Oracle® Banking Accounts Cloud Service

Nostro Reconciliation User Guide

Oracle Banking Accounts Cloud Service Nostro Reconciliation User Guide, Release 14.8.1.0.0

G44796-01

Copyright © 2023, 2025, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Purpose

The **Nostro Reconciliation User Guide** assists in understanding the Nostro functionality offered as a part of the Oracle Banking Corporate Accounts Cloud Service. It provides an overview of the Nostro features as well as instructions to create and maintain a Nostro account.

Audience

This user guide is intended for users who carry out the following roles within a bank.

Table 1 User Roles

User Role	Function
Back office clerk	Input functions for contracts
Back office managers/officers	Authorization functions
End of Day operators	Process at the End of Day or the Beginning of Day
Financial Controller/Product Managers	Generation of reports
Product Managers	Product definition and authorization

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related Documents

The related documents are as follows:

- Getting Started User Guide
- Oracle Banking Common Core User Guide
- Account Configurations User Guide
- Security Management System User Guide

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which user supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that user enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

Table 2 Commonly Used Acronyms and Abbreviations

Abbreviation	Definition
BBAN	Basic Bank Account Number
CIF	Customer Information File

Table 2 (Cont.) Commonly Used Acronyms and Abbreviations

Abbreviation	Definition
DDA	Demand Deposit Accounts
EAC	External Account Check
ECA	External Credit Approval
EOD	End of Day
GL	General Ledger
IBAN	International Bank Account Number
KYC	Know Your Customer
LOV	List of Values
SWIFT	Society for Worldwide Interbank Financial Telecommunications

Basic Actions

This basic actions that can be performed on a screen are described in the following table.

Table 3 Basic Actions

Action	Description
Approve	Approve the initiated record. This option displays when the user clicks Authorize .
Audit	View the maker details, checker details, and record status.
Authorize	Authorize the record created. A maker of the screen is not allowed to authorize the record. Only a checker can authorize a record, created by a maker.
Cancel	Cancel the performed action.
Close	Close a record. This action is available only when a record is created.
Collapse All	Hide the details in the sections. This option displays when the user clicks Compare .
Compare	View the comparison through the field values of old record and the current record. This option displays in a widget when the user clicks Authorize .
Confirm	Confirm the performed action.
Expand All	Expand and view all the details in a section. This option displays when the user clicks Compare .
New	Add a new record. When the user clicks New , the system displays a new record to specify the required data.
ок	Confirm the details on the screen.
Reject	Reject the record created. A maker of the screen is not allowed to reject the record. Only a checker can reject a record, created by a maker.
Save	Save the details entered or selected in the screen.
Unlock	Update the details of an existing record. System displays an existing record in the editable mode.
View	View the record details in a particular modification stage. This option displays in the widget when the user clicks Authorize . This option is also displayed in the Tile menu.

Table 3 (Cont.) Basic Actions

Action	Description
View Difference only	View a comparison through the field element values of old record and the current record, which has undergone changes. This option is displayed when the user clicks Compare .

Note

The user must specify values for all the mandatory fields and they are marked as Required in the User Interface.

Symbols and Icons

The following symbols and icons are used in the screens.

Nostro Reconciliation Overview

The Nostro Reconciliation module is provided as part of the Oracle Banking Corporate Accounts.

The module allows the collection, management, and reconciliation of external and internal credit and debit transactions for Nostro accounts. Nostro accounts are held by a bank in another financial institution in a foreign currency, to facilitate international transactions.

The Nostro Reconciliation Module helps banks ensure that their internal records of transactions and balances in Nostro accounts match the records in external banks or financial institutions where the accounts are held. The reconciliation process is crucial to maintain accurate financial records, identify discrepancies or errors in transactions, and ensure compliance with regulatory requirements.

The following reconciliation tasks can be automated using the Nostro Reconciliation module:

- Capture debit and credit entries of internal and external transactions.
- Reconcile and match the corresponding entries of internal and external transactions.

(i) Note

The reconciliation module also allows manual reconciliation of the transaction entries.

Benefits of the Nostro Reconciliation Module

The reconciliation module prevents over-funding of Nostro accounts or excessive use of credit lines for payments settled in a different time zone by providing visibility and predictability on IN and OUT transactions on a day-to-day basis.

The benefits are:

- Reduce costs by enabling liquidity optimization
- Release payments early while reducing recalls and liquidity risks
- Identify transactions that are unexpected or possibly pending
- Manual resolution to reduce the following:
 - Post-settlement Investigations
 - Investigations of unreconciled or unconfirmed entries
- Reduce expensive claims when invoicing monthly payment processing fees

Nostro Reconciliation Work flow

The following image illustrates the Nostro reconciliation of three debit transactions of thousand, two thousand, and five thousand dollars from the Nostro account of Bank A held with Bank B. A Rule definition (Rule 1) helps reconcile the internal and external entries for these transactions. Rule 1 allows a tolerance limit of less than or equal to fifty dollars between the aggregated internal and external entries. The first two transactions pass the automatic matching of the transaction entries. Automatic reconciliation fails for the debit transaction of

five thousand dollars because the aggregation of external entries exceeds the tolerance limit of five thousand, when a service charge of hundred dollars is added.

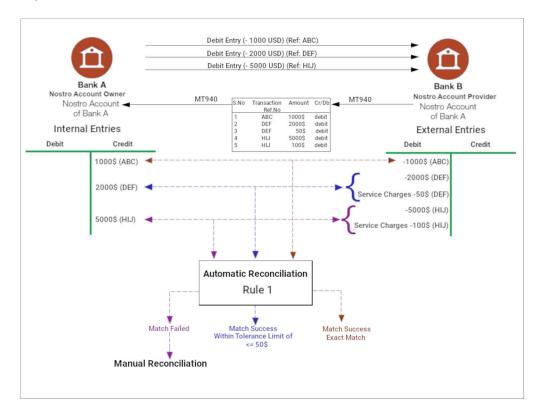

Figure 1-1 Nostro Reconciliation Work flow

Reconciliation Requirements

To automatically reconcile internal and external entries, the system needs to determine the type of reconciliation and the method to perform the reconciliation. How to perform a reconciliation is provided by a rule definition. There can be many possible transaction scenarios. A Rule decision determines the type of reconciliation required and suggests the appropriate rule definition.

Table 1-1 Nostro Entities

Nostro Entity Name	Description
Reconciliation Product	Determines the reconciliation type to be applied and the tolerance limits for different currencies. The reconciliation types are Mirroring and Replication.
Rule Definition	Specifies how to match and reconcile internal and external entries.
Rule Decision	Considers the transaction details and applies the appropriate rule.

• Rule Definitions

A rule definition helps identify the internal transaction entries and external statement entries to reconcile and the reconciliation rules to match the identified entries.

1.1 Rule Definitions

A rule definition helps identify the internal transaction entries and external statement entries to reconcile and the reconciliation rules to match the identified entries.

A rule definition is a function of conditional and mathematical operators composed with the attributes of the internal and external entries.

Use the following properties and methods to identify the internal and external entries that need reconciliation:

- Internal Reference Number
- External Reference Number
- Value Date of a transaction
- Aggregation of internal and external entries

(i) Note

To view the list of all internal and external attributes and their descriptions, see Internal and External Entry Attributes.

User can create any number of reconciliation rules according to the requirements using these internal and external transaction entry parameters.

Reconcile Entries by Using the Value Date

There are two possibilities to identify and reconcile the entries using Value Date:

- Values Date for the internal and external entries are the same.
- Values Date for the internal and external entries are within a threshold number of days.

Reconcile Entries by Matching Reference Number

There are two possibilities when entries are reconciled by matching Reference Numbers.

- Matching references numbers of a transaction generated by the internal and external banking entities.
- Partially matching reference numbers of a transaction generated by the internal and external banking entities.

A partially matching transaction reference number occurs when the external banking entity generates reference numbers that are differing in length. Reference numbers that are greater in length are truncated and then stored. In such a case a partial match is more useful than a full match.

Reconcile Entries by Using Transaction Amounts

There are four possibilities when using transaction amounts to reconcile internal and external entries. For some transactions, aggregation of amounts in different internal or external entries for the same transaction is required before the amounts are reconciled.

- Amount in the internal and external entries are the same.
- Amount in the internal and external entries are within a tolerance limit.
- Aggregated amounts in the internal and external entries are the same.
- Aggregated amount in the internal and external entries are within a tolerance limit.

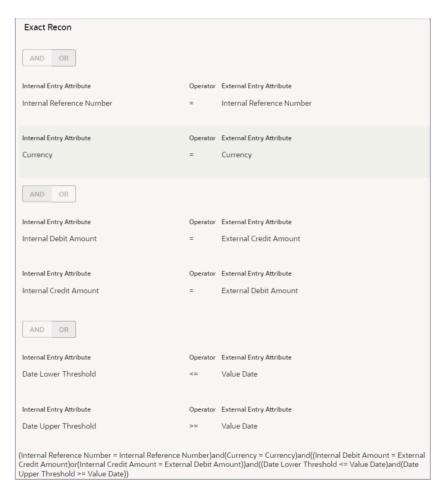

Examples of Rule Definition

The following examples illustrate the combination of rules to form a rule definition for different scenarios.

Matching reference numbers, Value Date thresholds, and Matching Amounts In this example rule definition the following rules are implemented:

- Internal and external reference numbers are the same.
- Value date of the external entry occurs on or between the lower and upper threshold dates.
- Internal Debit amount should be equal to external Credit amount or the Internal Credit amount should be equal to the external Debit amount

Figure 1-2 Example Rule Definition

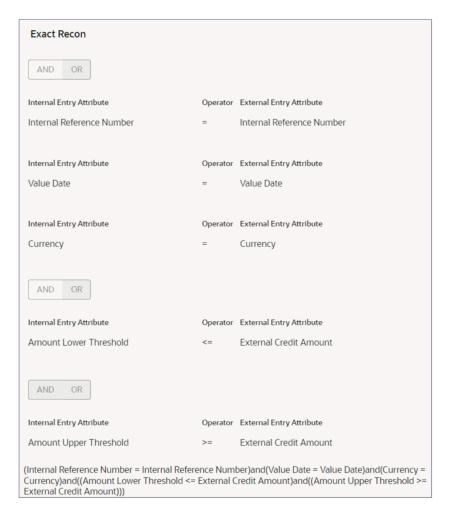

The rule is expressed in the following functional notation:

Matching Reference Numbers, Matching Value Dates, and Threshold Amounts on External Credit Entry

In this example rule definition the following rules are implemented:

- Internal and external reference numbers are the same.
- Internal and external value dates are the same.
- External Credit amount is between the upper and lower amount thresholds.

Figure 1-3 Example Rule Definition

The rule is expressed in the following functional notation:

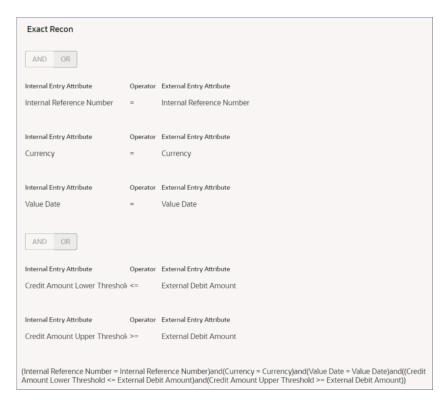

```
(Internal Reference Number = Internal Reference Number)and(Value Date = Value
    Date)and(Currency = Currency)and((Amount Lower Threshold <= External
Debit Amount)and((Amount
    Upper Threshold >= External Debit Amount)))
```

Matching Reference Numbers, Matching Value Dates, and Internal Credit Threshold Amounts on External Debit Entry

In this example rule definition the following rules are implemented:

- Internal and external reference numbers are the same.
- Internal and external value dates are the same.
- External Debit amount is between the upper and lower internal credit amount thresholds.

Figure 1-4 Example Rule Definition

The rule is expressed in the following functional notation:

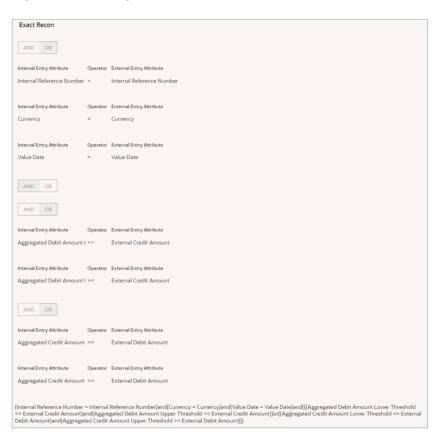

Matching Reference Numbers, Matching Value Dates, Internal Aggregated Credit and Debit Threshold Amounts on Aggregated External Credit Entries, and Aggregated External Debit Entries

In this example rule definition the following rules are implemented:

- Internal and external reference numbers are the same.
- Internal and external value dates are the same.
- Aggregated external credit amount is between the upper and lower aggregated internal debit amount threshold.
- Aggregated external debit amount is between the upper and lower aggregated internal credit amount threshold.

Figure 1-5 Example Rule Definition

The rule definition is expressed in the following functional notation:

```
(Internal Reference Number = Internal Reference Number)and(Currency = Currency)and(Value Date
```

= Value Date)and(((Aggregated Debit Amount Lower Threshold <= External
Credit</pre>

Amount)and(Aggregated Debit Amount Upper Threshold >= External Credit Amount))or((Aggregated

Credit Amount Lower Threshold <= External Debit Amount)and(Aggregated Credit Amount Upper

Threshold >= External Debit Amount)))

Support reconciliation based on Partial Reference Number

In this example rule definition the following rules are implemented:

• If the reference numbers, both internal and external, do not match, the system performs partial matching based on the given reference numbers.

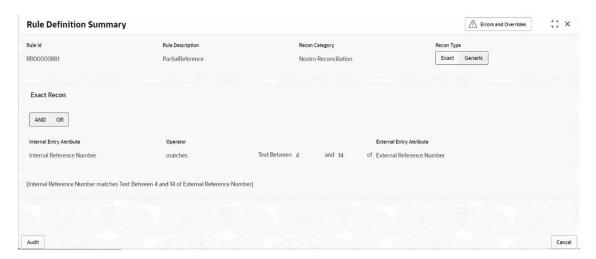

- Trying to match INT_REF of internal side with EXT_REF of external side.
- Internal reference number matches the text between 4 and 14 of the external reference number.

INT_REF BS1400024CR

EXT_REF EXTBS1400024CR

Figure 1-6 Example of Rule Definition

The rule definition is expressed in the following functional notation:

INT_REF MATCHES SUBSTR (EXT_REF 4 14)

Nostro Configurations

To map and reconcile the internal and external entries, configure the banking entities to facilitate Nostro account management requirements.

The following common Account configurations are necessary before configuring Nostro Account entities:

Bank Parameters

Bank Parameters capture basic information about a bank, such as its name, head office location, account number structure, local currency, and similar details.

Branch Parameters

Branch Parameters capture the various branches of a bank, their reporting hierarchy, branch names and location, SWIFT, TELEX, and HOST addresses, and similar information. Configurations maintained in the Branch Parameters supersede similar configurations in the Bank Parameters.

Corporate Account Category

An Account Category is a logical grouping of account classes that define a business process.

Account Class

An Account Class represents a group of customer accounts. Classify the customer accounts of a bank into different groups and assign each group an identifying code.

Business Process

Business Process configuration builds a work flow by defining the stages of origination of a corporate account . For each step, specify the data capture segments, checklist elements, documents to be submitted, and advice.

Customer GL

Customer GLs reflect the balances in the customer account.

Overrides Configuration

The system displays only the Error Codes that are maintained for the Source Code value - ALL.

Queue Maintenance

Errors that occur when processing the ECA or EA. They map to different categories like Account validation exceptions, Balance exceptions, Limit exceptions, and so on..

Revaluation Setup

Revaluation is the process of revaluing the funds in each foreign currency account. A revaluation setup is required to run the revaluation process and perform the appropriate maintenance(s).

Source Code

A Source Code uniquely defines the origin of a transaction.

Status Code

An Account class can have many Status Codes assigned to it. The Status Codes apply to all accounts that use the account class.

Transaction Code

A transaction code associates an accounting entry with a transaction and uniquely identifies it.

① Note

To know more about the common account configuration, refer to the **Account Configuration** section of the *Oracle Banking Corporate Accounts User Guide*.

The following configuration parameters are necessary to facilitate Nostro Reconciliations:

Nostro Account Class

The Nostro account class helps configure the information specific to Nostro accounts. Configure the Statement and Account Preferences, and GL Reporting Lines that propagate to Nostro accounts.

Nostro Reconciliation Product

Reconciliation Products are unique across bank branches. Accounting entities reconcile transaction entries using a reconciliation product. To use a Reconciliation product, use the product code.

External Account

An external entity in the Nostro account is a bank or an organization. An external entity can have several external accounts. A reconciliation product is associated with an external account, and together they map to one or more internal Nostro accounts.

Rule Definition

Reconciliation rule definitions specify rules to match the internal and external transactions. The rules are defined using the attributes of internal and external transaction entries.

Rule Decision

Rule decisions consider the different conditions and reconciliation products associated with the Nostro account and provide the decision to apply rule definitions.

For more information on creating and viewing Nostro configuration parameters, see:

Nostro Account Classes

Create and view Nostro Account Classes by following the instructions provided in this section.

Nostro Reconciliation Products

Create and view Nostro Reconciliation Products by following the instructions provided in this topic.

External Accounts

View External Accounts by following the instructions provided in this topic.

Nostro Rule Definitions

Create and view Nostro Rule Definitions by following the instructions provided in this section.

Nostro Rule Decisions

Create and view Nostro Rule Decisions by following the instructions provided in this section.

2.1 Nostro Account Classes

Create and view Nostro Account Classes by following the instructions provided in this section.

Create Account Class

An accounting class helps to categorize a bank's customers into different groups and captures information specific to that group. Create a Nostro account class by following the instructions provided in this topic.

View Account Classes

View the Nostro account classes by following the instructions in this topic.

2.1.1 Create Account Class

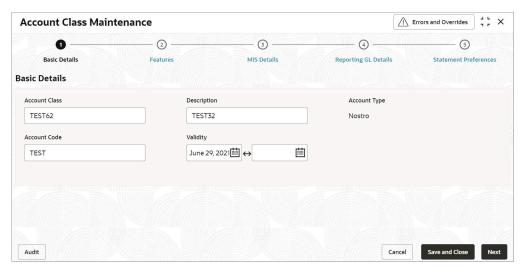

An accounting class helps to categorize a bank's customers into different groups and captures information specific to that group. Create a Nostro account class by following the instructions provided in this topic.

