This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

# Purpose

This guide is designed to help user quickly get acquainted with the features and functionality of **Oracle Banking Retail Deposits Cloud Service**. It provides an overview to the product and the steps involved in the creation and the maintenance of Retail Deposits.

# Before You Begin

User Can refer the guide **Getting Started with Oracle Banking Cloud Service** for common elements, including Symbols and Icons, Conventions Definitions, and so forth.

## Module- Prerequisite

Specify **User Name** and **Password**, and login to **Home** screen.

#### **Module Definitions**

#### **Business Product**

User can classify the customer accounts of the bank into different groups and assign each group an identifying code

#### **Amount Block**

An amount block is that part of the balance in a customer's account, which is reserved for a specific purpose.

# **Audience**

This user guide is intended for the following end Users / User Roles in a Bank:

#### Table User Roles

User Role	Functions
Back Office Clerk	Input functions for contracts
Back Office Managers/Officers	Authorization functions
Product Managers	Product definition and authorization
End of Day Operators	Processing during End of Day/ Beginning of Day
Financial Controller/Product Managers	Generation of reports

## **Basic Actions**

This topic describes about basic actions that can be performed on a screen.

#### **Table Basic Actions**

Action	Applicable Stages	Description
Approve	Approval	The system displays a section where approval remarks if any can be input. Click <b>OK</b> to submit. The transaction is sent to the Host system through <i>Oracle Banking Routing Hub</i> . The Host system validates the transaction again and the transaction is created if all the validations are successful. If the transaction fails, the transaction is moved to Handoff retry stage, and user can view the error message. In this stage, the authorizer can retry or reject the transaction. On reject, the transaction is sent back to the maker to modify or delete it.
		<b>Note</b> : The maker checker validation will be provided if the same maker tries to approve the transaction.
Audit	Initiation, Approval and Hand off Retry	Audit details provide the logs of users who have acted on the transaction, the transaction date, and the time for all stages that the transaction has passed through.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Auto Authorizatio n	Initiation	Auto authorization can be configured for the branch servicing screens by creating a Rule based on life cycle code.  The steps to create the Auto authorization as follows:
		Create the fact value as LIFECYCLECODE.
		2. Create Rule to enable Auto authorization for any servicing screen and add the expression in Rule for that screen's lifecycle code. While creating a Rule the product processor should be given as DEPOSIT and fact should be selected as LIFECYCLECODE. For Example:
		IF ( LIFECYCLECODE == TDPOMN )
		output
		Section1 LEVEL:0
		3. Create or modify a Rule Group with Name <b>DepositRuleGroup</b> and map the Rule(s) created in the step (2).
		Note  You can define one single Rule for all the screens and add the expression for the life cycle code or you can define individual Rule for each screen and map to the Rule group.
		<b>Note</b> : For more information, refer to the <i>Oracle Banking Common Core User Guide</i> to create Fact, Rule and Rule Group.
Back	Initiation, Approval, and Hand off Retry	In case the user missed to specify or need to modify the details in the previous segment, click to navigate to the previous segment.
Cancel	Initiation, Approval and Hand off Retry	Cancel operation cancels the transaction input midway without saving any data. The user is alerted that the input data would be lost before confirming the cancellation.
Change Log	Approval	When the authorizer clicks on the <b>Change Log</b> button, the system displays the changes made to the transaction in a pop-up window. By default, the change log is set to display only modified values. The <b>Change Log</b> button has two options, they are, <b>All</b> and <b>Updated</b> . The <b>All</b> button displays both modified and non-modified fields and the <b>Updated</b> button displays only the modified fields. The old and new values are displayed so that the authorizer can compare or verify the values and decide on further action. Also, the new values appear is red for easy recognition.
Close	Initiation, Approval and Hand off Retry	Users can close the transaction input screen. The system displays a warning message to the user that any unsaved data would be lost. User can either choose to ignore the message and close the screen or choose to <b>Save and Close</b> the transaction.

#### Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Delete	Initiation	Delete operation deletes the transaction without saving any data. The user is alerted that the input data would be lost before confirming the deletion.
Document	Initiation, Approval and Hand-off Retry	The maker of the transaction can click on <b>Document</b> to upload documents that are relevant to the transaction. Once uploaded, the documents are available for viewing during authorization or by the maker.
Host Error	Hand Off Retry	Hand off Retry comes into use whenever a transaction input from the mid-office system fails authorization due to Host System rejection. The authorizer of the transaction can view the reason for Host rejection and take appropriate action.
i icon	Initiation, Approval and Hand-off Retry	To view the Customer details such as the photograph, signature, customer ID, Account Branch, and balance, the i icon is used. The i icon becomes active once the maker of the transaction inputs the account number and tabs out of the field. The i icon is useful to inquire customer information about both the debit and the credit account numbers.
Maximize	Initiation, Approval and Hand off Retry	User can maximize the transaction input screen.
Minimize	Initiation, Approval and Hand-off Retry	Users can minimize the transaction input screen. When the screen is minimized, it appears as to a separate tab within the same web page.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Multi-Level Authorizatio n	Initiation	Multi-level authorization can be configured for the branch servicing screens by creating a Rule based on life cycle code.  The steps to create the Multi-level authorization as follows:
		Create the fact value as LIFECYCLECODE.
		Create Rule to enable Multi-level authorization for any servicing screen and add the expression in the Rule for that screen's lifecycle code.  While creating a Rule the product processor should be given as DEPOSIT and fact should be selected as LIFECYCLECODE.  For Example:
		IF ( LIFECYCLECODE == TDPYIN )
		output
		Section1 LEVEL:1~DSR_FA_TDPAYIN_AUTH, LEVEL:2~DSR_FA_TDPAYIN_AUTH
		(i) Note
		If customer wants to use separate Functional Activity Code for each Level then Rule output need to be define like
		LVELE:1~ <functional_activity_code1>, LVELE:2~<functional_activity_code2></functional_activity_code2></functional_activity_code1>
		·
		3. Create or modify a Rule Group with name ApprovalRuleGroup and map the rule(s) created in the step (2).
		Note  You can define one single rule for all the screens and add the expression for the life cycle code or you can define individual rule for each screen and map to the rule group.
		<b>Note</b> : The maker checker validation will be provided if the same maker tries to authorize the single or multi-level approval tranaction.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Overrides	Initiation, Approval and Hand-off Retry	If override messages had appeared during initiation stage and they were accepted by the maker during submission, the <b>Overrides</b> button appears in the Initiation screen if the transaction is subsequently rejected by the authorizer.
		On the <b>Override Details</b> section, click <b>Decline</b> to go back to the transaction screen to modify or cancel it, or click <b>Accept</b> to complete the initiation stage and move the transaction to the approval stage. The <b>Overrides</b> button is displayed in the Approval and Hand-off retry stage if there were any override messages generated during initiation and accepted by the maker. When the <b>Overrides</b> button is clicked, the system displays the overrides accepted by the maker.
		After verifying the transaction and override details, the authorizer can either approve or reject the transaction. Existing Approve Transaction section is modified to display the overrides if any overrides are raised during the initiation submits.
Reject	Approval and Hand off Retry	When an authorizer chooses to reject a transaction, the <b>Reject</b> icon is used. The system displays a pop-up screen to capture the Rejection remarks if any. Click <b>OK</b> for the transaction to be routed back to the initiation stage. Subsequently, the maker can modify or delete the transaction details.
Remarks	Initiation, Approval and Hand-off Retry	Remarks can be used either by the maker or the authorizer of the transaction to optionally capture useful information about the transaction.
Reset	Hand off Retry	The reset button clears all the details displayed on the screen and allows input or selection of a different customer number.
Retry	Hand off Retry	The possibility of retrying a transaction arises when transaction input from the mid-office system fails authorization due to Host System rejection. Such host-rejected transactions will be present in the Hand off Retry queue in the Task Wizard. The Retry option is available only to the authorizer. Upon Retry, the transaction is sent to the host once again through Oracle Banking Routing Hub. Optionally, the authorizer can also Reject the transaction in which case it is routed back to the maker.
Save and Close	Initiation	In case a transaction has to be closed midway due to a lack of sufficient information, the maker of the transaction can choose this option.  On <b>Save and Close</b> , the input details are saved and the transaction screen is closed. Saved transaction details will be available in <b>My task</b> . Users can select the transaction from <b>My Task</b> and proceed with the transaction or delete it.
Submit	Initiation	After submitting the initiation stage, the system validates the transaction with the host and displays the errors or overrides if any. In case of an error, you can modify and resubmit or cancel the transaction. In case of an override, you can modify and resubmit or proceed with the transaction by accepting the overrides.

