed by the system.

For more information on fields, refer to the field description table.

Table 2-5 Existing Deposit Account – Field Description

| Field | Description |
|----------------------------|----------------------------------------------------------------|
| Status | Displays the status of the account. The options are: • Active |
| | Matured |
| | • Closed |
| Interest Rate | Displays the rate of interest for an account. |
| Product Description | Displays the product description. |
| Product Code | Displays the product code. |
| Principal | Displays the amount available in an account. |
| Interest Cycle | Displays the interest payout cycle. |
| Maturity Date | Displays the maturity date. |
| Maturity Amount | Displays the maturity amount. |

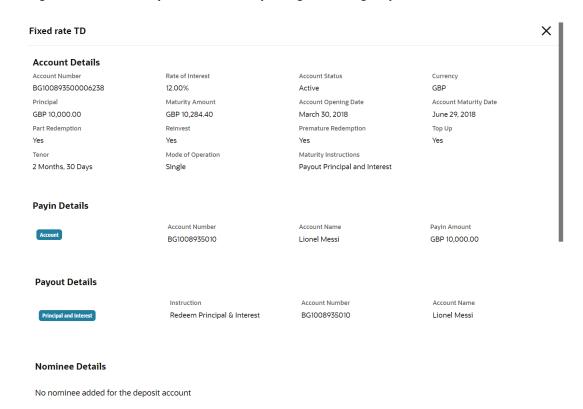

6. In Search bar, the user can search the accounts with different status (Active, Closed, Matured and All) if the user search with All, then the system displays Active, Closed, and Matured deposits accounts of a customer.

7. Click View icon in the existing product widget, to view additional details of the acccount.

The view screen is displayed with account details, payin details, payout details, nominee details and joint holder details if available.

Figure 2-8 Term Deposit Account Opening - Existing Deposit

On Term Deposit Account Opening screen, the user will be able to create new TD in two methods.

They are as follows:

- Copying the existing account to create new deposit
- Selecting the product to create new deposit.

The two methods are explained in the below steps.

9. Click **Copy** icon in the existing account tile, to copy the existing details of an account.

On copying the account, the system defaults the Account details (i.e. Deposit Amount, Tenor, Reinvest Interest, Maturity Instruction), Payin Details, Payout Details, Nominee Details, and Joint Holder Details if any. All these details are displayed by default and the user is allowed to modify the value.

Note:

- The payin details will not be defaulted, if the Payin account is closed or payin GL is not valid for the branch.
- The payout details will not be defaulted, if account payout mode is other than the account, multi-mode payout, and payout account is closed.
- For Joint Holder details, the end date will be nullified.
- Nominee details are nullified, if nominee customer ID is closed.
- Existing guardian details are nullified, if nominee become major for the new account.
- On the Term Deposit Account Opening screen, select the product to create a new deposit account.

The **Term Deposit Account Opening** is displayed with the **Deposit Details** fields to specify the details.

11. Perform the required actions on the **Deposit Details** section. For more information on fields, refer to the field description table.

Table 2-6 Term Deposit Account Opening - Deposit Details - Field Description

| Field | Description |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <product name=""></product> | Displays the name of the deposit product selected. |
| <product description=""></product> | Displays the description of the deposit product selected. |
| Deposit Amount | When user Specify the deposit amount, the system simulate the maturity amount and interest details based on given deposit amount, defaulted tenor, and account opening date. The tenor opening date and reinvest interest is defaulted. |
| Maturity Type | Select the option for TD maturity from the drop-down. The options are: • Tenure: If you select this option, then specify the tenure for maturity in years, months, and days in the fields displayed adjacent. The tenor maintained at product will be defaulted and the user is allowed to modify it. • Date: If you select this option, then specify or select the date. |
| Interest Rate | Displays the interest rate of the deposit and it is defaulted from the product, when you specified the deposit amount. |
| Reinvest Interest | Select the option from drop-down for reinvest interest. Select Yes to reinvest the interest in TD. This is the default value. Select No to be paid out the interest. |
| | Note: If Reinvest Interest is No, then the interest paid out account details need to be provided while capturing the payout details. |
| Maturity Instructions | The product displays its default maturity instructions, which the user can modify. The following maturity instructions are supported. Reinvest Interest is selected as Yes: Redeem Principal and Interest Rollover Principal and Redeem Interest Special Rollover No Instruction Reinvest Interest is selected as No: Redeem Principal Rollover Principal Special Rollover No Instruction |
| | Note: Rollover Principal and Redeem Interest, and Special rollover are not displayed if rollover is not enabled for the selected product. The maturity instruction defined at product will be defaulted as maturity instruction and the user is allowed to change it. |

Table 2-6 (Cont.) Term Deposit Account Opening - Deposit Details - Field Description

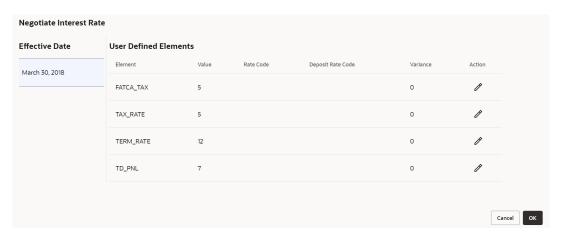

| Field | Description |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mode of Operation | Select the mode of operation from the drop-down. The options are: • Single • Jointly • Either Anyone or Survivor • Former or Survivor • Mandate Holder If the Mode of Operation is single, the Joint Holder Details will not be displayed. |
| Opening Date | This date is defaulted as the current branch date and user is allowed to modify it. |
| Account Name | The Customer name is defaulted as the account name and the user is allowed to modify the name. |

If the user wishes to change the selected product before the save/submit operation, click **Switch Product** in the deposit details screen, and the system displays a confirmation message related to clearing the input details. On confirmation, all input details are cleared and the user will navigate to the product selection screen.