A Nostro account class is required to create a Nostro account. The *GL Reporting Lines and Statement* and *Account Preferences* configured in the account class propagate to the Nostro account.

 From Nostro Account Configuration. Under Nostro Account Configuration, click Account Class, and then Create.

The **Create** page opens on the **Basic Details** page.

Figure 2-1 Create Nostro Account Class - Basic Details

2. Specify the details on the **Basic Details** page. For more information on fields, refer to the field description table.

Table 2-1 Field Description table - Basic Details

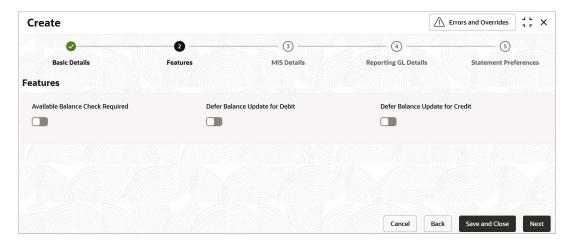

Field	Description
Account Class	Specify the Nostro account class name to be maintained. This indicates the class code used to create Nostro accounts.
Account Code	Provide an account code with a maximum of four characters. Use the bank's specification for character classes to classify different customer groups. Note: The account code can be a part of the customer account mask used to generate the account number.
Description	Describe the account class.
Validity	Specify the validity period of the account class by selecting the start and end dates. The end date is optional.
Account Type	This field is auto-populated and cannot be changed. It has a fixed value NOSTRO account type.

Click Next.

The **Features** page displays.

Figure 2-2 Create Account Class - Features

Select the Features to enable. For more information on fields, refer to the field description table.

Table 2-2 Field Description table - Features

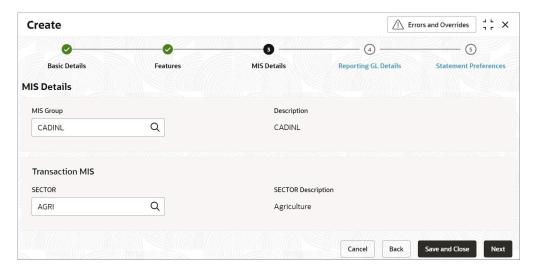

Feature	Description
Available Balance Check Required	Select this option to check available funds in the customer's account before posting a debit entry.
Defer Balance Update for Debit	Select this option to defer balance updates for debit transactions. If selected, the balance after debit transactions updates at the end of the day.
Defer Balance Update for Credit	Select this option to defer the balance update for credit transactions. If selected, the balance after credit transactions updates at the end of the day.
Multi-Currency Allowed	Enable this feature to permit an account to conduct transactions in various currencies. The available currencies are set in advance.

5. Click Next.

The MIS Details page displays.

Figure 2-3 Create Account Class - MIS Details

Specify the field values on the MIS Details page. For more information on fields, refer to the field description table.

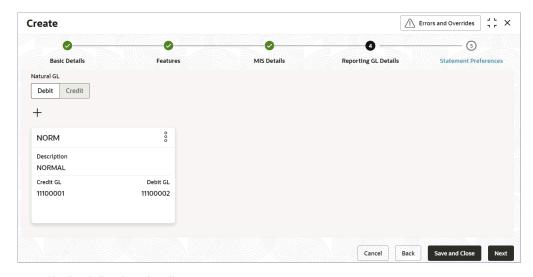

Table 2-3 Field Description table - MIS Details - Create Account Class

Field	Description
MIS Group	Specify the MIS classes for different industry verticals.
Description	Describe the MIS group specified. This field is auto-populated.
MIS Class Code	Specify the MIS Class code associated with the selected MIS Group.
SECTOR	Specify the sector to be associated with the MIS Group.
SECTOR Description	Describes the Sector specified. This field is auto-populated.

Click Next.

The **Reporting GL Details** page displays.

Figure 2-4 Create Account Class - Reporting GL Details

8. Specify the following details

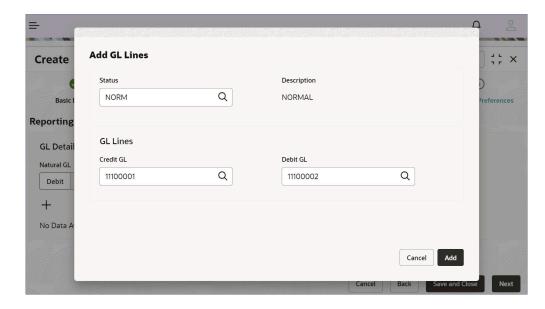

Natural Ledger: Specify if the General Ledger is for a Debit or Credit.

- a. Click Debit or Credit,
- b. Click Add to add a general ledger line.

The Add GL Lines dialog displays.

Figure 2-5 Add GL Lines

For more information on fields, refer to the field description table.

Table 2-4 Field Description: Add GL Lines

Field	Description
Status	Select the Status of the new GL Lines. Click the Fetch icon and retrieve the required value.
Description	Describes the status and this field is auto-populated.
Credit GL	The General Ledger code for the credit line.
Debit GL	The General Ledger code for the debit line.

Click Save.

The dialog closes and returns to the **Reporting GL Details** page. A new row is added with the specified GL Line details.

Click Next.

The **Statement Preferences** page displays.

Create Errors and Overrides 6 MIS Details **Basic Details** Features Reporting GL Details Statement Preferences **Statement Preferences** Primary Account Statement Statement Type Cycle Statement Format None Summary Q Weekly - Mon PrimaryStmt Swift Required Swift Message Type Q MT950 Back

Figure 2-6 Create Account Class - Statement Preferences

10. Provide the statement preference details. For more information on fields, refer to the field description table.

Table 2-5 Field Description : Statement Preferences

	ı
Field	Description
Statement Type	 None: Select this option if statements are not required for this account class. Summary: Select this option for a statement summary. Provide the frequency of statements, statement format, and the SWIFT format type (optional). Detailed: Select this option for a detailed statement. Provide the frequency of statements, statement format, and the SWIFT format type (optional).
Cycle	Specify the frequency of statements generated. Click the Calendar icon and select the frequency from the drop-down. Select from <i>Daily</i> , <i>Weekly</i> , <i>Fortnightly</i> , and <i>Monthly</i> . Specify the weekday or day of the month for the statement cycle.
Statement Format	Specify the format of the account statement. Click the Fetch icon to open the Statement Format dialog. Select the required format. This field is available only when Statement Type is <i>Summary</i> or <i>Detailed</i> .
Swift Required	Toggle the switch On to generate the statement in the SWIFT format. Select the SWIFT message type. This field is available only when Statement Type is Summary or Detailed .
Swift Message Type	Specify the SWIFT message type to generate. This field is available only when Swift Required toggle is on.

11. Click Next.

The **Restrictions** screen displays. Restrictions is an option provided to the Bank to allow the usage of the account class during account creation to a specific set of Branches, Currencies, Transaction codes and Customer categories. And also Bank can add the entitlement groups as well.

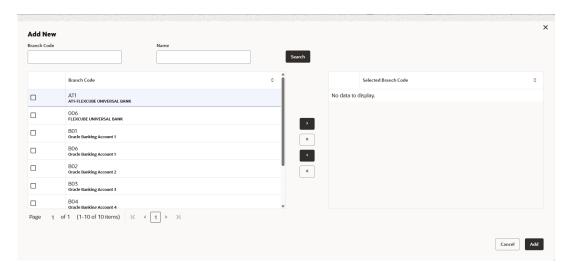

Figure 2-7 Create Account Class - Restrictions

12. Expand Branch and click Add.

The Add New screen displays.

Figure 2-8 Restriction - Branch - Add New

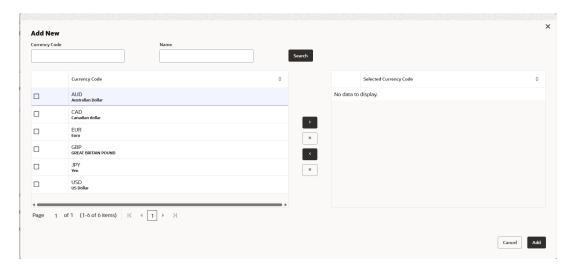

- 13. Select Branch Code check box from the list and click . Click Add.
- 14. Expand Currency, select Disallowed, and click Add.

The Add New screen displays.

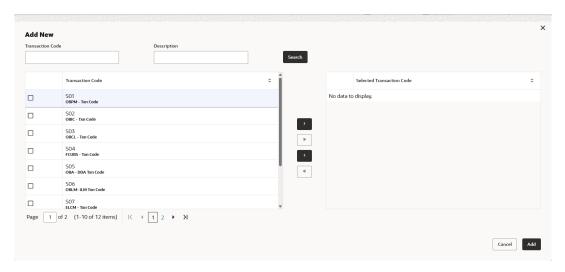

Figure 2-9 Restrictions - Currency - Add New

- 15. Select the Currency Code checkbox from the list and click . Click Add.
- 16. Expand Transaction Code and click Add.

The Add New screen displays.

Figure 2-10 Restrictions - Transaction Code - Add New

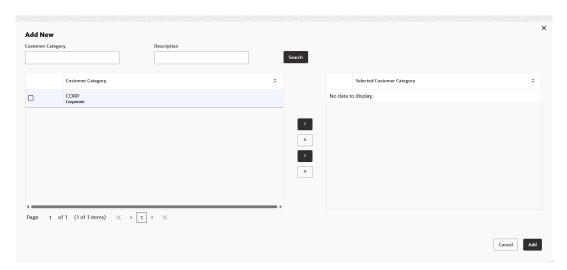

- 17. Select all Transaction Code check boxes and click . Click Add.
- 18. Expand Customer Category and click Add.

The Add New screen displays.

Figure 2-11 Restrictions - Customer Category - Add New

- 19. Select Customer Category check box and click . Click Add.
- 20. Expand Entitlement.

The **Entitlement** screen displays. Banks are provided with an option to add the entitlement groups instead of adding the other product processor restrictions directly.

Figure 2-12 Restrictions - Entitlement

21. Provide the Entitlement details:

Table 2-6 Entitlement - Field Description

Field	Remarks
Payment Group	Payment Entitlement
Branch Group	Branch Entitlement

22. Click Save and Close.

The new account class for Nostro is created.

At this point, the status of the new account class is *Unauthorized*. A user with a supervisor role has to approve the account class. After approval, the status changes to *Authorized*, and the account class is available for use by another process.

23. Approve the Account Class.

To approve or reject the Account Class, see Approve Account Class.

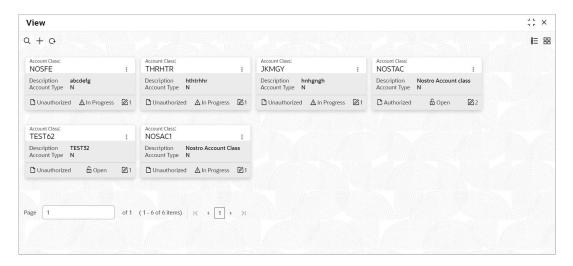

As a maker of this record, user cannot approve it. It should be approved by another user with a Supervisor role.

2.1.2 View Account Classes

View the Nostro account classes by following the instructions in this topic.

From Nostro Account Configuration click Account Class, and then View.
 The View page displays the Account Classes.

Figure 2-13 View Account Class - Tile View

For more information on fields, refer to the field description table:

Table 2-7 Account Class Tile - Field Description

Field	Description
Account Class	Displays the Account Class name.
Description	Displays the description of the Account Class.
Account Type	Displays the Account Class Type.
Status	Displays the status details of the record.

The following table describes the action items in the More Options (i) menu and the action items on the page.

Table 2-8 Action Items Description

Action Item	Description
Unlock	Unlock the component and make amendments.
Close	Close a component to prevent it from being unlocked and amended.
Сору	Copy a record and launch the Account Class Maintenance screen in edit mode.
View	View the details of a component.
Delete	Delete the component. Note: Once deleted, the component can no longer be used to define a product. But products already defined using the component can continue to use it.
Reopen	Reopen a closed component.
Authorize	Authorize a component to make it active and available to define products. Note: Creator of a component cannot authorize the component. Another user with authorize permissions can.
Audit	Select to view the Maker, Checker, Status, and Modification Number.
Error & Overrides	Select to view all existing errors or warnings on the page.

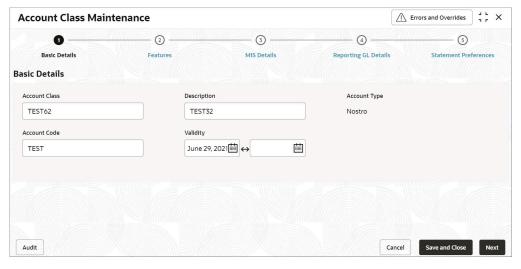

① Note

The actions the user can perform depend on role and the record status.

- 2. Unlock and update an Account Class.
 - a. Click : and select Unlock.

The Basic Details screen in the Account Class Maintenance page displays.

Figure 2-14 Unlock an Account Class

- b. Update the required fields on the Basic Details screen.
- c. Click the required data entry screens listed at the top of the page and make the required changes.

d. Click Save & Close.

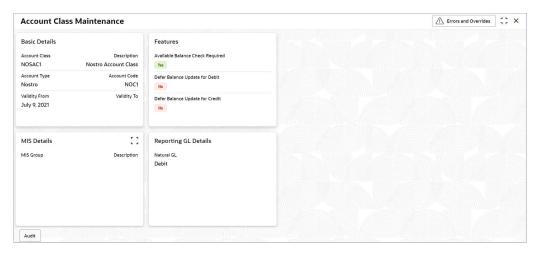

(i) Note

To know more about updating the data entry screens, see Create Account Class.

- 3. View the details of an Account Class.
 - a. Click and select View.

The **Account Class Maintenance** page displays the account class data screens in different tiles.

Figure 2-15 Account Class Maintenance - View an Account Class Details

b. Click Expand in the MIS Details tile.

The MIS Details dialog displays.

c. Click Summary for a statement type listed in the Statement Preferences tile.

The **Statement Preference Details** dialog displays the preferences summary.

- 4. Approve or Reject an unauthorized Account Class.
 - a. From the Search Filter, search for the required record that is in an Unauthorized and Open state.
 - b. Click and select Authorize.

The View page displays.

Figure 2-16 Approve the Record

For more information on fields, refer to the field description table:

Table 2-9 Authorize View

Field Name	Description
Mod Number <n></n>	Indicates the number of times the record was modified. Where N represents the number of modifications. Note: For a newly created record the modification number is 1 .
Done By	Name of the user who performed the latest modification.
Done On	Date on which the record was modified.
Record Status	The status of the record. Note: To authorize a record, its status should be Open.
Once Auth	Specifies if the record was authorized at least once. Note: For a newly created record, the value is No.
Compare (Button)	Click to compare the modified record with the previous version of the record.
View (Button)	Click to display the record details.

- c. Click the check box besides **Mod Number<N>** to select the modified record.
- d. Click Approve or Reject.

The Confirm dialog displays.

e. Specify any remarks and click Confirm.

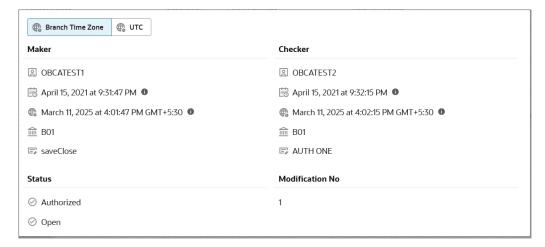

A toast message confirms the successful approval or rejection of the record.

f. On the View screen, click Audit.

The following screen displays. This screen displays Date and Time details of the Branch.

2.2 Nostro Reconciliation Products

Create and view Nostro Reconciliation Products by following the instructions provided in this topic.

- Create Nostro Reconciliation Product
 Create a Reconciliation Product by following the instructions provided in this topic.
- <u>View Reconciliation Products</u>
 View the Reconciliation Products by following the instructions in this topic.

2.2.1 Create Nostro Reconciliation Product

Create a Reconciliation Product by following the instructions provided in this topic.

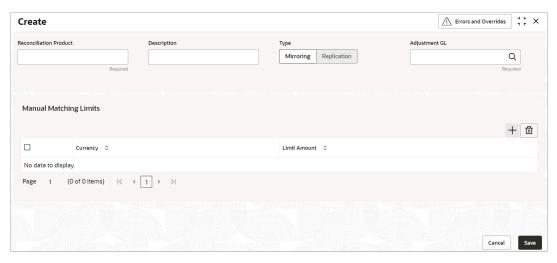

Reconciliation Products are unique for a bank and capture attributes that are essential to perform reconciliations. Some of the attributes are:

- Reconciliation type
- Manual matching limits
- 1. From Nostro Account Configuration click Nostro Reconciliation Product, and then Create.

The Create page displays.

Figure 2-19 Create Reconciliation Product

2. Specify the details on the **Create** page. For more information on fields, refer to the field description table.

Table 2-10 Field Description table - Create Reconciliation Product

Field	Description
Reconciliation Product	Specify a four characters code for the reconciliation product.
Description	Describe the reconciliation product. Note: It is good practice to include the product code in the description.
Туре	 Select the type of reconciliation from the following: Mirroring: In this type of reconciliation, the internal entries are mirrored by the external entries. An internal credit is represented as debit by the external entry. Similarly, an internal debit is represented as credit by the external entry. Replication: In this type of reconciliation, the internal entries are replicated by the external entries. An internal credit is represented as credit by the external entry. Similarly, an internal debit is represented as debit by the external entry. Note: The Reconciliation type determines how the reconciliation is implemented in the Rule Definition.
Adjustment GL	Specify the general ledger used for adjustments. Click Fetch to open the Adjustment GL page, search and select the required GL Code to post adjustments.
Manual Matching Limits	Specify the amount tolerance when manually matching reconciled entries in a currency. Amount tolerance is separate for each currency.

To add a Manual matching limits:

a. Click Add.

A new blank row displays.