# **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <a href="http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc">http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc</a>.

#### **Access to Oracle Support**

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## **Diversity and Inclusion**

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## **Related Documents**

The related documents are as follows:

# Module Postrequisite

Once done with Account Configuration, User should Logout by clicking logout at the right corner.

# Configurations

This topic contains the following **Configurations** as subtopics:

- Retail Deposits Business Product
  - Users can classify the customer accounts of the bank into different groups and assign each group an identifying code.
- Deposit Pay-in Maintenance

The deposit pay-ins to be done by GL, user needs to maintain the GL details through the Deposit Pay-in Maintenance screen.

## 1.1 Retail Deposits Business Product

Users can classify the customer accounts of the bank into different groups and assign each group an identifying code.

Each group is referred to as a **Business Product** and is maintained in the **Retail Deposits Business Product Configuration** screen. User also define certain common fields applicable to the accounts in this business product, such as the General Ledger lines to which the accounts in this report to facilities granted to the account holders.

Business Product definition and various features are captured across the following subscreens covered as subtopics.

- Basic Details
- Features
- Preferences
- Tenor Parameters
- Rate Chart Parameters
- Maturity Instructions
- Maturity Holiday Treatment
- Interest
- MIS

This topic contains the following sub-topics:

Create Business Product

This topic describes the systematic instructions to create business product. The maintenance screen allows the user to configure business product parameters.

View Business Product

This topic explains the systematic instructions to view the list of configured business product parameters.

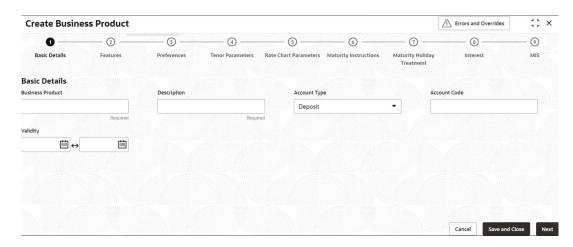

#### 1.1.1 Create Business Product

This topic describes the systematic instructions to create business product. The maintenance screen allows the user to configure business product parameters.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click Retail Deposits Business Product. Under Retail Deposits Business Product, click Create Business Product.

The Create Business Product screen displays.

Figure 1-1 Create Business Product - Basic Details

The fields marked as **Required** are mandatory.

3. Specify the fields on the **Basic Details** screen.

Table 1-1 Basic Details - Field Description

Field	Description
<b>Business Product</b>	Specify the business product code to be maintained. This indicates the class code or template code. This code is referenced during the deposit creation.
Description	Specify the description for the business product.
Account Type	Specify the account as <b>Deposit</b> . This is the default value.

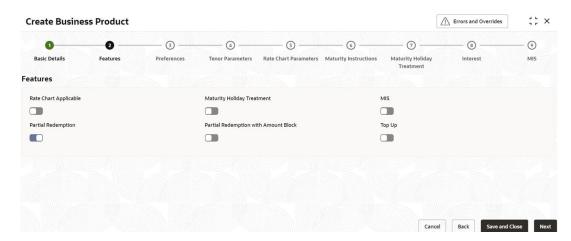

Table 1-1 (Cont.) Basic Details - Field Description

Field	Description
Account Code	As per user bank's requirement, user can choose to classify business products into different account codes. The bank can decide the way the business products are to be assigned to different account codes. An account code can consist of a maximum of four characters.
	An account code can be part of the customer account mask.
	If the customer account mask consists of an account code, the value in this field is used as part of deposit account number generation.
Validity	Specify the validity period of the business product by specifying the start date and the end date. End date is optional.

After specifying the fields in the Basic Details screen, click Next.

The Features screen displays.

Figure 1-2 Create Business Product - Features

Specify the fields on Features screen.

Table 1-2 Features - Field Description

Field	Description
Rate Chart Applicable	Switch this toggle <b>ON</b> , if balance and tenor based rates are applicable. If this option is enabled, the <b>Rate Chart Parameters</b> data segment will be displayed in the screen.
Maturity Holiday Treatment	Switch this toggle <b>ON</b> , if maturity holiday treatment is applicable. It determines the treatment applicable for deposit account, if the maturity date falls on a holiday. If this option is enabled, the <b>Maturity Holiday Treatment</b> data segment will be displayed in the screen.

Table 1-2 (Cont.) Features - Field Description

Field	Description
MIS	Switch this toggle <b>ON</b> , to capture the MIS details for the product.  If this option is enabled, the <b>MIS</b> data segment will be displayed in the screen.
Partial Redemption	Switch this toggle <b>ON</b> , to indicate that partial redemption is allowed. If this option is not enabled, then partial redemption will not be allowed on deposits under this business product. The default value is <b>OFF</b> .
Partial Redemption with Amount Block	Switch this toggle <b>ON</b> , to indicate that partial redemption is allowed for the deposits with amount blocks. If the deposit is linked partially then partial redemption of the deposit will be allowed only if you enable this option.  The default value is <b>OFF</b> .
Тор Uр	User can top-up an existing deposit by adding funds to the deposit account.

After specifying the fields in the Features screen, click Next.

The **Preferences** screen displays.

Figure 1-3 Create Business Product - Preferences

(i) Note

The fields marked as **Required** are mandatory.

7. Specify the fields on **Preferences** in **Deposits** screen.

Click **Add** button in the **Preferences** screen to specify the currency code, minimum opening deposit amount, maximum opening deposit amount, and top up units. For more information on fields, refer to the field description table below.