12. Click **Negotiate Rate** link, to negotiate the interest rate by modifying the variance.

The **Negotiate Interest Rate** is displayed.

Figure 2-10 Negotiate Interest Rate

13. On **Negotiate Interest Rate** screen, perform the required action. For more information on fields, refer to the field description table.

Table 2-7 Negotiate Rate - Field Description

- Click Cancel, to close the Add Payout Details screen without adding the payin details.
- Click Add More, the system add the payout details in the main screen and refreshes
 the Add Payout Details screen with default values, and the payout amount is updated
 for the remaining payout amount.
- Click Add to add the payout details in the main screen.
- Click on Add Nominee, in the Nominee Details section on the Term Deposit Account Opening screen.

The Add Nominee Details screen is displayed.

For more information about **Add Nominee Details**, refer to the **Add Nominee** section in the Nominee Details Update.

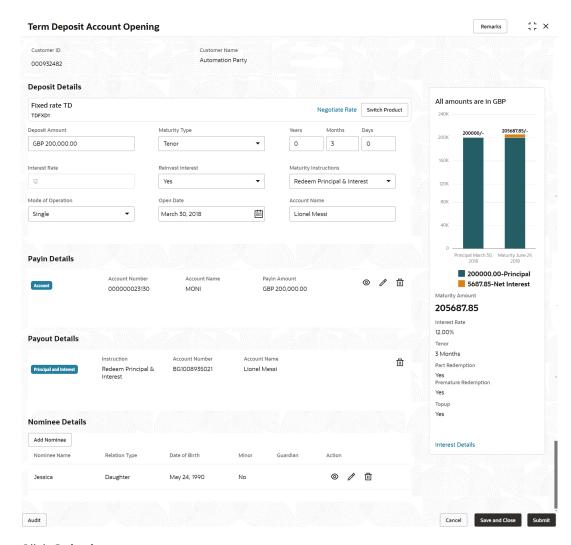

18. Click on **Add Joint Holder**, in the Joint Holder Details section on the **Term Deposit Account Opening** screen.

The Add Joint Holder Details screen is displayed.

For more information about **Add Joint Holder Details**, refer to the Maintain Joint Holder Details section in the Joint Holder Maintenance.

19. After adding the Add Payin, Add Payout, and Add Nominee details, the Term Deposit Account Opening screen displays the added information.

Figure 2-18 Term Deposit Account Opening - Added Details

20. Click Submit.

The screen is successfully submitted for authorization.

The TD account number is displayed when the TD account creation is successful.

2.3.2 Top Up

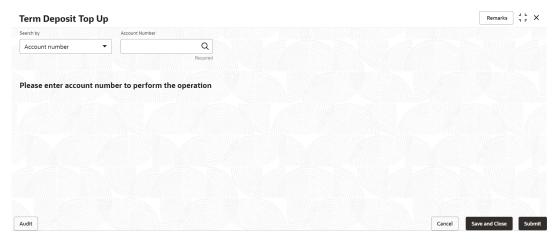

You can perform a TD top-up transaction using this screen.

 On Homepage, from the Retail Deposit Services mega menu, under Term Deposits, under Transactions, click Top Up.

The **Term Deposit Top Up** screen is displayed.

Figure 2-19 Term Deposit Top Up

2. On the **Term Deposit Top Up** screen, Click the **Search** icon or specify the account number in the **Account Number** field, and press **Enter** or **Tab**.

The Top Up details are displayed in the **Term Deposit Top Up** screen.

Remarks 7 F X **Term Deposit Top Up** Q API Automation Account Account number 0000012107 **Term Deposit Details** Deposit Details Maturity Details Active GBP 10,000.00 at 10% for 1 Years GBP 11,157.15 on December 1, 2019 Tax Deducted GBP 0.00 GBP 0.00 Top-up Details Value Date GBP 10.00 December 4, 2018 Settlement details Add Settlement Details Maturity Amount There are no settlement details available GBP 10,949.02 Interest Rate Principal GBP 10.000.00 GBP 939.84 Top-up Amount GBP 10.00 Interest Details

Figure 2-20 Term Deposit Top Up Details

3. In the **Term Deposit Top Up** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-14 Term Deposit Top Up – Field Description

| Field | Description | | |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| Search By | Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name. | | |
| | Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email. | | |
| | A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked. | | |
| | For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. | | |
| | Note: The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. | | |
| Status | Displays the TD status. The possible options are: | | |
| | ActiveMaturedClosed | | |
| Deposit Details | Displays the principal balance of the TD, the rate of interest, and the tenor of the TD. | | |
| Maturity Details | Displays the proceeds due to the customer on maturity and the maturity date. | | |
| Reinvested Interest | Displays the amount and currency for the reinvested or paid out interest. | | |
| | Note: If the interest if of reinvest type, then the field name is displayed as Reinvested Interest. If the interest if of paid out type, then the field name is displayed as Paid out Interest. | | |
| Tax Deducted | Displays the actual tax deducted on reinvested or paid out interest till date. | | |

Table 2-14 (Cont.) Term Deposit Top Up - Field Description

| Field | Description |
|------------|--------------------------------------------------------------------------------|
| Amount | Specify the amount which the customer wants to add to the principal of the TD. |
| Value Date | Specify the date from which the top-up is to take effect. |

 After specifying the amount in the Amount field in the Term Deposit Top Up screen, the simulated output detail displays on the right side of the screen.

Computation will be triggered based on the inputs selected and output should be displayed on the panel on the right in a graphical format comparing the current principal, interest, and net proceeds at maturity with what the user would get after the top-up.

For more information on fields, refer to the field description table.