- b. Double click a **Currency** column to open it in edit mode.
- c. Click Fetch.
- d. Select the required currency from the list. The currency is added to the Currency column.
- e. Double click the Limit Amount column to make it editable.
- Specify the required amount.
- g. Repeat the above steps to add matching limits for additional currencies.
- 3. Click Save.

The new Reconciliation Product is created.

Note

At this point, the status of the new reconciliation product is *Unauthorized*. A user with a supervisor role has to approve the reconciliation product. After approval, the status changes to *Authorized*, and the reconciliation product is available for use by another process.

4. Approve the Reconciliation Product.

To approve or reject the Reconciliation Product, see Approve Reconciliation Product.

Note

As a maker of this record, the user cannot approve it. It should be approved by another user with a Supervisor role.

2.2.2 View Reconciliation Products

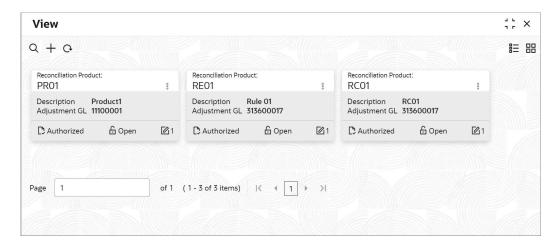

View the Reconciliation Products by following the instructions in this topic.

 From Nostro Account Configuration click Nostro Reconciliation Product, and then View.

The View page displays the Reconciliation Products in tiles view.

Figure 2-20 Nostro Reconciliation Products - Tiles View

✓ **Tip**Click ⊞ or ☷ to switch between the **Tile** view and the **List** view.

For more information on fields, refer to the field description table:

Table 2-11 Nostro Reconciliation Product Tile - Field Description

Field	Description
Reconciliation Product	Displays the four characters code for the reconciliation product.
Description	Describes the Reconciliation Product.
Adjustment GL	Displays the general ledger used for adjustments.
Status	Displays the status details of the record.

The following table describes the action items in the More Options (a) menu and the action items on the page.

Table 2-12 Action Items Description

A ation Itams	Description
Action Item	Description
Unlock	Unlock the component and make amendments.
Close	Close a component to prevent it from being unlocked and amended.
Сору	Copy a record and launch the Reconciliation Product Maintenance screen in edit mode.
View	View the details of a component.
Delete	Delete the component. Note: Once deleted, the component can no longer be used to define a product. But products already defined using the component can continue to use it.
Reopen	Reopen a closed component.

Table 2-12 (Cont.) Action Items Description

Action Item	Description
Authorize	Authorize a component to make it active and available to define products. Note: Creator of a component cannot authorize the component. Another user with authorize permissions can.
Audit	Select to view the Maker, Checker, Status, and Modification Number.
Error & Overrides	Select to view all existing errors or warnings on the page.

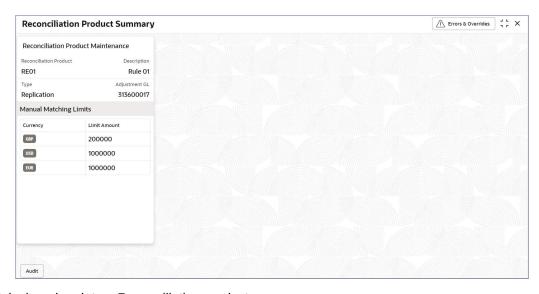

(i) Note

The actions the user can perform depend on role and the record status.

- 2. View a Reconciliation Product details.

2.4 Nostro Rule Definitions

Create and view Nostro Rule Definitions by following the instructions provided in this section.

Create Rule Definition

Reconciliation rule definitions specify rules to match the internal and external transactions. Establish complex conditional rules using the entry's internal and external attributes, as well as a set of numerical and logical operators. Create Rule Definitions by following the instructions provided in this topic.

View Rule Definitions

View the Rule Definitions by following the instructions in this topic.

2.4.1 Create Rule Definition

Reconciliation rule definitions specify rules to match the internal and external transactions. Establish complex conditional rules using the entry's internal and external attributes, as well as

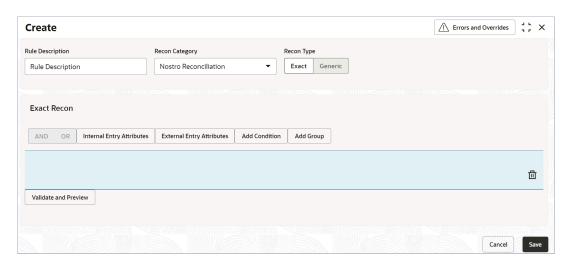

a set of numerical and logical operators. Create Rule Definitions by following the instructions provided in this topic.

 From Nostro Account Configuration click Reconciliation Rule Definition and then Create.

The **Create** page displays.

Figure 2-33 Create Reconciliation Rule Definition

- Click Exact in the Recon Type field.
- Specify the details. For more information on fields, refer to the field description table.

Table 2-16 Create Rule Definition - Field Description table

Field	Description
Rule Description	Provide a descriptive name for the rule definition.
Recon Category	Select Nostro Reconciliation from the drop-down list. This is the only option available.
Recon Type	Select the Reconciliation type as Exact . Note: The Generic reconciliation type is not applicable for Nostro Reconciliations.

- 4. Specify the matching rules that apply to get an exact reconciliation.
 - a. Click Add Condition.

A new row displays.

- b. Click the row to display the **Text between**, **Internal Entry Attributes**, and **External Entry Attributes** buttons.
- Specify the matching rule between the attributes of the internal and external entries.
- d. Click Internal Entry Attributes.
- e. Select an attribute from the drop-down list.

Internal entry attributes: Internal Debit Amount, Amount Lower Threshold, Amount Upper Threshold, Internal Credit Amount, Internal Aggregated Debit Amount, Internal Aggregated Credit Amount, External Account, Currency, Amount, Value Date, Internal Reference Number, External Entity, and Recon Product.

- f. Use the Starts with, Ends with, and Operator buttons to create a matching condition.
- g. Click External Entry Attributes.
- h. Select an attribute from the drop-down list.

External entry attributes: Internal Credit Amount, External Credit Amount, External Aggregated Debit Amount, External Aggregated Credit Amount, External Account, Currency, Amount, Value Date.

- i. Repeat the above steps to add more conditions.
- j. Select the **AND** or **OR** operators to join the conditions.
- k. Click Validate and Preview to see the final rule definition.
- 5. Click Create.

The Rule Definition is created.

Note

At this point, the status of the new rule definition is **Unauthorized**. A user with a supervisor role has to approve the rule definition. After approval, the status changes to **Authorized**, and the rule definition is available for use by another process.

Approve the Account Class.

To approve or reject Rule Definition, see Approve Rule Definition.

Note

As a maker of this record, you cannot approve it. It should be approved by another user with a Supervisor role.

```
Sample Rule Definition:
```

(Internal Reference Number starts with ${\tt BNKX}$) AND (External Reference Number starts with ${\tt BNKY}$)

AND ((Internal Debit Amount >= 10000) OR (External Credit Amount >= 10000)).

2.4.2 View Rule Definitions

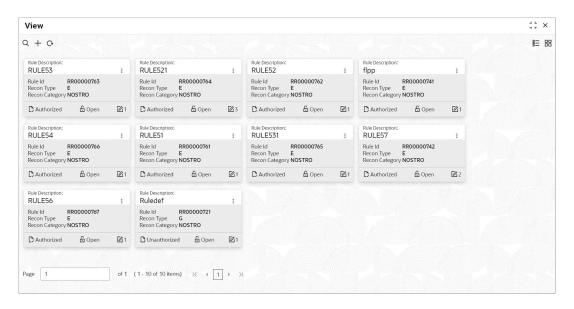

View the Rule Definitions by following the instructions in this topic.

 From Nostro Account Configuration click Reconciliation Rule Definition and then View.

The View page displays the Reconciliation Rule Definitions in the tile view.

2.5 Nostro Rule Decisions

Create and view Nostro Rule Decisions by following the instructions provided in this section.

Create Rule Decision

Rule decisions provides the flexibility to associate rules and define the priority of rule execution during automatic matching. They also allow decision based on amount or percentage based variance or variance based on value date. Create a Rule Decision by following the instructions provided in this topic.

View Rule Decisions

View the Rule Decisions by following the instructions in this topic.

2.5.1 Create Rule Decision

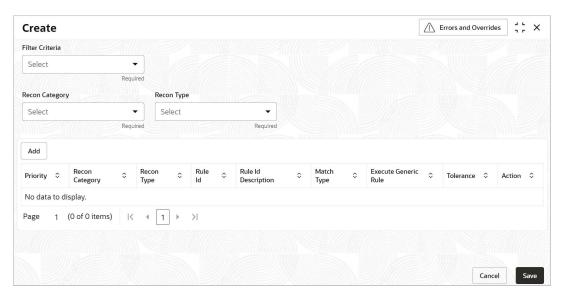

Rule decisions provides the flexibility to associate rules and define the priority of rule execution during automatic matching. They also allow decision based on amount or percentage based

variance or variance based on value date. Create a Rule Decision by following the instructions provided in this topic.

From Nostro Account Configuration click Reconciliation Rule Decision and then View.
 The Create page displays.

Figure 2-40 Create Reconciliation Rule Decision

2. Specify the details. For more information on fields, refer to the field description table:

Table 2-19 Field Description table - Create Rule Decision

Field	Description
Filter Criteria	Select from the following options: Recon Product, Account, Entity, and Currency Entity and Currency Based Default
Currency	Specify the standard currency value to be used for the rule definition.
External Account	Specify the account number of the external entity.
External Entity	Specify the identity of the external entity.
Reconciliation Product	Specify the reconciliation product to be used.
Priority	Specify an integer value greater than or equal to one. Each record added to the rule decision must have a unique priority value. The priority determines the order in which the decisions apply.
Recon Category	Select the only reconciliation category that is available, Nostro Reconciliation .
Recon Type	Select the reconciliation type. Only the Exact type is available. Do not select Generic .
Rule Id	Select the rule definition that applies to this rule decision.

Table 2-19 (Cont.) Field Description table - Create Rule Decision

Field	Description
Match Type	Select from the following match types: Suggested: The automatic matching process marks the match status as Suggested and sets the matched entries to the authorized state. The matched entries must be confirmed using manual matching to complete the matching process. Confirmed: The automatic matching process marks the match status as Open and the matched entries are in an authorized state.
Execute Generic rule	Leave this option unselected. This option does not apply to Nostro transactions.
Tolerance Type	Select the tolerance allowed for a reconciliation to be acceptable: Amount Based: Specify if the tolerance for reconciliation match is based on amount. Value Date Based: Specify if the tolerance for reconciliation match is based on the value date.
	Both: Amount and Value Date based tolerance.

3. Click Add/Edit.

A record is added to the rule decision in a new row with the specified values.

Note

In case a rule is not associated with an external account or entity then the system proceeds with auto-matching using the default rule.

- Repeat the above steps to add more rule decisions.
- 5. To edit a rule decision created in the above steps:
 - a. Select the required row containing the required rule decisions.
 - b. Click Add/Edit.

The fields above are populated with the values specified to create the rule decision.

- c. Edit the required fields.
- 6. Click Save.

The new Rule Decision is created.

(i) Note

At this point, the status of the new rule decision is **Unauthorized**. A user with a supervisor role has to approve the rule decision. After approval, the status changes to **Authorized**, and the rule decision is available for use by another process.

7. Approve the Rule Decision.

To approve or reject the Rule Decision, see Approve Rule Decision.

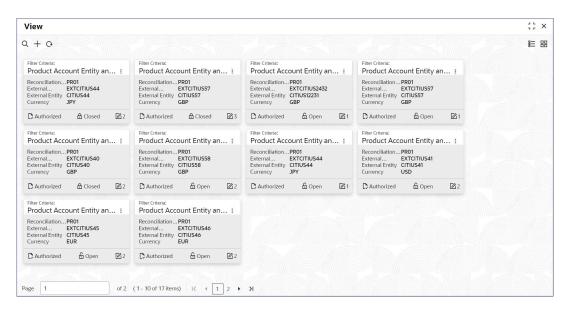

As a maker of this record, the user cannot approve it. It should be approved by another user with a Supervisor role.

2.5.2 View Rule Decisions

View the Rule Decisions by following the instructions in this topic.

From Nostro Account Configuration click Reconciliation Rule Decision and then View.
 The View page displays the Rule Decisions in the tile view.

Nostro Account Services

A Nostro account can be opened in a specific currency for an existing customer. A customer may have more than one Nostro account. For example, an external entity can keep separate Nostro accounts for each currency in which it does business.

The following Nostro Account services are available:

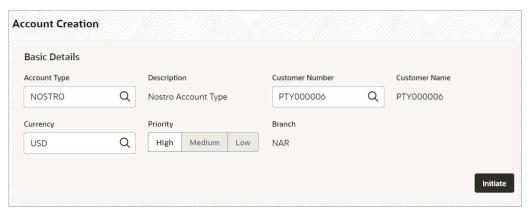

- <u>Create Nostro Account</u>
 Create a Nostro account by following the instructions provided in this topic.
- Amend Nostro Account
 Amend a Nostro account by following the instructions provided in this topic.
- Close Nostro Account
 Close a Nostro account by following the instructions provided in this topic.

3.1 Create Nostro Account

Create a Nostro account by following the instructions provided in this topic.

- Search and initiate an existing customer.
 - a. From Nostro Account Services click Account Creation.
 The Account Creation page displays the Basic Details screen.

Figure 3-1 Nostro Account Services - Account Creation

b. Specify the basic details of the customer's account. For more information on fields, refer to the field description table.

Table 3-1 Basic Details - Account Creation - Field Description

Field	Description
Account Type	Specify the account type for the Nostro account.
Description	Describe the Nostro account type. This field is auto-populated.

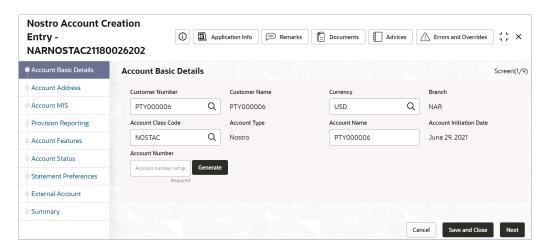

Table 3-1 (Cont.) Basic Details - Account Creation - Field Description

Field	Description
Customer Number	Specify the customer number for whom the account is to be created.
Customer Name	The name of the specified customer number is auto-populated.
Currency	Specify the currency of the Nostro account.
Priority	Specify the account creation priority from the following: High Medium Low

c. Click Initiate.

The **Nostro Account Creation Entry - <Application Number>** page displays the **Account Basic Details** screen.

Figure 3-2 Nostro Account Creation - Basic Details page

Make a note of the **Application Number**. This is needed to identify the task at the entry, enrich, and approval stages in the matching process, in the **Free Tasks** page.

(i) Note

The account creation entry stage involves manually capturing the required details in the following data entry screens:

- Account Basic Details
- Account Address
- Account MIS
- Provision Reporting (GL Reporting)
- Account Features
- Account Status
- Statement Preferences
- External Account
- Summary
- 2. Provide the account details.
 - a. Specify the Account Class Code for the Corporate account, in the Account Basic Details page.

(i) Note

Many account details are inherited from the account class.

b. Click Generate.

The Generate Account Number dialog displays.

Note

The columns masked by $\bf L$ represent the account class, the columns masked by $\bf b$ represent the branch code, and the columns masked by $\bf n$ represent the number to be provided. Together they represent a unique Nostro account number.

c. Double click the first column masked by **n**.

The cells becomes active and can be edited.

- **d.** Enter the first digit of the number and press tab to move to the next cell. Similarly, populate all the cells.
- e. Press Verify.

The number is verified and if it is valid, returns to the **Account Basic Details** page and the **Account Number** field is populated with the generated account number.

f. Click Next.

The **Account Address** page displays.

- 3. Provide the details on the **Account Address** page.
 - **a.** To use an existing CIF Address, expand the **Defaulted CIF Address** node, select an address and click **Use Address**.

This address is retrieved from the Customer Information File (CIF).

b. To add a new address, Click Add.

(i) Note

Add as many addresses as needed.

The Add Address dialog displays.

c. Specify the Address Type.

Select the required address type from the following:

- HOA Head Office Address
- ROA Registered Office Address
- BOA Branch Office Address
- COA Communication Address
- d. Specify the address details. For more information on fields, refer to the field description table:

Table 3-2 Account Address - Field Description

Field	Description
Language	Specify the language of the address details.
Department	Specify the department which identifies a division of a large organization or building.
Sub Department	Specify the sub-division of a large organization or building.
Street Name	Specify the street or thoroughfare name.
Building Name	Specify the building name.
Building Number	Specify the building number.
Floor	Specify the floor within a building.
Post Box	Specify the numbered box in a post office, assigned to a person or organization, where letters are kept until called for.
Room	Specify the room number in the building.
Post Code	Specify the code consisting of a group of letters and/or numbers that is added to a postal Address to assist the sorting of mail.
Town Name	Specify the name of a built-up area, with defined boundaries, and a local government.
Town Location Name	Specify the specific Location name within the town.
District Name	Specify a subdivision within a country sub-division.
Country Sub Division	Specify a subdivision of a country such as state, region, county.
Country	Specify the nation with its own government.

- e. Click the Mobile tab and in the Media Address field specify the mobile number.
- f. Click the Swift tab and in the Media Address field specify the BIC (Bank Identifier Code). An 8-11 character code that identifies the country, city, bank, and branch.

- g. Click the Email tab and in the Media Address field specify the email address.
- h. Click the **Fax** tab and in the **Media Address** field specify the Fax number.
- i. Click Add.

The account address row is added to the **Account Address** dialog.

- j. To add more addresses, repeat the above steps.
- k. Click Next.

The Account MIS page displays.

- 4. Provide the Account MIS details.
 - a. Specify the fields. For more information on fields, refer to the field description table:

Table 3-3 Account MIS Details - Field Description

Field	Description
MIS Group	Specify the MIS group to associate with the Account Class.
Description	Describes the MIS group specified. This field is auto-populated.
MIS Class Code	Specify the MIS Class Code from the applicable MIS Classes in the MIS Group.
Class Description	Describes the MIS Class. This field is auto-populated.

b. Click Next.

The **Provision Reporting** page displays.