Table 1-3 Preferences - Field Description

Field	Description
Minimum and Maximum Limits for Deposits	The min and max limits feature in Deposits business product allows for the bank to include the limits for deposit opening, top-up and deposit lifecycle balance threshold for deposit processing
Currency Code	Specify the currency code or click <b>Search</b> icon to select the applicable currency from the list for which the minimum and maximum opening deposit amount is to be maintained.
Threshold Type	<ul> <li>This field is a dropdown list. This field denotes the event type for which the minimum and maximum limits are being defined. This field will support the below 3 types as static values:</li> <li>Deposit Creation: This type to be selected for defining the minimum and maximum limits of the deposit amount that is required for opening a deposit. If there are no values provided for this field, then it is understood that there is no minimum or maximum deposit opening amount limits.</li> <li>Top-up: This type to be selected for defining the minimum and maximum limits of the amount when processing a top-up transaction for the deposit. If there are no values provided for this field, then it is understood that there is no minimum or maximum amount limits for top-up. Top-up units: This field is applicable only when the "Threshold Type" is Top-up. This is an existing field and this denotes the incremental unit in which the top-up can be done. Eg: If this value is 50, then the top-up can be done for \$50, \$100, \$150, \$200 and so on.</li> <li>Balance Threshold: This type to be selected for defining the minimum and maximum deposit balance over the lifecycle of the deposit (that is, the balance in the deposit account at any point in the deposit lifecycle cannot breach these limits). Eg: Any lifecycle operation such as a deposit opening, top-up, redemption cannot breach these limits. If there are no values provided for this field, then it is understood that there is no minimum or maximum amount limits to be validated over the lifecycle of the deposit.</li> <li>Note:</li> <li>The values for minimum and maximum amounts provided for the threshold type "Deposit Creation" cannot breach the limits if provided for the "Balance Threshold".</li> <li>Similarly, the values for minimum and maximum amounts provided for the threshold type "Top-up" cannot breach the limits if provided for the "Balance Threshold".</li> </ul>
Minimum Amount	Specify the minimum opening deposit amount for the deposit product. If the deposit funding amount is less than minimum opening deposit amount, then the system will reject the deposit creation.

Table 1-3 (Cont.) Preferences - Field Description

Field	Description
	Description
Maximum Amount	Specify the maximum opening deposit amount for the deposit product.  If the deposit funding amount is greater than the maximum opening deposit amount, then system will reject the deposit creation.
Units	Specify the units for the deposit product. The top-ups done on the deposit product should be basis the units if configured. Eg: If top-up unit is USD 500, then top-up can be done for UDS 500, USD 1000, USD 1500 etc.
Action	Click the <b>Edit</b> icon to edit the values specified, or click <b>Delete</b> icon to delete the added row.
Deposit Statement	Switch this toggle ON, to specify the cycle, and statement format to get the deposit statement for the transactions.
Credit GL	Specify the GL to which an account balance should belong. Click <b>Search</b> icon and select the credit GL from the list of values.
Funding Options	Specify the option(s) through which the deposit can be funded. When the deposit is opened, a validation ensures that the deposit is funded only through the selected option(s). The available options are External Account, Check, General Ledger, and Account.
Deposit Creation without Funding	System will support the capability to allow opening a zero balance deposit by the bank, which can be funded later. It is to be noted that this funding should happen within the configured number of days at the deposit business product, if not, then the zero balance deposit will be closed automatically.
Zero Balance Deposit	Switch this toggle ON to enable the system allows for a zero balance deposit account to be created under the business product. In such cases the deposit account origination system will not be passing the payin details during deposit opening as this deposit will be funded later. The default value is <b>OFF</b> .
Hold Period for Zero Balance Deposit (in days)	Select the days to configure the Zero Balance Deposit. Once a zero balance deposit is created, it is expected that the deposit will be funded within the days configured as part of this field. Eg: if the value configured as part of this field is '7 days' then: - If the customer funds (this funding will be considered as an initial funding) within 7 days of opening the deposit then the deposit account will continue to be active. The interest accruals under this CD will be considered from the date of funding the deposit accountIf the customer fails to fund the deposit within the configured 7 days, then the system will process the closure of this deposit with zero balance as part of the EOD batch process.  Note: This field is applicable only if the flag Zero Balance Deposit is set to On.

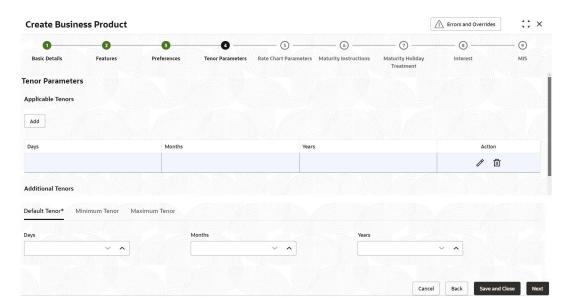

Table 1-3 (Cont.) Preferences - Field Description

Field	Description
Prior Notice Days for Zero Balance Deposit Closure	Select the notice days prior to the Zero balance Deposit closure date in case of no funding received by the end of the hold period. An event is published to Event Delivery Platform (EDP) on the said date for the subscribing system to notify the customer of the upcoming closure of zero balance deposit in case the funding is not received by the due date.

8. After specifying the fields in the **Preferences** screen, click **Next**.

The **Tenor Parameters** screen displays.

Figure 1-4 Create Business Product - Tenor Parameters

9. Specify the fields on **Tenor Parameters** screen.

Click **Add** button in the **Tenor Parameters** data segment to add the applicable tenors. For more information on fields, refer to the field description table below.

**Table 1-4** Tenor Parameters - Field Description

Field	Description
Tenor Parameters	This section determines the list of applicable tenors for a business product and also the minimum, maximum, and default tenor for a business product.
Applicable Tenors	Click on <b>Add</b> to specify multiple tenors that are applicable for the business product. If Applicable Tenors are defined for a business product then the deposit can be created only with one of the tenors mentioned in the configured list. The deposit creation will fail in case the deposit is booked with any other tenor not part of the maintained list.
Days	Specify the tenor value in <b>Days</b> .
Months	Specify the tenor value in <b>Months</b> .