Table 2-15 Top-Up Simulation Details – Field Description

| Field | Description | |
|-----------------|----------------------------------------------------------------------------------------------------------|--|
| Maturity Amount | Displays the proceeds due to the customer on maturity after taking into consideration the top-up amount. | |
| Interest Rate | Displays the Net interest on the principal (Interest – Tax). | |
| Principal | Displays the total principal of the TD. | |
| Net Interest | Displays the interest net amount. | |
| Top-up Amount | Displays the top-up amount. | |

 Click the Interest Details link in the TD simulation details of the Term Deposit Top Up screen.

The Interest Details screen is displayed.

| | Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email. |
| | A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked. |
| | For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. |
| | Note: The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. |
| Status | Displays the TD status. The possible options are: |
| | Active Matured Closed |
| Deposit Details | Displays the principal balance of the TD, the rate of interest, and the tenor of the TD. |
| Maturity Details | Displays the proceeds due to the customer on maturity and the maturity date. |
| Reinvested Interest | Displays the amount and currency for the reinvested or paid out interest. |
| | Note: If the interest if of reinvest type, then the field name is displayed as Reinvested Interest. If the interest if of paid out type, then the field name is displayed as Paid out Interest. |
| Tax Deducted | Displays the actual tax deducted on reinvested or paid out interest till date. |

Table 2-20 (Cont.) Term Deposit Redemption – Field Description

| Field | Description |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Redemption Type | Select the type of redemption to be performed. The options are: Partial Redemption Full Redemption The default value is Full Redemption. |
| | Note: You can change the type to Partial Redemption and enter the amount in Redemption Amount field. The redemption amount should be not be greater than TD account balance. |
| | |
| Redemption Amount | Displays the full redemption amount. |
| | Note: This field is enabled, if you select the Partial Redemption option from the Redemption Type field. |
| D | |
| Penalty | Displays the penalty that will be charged for premature redemption. |
| Waive Penalty | Switch to toggle ON to waive the penalty amount charged on the account. Switch to toggle OFF to include the penalty amount charged on the account. |
| Remarks | You can specify the reason for TD redemption. |

4. Based on the input data provided, the system simulates the details of TD and displays them on the right side of the **Term Deposit Redemption** screen.

Table 2-21 Redemption Payment Details and Deposit After Redemption – Field Description

| Field | Description |
|----------------------------|------------------------------------------------------------------------------------------------------------------------|
| Redemption Payment Details | This displays the details of the redemption payment to the customer. |
| Amount | This displays the final amount that will be paid out to the customer if the TD is redeemed today. |
| Principal | Displays the total principal of the TD. |
| Interest Rate | Displays the Interest rate applicable for the TD. |
| Interest | Displays the Net interest on the principal (Interest – Tax). |
| Penalty | Displays the penalty that will be charged for premature redemption and deducted from the proceeds due to the customer. |
| Тах | Displays the tax applicable on the recalculated interest and will be deducted from the proceeds due to the customer. |
| Deposit After Redemption | This displays the deposit amount in detail after redemption. |

Table 2-21 (Cont.) Redemption Payment Details and Deposit After Redemption – Field Description

| Field | Description |
|---------------|--------------------------------------------------------------------|
| Amount | Displays the maturity amount of the remaining term deposit. |
| Principal | Displays the principal remaining after redemption. |
| Interest Rate | Displays the interest rate applicable for the remaining principal. |
| Interest | Displays the interest due to the customer on maturity. |
| Tax | Displays the tax that will be deducted on maturity. |

Once the deposit simulation is completed, you can provide the simulated details to the customer.

2.4 TD Maintenances

You can maintain the TD account details in this section. A deposit with a fixed tenure or term is called as time deposit or Term Deposit (TD).

This topic contains the following subtopics:

Term Deposit Amount Block

You can block the TD amount. A Term Deposit can be blocked for certain amount due to different reasons like collateral to an overdraft, funds provider account during sweep transactions, and so on. Also, the Bank might receive request from any authorized external agencies to block the TD amount.

View and Modify Amount Block

You can view or modify the already added block details using this screen.

Term Deposit Payout Modification

You can view or modify the payout instructions maintained during the TD account opening using this screen. Also, you can create new payout instruction, if no instructions are maintained for the TD account.

Term Deposit Account Modification

You can modify certain attributes of the TD. Also, the account description and interest rates. Based on customer's request or otherwise, you can change the account description or interest rates associated with the account.

Term Deposit Joint Holder Maintenance

Term Deposit account can be owned by single holder or multiple owners. This screen can be used for modifying the deposit account's joint holder details. You can either add joint holders for the first time or modify the existing joint holder relationship using this screen.

Term Deposit Nominee Details Update

You can modify the existing nominee details, add a new nominee, and delete the existing nominee details added to the TD account using this screen.

2.4.1 Term Deposit Amount Block

You can block the TD amount. A Term Deposit can be blocked for certain amount due to different reasons like collateral to an overdraft, funds provider account during sweep transactions, and so on. Also, the Bank might receive request from any authorized external agencies to block the TD amount.

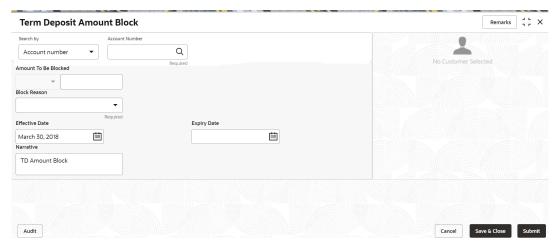

The fields marked as **Required** are mandatory.

To create amount block:

On the Home screen, from the Retail Deposit Services mega menu, under Term
 Deposits and Maintenance, click Create Amount Block, or specify Create Amount
 Block in the search icon bar and select the screen.

The Term Deposit Amount Block screen is displayed.

Figure 2-30 Term Deposit Amount Block

On the Term Deposit Amount Block screen, click the Search icon or specify the account number in the Account Number field, and press Enter or Tab.