- Provide the details on the Provision Reporting page.
 - a. To propagate the Reporting GL, set the toggle button to **On**.
 - b. To edit a reporting line, click the hamburger icon on the top right of **Reporting line** tile.
 - c. Select Edit.
 - d. Specify the general ledger to use for credits in the Credit GL field.
 - e. Specify the general ledger to use for debits in the **Debit GL** field.
 - Click Save.

The **Reporting Lines** are updated in the **GL Reporting Details** page.

- g. Click Next. The Account Features page displays.
- Specify the details on the Account Features page.
 - **a.** Specify the field. For more information on fields, refer to the field description table:

Table 3-4 Account Features - Field Description

Field	Description
IBAN Required	Toggle it On to enable IBAN for the account class.

b. Click Next.

The **Account Status** page displays.

- 7. Specify the details on the **Account Status** page.
 - a. Specify the fields. For more information on fields, refer to the field description table:

Table 3-5 Account Status - Field Description

Field	Description
No Debits	Toggle the switch to On to prevent debit transaction.
No Credits	Toggle the switch to On to prevent credit transaction.
Dormant	Toggle the switch to On to move this account to a dormant state.
Frozen	Toggle the switch to On to freeze the account.
Current Status	Displays the current regulatory state of the account.
Status Since	Displays the date from which the regulatory status is active.

b. Click Next.

The **Statement Preferences** page displays.

- **8.** Provide the details on the **Statement Preferences** page.
 - a. Specify the fields. For more information on fields, refer to the field description table:

Table 3-6 Statement Preferences - Field Description

Field	Description
Display IBAN on Advices	Toggle the switch On to display IBAN on advices.
Exclude Same Day Reversal From Statement	Toggle the switch On to exclude same day reversal transactions from the account statement.
Account Statement Parameters	Provide the statement parameter details for the following statement types: Primary Secondary Tertiary
Statement Type	Select type of statement. The options are: None Detailed Summary
Cycle	Specify the frequency of the statement generated. Click the Calendar icon and specify one of the following: • Daily: Statements are generated every day. • Weekly: Select the day of the week to generate the weekly statement. • Fortnightly: Select the day of the week to generate the fortnightly statement. • Monthly: Select the day of the month to generate the monthly statement.
Statement Format	Specify the format of the statement generated.
SWIFT Required	Toggle the Swift Required field to On to generate statements in the SWIFT format. This field is available only when Statement Type is Summary or Detailed .
Swift message Type	Specify the SWIFT message type to generate. The list displays the SWIFT message type from the Type of Service . This field is available only when SWIFT Required is Yes .

b. Click Next.

The External Accounts page displays.

9. Provide the details on the External Accounts page.

An external entity is an external bank or an external organization. A reconciliation product is associated with an external account, and together they map to the internal Nostro account being created.

a. Specify the fields. For more information on fields, refer to the field description table:

Table 3-7 Statement Preferences - Field Description

Field	Description
Account	Displays the Account name being created.
Branch	Displays the Branch code holding the account.
Capture Start Date	Specify the date to start managing statement entries and account activities. Note: By default, the account opening date displays.
Reconciliation Product	Specify the Reconciliation product code to use with the external account.
External Entity	Specify the BIC (Bank Identifier Code) of the external banking entity.
External Account	Enter the account number of the account held with the external banking entity.
Currency (Matching limits)	Specify the currency of the external account.
Limit Amount(Matching limits)	Specify the reconciliation limit amount for the external account. Note: The limit amount specified is used for manual matching.

b. Click Next.

The **Summary Screen** displays the data entry screen tiles.

- 10. Expand and verify that all the data entry tiles are populated and complete.
- 11. Click Submit.

This creates a **Nostro Account Creation Entry** task and starts the **Stage Movement Submission** process for the **Account Creation Entry** stage. The **Stage Movement Submission** dialog displays the **Overrides** present on this stage.

12. Confirm the Overrides listed on this screen. Click Proceed Next.

The overrides are generated by the application based on information provided in the data entry screens.

The Stage Movement Submission dialog displays the Checklist items for this stage.

13. Confirm the checklist items and click Proceed Next.

The **Stage Movement Submission** dialog displays the **Outcomes** to select.

- **14.** Select one of the outcomes from the drop-down.
 - Proceed: To proceed with the submission.
 - Cancel: To cancel the submission.
- 15. Click Submit.

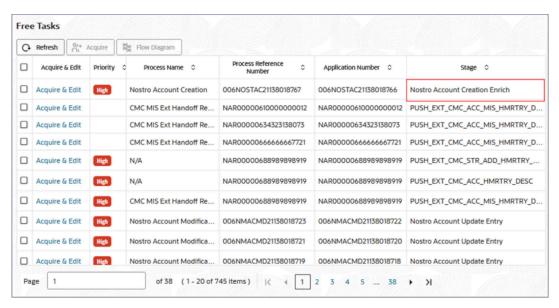

A Nostro Account Creation Enrich task is created if **Proceed** is selected in the previous step.

16. Click Tasks. Under Tasks click Free Tasks.

The **Free Tasks** page displays.

Figure 3-3 Nostro Account Creation - Free Tasks

- 17. Search the listed tasks for the application number. This is the number noted in step 1.c. The Process Name must be Nostro Account Creation and the Stage must be Nostro Account Creation Enrich.
- 18. Click Acquire and Edit.

The **Nostro Account Creation Enrich - <Application Number> Summary** page displays.

- **19.** Make the required changes to enrich the data entry screens. Click the required data entry screen and make the required changes.
- Click Submit from the Summary screen. The Stage Movement Submission dialog displays.
- 21. Confirm the Overrides and Checklist items for the Enrich stage, then click **Proceed Next**.

The **Stage Movement Submission** dialog displays the **Outcomes**.

- **22.** Select one of the outcomes from the drop-down.
 - Proceed: To proceed with the submission.
 - Reject: To reject the submission.
- 23. Click Submit in the Outcomes.

This creates a **Nostro Scrutinize Account Creation** task, and the **Free Tasks** page opens.

- 24. Search the listed tasks for the application number of the New Account Creation. This is the number noted down in step 1.c. The **Process Name** must be **Nostro Account Creation** and the **Stage** must be **Nostro Scrutinize Account Creation**.
- 25. Click Acquire and Edit.

The **Nostro Account Creation Scrutinize - <Application Number>** page displays the **Summary** page.

- 26. Scrutinize and ensure that all the data entry screens are properly defined.
- Click Submit from the Summary screen. The Stage Movement Submission dialog displays.
- 28. Confirm the Overrides and Checklist items.

The Stage Movement Submission dialog displays the Outcomes.

- 29. Select one of the outcomes from the drop-down.
 - Proceed: To proceed with the submission.
 - Reject: To reject the submission.
- 30. Click **Submit** in the **Outcomes** stage.

This creates a Nostro Approve Account Creation task, and the Free Tasks page opens.

- **31.** Search the listed tasks for the application number of the New Account Creation. This is the number noted in step 1.c. The **Process Name** must be **Nostro Account Creation** and the **Stage** must be **Nostro Approve Account Creation**.
- 32. Click Acquire and Edit.

The **Nostro Account Creation Approve - <Application Number>** page displays the **Summary** page.

- 33. Review and ensure that all the data entry screens are properly defined.
- Click Submit from the Summary screen. The Stage Movement Submission dialog displays.
- 35. Confirm the Overrides and Checklist items.

The Stage Movement Submission dialog displays the Outcomes.

- **36.** Select one of the outcomes from the drop-down.
 - Proceed: To proceed with the submission.
 - Reject: To reject the submission.
- 37. Click **Submit** in the **Outcomes** stage.

The Nostro Account is created.

Confirm that all stages of the Nostro Account Creation process are complete. Click Tasks.
 Under Tasks click Completed Tasks.

The Completed Tasks page displays all four stages of the Nostro Account Creation process: **Entry**, **Enrich**, **Scrutinize**, and **Approve**.

3.2 Amend Nostro Account

Amend a Nostro account by following the instructions provided in this topic.

- Search for the required Nostro account and initiate the amendment process.
 - a. From Nostro Account Services click Account Amendment.

The **Account Amendment** page displays.

Figure 3-5 Nostro Account Amendment

b. Specify some or all the details on the **Account Amendment** page. For more information on fields, refer to the field description table.

Table 3-8 Account Amendment - Field Description

Field	Description
Account Category	Specify the account category as Nostro account.
Description	Describe the Nostro Account Category specified. This field is auto-populated.
Customer Number	Specify the CIF number of the customer account.
Customer Name	The name of the specified customer number is auto-populated.
Currency	Specify the primary currency of the NOSTRO customer account
Account Number	Specify the account number of the Nostro account.

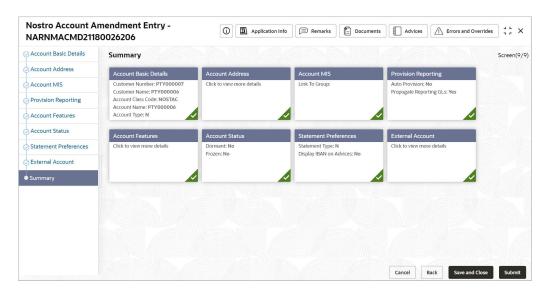

c. Click Search.

The Nostro accounts matching the search criteria are listed under the **Account Selection** section.

- d. From the search result, select the account to amend and the **Priority** of the process.
- e. Click Initiate.

The **Nostro Account Amendment Entry - <Application Number>** page displays the **Summary**.

Figure 3-6 Nostro Account Amendment Entry

Make a note of the **Application Number**. This is needed to identify the task at the enrich, and approval stages in the Amendment process, in the **Free Tasks** page.

- 2. Make the required changes in the different data entry screens. To open and edit a data entry screen, click the required data entry screen listed in the left navigation panel.
- 3. Click Submit.

This creates a **Nostro Account Amendment Entry** task and starts the **Stage Movement Submission** process for the **Nostro Account Amendment Entry** stage. The **Stage Movement Submission** dialog displays the **Overrides** listed for this stage.

4. Confirm the Overrides listed. Click Proceed Next.

Note

_, .,

The overrides are generated by the application based on information provided in the data entry screens.

The **Stage Movement Submission** dialog displays the **Checklist** items for this stage.

5. Confirm the checklist items and click **Proceed Next**.

The **Stage Movement Submission** dialog displays the **Outcomes** for this stage.

- **6.** Select one of the outcomes from the drop-down:
 - Proceed: To proceed with the submission.
 - Reject: To reject the submission.
- Click Submit.

A **Nostro Account Amendment APPRVL** task is created if **Proceed** was selected in the previous step.

8. Click Tasks. Under Tasks click Free Tasks.

The **Free Tasks** page displays.

- Search the listed tasks for the application number. This is the number noted down in step
 1.e. The Process Name must be Nostro Amendment and the Stage must be Nostro
 Account Amendment APPRVL.
- 10. Click Acquire and Edit.

The **Nostro Account Amendment APPRVL - <Application Number>** summary page displays.

- Click Submit from the Summary screen. The Stage Movement Submission dialog displays.
- Confirm the Overrides and Checklist items.

The **Stage Movement Submission** dialog displays the Outcomes.

- **13.** Select one of the outcomes from the drop-down:
 - Proceed: To proceed with the submission.
 - Reject: To reject the submission.
- 14. Click Submit in the Outcomes stage.

The Nostro Account Amendment is approved.

 Confirm that all stages of the Nostro Account Amendment process are complete. Click Tasks. Under Tasks click Completed Tasks.

The **Completed Tasks** page displays **Entry** and **Approve**, the two stages of the Nostro Account amendment process.

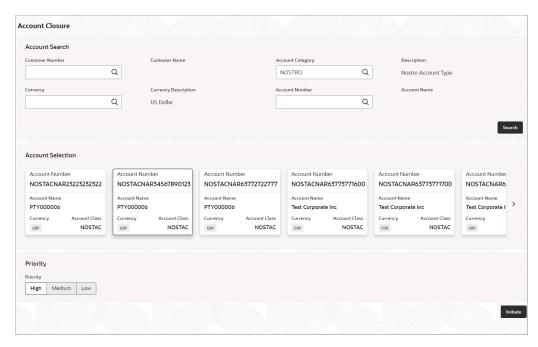

3.3 Close Nostro Account

Close a Nostro account by following the instructions provided in this topic.

- Search for the Nostro account and initiate the closure process.
 - a. From Nostro Account Services click Account Closure.

The Account Closure page displays.

Figure 3-7 Nostro Account Closure

b. Specify some or all the details on the Account Closure page. For more information on fields, refer to the field description table.

Table 3-9 Account Closure - Field Description

Field	Description
Account Category	Specify the account category as Nostro account.
Description	Describe the Nostro Account Category. This field is auto populated.
Customer Number	Specify the CIF number of the customer account.
Customer Name	The name of the specified customer number is auto populated.
Currency	Specify he primary currency of the NOSTRO customer account.
Account Number	Specify the account number of the Nostro account.

c. Click Search.

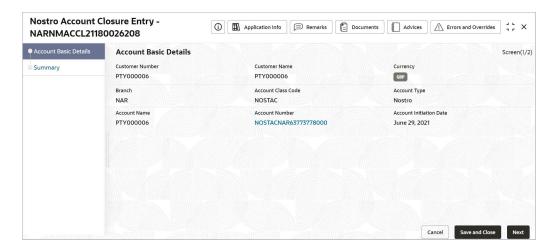

The Nostro accounts matching the search criteria are listed under the **Account Selection** section.

- d. From the search result, select the account to close and the **Priority** of the task.
- e. Click Initiate.

The Nostro Account Closure Entry - <Application Number> page displays the Account Basic Details.

Figure 3-8 Nostro Account Closure Entry

Make a note of the **Application Number**. This is needed to identify the task at the approval stages in the Closure process, in the **Free Tasks** page.

Click Submit.

This creates a **Nostro Account Closure Entry** task and starts the **Stage Movement Submission** process for the **Nostro Account Closure Entry** stage. The **Stage Movement Submission** dialog displays the **Overrides** listed for this stage.

Confirm the Overrides listed on this screen. Click Proceed Next.

The overrides are generated by the application based on information provided in the data segments.

The Stage Movement Submission dialog displays the Checklist items for this stage.

4. Confirm the checklist items and click **Proceed Next**.

The **Stage Movement Submission** dialog displays the **Outcomes** for this stage.

- **5.** Select one of the outcomes from the drop-down:
 - Proceed: To proceed with the submission.
 - Reject: To reject the submission.
- Click Submit.

A Nostro Account Closure APPRVL task is created if **Proceed** was selected in the previous step.

Click Tasks. Under Tasks click Free Tasks.

The Free Tasks page displays.

- Search the listed tasks for the application number. This is the number noted down in Step
 1.e. The Process Name must be Nostro Account Closure and the Stage must be
 Nostro Account Closure APPRVL.
- 9. Click Acquire and Edit.

The **Nostro Account Closure APPRVL - <Application Number>** summary page displays.

- Click Submit from the Summary screen. The Stage Movement Submission dialog displays.
- 11. Confirm the Overrides and Checklist items.

The **Stage Movement Submission** dialog displays the Outcomes.

- **12.** Select one of the outcomes from the drop-down:
 - Proceed: To proceed with the submission.
 - Cancel: To cancel the submission.
- 13. Click Submit.

The Nostro Account closure is approved.

14. Confirm that all stages of the Nostro Account closure process are complete. Click **Tasks**. Under **Tasks** click **Completed Tasks**.

The **Completed Tasks** page displays **Entry** and **Approve**, the two stages of the Nostro Account closure process.

Nostro Account Transactions

Nostro account transactions include generating statements automatically or manually and matching internal statement entries with external transaction statement entries.

An external account statement can be entered either manually or can be uploaded automatically. The details of an external account transactions can come in through the media types set up for a bank. External statements that have come in through SWIFT can be automatically uploaded.

Nostro reconciliation involves matching external transaction statement entries with the corresponding internal entries. In the manual process, select the external entries and indicate the matching internal entries. The sum of the amounts of the internal entries and the external entries must be the same. How a match is performed depends on the reconciliation type, Replication, or Mirroring of entries.

The following Nostro Account Transactions are available:

Match Entries Automatically

Automatically match external transaction statement entries with the corresponding internal transactions by following the instructions provided in this topic.

Match Entries Manually

Follow the instructions in this topic to manually review and compare individual transactions or entries in the internal records with corresponding entries received from external entities such as correspondent banks holding the Nostro account.

Manual Statement Input

Create and view Manual Statement Inputs by following the instructions provided in this topic.

Incoming Messages

Users often need to manually upload SWIFT messages despite most incoming messages being handled automatically to ensure accuracy, integrity, and compliance in the transaction workflow.

Manual Unmatching

This feature allows users to manually unmatch records that were previously matched incorrectly through the manual matching process. It provides a controlled workflow for selecting, submitting, and approving unmatched entries, ensuring data integrity and proper authorization.

4.1 Match Entries Automatically

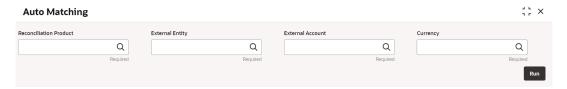

Automatically match external transaction statement entries with the corresponding internal transactions by following the instructions provided in this topic.

Click Nostro Account Transactions and then click Auto Matching.

The Auto Matching page displays.

Figure 4-1 Automatic Matching

2. Specify the details. For more information on fields, refer to the field description table.

Table 4-1 Automatic Matching of Entries - Field Description

Field	Description
Reconciliation Product	Specify the Reconciliation Product to be used for auto matching.
External Entity	The external entity to which the statement belongs.
External Account	The external account to which the statement belongs.
Currency	The currency of the internal account.

Click Run.

The statement entries for the specified external account are matched to the corresponding internal account entries using the Reconciliation product.

4.2 Match Entries Manually

Follow the instructions in this topic to manually review and compare individual transactions or entries in the internal records with corresponding entries received from external entities such as correspondent banks holding the Nostro account.

The manual matching process involves verifying transaction details, such as amount, currency, date, reference number, and counterparty information, to identify matches or discrepancies between the bank's records and the external statements or advice.

 Click Nostro Account Transactions. Under Nostro Account Transaction, click Manual Matching, then click Initiate.

The Initiate page displays.

Specify the details as described in the following table and Query for the required messages.