Table 1-4 (Cont.) Tenor Parameters - Field Description

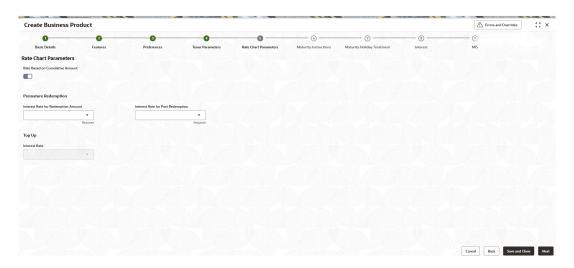

Field	Description
Years	Specify the tenor value in <b>Years</b> .
Minimum Tenor	Specify the minimum tenor for which deposits should be created under this business product. If the deposit is booked for a tenor that is less than the minimum tenor then the deposit creation fails with an appropriate error message.  If applicable tenor is configured, then it needs to be made sure that the minimum tenor is less than the least value of the configured applicable tenors.
Days	Specify the minimum tenor in terms of days.
Months	Specify the minimum tenor in terms of months.
Years	Specify the minimum tenor in terms of years.
Default Tenor	User can define a tenor for the deposits that are opened under the business product. Deposits opened under the business product will automatically acquire this tenor. However, user can change the tenor to suit the requirements of a specific deposit. The default tenor should be within the minimum and maximum range specified.  The default tenor is mandatory for a business product. If applicable tenors are also configured, then one of the applicable tenors needs to be captured as a default tenor.
Days	Specify the default tenor in terms of days.
Months	Specify the default tenor in terms of months.
Years	Specify the default tenor in terms of years.
Maximum Tenor	Specify the maximum tenor for which deposits can be created under this business product. If the deposit is booked beyond the maximum tenor then the deposit creation fails with an appropriate error message. If applicable tenor is configured, then it needs to be made sure that the maximum tenor is more than the max value of the configured applicable tenors.
Days	Specify the maximum tenor in terms of days.
Months	Specify the maximum tenor in terms of months.
Years	Specify the maximum tenor in terms of years.

**10.** After specifying the fields in the **Tenor Parameters** screen, click **Next**.

The Rate Chart Parameters screen displays.

Figure 1-5 Create Business Product - Rate Chart Parameters

#### Note

The fields marked as **Required** are mandatory.

11. Specify the fields on Rate Chart Parameters screen.

Table 1-5 Rate Chart Parameters - Field Description

Field	Description
Rate Chart Parameters	This determines if rate chart is applicable for the business product and the premature redemption details for the deposits if rate chart is allowed.
Rate Based On Cumulative Amount	Switch this toggle <b>ON</b> to indicate that the system should arrive at the interest rate of a new deposit using the cumulative amount of other active deposits, under the same business product, customer, and currency. The default value is <b>OFF</b> .
Interest Rate for Redemption Amount	Select the interest rate to be applied for the redemption amount, from the drop-down list. The available Options are:  Continue Existing As on Opening Date As on Redemption Date Special Rate Code As on Rate Revision Events The default value is Continue Existing.
Interest Rate for Post Redemption	Select the interest rate to be applied after redemption of deposit, from the drop-down list. The available Options are:  Continue Existing  As on Opening Date  As on Redemption Date  As on Rate Revision Events The default value is Continue Existing.

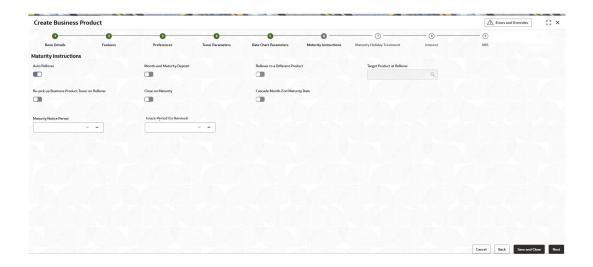

Table 1-5 (Cont.) Rate Chart Parameters - Field Description

Field	Description
Interest Rate	Select the interest to be applied on the top-up deposit, from the drop-down list. The available Options are:  • Current - Select this option to apply the current interest rate of the deposit on the top-up amount.
	As on Opening Date - Select this option to apply the interest rate based on the slab as on the value date of deposit opening. If top-up is made to a deposit after rollover, the rate as on rollover date will be considered for rate pick up.
	As on Top Up Value Date - Select this option to apply the interest rate based on the slab as on the value date of the top-up.

12. After specifying the fields in the Rate Chart Parameters screen, click Next.

The Maturity Instructions screen displays.

Figure 1-6 Create Business Product - Maturity Instructions

13. Specify the fields on Maturity Instructions screen.

Table 1-6 Maturity Instructions - Field Description

Field	Description
Maturity Instructions	This determines the default maturity instructions for accounts opened under the business product.
Auto Rollover	Switch this toggle <b>ON</b> to automatically rollover the deposits on maturity date. The default value is <b>OFF</b> .

Table 1-6 (Cont.) Maturity Instructions - Field Description

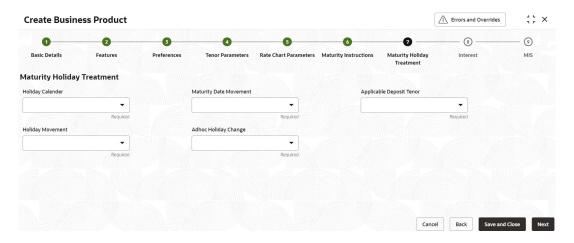

Field	Description
Month-End Maturity Deposit	Switch this toggle <b>ON</b> to indicate that the deposit is a month-end maturing deposit (i.e., the deposit matures on the last working day of the month).  The default value is <b>OFF</b> .
Rollover to a Different Product	Switch this toggle button <b>ON</b> for selection only if the Maturity Instructions selected for the product is 'Auto Rollover' If this flag is <b>OFF</b> when <b>Auto-Rollover</b> is <b>ON</b> , then the deposits opened under this business product can rollover to the same product only. This flag status also determines if the override of <b>Target Product at Rollover</b> will be allowed to be overridden at account level The default value for this field is <b>OFF</b>
Target Product at Rollover	Switch this toggle <b>ON</b> for selection only if the field <b>Rollover to a Different Product</b> is selected as <b>ON</b> . This LOV lists the configured deposit product codes along with product descriptions, in the system. The user can choose the target product code from the list to which the deposit account needs to rollover to on maturity (if the maturity instruction is rollover).  The Target product must be of the same type. Eg: Normal CD to show only normal CD products as part of the List of Values (LOV)
Re-pick up Business Product Tenor on Rollover	This is an optional field.  Switch this toggle <b>ON</b> to enable re-pick up of the business product tenor on rollover. During rollover, the system will pick up the default tenor of the business product.  The default value is <b>OFF</b> .
Close on Maturity	Switch this toggle <b>ON</b> to close the deposit account on maturity date and transfer the amount as per the pay-out details maintained for the deposit.  The default value is <b>OFF</b> .
Cascade Month-End Maturity Date	Switch this toggle <b>ON</b> to cascade the month end maturity date of the deposit. If not selected then, the maturity date will fall in line with the account open date.  The default value is <b>OFF</b> .
Maturity Notice Period	Specify the number of days before which the customer notification is to be sent for deposit maturity.
Grace Period for Renewal	Specify the grace days for renewing a deposit. This option is applicable only for deposits whose interest and principal is moved to unclaimed GLs upon maturity. In other words, grace period will not be applicable on the maturity date in case of auto rollover or closure of the deposit.

14. After specifying the fields in the Maturity Instructions screen, click Next.

The Maturity Holiday Treatment screen displays.

Figure 1-7 Create Business Product - Maturity Holiday Treatment

(i) Note

The fields marked as **Required** are mandatory.