The details for the account entered are displayed.

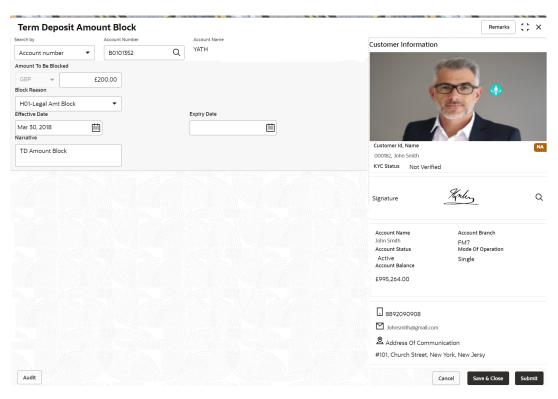

Figure 2-31 Term Deposit Amount Block Details

3. Perform the required actions on the **Term Deposit Amount Block** screen. For more information on fields, refer to the field description table.

| Action | Click the Edit icon, to edit the user defined value details. |
| | Click the Delete icon, to delete the user defined value entry. |
| | Click the Save icon, to confirm the edited details. This icon is displayed, only after you click the edit icon. |

 In the Interest Rate and User Defined Values section, click the Add icon, to add a new row.

4. Click Submit.

The screen is successfully submitted for authorization.

2.4.5 Term Deposit Joint Holder Maintenance

Term Deposit account can be owned by single holder or multiple owners. This screen can be used for modifying the deposit account's joint holder details. You can either add joint holders for the first time or modify the existing joint holder relationship using this screen.

The fields marked as **Required** are mandatory.

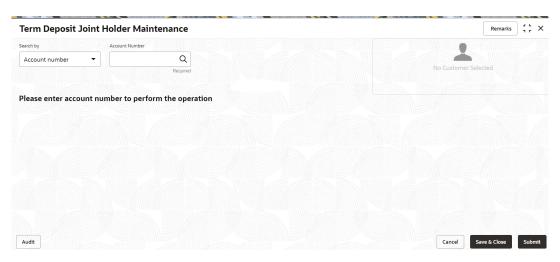

A customer can be the sole or joint owner of a TD account. The joint accounts are accounts that are shared between two or more individuals. They can be operated either singly or jointly.

To maintain joint holder details:

 On the Home screen, from the Retail Deposit Services mega menu, under Term Deposits, under Maintenance, click Joint Holder or specify Joint Holder in the search icon bar and select the screen.

The **Term Deposit Joint Holder Maintenance** screen is displayed.

Figure 2-46 Term Deposit Joint Holder Maintenance

Click the Search icon or specify the account number in the Account Number field, and press Enter or Tab.

The account holder details and mode of operation are displayed.

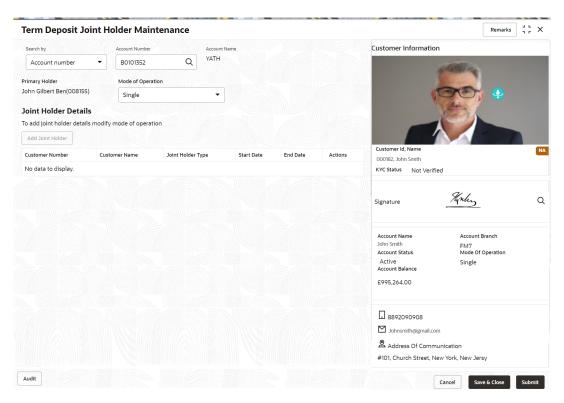

Figure 2-47 Term Deposit Joint Holder Details

3. You can view the account holder details of the selected Term Deposit account number. For more information on fields, refer to the field description table.

Table 2-35 Term Deposit Joint Holder Maintenance – Field Description

| Field | Description |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Search By | Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name. Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email. A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked. For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. |
| | the label as SSN. |
| | |
| Amount Name | Displays the name of the account holder for the selected account number. |
| Primary Holder | Displays the primary account holder's name. |
| Mode of Operation | Specify the mode of operation. |
| | Note: The mode of operations are maintained in the host system and fetched in the list. |

| Field | Description |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Field Joint Holder Details | This section displays the existing joint holder details for a joint account. Note: You can perform the following actions in this section: • Add Joint Holder Details: For details on this action, refer Add Joint Holder. • Edit Joint Holder Details: For details on this action, refer Edit Joint Holder Details: • Delete Joint Holder Details: From the Actions field, click the Delete icon. A confirmation message is displayed that the action cannot be recovered. Click |
| | Delete to proceed with the deletion. Convert Joint Account to Single Account: From |
| | the Mode of Operations field, select the Single option. A confirmation message is displayed. Click Confirm to proceed with the converstion. |
| | |

4. Click Submit.

The screen is successfully submitted for authorization.

Maintain Joint Holder Details

You can add new joint holders, modify or delete the existing joint holders of Term deposit account. You can also add, edit, or delete a joint holder of a TD account. Also, you can covert a joint holder account to single holder account and vice-versa.

2.4.5.1 Maintain Joint Holder Details

You can add new joint holders, modify or delete the existing joint holders of Term deposit account. You can also add, edit, or delete a joint holder of a TD account. Also, you can covert a joint holder account to single holder account and vice-versa.

