Purpose

This guide is designed to help user quickly get acquainted with the features and functionality of **Oracle Banking Accounts Retail Cloud Service**. It provides an overview to the product and the steps involved in the creation and the maintenance of Retail Accounts.

Audience

This user guide is intended for the following end Users / User Roles in a Bank:

Table User Roles

User Role	Functions
Back Office Clerk	Input functions for contracts
Back Office Managers/Officers	Authorization functions
Product Managers	Product definition and authorization
End of Day Operators	Processing during End of Day/ Beginning of Day
Financial Controller/Product Managers	Generation of reports

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table **Abbreviations**

Abbreviation	Definition
ATM	Automated Teller Machine
BBAN	Basic Bank Account Number
BSA	Bank Secrecy Act
CASA	Current and Savings Account User Guide
CDD	Customer Due Diligence

Table (Cont.) Abbreviations

Abbreviation	Definition
ECA	External Credit Approval
EDP	Event Delivery Platform
EOD	End of Day
FDIC	Federal Deposit Insurance Corporation
FIDM	Financial Institution Data Match (Child Support Payments)
GL	General Ledger
IBAN	International Bank Account Number
IDI	Insured Depository Institutions
IRS	Internal Revenue Service
LOV	List of Values
MMDA	Money Market Deposit Account
OFAC	Office of Foreign Assets Control
SMDIA	Standard Maximum Deposit Insurance Amount

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Basic Actions

This topic describes about basic actions that can be performed on a screen.

Table Basic Actions

Action	Applicable Stages	Description
Approve	Approval	<p>The system displays a section where approval remarks if any can be input. Click OK to submit. The transaction is sent to the Host system through <i>Oracle Banking Routing Hub</i>. The Host system validates the transaction again and the transaction is created if all the validations are successful. If the transaction fails, the transaction is moved to Handoff retry stage, and user can view the error message. In this stage, the authorizer can retry or reject the transaction. On reject, the transaction is sent back to the maker to modify or delete it.</p> <div style="border-left: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 20px;"> <p> Note:</p> <p>The maker checker validation will be provided if the same maker tries to approve the transaction.</p> </div>

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Audit	Initiation, Approval, and Hand off Retry	Audit details provide the logs of users who have acted on the transaction, the transaction date, and the time for all stages that the transaction has passed through.
Auto Authorization	Initiation	<p>Auto authorization can be configured for the branch servicing screens by creating a Rule based on life cycle code. The steps to create the Auto authorization as follows:</p> <ol style="list-style-type: none"> 1. Create the fact value as LIFECYCLECODE. 2. Create Rule to enable Auto authorization for any servicing screen and add the expression in Rule for that screen's lifecycle code. While creating a Rule the product processor should be given as DEPOSIT and fact should be selected as LIFECYCLECODE. For Example: <pre> IF (LIFECYCLECODE == TDPOMN) output Section1 LEVEL:0 </pre> 3. Create or modify a Rule Group with Name ApprovalRuleGroup and map the Rule(s) created in the step (2). <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>You can define one single Rule for all the screens and add the expression for the life cycle code or you can define individual Rule for each screen and map to the Rule group.</p> </div> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>For more information, refer to the <i>Oracle Banking Common Core User Guide</i> to create Fact, Rule and Rule Group.</p> </div>
Back	Initiation, Approval, and Hand off Retry	In case the user missed to specify or need to modify the details in the previous segment, click to navigate to the previous segment.
Cancel	Initiation, Approval, and Hand off Retry	Cancel operation cancels the transaction input midway without saving any data. The user is alerted that the input data would be lost before confirming the cancellation.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Change Log	Approval	When the authorizer clicks on the Change Log button, the system displays the changes made to the transaction in a pop-up window. By default, the change log is set to display only modified values. The Change Log button has two options, they are, All and Updated . The All button displays both modified and non-modified fields and the Updated button displays only the modified fields. The old and new values are displayed so that the authorizer can compare or verify the values and decide on further action. Also, the new values appear in red for easy recognition.
Close	Initiation, Approval, and Hand off Retry	Users can close the transaction input screen. The system displays a warning message to the user that any unsaved data would be lost. User can either choose to ignore the message and close the screen or choose to Save and Close the transaction.
Delete	Initiation	Delete operation deletes the transaction without saving any data. The user is alerted that the input data would be lost before confirming the deletion.
Document	Initiation, Approval, and Hand off Retry	The maker of the transaction can click on Document to upload documents that are relevant to the transaction. Once uploaded, the documents are available for viewing during authorization or by the maker.
Host Error	Hand Off Retry	Hand off Retry comes into use whenever a transaction input from the mid-office system fails authorization due to Host System rejection. The authorizer of the transaction can view the reason for Host rejection and take appropriate action.
i icon	Initiation, Approval, and Hand-off Retry	To view the Customer details such as the photograph, signature, customer ID, Account Branch, and balance, the i icon is used. The i icon becomes active once the maker of the transaction inputs the account number and tabs out of the field. The i icon is useful to inquire customer information about both the debit and the credit account numbers.
Maximize	Initiation, Approval, and Hand off Retry	User can maximize the transaction input screen.
Memo	Initiation, Approval, and Hand off Retry	The memos are displayed for the account number specified. If no memos are maintained and you click Memo , then a message is displayed that there are no memos maintained for the account. You can view the memos displayed in the dialog box and then click the Close icon to close. Memos are displayed upfront in Initiation and Authorization screens. In Hand-off Retry screens, you can click Memo to view the memos if any. The Memos will not be displayed in inquiry screens. The customer level memos having end date same as current system date are only displayed in the screens. In case of account level memos, there are no restrictions on displaying the memos. These memos are not editable.
Minimize	Initiation, Approval, and Hand-off Retry	Users can minimize the transaction input screen. When the screen is minimized, it appears as to a separate tab within the same web page.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Multi-Level Authorization	Initiation	<p>Multi-level authorization can be configured for the branch servicing screens by creating a Rule based on life cycle code. The steps to create the Multi-level authorization as follows:</p> <ol style="list-style-type: none"> 1. Create the fact value as LIFECYCLECODE. 2. Create Rule to enable Multi-level authorization for any servicing screen and add the expression in the Rule for that screen's lifecycle code. While creating a Rule the product processor should be given as DEPOSIT and fact should be selected as LIFECYCLECODE. For Example: <pre>IF (LIFECYCLECODE == TDPYIN) output Section1 LEVEL:1~DSR_FA_TDPAYIN_AUTH, LEVEL:2~DSR_FA_TDPAYIN_AUTH</pre> <div data-bbox="748 972 1461 1352" style="border: 1px solid #0070C0; padding: 10px; margin: 10px 0;"> <p> Note:</p> <p>If customer wants to use separate Functional Activity Code for each Level then Rule output need to be define like</p> <pre>LVELE:1~<FUNCTIONAL_ACTIVITY_CODE1>, LVELE:2~<FUNCTIONAL_ACTIVITY_CODE2></pre> </div> 3. Create or modify a Rule Group with name ApprovalRuleGroup and map the rule(s) created in the step (2). <div data-bbox="748 1465 1461 1696" style="border: 1px solid #0070C0; padding: 10px; margin: 10px 0;"> <p> Note:</p> <p>You can define one single rule for all the screens and add the expression for the life cycle code or you can define individual rule for each screen and map to the rule group.</p> </div> <div data-bbox="902 1734 1461 1885" style="border: 1px solid #0070C0; padding: 10px; margin: 10px 0;"> <p> Note:</p> <p>The maker checker validation will be provided if the same maker tries to</p> </div>

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
		 authorize the single or multi-level approval transaction.
Overrides	Initiation, Approval, and Hand-off Retry	<p>If override messages had appeared during initiation stage and they were accepted by the maker during submission, the Overrides button appears in the Initiation screen if the transaction is subsequently rejected by the authorizer.</p> <p>On the Override Details section, click Decline to go back to the transaction screen to modify or cancel it, or click Accept to complete the initiation stage and move the transaction to the approval stage. The Overrides button is displayed in the Approval and Hand-off retry stage if there were any override messages generated during initiation and accepted by the maker. When the Overrides button is clicked, the system displays the overrides accepted by the maker.</p> <p>After verifying the transaction and override details, the authorizer can either approve or reject the transaction. Existing Approve Transaction section is modified to display the overrides if any overrides are raised during the initiation submits.</p>
Reject	Approval, and Hand off Retry	When an authorizer chooses to reject a transaction, the Reject icon is used. The system displays a pop-up screen to capture the Rejection remarks if any. Click OK for the transaction to be routed back to the initiation stage. Subsequently, the maker can modify or delete the transaction details.
Remarks	Initiation, Approval, and Hand-off Retry	Remarks can be used either by the maker or the authorizer of the transaction to optionally capture useful information about the transaction.
Reset	Hand off Retry	The reset button clears all the details displayed on the screen and allows input or selection of a different customer number.
Retry	Hand off Retry	The possibility of retrying a transaction arises when transaction input from the mid-office system fails authorization due to Host System rejection. Such host-rejected transactions will be present in the Hand off Retry queue in the Task Wizard. The Retry option is available only to the authorizer. Upon Retry , the transaction is sent to the host once again through Oracle Banking Routing Hub. Optionally, the authorizer can also Reject the transaction in which case it is routed back to the maker.
Save and Close	Initiation	<p>In case a transaction has to be closed midway due to a lack of sufficient information, the maker of the transaction can choose this option.</p> <p>On Save and Close, the input details are saved and the transaction screen is closed. Saved transaction details will be available in My task. Users can select the transaction from My Task and proceed with the transaction or delete it.</p>
Submit	Initiation	After submitting the initiation stage, the system validates the transaction with the host and displays the errors or overrides if any. In case of an error, you can modify and resubmit or cancel the transaction. In case of an override, you can modify and resubmit or proceed with the transaction by accepting the overrides.

Symbols and Icons

Configurations

This topic contains the following **Configurations** as subtopics:

- **Business Product**
User can classify the customer accounts of the bank into different groups and assign each group an identifying code.
- **Garnishment Parameters**
A Garnishment Order is a Court Order or Statutory/regulatory authority order instructing a garnishee (i.e, to a bank) to hold funds in a customer accounts and should not be released until directed by the court. The order may instruct the bank to hold or block a particular amount or all the available funds in the customer accounts. A garnishment block fee will be charged to the account on placing a block for the garnishment amount.
- **Joint Holder Type**
The Customer can be the sole owner of the account or it can be held jointly. Joint accounts are accounts that are shared between two or more individuals. They can be operated either singly or jointly.
- **Product Switch**
The automatic business product transfer for accounts based on certain events (Reg D violation).
- **Relationship Type**
This configuration helps maintain the different relationship types applicable. For instance, In the joint account case, the joint holder's relationship with the primary holder can be maintained as part of the configuration.

1.1 Business Product

User can classify the customer accounts of the bank into different groups and assign each group an identifying code.

For example, user may define a group called **SAVREG** for regular savings accounts, **WLTSAV** for wealth management saving accounts.

Each group is referred to as an **Business Product** and is maintained in the **Business Product** screen. For each class, user also define certain common fields applicable to the accounts in this business product, such as, the General Ledger lines to which the accounts in this class report to facilities granted to the account holders (Check Book, ATM, Limits and so on).

The various features of a business product are captured across the following sub-screens covered as subtopics.

- **Basic Details**
- **Preferences**
- **Features**
- **Statement Preferences**
- **Interest**

- **Charges**
- **Limits**
- **Overdraft Parameters**
- **RegD Parameter**
- **Status Rule Definition**
- **GL Reporting Details**
- **Courtesy pay**
- **MIS Details**
- **Balance Parameters**

This topic contains the following subtopics:

- [Create Business Product](#)
This topic describes the systematic instructions to create business product. The maintenance screen allows the user to configure business product parameters.
- [View Business Product](#)
This topic explains the systematic instructions to view the list of configured business product parameters.

1.1.1 Create Business Product

This topic describes the systematic instructions to create business product. The maintenance screen allows the user to configure business product parameters.

Note:

The fields marked as **Required** are mandatory.

1. On **Home** screen, under **Menu**, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Business Product**.
2. Under **Business Product**, click **Create Business Product**.

The **Create Business Product** screen displays.

3. Specify the fields on the **Basic Details** screen.

For more information on fields, refer to the field description table below.

Table 1-1 Basic Details - Field Description

Field	Description
Product Code	Specify the six digit alpha numeric unique product code for the creation of accounts.
Description	Specify the brief description of the business product.
Account Type	Select the type of the account from the drop-down list. The different types of accounts are: <ul style="list-style-type: none">• Savings• Current The default value is Savings .
Account Code	As per your bank's requirement, you can choose to classify business products into different account codes. The bank can decide the way the business products are to be assigned to different account codes. The business product or an account code can be part of the customer account mask. If the customer account mask consists of an account code, the value in this field is replaced in the account number.
Validity	Specify the validity period of the business product by specifying the start date and the end date. End date is optional.

4. After specifying the fields in the **Basic Details** screen, click **Next**.

The **Preferences** screen displays.

Figure 1-2 Create Business Product – Preferences

5. Specify the fields on **Preferences** screen.

For more information on fields, refer to the field description table below.

Table 1-2 Preferences - Field Description

Field	Description
ATM Required	Switch this toggle ON , if you need to avail the ATM facility for the accounts belonging to that business product. The default value is OFF .
Passbook Required	Switch this toggle ON whether passbook is required or not for the account under the business product. The default value is OFF .

Table 1-2 (Cont.) Preferences - Field Description

Field	Description
Check Book Required	Switch this toggle ON whether check book is required or not for the account under the business product. When it is cleared, the preference is disabled for the account. The default value is OFF .
Auto Reorder of Check Book	Switch this toggle ON whether check book should be replenished automatically when check leaves are getting exhausted. This option appears only if Check Book Required option is toggle ON .
Reorder Level	Specify the threshold for auto reorder of check book.
Reorder Number of Leaves	Specify the number of leaves to be issued with the check book.
Direct Banking Required	<p>Switch this toggle ON whether direct banking is required for accounts under the business product. The default value is OFF.</p> <p>Once it is enabled, an Add icon and the related fields are displayed.</p> <p>Click Add icon to add a direct banking channel details. A new row is added with the below fields.</p> <ul style="list-style-type: none"> • Banking Channel - Banking channels maintained in Static Type Maintenance, are listed here as permissible channels for the business product. Channels include Internet Banking, Interactive Voice Response, Mobile, ATM, Credit Card and so on. • Channel Name - This field indicates the name of the banking channel. For example, ATM is the banking channel name for Automated Teller Machine. • Remarks - Capture if any remarks for the channel. • Action - Click the Delete icon to delete the added details.

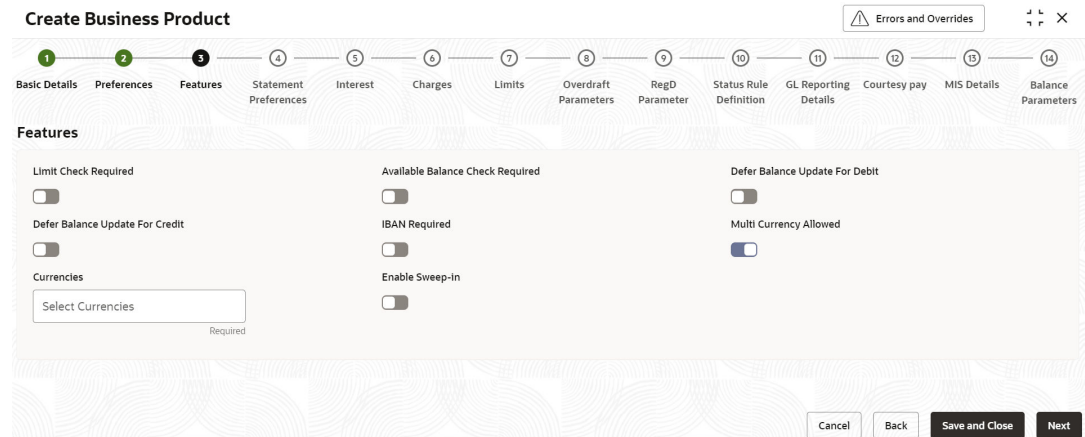

Table 1-2 (Cont.) Preferences - Field Description

Field	Description
<p>Auto Closure of Account Parameters</p>	<p>Switch this toggle ON whether to auto close an account basis balance maintained in an account over a defined period. The default value is OFF.</p> <p>Once it is enabled, an Add icon and the related fields are displayed.</p> <p>Click Add icon to add a direct banking channel details. A new row is added with the below fields.</p> <ul style="list-style-type: none"> • Currency - Specify the applicable currencies from the list of values. • Threshold Amount - Specify the amount for the corresponding currency selected. This amount is configured together with the threshold days for auto-account closure. This can be any value greater than or equal to 0. • Threshold Days - Specify the number of days of maintaining the configured threshold amount as account balance, basis which the system would pick the account under the business product for automatic account closure process. • Balance Transfer GL - The user can select the GL account to which the balance (if any) needs to be moved to, on auto closing the account. • Action - To edit the values in a row, or delete the added row. <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>An accounts with draft balance (negative balance) are not considered for auto closure of Accounts. As per adopted banking practices, Closing of Accounts with trivial negative balances (Debit), will be treated as write-off and this will be carried out with proper approvals from Credit Committee of Board. Once the approvals are obtained, the relevant asset monitoring department will pass accounting entries by debiting Profit and Loss Statement, and Credit the Account with Debit balances. Once these accounts become zero, they will be picked for auto closure after the threshold days.</p> </div>

6. After specifying the fields in the **Preferences** screen, click **Next**.

The **Features** screen displays.

Figure 1-3 Create Business Product – Features

7. Specify the fields on Features screen.

For more information on fields, refer to the field description table below.

Table 1-3 Features - Field Description

Field	Description
Limit Check Required	Switch this toggle ON to indicate that the limit check for sufficient availability of funds are made for the accounts belonging to this business product. The default value is OFF .
Available Balance Check Required	Switch this toggle ON to enable the system to check for the available funds before posting a debit entry to a customer account. The default value is OFF .
Defer Balance Update For Debit	Switch this toggle ON to defer the balance update. If Defer Balance Update for Debit is selected, then the balance after debit transactions will be updated during EOD. The default value is OFF .
Defer Balance Update For Credit	Switch this toggle ON to defer the balance update for credit transactions. If Defer Balance Update For Credit is selected, then the balance after credit transactions will be updated during EOD. The default value is OFF .
IBAN Required	Switch this toggle ON , if IBAN is required for the business product. The default value is OFF .
Multi Currency Allowed	Switch this toggle ON , to hold the different currencies under a single bank account.
Currencies	Select the Currencies from the list of values provided. This field is enabled only when the Multi Currency Allowed option is toggled ON .
Enable Sweep-in	Switch this toggle ON , if overdraft protection/sweep-in is applicable for accounts under this business product. The default value is OFF .

Overdraft Protection/Sweep-in:

Overdraft Protection/Sweep-in is a service provided by banks that protects customers from dishonoring or rejection of a debit transaction due to insufficient funds in their Checking or Savings account. When such an instance occurs, an amount to the extent of the shortfall is pulled from another linked savings/ checking account(s) held by the customer.

The linked account(s) is called the provider account and the account for which the funds are being pulled is called the beneficiary account.

Multiple sweep provider accounts can be set up for a beneficiary account with a priority assigned to them.

8. After specifying the fields in the **Features** screen, click **Next**.

The **Statement Preferences** screen displays.

Figure 1-4 Create Business Product - Statement Preferences

9. Specify the fields on the **Statement Preferences** screen.

For more information on fields, refer to the field description table below.

Table 1-4 Statement Preferences - Field Description

Field	Description
Display IBAN on Advices	Switch this toggle ON , the IBAN details will be displayed in the statement. The default value is OFF .
Statement Type	Specify the type of account statement. The options are as follow: <ul style="list-style-type: none"> • None • Summary • Detailed

Table 1-4 (Cont.) Statement Preferences - Field Description

Field	Description
Cycle	Specify the value for the cycle. The values are as follow: <ul style="list-style-type: none"> • Daily • Weekly • Fortnightly • Monthly • Quarterly • Semi Annual • Annual This field is available only when the Statement Type is selected as Summary or Detailed .
Statement Format	Specify the format in which the account statement should be generated. Click Search icon to view and select the required statement format. This field is available only when the Statement Type is selected as Summary or Detailed .

Validations

When the **Cycle** is selected as follows:

- **Monthly** - the list of value displays value from **1** to **31**. This shows the day of the month for statement generation.
- **Weekly** - the list of value displays value from **Sunday** to **Saturday**.
- **Fortnightly** - the list of value displays value from **Sunday** to **Saturday**.
- **Quarterly** - the list of value displays value from **January** to **December**.
- **Semi Annual** - the list of value displays value from **January** to **December**.
- **Annual** - the list of value displays value from **January** to **December**.

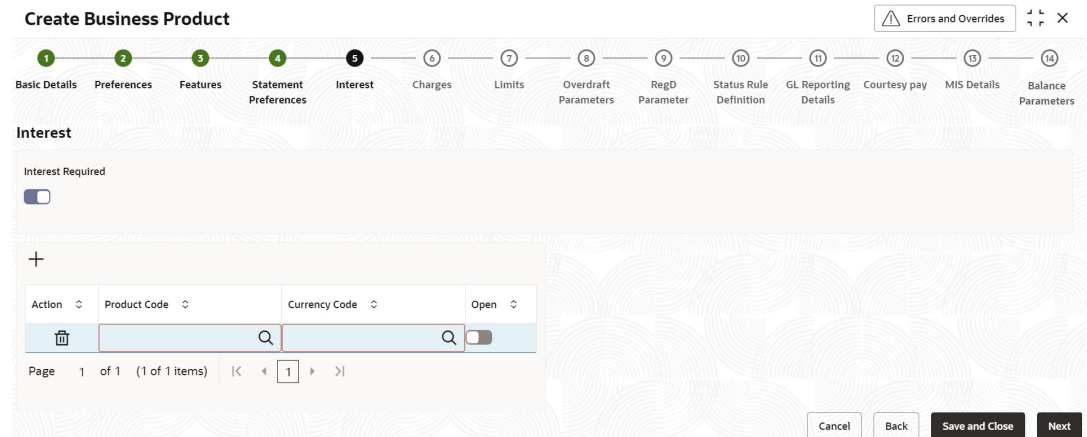

10. After specifying the fields in the **Statement Preferences** screen, click **Next**.

The **Interest** screen displays.