15. Specify the fields on Maturity Holiday Treatment screen.

Table 1-7 Maturity Holiday Treatment - Field Description

Field	Description
Holiday Treatment	This determines the holiday treatment if the maturity of the deposit falls on a holiday.
Holiday Calendar	Select the holiday calendar applicable to the business product from the drop-down list. The available options are:  Ignore - Select this option to ignore all other holiday parameters for the business product. By default, this option is selected.  Branch - Holiday calendar will be based on the branch holiday maintenance of the respective branch.  Currency - Holiday calendar will be based on the currency maintenance done at bank level for the respective currency.
	Both Branch and Currency - Holiday calendar is based on both branch and currency holiday maintenance.
	The holiday calendar is used to arrive at the maturity date. The holiday calendar defined at the business product is applicable to all deposits opened under the business product. User cannot modify the <b>Holiday Calendar</b> if there are active accounts under the business product. The default value is <b>Ignore</b> .

Table 1-7 (Cont.) Maturity Holiday Treatment - Field Description

Field	Description
Holiday Movement	Select the working day to which the holiday should be moved from the adjoining drop-down list. The available options are:  No Change - If you select this option, then there is no change in the maturity date. By default, this option is selected.  Previous Working Day - In case the computed maturity date is a holiday, then system moves the maturity date to the previous working day for the corresponding Holiday Calendar chosen.
	<ul> <li>Next Working Day - In case the computed maturity date is a holiday, then system moves the maturity date to the next working day for the corresponding Holiday Calendar chosen.</li> </ul>
	Holiday movement is adjusting the next maturity date when the maturity date falls on a holiday, based on the Holiday Calendar chosen. Holiday Movement is not applicable if you select Ignore option for Holiday Calendar.  Note: User cannot modify the Holiday Movement if there are active account under the business product.
	The default value is <b>No Change</b> .
Maturity Date Movement	Select the maturity date movement across months from the drop-down list:  • Allowed - The maturity date is moved across months. If the computed maturity date falls on a Holiday, then the maturity date can be moved to the next or previous working day, based on the holiday movement option, even if it falls in a different month. By default, this option is selected.
	Previous/Next Working Day of the Same Month - After moving the maturity date, if the adjusted maturity date falls in the previous/next month, then the system moves the maturity date forward or backward to the next/previous working day of the same month.
	No Change in Maturity Date - If the adjusted maturity date falls on next/previous month, then the system ignores the movement and considers the computed maturity date as the maturity date even it falls on a holiday.
	Maturity date across months is applicable only when the maturity date is adjusted to previous or next working day. The default value is <b>Allowed</b> .

Table 1-7 (Cont.) Maturity Holiday Treatment - Field Description

Field	Description
Adhoc Holiday Change	<ul> <li>Select the adhoc holiday change from the drop-down list. The available options are:</li> <li>Change Maturity Date and Generate Advice -         System updates the maturity date and the rollover maturity date as per the deposit holiday calendar maintenance, generates an advice to the customer. By default, this option is selected.</li> <li>Generate Advice - System generates an advice on deposits having maturity date falling on a holiday.</li> <li>No Action - If this is selected, the maturity date does not change. In this case the system will not generate advices for the deposit.</li> <li>The adhoc holiday change is the change in branch and currency holiday calendar after opening the deposit due to adhoc change in holiday or branch transfer of the deposit. System ignores the value of Adhoc Holiday Change if you select the Ignore option for Holiday Calendar. The default value is Change Maturity Date and Generate Advice.</li> </ul>
Applicable Deposit Tenor	Select the deposit tenor, applicable to the deposit for interest rate pick-up, from the drop-down list. The available options are  • Original Tenor - If you select this option, then the system considers the tenor which is defaulted from the business product or modified at the account level. By default, this option is selected.  • Deposit Tenor - If you select this option, then the system considers the tenor based on the adjusted maturity date.  The default value is Original Tenor.

16. After specifying the fields in the Maturity Holiday Treatment screen, click Next. The Interest screen displays.

Figure 1-8 Create Business Product - Interest

17. Specify the fields on Interest screen.

Click the Add button. The Add Interest screen displays.

For more information on fields, refer to the field description table below.

**Table 1-8 Interest - Field Description** 

Field	Description
Product Code	Specify the interest product code that should be linked to the account. The adjoining option list displays all valid Interest and Charge (IC) products available in the system. User can select the appropriate one.
Currency	Select the Currency from the drop-down list defined for the interest product.
Rate Change on Interest Liquidation	Switch this toggle <b>ON</b> , then on every interest liquidation new rates are picked up for the interest calculation. However, you cannot toggle this switch once authorized.
Rate Change on Rollover	Switch this toggle <b>ON</b> to re pick up the rate activity on the rollover of deposit. The rate is picked up for fixed and rate chart allowed deposits.
Continue Spread on Rollover	This is defaulted based on the Interest and Charges product. Switch this toggle <b>ON</b> to enable continued variance on rollover. The system will default account variance as current value to the rollover deposit for the next cycle.  If user toggle <b>OFF</b> this, then the account variance will not be carried forward to the next rollover cycle.
Open	Switch this toggle <b>ON</b> to make the product applicable. More than one IC product may be applicable for a business product at the same time.  The default value is <b>ON</b> .
Action	Click <b>Edit</b> icon to edit the values in a row, or click <b>Delete</b> icon to delete the rows.

- After specify the details in the Add Interest screen. Click Add or Add Another button to include the interest parameters in the Interest screen.
- **18.** After specifying the fields in the **Interest** screen, click **Next**.

The MIS screen displays.

Figure 1-9 Create Business Product - MIS

19. Specify the fields on MIS screen.

For more information on fields, refer to the field description table below.

Table 1-9 MIS - Field Description

Field	Description
MIS Group	Select the MIS group applicable for the deposit business product from the selection list. The list is populated based on the MIS configuration maintained in common core.
Description	The system displays the description. This is auto populated.
SECTOR	Specify the sector to be associated.
SECTOR Description	The description of the sector is displayed.

20. After specifying all the details, click **Save and Close** to complete the steps or click **Cancel** to exit without saving.

#### 1.1.2 View Business Product

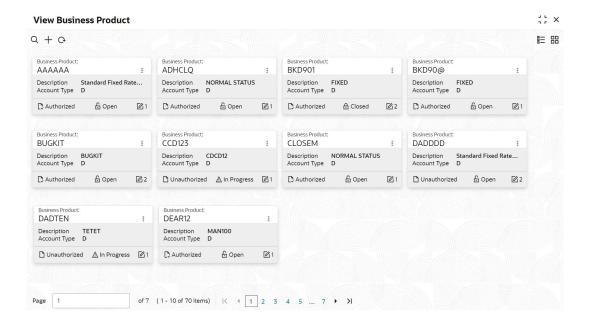

This topic explains the systematic instructions to view the list of configured business product parameters.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click Retail Deposits Business Product. Under Retail Deposits Business Product, click View Business Product.

The View Business Product screen displays.

Figure 1-10 View Business Product

For more information on fields, refer to the field description table below.