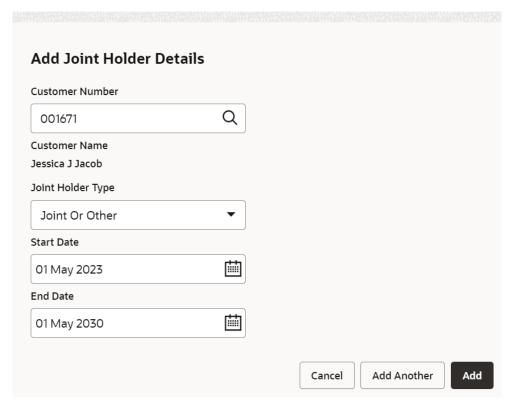

To maintain the joint holder details:

- From the Joint Holder Maintenance screen, perform any of the following actions as required:
 - Add Joint Holder
 - a. Select the **Jointly**, **Either Anyone or Survior**, **Former or Survior**, or **Mandate Holder** option from the **Mode of Operation** field.
 - b. In the Joint Holder Details section, click Add Joint Holder.

The Add Joint Holder Details section is displayed.

Figure 2-48 Add Joint Holder

c. You can capture the required details in this section. For more information on fields, refer to the field description table.

Table 2-36 Add Joint Holder - Field Description

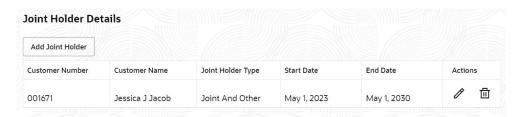

| Field | Description |
|-------------------|-------------------------------------------------------------------------------------------|
| Customer Number | Select or specify the customer number to be added as joint holder. |
| Customer Name | Displays the customer name for the customer number selected. |
| Joint Holder Type | Select the type of joint holder for the deposit account holder. |
| Start Date | Select or specify the date from which the joint holder will be applicable to the account. |
| End Date | Select or specify the date till which the joint holder will be applicable to the account. |

d. Click Add.

You can add multiple joint holders to the account by clicking Add Another.

The added joint holder details are displayed in the **Joint Holder Details** section.

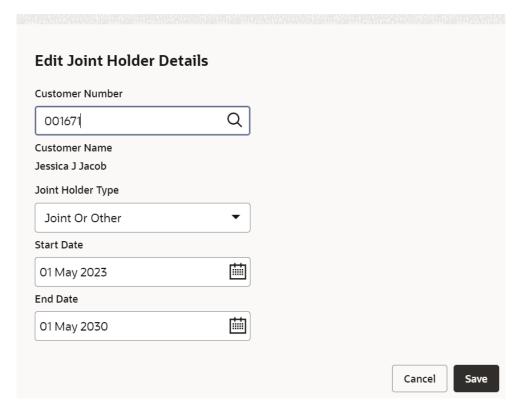

Figure 2-49 Joint Holder Details

Edit Joint Holder Details

a. In the Joint Holder Details section, click the Edit icon, from the Actions field.
 The Edit Joint Holder Details section is displayed.

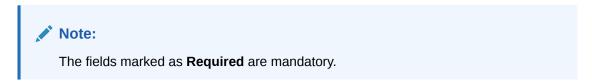

Figure 2-50 Edit Joint Holder Details

- **b.** You can update the selected joint holder details as required. The fields are same as displayed in the **Add Joint Holder Details** section. For more information, refer Add Joint Holder.
- c. Click Save.
- 2. Click Submit.

2.4.6 Term Deposit Nominee Details Update

You can modify the existing nominee details, add a new nominee, and delete the existing nominee details added to the TD account using this screen.

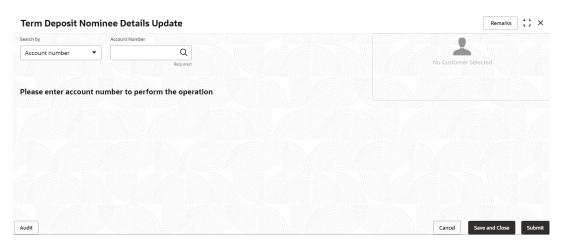

To update nominee details:

 On the Home screen, from the Retail Deposit Services mega menu, under Term Deposits, under Maintenance, click Nominee or specify Nominee in the search icon bar and select the screen.

The Term Deposit Nominee Details Update screen is displayed.

Figure 2-51 Term Deposit Nominee Details Update

Click the Search icon or specify the account number in the Account Number field, and press Enter or Tab.

The details are displayed in the screen.

Figure 2-52 Term Deposit Nominee Details

If no nominee is added to the selected account, then there are no details displayed in the **Nominee Details** section.

In the **Nominee Details** section, you can view the details of the nominee if already added to the account. For more information on fields, refer to the field description table.

Table 2-37 Term Deposit Nominee Details Update – Field Description

| Field | Description |
|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Search By | Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name. Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email. A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked. For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. |
| | Note: The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. |
| Account Name | Displays the name of the account holder for the selected account number. |
| Nominee Details | This section displays the details of the nominee added to the TD account. Note: For information on adding a nominee, refer Add Nominee. |
| Nominee Name | Displays the name of the nominee. |
| Relation Type | Displays the relationship of the nominee. |
| Date of Birth | Displays the nominee's date of birth. |
| Minor | Displays whether the nominee is a minor or major. |
| Guardian | Displays the name of the guardian, if the nominee is a minor. |
| Actions | Displays the following icons to perform the action: • View: For information on this action, refer View Nominee Details. • Edit: For information on this action, refer Edit Nominee Details. • Delete: If you click this icon, then a confirmation message is displayed that the nominee details will not be recovered. To proceed with deletion, you need to click Delete. |

4. Click Submit.

The screen is successfully submitted for authorization.

Add Nominee

You can add a nominee to a TD account.

View Nominee Details

You can view the details of the nominee added to a TD account.

• Edit Nominee Details

You can edit the nominee details that are already added to a TD account.

2.4.6.1 Add Nominee

You can add a nominee to a TD account.