To calculate interest for an account, you must apply an interest product code on the account. To recall, every interest product code that you create is linked to an interest rule. The logic to calculate interest is built into an interest rule. When you apply an interest product code on the account, interest for the account will be calculated according to the interest rule definition.

The interest rule that is linked to the product(s) will determine the interest that is applied on the account. You may want to apply more than one interest product code on an account. For example, you may want to pay credit interest on the credit balance maintained in a current account and levy a debit interest if the account lapses into a debit balance. In order to achieve this, you would have to apply two product codes (one defined for credit interest and another defined for debit interest). In this screen, you can choose the interest product codes that you want to apply on the account.

Figure 1-5 Create Business Product – Interest

11. Specify the fields on **Interest** screen.

For more information on fields, refer to the field description table below.

Table 1-5 Interest - Field Description

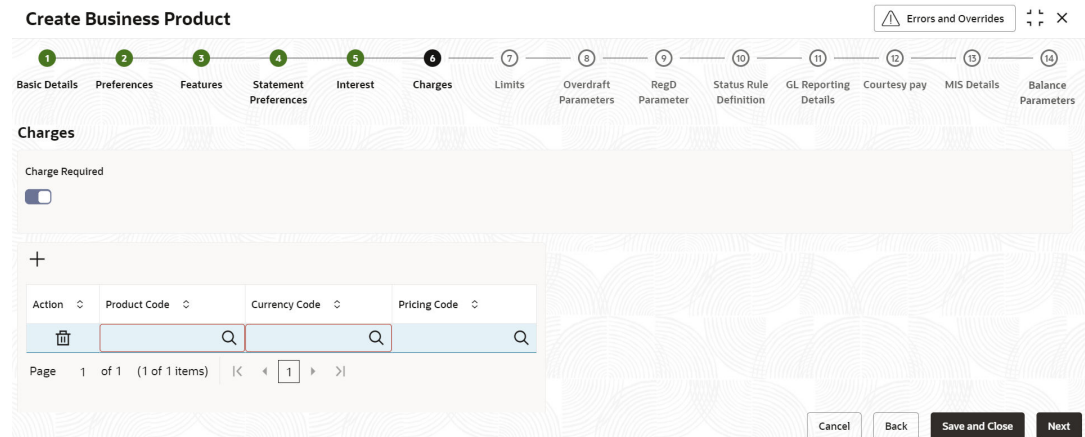

Field	Description
Interest Required	Switch this toggle ON to indicate that the interest is applicable for the accounts with this business product. The default value is ON . Click the Add icon, a new row is added to update the details for the interest.
Action	Click the Delete icon to delete the added row.
Product Code	Click Search icon to view and select the required product code.
Currency Code	Click Search icon to view and select the required currency code.
Open	Switch this toggle ON to change the status of the product code to open. The default value is OFF .

For more information about Interest, refer to *Interest and Charges User Guide*

12. After specifying the fields in the **Interest** screen, click **Next**.

The **Charges** screen displays.

Figure 1-6 Create Business Product – Charges

13. Specify the fields on **Charges** screen.

1.2 Garnishment Parameters

A Garnishment Order is a Court Order or Statutory/regulatory authority order instructing a garnishee (i.e, to a bank) to hold funds in acustomer accounts and should not be released until directed by the court. The order may instruct the bank to hold or block a particular amount or all the available funds in the customer accounts. A garnishment block fee will be charged to the account on placing a block for the garnishment amount.

This topic contains the following subtopics:

- [Create Garnishment Parameters](#)
This topic explains the systematic instructions to create garnishment parameters.
- [View Garnishment Parameters](#)
This topic describes the systematic instructions to view the list of configured garnishment parameters.

1.2.1 Create Garnishment Parameters

This topic explains the systematic instructions to create garnishment parameters.

 **Note:**

The fields marked as **Required** are mandatory.

1. On **Home** screen, under **Menu**, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Garnishment Parameters**.
2. Under **Garnishment Parameters**, click **Create Garnishment Parameters**.
The **Create Garnishment Parameters** screen displays.

Figure 1-18 Create Garnishment Parameters

3. Specify the fields on **Create Garnishment Parameters** screen.
For more information on fields, refer to the field description table below.

Table 1-18 Create Garnishment Parameters - Field Description

Field	Description
Look Back Period	The number of days prior to the garnishment start date to be considered for protected amount calculation.

Table 1-18 (Cont.) Create Garnishment Parameters - Field Description

Field	Description
Garnishment Fee Code	Click the Search icon, the list is fetched from the charge code definition defined in the pricing and decision system. Select the respective charge code from the list.
Fee Account	This is the receivable account for garnishment fee. Click the Search icon, the list is fetched from the fee account. Select the respective fee account from the list.
Business Products Excluded From Garnishment	Click Add , the Add Garnishment list displays. The values in the list are excluded from the garnishment processing. Based on the selection from the list the Business Product Code , Description and the Account Type is defaulted. Click the Delete icon from the Action to delete the selected values.
Name of the Federal Organizations	Click Add to specify the federal organizations which is excluded from the protected amount calculation.
Code	Specify the federal organization code.
Description	Specify the federal organization description.
Calculate protect amount	If it is enabled, any credit amount from this specified federal organization is considered for protected amount calculation.
Action	Click the Edit icon to edit the values, click the Save icon to save the record and Click the Delete icon to delete the record.

 **Note:**

The Garnishment fee will be applied to the account upon completion of placing a block or hold for the required amount. If there is no sufficient balance to fulfill the charge amount, subsequent actions of retrying the fee collection have to be operationally dealt with by the Bank.

4. After specifying all the details, click **Save** to complete the steps. Or, click **Cancel** to exit without saving.

1.2.2 View Garnishment Parameters

This topic describes the systematic instructions to view the list of configured garnishment parameters.

1. On **Home** screen, under **Menu**, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Garnishment Parameters**.
2. Under **Garnishment Parameters**, click **View Garnishment Parameters**.

The **View Garnishment Parameters** screen displays.

2.1 Dashboard

This topic describes the systematic instructions about Dashboard and various widgets used. This Dashboard provides an overview of the goings-on at the bank to its users, which helps the user in managing the transaction life cycle of different activities in an efficient manner.

The Dashboard is used to visualize the data by graphically representing them using a doughnut wheel. In Dashboard the filters are used to narrow down the data to the transaction level.

Figure 2-1 Dashboard

The Dashboard displays widgets for which access is granted to the user. Following widgets are available in the Account Dashboard and described in the sub-sections:

- [Servicing Tasks](#)
This topic describes the process of viewing, acquiring, releasing, and tracking the transactions that was performed during the day.
- [Bulletin Board](#)
This topic describes the systematic instruction about the Bulletin Board widget in Dashboard.
- [My Diary](#)
This topic describes the systematic instruction about the My Diary widget in Dashboard.
- [My Pending Tasks](#)
This topic describes the systematic instruction about My Pending Tasks widget in Dashboard.

2.1.1 Servicing Tasks

This topic describes the process of viewing, acquiring, releasing, and tracking the transactions that was performed during the day.

The Servicing Tasks widget provides an overall view of the servicing transaction status for the day and the activities to be completed during the day without having to refer for information in different pages.

Based on the user rights, you can view the count of transactions categorized as free tasks, acquired or pending tasks, tasks awaiting approval, rejected or failed tasks, and completed tasks. You can search for or filter a particular transaction and drill down to the transaction level to execute it under each category.

- On the **Dashboard** screen, the **Servicing Tasks** widget is displayed:

Figure 2-2 Servicing Tasks

Servicing Tasks				
Free Tasks	Acquired/Draft Tasks	Pending Approval Tasks	Failed/Rejected Tasks	Completed Tasks
2453	151	9	7	0

For more information on fields, refer to the field description table.

Table 2-1 Servicing Tasks - Field Description

Field	Description
Free Task	Displays the number of free tasks available either for editing or claiming based on the rights. If the user clicks on a number, the system performs the action on the task. If the user lacks authorization rights, the system displays a zero instead.
Acquired/Draft Tasks	Displays the tasks that have been acquired for authorization and tasks where a servicing screen was launched, actions were performed, and were saved and closed to be continued later. Depending on user Authorization rights, user can acquire the tasks from Free Tasks for further processing if you have Maker rights. If you do, the draft numbers are populated. The Acquired/Draft Tasks counts are displayed in the My Pending Tasks page too. They can be identified as tasks in Approval and Incomplete status respectively. Also, if a transaction is rejected or when it fails, the number is also populated in this field.

Table 2-1 (Cont.) Servicing Tasks - Field Description

Field	Description
Pending Apporval Tasks	<p>Displays the number of approvals pending for the transactions. The values in this field are displayed in following two scenarios:</p> <ul style="list-style-type: none"> • Pending approval tasks are those which the maker has submitted and the initiation task is completed. Once the initiation is complete, user will find the task on the free task page for approval. Hence, the value in this field represents those tasks that are completed by the maker but are yet to be authorized or actioned further. • The maker and the first authorizer will display this field after a transaction has been approved in a multi-auth set up. So, there is a track of the transaction count that each role has performed during the day.
Failed/Rejected Tasks	<p>Displays the number of transactions that are failed or rejected. The following are the scenarios, where the transactions that are failed and rejected are displayed, based on the rights:</p> <ul style="list-style-type: none"> • In case of maker, when the authoriser rejects a transaction, then the transaction is sent back to the maker. The maker's transaction has been rejected and is now displayed as such on the My Pending Tasks page. • If a transaction fails host validation during authorization, then the authorizer updates its status to Failed and displays it on the My Pending Tasks page.
Completed Tasks	Displays the transactions that are completed from maker as well as checker perspective.

2.1.2 Bulletin Board

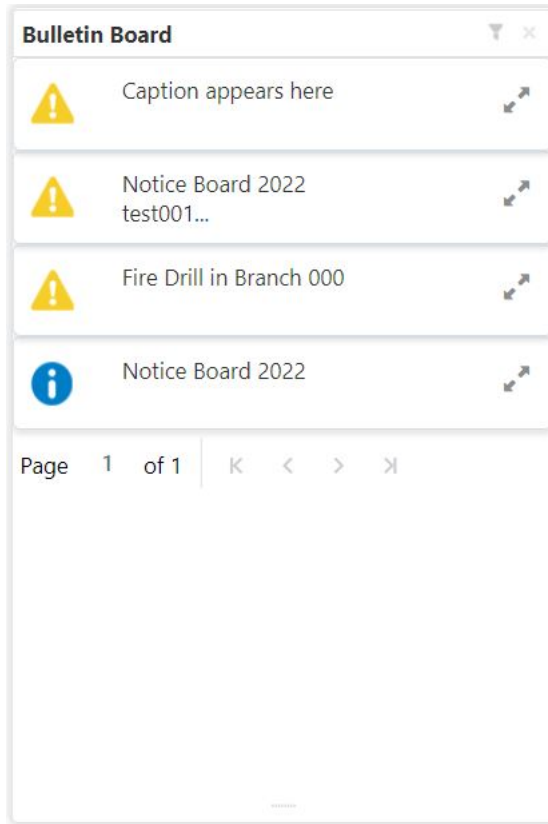

This topic describes the systematic instruction about the Bulletin Board widget in Dashboard.

The Bulletin Board widget posts all messages about the business in between the bank and its customers. If the bulletin message is Alert, the **Alert** icon is displayed and if the bulletin message is information, the **Information** icon is displayed.

The messages are:

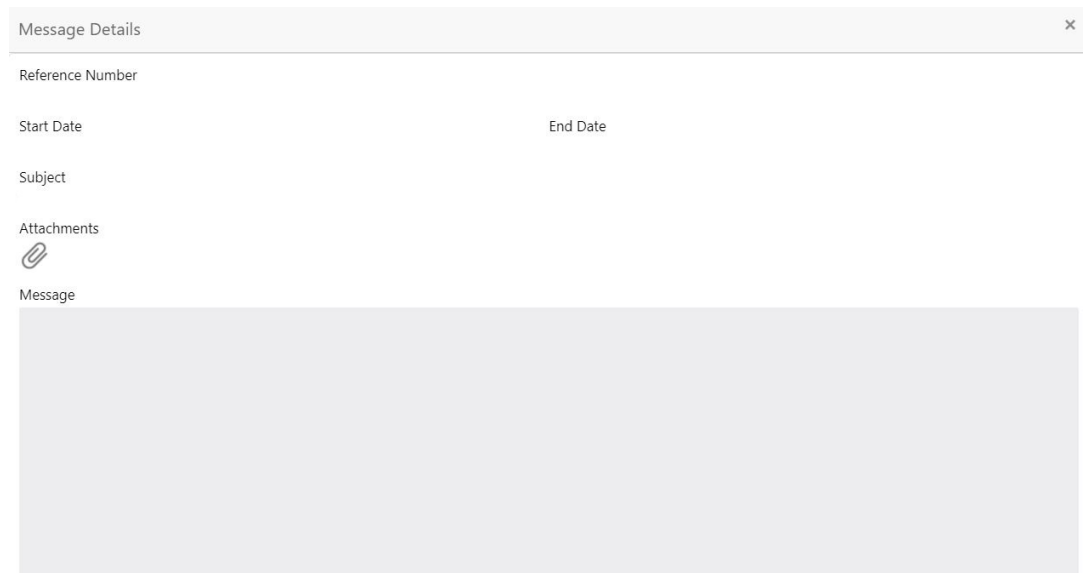

- Public news and its messages
- Bank policies and notices
- System Messages like system downtime information, network failures, etc.

Figure 2-3 Bulletin Board

1. To view the details of the bulletin, click the **Expand** icon. **Message Details** pop-up window is displayed.

Figure 2-4 Message Details

- Click the **Attachments** icon, to view the list of attachments.
Document List pop-up window is displayed.

Figure 2-5 Document List

- Click the attachment to view the document.
- Click the **Filter** icon to filter the bulletin board based on Reference Number, Start Date, End Date.

For more information on fields, refer to the field description table.

Table 2-2 Bulletin Board-Filter - Field Description

Field	Description
Reference Number	Enter the Reference Number or click the search icon to view the Reference Number pop-up window. By default, this window lists all the Reference Numbers present in the system. You can search for a specific Reference Number by providing Reference Number , and click on the Fetch button.
Start Date	Click on the adjoining calendar icon and specify the Start Date .
End Date	Click on the adjoining calendar icon and specify the End Date .

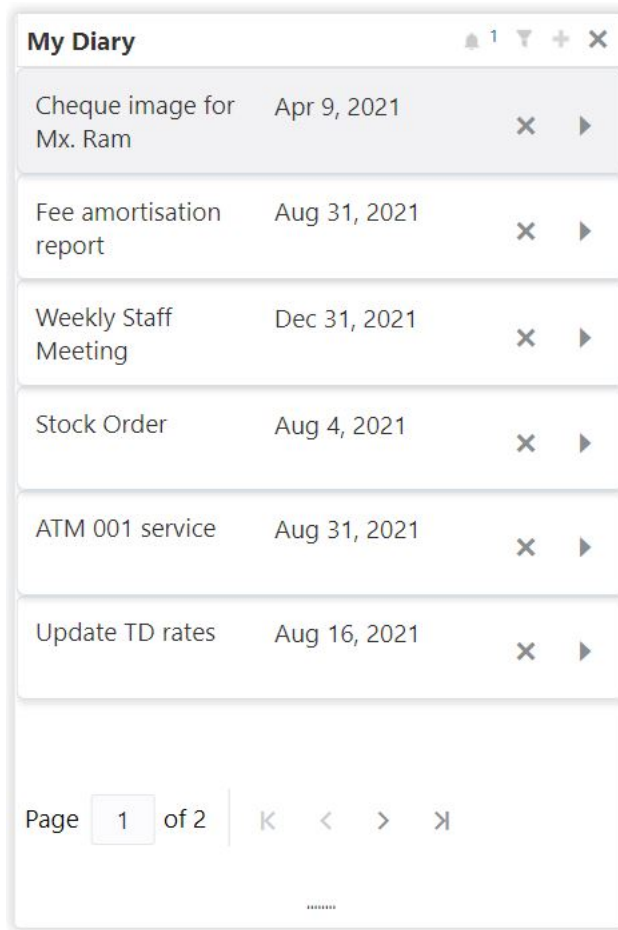

- Click the **Filter** button.
The applied Filters will appear in the band within the widget.
- To remove the filters, click the **Filter** icon and click the clear button.

2.1.3 My Diary

This topic describes the systematic instruction about the My Diary widget in Dashboard.

My Diary widget helps users to keep a record of activities that they would perform in the near future or perform at regular intervals. This widget allows users to set reminders, define a frequency for reminders as well as define an end date to the event.

Figure 2-6 My Diary

1. Click the **Filter** icon to filter the events based on due date.
For more information on fields, refer to the field description table.

Table 2-3 My Diary-Filter

Field	Description
Filter By Due Date	Click on the adjoining calendar icon and specify the Due date.

2. The dairy event within the widget will show the Title and the End-Date. Click the **Expand** icon to view or edit the diary event.
3. When the user defines the reminder date for a dairy event, the bell icon with the number of reminder events will be displayed. Click the **Bell** icon to view the events that are due for the day.
4. Click the **Add** icon to create a new Diary event
Add Event pop up screen is displayed.

Figure 2-7 Add Event

The screenshot shows a modal window titled "Add Event" with a close button (X) in the top right corner. The form contains the following fields:

- Title:** A text input field with the placeholder text "Please enter Heading".
- Message:** A larger text input field for details.
- Reminder:** A date selection field with a calendar icon on the right.
- Reminder Frequency:** A field with a dropdown arrow and two small buttons (downward and upward arrows) for adjusting the frequency.
- End Date:** A date selection field with a calendar icon on the right.

At the bottom of the form are two buttons: "Cancel" and "Save".

- On **Add Event** pop up screen, specify the fields.
For more information on fields, refer to the field description table.

Table 2-4 My Diary-Add Event

Field	Description
Title	Enter an appropriate title for the diary event. When event is saved, the title appears on the widget.
Message	Enter details about the diary event.
Reminder	Click on the adjoining calendar icon and specify the reminder date.
Reminder Frequency	Users can define a reminder frequency for the diary event in Days, Months, or Years. By using the increment and decrement button, the frequency can be increased or decreased.
End Date	Click on the adjoining calendar icon and specify the End date. On this date, the event will be removed from the widget. <div style="border-left: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note: If the Due Date is not specified, the event remains in the widget indefinitely.</p> </div>

- Click the **Filter** button.
The applied Filters will appear in the band within the widget.

- To remove the filters, click the **Filter** icon and click the **Clear** button.

2.1.4 My Pending Tasks

This topic describes the systematic instruction about My Pending Tasks widget in Dashboard.

My Pending Tasks widget provides the user list of transactions that are in different statuses such as rejected, failed, and incomplete. Users can click on each section of the widget to access the transactions and proceed to complete them.

My Pending Tasks doughnut is classified as follows:

- Failed
- Incomplete
- Rejected

Figure 2-8 My Pending Tasks

- To view the Pending Tasks, hover the mouse on each section of the doughnut.
- Click the **Filter** icon to display the transactions based on process name.
For more information on fields, refer to the field description table.

Table 2-5 My Pending Tasks-Filter

Field	Description
Process Name	Enter the Process Name or click on the search icon to select the processes available under a particular sub-domain.

- Click the **Filter** button.
The applied Filters will appear in the band within the widget.
- To remove the filters, click the **Filter** icon and click the clear button.

2.2 Account Creation

This topic provides the account creation details for the Retail Accounts.

For the detailed explanation on the savings account and current account creation, refer to the following user guides under the *Oracle Banking Origination* product.

- Current Account Origination User Guide*

- *Savings Account Origination User Guide*

2.3 Servicing Charge

You can configure online service charge configure account servicing screens. The system validates the charge amount against the account balance when you modify or waive the charge details. You can define multiples charges for the servicing transactions.

Based on the charge maintenance, you can configure the charges in the following screens:

- **Account Address Update**
- **Activate Inactive/Dormant Account**
- **Check Book Status**
- **Stop Check Request**
- **Account Statement Frequency**
- **Beneficiary Details Update**
- **Joint Holder Maintenance**
- **Account Preferences**
- **Account Status Change**
- **View and Modify Stop Check Payment**

To configure charge details:

1. In the **Charge Details** section, view the required details.

Figure 2-9 Charge Details

Charge Details					
Charge Code	Currency	Defaulted Amount	Modified Amount	Charge Details	Waiver
ADDCHR	USD	50	50		<input type="checkbox"/>
STAX	USD	5	5		<input type="checkbox"/>

Total Charge Amount in Local Currency: 55 Total Charge Amount in Account Currency: 55

For more information on fields, refer to the field description table.

Table 2-6 Charge Details - Field Description

Field	Description
Charge Code	Displays the charge code applied on the account.
Currency	Displays the currency of the charge amount.
Defaulted Amount	Displays the defaulted charge amount.
Modified Amount	Displays the modified charge amount.

Table 2-6 (Cont.) Charge Details - Field Description

Field	Description
Charge Details	<p>Displays the Details icon to view more details on the charge.</p> <p> Note: For more information, refer <i>View Charge Details</i>.</p>
Waiver	<p>Switch to toggle ON to waive the particular charge applied on the account. Switch to toggle OFF to retain the charges applied on the account.</p> <p> Note: To enabled the field, you need to double click in the field.</p>
Total Charge Amount in Local Currency	Displays the total charge amount in local currency.
Total Charge Amount in Account Currency	Displays the total charge amount in account currency.

View Charge Details

Account Branch	Displays the account holder's branch.
Mode of Operation	Displays the account's mode of operation.
Account Status	<p>Displays the current status of the account.</p> <div style="border: 1px solid #0070c0; padding: 10px; background-color: #e6f2ff;"> <p> Note:</p> <p>Account status is displayed as Active, Inactive, Frozen, or Dormant based on account status. Following status is displayed when there are combination of account status:</p> <ul style="list-style-type: none"> • If the account is frozen and Dormant, then the status is displayed as Frozen. • If the account is Inactive and Frozen, then the status is displayed as Frozen. </div>
Account Balance	Displays the total account available.
<Phone Number>	Displays the customer's phone number.
<Email ID>	Displays the customer's email ID.
Address of Communication	Displays the complete address of the customer.