Table 1-10 View Business Product - Field Description

Field	Description
Business Product	Displays the business product.
Description	Displays the description of the business product.
Account Type	Displays the type of deposit account.
Authorization Status	Displays the authorization status of the record. The available options are:  • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are:  Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

# 1.2 Deposit Pay-in Maintenance

The deposit pay-ins to be done by GL, user needs to maintain the GL details through the Deposit Pay-in Maintenance screen.

To link appropriate GLs in case the pay in option chosen is pay in by GL, user need to maintain the **Branch Code**, **Pay-In Option**, and **General Ledger Code**.

This topic contains the following sub-topics:

Create Payin Maintenance

This topic describes the systematic instructions to create pay-in maintenance.

View Payin Maintenance

This topic explains the systematic instructions to view the list of payin maintenance parameters.

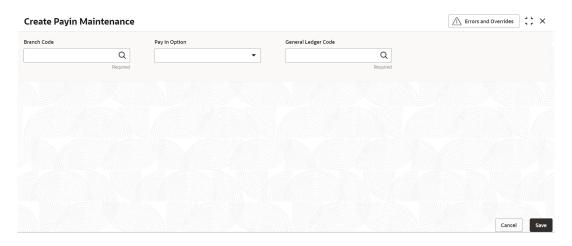

#### 1.2.1 Create Payin Maintenance

This topic describes the systematic instructions to create pay-in maintenance.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click Deposit Payin Maintenance, under Deposit Payin Maintenance, click Create Payin Maintenance.

The Create Payin Maintenance screen displays.

Figure 1-11 Create Payin Maintenance

The fields marked as **Required** are mandatory.

3. Specify the fields on Create Payin Maintenance screen.

Table 1-11 Create Payin Maintenance - Field Description

Field	Description
Branch Code	Specify the branch code for which user want to maintain payin parameters. Click <b>Search</b> icon, it displays all valid branch codes maintained in the system. User can select the appropriate one.

Table 1-11 (Cont.) Create Payin Maintenance - Field Description

Field	Description
Pay In Option	Select the pay in option from the drop-down list. The available Options are:  Pay in by GL - While creating a deposit, if the pay-in option is specified as GL, then the GL maintained at the maintenance screen should be selected. If the offset account for pay in is not specified then GL account maintained in the pay-in maintenance screen is defaulted, thus creating a Deposit.  Pay in by Cash - While creating a deposit, if the pay in option is specified as Cash and the offset account for pay in is not specified, then the system debits the GL account specified in maintenance screen, thus creating a Deposit.
General Ledger Code	Specify the GL code that should be picked up by the system for the Deposit pay in. Click <b>Search</b> icon, it displays all valid GLs maintained in the system. User can select the appropriate one.

 After specifying all the details, click Save to complete the steps. Or click Cancel to exit without saving.

#### 1.2.2 View Payin Maintenance

This topic explains the systematic instructions to view the list of payin maintenance parameters.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click Deposit Payin Maintenance. Under Deposit Payin Maintenance, click View Payin Maintenance.

The View Payin Maintenance screen displays.

Figure 1-12 View Payin Maintenance

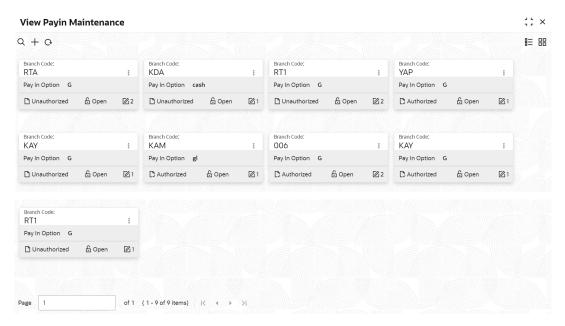

Table 1-12 View Payin Maintenance - Field Description

Field	Description
Branch Code	Displays the branch code.
Pay In Option	Displays the pay in option.
Authorization Status	Displays the authorization status of the record. The available options are:  • Authorized  • Rejected  • Unauthorized
Record Status	Displays the status of the record. The available options are:  Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

# **Servicing Configurations**

The Oracle Banking Branch is installed with servicing configuration helps banks to build the desired workflow for servicing transactions.

- Branch Date Configurations
- Business Product Configuration

The Oracle Banking Branch is equipped with business product configuration helps banks to configure various services for retail bank offerings.

Business Process Configuration

The Oracle Banking Branch is installed with business process configuration helps banks to build the desired workflow for servicing transactions.

Servicing Configuration

The Oracle Banking Branch is installed with servicing configuration helps banks to build the desired workflow for servicing transactions.

Memo Maintenance

This topic describes the systematic instruction about Memo Maintenance. User can add, edit, or delete a memo using this screen.

Branch Servicing Auto Auth Setup

User can enable or deactivate the auto-authorization for servicing operations by using the **Branch Servicing Auto Auth Setup** screen.

# 2.1 Branch Date Configurations

For branch servicing operations, the system allows user to configure the branch date as either the Common Core Branch Date or the Teller Branch Date. By default, the system uses the Common Core Branch Date for these operations. If you prefer to use the Teller Branch Date, then you can change the default setting by updating the **tellerIntegrationEnabled** parameter in the obbrn-cmn-process-driver-serve to **Y**.

- When **tellerIntegrationEnabled** = **Y**, the system uses the Teller Branch Date for branch servicing transactions.
- When **tellerIntegrationEnabled** = **N**, the system uses the Common Core Branch Date for branch servicing transactions.

# 2.2 Business Product Configuration

The Oracle Banking Branch is equipped with business product configuration helps banks to configure various services for retail bank offerings.

This topic contains the following subtopics:

About Business Product Configuration

Business product configuration allows users to configure the various services for retail bank offerings. The details captured in the business product configuration are used for processing the servicing transactions.

Create Business Product

User can use this screen to create the business product and map it to the host product.

View Business Product

Oracle Banking Branch supports viewing the business product created. The **View Business Product** screen allows the user to view all of the authorized, unauthorized and closed business products. The 'Authorize' option is also available for supervisor users for approving the unauthorized business product.

## 2.2.1 About Business Product Configuration

Business product configuration allows users to configure the various services for retail bank offerings. The details captured in the business product configuration are used for processing the servicing transactions.

The business product created in Oracle Banking Branch is linked with the host product. There is only one golden source available for product creation or configuration, which is in the host. The business product created in Oracle Banking Branch allows configuring parameters that are more customer-facing and how the products are sold in banks.

The business product is linked to the business process so that the servicing transactions related to the selected business product will flow as per the business process definition. The business product process allows the user to create the business products and view the existing business products.

### 2.2.2 Create Business Product

User can use this screen to create the business product and map it to the host product.