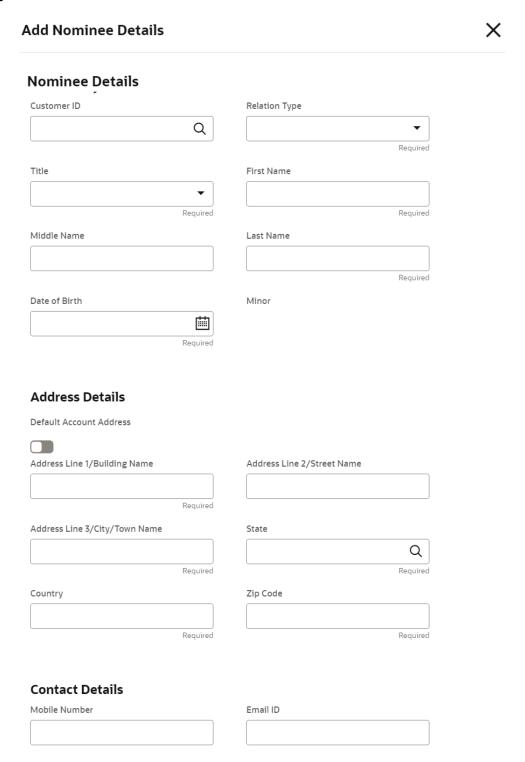

To add a nominee:

1. In the Nominee Details section, click Add Nominee.

The **Add Nominee** section is displayed.

Figure 2-53 Add Nominee Details

2. You can maintain the required details in the sections displayed. For more information on fields, refer to the field description table.

Table 2-38 Add Nominee Details – Field Description

| Field | Description |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Nominee Details | This section displays the fields for capturing the basic nominee details. |
| Customer ID | Select or specify the customer ID to default the nominee details for the selected customer. |
| Relationship Type | Select the relationship type with the nominee. |
| First Name | Specify the nominee's first name. |
| Middle Name | Specify the nominee's middle name. |
| Last Name | Specify the nominee's last name. |
| Date of Birth | Select or specify the nominee's date of birth. |
| Minor | Displays whether the added nominee is a minor or major based on the date of birth selected or specified. |
| | Note: |
| | The minor status will be derived based on the minor age limit maintained for the country (the country will be derived from the account holder's communication address). |
| | Find the below steps to configure minor age validation. |
| | a. Create a fact for values, State, and Age. |
| | b. Create a rule for minor age validation with the required state and related age. |
| | IF |
| | ((STATE==GB) && (AGE < 18)) |
| | Output |
| | Section1 True |
| | Maintain a validation model with model code as VMMINORAGE and link the above rule. |
| | For more information, refer to the <i>Oracle Banking</i> Common Core User Guide to create Fact, Rule and Rule Group. |
| | |
| Address Details | This section displays the fields to capture the nominee's address. |
| Default Account Address | Switch to toggle ON to default the account holder's communcation address specified. |
| | Switch to toggle OFF to not to default the account holder's communcation address specified. |
| Address Line 1/Building Name | Specify the building of the nominee. |
| Address Line 2/Street Name | Specify the street of the nominee. |

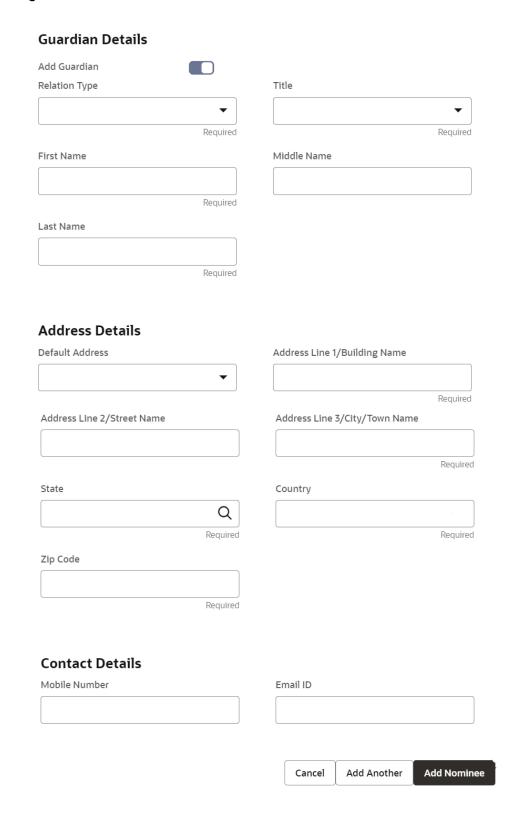

Table 2-38 (Cont.) Add Nominee Details - Field Description

| Field | Description |
|----------------------------------|-------------------------------------------------------------------------------------------------------|
| Address Line 3/City/Town Name | Specify the city or town of the nominee. |
| State | Specify the state of the nominee or click Search and select the state from the list of values. |
| Country | Country is defaulted based on the state selected. |
| Zip Code | Specify the zip code of the nominee. |
| Contact Details | This section displays the fields to capture the contact details. |
| Mobile Number | Specify the mobile number of the nominee. |
| Email ID | Specify the email ID number of the nominee. |

If the added nominee is a minor, its mandatory to add the guardian details. If required, you can also add gaurdian details for a major by switching to toffle ON from the Add Gaurdian field in the Gaurdian Details section.

Figure 2-54 Add Guardian Details

For more information on fields, refer to the field description table.