2. In this section, you can view the customer's basic information.

2.5 Account View

Under the **Account View** menu, you can view and perform various vital transactions on a CASA account.

This topic contains the following subtopics:

- [Account 360](#)
The Account 360 screen helps the user provide an overview of Account Holder Details, Account Balance, Account Details, Suggested Actions, Alerts, Recent transactions, Interest Details, and Courtesy Pay.

2.5.1 Account 360

The Account 360 screen helps the user provide an overview of Account Holder Details, Account Balance, Account Details, Suggested Actions, Alerts, Recent transactions, Interest Details, and Courtesy Pay.

Note:

The fields marked as **Required** are mandatory.

To view the 360 account details:

1. On the **Home** screen, from **Retail Account Services**, under **Account View**, click **Account 360**, or specify **Account 360** in the Search icon bar.

The **Account 360** screen is displayed.

Figure 2-12 Account 360

The screenshot shows the 'Account 360' interface. At the top, there is a title 'Account 360' and a close button. Below the title is a search bar with three sections: 'Search by' containing a dropdown menu with 'Account Number' selected, 'Account Number' containing a text input field with a search icon and a 'Required' label below it, and 'Account Name' which is currently empty. Below the search bar, a message reads 'Please enter account number to perform the operation'. The background of the page features a decorative pattern of overlapping circles.

2. On **Account 360** screen, specify the account number.
Account 360 details for account is displayed.

- On **Account 360** screen, specify the fields.
For more information on fields, refer to the field description table.

Table 2-9 Account 360 - Field Description

Field	Description
Search By	<p>Users can search for an account number by using any of the available search criteria.</p> <p>The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.</p> <p>Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.</p> <p>A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.</p> <p>For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.</p> <div data-bbox="737 850 1474 1136" style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</p> </div>

4. On the **Account 360** screen, click the **Refresh** icon to refresh the information on the screen.
5. On the **Account 360** screen, click the **Hamburger** icon to browse the account services menu.
 - [Account Balance](#)
This topic helps the user to know the account balance details while performing account servicing transactions.
 - [Account Information](#)
This topic helps the user to know the account information details while performing account servicing transactions.
 - [Account Holder Details](#)
This topic helps the user to know the Account Holder details while performing account servicing transactions.
 - [Account Details](#)
This topic helps the user to know the Account Address details and facilities enabled to the account.
 - [Account Statement Details](#)
This topic helps the user to know the statement frequency and the last statement details for the account.

- [Suggested Actions](#)
This topic describes the systematic instruction about the Suggested Actions in Account 360 screen. The Suggested Actions widget in the Account 360 screen displays the account's upcoming events and pending actions. This helps the user to inform the account holder and take the required actions.
- [Alerts](#)
This topic describes the systematic instruction about the Alerts in Account 360 screen. The Alerts widget helps the user view alerts on the account.
- [Courtesy Pay](#)
This topic helps the user to know the courtesy pay details for an account.
- [Recent Transactions](#)
This topic describes the systematic instruction to view the Recent Transactions in the Account 360 screen.
- [Interest Details](#)
This topic describes about Interest Details in the Account 360 screen.
- [Frequent Actions](#)
This topic describes the about the Frequent Actions in the Account 360 screen. The Frequent Actions helps the user to perform account servicing related transactions from the account 360 view screen without navigating to the main menu.

2.5.1.1 Account Balance

This topic helps the user to know the account balance details while performing account servicing transactions.

On the **Account 360** screen, the system displays the following details for the account balance:

- Withdrawable Balance
- Available Balance

Figure 2-14 Account Balance

Withdrawable Balance	Available Balance
1,000,012,560.00	1,000,009,000.00

2.5.1.2 Account Information

This topic helps the user to know the account information details while performing account servicing transactions.

On the **Account 360** screen, the system displays the following account information details:

- Account Product Description
- Account Branch Description
- Account Status
- IBAN
- Account class Type (Savings/Current)
- Account Currency

- Account Opening Date
- Nomination Status
- Performance Status
- Account Type

Figure 2-15 Account Information

Regular Savings Account		Active
Branch	006 Branch	Account Savings
IBAN		Since Mar 30, 2018
Performance Status	NORM Since Mar 30, 2018	Currency USD
Nomination	Provided	Type Single

 **Note:**

Account status is displayed as Active, Inactive, Frozen, Dormant, Closure Initiated, or Closed based on account status.

Following status is displayed when there are combination of account status:

- If the account is frozen and Dormant, then the status is displayed as Frozen.
- If the account is Dormant and Closed, then the status is displayed as Closed.
- If the account is Inactive and Frozen, then the status is displayed as Frozen.

2.5.1.3 Account Holder Details

This topic helps the user to know the Account Holder details while performing account servicing transactions.

On the Account 360 screen, the system displays the following account holder details:

- Account holders photo
- Name
- Customer ID
- Account holder relation (Primary/Joint and first/Joint and other etc)

- Mobile Number with ISD code
- Email Id
- Mode of Operation

Figure 2-16 Account Holder

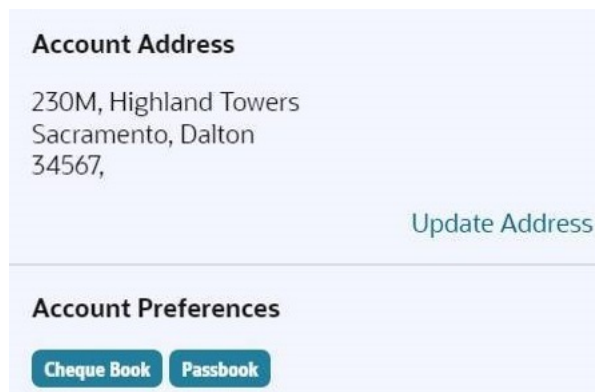

2.5.1.4 Account Details

This topic helps the user to know the Account Address details and facilities enabled to the account.

On the **Account 360** screen, the Account Details widget provides the Account Address.

Figure 2-17 Account Details

To update the account address, click **Update Address** hyperlink and the system displays the **Account Address Update** screen.

Note:

Fore more information, refer [Account Address Update](#).

On the **Account Address Update** screen, user can modify the below details:

- Building
- Street
- City
- State
- Country
- Zip Code

2.5.1.5 Account Statement Details

This topic helps the user to know the statement frequency and the last statement details for the account.

The below account statement details are displayed:

- Account Statement Frequency and Cycle
- Last Statement Date

Figure 2-18 Account Statement Details

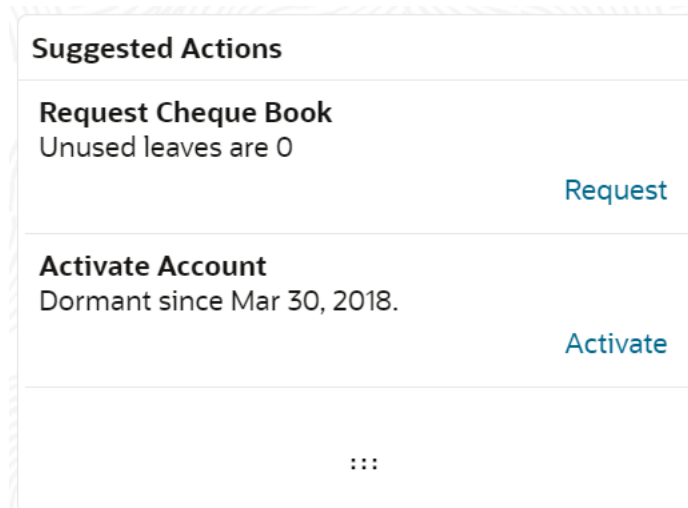

To generate the ad hoc account statement, click the **Request Statement** link.

2.5.1.6 Suggested Actions

This topic describes the systematic instruction about the Suggested Actions in Account 360 screen. The Suggested Actions widget in the Account 360 screen displays the account's upcoming events and pending actions. This helps the user to inform the account holder and take the required actions.

On the **Account 360** screen, the system displays the suggested actions for the account.

Figure 2-19 Suggested Actions

The suggested actions widget displays two suggested actions at a time. If more than 2 suggested actions are present for the account, the **View All** button is enabled to the user.

1. To view all the suggested actions, click on **View All** button.
2. Click the **Close** icon on the **Suggested Actions** pop-up window.
The view all display is closed.
3. On the **Suggested Actions** widget, the below cases are displayed. If no suggested actions are displayed, the system displays the message as **No Suggested Actions**.

For more information on fields, refer to the field description table.

Table 2-10 Suggested Actions - Field Description

Field	Description
Deliver Check Book	<p>Displayed, if any check book delivery is pending for the account at branch. To deliver the check book, click on Deliver button, and the Check Book Status screen is launched.</p> <p>The system displays the message with check book request date and status.</p> <p>For example, Requested on March 30, 2019, pending delivery.</p>
Request Check Book	<p>Displayed, if the number of pending check leaves are less than or equal to the specified limit at Account 360 parameter. By default the limit is 5 and can modify the value. To request new check book, click on Request button, and the Check Book Request screen is launched.</p> <p>For example, Unused leaves are 5.</p> <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>The pending check leaves consider unused, stopped, and rejected checks. It excludes canceled and used checks.</p> </div>

Table 2-10 (Cont.) Suggested Actions - Field Description

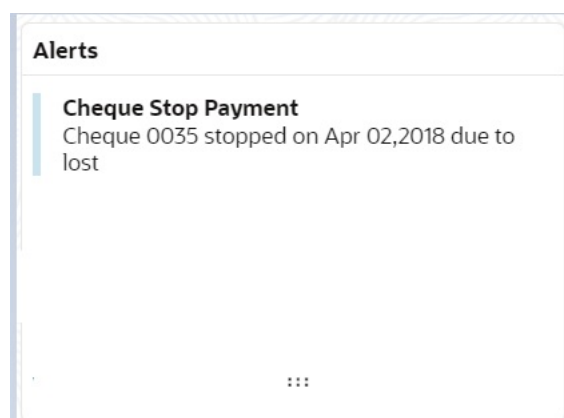

Field	Description
Activate Dormant Account	Displayed, if the account status is dormant. To activate the dormant account, click on the Activate button, and the Activate Dormant Account screen is launched. The system displays the message with a dormant date. For example: Dormant since Jan 10, 2022.

2.5.1.7 Alerts

This topic describes the systematic instruction about the Alerts in Account 360 screen. The Alerts widget helps the user view alerts on the account.

1. On the **Account 360** screen, the system displays the alerts of any exceptions, memo, and warnings on the account.

Account Alert details are displayed.

Figure 2-20 Alerts

2. The alerts widget displays two alerts at a time. If more than 2 alerts are present for the account, the **View All** button is enabled to the user.
3. To view all alerts, click on **View All** button.
Alerts pop-up window is displayed.
4. Click the **Close** icon on the **Alerts** pop-up window.
Alerts pop-up window is closed.
5. On the **Alerts** widget, the below details are displayed.
For more information on fields, refer to the field description table.

 **Note:**

If no alerts are displayed, the system displays the message as **No Alerts**.

Table 2-11 Alerts - Field Description

Alerts	Description
Check Stop Payment	Displayed if any active stop payment is available on the account. The alert message displays the check number, Stop payment date, and stop payment reason. For example, check 0002 stopped on Jan 10, 2022 due to an incorrect amount.
Check Rejected	Displayed if any check clearing is rejected on the account. The alert message displays the check Number, Rejected date, and Reject reason. For example, check CHQ00000003023063 Rejected on Jan 15, 2022, due to Insufficient Balance.
Amount Block	Displayed if any active amount is blocked on the account. The alert message displays the Blocked amount, Date, and Block reason details. For example, GBP 10,000.00 blocked on Dec 10, 2021, due to legal notice.
Memo	Displayed if any active memo is maintained for the account. The memo message is displayed in the alert.
Debit Restricted	Displayed if any debit restriction is there for the account.
Credit Restricted	Displayed if any credit restriction is there on the account.

2.5.1.8 Courtesy Pay

This topic helps the user to know the courtesy pay details for an account.

If courtesy pay is enabled for an account, the below details are displayed:

- Courtesy Pay Limit
- End Date
- ATM/POS Transactions
- Check Clearing Transactions
- Manage Courtesy Pay

Figure 2-21 Courtesy Pay

Courtesy Pay	
Courtesy Pay Limit	End Date
1,000.00	December 30, 2020
ATM/POS Transactions	Check Clearing Transactions
Yes	Yes
Manage Courtesy Pay =	

To launch the courtesy pay maintenance screen, click **Manage Courtesy Pay** link.

2.5.1.9 Recent Transactions

This topic describes the systematic instruction to view the Recent Transactions in the Account 360 screen.

1. On the **Account 360** screen, the system displays the Recent Transactions performed for the account.

Recent Transactions details for the account are displayed.

Figure 2-22 Recent Transactions

Recent Transactions
Test Transaction Description Credited GBP 10,000.00 on March 30, 2018 Reference : 123124
Test Transaction Description Credited GBP 1,000.00 on March 30, 2018 Reference : 123123
Test Transaction Description Credited GBP 1,000.00 on March 30, 2018 Reference : 123123

...

2. The Recent Transactions widget displays latest 5 transaction details at a time. If more than 5 transaction details are present for the account, the **View more** button is enabled to the user.
3. To view more Recent Transactions, click on **View more** button.

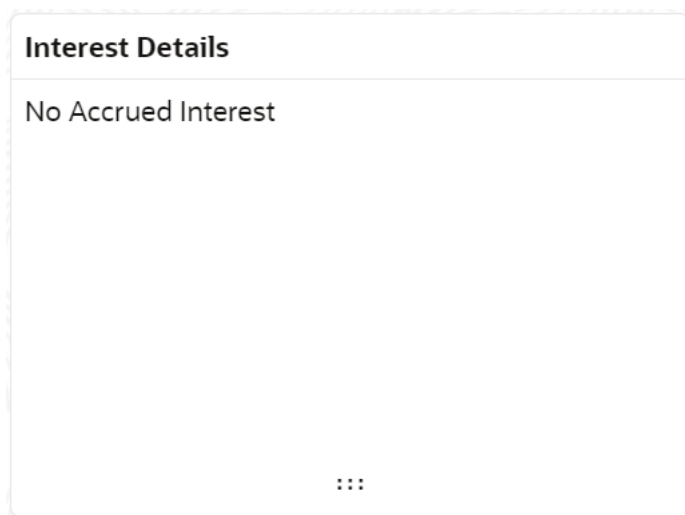

Account Transaction screen is displayed.

 **Note:**

In this view, 15 records are shown at a time and can be configured in Account 360 parameter.

2.5.1.10 Interest Details

This topic describes about Interest Details in the Account 360 screen.

Figure 2-23 Interest Details

2.5.1.11 Frequent Actions

This topic describes the about the Frequent Actions in the Account 360 screen. The Frequent Actions helps the user to perform account servicing related transactions from the account 360 view screen without navigating to the main menu.

The Frequent Actions widget displays the frequently used account servicing transactions.

Figure 2-24 Frequent Actions

 **Note:**

A maximum of 6 transactions are allowed for frequent actions.

Users can configure the frequently used account servicing transactions screens.

When users click on the configured account servicing transactions, the system launches the related transaction screen by defaulting the account number.

 **Note:**

If any widgets fail to fetch the details, the system displays the related error message and the retry option is provided to fetch the details.

2.6 Maintenance

Under the **Maintenance** menu, you can maintain the details of a CASA account.

This topic contains the following subtopics:

- [Account Address Update](#)
This topic describes the systematic instruction about Account Address Update. While entering the account number, the system displays the current address details of the account and the user can modify these details.
- [Joint Holder Maintenance](#)
You can either add joint holders for the first time or modify the existing joint holder relationship using this screen.
- [Beneficiary Details Update](#)
You can modify the existing beneficiary details, add a new beneficiary, and delete the existing beneficiary details added to an account using this screen.
- [Account Preferences](#)
You can set or modify the preferences for the Current Account and Savings Account using this screen.
- [Account Closure](#)
This helps to capture and process the account closure request.
- [Customer Relationship Maintenance](#)
The Customer Relationships can be maintained for accounts where the ownership remains with the Primary Customer of the account, but the account operations could be handled by relationships such as Guardians or Custodians.
- [Bulletin Board Maintenance](#)
This topic helps you to create, view, modify or delete the bulletin messages.
- [Memo Maintenance](#)
This topics helps you to create memos for an account.

2.6.1 Account Address Update

This topic describes the systematic instruction about Account Address Update. While entering the account number, the system displays the current address details of the account and the user can modify these details.

To update the account address:

1. On the **Home** screen, from **Retail Account Services**, under **Maintenance**, click **Account Address Update**, or specify the **Account Address Update** in the Search icon bar.

The **Account Address Update** screen is displayed.

Figure 2-25 Account Address Update

2. Click the **Search** icon or specify the account number in the **Account Number** field, and press **Enter** or **Tab**.

The account address details are displayed in the screen.

Figure 2-26 Account Address Update_Details

3. On the **Account Address Update** screen, specify the fields.
For more information on fields, refer to the field description table.

Table 2-12 Account Address Update - Field Description

Field	Description
Search By	<p>Users can search for an account number by using any of the available search criteria.</p> <p>The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.</p> <p>Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.</p> <p>A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.</p> <p>For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</p> </div>
Address Type	<p>Displays the type of address added such as Residential or Communication.</p> <p>Only the address type which is chosen as the preferred address for communication during account origination is displayed.</p>
Address	Displays the address details corresponding to the address type.
Start Date	<p>Displays the start date when a given communication address becomes effective.</p> <p>This is applicable only for temporary communication addresses. It is not applicable for Residential and Communication address types.</p>
End Date	<p>Displays the date when a given communication address ceases to be effective.</p> <p>This is applicable only for temporary communication addresses. It is not applicable for Residential and Communication address types.</p>
Action	<p>User can edit or delete the added address details.</p> <p>This is applicable only for temporary communication addresses. It is not applicable for Residential address types.</p>

4. Click **Add Communication Address** in the **Address Details** section.

The **Add Communication Address** screen is displayed.

Address Line 2/Street Name	Specify the street name details for communication address.
Address Line 3/City/Town Name	Specify the city or town name details for communication address.
State	Specify the State or click the Search icon and select the state from the list of values displayed.
Country	By default, the country is displayed in this field once you select the State.
Zip Code	Specify the zip code for communication address.
Start Date	Specify the start date for the temporary communication address to become effective.

Table 2-13 (Cont.) Account Address Update - Field Description

Field	Description
End Date	Specify the date for the temporary communication address to cease. Once the end date of the temporary communication address is crossed, the account switches back to the preferred address that was used prior to the temporary address.

- a. Click **Add** to add the address details in the main screen.
 - b. Click **Cancel** to cancel the added details.
5. Click **Submit**.
- The screen is successfully submitted for authorization.

2.6.2 Joint Holder Maintenance

You can either add joint holders for the first time or modify the existing joint holder relationship using this screen.

Note:

The fields marked as **Required** are mandatory.

A customer can be the sole or joint owner of an account. The joint accounts are accounts that are shared between two or more individuals. They can be operated either singly or jointly.

To maintain joint holder details:

1. On the **Home** screen, from the **Retail Account Services** mega menu, under **Maintenance**, click **Joint Holder** or specify **Joint Holder** in the search icon bar and select the screen.

The **Joint Holder Maintenance** screen is displayed.

Figure 2-28 Joint Holder Maintenance

2. Click the **Search** icon or specify the account number in the **Account Number** field, and press **Enter** or **Tab**.

The details are displayed in the screen.

3. Click **Save**.

2.6.4 Account Preferences

You can set or modify the preferences for the Current Account and Savings Account using this screen.

Note:

The fields marked as **Required** are mandatory.

To set the account preferences:

1. On the **Home** screen, from **Retail Account Services**, under **Maintenance**, click **Account Preferences**, or specify the **Account Preferences** in the Search icon bar.
The **Account Preferences** screen is displayed.

Figure 2-38 Account Preferences

The screenshot shows the 'Account Preferences' window. At the top right are buttons for 'Remarks', 'Documents', and window controls. Below is a search bar with 'Search by' and 'Account Number' dropdowns. The 'Account Number' field contains 'Account Number' and has a search icon and a 'Required' label. A large message box in the center reads 'Please enter account number to perform the operation'. At the bottom are buttons for 'Audit', 'Cancel', 'Save and Close', and 'Submit'.

2. On **Account Preferences** screen, click the **Search** icon or specify the account number in the **Account Number** field, and press **Tab** or **Enter**.

The fields to set the preferences for the account are displayed.

Figure 2-39 Set Account Preferences

The screenshot shows the 'Account Preferences' window for account 'R01000000000083' (Automation CASA Account). The search bar is populated with the account number and name. The main content area is divided into several sections:

- Customer Consent and Preferences:** Includes 'E-Sign' and 'Staff Account' toggle switches.
- Check Book Facility:** Includes a 'Check Book Required' toggle switch.
- Preferred Communication Channel:** A table with columns 'Channel Name', 'Details', 'Type', and 'Action'. One entry is shown: 'Address' with details '55 East 10th Street, New York, NY 10003, United States' and type 'Residential'.
- Banking Channel Preference:** Includes an 'Add Channel' button and a table with columns 'Banking Channel', 'Channel Name', and 'Action'. One entry is shown: 'ATM' with channel name 'ATM'.
- Customer Information:** A sidebar on the right containing:
 - Customer Image: Placeholder 'No Customer Image to display'.
 - Customer Id, Name: 000936071, Kalpesh L Sansare (NA).
 - KYC Status: Verified.
 - Signature: A blue ink signature.
 - Account Name: Automation CASA Account ROI.
 - Account Status: Mode Of Operation.
 - Active Actual Balance: \$0.00.
 - Single Account Balance: \$0.00.
 - Phone: 9090909090.
 - Email: noreply@noreply.com.
 - Address Of Communication: 55 East 10th Street, New York, NY 10003, US.

At the bottom are buttons for 'Audit', 'Cancel', 'Save and Close', and 'Submit'.

3. On **Account Preferences** screen, you can set the preferences for the account based on the requirement. For more information on fields, refer to the field description table below.