Table 4-2 Initiate - Field Description

Field	Description
Reconciliation Product	Specify the Reconciliation Product used to reconcile the transaction entries during automatic reconciliation.
External Entity	Specify the name of the entity sending the external entries.
External Account	Specify the account code of the external Nostro account maintained by the external entity.
Currency	Specify the operating currency of the external account.

Table 4-2 (Cont.) Initiate - Field Description

Field	Description
Match Type	A match type is assigned to entries during the automatic reconciliation process to indicate the quality or reliability of the match between entries. Select the match type from the following:
	 Suggested - Finds the transactions that the application automatched but need manual confirmation. Unmatched - Finds the transactions that the application is unable to auto-match.

a. Click Query.

The statement message row(s) matching the specified fields display in the **Messages** section. By default, the unmatched balance entries display.

Figure 4-2 Manual Matching - Initiate - Unmatched Entries

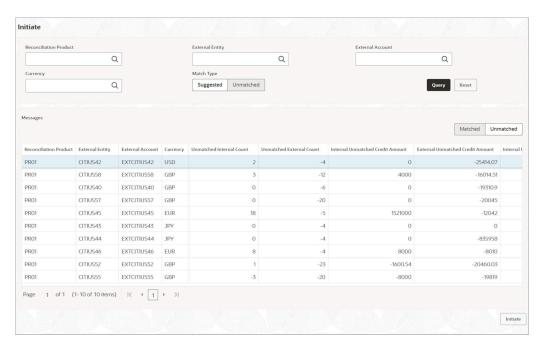

Table 4-3 Column Description - Unmatched Entries

	1
Column Name	Description
Reconciliation Product	Displays the Reconciliation Product used to reconcile the transaction entries during automatic reconciliation.
External Entity	Displays the name of the external entity sending the external entries.
External Account	Display the account code of the external Nostro account maintained by the external entity.
Currency	Displays Specify the operating currency of the external account.
Unmatched Internal Entries	Displays the number of internal entries that could not be matched by the automatic reconciliation process.

Table 4-3 (Cont.) Column Description - Unmatched Entries

Column Name	Description
Unmatched External Entries	Displays the number of external entries that could not be matched by the automatic reconciliation process.
Internal Unmatched Credit Amount	Displays the total amount of debit transactions in the internal records that are not successfully matched or reconciled with corresponding entries received from external entities, such as correspondent banks.
External Unmatched Credit Amount	Displays the total amount of credit transactions received from external entities that are not successfully matched or reconciled with corresponding entries in the bank's internal records.
Internal Unmatched Debit Amount	Displays the total amount of debit transactions in the internal records that are not successfully matched or reconciled with corresponding entries received from external entities, such as correspondent banks.
External Unmatched Debit Amount	Displays the total amount of debit transactions received from external entities that are not successfully matched or reconciled with corresponding entries in the bank's internal records.

- b. To clear the selected fields and query again with new search details, click **Reset**.
- To view matched entries, click Matched.

The matched entry messages display.

Figure 4-3 Manual Matching - Initiate - Matched Entries

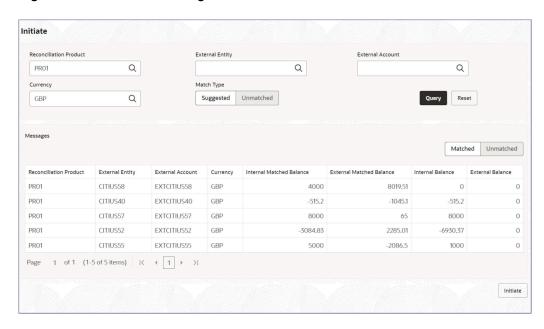

Table 4-4 Column Description

Column Name	Description
Reconciliation Product	Displays the Reconciliation Product used to reconcile the transaction entries during automatic reconciliation.

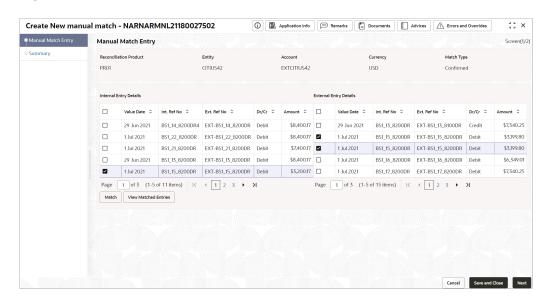

Table 4-4 (Cont.) Column Description

Column Name	Description
External Entity	Displays the name of the external entity sending the external entries.
External Account	Display the account code of the external Nostro account maintained by the external entity.
Currency	Displays Specify the operating currency of the external account.
Internal Matched Balance	Displays the aggregate value of transactions within the bank's internal records for which corresponding external entries have been identified and successfully matched or reconciled.
External Matched Balance	Displays the aggregate value of external transactions for which corresponding internal entries have been identified and successfully matched or reconciled.
Internal Balance	Displays the total value or amount of transactions that have been matched or reconciled internally. The balance includes both debit and credit transactions that have been successfully matched, resulting in a net balance.
External Balance	Displays the total value or amount of transactions that have been matched or reconciled externally. The balance includes both debit and credit transactions that have been successfully matched, resulting in a net balance.

d. Select the required statement message row (matched or unmatched) and click **Initiate**.

The Create New Manual Match < Application Number > page displays the Manual Match Entry screen.

Figure 4-4 Create New Manual Match

Make a note of the **Application Number**. It is required to identify the task at the entry and approval stages in the matching process, in the **Free Tasks** page.

The rows in the **External Entry Details** and **Internal Entry Details** sections are described in the following table.

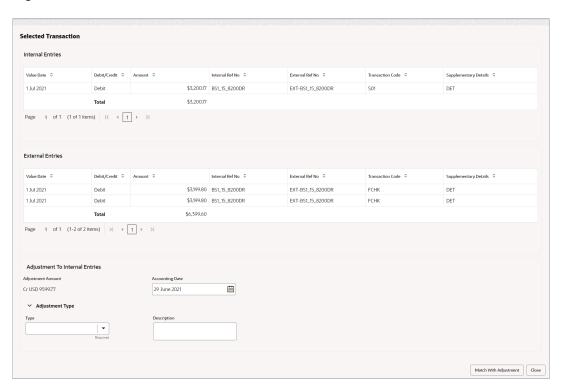

Table 4-5 Column Description table

Column Header	Description
Value date	Displays the value date of the internal or external transaction entry. For internal entries, it is the date on which the transaction is posted to the internal accounting ledger. For external entries, it is the date on which the funds are credited or debited to the Nostro account held at the correspondent bank or financial institution.
Int. Ref. No	Displays the internal reference number provided to the transaction by a bank's internal system to track and manage transactions by a Nostro account.
Ext. Ref No	Displays the external reference number for the transaction provided by an external entity, such as a correspondent bank or counterparty, to uniquely identify the transaction from their perspective.
Dr/Cr	Displays if the transaction entry is for a debit or credit transaction.
Amount	Displays the credit or debit transaction amount.

- 3. Choose one or more internal and external entries to match.
- 4. Click Match.

The **Selected Transaction** page displays.

Figure 4-5 Transaction Selected for a Manual Match

It lists the selected **Internal Entries** and **External Entries** to match and the **Adjustment To Internal Entries** sections.

(i) Note

You have to scroll down to see the **Adjustment to Internal Entries** screen.

Specify the details. For more information on fields, refer to the field description table.

Table 4-6 Adjustment To Internal Entries - Field Description

Field	Description
Adjustment Amount	This field is populated based on the difference in the internal and external amount entries.
Adjustment Date	Specify the date on which the adjustment to the entries is to be posted.
Adjustment Type	Select the adjustment type from the following: Currency Flux: Adjustment due to fluctuations in the currency. Other: Adjustment due to other reasons. For example, late fees, service charges, or the adjustment amount is zero.
Description	Describes the adjustment type. This field is auto-populated.

Click Match with Adjustment.

The Manual Match Entry tab displays.

Click Next.

The **Summary** tab displays.

(i) Note

You can expand the summary tab to see the matched transaction details.

Click Submit.

The Stage Movement Submission dialog displays for the new manual match entry.

Confirm the **Overrides** listed on this screen. Click **Proceed Next**.

The Stage Movement Submission dialog displays the Checklist items.

10. Confirm the checklist items and click **Proceed Next**.

The Stage Movement Submission dialog displays the Outcomes.

- **11.** Select one of the outcomes from the drop-down:
 - **Proceed**: To proceed with the submission.
 - **Reject**: To reject the submission.
- 12. Click Submit.

The account should be ready for entry if all the changes are verified successfully.

- 13. Click Task Management. Under Task Management click View Tasks Status.
- 14. Search the listed tasks for the application number of the new matching entry. This is the number noted down in Step 2.c. The Process Name must be Nostro Manual Matching and the Stage must be Manual Matching Application Entry.
- 15. Click Acquire and Edit.

The **Nostro Manual Matching Entry - <Application Number>** page displays the **Summary** tab.

- 16. Verify the manual matches made. Make any changes if necessary.
- 17. Click Submit from the Summary screen.

The Stage Movement Submission dialog displays.

18. Confirm the Overrides and Checklist items.

The Stage Movement Submission dialog displays the Outcomes.

- **19.** Select one of the outcomes from the drop-down:
 - Proceed: To proceed with the submission.
 - Cancel: To cancel the submission.
- 20. Click Submit.

The manual match moves to the approval stage. The View Tasks Status displays.

- 21. Search the listed tasks for the application number of the new matching entry. This is the number noted down in Step 2.c. The Process Name must be Nostro Manual Matching and the Stage must be Manual Matching Application Approval.
- 22. Click Acquire and Edit.

The **Nostro Manual Matching APPRVL - <Application Number>** page displays the **Summary** tab.

23. Click Submit from the Summary screen.

The Stage Movement Submission dialog displays.

24. Confirm the Overrides and Checklist items.

The **Stage Movement Submission** dialog displays the Outcomes.

- **25.** Select one of the outcomes from the drop-down:
 - Proceed: To proceed with the submission.
 - Cancel: To cancel the submission.
- 26. Click Submit.

The manual match is approved.

4.3 Manual Statement Input

Create and view Manual Statement Inputs by following the instructions provided in this topic.

Create External Statement Entries Manually

External statements can reach a branch from media types other than SWIFT. Such statements are uploaded manually. Setting up an external statement entry manually is covered in this topic.

View Manual Statement Entries

View the Manual Statement Entries by following the instructions in this topic.

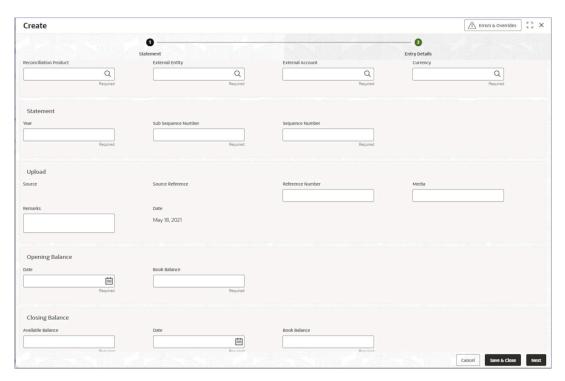

4.3.1 Create External Statement Entries Manually

External statements can reach a branch from media types other than SWIFT. Such statements are uploaded manually. Setting up an external statement entry manually is covered in this topic.

1. Click Nostro Account Transactions. Under Nostro Account Transaction, click Manual Statement Input, then click Create.

The Create page displays.

Figure 4-6 Manual Entry of Transaction Statements

Specify the statement details. For more information on fields, refer to the field description table.

Table 4-7 Statement Details - Field Description

Field	Description
Reconciliation Product	Specify the Recon Product to be used to match and reconcile the transaction
External Entity	The external account to which the statement belongs.
External Account	The external entity to which the statement belongs
Currency	The currency of the account.
Year	The year in which the statement reached a branch.
Sub Sequence Number	The sub sequence number of the statement.
Sequence Number	The sequence number of the statement.
Source Reference	Indicate the source from which the statement should be uploaded.
Reference Number	The reference number of the statement from the external source.

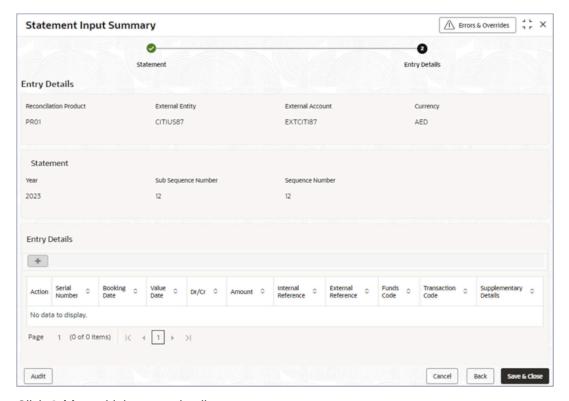

Table 4-7 (Cont.) Statement Details - Field Description

Field	Description
Media	The media type other than SWIFT through which the statement came in.
Remarks	Specify any remarks for the external statement.
Date	The Date on which the statement is uploaded to the NOSTRO system. This is the current date and is auto-populated.
Date	The date on which the opening book balance is noted for the external statement.
Book Balance	The book balance.
Available Balance	The portion of sum available in the customer's account.
Date	The date of the closing balance.
Book Balance	The total debits and credits of the account brought forward on the closing balance date.

3. Click Next.

The **Statement Input Summary** page displays.

Figure 4-7 Transactions Manual Statement Entry Summary

4. Click Add to add the entry details.

The Add Entry Details page opens.

5. Specify the entry details. For more information on fields, refer to the field description table.

Table 4-8 Entry Details - Field Description

Field	Description
Serial Number	Specify the serial number of the transaction.
Booking Date	The date when the entry is posted to the external account.
Value Date	The date on which the credit or debit is added to the account.
Dr/Cr	The type of entry Debit or Credit entry.
Amount	The Debited or Credited amount.
Internal Reference	The internal reference number for the entry.
Sequence Number	The external reference number for the entry.
Funds Code	The code for the funds in the account.
Transaction Code	The transaction code assigned to a debit or credit transaction.
Supplementary Details	Enter any supplementary details about this entry.
Entry Sequence Number	This number is auto-generated and populated by the system.

6. Click Add.

The entry details are added in a new row.

- **7.** Repeat steps 3 to 5 to add details for more transactions.
- Click Save and Close.

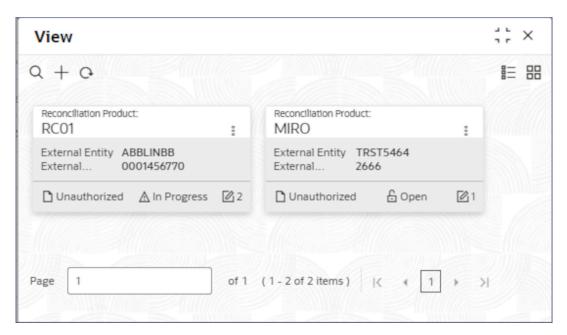

4.3.2 View Manual Statement Entries

View the Manual Statement Entries by following the instructions in this topic.

1. Click Nostro Account Transactions. Under Nostro Account Transactions, click Manual Statement Input, then click View.

The **View** page displays the external accounts containing manual statement entries.

Figure 4-8 Manual Statement Input - Tiles View

Click # or # to switch between the **Tile** view and the **List** view.

Manual Statement Input Tile - Field Description Table 4-9

Field	Description
Reconciliation Product	Displays the Reconciliation product used with the external account.
External Entity	Displays the BIC (Bank Identifier Code) of the external banking entity.
External Account	Displays the account number of the external entity.
Status	Displays the status details of the record.

The following table describes the action items in the More Options (;) menu and the action items on the page.

(i) Note

The actions the user can perform depend on role and the record status.

- View the manual statement entries of an external account.
 - Click and select View.

The Statement Input Summary page displays the Statement details and the manual entry details.

Note

To know more about the fields, see Create External Statement Entries Manually.

4.4 Incoming Messages

Users often need to manually upload SWIFT messages despite most incoming messages being handled automatically to ensure accuracy, integrity, and compliance in the transaction workflow.

Follow the instructions in this section to create and view Incoming SWIFT Messages. Follow the instructions in this section to create and view Incoming SWIFT Messages. Various reasons that cause the manual upload of incoming SWIFT (Society for Worldwide Interbank Financial Telecommunication) messages are:

- Technical issues: The SWIFT messaging system or the bank's internal systems may cause delays or prevent automatic processing of incoming messages.
- Data verification: Bank staff can review incoming SWIFT messages for accuracy and completeness during manual uploads.
- Exception Handling: When SWIFT messages with unusual or unexpected data are received, they require review and manual handling to determine the appropriate course of action.

Follow the instructions in the following topics to create, view, and maintain incoming SWIFT messages.

- Create Incoming Message
 Follow the instructions in this topic to manually create incoming messages.
- View Incoming Messages
 Follow the instructions in this topic to view manually created incoming messages.

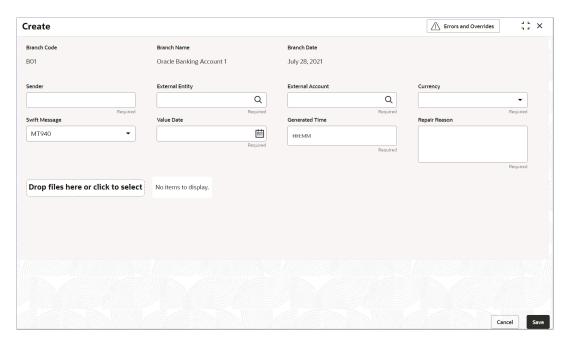

4.4.1 Create Incoming Message

Follow the instructions in this topic to manually create incoming messages.

 Click Nostro Account Configurations. Under Nostro Account Transactions, click Incoming Message, then click Create.

The **Create** page displays.

Figure 4-9 Create - Incoming Message

2. Specify the details. For more information on fields, refer to the field description table.

Table 4-10 Create - Field Description

Field	Description
Branch Code	Current Branch Code is auto-populated.
Branch Name	Current Branch Name is auto-populated.
Branch Date	Current Branch Date is auto-populated.
Sender	Specify the name of the financial institution or bank providing the message containing the bank statement information.
External Entity	Specify the name of the entity outside the bank providing or requesting the message.
External Account	Specify the external account for which the bank statement is being provided.