Table 2-39 Guardian Details - Field Description

| Field | Description |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Add Guardian | Switch to toggle ON to add guardian details. |
| | Switch to toggle OFF to not to add the guardian details. |
| Relationship Type | Select the relationship type with the guardian. |
| Title | Select a title for the guardian. |
| First Name | Specify the guardian's first name. |
| Middle Name | Specify the guardian's middle name. |
| Last Name | Specify the guardian's last name. |
| Address Details | This section displays the fields to capture the guardian's address details. |
| Default Address | Select the default address for the guardian. The options are: Nominee: If you select this option, then the guardian address is defaulted from nominee address. Account: If you select this option, then the account holder communication address is defaulted as guardian's address. |
| | Note: If requried, you can edit the defaulted address. |
| Address Line 1/Building Name | Specify the building of the guardian. |
| Address Line 2/Street Name | Specify the street of the guardian. |
| Address Line 3/City/Town Name | Specify the city or town of the guardian. |
| State | Specify the state of the guardian or click Search and select the state from the list of values. |
| Country | Country is defaulted based on the state selected. |
| Zip Code | Specify the zip code of the guardian. |
| Contact Details | This section displays the fields to capture the contact details. |
| Mobile Number | Specify the mobile number of the guardian. |
| Email ID | Specify the email ID number of the guardian. |

Note:

- The system defaults the customer's communication address, and personal details when the nominee details are defaulted from the customer.
- The system defaults the customer's communication address when the nominee or guardian address details are defaulted from the account.

3. Click Save.

The nominee details are saved and displayed in the **Nominee Details Update** section.

4. Click Submit.

The screen is successfully submitted for authorization.

2.4.6.2 View Nominee Details

You can view the details of the nominee added to a TD account.

To view the nominee details:

In the Nominee Details section, click the Edit icon from the Actions field.
 The Nominee Details section is displayed.

Figure 2-55 View Nominee Details

2. You can view the required nominee details in the section displayed. For more information on fields, refer to the field description table.

Table 2-40 View Nominee Details - Field Description

| Field | Description |
|-----------------|-----------------------------------------------------|
| Nominee Details | This section displays the details of the nominee. |
| Customer ID | Displays a customer ID of the nominee. |
| Relation Type | Displays the type of relationship with the nominee. |
| Title | Displays a title for the nominee. |
| First Name | Displays the nominee's first name. |
| Middle Name | Displays the nominee's middle name. |
| Last Name | Displays the nominee's last name. |
| Date of Birth | Displays the nominee's date of birth. |
| Minor | Displays whether the added nominee is a minor. |
| Address | Displays the complete address of the nominee. |
| Mobile Number | Displays the nominee's mobile number. |
| Email ID | Displays the nominee's email ID. |

3. Click Close.

2.4.6.3 Edit Nominee Details

You can edit the nominee details that are already added to a TD account.

To edit a nominee:

- 1. In the Nominee Details section, click the Edit icon from the Actions field.
 - The **Edit Nominee** section is displayed.
- 2. For information on fields and description, refer *Add Nominee*, as the fields in the **Add Nominee** section are same.
- 3. Click Save.

2.5 TD Inquiries

A deposit with a fixed tenure or term is called as time deposit or Term Deposit (TD). This chapter deals with inquiries of a term deposit.

This topic contains the following subtopics:

- Account Transactions
 - You can inquire about the Term Deposits Account Transactions using the **Account Transactions** screen.
- Certificate

You can specify a TD account number and generate the deposit certificate and displayed along with an option to email the PDF to the customer's registered email address using the **Certificate** screen. You can also perform this activity based on request from the deposit holder.

Interest Paid Out Details

You can inquire about the interest paid out details for a deposit account with a given period.

2.5.1 Account Transactions

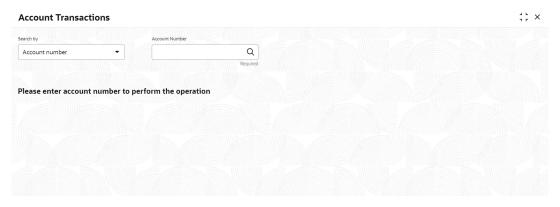

You can inquire about the Term Deposits Account Transactions using the **Account Transactions** screen.

 On the Homepage, from the Retail Deposit Services mega menu, under Term Deposits and Inquiries, click Account Transactions or specify Account Transactions in the search icon bar and select the screen.

Account Transactions screen is displayed.

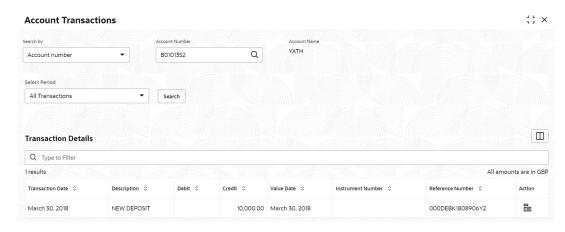

Figure 2-56 Account Transactions

- 2. On the **Account Transactions** screen, click the **Search** icon or specify the account number in the **Account Number** field, and press the **Tab** or **Enter**.
- 3. Select the required details and click **Fetch**.

The **Transactions Details** section is displayed.

Figure 2-57 Account Transactions Details

For more information on fields, refer to the field description table.

Table 2-41 Account Transactions – Field Description

| Field | Description |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Search By | Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name. Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email. A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked. For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. |
| | Note: The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. |
| | |

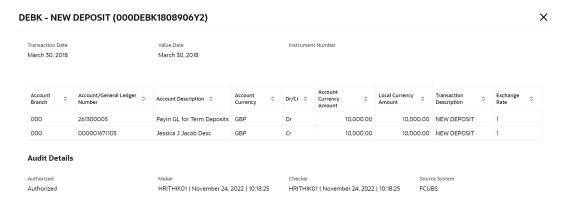

Table 2-41 (Cont.) Account Transactions – Field Description

| Field | Description |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Select Period | The date criteria are based on which the entries are to be displayed. Below are the options: All Transactions Date Range Current Month Current Month Plus Previous Month Current Month Plus Previous 3 Months Current Month Plus Previous 6 Months |
| | Note: If the All Transactions option is selected, it displays all the transaction details. This is the default option. If the Date Range option is selected, then you need to select the from and to date from the fields displayed adjacent. If the Current Month, Current Month Plus Previous Month, Current Month Plus Previous 3 Months, or Current Month Plus Previous 6 Months option is selected, then the date range is accordingly defaulted and not enabled. |
| Transaction Details | This section displays the transaction details of the TD account. By default, all transaction are displayed. |
| Type to Filter | A pattern filter will get applied to all the fields in the output grid. Whenever a match is found, the rows will become a part of the revised output. |
| Currency | Displays the currency for the transactions. |
| Number of Results | Displays the number of results available for the transactions. |
| Transaction Date | Displays the transaction date. |
| Description | Displays the description of the transaction. |
| Debit | Displays the debited amount in the transaction. |
| Credit | Displays the credited amount in the transaction. |
| Value Date | Displays the value date of the transaction. |
| Instrument Number | Displays the instrument number of the transaction. |
| Reference Number | Displays the reference number of the transaction. |