Table 2-20 Account Preferences - Field Description

Field	Description
Search By	<p>Users can search for an account number by using any of the available search criteria.</p> <p>The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.</p> <p>Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.</p> <p>A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.</p> <p>For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.</p> <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</p> </div>
E-Sign	This option is enabled or disabled based on the consent of the customer during account origination.
Staff Account	This option is enabled or disabled based on the consent of the customer during account origination.
Check Book Required	Switch toggle ON to subscribe for check book facility for the account. Switch Toggle OFF to unsubscribe for check book facility for the account.
Preferred Communication Channel	<p>This section displays the preferred communication address, email ID, and mobile number that the customer has provided during account opening process. They can be updated based on customer request. The user can only select from an already maintained list at the customer level. If a new preferred communication channel has to be added, it must be done at the customer level.</p> <p>Click Edit icon in the Action column, to select and update the preferred communication address, email or mobile number.</p> <p>Click Update and the updated changes are displayed in the main screen.</p>
Banking Channel	The Preferred Banking Channels selected during account origination is defaulted when the account number is entered. The New Banking Channels can be added or the existing ones can be deleted.
Channel Name	Displays the available Banking Channels configured at the Product level.
Action	Click Delete icon to delete the banking channel set for the account.

4. Click **Submit**.

The screen is successfully submitted for authorization.

2.6.5 Account Closure

This helps to capture and process the account closure request.

The account holder may request for closing the account with different reasons. Before closing, the account must not have any active instructions, contracts, overdrafts, or sweep transactions.

**Note:**

The fields marked as **Required** are mandatory.

1. On **Home** screen, from **Retail Account Services**, under **Maintenance**, click **Account Closure**, or specify the **Account Closure** in the Search icon bar.

The **Account Closure** screen is displayed.

5. Click **Submit**.

Figure 2-46 Account Closure - Validation Retry

The system validates the account closure request with other product processors to check for any active contracts or instructions available for the account.

If the account closure validations are successful, then the system will update the account status to **Closure Initiated** and request will be moved to the approval stage and available in free task for authorization.

Transactions are restricted to the account once the account marked for closure is initiated.

If any active contracts, instructions, or other relations are found, the account closure validation is failed, and the account closure request is moved to the validation retry stage and assigned back to the maker. It should be available in the maker's pending task, then the maker can pick up the account closure validation failure and resubmit the request after manually closing or delinking the related contracts, or delete the account closure request based on the account holder request.

In the case of deletion, the system reverts the account status **Closure initiated** to open.

 **Note:**

- If an account has debit balance, then the debit balance to be settled before closing an account.
- The system processes the account closure validations with external product processors. The required external product processors are configured at the workflow level.

6. Approve or Reject the account closure request.

On successful approval, the system initiate the below processes.

- Process the Interest Liquidation
- Account settlement (Transfer to Account/GL)
- Close the Account.

In case of Interest liquidation, or Account Settlement, or close the account process failure, the transaction moved to handoff retry stage and assigned back to the checker, then the checker can acquire the request and **Retry** or **Reject** the account closure request.

On **Retry**, the system process the failed stage again.

On **Reject**, the transaction send back to the initiation stage and assign back to the maker.

 **Note:**

- If the maker resubmit the account closure request, the system trigger the account closure validation across all the product processors again.
- If the maker delete the account closure request after authorizer rejects, the system revert the account status closure initiated to open.

2.6.6 Customer Relationship Maintenance

The Customer Relationships can be maintained for accounts where the ownership remains with the Primary Customer of the account, but the account operations could be handled by relationships such as Guardians or Custodians.

 **Note:**

The fields marked as **Required** are mandatory.

1. On **Home** screen, from **Retail Account Services**, under **Maintenance**, click **Customer Relationship Maintenance**, or specify the **Customer Relationship Maintenance** in the Search icon bar.

The **Customer Relationship Maintenance** screen is displayed.

2. On the **Create Bulletin** screen, specify the fields.
For more information on fields, refer to the field description table.

Table 2-27 Create Bulletin - Field Description

Field	Description
Message Type	<p>Select the message type from the drop-down list. The available options are:</p> <ul style="list-style-type: none"> • Alert - Select this option if the message requires immediate attention from the users. When this option is selected, the Bulletin message is represented with Alert icon on the widget. • Information - Select this option if the bulletin is for information purposes only. When this option is selected, the Bulletin message is represented with Information icon on the widget.

Table 2-27 (Cont.) Create Bulletin - Field Description

Field	Description
Start Date	Select the date from which the bulletin message displays on the widget.  Note: This date cannot be lesser than the current business date.
End Date	Users can specify the expiry date of the bulletin message. Once the bulletin message reaches the expiry date, the message gets removed from the bulletin board widget.
Subject	Enter a brief description of the bulletin message.
Message	Enter a detailed description of the message.
Attachments	You can attach relevant documents using this option. You can either drag and drop files into the space provided or select documents from your local drive. You can preview or delete an attachment before submitting the transaction for authorization.

- To preview an attached document, click the document link.
The **Document Uploaded** pop up window is displayed.

 **Note:**

The document preview is available only to those document types that support the preview feature by default. Where the preview feature is not supported, click on **Download** button to download the attached document before viewing.

- Click the **Close** icon to close the **Document Uploaded** pop up window.
- You can target bulletin messages towards user groups or specific users. Using the **User Role Mapping** table, you can configure User Roles or Users to a particular bulletin.
- Click the **Add** icon to specify User Role or User mapping to the bulletin message.

For more information on fields, refer to the field description table.

Table 2-28 User Role Mapping - Field Description

Field	Description
User/Role	Select User/Role from the drop-down list.
ID	When User is selected, click the search icon to view the User Mapping pop-up window. By default, this window lists all the Users present in the system. You can search for a specific User by providing User, or Username and click Fetch . When Role is selected, click the search icon to view the Role Mapping pop-up window. By default, this window lists all the Roles present in the system. You can search for a specific Role by providing Role, or Role Name and click Fetch .

Table 2-28 (Cont.) User Role Mapping - Field Description

Field	Description
Name	User or Role name is displayed based on the user id or role id selected.
Actions	Displays the Delete icon, to remove the respective user or role.

- After the message is created, the status of the message is updated as **Active** or **Awaited**. System updates the status of the Bulletin message as **Active** if the start date is equal to the current business date.

Note:

If the Start Date is future dated, then the status of Bulletin message is updated as **Awaited** until the date is reached. The system automatically updates the status to **Active** once the start date is reached

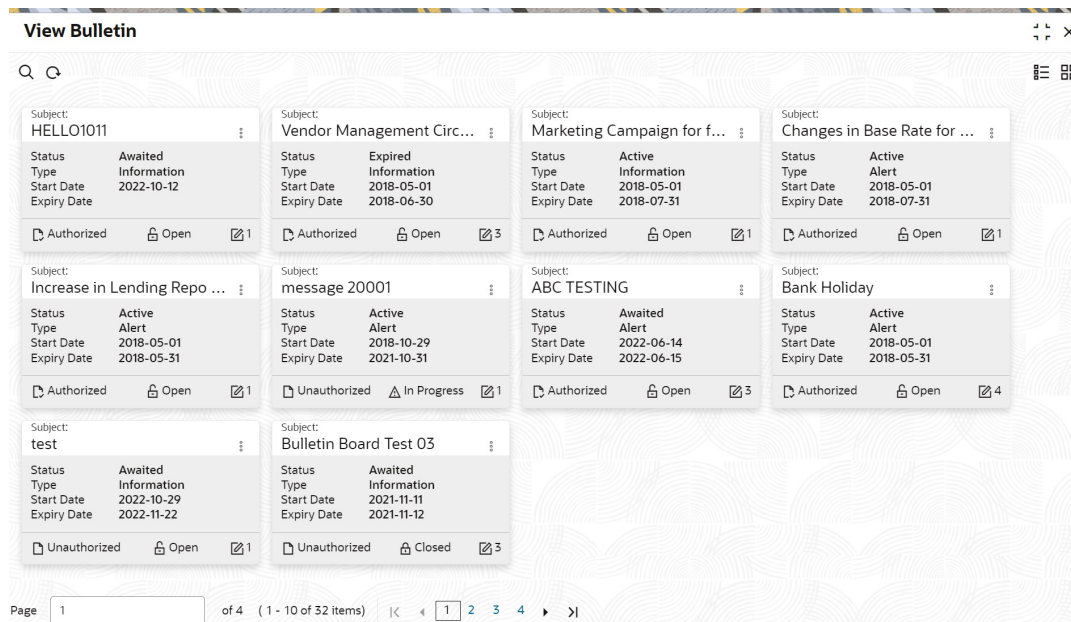

2.6.7.2 View Bulletin

This topic describes the systematic instructions to View or Modify the Bulletin Message.

- On the **Home** screen, from **Interaction Services**, under **Maintenance**, **Bulletin**, click **View Bulletin**, or specify the **View Bulletin** in the Search icon bar.

View Bulletins screen is displayed.

Figure 2-51 View Bulletin

- On **View Bulletin** screen, the system displays all the bulletin messages with status:

2.7 Statement

Under the **Statement** menu, you can perform the required actions related to statement of an account.

This topic contains the following subtopics:

- [Account Statement Frequency](#)
This topic describes the systematic instruction about Account Statement Frequency Update. After specifying the account number, system displays existing account statement cycle details, and the user can modify the frequency.
- [Consolidated Adhoc Statement](#)
This topic describes the systematic instruction to generate a consolidated adhoc statement that covers multiple accounts of a customer. The Adhoc statements are statements that do not fall within the periodic statement generation frequency.
- [Masking of Account Number in Statements](#)
This topic describes the masking of account number in statements.

2.7.1 Account Statement Frequency

This topic describes the systematic instruction about Account Statement Frequency Update. After specifying the account number, system displays existing account statement cycle details, and the user can modify the frequency.

To modify the account statement frequency:

1. On the **Home** screen, from **Retail Account Services**, under **Statement**, click **Account Statement Frequency**, or specify the **Account Statement Frequency** in the Search icon bar.

Account Statement Frequency screen is displayed.

Figure 2-56 Account Statement Frequency

The screenshot displays the 'Account Statement Frequency' interface. At the top, there are 'Remarks' and 'Documents' buttons. Below this is a search section with 'Search by' options: 'Account Number' (selected), 'Account Name', and 'Last Statement Date'. The 'Account Number' field contains 'B01M000000071' and the 'Account Name' field contains 'Michael J Hoffman'. The 'Frequency' dropdown is set to 'Annual' and the 'Last Statement Date' dropdown is set to 'December'. On the right side, there is a 'Customer Information' panel featuring a profile picture of Michael J Hoffman, his Customer ID (000941891), and Customer Name (Michael J Hoffman). Below this, it shows 'KYC Status: Not Verified', a 'Signature' field with a handwritten signature, and account details: 'Account Branch: B01', 'Mode Of Operation: Single', 'Account Status: Active', and 'Account Balance'. At the bottom right, there are fields for 'Address Of Communication' (5000000001, NA, Cantor Film, W.MARKET, S, Florida, 17901, US) and buttons for 'Audit', 'Cancel', 'Save and Close', and 'Submit'.

2. On **Account Statement Frequency** screen, specify the account number. For more information on fields, refer to the field description table.

Table 2-31 Account Statement Frequency - Field Description

Field	Description
Search By	<p>Users can search for an account number by using any of the available search criteria.</p> <p>The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.</p> <p>Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.</p> <p>A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.</p> <p>For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.</p> <div data-bbox="737 850 1469 1136" style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 20px;"> <p> Note:</p> <p>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</p> </div>
Account Name	Account Name is displayed by default based on the account selected.
Last Statement Date	The last statement generation date will be displayed.

Table 2-31 (Cont.) Account Statement Frequency - Field Description

Field	Description
Frequency	<p>Users can modify the frequency for generating the account statements. To specify the frequency of the statements, click on the adjoining drop-down list. The following list is displayed:</p> <ul style="list-style-type: none"> • Annual • Semiannual • Quarterly • Monthly • Fortnightly • Weekly • Daily <p>For the Annual, Semiannual, Quarterly and Daily cycles, the account statement will be generated on the last day of that cycle.</p> <p>For a weekly and fortnightly statement, the user can specify the day of the week on which account statements must be generated. To specify weekly and fortnightly statements, click on the adjoining drop-down list. The following list of days will be displayed:</p> <ul style="list-style-type: none"> • Sunday • Monday • Tuesday • Wednesday • Thursday • Friday • Saturday <p>For monthly statements the user can specify the dates of the month, between 1 and 31(corresponding to the system date).</p> <p>For example:</p> <ul style="list-style-type: none"> • If the user selected the statement date to 30, then account statements will be generated on the last working day for months with < 30 days. • If the user sets the statement date to 31, then account statements will be generated on the last working day for months with <31 days. • If 30th or 31st is a holiday on the next working day the account statement gets generated.

3. Click **Submit**.

2.7.2 Consolidated Adhoc Statement

This topic describes the systematic instruction to generate a consolidated adhoc statement that covers multiple accounts of a customer. The Adhoc statements are statements that do not fall within the periodic statement generation frequency.

Note:

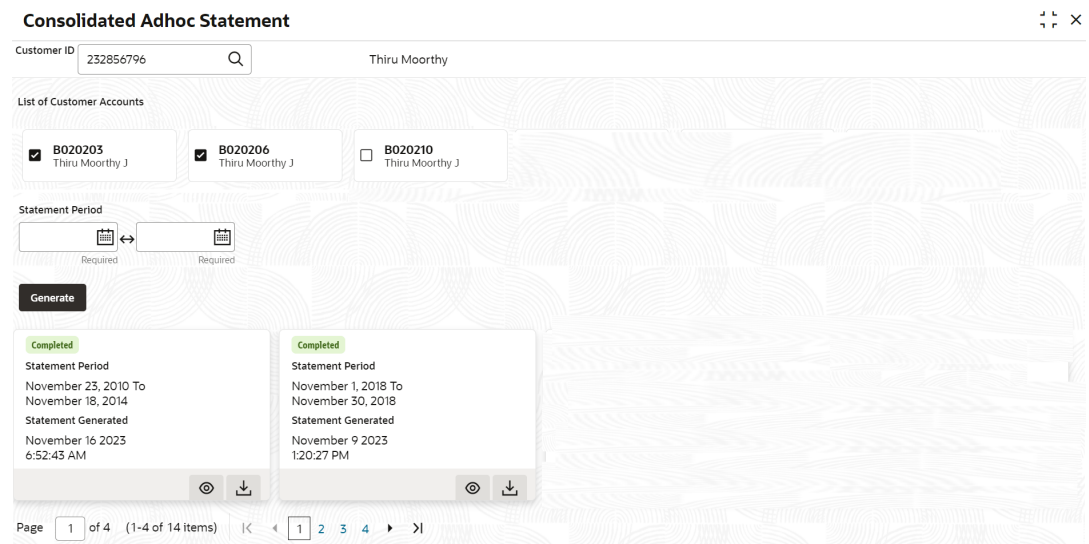

The fields marked as **Required** are mandatory.

To generate a consolidated adhoc statement:

1. On **Home** screen, from **Retail Account Services**, under **Statement**, click **Consolidated Adhoc Statement**, or specify the **Consolidated Adhoc Statement** in the Search icon bar.

The **Consolidated Adhoc Statements** screen is displayed.

Figure 2-57 Consolidated Adhoc Statement

2. On **Consolidated Adhoc Statement** screen, specify the fields. For more information on fields, refer to the field description table below.

Table 2-32 Consolidated Adhoc Statement - Field Description

Field	Description
Customer ID	<p>Enter the Customer ID or click the search icon to view the Customer ID pop-up window. By default, this window lists all the Customer Numbers present in the system. You can search for a specific Customer ID by providing Customer ID, or Customer Name and clicking on the Fetch button.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>The Customer Name is displayed adjacent to this field as the customer ID ID is selected.</p> </div>
List of Customer Accounts	<p>Select the account(s) from the list to generate the statement. The type of accounts that are displayed as follow:</p> <ul style="list-style-type: none"> Accounts that are open and authorised. Accounts where customer is the primary account holder. Joint accounts where the customer is a joint holder. <p>The Account Name is displayed under each account number.</p>

Table 2-32 (Cont.) Consolidated Adhoc Statement - Field Description

Field	Description
Statement Period	<p>Click the calendar and specify the from date and to date to generate the statements.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The start date cannot be future dated and the end date cannot be lesser than start date.</p> </div>

3. On **Consolidated Adhoc Statement** screen, click **Generate Statement** button to generate the account statement for the selected accounts and period.

The multiple ad hoc statements can be generated on the same day. All the generated statements are displayed as tiles with date and time stamps.

Once the date moves to the next working day, all statements generated the previous day is cleared.

4. Click the **View** icon to view, or click **Download** icon to print the generated account statement.

2.7.3 Masking of Account Number in Statements

This topic describes the masking of account number in statements.

In the United States, the requirement is to mask (hide) a portion of the account number in the statements being generated.

A bank-level configuration in Oracle Banking Retail Accounts allows the user to define if masking of account numbers is required on the statement and if yes, then the system allows the user to mask a set of characters as required in the account number when the same is displayed on the generated statement. For Example: If the account number is 10 characters and the number of characters to mask is 6 - then the account number is displayed as xxxxxx8376 in the statements.

Note:

The masking of the account number is always from left to right for United States market.

Note:

For more information about the configurations, refer to the section *Bank Parameters* in the *Account Configurations User Guide*.

2.8 Status Update

Under the **Status Update** menu, you can update the status of an account.

This topic contains the following subtopics:

- [Activate Inactive/Dormant Account](#)
You can update the status of an account from Active to Inactive or Dormant, Inactive to Active, Dormant to Inactive using the **Activate Inactive/Dormant Account** screen.
- [Inactive and Dormancy Processing in Oracle Banking Retail Accounts](#)
This topic describes the processing of inactive and dormancy in Oracle Banking Retail Accounts.
- [Account Status Change](#)
This topic describes the systematic instructions about account status change. The bank can update the status of an account to No Debit, No Credit, and Frozen.

2.8.1 Activate Inactive/Dormant Account

You can update the status of an account from Active to Inactive or Dormant, Inactive to Active, Dormant to Inactive using the **Activate Inactive/Dormant Account** screen.

Note:

The fields marked as **Required** are mandatory.

Based on the configurations in Oracle Banking Retail Accounts for the inactive days, an account will move from Active status to Inactive and Dormant status automatically.

To update an account status:

1. On the **Home** screen, from **Retail Account Services**, under **Status Update**, click **Activate Inactive/Dormant Account**, or specify the **Activate Inactive/Dormant Account** in the Search icon bar.

The **Activate Inactive/Dormant Account** screen is displayed.

Figure 2-58 Activate Inactive/Dormant Account

The screenshot shows the 'Activate Inactive/Dormant Account' interface. At the top, there are 'Remarks' and 'Documents' buttons. Below that, a search bar is visible with 'Search by' and 'Account Number' labels. The 'Account Number' field is highlighted as 'Required' and contains a search icon. A message below the search bar reads 'Please enter account number to perform the operation'. At the bottom of the screen, there are buttons for 'Audit', 'Cancel', 'Save and Close', and 'Submit'.

2. On the **Activate Inactive/Dormant Account** screen, click the **Search** icon or specify the account number in the **Account Number** field, and press **Tab** or **Enter**.

The account status details are displayed.

4. Click **Submit**.

The screen is successfully submitted for authorization.

2.8.2 Inactive and Dormancy Processing in Oracle Banking Retail Accounts

This topic describes the processing of inactive and dormancy in Oracle Banking Retail Accounts.

In the United States, the inactive and dormancy parameters like Inactive/ dormancy days, and first and second notice prior days vary by State.

Inactive and Dormancy marking is automatic and is based on the inactive and dormancy days configured for the customer's residential address state.

State group parameter configuration by currency for Inactive, Dormancy, and Escheatment processing and mapping of the state group parameter code to the respective business product is done as part of Oracle Banking Retail Accounts configurations. The dormancy batch in Oracle Banking Retail Accounts will determine the inactive, and dormancy processing based on this state-wise configuration.

 **Note:**

For more information about the configurations, refer to the sections *State Group Parameters* and *State Code Mapping* in the *Account Configurations User Guide*.

2.8.3 Account Status Change

This topic describes the systematic instructions about account status change. The bank can update the status of an account to No Debit, No Credit, and Frozen.

To change account status:

1. On the **Home** screen, from **Retail Account Services**, under **Status Update**, click **Account Status Change**, or specify the **Account Status Change** in the Search icon bar. **Account Status Change** screen is displayed.

Account Status	The existing account statuses will be displayed, and users can modify them (No Debit, No Credit, and Frozen) by enabling or disabling the toggle button.

2.9 Limits

Under the **Limits** menu, you can perform actions related to limits for an account.

This topic contains the following subtopics:

- [Courtesy Pay Maintenance](#)
You can activate or deactivate ATM/POS transaction and check processing transaction types to allow usage of courtesy pay feature on an eligible account using the **Courtesy Pay Maintenance** screen. Also, you capture an end date that signifies the end of courtesy pay privilege on the account.
- [Courtesy Pay Processing in Oracle Banking Retail Accounts](#)
This topic describes the processing of courtesy pay in Oracle Banking Retail Accounts.

2.9.1 Courtesy Pay Maintenance

You can activate or deactivate ATM/POS transaction and check processing transaction types to allow usage of courtesy pay feature on an eligible account using the **Courtesy Pay**

Maintenance screen. Also, you capture an end date that signifies the end of courtesy pay privilege on the account.

 **Note:**

The fields marked as **Required** are mandatory.

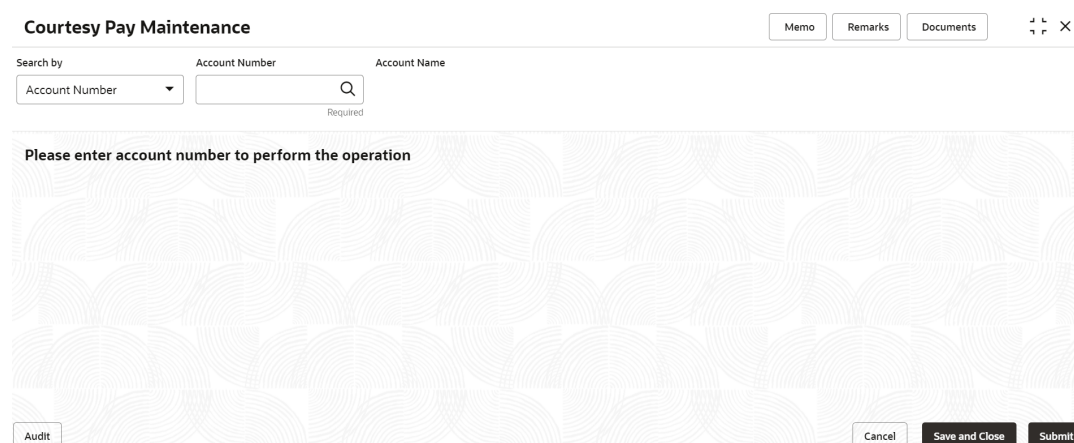

Courtesy Pay is a feature that the account holder can use while a debit transaction is being processed on the account, provided the functionality is enabled on the account.