Table 4-10 (Cont.) Create - Field Description

Field	Description
Currency	Specify the currency of the transaction from the drop-down list.
Swift Message	Select the SWIFT message type to create from the drop-down list. The following types are supported MT940 and MT942.
Value Date	Specify the date on which the incoming SWIFT message was generated.
Generated Time	Specify the time this message is created in the Hours:Minutes format. This helps establish the chronological order of messages created.
Repair Reason	Specify the reason for manually creating an incoming message. Some of the reasons could be technical issues, data verification, or exception handling.

- 3. Upload the SWIFT message.
 - a. Click Drop Files Here or Click to Select.

Note

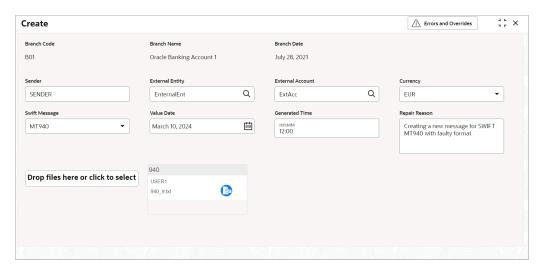

User can also drag and drop a SWIFT message file on to the field.

The file browser dialog displays.

b. Select the required file and upload.

The selected file displays in a tile.

Figure 4-10 Create - Message Upload

4. Click Save.

The **Incoming Message** is created.

The Incoming Message is currently **Unauthorized**. A user with a supervisor role has to approve the Incoming Message. Once approved, the status changes to **Authorized**, and the Incoming Message is available for use by another process.

5. Approve the Incoming.

To approve or reject an Incoming Message, see View Status Code.

(i) Note

As a maker of this configuration, user cannot approve it. It has to be approved by another user with a Supervisor role.

Click Save.

The incoming message is created.

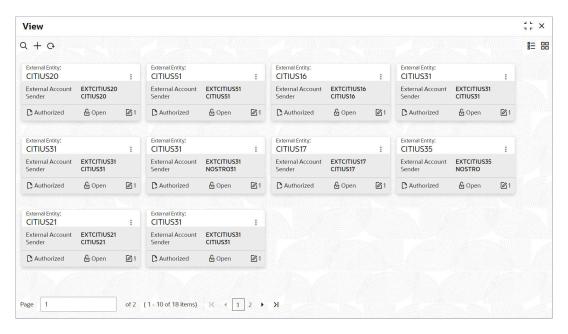

4.4.2 View Incoming Messages

Follow the instructions in this topic to view manually created incoming messages.

 Click Nostro Account Configuration. Under Nostro Account Transactions, click Incoming Message, then click View.

The View page displays the Incoming Messages created.

Figure 4-11 View Incoming Message - Tile View

Click # or # to switch between the **Tile** view and the **List** view.

For more information on fields, refer to field description table below:

Table 4-11 Incoming Message Tile - Field Description

Field	Description
External Entity	Displays the name of the entity outside the bank providing or requesting the message
External Account	Displays the external account for which the bank statement is being provided
Sender	Displays the name of the financial institution or bank providing the message containing the bank statement information.
Status	Displays the status details of the record.

The following table describes the action items in the More Options (a) menu and the action items on the page.

Table 4-12 Action Items Description

Action Item	Description
View	View the details of a component.
Delete	Delete the component. Note: Once deleted, the component can no longer be used to define a product. But products already defined using the component can continue to use it.
Authorize	Authorize a component to make it active and available to define products. Note: Creator of a component cannot authorize the component. Another user with authorize permissions can.
Audit	Select to view the Maker, Checker, Status, and Modification Number.
Error & Overrides	Select to view all existing errors or warnings on the page.

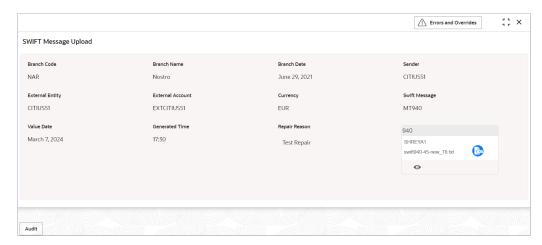

The actions the user can perform depend on role and the record status.

- 2. View the details of an Incoming Message.
 - a. Click and select View.

The **SWIFT Message Upload** page displays.

Figure 4-12 View an Incoming Message Details

b. Hover over the **SWIFT Message** field and click the **View** icon that displays.

The **Document** dialog displays the uploaded SWIFT message.

- 3. Approve or Reject an Unauthorized Incoming Message.
 - a. Click : and select Authorize.

The View page displays.

Figure 4-13 Approve the Record

For more information on fields, refer to the field description table:

Table 4-13 Authorize View

Field Name	Description
Mod Number <n></n>	Indicates the number of times the record was modified. Where N represents the number of modifications. Note: For a newly created record the modification number is 1 .
Done By	Name of the user who performed the latest modification.
Done On	Date on which the record was modified.
Record Status	The status of the record. Note: To authorize a record, its status should be Open.

Table 4-13 (Cont.) Authorize View

Field Name	Description
Once Auth	Specifies if the record was authorized at least once. Note: For a newly created record, the value is No.
Compare (Button)	Click to compare the modified record with the previous version of the record.
View (Button)	Click to display the record details.

- b. Click the check box besides **Mod Number<N>** to select the modified record.
- c. Click Approve or Reject.

The Confirm dialog displays.

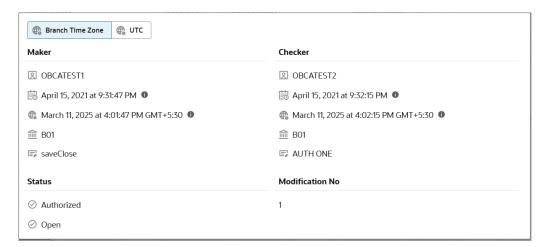

d. Specify any remarks and click Confirm.

A toast message confirms the successful approval or rejection of the record.

e. On the View screen, click Audit.

The following screen is displays. This screen displays Date and Time details of the Branch.

Figure 4-14 Audit - Branch Time Zone

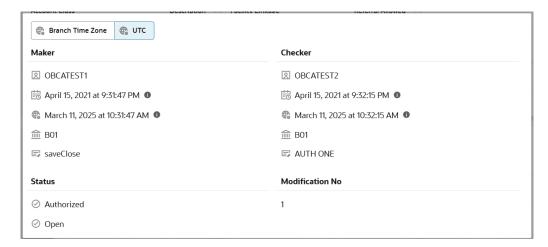

f. Click UTC tab.

The following screen is displays. This screen displays Universal Date and Time.

Figure 4-15 Audit - UTC

4.5 Manual Unmatching

This feature allows users to manually unmatch records that were previously matched incorrectly through the manual matching process. It provides a controlled workflow for selecting, submitting, and approving unmatched entries, ensuring data integrity and proper authorization.

 Click Nostro Account Transactions. Under Nostro Account Transactions, click Manual Unmatching, then click Initiate.

The **Initiate** page displays.

Figure 4-16 Initiate - Query

Specify the details as described in the following table and Query for the required messages.

Table 4-14 Initiate - Field Description

Field	Description
Reconciliation Product	Specify the Reconciliation Product used to reconcile the transaction entries during automatic reconciliation.
External Entity	Specify the name of the entity sending the external entries.
External Account	Specify the account code of the external Nostro account maintained by the external entity.
Currency	Specify the operating currency of the external account.

a. Click Query.

The statement message row(s) matching the specified fields display in the **Entries** section. By default, the matched balance entries display.

Figure 4-17 Initiate - Entries

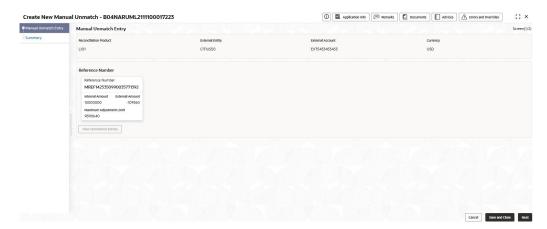

Table 4-15 Column Description

Column Name	Description
Reconciliation Product	Displays the Reconciliation Product used to reconcile the transaction entries during automatic reconciliation.
External Entity	Displays the name of the external entity sending the external entries.
External Account	Display the account code of the external Nostro account maintained by the external entity.
Currency	Displays Specify the operating currency of the external account.
Internal Matched Balance	Displays the aggregate value of transactions within the bank's internal records for which corresponding external entries have been identified and successfully matched or reconciled.
External Matched Balance	Displays the aggregate value of external transactions for which corresponding internal entries have been identified and successfully matched or reconciled.
Internal Balance	Displays the total value or amount of transactions that have been matched or reconciled internally. The balance includes both debit and credit transactions that have been successfully matched, resulting in a net balance.
External Balance	Displays the total value or amount of transactions that have been matched or reconciled externally. The balance includes both debit and credit transactions that have been successfully matched, resulting in a net balance.

- b. To clear the selected fields and query again with new search details, click **Reset**.
- c. Select the required statement and click **Initiate**.

The Create New Manual Unmatch < Application Number > page displays the Manual Unmatch Entry screen.

Figure 4-18 Create New Manual Unmatch

Make a note of the **Application Number**. It is required to identify the task at the entry and approval stages in the matching process, in the **Free Tasks** page.

Table 4-16 Fields and Description table

Fields	Description
Reference Number	The reference number for a transaction specified in the internal entry.
Internal Amount	Displays the internal amount.
External Amount	Displays the external amount.
Maximum Adjustment Limit	Displays the maximum adjustment limit.

3. Click Reference Number tab.

The Matched transaction page displays.

Figure 4-19 Matched transaction

Table 4-17 Matched Transaction - Field and Description

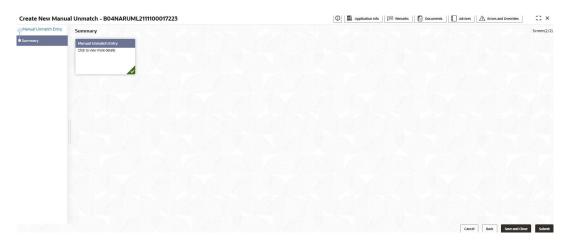

Field	Description
Value date	Displays the value date of the internal or external transaction entry. For internal entries, it is the date on which the transaction is posted to the internal accounting ledger. For external entries, it is the date on which the funds are credited or debited to the Nostro account held at the correspondent bank or financial institution.
Dr/Cr	Displays if the transaction entry is for a debit or credit transaction.
Amount	Displays the credit or debit transaction amount.
Internal Reference	Displays the internal reference number provided to the transaction by a bank's internal system to track and manage transactions by a Nostro account.
External Reference	Displays the external reference number for the transaction provided by an external entity, such as a correspondent bank or counter party, to uniquely identify the transaction from their perspective.
Transaction Code	Displays the transaction code.
Remarks	Provide details on the remarks that should be included when matching the transaction.

- **4.** The user is permitted to select only one record at a time for unmatching. Once a record is selected for unmatching, selection of other records is disabled.
- 5. Click Unmatch Entries.
- **6.** To unmatch a different record in the process flow, the user must first delete the current selection before proceeding.
- 7. Click View Unmatched Entries and click Next.

The **Summary** tab displays.

Figure 4-20 Summary

Click the summary tab to see the manual unmatch entry details.

Click Submit.

The **Stage Movement Submission** dialog displays for the new manual match entry.

Confirm the Overrides listed on this screen. Click Proceed Next.

The **Stage Movement Submission** dialog displays the **Checklist** items.

10. Confirm the checklist items and click **Proceed Next**.

The **Stage Movement Submission** dialog displays the **Outcomes**.

- **11.** Select one of the outcomes from the drop-down:
 - Proceed: To proceed with the submission.
 - Reject: To reject the submission.
- 12. Click Submit.

The account should be ready for entry if all the changes are verified successfully.

- 13. Click Task . Under Task click Free Tasks .
- 14. Search the listed tasks for the application number of the new unmatching entry. This is the number noted down in Step 2.c. The Process Name must be Nostro Manual Unmatch and the Stage must be Manual Unmatch Application Approval.
- 15. Click Acquire and Edit.

The **Nostro Manual Unmatching Approval - <Application Number>** page displays the **Summary** tab.

16. Click Submit from the Summary screen.

The **Stage Movement Submission** dialog displays.

17. Confirm the Overrides and Checklist items.

The **Stage Movement Submission** dialog displays the Outcomes.

18. Select one of the outcomes from the drop-down:

- Proceed: To proceed with the submission.
- Cancel: To cancel the submission.

19. Click Submit.

The manual unmatch is approved.

Nostro Account Enquiries

The ability to view Nostro account details, such as account balance, internal transaction bookings on a account, and matched and unmatched entries, is available through Nostro account enquiries.

The following Nostro Account Enquiries can be performed:

Account Search

Search for Nostro accounts and view the account details by following the instructions provided in this topic.

Accounting Enquiry

List the internal transactions booked on an account by following the instructions provided in this topic.

Internal Entry Query

Query for internal matched and unmatched entries posted on Nostro accounts by following the instructions provided in this topic.

5.1 Account Search

Search for Nostro accounts and view the account details by following the instructions provided in this topic.

 Click Nostro Account Enquiries. Under Nostro Account Enquiries click Account Search.

The **Account Search** page displays.

2. Click the search icon at the top left of the page.

The **Search Filter** dialog displays.

Figure 5-1 Account Search - Search Filter

Specify some or all of the details on the Account Search page. For more information on fields, refer to field description table below:

Table 5-1 Account Search - Search Filter - Field Description

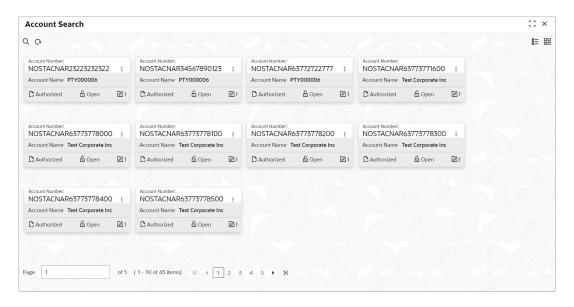

Field	Description
Account Number	Specify the Nostro account number.
Account Name	Specify the Nostro account name.
Account Type	Specify the Nostro account type.
Currency	Select the account currency. Click the Fetch icon and select the required currency from the list.
Authorization Status	Specify the authorization status of the account.
Record Status	Specify the Record status.

Search for an account using one or more attributes of the account.

4. Click Search.

The accounts matching the search entries display.

To view an Account's details, click the More Options menu on the top right of a tile and select View.

The **Account View** page displays the data segments of an Account in different tiles.

1 × **Account View** Account Name Account Number Account Class Account Type Account Opening Date NAR Test Corporate Inc NOSTACNAR63773710000 NOSTAC 29 June 2021 + [] X × **Balance Details** External Account Audit Maker Account Number Branch Currency OBCATEST1 NOSTAC00663773771700 NOSTACNAR63773710000 GBP NAR 29 June 2021 at 5:17:30 pm Ledger Balance Available Balance £15,000.00 £15,000.00 CITIUS05 Checker OBCATEST1 Date and Time 29 June 2021 at 5:17:30 pm Action Account Creation × Statement Preferences Primary Statement Type X MIS Details Status Features **Current Status** Status Since Real Time Liquidity Referral Required NORM May 18,2021

Figure 5-2 Account Search Results - Account View

To view the account balance details, click the Account Number in the Balance Details tile.

The Balance Details dialog displays.

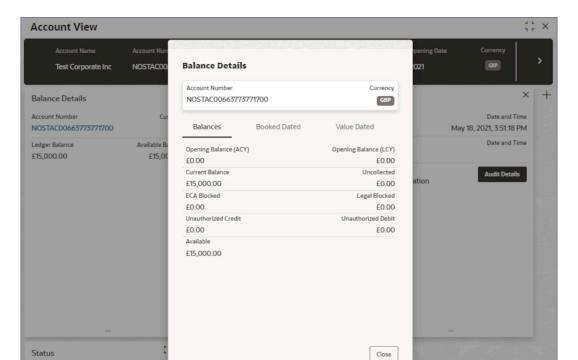

Figure 5-3 Account View - Account Balance Details

May 18, 2021

NORM

To get the expanded view of the different data segments, click the appropriate option available in each tile.

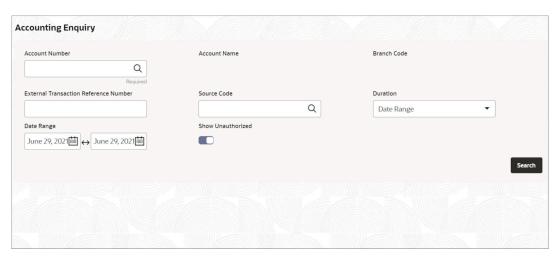

5.2 Accounting Enquiry

List the internal transactions booked on an account by following the instructions provided in this topic.

 Click Nostro Account Enquiries. Under Nostro Account Enquiries, click Accounting Enquiry.

The **Accounting Enquiry** page displays.

Figure 5-4 Nostro Account Enquiry - Accounting Enquiry

Specify the details on the Accounting Enquiry page to narrow your search results. For more information on fields, refer to field description table below:

Table 5-2 Accounting Enquiry - Field Description

Field	Description
Account Number	Specify the Nostro Account number.
Account Name	Displays with the account name that corresponds to the account number.
Branch Code	Displays with the branch that corresponds to the account number.
External Transaction Reference Number	Specify the reference number of the external transaction performed by the customer.
Source Code	Specify the code for the transaction entry journal.
Duration	Specify the duration, to retrieve transaction entries, from the following: Today: Transaction entries for the same day. Date Range: Transaction entries made between specified dates. Last 'n' transactions: Where n is the number of latest transaction to retrieve.
Last Number of Transactions	Specify the number of latest transactions to retrieve. This field displays if the Duration field is set to Last 'n' transactions .
Date Range	Specify the dates to retrieve the transactions entries. This field displays if the Duration field is set to Date Range .

Click Search.

The transaction entry details of the Nostro account for the specified duration are listed in rows.

Table 5-3 Search - Field Description

Column	Description
Value Date	The value date of the transaction.
EA Reference Number	The external accounting reference number.
Debit/Credit	The type of transaction, Debit or Credit.
Amount	The transaction amount in the account's currency.
Detail	Any details provided about the transaction.