The following data segments of the screen allows user to define the various elements for the products:

- Business Product Details
- Host Product Mapping

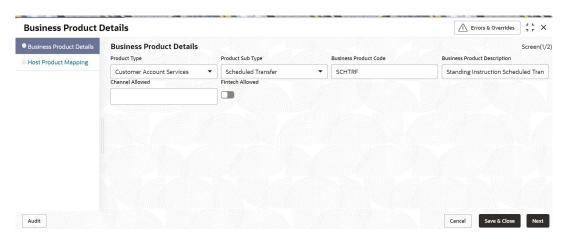

#### Perform the following steps to create business product:

 On the Home screen, from the Servicing Configurations, under Business Product, click Create Business Product. User can also open the screen by specifying Create Business Product in the search icon bar and selecting the screen.

The **Create Business Product** screen is displayed.

Figure 2-1 Create Business Product - Business Product Details

On the Business Product Details segment, specify the fields. For more information on fields, refer to the field description table.

Table 2-1 Business Product Details - Field Description

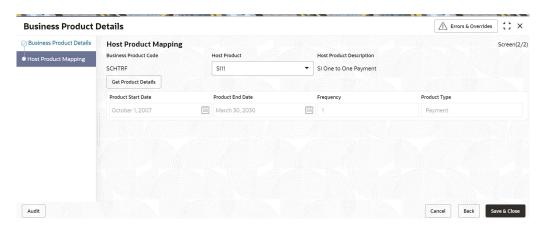

Field	Description
Product Type	Select the product from the drop-down list. The available options are:  Customer Account Services  Term Deposit Account Services  Loan Account Services
Product Sub Type	Select the product sub-type from the drop-down list. Product sub-types supported are based on the Product Type selected.
	a. Customer Account Services
	b. Term Deposit Account Services
	c. Loan Account Services
<b>Business Product Code</b>	Specify the business product code.
	<b>Note:</b> The maximum length of the business product code should not be more than six characters. Alphanumeric and alphabets should be in the capital.
Business Product Description	Specify the business product description.
Channel Allowed	Select the channels that should be allowed for the business product from the drop-down list. For Example – Oracle Banking Digital Experience.
Fintech Allowed	Select if the business product is supported for servicing transactions from Fintech Companies.
Fintech Name	Select the Fintech Company name from the drop-down list. The system allows the selection of multiple companies.  Note: This field is mandatory if Fintech Allowed is selected.

Click Next.

If Scheduled Transfer, Sweep In to Account, Sweep Out from Account, Term
Deposit Account Services, or Loan Account Services option is selected from the
Product Sub Type field in the Business Product Details segment, then the following
Host Product Mapping segment is displayed. In this data segment, the business
product is mapped to the host product and parameters for processing servicing
transactions are defined.

Figure 2-2 Create Business Product – Host Product Mapping

For more information on fields, refer to the field description table.

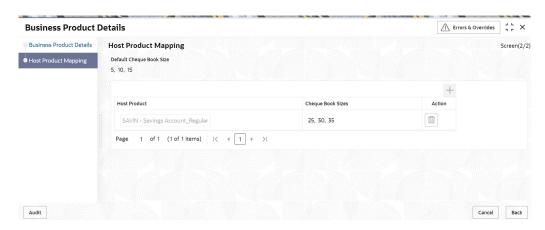

**Table 2-2 Host Product Mapping - Field Description** 

Field	Description
Business Product Code	Displays the business product code defaulted from the <b>Business Product Code</b> entered in the Business Product Details data segment.
Host Product	Select the host product from the drop-down list.
Host Product Description	Displays the product description once the host product is selected in <b>Select Host Product</b> .
Get Products Details	Click Get Product Details, and the system will default the parameter configured at the host product. When user click this button, the system defaults the values in the following fields:  - Product Start Date  - Product End Date  - Frequency  - Product Type  - Minimum Sweep Amount
Product Start Date	Displays the product start date defaulted from the host.
Product End Date	Displays the product end date defaulted from the host.
Frequency	Displays the frequency defaulted from the host.
Product Type	Displays the product type defaulted from the host.
Minimum Sweep Amount	Displays the minimum sweep amount defaulted from the host.
	Note: This field is displayed only if the Product Sub Type in the Business Product Details segment is selected as Sweep Out from Account or Sweep In to Account.

 If Cheque Leaves Default option is selected from the Product Sub Type field in the Business Product Details segment, then the following Host Product Mapping segment is displayed.

Figure 2-3 Create Business Product – Host Product Mapping (Cheque Leaves Default)

For more information on fields, refer to the field description table.

Table 2-3 Create Business Product – Host Product Mapping (Cheque Leaves Default) – Field Description

Field	Description
Default Cheque Book Size	Specify the numeric values for cheque book sizes against those accounts, for which the Account Classes have not been mapped or that have been created newly in the system.  Note: A Close icon is displayed next to the value specified as you tab out of the field. To remove the value, click the Close icon.
Host Product	Select the account classes defined in the system.  Note:  This field is enabled if you click the Add icon displayed above the table.  An Account Class cannot belong to more than one group of Host Product.
Cheque Book Sizes	Specify numeric values for the cheque book sizes for the account classes selected.  Note:  This field is enabled if you click the Add icon displayed above the table.  You are not allowed to enter duplicate values in this field.
Action	Displays the <b>Delete</b> icon to remove the row added. <b>Note:</b> This field is enabled if you click the <b>Add</b> icon displayed above the table.

4. Click Save & Close.

# 2.2.3 View Business Product

Oracle Banking Branch supports viewing the business product created. The **View Business Product** screen allows the user to view all of the authorized, unauthorized and closed

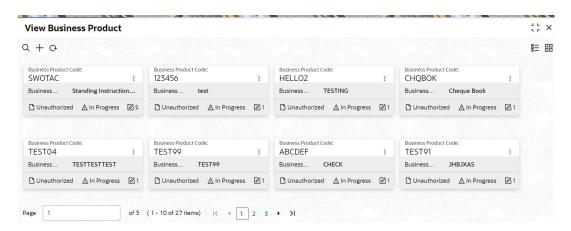

business products. The 'Authorize' option is also available for supervisor users for approving the unauthorized business product.

#### To view business product:

 On the Home screen, from the Servicing Configurations, under Business Product, click View Business Product. User can also open the screen by specifying View Business Product in the search icon bar and selecting the screen.

The View Business Product screen is displayed.

Figure 2-4 View Business Product

- 2. On the View Business Product screen, User can perform the following actions:
  - Search for a particular business product.
  - Add preference for a business product.
  - Refresh the page to view the latest updates.
  - Change view to grid or tile.
- 3. On the **View Business Product** screen, view the business product set for the required services. For more information on the options, refer to the table below.

Table 2-4 View Business Product - Field Description

Field	Description
<b>Business Product Code</b>	Displays the business product set for the service.
Business Product Description	Displays the description for the business product.

- 4. Each tile also displays the following information:
  - Authorized or Unauthorized
    - For Authorized status: The **Actions** icon provides the options to Unlock, Close, Copy, and View.
    - For Unauthorized status: The **Actions** icon provides the options to Unlock, Authorize, Delete, Copy, and View.
  - · Open, In Progress, or Closed
  - Number of edits performed on the business product.

# 2.3 Business Process Configuration

The Oracle Banking Branch is installed with business process configuration helps banks to build the desired workflow for servicing transactions.