To maintain the courtesy pay:

1. On the **Home** screen, from **Retail Account Services**, under **Limits**, click **Courtesy Pay Maintenance**, or specify the **Courtesy Pay Maintenance** in the Search icon bar.

The **Courtesy Pay Maintenance** screen is displayed.

Figure 2-61 Courtesy Pay Maintenance

2. On the **Courtesy Pay Maintenance** screen, click the **Search** icon or specify the account number in the **Account Number** field, and press **Tab** or **Enter**.

The details are displayed in the **Courtesy Pay Information** section.

4. Click **Submit**.

The screen is successfully submitted for authorization.

2.9.2 Courtesy Pay Processing in Oracle Banking Retail Accounts

This topic describes the processing of courtesy pay in Oracle Banking Retail Accounts.

Customers shall have the privilege of getting honored a transaction, even though there is no sufficient balance in the account when opting for Courtesy Pay and should repay the overdrawn amount within a given time window. No other limits will apply to the account if courtesy pay is enabled for the account. On utilizing Courtesy Pay, courtesy pay utilization fees will be charged to the account.

The system has been enhanced to configure the courtesy pay limit, charge code, and charge fee account at the business product definition level. Also, the courtesy pay opt-in/ opt-out for transactions with source as ATM, POS, or check clearing is supported as part of account servicing. Based on this opt-in/ opt-out definition, the Courtesy Pay limit utilization for the source transactions is determined.

 **Note:**

- Courtesy Pay fees are charged as part of the End of the Day process.
- The Product processor code should be OBRACC for Courtesy Pay charge code creation.

 **Note:**

For more information about the configurations, refer to the section *Business Product* in this User Guide.

2.10 Amount Block

Under the **Amount Block** menu, you can perform the amount block related actions for an account.

This topic contains the following subtopics:

- [Account Garnishment](#)
You can apply garnishment (amount block) order received against a customer or for a specified account, after calculating the protected amount using the **Account Garnishment** screen.
- [Account Garnishment Processing in Oracle Banking Retail Accounts](#)
This topic describes the processing of account garnishment in Oracle Banking Retail Accounts.

2.10.1 Account Garnishment

You can apply garnishment (amount block) order received against a customer or for a specified account, after calculating the protected amount using the **Account Garnishment** screen.

 **Note:**

The fields marked as **Required** are mandatory.

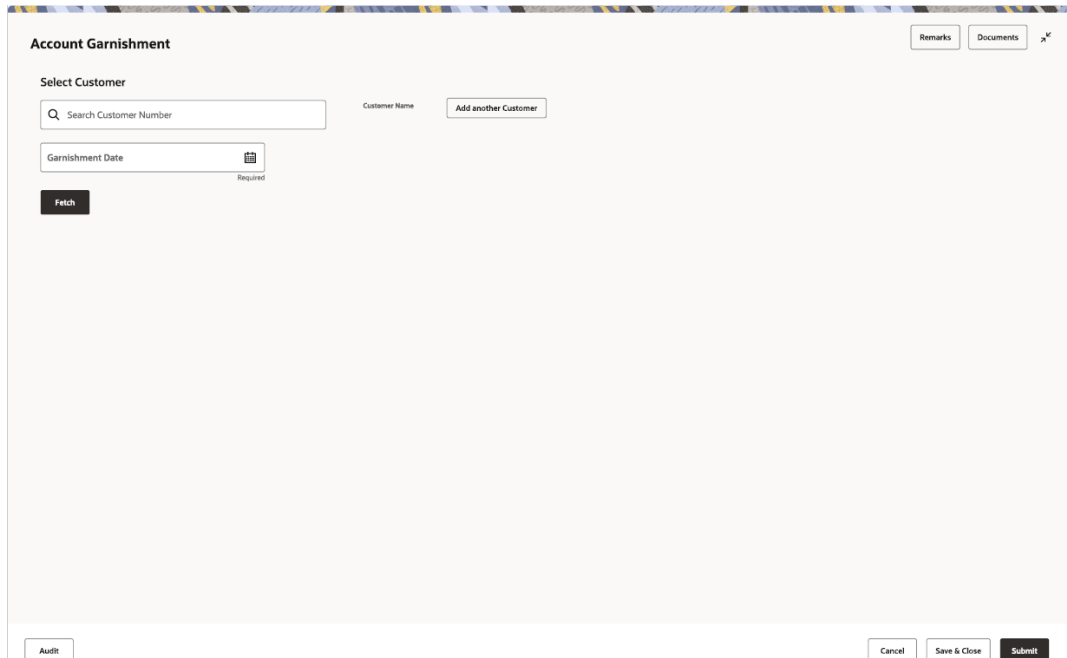

A garnishment order is received from the Federal Government for a customer and at the discretion of the Operations Officer, garnishment related holds are placed on a specific account or multiple accounts of the customer. Post garnishment set up on the account, the customer can withdraw only the protected amount (eligible credits calculated in look back period) and the credits received after the garnishment start date plus the balance over and above the blocked balance.

To apply garnishment:

1. On the **Home** screen, from **Retail Account Services**, under **Amount Block**, click **Account Garnishment**, or specify the **Account Garnishment** in the Search icon bar.

The **Account Garnishment** screen is displayed.

Figure 2-63 Account Garnishment

2. On the **Account Garnishment** screen, click the **Search** icon or specify the account number in the **Customer ID** field, and press **Tab** or **Enter**.
3. Select the date from the **Garnishment Date** field.

 **Note:**

You can add multiple customers to view the garnishment details by clicking **Add another Customer**.

4. Click **Fetch**.

The existing customer's garnishment details are displayed.

Figure 2-64 Account and Garnishment Information

The screenshot shows the 'Account Garnishment' interface. At the top, there's a 'Select Customer' section with a search box containing '000262', a 'Customer Name' field showing 'Marie-Léontine Lefebvre', and a 'Select More Customer' button. Below this is a 'Garnishment Date' field with '01/06/2020' and a 'Fetch' button. The 'Account Information' section shows '0 selected' and an 'Add Garnishment' button. It contains a table with columns: Account Number, Details, Available Balance, Existing Holds, Protected Amount, and Available for Garnishment. The 'Garnishment Information' section contains a table with columns: Garnishment Number, Details, Account Number, Garnishment Amount, Booking Date, Effective Date, End Date, and Action.

- b. Specify or select the required garnishment details. For more information on fields, refer to the field description table.

Table 2-37 Add Garnishment - Field Description

Field	Description
Garnishment Issued For	Select for whom the garnishment is issued.
Garnishment Amount	Specify the garnishment amount.
Garnished Amount	Displays the total garnished amount.
Shortfall	Displays the total shortfall amount.
Garnished Number	Displays the unique garnished number generated.
Details	Displays the Details icon to view more account details.
Account Number	Displays the account number.
Available for Garnishment	Displays the amount available for garnishment.
Garnishment Amount	Specify the garnishment amount.
Booking Date	Displays the garnishment booking date.

Table 2-37 (Cont.) Add Garnishment - Field Description

Field	Description
Effective Date	Displays the effective date of the garnishment.
End Date	Select or specify the end date of the garnishment.
Action	Displays the following actions: <ul style="list-style-type: none"> • Save: Click to save the details specified. • Edit: Click to edit the details. • Close: Click to remove the entry.

- c. Click **Save**.

 **Note:**

Once the details are saved, a **New Garnishment** section is displayed above the **Existing Garnishment** section in the screen.

6. Click **Submit**.

The screen is successfully submitted for authorization.

2.10.2 Account Garnishment Processing in Oracle Banking Retail Accounts

This topic describes the processing of account garnishment in Oracle Banking Retail Accounts.

A Garnishment Order is a Court Order or Statutory/regulatory authority order instructing a garnishee (i.e., to a bank) to hold funds in a customer account and should not be released until directed by the court. The order may instruct the bank to hold/block a particular amount or all the available funds in the customer account(s). A garnishment block fee will be charged to the account on placing a block for the garnishment amount.

Garnishment screen at account servicing level will allow for the branch user to select the customer accounts(s) on which garnishment block needs to be placed. System has been enhanced to do the protected amount calculation based on the look-back period configured in the garnishment parameters configuration screen.

 **Note:**

- The Garnishment fee will be applied to the account upon completion of placing a block or hold for the required amount. If there is no sufficient balance to fulfill the charge amount, subsequent actions of retrying the fee collection have to be operationally dealt with by the bank.
- Removal of garnishment block to transfer the amount as per the court order is to be operationally handled.
- The Product processor code should be OBRACC for Garnishment charge code creation.

**Note:**

For more information about the configurations, refer to the section *Garnishment Parameters* in this User Guide.

2.11 Cheque Book

Under the **Cheque Book** menu, you can perform the check book related actions for an account.

This topic contains the following subtopics:

- [Check Book Order](#)
You can capture check book request made by a customer using the **Check Book Order** screen.
- [Check Book Status](#)
This topic describes the systematic instructions about the Check Book Status.
- [Stop Check Request](#)
You can request the bank to stop payment on a check using the **Stop Check Request** screen. A stop check requests can either be for a single check, range of checks, or for a specific amount.
- [Stop Check Request Processing in Oracle Banking Retail Accounts](#)
This topic describes the processing of stop check request in Oracle Banking Retail Accounts.
- [View and Modify Stop Check Payment](#)
You can modify or delete an existing stopped payment check, based on the customer request.
- [External Check Book Processing in Oracle Banking Retail Accounts](#)
This topic describes the processing of external check book in Oracle Banking Retail Accounts.

2.11.1 Check Book Order

You can capture check book request made by a customer using the **Check Book Order** screen.

**Note:**

The fields marked as **Required** are mandatory.

To order check book:

1. On the **Home** screen, from **Retail Account Services**, under **Check Book**, click **Check Book Order**, or specify the **Check Book Order** in the Search icon bar.

The **Check Book Order** screen is displayed.

Figure 2-66 Check Book Order

2. On the **Check Book Order** screen, click the **Search** icon or specify the account number in the **Account Number** field, and press **Tab** or **Enter**.
The account status details are displayed.

Figure 2-67 Check Book Order Details

3. On the **Check Book Order** screen, specify the required details for ordering the check book. For more information on fields, refer to the field description table.

Table 2-38 Check Book Order - Field Description

Field	Description
Search By	<p>Users can search for an account number by using any of the available search criteria.</p> <p>The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.</p> <p>Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.</p> <p>A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.</p> <p>For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.</p> <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</p> </div>
Check Details	This section displays the fields to capture the check details.
Quantity	Specify the number of leaves required in per check book.
Starting Check Number	Specify the starting check number for the check book that is being ordered.
Account Name on Check Book	<p>Specify the account name to be printed on the check book.</p> <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>By default, the account name is displayed in this field. You can edit the name, if required.</p> </div>
Phone Number	<p>Specify the account holder's phone number.</p> <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>By default, the account holder's phone number is displayed in this field. You can edit the number, if required.</p> </div>

Table 2-38 (Cont.) Check Book Order - Field Description

Field	Description
Address on Check Book	<p>Select the address which will be printed on the check book. By default, the preferred communication address of the account will be defaulted. If the account has a temporary communication address, with the branch date falling between the start date and the end date, then this address will be displayed as the address on the check book. User can optionally select the preferred communication address as well.</p> <p>If None is selected, address will not be printed on the check book.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>By default, the Communication Address is selected and the address is displayed in the adjacent field.</p> </div>
Address for Check Book Delivery	<p>Select the address for check book delivery. The options are:</p> <ul style="list-style-type: none"> • Communication Address • Custom Address <p>By default, the preferred communication address of the account will be defaulted. If the account has a temporary communication address, with the branch date falling between the start date and the end date, then this address will be displayed as the address on the check book. User can optionally select the preferred communication address as well.</p> <p>You can select Custom Address, to provide the different address details for check book delivery.</p>
Address Line 1/Building Name	<p>Specify the address in line 1 or building name for check book delivery.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>This field displays, if you select the Custom Address drop-down in the Address for Check Book Delivery field.</p> </div>
Address Line 2/Street Name	<p>Specify the address in line 2 or street name for check book delivery.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>This field displays, if you select the Custom Address drop-down in the Address for Check Book Delivery field.</p> </div>

Table 2-38 (Cont.) Check Book Order - Field Description

Field	Description
Address Line 3/City/Town Name	Specify the address in line 3 or city for check book delivery.  Note: This field displays, if you select the Custom Address drop-down in the Address for Check Book Delivery field.
State	Specify the state or select it from LOV for check book delivery.  Note: This field displays, if you select the Custom Address drop-down in the Address for Check Book Delivery field.
Country	Based on the state selected, the country name is displayed.
Zip Code	Specify the Zip code for check book delivery address in line 3 or city.  Note: This field displays, if you select the Custom Address drop-down in the Address for Check Book Delivery field.

4. Click **Submit**.

The screen is successfully submitted for authorization.

2.11.2 Check Book Status

This topic describes the systematic instructions about the Check Book Status.

The Check Book Status screen helps the user to inquire about the delivery status of the check book that the customer has requested for and be able to update its status to Delivered once it is delivered to the customer.

To view the check book status:

1. On the **Home** screen, from **Retail Account Services**, under **Check Book**, click **Check Book Status**, or specify the **Check Book Status** in the Search icon bar.

Check Book Status screen is displayed.

Figure 2-68 Check Book Status

2. On **Check Book Status** specify the fields. For more information on fields, refer to the field description table.

Table 2-39 Check Book Status - Field Description

Field	Description
Search By	<p>Users can search for an account number by using any of the available search criteria.</p> <p>The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.</p> <p>Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.</p> <p>A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.</p> <p>For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.</p> <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</p> </div>
Account Name	Account Name is displayed based on the account selected.
First Check Number	By default, the system displays the most recent check book request that the customer has made.

Table 2-39 (Cont.) Check Book Status - Field Description

Field	Description
Status	<p>The system displays the following status of the check book request.</p> <ul style="list-style-type: none"> • Requested • Delivered • Destroyed <p>Delivery Awaited or Destruction Awaited is updated as interim status when the transaction is pending approval for delivery or destruction.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>When the check book is updated as Destroyed, the delivery date is updated to the current business date and highlighted in red.</p> </div>
Requested Date	The system displays the date on which the customer requested the check book.
Delivery Date	The system displays the date on which the check book is delivered to the customer. Automatically the current business date is updated when the status of the check book is changed to Delivered . The delivery date is blank for check books where the status is Requested .
Actions	Click the Actions icon to update the check book status from updated to: <ul style="list-style-type: none"> • Deliver • Destory

3. On click of the **Deliver** option, the status is updated as **Delivery Pending**. Upon authorization the status is updated as **Delivered**.
4. On click of the **Destory** option, the status is updated as **Destruction Pending**. Upon authorization the status is updated as **Destroyed**.
5. Click **Submit**.

The screen is successfully submitted for authorization.

2.11.3 Stop Check Request

You can request the bank to stop payment on a check using the **Stop Check Request** screen. A stop check requests can either be for a single check, range of checks, or for a specific amount.

 **Note:**

The fields marked as **Required** are mandatory.

To stop check payment:

1. On the **Home** screen, from **Retail Account Services**, under **Check Book**, click **Stop Check Request**, or specify the **Stop Check Request** in the Search icon bar.

The **Stop Check Request** screen is displayed.

Figure 2-69 Stop Check Request

2. On the **Stop Check Request** screen, click the **Search** icon or specify the account number in the **Account Number** field, and press **Tab** or **Enter**.
The account name and customer information details are displayed.
3. You can stop the check request by selecting any of the following options:
 - **Single Check**
 - a. Select the **Single Check** option.

Figure 2-70 Stop Check Request - Single Check tab

- b. Specify and select the required details to stop check request. For more information on fields, refer to the field description table.

4. Click **Submit**.

The screen is successfully submitted for authorization.

2.11.4 Stop Check Request Processing in Oracle Banking Retail Accounts

This topic describes the processing of stop check request in Oracle Banking Retail Accounts.

In the United States, customers can request a stop payment of a check either orally or in written.

A branch-level configuration in Oracle Banking Retail Accounts allows users to define the stop-payment auto revoke days for both oral and written stop-payment requests. The branch service will return these values for the account servicing application to auto-calculate the stop-check expiry date based on the request type. This expiry date cannot be modified, and the account servicing application will proceed to initiate the stop-payment request on the check. On the expiry date - the stop check process will automatically revoke the stop-payment request placed on the check.

 **Note:**

For more information about the configurations, refer to the section *Branch Parameters* in the *Account Configurations User Guide*.

2.11.5 View and Modify Stop Check Payment

You can modify or delete an existing stopped payment check, based on the customer request.

 **Note:**

The fields marked as **Required** are mandatory.

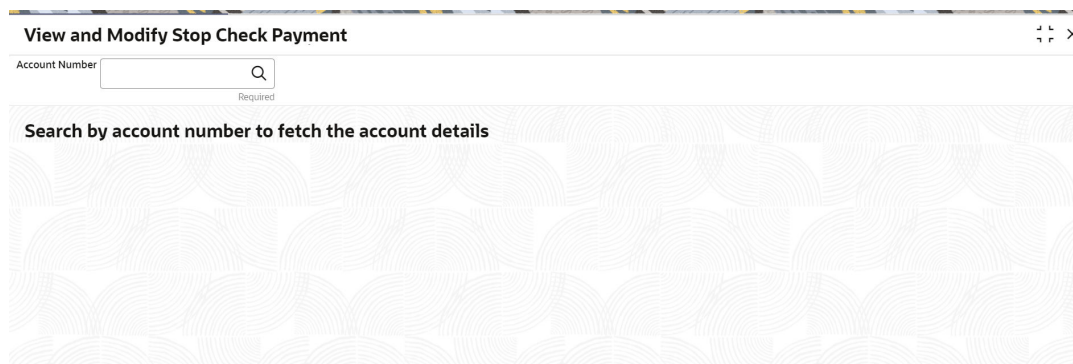

When a stop payment instruction on a check or a series of checks is deleted, it is available for use. In future, when a check based transaction is initiated by the customer using any of these check numbers, payments are honored by the bank.

To manage the stop check payment details:

1. On the **Home** screen, from **Account Services**, under **Check Book**, click **View and Modify Stop Check Payment**, or specify the **View and Modify Stop Check Payment** in the Search icon bar.

The **View and Modify Stop Check Payment** screen is displayed.

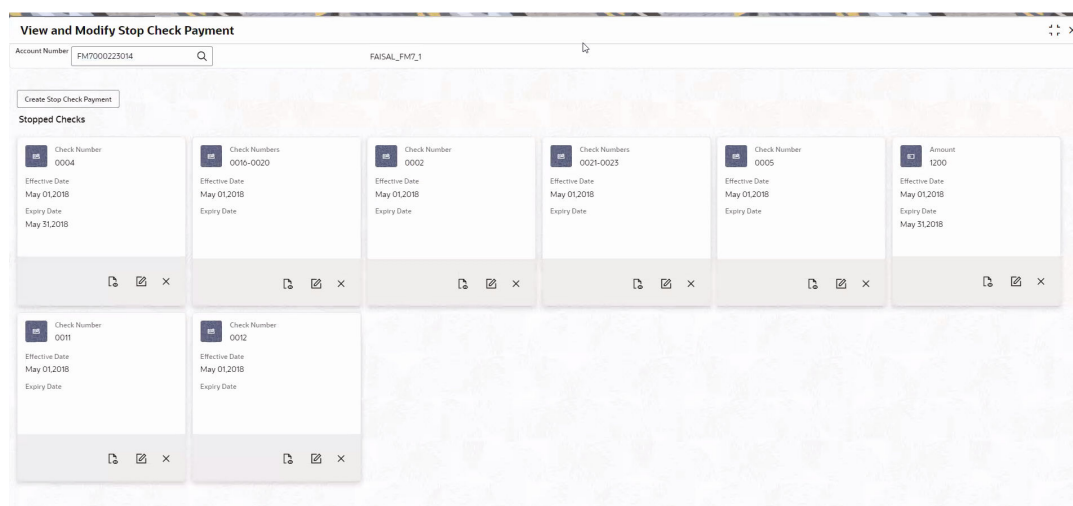

Figure 2-73 View and Modify Stop Check Payment

2. On the **View and Modify Stop Check Payment** screen, click the **Search** icon or specify the account number in the **Account Number** field, and press **Tab** or **Enter**.

The details are displayed in the **Stopped Checks** section.

Figure 2-74 Stopped Checks

Note:

If there are no stop payment records available for a given account number, the system displays a message that there are no stopped payments for the account.

3. On the **View and Modify Stop Check Payment** screen, you can view a summary of the stopped checks for the account. For more information on fields, refer to the field description table.

Table 2-43 View and Modify Stop Check Payment - Field Description

Field	Description
Account Number	<p>Specify the Account Number or click the search icon to view the Account Number pop-up window. By default, this window lists all the Account Numbers present in the system. You can search for a specific Account Number by providing Customer ID, Account Number, or Account Name and click on the Fetch button.</p> <p> Note:</p> <p>As you specify or select the account number:</p> <ul style="list-style-type: none"> The account name is displayed adjacent to the Account Number field.
Stopped Checks	<p>This section lists all the checks for which the payments are stopped.</p>
Amount, Check Numbers, or Check Number	<p>Displays the type of stop check payment created for the account.</p> <p> Note:</p> <p>While creating the stop check payment:</p> <ul style="list-style-type: none"> If you select the Amount option, then Amount is displayed in the widget. If you select the Range of Checks option, then Check Numbers is displayed in the widget. If you select the Single Check option, then Check Number is displayed in the widget. <p>For more information on creating stop check payment, refer Stop Check Payment screen.</p>
Effective Date	<p>Displays the effective date from when the stop check payment is active.</p>
Expiry Date	<p>Displays the end date till when the stop check payment should be active.</p>

4. On the **View and Modify Stop Check Payment** screen, you can perform any of the following actions:
- Create Stop Check Payment:** The Stop Check Payment screen is displayed. You can perform the required action in this screen. For more information, refer the [Stop Check Request](#) screen.
 - View Stop Check Payment Details:** The Stop Check Payment screen is displayed. For more information, refer [View Stop Check Payment](#).
 - Modify Stop Check Payment:** The Stop Check Payment screen is displayed. For more information, refer [Modify Stop Check Payment](#).
 - Close Stop Check Payment:** The Stop Check Payment screen is displayed. For more information, refer [Close Stop Check Payment](#).