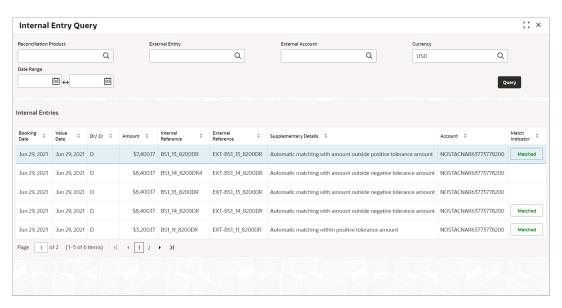

5.3 Internal Entry Query

Query for internal matched and unmatched entries posted on Nostro accounts by following the instructions provided in this topic.

 Click Nostro Account Enquiries. Under Nostro Account Enquiries, click Internal Entry Query.

The Internal Entry Query page displays.

Figure 5-5 Nostro Account Enquiries - Internal Entry Query

2. Specify the query details on the **Internal Entry Query** page. For more information on fields, refer to field description table below:

Table 5-4 Internal Entry Query - Field Description Table

Field	Description
Reconciliation Product	Specify the reconciliation product used in the transaction.
External Entity	Specify the name of the external entity.

Table 5-4 (Cont.) Internal Entry Query - Field Description Table

Field	Description
External Account	Specify the external account number of the external entity.
Currency	Specify the external account currency.
Date Range	Specify the date range to retrieve the internal transaction entries.

3. Click Query.

The internal entries that match the query fields display in rows.

Table 5-5 Query - Field Description

Field	Description
Booking Date	The Booking date for the transaction.
Value Date	The Value date for the transaction.
Dr/Cr	The type of transaction Debit (D) or Credit (C).
Amount	The transaction amount.
Currency	The transaction currency.
Internal Reference	Internal reference number for the transaction.
External Reference	External reference number for the transaction.
Transaction Code	The transaction code.
Supplementary Details	Supplementary details provided during the transaction entry.
Account Entry Seq	The sequence number in the account entry.
Acc GL	The accounting General Ledger code.
Match Indicator	Indicates the matching status of the internal and external entries. Matched: This button is visible for matched entries. Click this button to display the external entries that correspond to the chosen internal entries. Unmatched: If this field is blank it indicates an unmatched entry.

Task Management

View, Configure, and Trigger tasks by following the instructions provided in this topic.

A task executes an identified process or a set of processes. It usually executes then in bulk either periodically and in the background. This facilitates seamless integration of certain repetitive or bulk activities.

Some examples of NOSTRO Account tasks are:

- Reconciling internal and external entries
- Mapping Internal entries to external accounts
- Mapping external account entries to internal accounts
- Processing SWIFT messages

A set of standard tasks (jobs) are factory shipped with Oracle Banking Accounts and are set up as part of the initial system installation. Authorized users can create more tasks and configure the existing tasks, Task configuration determines the following:

- Trigger tasks on specific days and times using CRON expressions (Scheduled tasks)
- Trigger tasks based on events (Event based tasks)
- Perform tasks on specific branch (Both scheduled and event based tasks)

Tasks can also be triggered manually.

The following table lists the factory shipped tasks, their definition, and description.

The **Task Management** menu supports creating, viewing, configuring, triggering and monitoring tasks.

The following **Task Management** menu items are described:

- Create Task
 - Create a task by following the instructions provided in this topic.
- View Tasks

View Tasks by following the instructions in this topic.

Configure Tasks

Configure Tasks by following the instructions in this topic. Tasks are configured in the following ways:to be triggered at a specific time on a day of the month or a week. Tasks can also be triggered when a specific event occurs.

- Trigger Tasks Manually
 - Trigger Tasks manually by following the instructions in this topic.
- View Tasks Status

View the status of triggered Tasks by following the instructions in this topic.

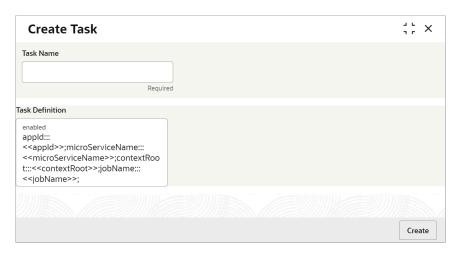

6.1 Create Task

Create a task by following the instructions provided in this topic.

Click Task Management. Under Task Management, click Create Task.
 The Create Task page displays.

Figure 6-1 Create a Task

2. Specify the fields. For more information on fields, refer to field description table below:

Table 6-1 Create Task - Field Description

Field	Description
Task Name	Specify a name for the task.
Task Definition	Specify the task definition in the following format:
	<pre>appId:::<<appid>>;microServiceName:::<<microservice name="">>;contextRoot:::<<contextroot>>;jobName:::<<jo bname="">>;</jo></contextroot></microservice></appid></pre>
	<appld>> - Specify the ID of the Application that processes the task.</appld>
	 <<microservicename>>: Specify the Id of the application that processes the task.</microservicename>
	 <<contextroot>>: Specify the context root (location of the application) where the micro-service can be accessed.</contextroot> <<jobname>>: Specify the the job performing the required task.</jobname>

To see the list of task definitions available, see Link to Appendix: Task Definitions

3. Click Create.

A pop-up toast message confirms that the status of the record creation.

6.2 View Tasks

View Tasks by following the instructions in this topic.

Click Task Management. Under Task Management, click View Tasks.
 The View Tasks page displays.

Figure 6-2 View Tasks

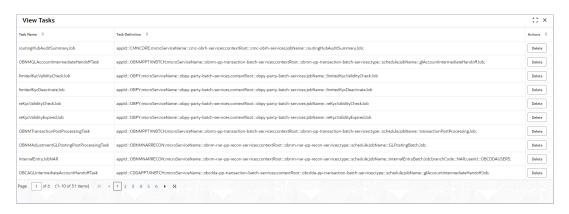

Table 6-2 View Tasks Table - Field Description

Field	Description
Task Name	Displays the name of the task.
Task Definition	Displays the task definition.
Actions	Provides an option to delete the task.

2. Click **Delete** in the **Actions** column to delete the task.

6.3 Configure Tasks

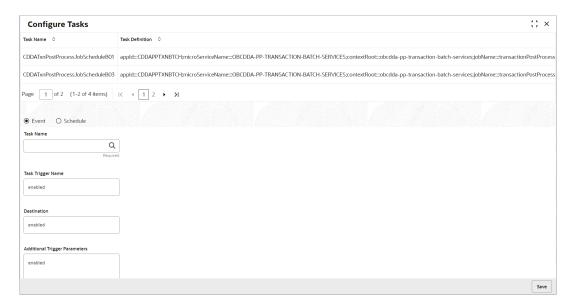

Configure Tasks by following the instructions in this topic. Tasks are configured in the following ways:to be triggered at a specific time on a day of the month or a week. Tasks can also be triggered when a specific event occurs.

1. Click Task Management. Under Task Management, click Configure Tasks.

The Configure Tasks page displays.

Figure 6-3 Configure Tasks

For more information on fields, refer to field description table below:

Table 6-3 Configure Tasks - Field Description

Field	Description
Task Name	Displays the name of the task.
Task Definition	Displays the task definition.
Actions	Provides an option to delete the task.

Specify the required fields. For more information on fields, refer to field description table below:

Table 6-4 Configure Task - Field Description

Field Name	Description
Event or Schedule	 Select Event to trigger a task when a specific event occurs. or Select Schedule to trigger a task at a specific time of a day of a month or week.
Task Name	Select the task for the event or scheduled trigger.
Task Trigger Name	Specify a unique name for the configured trigger.
CRON Expression	This field displays if you are scheduling a trigger. Enter the CRON Expression that specifies the specific time and day. The expression consists of six single space-separated fields, representing second, minute, hour, day, month, and weekday. For the month and weekday, provide the first three letters of their English names.
Destination	This field displays if you are configuring an event trigger. Specify the destination that triggers the task when a new event occurs.

Sample Task configurations are given below:

3. Click Save.

The configuration is saved and sent for authorization.

Table 6-10 Examples of CRON Expressions

CRON Expression	Description
0 0 12 * * ?	Trigger at 12:00 (PM) everyday
0 * 14 * * ?	Fire every minute starting at 2:00 PM and ending at 2:59 PM, every day
0 10,44 14 ? 3 WED	Triggers at 2:10 PM and 2:44 PM every Wed of March
0 15 10 ? * MON-FRI	Triggers at 10:15 AM every day from Monday to Friday
0 15 10 ? * 6L 2020-2025	Triggers at 10:15 AM on the last Friday of every month from 2020 to 2025
0 15 10 ? * 6#3	Triggers at 10:15 AM on the third Friday of every month
00011*	Triggers at the start of a new year

6.4 Trigger Tasks Manually

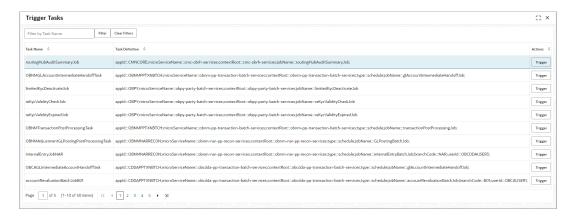

Trigger Tasks manually by following the instructions in this topic.

1. Click Task Management. Under Task Management, click Trigger Tasks.

The Trigger Tasks page displays.

Figure 6-4 Trigger Tasks

For more information on fields, refer to the field description table.

Table 6-11 View Tasks Table - Field Description

Field	Description
Task Name	Displays the name of the task.
Task Definition	Displays the task definition.
Actions	Provides an option to trigger the task.

2. Click **Trigger** in the **Actions** column to trigger the task.

The Task Trigger Status dialog displays the status of the triggered task.

6.5 View Tasks Status

View the status of triggered Tasks by following the instructions in this topic.

Click Task Management. Under Task Management, click View Tasks Status.
 The View Tasks Status page displays.

Figure 6-5 View Tasks

For more information on fields, refer to the field description table.

Table 6-12 View Tasks Table - Field Description

Field	Description	
Instance Id	Displays the auto-generated ID of the executed task instance.	
Trigger Definition Name	Displays the name of the task trigger.	
Status	Displays the status of the triggered task from the following: STARTING, STARTED, FAILED, and COMPLETED.	

Nostro Dashboard Widgets

Widgets on the dashboard give an on-demand view of the current state of different activities in the Nostro accounts. Nostro widgets on the dashboard serve several purposes. They enhance user experience, facilitate decision-making, and improve operational efficiency.

Some of the uses of Nostro widgets are listed below:

- Aggregate and present a consolidated visual representation of information from different banking systems and modules.
- Provide intuitive and easy-to-understand graphical representations like graphs and charts.
- Help monitor and track key performance indicators (KPIs), metrics, and trends in real-time.
- Customize the widgets by selecting filtered views to focus on specific transactions and activities.
- Drill down and explore detailed information underlying the summarized views.

The following Nostro widgets are available on the dashboard:

Incoming Statement Status

Nostro account receives incoming statements from correspondent banks or financial institutions, which are displayed in the Incoming Statement Status widget for visual overview of their current status. The widget displays key metrics, indicators, and summaries to monitor the progress and status of incoming statement processing.

Reconciliation Status

The Nostro accounts' reconciliation status is visually represented on the dashboard by the Reconciliation Status widget. User can monitor the progress and status of reconciliations activities with the widget, which displays key metrics, indicators, and summaries.

Currency Exposure

The Currency Exposure widget displays the matched and unmatched currency balance for internal and external transactions. The last time the widget was updated is displayed under the title. Click the **Refresh** button to get the latest updates.

Unmatched Aging

The **Unmatched Aging** widget displays the number of unmatched internal and external entries and the number of days since their creation. The last time the widget was updated is displayed under the title. Click the **Refresh** button to get the latest updates.

Manual Matching Based on Type

The **Manual Matching Based on Type** widget displays a pie chart of the number of manual matches that required adjustment. The pie chart segregation uses the adjustment types **Currency Flux** and **Others**.

• Service Request Status

The Service Request Status widget allows a drill down to view the status of different service requests in the banking system including Nostro account services. This topic discusses the Nostro account service request status that can be viewed by drilling down into this widget.

Create and Load Custom Views

Create a custom view of a Nostro Widget to track and monitor specific accounts and their activities. The default widgets provided on the Dashboard are generic and track all entities.

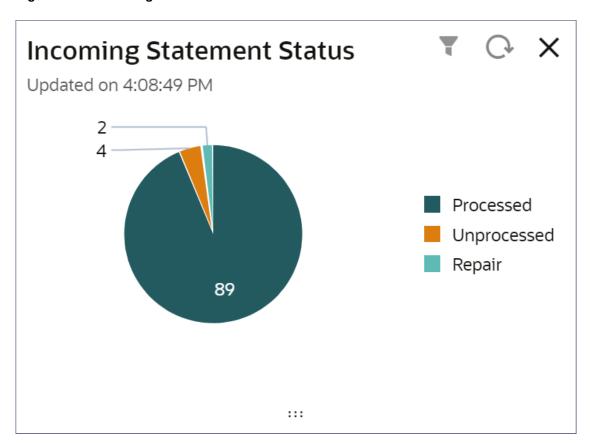

Nostro Account Balance

The Nostro Account Balance widget displays a pie chart of the number of account balance credit and account balance debit entries.

7.1 Incoming Statement Status

Nostro account receives incoming statements from correspondent banks or financial institutions, which are displayed in the Incoming Statement Status widget for visual overview of their current status. The widget displays key metrics, indicators, and summaries to monitor the progress and status of incoming statement processing.

Figure 7-1 Incoming Statement Status

The Incoming Statement Status widget provides the following information and abilities:

- Statement Processing Status
- Metrics
- Drill-down
- Customize the view

To know more about creating and viewing incoming messages, see <u>Incoming Messages</u>.

Statement Processing Status

User can monitor real-time performance, identify issues, and take appropriate actions to ensure accurate and timely processing of incoming statements.

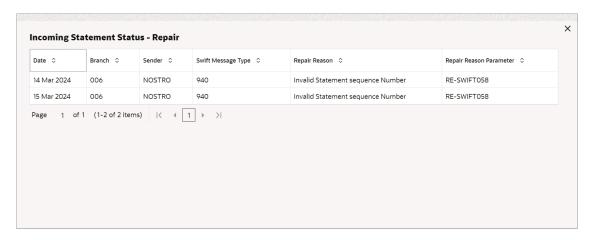

Metrics

A Pie chart displays the number of incoming statements that are processed, unprocessed, and failed to process (Repair). When user hovers over a colored coded sector, a pop-up displays the number of statements in the series.

Drill-down

User can drill down a sector to view the corresponding incoming statements and their details in the dialog that displays.

Figure 7-2 Incoming Statement Status - Repair

The table below provides details on the Incoming Statement Status in the Processed, Unprocessed, and Repair drill-down dialogs.

Table 7-1 Incoming Statement Status - Repair - Field Description

Field	Description
Date	Displays the date of the incoming statement.
Branch	Displays the branch that received the incoming message.
Sender	Displays the name of the financial institution or the correspondent bank that sent the statement.
Swift Message Type	Displays the SWIFT message type used to send the statement.
Repair Reason	Displays the reason the incoming message could not be processed.
Repair Reason Parameter	Displays the parameter value assigned to the incoming statement in the repair queue. The parameter is assigned based on the repair reason.

Note

- The Repair Reason and Repair Reason Parameter columns are present only in the Repair drill-down dialog.
- An error should be displayed to the user when page numbers are missing from the statement.

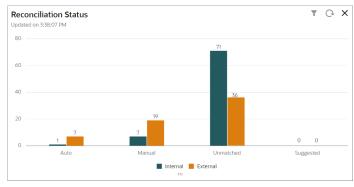

Customize the view

User can create custom views filtered by entity, currency, or reconciliation product. To create custom views for the Incoming Statement widget, see <u>Create and Load a Custom View</u>.

7.2 Reconciliation Status

The Nostro accounts' reconciliation status is visually represented on the dashboard by the Reconciliation Status widget. User can monitor the progress and status of reconciliations activities with the widget, which displays key metrics, indicators, and summaries.

The Reconciliation status widget provides the following information and abilities:

- Reconciliation Match Types
- Metrics
- Drill-down
- Customize the view

Match Types

The paired bar graphs for internal and external entries represent the following match types:

- Auto-matched
- Manual Matched
- Unmatched
- Suggested

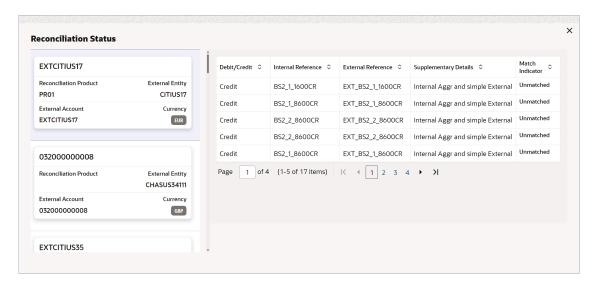

Metrics

The bar graphs display the count of internal and external entries for each Match Type. The time stamp under the title displays the latest update time. Click the **Refresh** button to get the latest updates.

Drill-Down

User can drill down each bar graph and view the accounts and the associated Match Type entries. The following image displays the drill down of the reconciliation status of accounts with entries requiring a manual match. The table in the right panel shows the details of external transaction entries requiring a manual match for each account selected in the left panel.

Figure 7-4 Reconciliation Status - Unmatched Entries

For more information on fields, refer to the field description table.

Table 7-2 Reconciliation Status - Field Description

Field	Description
Debit/Credit	Displays if the transaction entry is for a debit or credit transaction.
Internal Reference	Displays the internal reference number provided to the transaction by a bank's internal system to track and manage transactions by a Nostro account.
External Reference	Displays the external reference number for the transaction provided by an external entity, such as a correspondent bank or counterparty, to uniquely identify the transaction from their perspective.
Supplementary Details	Displays additional information or data associated with the transaction that may be relevant for further analysis, reconciliation, or reporting purposes.
Match Indicator	Displays if the transaction entry is matched or unmatched.

Customize the view

User can create custom views filtered by entity, currency, or reconciliation product. To create custom views for the Reconciliation Status widget, see <u>Create and Load a Custom View</u>.

7.3 Currency Exposure

The Currency Exposure widget displays the matched and unmatched currency balance for internal and external transactions. The last time the widget was updated is displayed under the title. Click the **Refresh** button to get the latest updates.