4. Click the View Details icon in the Action to view the required account transaction details.

| Search By | Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name. Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email. A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked. For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. | |
| | Note: The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. | |
| Start Date | The Start date is defaulted as the account opening or renewed date | |
| | in case of rolled over TD and user is allowed to modify the defaulted value. In case of rolled over deposit, the start date will be the new TD start date. | |
| End Date | The end date will default to the current branch date and the user is allowed to modify the defaulted value. | |
| Search | Click this button to search the interest paid out details for a given date range. | |
| Total Interest Amount | Displays the total interest amount for each life cycle of TD and the given date range. | |
| Transaction Date | Displays the transaction date. | |
| Interest Rate | Displays the final interest rate. | |
| Interest Amount | Displays the liquidated interest amount (without deducting tax). | |
| Payout Account | Displays the interest payout account. | |
| Payout Mode | Display interest payout mode , the possible values are Account, Ledger, and Deposit. | |
| Reference Number | Displays the transaction reference number. | |

3. Click Close icon to close the Interest Paid Out Details screen.

2.6 Prior Maturity Notices in Deposits

This topic describes the details of prior maturity notices in depositss.

Existing Notice days configuration at the business product level will be used to configure the prior days for notice generation. Notice generation will be applicable for both close-on-maturity and auto-renewal deposits. Basis the configuration, the notice generation will happen 'x' days before the maturity date of the deposit.

The static data for the maturity notices is listed below:

Table 2-45 Factory Shipped list of Facts

| | | | | 1 |
|--------|----------|----------------|---------------------|---------------------------------------------|
| Domain | Category | Event | Facts | Fact Description |

B

Error Codes and Messages

This topic contains error codes and messages found while using Oracle Banking Retail Deposits Service.

Table B-1 List of Error Codes and Messages

| Error Code | Error Message |
|--------------|----------------------------------------------------------------------------------------------|
| RDEP-ACC-001 | Interest Rate Based on Cumulative Amount should be Y or N |
| RDEP-ACC-002 | Continue Variance on Rollover should be Y or N |
| RDEP-ACC-003 | Maturity Instruction not provided |
| RDEP-ACC-004 | Auto rollover should not be selected if the deposit is close on maturity |
| RDEP-ACC-005 | Duplicate Records For UDE Effective Date for the given UDEVAL Combination |
| RDEP-ACC-006 | For independent deposit tenor preference, tenor cannot be blank |
| RDEP-ACC-007 | If Move Interest to unclaimed is checked, Move principal to unclaimed also should be checked |
| RDEP-BLK-001 | No operation is allowed in Amount Block type Account |
| RDEP-BLK-002 | Expiry Date cannot be in the past |
| RDEP-BLK-003 | Expiry Date cannot be less than Effective Date |
| RDEP-BLK-004 | Effective date cannot be in the past |
| RDEP-BLK-005 | System has defaulted the Effective Date to Today |
| RDEP-BLK-006 | Certificate Blocked amount not equal to total block amount |
| RDEP-BLK-007 | Blocked Amount Value cannot be less than or equal to zero |
| RDEP-BLK-008 | Blocked amount cannot be greater than the available balance for TD accounts |
| RDEP-BLK-009 | Amount Block type as Loan cannot be processed |
| RDEP-BLK-010 | Account Number cannot be modified |
| RDEP-BLK-011 | Amount block not released |
| RDEP-BLK-012 | Online amount block cannot be modified |
| RDEP-BLK-013 | Amount block of type Sweep Deposit can be only queried |
| RDEP-BLK-014 | Amount Block Effective Date cannot be in Past |
| RDEP-BLK-015 | Only Maker can delete the Amount Block |
| RDEP-BLK-016 | Amount block is already authorised |
| RDEP-BLK-017 | Amount Block is already closed |
| RDEP-BLK-018 | Amount Block is unauthorized, cannot close |
| RDEP-COM-001 | Unhandled Exception |
| RDEP-COM-002 | Record not found |
| RDEP-COM-003 | Authorized record cannot be deleted |
| RDEP-COM-004 | Request Validation Failure |
| RDEP-COM-005 | Both Percentage or Payin Amount cannot be null |
| RDEP-COM-006 | Account Balance is Negative |
| | |

Table B-1 (Cont.) List of Error Codes and Messages

| Error Code | Error Message |
|---------------|---------------------------------------------------------------------------------------------|
| RDEP-COM-007 | User restricted to query or modify this Account |
| RDEP-COM-008 | TD Payout Details not provided |
| RDEP-COM-009 | Both Percentage and Payout Amount cannot be blank |
| RDEP-COM-010 | Payout Component not specified in the Payout Details |
| RDEP-COM-011 | Failed to Query Data |
| RDEP-COM-012 | Successfully Saved |
| RDEP-COM-013 | Branchcode should be same as TD Payin branch |
| RDEP-COM-015 | Multimode pay option cannot be blank |
| RDEP-COM-016 | Pay in Option for TD cannot be blank |
| RDEP-COM-017 | Both multi mode percentage and multimode td amount should not be null |
| RDEP-COM-018 | Failed to get business product details |