 **Note:**

While performing a reversal of stop check payment, you are allowed to select only one action, that is View, Edit, or Close.

- [View Stop Check Payment](#)
You can view the detailed information of the stop check payment in this screen.
- [Modify Stop Check Payment](#)
You can modify the required information of the stop check payment in this screen.
- [Close Stop Check Payment](#)
You can close or delete a stop payment request placed on a check, series of checks, or stop payments based on amounts before the expiry date of the instruction using this screen.

2.11.5.1 View Stop Check Payment

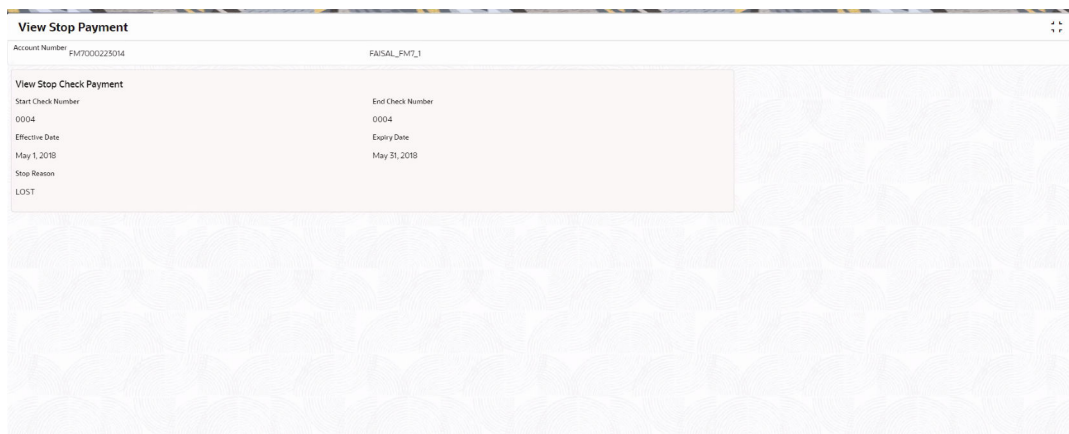

You can view the detailed information of the stop check payment in this screen.

To view the stop check payment details:

1. From the **View and Modify Stop Check Payment** screen, click the **View** icon from the required widget, in the **Stopped Checks** section.

The **Stop Check Payment** screen is displayed.

Figure 2-75 View Stop Check Payment

The screenshot displays the 'View Stop Payment' screen. At the top, it shows 'Account Number' as FM7000229014 and 'FAISAL_FMYT_1'. Below this, there is a section titled 'View Stop Check Payment' with the following details:

Start Check Number	End Check Number
0004	0004
Effective Date	Expiry Date
May 1, 2018	May 31, 2018
Stop Reason	
LOST	

2. You can view the details in the **View Stop Check Payment** section. For more information on fields, refer to the field description table.

Table 2-44 View Stop Check Payment - Field Description

Field	Description
Amount	Displays the check amount for stop check payment.  Note: This field is displayed if the stop cheque payment is of Amount type.

3. Click **Submit**.

The **View and Modify Stop Check Payment** screen is displayed.

2.11.6 External Check Book Processing in Oracle Banking Retail Accounts

This topic describes the processing of external check book in Oracle Banking Retail Accounts.

In the United States, the checkbook request is done by the customers mostly from third-party service providers and there is no bank involvement in requesting a check book. Therefore, any validations with respect to check numbers will not be applicable for the United States (except stop check validation).

A bank level configuration allows the user to define **External Checkbook Request** option in case of United States, where the checkbook request is placed directly with the third party.

If the bank in United States, allows the customer to also place the order with the bank, then the bank will hold the check book request related data for the third-party service provider to access for processing the request.

In United States, there will be no validations with respect to check status based on check numbers when a check is presented for clearing. The only exception to this being validation of stop check - which will be based on check number irrespective of the above selections.

Note:

For more information about the configurations, refer to the section *Bank Parameters* in the *Account Configurations User Guide*.

2.12 Inquiry

Under the **Inquiry** menu, you can perform inquire the details of a CASA account.

This topic contains the following subtopics:

- [Account Transactions](#)
 This topic provides the systematic instructions for the users to view, and download all the transactions posted to the current account and saving accounts for a particular date range or last n transactions.

- [Regulation-D Transaction Inquiry](#)
This topic provides the systematic instructions for the users to view the Regulation D transactions on the account. By default, the screen displays transactions for the previous 12 months.
- [Account Closure Inquiry](#)

2.12.1 Account Transactions

This topic provides the systematic instructions for the users to view, and download all the transactions posted to the current account and saving accounts for a particular date range or last n transactions.

To view account transaction details:

1. On the **Home** screen, from **Retail Account Services**, under **Inquiry**, click **Account Transactions**, or specify the **Account Transaction Inquiry** in the Search icon bar.

Account Transactions screen is displayed.

Figure 2-78 Account Transactions

The screenshot shows the 'Account Transactions' interface. At the top, there are search fields for 'Account Number' (BO1M000000071) and 'Account Name' (PHIL FRANZ). Below these are search filters for 'Transaction Type' (Debits & Credits) and 'Last Number of Transactions' (15). A 'Search' button is present. Under 'Transaction Details', there is a 'Type to filter' input field. The results section shows '1 Results' and a table with columns: Transaction Date, Reference Number, Transaction Description, Instrument Number, Value Date, Debit Amount, and Credit Amount. The table contains one row: March 30, 2018, 000ZXRD1808902BG, Account Transfer, March 30, 2018, 1,000,000,000.00. A pagination bar at the bottom indicates 'Page 1 of 1 (1 of 1 items)'.

Transaction Date	Reference Number	Transaction Description	Instrument Number	Value Date	Debit Amount	Credit Amount
March 30, 2018	000ZXRD1808902BG	Account Transfer		March 30, 2018		1,000,000,000.00

2. On **Account Transactions** screen, specify the fields.
For more information on fields, refer to the field description table below.

Table 2-47 Account Transactions - Field Description

Field	Description
Search By	<p>Users can search for an account number by using any of the available search criteria.</p> <p>The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.</p> <p>Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.</p> <p>A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.</p> <p>For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</p> </div>
Search Transactions	This section displays the fields to perform the search.
Transaction Type	<p>Select the type of transactions to be searched. The options are:</p> <ul style="list-style-type: none"> • Debits & Credits • Debits • Credits <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>Transaction type is always Debits & Credits if you select the Search Type as the Last Number of Transactions.</p> </div>
Search Type	<p>Select the search type for the transaction. The options are:</p> <ul style="list-style-type: none"> • Data Range • Current Month • Current Month Plus Previous Month • Current Month Plus Previous 3 Month • Current Month Plus Previous 6 Month • Last Number of Transactions

Table 2-47 (Cont.) Account Transactions - Field Description

Field	Description
Date Range	Select or specify the from and to date for fetching the transaction details.  Note: This field is displayed if you select Date Range from the Search Type field.
Last Number of Transactions	Select or specify the last number of the transaction to be fetched.  Note: This field is displayed if you select Last Number of Transactions from the Search Type field.
Transactional Details	This section displays the transaction details for the account selected.  Note: You can click the Column Filter icon to view only the selected transaction details.
Filter	Specify a value to filter the details as required.
Transaction Date	Displays the date of the transaction.
Reference Number	Displays the transaction's reference number.
Transaction Description	Displays the description for the transaction.
Instrument Number	Displays the instrument number used for the transaction.
Value Date	Displays the value date of the transaction.
Debit Amount	Displays the transaction's debit amount.
Credit Amount	Displays the transaction's credit amount.

2.12.2 Regulation-D Transaction Inquiry

This topic provides the systematic instructions for the users to view the Regulation D transactions on the account. By default, the screen displays transactions for the previous 12 months.

Note:

The fields marked as **Required** are mandatory.

1. On **Home** screen, from **Retail Account Services**, under **Inquiry**, click **Regulation-D Transaction Inquiry**, or specify the **Regulation-D Transaction Inquiry** in the Search icon bar.

The **Regulation-D Transaction Inquiry** screen is displayed.

Figure 2-79 Regulation-D Transaction Inquiry

The screenshot shows the 'Regulation-D Transaction Inquiry' screen. At the top, there is a search bar with three sections: 'Search by' (a dropdown menu set to 'Account Number'), 'Account Number' (a text input field), and 'Account Name' (a text input field). Below the search bar, a message reads: 'Please enter account number to perform the operation'. The background of the screen features a repeating pattern of stylized circular lines.

Figure 2-80 Regulation-D Transaction Inquiry with Last 12 Month Rolling Period Checked

The screenshot shows the 'Regulation-D Transaction Inquiry' screen with search criteria filled in. The 'Search by' dropdown is set to 'Account Number', the 'Account Number' field contains 'B01M000000071', and the 'Account Name' field contains 'PHIL FRANZ'. Below the search bar, there is a 'Search' section with a checked checkbox for 'Last 12 month rolling period' and a 'Search' button. Below this is a table titled 'Transaction Count'.

Month	Number of Reg D Transactions	Number of Reg D Transactions Allowed	Violation
December 2018	3	2	Yes

Figure 2-81 Regulation-D Transaction Inquiry with Date Range

The screenshot shows the 'Regulation-D Transaction Inquiry' screen with search criteria filled in. The 'Search by' dropdown is set to 'Account Number', the 'Account Number' field contains 'B01M000000071', and the 'Account Name' field contains 'PHIL FRANZ'. Below the search bar, there is a 'Search' section with an unchecked checkbox for 'Last 12 month rolling period' and two date range fields labeled 'From Date' and 'To Date', each with a calendar icon. A 'Search' button is also present.

2. On **Regulation-D Transaction Inquiry** screen, specify the fields.
For more information on fields, refer to the field description table.

Table 2-48 Regulation-D Transaction Inquiry - Field Description

Field	Description
Search By	<p>Users can search for an account number by using any of the available search criteria.</p> <p>The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.</p> <p>Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.</p> <p>A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.</p> <p>For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.</p> <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</p> </div>
Last 12 Month Rolling Period	This check box is checked by default. When it is checked, the system displays the data for previous 12 months rolling period.
From Date	This is the date from which the Reg D transactions must be displayed. This field is mandatory only when the Last 12 Month Rolling Period is unchecked. This date cannot be lesser than the account opened date.
To Date	This is the date up to which the Reg D transactions must be displayed. This field is mandatory only when the Last 12 Month Rolling Period is unchecked. This date cannot be greater than the current business date.
Month	<p>The calendar months are displayed in this field depending on whether the Last 12 Month Rolling Period is checked or unchecked.</p> <p>If the Last 12 Month Rolling Period is checked, then the previous 12 rolling months are displayed.</p> <p>If the Last 12 Month Rolling Period is unchecked, then the months chosen in the From Date and To Date fields will be displayed as the starting month and the end month respectively.</p>
Number of Reg D Transactions	This is a calculated value derived from the host system. The Number of Reg D Transaction that occurred during a particular month is displayed in this field.

Table 2-48 (Cont.) Regulation-D Transaction Inquiry - Field Description

Field	Description
Number of Reg D Transactions Allowed	The value for this field is derived from the business product definition for the product that the account belongs. Number of Reg D Transactions allowed per month configured in the Reg D data segment is derived and displayed in this field.
Violation	This field displays either Yes or No . It is the difference between Number of Reg D Transactions Allowed and Number of Reg D Transactions . If the Number of Reg D Transactions are more than the allowed transactions in a month, then this column displays Yes , else it displays No .

2.12.3 Account Closure Inquiry

This helps to inquire account closure status at different stages of the account closure process and view the below details,

- Display all the applicable stages of account closure and status
- Failure Reason/Related error message in case of failure
- Account closure request details
- Account closure status
- Closure Initiation Date
- Closure Date
- Estimated Payout (Applicable before IC online Liquidation)
- Final Settlement Amount (Applicable after IC online liquidation with latest balance)
- Transaction Reference Number.

 **Note:**

The system displays the latest account closure request details in case more than one account closure happened for the account (in case of close and reopen).

 **Note:**

The fields marked as **Required** are mandatory.

1. On **Home** screen, from **Retail Account Services**, under **Inquiry**, click **Account Closure Inquiry**, or specify the **Account Closure Inquiry** in the Search icon bar.

The **Account Closure Inquiry** screen is displayed.

Figure 2-82 Account Closure Inquiry

2. Click the **Search** icon or specify the account number in the **Account Number** field, and press **Enter** or **Tab**.

The account closure inquiry details are displayed in the screen.

It displays the below values.</p> <ul style="list-style-type: none"> • Ledger Code - Displays the selected ledger code. • Description - Displays the ledger description. • Transaction Reference Number - Display the transaction reference number of account to GL transfer.

3. Click **Close** icon to close this screen.

2.13 Standing Instructions

Under the **Standing Instructions** menu, you can perform the standing instruction related actions for a CASA account.

This topic contains the following subtopics:

- [Online Account Sweep In](#)
Online sweep enables the customer to utilise funds available in other saving and checking accounts when there is a short fall of balance in the primary account during a debit transaction.

2.13.1 Online Account Sweep In

Online sweep enables the customer to utilise funds available in other saving and checking accounts when there is a short fall of balance in the primary account during a debit transaction.

Savings and checking accounts of the customer can be used to link as cover accounts in a sweep structure. All accounts should belong to the same customer, must be created in the same branch, and should have the same currency.

Online sweep enables the customer to utilise funds available in other saving and checking accounts when there is a short fall of balance in the primary account during a debit transaction.

Note:

The fields marked as **Required** are mandatory.

To perform online sweep in:

1. On the **Home** screen, from the **Retail Account Services** mega menu, under **Standing Instructions**, click **Online Account Sweep In** or specify **Online Account Sweep In** in the search icon bar and select the screen.

The **Online Account Sweep In** screen is displayed.

2.14 Death Claim Processing in Oracle Banking Retail Accounts

This topic describes the processing of death claim in Oracle Banking Retail Accounts.

On expiry of a customer, the account proceeds/claims can be transferred to the descendants or beneficiaries of customers as per process.

When a customer expires, *Oracle Banking Party Services* will publish an event in on updating the customer status to **Deceased**. On this event, the associated accounts of the customer (both joint and single accounts) will be updated to status **Frozen**. Once the branch user receives the requisite documents (beneficiary details or Probate court order) the user will unfreeze the account - transfer the proceeds to the beneficiary and then proceed to close the account.

Note:

The unfreezing of account and transfer of proceeds if any to the beneficiary based on the probate court order/beneficiary details in account and subsequently closing the account of the deceased is an operational process.

If an account is designated as payable on death, then one or more beneficiary (nominee) details are to be captured for the account.

A payable on death account cannot be opened without beneficiary details.

On death of the customer, the bank needs to operationally ensure the transfer of account proceeds of the payable on death account to the registered beneficiary.

2.15 Inactive, Dormancy, and Escheatment Marking based on Last Contact Date (LCD) in Oracle Banking Retail Accounts

This topic describes the processing of inactive, dormancy, and escheatment marking based on last contact date in Oracle Banking Retail Accounts.

The Last Contact Date with the bank determines the marking of Inactive, dormant, and escheatment accounts in the United States, as laws regarding Inactive accounts, Dormancy, and Escheatment vary by state.

The bank will develop a bank-level parameter to determine if customer-level inactive, dormancy, and escheatment tracking needs to be enabled. If the above flag is checked, the Last Contact Date (LCD) will be considered for marking account statuses (Inactive, Dormancy, Escheatment).

The LCD will update following any financial/Non-financial activity on the customer's account.

For Example:

The customer has accounts A, B, and C. If the address of account A is updated today then the LCD for all accounts A, B, and C will be updated to today's date and the revised Inactive, Dormancy, and Escheatment dates will be calculated.

2.16 Overdraft Protection/Sweep-in in Oracle Banking Retail Accounts

This topic describes the processing of overdraft protection/sweep-in in Oracle Banking Retail Accounts.

Customers can prevent dishonored or rejected debit transactions due to insufficient funds in their Checking or Savings account through the use of Overdraft Protection/Sweep-in, a service offered by banks. When such an instance occurs, the customer pulls an amount from another linked savings/checking account(s) to cover the shortfall.

The linked account(s) is called the provider account and the account for which the funds are being pulled is called the beneficiary account.

Multiple sweep provider accounts can be set up for a beneficiary account with a priority assigned to them.

2.17 Escheatment Processing in Oracle Banking Retail Accounts

This topic describes the processing of escheatment in Oracle Banking Retail Accounts.

Similar to inactive and dormancy - The escheatment laws differ by state in United States. The account is closed post the escheatment processing. The unclaimed funds are transferred to the state and retained by bank based on a configured threshold and percentage.

The state-group parameter configuration screen for inactive and dormancy is applicable for configuring the escheatment parameters too. Escheatment threshold allows the user to define a value over which the balance in the account will be considered for transfer to State. The percentage config available in the config screen will determine the percentage of funds to be transferred to bank GL and state GL (For Example: 70% denotes - 70% of the balance will be transferred to State GL and rest 30% will be retained by the bank).

Note:

An account will be considered for escheatment based on the customer Last contact date with the bank - For Example: the customer has had no contact with the bank through any of the channels for 5 years (where 5 years is the escheatment period), in this case, once the account balance is proportioned between bank and state, the account will be closed automatically.

Note:

For more information about the configurations, refer to the sections *State Group Parameters* and *State Code Mapping* in the *Account Configurations User Guide*.

2.18 Effective Dates for Address Types in Oracle Banking Retail Accounts

This topic describes the effective dates for the address types in Oracle Banking Retail Accounts.

The user can maintain multiple address at account level with effective from and effective to dates apart from the default residential address for the account.

Any customer communication such as periodic statements will consider the effective dates to identify the communication address. If there are no effective addresses as on the date of communication, then the default residential address will be considered.

2.19 Multiple Guardians or Custodians in Oracle Banking Retail Accounts

This topic describes the multiple guardians or custodians in Oracle Banking Retail Accounts.

Bank user can capture during account origination or servicing, multiple guardians details like guardian type (Guardian, Custodian etc.), guardian customer ID and the relationship of the guardian with the account holder for an account.

In case of minor accounts, user can capture multiple custodians (Guardian type in this case will be custodian) and the minor account can be created. For minor accounts, capture of custodian details is mandatory.

The details captured can be modified during the account life-cycle from the servicing User Interface.

2.20 Account Profile Questionnaire Capture in Oracle Banking Retail Accounts

This topic describes the account profile questionnaire capture in Oracle Banking Retail Accounts.

Banking Security Act (BSA) regulations and the Customer Due Diligence (CDD) rule were enacted to combat money laundering and the financing of terrorism. The Customer Due Diligence (CDD) Rule clarifies and strengthens customer due diligence requirements for certain financial institutions and requires these institutions to identify and verify the identity of the natural persons (known as beneficial owners) of legal entity customers who own, control, and profit from companies when those companies open accounts. Customer Due Diligence (CDD) begins with verifying the customer's identity and assessing the risks associated with that customer. This process could include identifying the source of funds for an account and the business activity the account will conduct.

- A configurable questionnaire in Oracle Banking Origination to receive various details from the customer.
- The above details are stored as an account profile data against the customer account in Oracle Banking Accounts.

This is part of US regulation BSA-CDD. This static data needs to be stored as per regulation along with the account information. The below listed fields are included as follow:

- Source of funds
- ATM transactions in a month
- Domestic transactions in a month
- Expected Annual volume of transactions
- Expected foreign wire activity
- Purpose of account

2.21 Notes and Memos in Oracle Banking Retail Accounts

This topic describes the notes and memos in Oracle Banking Retail Accounts.

For each customer, Banker has the ability to maintain notes regarding the customer and their accounts.

User can add/modify/delete notes for customer accounts in the servicing application. System also notifies the bank user of the account level notes on the servicing User Interface when user tries to inquire/ modify the account details.

2.22 FIDM Processing in Oracle Banking Retail Accounts

This topic describes the processing of FIDM in Oracle Banking Retail Accounts.

If a customer has defaulted on child support payments - the FIDM data will report a match and the bank needs to block the amount for satisfying the pending child support payments to be made by the customer/Non-Custodial Parent to State.

When a FIDM data match is reported, *Oracle Banking Party Services* will publish an event with the details of the match including the FIDM amount. At this event,

- If the customer has one account - then a legal block will be placed on the account for the reported FIDM amount.
- If the customer has multiple accounts - then a legal block will be placed on the account with the max balance for the FIDM amount.

Note:

Removal of the legal block and transfer of funds to the child support organization will be operationally handled.

2.23 OFAC Processing in Oracle Banking Retail Accounts

This topic describes the processing of OFAC in Oracle Banking Retail Accounts.

If a customer is identified as OFAC sanction hit - the OFAC data will report a match and the bank needs to freeze all the customer accounts for both transactions and modifications.

When an OFAC data match is reported for a customer or when an existing OFAC customer is removed from the sanction list in party management. A real-time freeze will be placed on the customer and the account restricting the customer to perform transactions/non-financial modifications.

2.24 Regulation D Processing in Oracle Banking Retail Accounts

This topic describes the processing of Regulation D in Oracle Banking Retail Accounts.

Regulation D imposes reserve requirements on transaction accounts. As a result of the reserve requirements of United States Banks with the Fed, United States Banks in turn have to ensure some portions of their deposits are not volatile and hence restrictions are imposed on the number of debit transactions a Customer can make from savings accounts and MMDA accounts.

Reg D configurations are at the business product definition level in Oracle Banking Retail Accounts and allow users to configure the Reg D Transaction threshold, Reg D Warning threshold, Reg D monthly violation threshold, and Reg D 12-month rolling period violation threshold for automatic product switch to checking account. For Example: If a customer has done Reg D violations for 3 months on a 12-month rolling period - then the customer account will be automatically downgraded (auto-product switch) to a checking account.