Figure 7-5 Dashboard Widgets - Currency Exposure

Customize the widget to display currency exposure for a specific or combination of currency, external entity, or reconciliation product.

To create and view a custom **Currency Exposure** widget, see <u>Create and Load a Custom View</u>.

7.4 Unmatched Aging

The **Unmatched Aging** widget displays the number of unmatched internal and external entries and the number of days since their creation. The last time the widget was updated is displayed under the title. Click the **Refresh** button to get the latest updates.

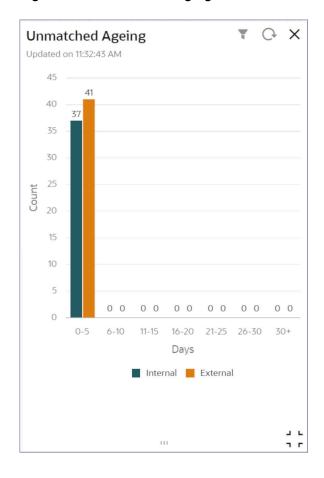

Figure 7-6 Unmatched Aging

To create and view a custom Unmatched Aging widget, see Create and Load a Custom View.

7.5 Manual Matching Based on Type

The **Manual Matching Based on Type** widget displays a pie chart of the number of manual matches that required adjustment. The pie chart segregation uses the adjustment types **Currency Flux** and **Others**.

The following image displays sixteen manual matching events with a count of two for the Currency Flux adjustment type and a count of fourteen for the Other adjustment type. The last time the widget was updated is displayed under the title. Click the **Refresh** button to get the latest updates.

Manual Matching Based on Type

Updated on 11:32:43 AM

Currency Flux

Figure 7-7 Dashboard Widget - Manual Matching Based On Type

To create and view a custom **Manual Matching Based on Type** widget, see <u>Create and Load</u> a <u>Custom View</u>.

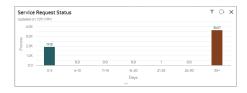

7.6 Service Request Status

The Service Request Status widget allows a drill down to view the status of different service requests in the banking system including Nostro account services. This topic discusses the Nostro account service request status that can be viewed by drilling down into this widget.

The Service Request Status widget displays the total number of different service requests in groups of five days going back over a period of 30 days. Double click the results in the graph to view the following Nostro service requests:

- Nostro Reconciliation Manual Match
- Nostro Account Closure
- Nostro Account Modification
- Nostro Account Creation

Figure 7-8 Service Request Status

To view a Nostro service request status:

- Click the bar on the chart in the required day range.
 A dialog displays the different services offered in the vertical scroll bar to the left.
- Click the required Nostro service.
 The number of that service request raised for each of the NOSTRO class display in green bubbles.

Figure 7-9 Service Request - Nostro Account Modification

Click a bubble to view the request details.
 A dialog displays the service requests details. The following sample image shows the service requests table for Nostro Account Modification.

Figure 7-10 Service Request status report table - Nostro Account Modification

For more information on fields, refer to the field description table.

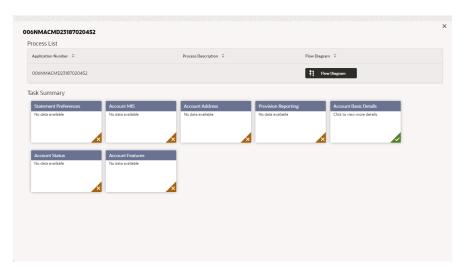

Table 7-3 Report Table - Field Description

Field	Description
Application Number	Displays the application number generated for the service request.
Process Reference Number	Displays the reference number generated when the request is assigned to the respective business process.
Customer Name	Displays the name of the customer requesting the service.
Currency	Displays the currency of the customer's account.
Account Number	Displays the account number for which the service is raised.
Status	Displays the status of the service request.
Relationship Manager	Displays the name of the relationship manager assigned to the customer.

4. Click on the Application Number to open the service request. The service request application displays. The following image shows a Nostro Account Modification application.

Figure 7-11 Service Request Application

- 5. Click **Close** at the top right to close the application dialog.
- 6. Click outside the dialog to close the status report table dialog.
- Click Close to close the service request status dialog.

To create and view a custom **Service Request Status** widget, see <u>Create and Load a Custom</u> View.

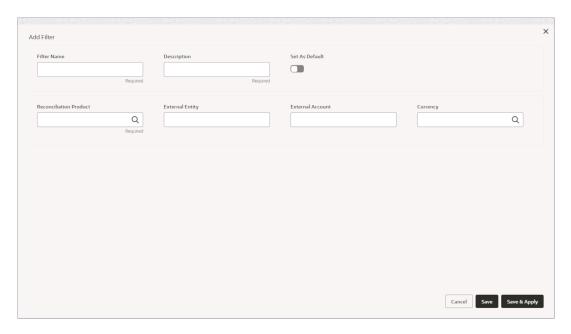

7.7 Create and Load Custom Views

Create a custom view of a Nostro Widget to track and monitor specific accounts and their activities. The default widgets provided on the Dashboard are generic and track all entities.

Click the Filter icon on the top right of a widget and click Add.

The Add Filter dialog displays.

Figure 7-12 Add Filter

Specify the details on the Add Filter dialog. For more information on fields, refer to the field description table.

Table 7-4 Add Filter - Field Description

Field	Description
Filter Name	Provide a name for the custom filter.
Description	Describe the custom filter.
Reconciliation Product	Select the reconciliation product. Click the Fetch icon and select the required reconciliation product from the list.
Set as Default	Toggle it on to set the filter as the default.
External Entity	Enter the BIC ID of the external entity.
External Account	Enter the account number of the external entity.
Currency	Select the currency. Click the Fetch icon and select the required currency from the list.

- 3. Click Save and Apply.
- 4. Load the custom view.
 - a. Click the Filter icon.

The **Filters** dialog displays the custom filters.

b. Click a custom filter.

The custom view displays.

- Update a custom filter.
 - a. Click the Filter icon.

The **Filters** dialog displays the custom filters.

b. Click the **Edit** icon on the custom filter.

The **Update Filter** dialog box displays.

c. Specify the details on the **Update Filter** dialog.

The field description table is provided in Step 2.

7.8 Nostro Account Balance

The Nostro Account Balance widget displays a pie chart of the number of account balance credit and account balance debit entries.

The last time the widget was updated is displayed under the title. Click the **Refresh** button to get the latest updates.

Figure 7-13 Nostro Account Balance

To view a Account Balance Details:

- 1. Click the pie chart in the Debit balance, system need to show all the nostro external account currency wise which has a negative balance.
- 2. Click the pie chart in the Credit balance, system need to show all the nostro external account currency wise which has a positive balance.

To create and view a custom **Nostro Account Balance** widget, see <u>Create and Load a Custom View</u>.

Functional Activity Codes

System administrators use Functional Activity Codes to configure User Interface (UI) components and permit functional roles to access different UI components. The codes described in this topic are specific to Nostro accounts.

Table A-1 Nostro Functional Activity Codes

Screen Name / API Name	Functional Activity Code	Action	Description
Account Address	OBNM_FA_ADDRESS	GET	Address Data Segment
Account Audit	OBNM_FA_AUDIT	GET	Audit Data Segment Details
Account Balance	OBNM_FA_ACC_BALA NCE_DETAILS	GET	Account Balance Details
Account Domain	OBNMPM_FA_ACCOU NT_DOMAIN _AGG_SAVEDOMAIND ATA	SAVE	Save Domain Data
Branch Parameters	OBNM_FA_BRANCHPA RAM_AMEND	AMEND	Amend Branch Parameters

Error Codes and Messages

The error codes and messages that occur when using the Nostro Reconciliation module are described in this topic.

Table B-1 List of Error Codes and Messages

Error Codes	Error Message
GCS-COM-027	Not a valid Key Id: \$1)
RE-STMIN001	Unhandled Exception in the Statement Input Function.
RE-STMIN002	Unhandled Exception in the Statement Input Function.
RE-STMIN003	Unhandled Exception in the Statement Input Function.
RE-STMIN004	Unhandled Exception in the Statement Input Function.
RE-STMIN005	Unhandled Exception in the Statement Input Function.
RE-STMIN006	Unhandled Exception in the Statement Input Function.
RE-STMIN007	Unhandled Exception in the Statement Input Function.
RE-STMIN008	Unhandled Exception in the Statement Input Function.
RE-STMIN009	Unhandled Exception in the Statement Input Function.
RE-STMIN010	Unhandled Exception in the Statement Input Function.
RE-STMIN011	Opening balance plus the Net Transaction Amount is not equal to the Closing Balance.
RE-STMIN041	External Account is mandatory for an External Entity.
RE-STMIN042	Failed to generate External Statement Report.
RE-STMIN051	Statement already exists.
RE-STMIN052	Year of Statement less than Current Year.
RE-STMIN053	Year of Statement greater than Current Year.
RE-STMIN054	Statement Sequence No less than or equal to 0.
RE-STMIN055	Statement Sub-sequence number less than 0.
RE-STMIN056	Current Statement is earlier than the Latest Statement.
RE-STMIN057	Current Statement is earlier than the Latest Statement.
RE-STMIN058	Current Statement earlier than the Latest Statement.
RE-STMIN059	Statement/s are missing between the Latest Statement and the Current Statement.
RE-STMIN060	Statement/s are missing between the Latest Statement and the Current Statement.
RE-STMIN061	Statement/s are missing between the Latest Statement and the Current Statement.
RE-STMIN066	Gap present between the Closing Balance Date of the Previous Statement and the Opening Balance Date of the Current Statement.
RE-STMIN067	Closing Balance of Previous Statement not equal to Opening Balance of Current. Statement.
RE-STMIN068	Gap present between the Closing Balance Date of the Current Statement and the Opening Balance Date of the Next Statement.
RE-STMIN069	Closing Balance of Current Statement not equal to Opening Balance of Next Statement.

Table B-1 (Cont.) List of Error Codes and Messages

Error Codes	Error Message
RL_DF_006	Ends with function is not applicable for Date.
RL_DF_007	Date cannot be compared with other data type.
RL_DF_008	Please provide the date in the format yyyy-MM-dd.
SCF-ER-10	Work flow initiation failed.
SCF-ER-11	Invoice Transaction is already in Progress.
SCF-ER-12	Payment Transaction is already in Progress.
SCF-ER-13	Cash flow Transaction is already in Progress.
SCF-ER-15	Unable to acquire invoice involved in reconciliation.
SCF-ER-16	Record state is not consistent for cash flow.
SCF-ER-17	Failed while purging cash flow.
SCF-ER-18	Failed while updating Invoice/Payments.
SCF-ER-19	Failed while updating cash flow.
SCF-ER-20	Unable to acquire credit note involved in reconciliation.
RL_DF_009	Record with same Rule Description already present.
GCS-AUTH-05	Failed to Authorize the record.
GCS-CLOS-04	Failed to Close the record.
GCS-COM-012	Error saving child data segment, Master validation failed.
GCS-COM-013	Error saving the data segment.
GCS-COM-014	Error validating the data segment.
GCS-COM-015	Error submitting the data segment.
GCS-COM-016	Unexpected error occurred during runtime.
GCS-COM-017	Error deleting the extended data segment.
GCS-COM-018	Remove lock failed.
GCS-COM-019	Revert call to extended data segment failed.
GCS-COM-020	Revert call to sub-domain data segment failed.
GCS-COM-021	Error deleting the sub-domain data segment.
GCS-COM-022	Authorize call to extended data segment failed.
GCS-COM-023	Authorize call to sub-domain data segment failed.
GCS-COM-025	Client error occurred during API call.
GCS-COM-026	Invalid data segment code.
GCS-DEL-008	Failed to Delete the record.
GCS-DEL-009	No valid prevalidated modifications found for deletion.
GCS-MOD-008	Failed to Update the record.
GCS-REOP-05	Failed to Reopen the record.
GCS-REVT-01	Record reverted successfully.
GCS-REVT-02	Failed to Revert the record.
GCS-SAV-004	Failed to create the record.
GCS-LOCK-01	Remove dirty lock failed.
GCS-VAL-01	Field Validation Failed.
SCF-ER-21	Unable to reconcile as finance outstanding amount is greater than max finance eligible amount of outstanding invoice.
RL_DF_010	All virtual accounts should belong to the same customer.
ER61	Transaction cannot be processed.

CAPP-PP-BLQ-02	\$1 balance queries not allowed.
CAPP-PP-BLQ-03	From Date \$1 cannot be later than To Date \$2.
CAPP-PP-BLQ-04	Date range search cannot exceed \$1 days.
CAPP-PP-BLQ-05	Balance details not found for given criteria.
CAPP-PP-BLQ-06	Error occurred while fetching the balance details.
CAPP-PP-BLQ-07	Invalid value for field \$1.
RE-VALS-009	External Account Number must be Alphanumeric and can contain upto a maximum of 35 characters.

C

Internal and External Entry Attributes

The attributes associated with Nostro internal and external transactions are described in this topic.

Table C-1 Attributes of Internal Nostro Entries

Attribute Name	Description
Aggregated Credit Amount Lower Threshold	The lower amount value used as a threshold after applying the tolerance on the aggregated internal credit amount. The threshold can be computed as an absolute amount or as a percentage value.
Aggregated Credit Amount Upper Threshold	The upper amount value used as a threshold after applying the tolerance on the aggregated internal credit amount. The threshold can be computed as an absolute amount or as a percentage value.
Aggregated Debit Amount Lower Threshold	The lower amount value used as a threshold after applying the tolerance on the aggregated internal debit amount. The threshold can be computed as an absolute amount or as a percentage value.
Aggregated Debit Amount Upper Threshold	The upper amount value used as a threshold after applying the tolerance on the aggregated internal debit amount. The threshold can be computed as an absolute amount or as a percentage value.
Amount	Internal amount of a given transaction. This could represent a charged amount, interest amount, or any other amount.
Amount Lower Threshold	The lower amount tolerance for the internal amount for each internal entry.
Amount Upper Threshold	The upper amount tolerance for the internal amount for each internal entry.
Credit Amount Lower Threshold	The lower amount value used as a threshold after applying the tolerance on the internal credit amount. The tolerance can be computed as an absolute amount or as a percentage value.
Credit Amount Upper Threshold	The upper amount value used as a threshold after applying the tolerance on the internal credit amount. The tolerance can be computed as an absolute amount or as a percentage value.
Currency	The currency of the internal entry for a transaction.
Date Lower Threshold	The lower date computed as a threshold after applying the date tolerance on the internal value date.
Date Upper Threshold	The upper date computed as a threshold after applying the date tolerance on the internal value date.
Debit Amount Lower Threshold	The amount value used as a lower threshold after applying the tolerance on the internal debit amount. The tolerance can be computed as an absolute amount or as a percentage value.
Debit Amount Upper Threshold	The amount value used as an upper threshold after applying the tolerance on the internal debit amount. The tolerance can be computed as an absolute value or as a percentage value.

Table C-1 (Cont.) Attributes of Internal Nostro Entries

Attribute Name	Description
External Account	ID of the External bank account.
External Entity	Name of the external bank or entity holding a Nostro account.
External Reference Number	The external reference number for a transaction specified in the internal entry.
Internal Aggregated Credit Amount	Internal aggregated credit amount is the sum of all the internal credit amounts for entries that are grouped based on certain matching criteria defined in the rule definition. For example, amounts in entries whose reference numbers, currency, and value date are identical for internal and external entries.
Internal Aggregated Debit Amount	Internal aggregated debit amount is the sum of all the internal debit amounts for entries that are grouped based on certain matching criteria defined in the rule definition. For example, amounts in entries whose reference numbers, currency, and value date are identical for internal and external entries.
Internal Credit Amount	The credit amount specified in the internal entry.
Internal Debit Amount	The debit amount specified in the internal entry.
Internal Reference Number	The internal reference number for a transaction specified in the internal entry.
Recon Product	The reconciliation product available in the internal entry.
Value Date	The date on which the value of the internal transaction or account become effective.

Table C-2 Attributes of External Entries

Attribute Name	Description
Amount	Amount of the original transaction in the external entry. This could represent a charged amount, interest amount, or any other amount.
Currency	The currency of the transaction.
External Account	The external account number.
External Aggregated Credit Amount	External aggregated credit amount is the sum of all the external credit amounts for entries that are grouped based on certain matching criteria defined in the rule definition. For example, amounts in entries whose reference numbers, currency, and value date are identical for internal and external entries.
External Aggregated Debit Amount	External aggregated debit amount is the sum of all the external debit amounts for entries that are grouped based on certain matching criteria defined in the rule definition. For example, amounts in entries whose reference numbers, currency, and value date are identical for internal and external entries.
External Credit Amount	The credit amount specified in the external entry.
External Debit Amount	The debit amount specified in the internal entry.
External Entity	Name of the external bank or entity holding a Nostro account.
External Reference Number	The external reference number for a transaction specified in the internal entry.

Table C-2 (Cont.) Attributes of External Entries

Attribute Name	Description
Internal Reference Number	The internal reference number for a transaction specified in the internal entry.
Recon Product	The reconciliation product available in the internal entry.
Value Date	The date on which the value of the external transaction or account become effective.

Common Icons

This topic provides the information about all the common icons used in the application.

The list of common icons are as follows.

Table E-1 List of Icons

Icon	Description
New	Creates a new record for the selected screen.
Query	View all the configured records for the selected screen.
Unlock	Unlock the configured record for the selected screen.
Search	Search the configured record and select the required record for the selected screen.
Сору	Copy the configured record, modify the details, and save with a different name for the record.
Delete	Remove the configured record for the selected screen.
Reopen	Reopens a closed record for the selected screen.
Close	Closes the configured record for the selected screen.
Print	Print view the configured record for the selected screen.
Authorize	Authorize the configured record for the selected screen.
Collapse	Minimizes the opened screen to the bottom left corner of the screen.
Remove	Closes the opened screen.
Audit	Check the history of the configured records for the selected screen.
Save	Save the configured record for the selected scree
Cancel	Discard the configured record before saving it.
+	Add a row in the grid to provide the required record for the selected screen.
-	Remove a row in the grid for the selected screen.
>	Select a record and move it to the required selected list grid.
<	Select a record and move it back to the available list grid.
>	Move all the available list of records to the selected list of grid.
<	Move back all the selected list of records to the available list of grid.