 **Note:**

For more information about the configurations, refer to the section [Business Product](#) in this User Guide.

Reg D Auto Product Switch

For Reg D - If a customer has done Reg D violations for 3 months on a 12-month rolling period - then the customer account will be automatically downgraded (auto-product switch) to checking account.

A product switch configuration screen in Oracle Banking Retail Accounts allows the user to define the current business product and the new business product to which the account product needs to be switched to in case of more than the allowed number of monthly violations in a 12-month rolling period.

 **Note:**

Automatic product switch is applicable only for United States Regulation D violation.

 **Note:**

For more information about the configurations, refer to the section [Product Switch](#) in this User Guide.

2.25 Regulation DD Processing in Oracle Banking Retail Accounts

This topic describes the processing of Regulation DD in Oracle Banking Retail Accounts.

Regulation DD (Truth in Savings Act) is to enable consumers to make informed decisions about their accounts at depository institutions using uniform disclosures.

Enhancements were made to ensure the all the required information as per the Regulation D is available in the System and the same can be pulled by any third-party Reporting Solution for generating reports.

List of the information available in the system as follows:

- Interest details: Fixed rates, Tiered rates, Compounding methods, and Liquidation frequency.
- Balances: Ledger Balance, Collected Balance, and Average Balance.
- Annual Percentage Yield (APY), and Annual Percentage Yield Earned (APYE)
- Minimum balance to open an account.
- Minimum daily balance to be maintained.
- Regulation D - Transaction thresholds
- Statements (in addition to the transaction details, contain the information with respect to the APYE, a separate section to reflect the consolidated fees applied on the account)
- Details with respect to penalty rates and penalty amounts applied on early redemption of Certificate of Deposits.

 **Note:**

- Details with respect to prior notifications for identified life cycle events of Certificate of Deposits and grace period details for Certificate of Deposit renewal will be available when the feature is added in the certificate deposit product.
- Reports for Reg DD compliance are not provided from Oracle Banking Retail Accounts and these have to be generated from Bank's reporting application.

2.26 Regulation E Processing in Oracle Banking Retail Accounts

This topic describes the processing of Regulation E in Oracle Banking Retail Accounts.

Customers must be given clear disclosures about their rights, liabilities, and responsibilities according to Regulation E, or the Electronic Funds Transfer Act, when using electronic fund transfer services.

The customer must be informed about the error resolution process in the account statement, as required by the regulations, by the bank. An additional section called the "appendix" has been added to the statement to detail the compliance with this requirement.

During the monthly cycle in which a Reg E eligible transaction occurs in a CASA account, an interim statement must be generated according to Regulation E. At the account level, the periodic statement parameter determines the statement generation date and frequency if the statement cycle is longer than a month, such as quarterly. If a Reg E transaction occurs on the account during a month other than the one for periodic statements, then an interim statement will be generated for that month.

2.27 Back-up Withholding Tax in Oracle Banking Retail Accounts

This topic describes the processing of back-up withholding tax in Oracle Banking Retail Accounts.

If a bank customer is a taxpayer receiving certain types of income payments, the IRS requires the payer of these payments to report them on an information return. The person or business (bank) paying the customer doesn't generally withhold taxes from these types of payments, as it is assumed the customer will report and pay taxes on this income when they file their federal income tax return.

There are situations when the bank is required to withhold at the current federal and state rate percent. This federal or state rate tax is taken from any future payments to ensure the IRS receives the tax due on this income. The situations are as below:

- Under the BWH-B program because the customer failed to provide a correct taxpayer identification number (TIN) to the bank for reporting on the required information return.
- Under the BWH-C program because the customer failed to report or underreported interest and dividend income they received on their federal income tax return.
- Customer wants the bank to voluntarily deduct the backup withholding tax on interest payments. The rate of deduction can be any value as required by the bank customer.

Note:

The marking of the related accounts of a customer as applicable for BWH Tax, will be done basis an event from *Oracle Banking Party Services*. Wherein when a customer is identified as applicable for BWH Tax/ the customer has opted for voluntary deduction of BWH Tax, then it is expected that *Oracle Banking Party Services* will publish an event which will be consumed by *Oracle Banking Accounts* for marking and deducting the BWH Tax for the customer.

The new System Data Elements as TAX_APPLICABLE, and VOLUNTARY_TAX_RATE are introduced and can be used in defining the tax formula in interest and charges module.

Note:

For more details, refer to the *Interest and Charges User Guide*.

An account service has been enhanced to include the tax applicability and voluntary tax rate fields. Basis this fields, the Backup with holding tax (federal/ state or voluntary) can be calculated and applied for the account.

2.28 FDIC Modernization in Oracle Banking Retail Accounts

This topic describes the processing of FDIC Modernization in Oracle Banking Retail Accounts.

The FDIC (Federal Deposit Insurance Corporation) protects the depositors of insured depository institutions (IDIs) against the loss of their deposits due to an IDI failure (up to the applicable insurance limit). The FDIC pays deposit insurance upon the failure of an IDI. In paying deposit insurance, the FDIC insures the balance of each depositor's accounts, dollar-

for-dollar, including principal and any accrued interest, up to the applicable insurance limit. The basic amount of FDIC deposit insurance coverage provided to depositors of an IDI is referred to as the Standard Maximum Deposit Insurance Amount (“SMDIA”). At present, the SMDIA is \$250,000.

Following the failure of an IDI, the FDIC as receiver will liquidate the institution's assets for the benefit of the institution's creditors. Through the FDIC's payment of deposit insurance, the depositors will recover their insured funds (i.e., funds up to the insurance limit) in full.

An identifier at the bank level is introduced to determine if the bank is marked for insolvency proceedings. Also, the hold reason can be selected and set at bank level for applying the provisional holds.

A new configuration screen is available to maintain the balance threshold and hold percentages across business products basis which the holds are calculated and applied as part of the insolvency batch processing.

2.29 Staff Restrictions

If staff restriction is enabled, you cannot view the account balance and transaction details of other staff accounts. Also, you are restricted to initiate or approve the transaction of own account.

- The staff restriction is validated while performing transactions or serving operations from branch.
- For enabling staff restrictions for the user, refer **User** topic in **Oracle Banking Security Management System User Guide**.
- For creating staff customer, refer **Retail Onboarding User Guide**.

2.30 Business Events in Oracle Banking Retail Accounts

This topic describes the processing of business events in online for Oracle Banking Retail Accounts in Oracle Banking Retail Accounts.

The System has the capability to generate events based customer-initiated or system-initiated actions. The system generates these events related to a customer and their accounts when activities or actions related to the customer or accounts take place that are useful for a service interaction. Some of these generated events are also important to be communicated to customers in a timely manner as per regulations.

The system has the capability to generate and hand over the event with the required details to an external system through Event Delivery Platform (EDP) for their consumption and the external system can use the data handed over for any purpose as deemed necessary. For example, the external system can use the data for communicating the customer of the event with necessary details.

The following business events is available as follows:

- Account Creation
- Debit transaction
- Credit transaction
- Minimum Credit or Debit transaction threshold
- Maximum Credit or Debit transaction threshold
- Amend Account

- Check book request
- Stop Check Payment
- Manual/ Auto revoke stop check payment
- Account Closure
- Balance Thresholds (Min balance threshold, Max balance threshold, Negative balance, Daily Account Summary).

The static data is factory shipped as part of this release as below.

When the event happens and passes the underlying rule, the system will publish the event with necessary facts (Data) as shown in the table for the multiple third party systems to consume. A single event can be published to multiple consumers.

Note:

Facts and Rules are the key elements for generating the Business Events. Banks can configure the Facts and Rules, with the naming convention specified in the below tables respectively.

2.31 Tax Forms in Oracle Banking Retail Accounts

This topic describes the processing of tax forms in Oracle Banking Retail Accounts.

The Internal Revenue Service (IRS) requires financial institutions to provide them and their customers information regarding the financial institution customer's income of various types. The IRS 1099 Form is a collection of tax forms documenting different types of payments made by an individual or a business that typically isn't the payee's employer. The payer fills out the form with the appropriate details and sends copies to the payee and the IRS, reporting payments made during the tax year. IRS Form 1099-INT focuses on interest income.

The details required as part of 1099 INT reporting include the below fields that are relevant from Oracle banking accounts perspective:

- Customer Number
- Account Number
- Start date of Financial Year
- End date of Financial Year
- Date of interest credit to account
- Interest paid amount
- Penalty amount (on early redemption of deposit)
- Customer residential address state
- FATCA indicator
- Second B notice
- Federal Income tax withheld
- State information (State, State Identification number, and State tax withheld).

Reporting of the below data that are part of 1099INT is not in scope for Oracle Banking Retail Accounts:

- Interest on US savings bonds and treasury
- Foreign tax withheld
- Tax-exempt interest

2.32 Auto-Closure of Account Basis Balance Threshold in Oracle Banking Retail Accounts

This topic describes the auto-closure of an account basis balance threshold in Oracle Banking Retail Accounts.

System has the capability to auto-close an account basis the balance maintained over a certain period. This is essential for the bank to identify those accounts that bring in minimal

business for the bank while the bank incurs cost of maintaining these accounts. The preferences data segment in the business product configuration screen is enhanced to include an optional section to define the account auto close parameters. These parameters include the auto-closure applicability, the auto-close balance threshold, auto-close threshold days and balance transfer GL.

For example,

If this value of,

Auto-close Balance threshold Currency = USD

Auto-close Balance threshold Amount = 5 (For US markets, this value can be configured to '0')

Auto-Close threshold days = 15 days.

Then any accounts associated with the business product, will be closed if the balance maintained in the account is \leq \$5 for a period of 15 days continuously.

All the validations applicable for a manual account closure will also be applicable for auto-account closure. If any of the validations fail, the account will not be auto-closed and will remain active.

 **Note:**

An accounts with draft balance (negative balance) are not considered for auto closure of Accounts. As per adopted banking practices, Closing of Accounts with trivial negative balances (Debit), will be treated as write-off and this will be carried out with proper approvals from Credit Committee of Board. Once the approvals are obtained, the relevant asset monitoring department will pass accounting entries by debiting Profit and Loss Statement, and Credit the Account with Debit balances. Once these accounts become zero, they will be picked for auto closure after the threshold days.

A

Functional Activity Codes

This topic contains the functional activity codes available in Oracle Banking Retail Accounts.

Screen Name/API Name	Functional Activity Code	Action	Description
Business Product Maintenance	OBRACC_FA_ACCOUNTCLASSAGGREGATE_AMEND	MODIFY	To amend an account class
Business Product Maintenance	OBRACC_FA_ACCOUNTCLASSAGGREGATE_AUTHORIZE	AUTHORIZE	To authorize an account class
Business Product Maintenance	OBRACC_FA_ACCOUNTCLASSAGGREGATE_CLOSE	CLOSE	To close an account class
Business Product Maintenance	OBRACC_FA_ACCOUNTCLASSAGGREGATE_DELETE	DELETE	To delete an account class
Business Product Maintenance	OBRACC_FA_ACCOUNTCLASSAGGREGATE_NEW	NEW	To make a new account class
Business Product Maintenance	OBRACC_FA_ACCOUNTCLASSAGGREGATE_REMOVELOCK	All Operations	To remove lock on an account class resource
Business Product Maintenance	OBRACC_FA_ACCOUNTCLASSAGGREGATE_REOPEN	REOPEN	To reopen an account class
Business Product Maintenance	OBRACC_FA_ACCOUNTCLASSAGGREGATE_SUBMIT	SUBMIT	To submit an account class
Business Product Maintenance	OBRACC_FA_ACCOUNTCLASSAGGREGATE_VALIDATE	VALIDATE	To validate an account class
Business Product Maintenance	OBRACC_FA_ACCOUNTCLASSAGGREGATE_VIEW	VIEW	To view an account class
Business Product Maintenance	OBRACC_FA_SER_ACCOUNTCLASSAGGREGATE_AMEND	UNLOCK	Update business product service API
Business Product Maintenance	OBRACC_FA_SER_ACCOUNTCLASSAGGREGATE_CLOSE	CLOSE	Close business product service API
Business Product Maintenance	OBRACC_FA_SER_ACCOUNTCLASSAGGREGATE_NEW	NEW	Create business product service API
Business Product Maintenance	OBRACC_FA_SER_ACCOUNTCLASSAGGREGATE_REOPEN	REOPEN	Reopen business product service API

Table A-1 Functional Activity Codes for Account Servicing Screens

Screen Name/API Name	Functional Activity Code	Action	Description
Account 360	CSR_FA_CASA_DASH	Query Details	Populate the details of the account on the Account 360 page.
Account Address Update	CSR_FA_ACADRR_SAVE	Initiation	Initiate the address update request.
Account Address Update	CSR_FA_ACADRR_AUTH	Authorization	Approve or Reject the address update request.
Joint Holder Maintenance	CSR_FA_UPDJH_SAVE	Initiation	Initiate the joint holder update request.
Joint Holder Maintenance	CSR_FA_UPDJH_AUTH	Authorization	Approve or Reject the joint holder update request.
Account Preferences	CSR_FA_ACCPRF_SAVE	Initiation	Initiate the account preferences request.
Account Preferences	CSR_FA_ACCPRF_AUTH	Authorization	Approve or Reject the account preferences update request.
Beneficiary/Nominee	CSR_FA_UPDNOM_SAVE	Initiation	Initiate the nominee update request.
Beneficiary/Nominee	CSR_FA_UPDNOM_AUTH	Authorization	Approve or Reject the beneficiary update request.
Customer Relationship	CSR_FA_CUSREL_SAVE	Initiation	Initiate the customer relationship maintenance update request.
Customer Relationship	CSR_FA_CUSREL_AUTH	Authorization	Approve or Reject the customer relationship maintenance update request.
Account Statement Frequency	CSR_FA_ASFSAV_SAVE	Initiation	Initiate the account statement frequency request.
Account Statement Frequency	CSR_FA_ASFSAV_AUTH	Authorization	Approve or Reject the account statement frequency request.
Create Amount Block	CSR_FA_AMTBLK_SAVE	Initiation	Initiate the create amount block request.
Create Amount Block	CSR_FA_AMTBLK_AUTH	Authorization	Approve or Reject the create amount block request.
View Amount Block	CSR_FA_MOAMTBLK_VIEW	Query Details	View amount block request.
Modify Amount Block	CSR_FA_MOAMTBLK_SAVE	Initiation	Initiate the modify amount block request.
Modify Amount Block	CSR_FA_MOAMTBLK_AUTH	Authorization	Initiate the modify amount block request.
Activate Dormant Account	CSR_FA_ADASAV9_SAVE	Initiation	Initiate the activation of inactive or dormant account request.
Activate Dormant Account	CSR_FA_ADASAV9_AUTH	Authorization	Approve or Reject the activation of inactive or dormant account request.

Table A-1 (Cont.) Functional Activity Codes for Account Servicing Screens

Screen Name/API Name	Functional Activity Code	Action	Description
Account Status Change	CSR_FA_ACSTCHNG_SAVE	Initiation	Initiate the account status change request.
Account Status Change	CSR_FA_ACSTCHNG_AUTH	Authorization	Approve or Reject the account status change request.
Check Book Order	CSR_FA_CHQBKRQ_SAVE	Initiation	Initiate the check book request.
Check Book Order	CSR_FA_CHQBKRQ_AUTH	Authorization	Approve or Reject the check book request.
Stop Check Request	CSR_FA_STOPCHEQ_SAVE	Initiation	Initiate the stop check payment request.
Stop Check Request	CSR_FA_STOPCHEQ_AUTH	Authorization	Approve or Reject the stop check payment request.
Reverse Stop Check Payment	CSR_FA_RVSTCHEQ_SAVE	Initiation	Initiate the reversal of stop check payment request.
Reverse Stop Check Payment	CSR_FA_RVSTCHEQ_AUTH	Authorization	Approve or reject the reversal of stop check payment request.
Modify Stop Check Payment	CSR_FA_MODSTCHQ_SAVE	Initiation	Initiate the Modify Stop Check request.
Modify Stop Check Payment	CSR_FA_MODSTCHQ_AUTH	Authorization	Approve or Reject the Modify Stop Check request.
Check Book Status	CSR_FA_CHQBKSTS_SAVE	Initiation	Initiate the check book status change request.
Check Book Status	CSR_FA_CHQBKSTS_AUTH	Authorization	Approve or Reject the check book status change request.
Account Transactions	CSR_FA_ACC_TRN	Query Details	Get the account transactions.
Account Garnishment	CSR_FA_ACCGAR_SAVE	Initiation	Initiate the garnishment request.
Account Garnishment	CSR_FA_ACCGAR_AUTH	Authorization	Approve or Reject the garnishment request.
Courtesy Pay	CSR_FA_CRTSYPAY_SAVE	Initiation	Initiate the courtesy pay maintenance request.
Courtesy Pay	CSR_FA_CRTSYPAY_AUTH	Authorization	Approve or Reject the courtesy pay maintenance request.
Account Closure	CSR_FA_ACCLSR_SAVE	Initiation	Initiate the Account closure request.
Account Closure	CSR_FA_ACCLSR_AUTH	Authorization	Approve or Reject the Account closure request.
Regulation D Inquiry	CSR_FA_REGD_QUERY	Query Details	Get the Regulation ID transaction details.
Consolidated Adhoc Statement	CSR_FA_CONSOL_ADHOC_ACC_STMT_GET	Query Details	Fetch existing statements, generate new statements and download the generated statements.
Online Account Sweep In	CSR_FA_SWPSTP_SAVE	Initiation	Initiate the online account sweep-in request.

Table A-1 (Cont.) Functional Activity Codes for Account Servicing Screens

Screen Name/API Name	Functional Activity Code	Action	Description
Online Account Sweep In	CSR_FA_SWPSTP_AUTH	Authorization	Approve or Reject the online account sweep-in request.
Online Account Sweep History	CSR_FA_SWP_HIST_GET	Query Details	Inquire the online sweep transactions
Memo	BSR_FA_MEMSAV_SAVE	Initiation	Initiate the memo maintenance request.
Memo	BSR_FA_MEMSAV_AUTH	Authorization	Approve or Reject the memo maintenance request.

Table A-2 Functional Activity Codes for Servicing Dashboard

Servicing Widget	Functional Activity Code	Action	Description
Bulletin	REMO_FA_BULLETIN_BOARD	Query Details	Access the bulletin board widget on the dashboard.
My Dairy	REMO_FA_PJ_CSR_GET_MYDIARY	Query Details	Capture notes using My Diary widget on the dashboard.
Service Requests	BSR_FA_MYTRAN_VIEW	Query Details	View the servicing tasks widget on the dashboard.

Basic Functional Activity Codes

These codes are needed for user to login and access menu and tasks.

**Note:**

Actions are applicable only for transaction screens where conductor work flow is used. For login and access screens action is not applicable.

Table A-3 Basic Functional Activity Code

Screen Name/API Name	Functional Activity Code	Action	Description
View Currency Definition	CMC_FA_CURRENCY_DEFN_VIEW	Not Applicable	To view the currency code definitions.
View Branch Parameter	CMC_FA_EXT_BRANCH_PARAMETERS_VIEW	Not Applicable	To view the branch parameter maintenance.
View Local Holiday (for the Branch)	CMC_FA_LOCAL_HOLIDAY_VIEW	Not Applicable	To view the holiday maintenance.
View Awaiting Customer Clarification tasks	CMC_FA_SUBMENU_1_Awaiting	Not Applicable	For awaiting tasks.
View Completed tasks	CMC_FA_SUBMENU_1_Completed	Not Applicable	To view the completed tasks on the Tasks page.
View Free tasks	CMC_FA_SUBMENU_1_FreeTasks	Not Applicable	To access the free tasks on the Tasks page.

Table A-3 (Cont.) Basic Functional Activity Code

Screen Name/API Name	Functional Activity Code	Action	Description
View Hold tasks	CMC_FA_SUBMENU_1_HoldTasks	Not Applicable	To access the hold tasks.
View My tasks	CMC_FA_SUBMENU_1_MyTasks	Not Applicable	To access the My Tasks on the Tasks page.
View My Pending tasks	REMO_FA_SUBMENU_1_MY_PENDING_TASKS	Not Applicable	To access the My Pending Tasks on the Tasks page.
Search task	CMC_FA_SUBMENU_1_SEARCH	Not Applicable	To access the search page on the Tasks page.
View Subprocess tasks	CMC_FA_SUBMENU_1_Subprocess	Not Applicable	To access the sub process tasks on the Tasks page.
View Supervisor tasks	CMC_FA_SUBMENU_1_Supervisor	Not Applicable	To access the supervisor tasks on the Tasks page.
Business Process Workflow Maintenance	CMC_FA_SUBMENU_1_WORKFLOW_MAINT	Not Applicable	To initiate the workflow maintenance.
Screen Not Applicable	OBRC_FA_CONFIG_MASTER	Not Applicable	To fetch the regional configuration.
Screen Not Applicable	SMS_FA_USER_LOGIN	Not Applicable	To login to user screen.
View System Dates	CMC_FA_SYSTEM_DATES_VIEW	Not Applicable	To view the calendar.
View Dashboard	SMS_FA_MENU_DASHBOARD_VIEW	Not Applicable	To launch the dashboard.
View Priority Code Maintenance	CMC_MENU_FA_PRIORITY_CODE_MAINT_VIEWALL	Not Applicable	To view priority code maintenance.
Screen Not Applicable	OBRC_FA_GRID_CONFIG	Not Applicable	To get grid configuration.
Screen Not Applicable	OBRC_FA_PROCESS_CONFIG	Not Applicable	To get all process configuration.
Screen Not Applicable	OBRC_FA_SCREEN_CONFIG	Not Applicable	To get all screen configuration.
View Users	SMS_FA_USER_VIEW	Not Applicable	To view user details.

B

Error Codes and Messages

This topic contains error codes and messages found while using Oracle Banking Retail Accounts Service.

Table B-1 List of Error Codes and Messages

Error Code	Error Message
CAPM-COM-001	Record does not exist
CAPM-COM-002	Unable to parse JSON
CAPM-COM-003	Application Number cannot be blank or "null".
CAPM-COM-004	Process Ref Number cannot be blank or "null".
CAPM-COM-005	Error saving the datasegment
CAPM-COM-006	Unexpected error occurred during runtime
CAPM-COM-007	Application Initiated Successfully
CAPM-DEL-001	Record deleted successfully
CAPM-DEL-002	Record(s) deleted successfully
CAPM-DEL-003	Failed to Delete the record
CAPM-MOD-001	Record Successfully Modified
CAPM-MOD-002	Failed to Update the record
CAPM-SAV-001	Record Saved Successfully.
CAPM-SAV-002	Failed to create the record
CAPM-SAV-003	The record is validated and saved successfully.
CAPM-SAV-004	Record already exists
CAPM-VAL-001	The record is successfully validated.
CAPM-VAL-002	Error in fetching Summary Info.
CAPM-TJS-VAL-00	Process code is not set for the selected Lifecycle
CAPM-TJS-VAL-01	AccountType, LifeCycleCode, BranchCode cannot be null
CAPM-TJS-VAL-02	BusinessProcess Code cannot be null
CAPM-TJS-VAL-03	Failed to generate the reference number
CAPM-TJS-VAL-04	No business process code found
CAPM-TJS-VAL-05	Application Initiation Failed
CAPM-TJS-VAL-06	Unable to Parse Application Initiation Json
CAPM-TJS-VAL-07	Process Code cannot be null for the lifecycle
CAPM-TJS-VAL-08	Error in retrieving application category
CAPM-TJS-VAL-09	Error in retrieving TaskID List
CAPM-TJS-VAL-10	Workflow Definition Not Found
CAPM-TJS-VAL-11	Error while checking workflow definition existence
CAPM-TJS-VAL-12	Response from EA service is null
CAPM-TJS-VAL-13	Only maximum 4 characters are allowed
CAPM-TJS-VAL-14	Invalid Event Serial Number. Value should be a positive number
CAPM-TJS-VAL-15	The record is successfully validated.
CAPM-TJS-MOD-00	Record Successfully Modified

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
CAPM-TJS-SAV-00	Record Saved Successfully.
CAPM-TJS-COM-00	Unable to parse JSON
CAPM-TJS-COM-01	Application Number cannot be blank or "null".
CAPM-TJS-COM-02	Unexpected error occurred during runtime
CAPM-TJS-COM-03	Application Initiated Successfully
CAPM-TJS-COM-04	Application Number cannot be blank or "null".
CAPM-TJS-VAL-16	Error while checking workflow definition existence
CAPM-TJS-COM-05	Update status failed
CAPM-TJS-COM-06	Unable to get sub-domain info
CAPM-TJS-VAL-17	Application date parsing failed
CAPM-TJS-VAL-18	Application number not valid
CAPM-TJS-VAL-19	Unable to parse application transaction flow JSON
CAPM-TJS-VAL-21	Failed in parsing date
CAPM-TJS-SAV-01	Record Saved Successfully.
CAPM-TJS-VAL-22	Source code cannot be null or empty
CAPM-TJS-VAL-23	Error while parsing source code from DDA-CONFIG-SOURCECODE-SERVICES
CAPM-TJS-VAL-24	Source code is invalid
CAPM-TJS-VAL-25	Error in getting data from DDA-CONFIG-SOURCECODE-SERVICES
CAPM-TJS-VAL-26	Error in validating the record.
CAPM-TJS-DEF-00	Error in defaulting source code details
CAPM-TJS-VAL-27	Invalid entry type
CAPM-TJS-VAL-28	Invalid posting into
CAPM-TJS-VAL-29	Account currency amount cannot be NULL or empty
CAPM-TJS-VAL-30	Exchange rate cannot be NULL or empty
CAPM-TJS-VAL-31	Branch currency amount cannot be NULL or empty
CAPM-TJS-VAL-32	Invalid value date format
CAPM-TJS-VAL-33	Value date cannot be NULL or empty
CAPM-TJS-VAL-34	Invalid availability info
CAPM-TJS-VAL-35	Availability info cannot be NULL or empty
CAPM-ACS-COM-F1	Direct Banking Required must be Y/N only
CAPM-ACS-COM-F2	Current Status is invalid
CAPM-ACS-COM-G0	Multi Currency Account must be Y/N only
CAPM-ACS-COM-G1	Renew Unit must be positive Number
CAPM-ACS-COM-G2	Next Renew Limit must be greater than Zero
CAPM-ACS-COM-G3	Renew Frequency must Daily (D)/Yearly (Y)/Monthly(M)
CAPM-ACS-COM-G4	Request Status is Invalid
CAPM-ACS-COM-G5	Cheque Level Reorder must be empty/null
CAPM-ACS-COM-G6	No Of Leaves Reorder must be empty/null
CAPM-ACS-COM-G7	Cheque Level Reorder is Invalid
CAPM-ACS-COM-G8	No Of Leaves Reorder is Invalid
CAPM-ACS-COM-G9	Reporting GL is not allowed
CAPM-ACS-COM-H0	At least one limit Type is required

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
CAPM-ACS-COM-H1	Tod Limit should be greater than Zero
CAPM-ACS-COM-H2	Daylight Limit should be greater than Zero
CAPM-ACS-DEF-01	Error in defaulting Account Statement Preferences
CAPM-ACS-DEF-02	Error in Defaulting Provisioning and Reporting Line
CAPM-ACS-DEF-03	Error in defaulting Account Preferences
CAPM-ACS-DEF-04	Error in defaulting Account Status
CAPM-ACS-DEF-05	Error in defaulting Account Features
CAPM-ACS-DEF-06	Error in defaulting Account Limits
CAPM-ACS-DEF-07	Error in defaulting Account Signatory
CAPM-ACS-DEF-08	Error in defaulting initial funding
CAPM-ACS-DEF-09	Error in defaulting multi Currency Account
CAPM-ACS-DEF-10	Error in defaulting Account Address
CAPM-ACS-DEF-AA	Error in defaulting Interest Details
CAPM-ACS-DEF-AC	Error in defaulting Charges
CAPM-ACS-DEF-AD	Error in defaulting Account Status
CAPM-ACS-DEF-AE	Error in defaulting Account Statement Preferences
CAPM-ACS-DEF-AF	Error in defaulting Provisioning ReportingLine
CAPM-ACS-DEF-AG	Error in defaulting AccountPreferences
CAPM-ACS-DEF-AH	Error in defaulting Account Features
CAPM-ACS-DEF-AI	Error in defaulting Account Limits
CAPM-ACS-DEF-AJ	Error in defaulting Account Mis
CAPM-ACS-DEF-AK	Error in defaulting Account Signatory
CAPM-ACS-DEF-AL	Error in defaulting Initial Funding
CAPM-ACS-DEF-AM	Error in defaulting MultiCurrency
CAPM-ACS-DEF-AN	Error in defaulting Account Address
CAPM-ACS-VAL-01	Auto Debit Card Request cannot be null.
CAPM-ACS-VAL-02	Request Reference Number cannot be null.
CAPM-ACS-VAL-M0	Process code is not set for the selected Lifecycle
CAPM-ACS-VAL-M1	Account Type,Life Cycle Code, Branch Code cannot be null
CAPM-ACS-VAL-M2	Business Process Code cannot be null
CAPM-ACS-VAL-M4	Failed to generate the reference number
CAPM-ACS-VAL-M3	Error in parsing date. Date should be in yyyy-MM-dd
CAPM-ACS-VAL-M5	No business process code found
CAPM-ACS-VAL-M6	Application Initiation Failed
CAPM-ACS-VAL-M7	Unable to Parse Application Initiation Json
CAPM-ACS-VAL-M8	Process Code cannot be null for the lifecycle
CAPM-ACS-VAL-M9	Error in retrieving application category
CAPM-ACS-VAL-N0	Error in retrieving TaskID List
CAPM-ACS-VAL-N3	Fail to acquire Plato Task
CAPM-ACS-VAL-N1	Workflow Definition Not Found
CAPM-ACS-VAL-N2	Error while checking workflow definition existence
CAPM-ACS-VAL-N4	No data found for this Application Number
CAPM-ACS-VAL-N5	Failed To Invoke OBRH

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
CAPM-ACS-VAL-N6	Handoff Completed Successfully
CAPM-ACS-VAL-N7	Handoff Failed due to network issue
CAPM-ACS-COM-00	Customer Account Basic Details is NULL
CAPM-ACS-COM-01	Account Group is Empty/NULL
CAPM-ACS-COM-02	Invalid Account Number
CAPM-ACS-COM-03	Invalid Customer Number
CAPM-ACS-COM-04	Invalid Branch Code
CAPM-ACS-COM-05	Invalid Currency
CAPM-ACS-COM-06	Invalid Account Class
CAPM-ACS-COM-07	Invalid Account Type
CAPM-ACS-COM-08	Not a Multi Currency Account Class. MultiCurrency_Account flag should be N
CAPM-ACS-COM-09	MultiCurrency Account Class. MultiCurrency_Account flag should be Y
CAPM-ACS-COM-10	RTL should be N
CAPM-ACS-COM-11	IBAN should be N
CAPM-ACS-COM-12	Referral Required should be N
CAPM-ACS-COM-13	Account Preferences is empty
CAPM-ACS-COM-14	ATM Required should be N
CAPM-ACS-COM-15	Cheque Book Required should be N
CAPM-ACS-COM-16	Cheque Book Autoreorder should be N
CAPM-ACS-COM-17	Invalid max Cheque rejections
CAPM-ACS-COM-18	Direct Banking Required should be N
CAPM-ACS-COM-19	Direct Banking Required should be Y
CAPM-ACS-COM-20	NULL Account number in Account status
CAPM-ACS-COM-21	NULL Branch Code in Account status
CAPM-ACS-COM-22	Invalid value for Status change automatic
CAPM-ACS-COM-23	Invalid value for No Debits
CAPM-ACS-COM-24	Invalid value for No Credits
CAPM-ACS-COM-25	Invalid value for Stop Payment
CAPM-ACS-COM-26	Invalid value for Dormant
CAPM-ACS-COM-27	Invalid value for Frozen
CAPM-ACS-COM-28	Current Status to be NORM in Account opening
CAPM-ACS-COM-29	Dormancy Parameter must be D(Debit) or C(Credit) or A(Any of Credit or Debit) or M(Manual)
CAPM-ACS-COM-30	Invalid date for Status Since
CAPM-ACS-COM-31	Cheque Leaves must be numeric
CAPM-ACS-COM-32	Invalid date for Order Date
CAPM-ACS-COM-33	First Cheque Number has to be numeric
CAPM-ACS-COM-34	Invalid value for Cheque leaves
CAPM-ACS-COM-36	Branch Code in Cheque Book request is empty"
CAPM-ACS-COM-37	Account number in Cheque Book request is empty
CAPM-ACS-COM-38	Cheque Book number in Cheque Book request is empty
CAPM-ACS-COM-39	Cheque number in Cheque Book request is empty

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
CAPM-ACS-COM-40	Leaf Number Status of Cheque Details cannot be empty
CAPM-ACS-COM-41	Interest Details must not be Empty/Null
CAPM-ACS-COM-42	Currency cannot be duplicated
CAPM-ACS-COM-43	Invalid value for Waive Interest
CAPM-ACS-COM-44	Invalid value for Open, can be Y or N
CAPM-ACS-COM-45	Invalid value for Variance
CAPM-ACS-COM-46	Duplicate Currency selected in MultiCurrency
CAPM-ACS-COM-47	Invalid Fund Utilization sequence
CAPM-ACS-COM-48	OD required in Account Class is N. AUF limit should not be entered
CAPM-ACS-COM-49	OD required in Account Class is N. AUF limit start date should not be entered
CAPM-ACS-COM-50	OD required in Account Class is N. AUF limit end date should not be entered
CAPM-ACS-COM-51	OD required in Account Class is N. AUF margin should not be entered
CAPM-ACS-COM-52	Invalid AUF limit start date
CAPM-ACS-COM-53	Invalid AUF limit end date
CAPM-ACS-COM-54	AufMargin must not be empty when Od FacReq is set to Y in Account Class
CAPM-ACS-COM-55	OD required in Account Class is N. TOD limit should not be entered
CAPM-ACS-COM-56	OD required in Account Class is N. TOD limit start date should not be entered
CAPM-ACS-COM-57	OD required in Account Class is N. TOD limit end date should not be entered
CAPM-ACS-COM-58	TodLimit is must not be empty when OdFacReq is set to Y in Account Class
CAPM-ACS-COM-59	Invalid TOD limit start date
CAPM-ACS-COM-60	Invalid TOD limit end date
CAPM-ACS-COM-61	OD required in Account Class is N. Day light limit should not be entered
CAPM-ACS-COM-62	Invalid Renew TOD
CAPM-ACS-COM-63	Renew TOD is N. Renew frequency should be NULL
CAPM-ACS-COM-64	Renew TOD is N. Renew unit should be NULL
CAPM-ACS-COM-65	Renew TOD is N. Next renewal limit should be NULL
CAPM-ACS-COM-66	Invalid Linkage reference
CAPM-ACS-COM-67	Linked Amount must be Numeric
CAPM-ACS-COM-68	Invalid Effective date
CAPM-ACS-COM-69	Account number different from the master
CAPM-ACS-COM-70	Currency different from the master
CAPM-ACS-COM-71	Invalid Provisioning and GL
CAPM-ACS-COM-72	Invalid Status
CAPM-ACS-COM-73	Invalid Debit GL
CAPM-ACS-COM-74	Invalid Credit GL
CAPM-ACS-COM-75	Propagate reporting GL is Y. Status should not be entered
CAPM-ACS-COM-76	Propagate reporting GL is Y. Debit GL should not be entered
CAPM-ACS-COM-77	Propagate reporting GL is Y. Credit GL should not be entered

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
CAPM-ACS-COM-78	Invalid Language Code
CAPM-ACS-COM-79	Account address is Empty / NULL
CAPM-ACS-COM-80	Address type is Empty / NULL
CAPM-ACS-COM-81	Order details is Empty / NULL
CAPM-ACS-COM-82	Invalid IBAN Account number
CAPM-ACS-COM-83	Invalid Product Code
CAPM-ACS-COM-84	Invalid UDE Currency
CAPM-ACS-COM-85	Invalid UDE element id
CAPM-ACS-COM-86	Invalid Rate Code
CAPM-ACS-COM-87	Invalid Calculation Account
CAPM-ACS-COM-88	Invalid Interest Booking Branch Code
CAPM-ACS-COM-89	Invalid Interest Booking Account
CAPM-ACS-COM-90	Effective date is before Account open date
CAPM-ACS-COM-91	Start date is before Account open date
CAPM-ACS-COM-92	Effective date is before Account open date
CAPM-ACS-COM-93	Status since should be Account open date
CAPM-ACS-COM-A1	AddressType length is more then 22.
CAPM-ACS-COM-A2	PostCode can not be blank and empty
CAPM-ACS-COM-A3	TownName can not be blank and empty
CAPM-ACS-COM-A4	Country can not be blank and empty
CAPM-ACS-COM-A5	Department length is out of limit
CAPM-ACS-COM-A6	SubDepartment length is out of limit
CAPM-ACS-COM-A7	StreetName length is out of limit
CAPM-ACS-COM-A8	BuildingNumber length is out of limit
CAPM-ACS-COM-A9	BuildingName length is out of limit
CAPM-ACS-COM-A0	Floor length is out of limit
CAPM-ACS-COM-B0	PostBox length is out of limit
CAPM-ACS-COM-B1	Room length is out of limit
CAPM-ACS-COM-B2	PostCode length is out of limit
CAPM-ACS-COM-B3	TownName length is out of limit
CAPM-ACS-COM-B4	TownLocationName length is out of limit
CAPM-ACS-COM-B5	DistrictName length is out of limit
CAPM-ACS-COM-B6	CountrySubDivision length is out of limit
CAPM-ACS-COM-B7	Country length is out of limit
CAPM-ACS-COM-C1	RealTimeLiquidity must be Y/N only

CAPM-ACS-COM-C3	ReferralRequired can be Y/N only
CAPM-ACS-COM-C4	ATM Required must be Y/N only
CAPM-ACS-COM-C5	Cheque Book Required must be Y/N only
CAPM-ACS-COM-C6	Cheque Book AutoReorder must be Y/N only
CAPM-ACS-VAL-U4	Minimum one address should be marked as default
CAPM-ACS-VAL-U5	Default address must have mail media
CAPM-ACS-VAL-C8	Invalid Advice

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
CAPM-ACS-VAL-70	Customer Number not valid
CAPM-ACS-VAL-71	Currency not valid
CAPM-ACS-VAL-72	Account Class not valid
CAPM-ACS-VAL-04	Account Number cannot be null.
CAPM-ACS-VAL-78	When the statement type is chosen as None then Cycle and On should not be captured.
CAPM-ACS-VAL-79	Primary Cycle must not be Empty/Null
CAPM-ACS-VAL-80	Primary On must not be Empty/Null
CAPM-ACS-VAL-S2	Primary Statement Format must not be Empty/Null
CAPM-ACS-VAL-R1	Primary Swift Address required only when Swift Required is set to Y
CAPM-ACS-VAL-S4	Primary Statement Swift Address must not be Empty/Null
CAPM-ACS-VAL-82	Secondary Cycle must not be Empty/Null
CAPM-ACS-VAL-93	Invalid Primary Cycle
CAPM-ACS-VAL-S5	Secondary Statement Format must not be Empty/Null
CAPM-ACS-VAL-R2	Secondary SwiftAddress required only when Swift Required is set to Y
CAPM-ACS-VAL-S7	Secondary Swift Address must not be Empty/Null
CAPM-ACS-VAL-86	Tertiary On must not be Empty/Null
CAPM-ACS-VAL-S8	Tertiary Statement Format must not be Empty/Null
CAPM-ACS-VAL-R3	Tertiary Swift Address required only when Swift Required is set to Y
CAPM-ACS-VAL-R0	Tertiary Swift Address must not be Empty/Null
CAPM-ACS-VAL-94	Invalid Secondary Cycle
CAPM-ACS-VAL-95	Invalid Tertiary Cycle
CAPM-ACS-VAL-27	Language Code does not match from the LOV.
CAPM-ACS-VAL-E8	Branch Date is null
CAPM-ACS-VAL-E9	Amount not valid
CAPM-ACS-VAL-F0	Effective Date is not valid
CAPM-ACS-VAL-F1	Effective date should not be before branch date
CAPM-ACS-VAL-F2	Expiry Date date should not be before branch date
CAPM-ACS-VAL-F3	Expiry Date date should not be before effective date
CAPM-ACS-VAL-S0	Duplicate sub account currency not allowed
CAPM-ACS-VAL-34	Customer Name cannot be null.
CAPM-ACS-VAL-35	Party Type cannot be null
CAPM-ACS-VAL-36	Country of Incorporation cannot be null.
CAPM-ACS-VAL-37	Date of Incorporation cannot be null
CAPM-ACS-VAL-38	Place of Incorporation cannot be null
CAPM-ACS-VAL-39	KYC status cannot be null
CAPM-ACS-VAL-40	Preferred language cannot be null
CAPM-ACS-VAL-41	Media in Customer Address Maintenance cannot be null
CAPM-ACS-VAL-42	Address Type in Customer Address Maintenance cannot be null
CAPM-ACS-VAL-43	Country code value does not match from the LOV API
CAPM-ACS-VAL-44	Preferred Language does not match from the LOV.
CAPM-ACS-VAL-45	House/Building, city, zip code, email address and state cannot be null
CAPM-ACS-VAL-46	Mail address is mandatory

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
CAPM-ACS-VAL-47	Swift, mobile, fax or phone either one should be have details.
CAPM-ACS-VAL-C7	Reporting GL must contain atleast one NORM status during SAVE
CAPM-ACS-VAL-G3	Stop Payments Type should be A or C
CAPM-ACS-VAL-G4	Effective Date is not valid
CAPM-ACS-VAL-G5	Effective date should not be before branch date
CAPM-ACS-VAL-G6	Expiry Date date should not be before branch date
CAPM-ACS-VAL-G7	Expiry Date date should not be before effective date
CAPM-ACS-VAL-N8	Record already Handed off
CAPM-ACS-VAL-N9	Failed to parse data to ProductProcess due to network issue
CAPM-ACS-VAL-T1	Customer Number not generated
PLATO-EVNT-001	Failed to update
PLATO-EVNT-002	Record already exists
CAPM-ACS-VAL-05	Cannot have Request Reference Number for empty Card Products.
CAPM-COM-020	Unable to get Sub-domain info from Transaction Controller
CAPM-ACS-VAL-H9	\$1 is an invalid branch code
CAPM-ACS-VAL-H8	Chequebook required flag is disabled for account \$1
CAPM-ACS-COM-J0	Failed to get amount block details
CAPM-ACS-COM-J1	Error while get amount block details
CAPM-ACS-COM-J2	Failed to post amount block details
CAPM-ACS-COM-J3	Error while post amount block details
CAPM-ACS-COM-J4	Failed to update amount block details
CAPM-ACS-COM-J5	Error while amend amount block details
CAPM-ACS-COM-J6	Failed to close amount block
CAPM-ACS-COM-J7	Error while close amount block
GCS-AUTH-01	Record Successfully Authorized
GCS-AUTH-02	Valid modifications for approval were not sent. Failed to match
GCS-AUTH-03	Maker cannot authorize
GCS-AUTH-04	No Valid unauthorized modifications found for approval.
GCS-AUTH-05	Failed to Authorize the record
GCS-CLOS-002	Record Successfully Closed
GCS-CLOS-01	Record Already Closed
GCS-CLOS-02	Record Successfully Closed
GCS-CLOS-03	Unauthorized record cannot be closed, it can be deleted before first authorization
GCS-CLOS-04	Failed to Close the record
GCS-COM-001	Record does not exist
GCS-COM-002	Invalid version sent, operation can be performed only on latest version
GCS-COM-003	Please Send Proper ModNo
GCS-COM-004	Please send makerId in the request
GCS-COM-005	Request is Null. Please Resend with Proper SELECT
GCS-COM-006	Unable to parse JSON
GCS-COM-007	Request Successfully Processed
GCS-COM-008	Modifications should be consecutive.

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
GCS-COM-009	Resource ID cannot be blank or "null".
GCS-COM-010	Successfully canceled \$1.
GCS-COM-011	\$1 failed to update.
GCS-COM-012	Error saving child datasegment, Master validation failed
GCS-COM-013	Error saving the datasegment
GCS-COM-014	Error validating the datasegment