This topic contains the following subtopics:

#### About Business Process Configuration

The business process configuration defines the stages, respective data segments, checklists, documents required, and advice generation for the stages.

#### Create Business Process

The **Create Business Process** screen helps to configure the workflow for servicing transactions. This process will allow defining the data segments, checklists, documents, and advices for the stages defined in the process code selected for the lifecycle code and business product combination.

#### View Business Process

Oracle Banking Branch supports viewing the business process created. The **View Business Process** screen allows the user to view all of the authorized, unauthorized, and closed business processes. Authorize option is also available for supervisor users for approving unauthorized business processes.

## 2.3.1 About Business Process Configuration

The business process configuration defines the stages, respective data segments, checklists, documents required, and advice generation for the stages.

A business process can be defined as a set of activities and tasks that, once completed, will accomplish the distinct servicing processes. The business process must involve clearly defined inputs and a single output.

The business process definition will determine the different stages required for a given combination of the process code, life cycle, and business product code. The workflow management of these stages and the relevant stage movements are defined in Plato/ Conductor to:

- Orchestrate the microservices-based process flow
- Ensure a seamless transition of servicing process across various stages in that given order.

The Plato/Conductor process will drive the workflow from one stage to another based on the process outcomes at the respective stages and subject to fulfilling the mandatory data capture, confirmation on the mandatory checklist items, and submission of mandatory documents at the respective stages. The stages defined in the business process can be dynamically assigned to different user profiles or roles.

While performing the servicing transactions, the system picks the business process run-time and initiates the workflow based on the configuration. The prerequisites for configuring the business process are enumerated below:

Table 2-5 Prerequisites for Configuration - Field Description

Prerequisites	Description
Lifecycle	Lifecycle represents the cycle of the process for which the business process is created. These are factory-shipped codes and currently support servicing transactions such as customer account transactions, term deposit transactions, and loan account transactions.
Process Code	Process code defines the various stages relevant for servicing transactions. Process code configuration allows you to define the business process flow that needs to be mapped for the business product and lifecycle code combination in the business process configuration.
	A set of default process codes are factory-shipped for the reference workflow. User can also create process codes in CMC_TM_PROCESS_CODE and CMC_TM_PROCESS_STAGE tables.
Business Product	Business product maintenance allows configuring the various business products by the product offerings that the bank deals with. Each business product has a unique business process defined for a specific lifecycle code selected.

### 2.3.2 Create Business Process

The **Create Business Process** screen helps to configure the workflow for servicing transactions. This process will allow defining the data segments, checklists, documents, and advices for the stages defined in the process code selected for the lifecycle code and business product combination.

This screen allows configuring the elements for each of the stages of the servicing transactions. For information on the elements, refer to the table below:

Table 2-6 Elements of Business Process

Element	Description
Data Segment	A data segment, as the name suggests is an individual block of data. Bringing in data segments allows to break down a huge process into smaller units, which will be easier to update, maintain, and process. The business process consists of several data segments that make up the stage.
	<ul> <li>Business process definition enables the user to perform the following:</li> <li>Add 'n' number of data segments to each stage.</li> <li>Set the data segment as mandatory or non-mandatory.</li> <li>Set the data segment as editable or non-editable.</li> <li>Control the sequence order of the data segments.</li> <li>Select the stage.</li> </ul>
Document	The documents are required to be submitted by the customer for the servicing transactions.
Checklist	Checklists are distinct and a list of mandatory checkpoints for the servicing transactions to be configured by the bank.
Advices	Advices are an official letter of notices detailing an action taken or to be taken on a stated date by the bank. This is the final configuration for the Business Process creation.

Perform the following steps to create business process:

 On the Homepage, from the Servicing Configurations, under Business Process, click Create Business Process. You can also open the screen by specifying Create Business Process in the search icon bar and selecting the screen.

The Create Business Process screen is displayed.

Figure 2-5 Create Business Process

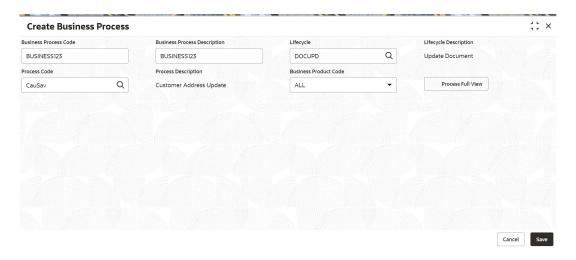

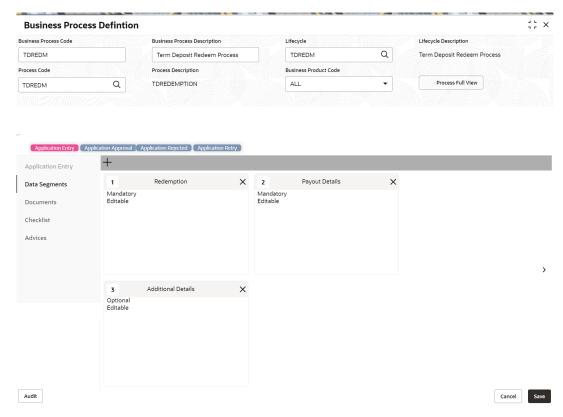

Figure 2-6 Create Business Process - Stages

2. On the **Create Business Process** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-7 Create Business Process - Field Description

Field	Description
Business Process Code	Specify an alphanumeric business process code.
	Note: The maximum length allowed is 16.
Business Process	Specify the description of the business process code.
Description	Note: The maximum length allowed is 60 alphanumeric characters.
Lifecycle	Search and select the lifecycle code.
Lifecycle Description	Displays the description of the lifecycle selected.
Process Code	Search and select the process code of the business process flow that needs to be mapped for the lifecycle code and business process code combination.
	<b>Note:</b> Once user select the process code, the elements and stages are displayed on the screen.
Process Description	Displays the description of the selected process code.
Business Product Code	Specify the business product code for which the business process is being created. Alternatively, the system allows selecting 'All', in which case the business process will apply to all the business products that are associated with the lifecycle and process code.

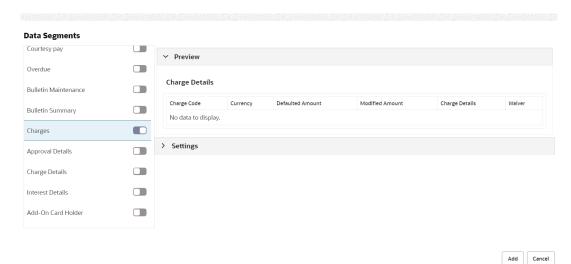

#### (i) Note

The system allows you to configure only one business process for a combination of **Lifecycle** and **Business Product Code**.

On the Create Business Process screen, click Data Segments tab and then click Add icon on the header panel.

The **Data Segments** screen is displayed.

Figure 2-7 Data Segments

4. On the **Data Segments** screen, select the required data segment or data segments for the selected stage, and specify the fields. For more information on fields, refer to the field description table.

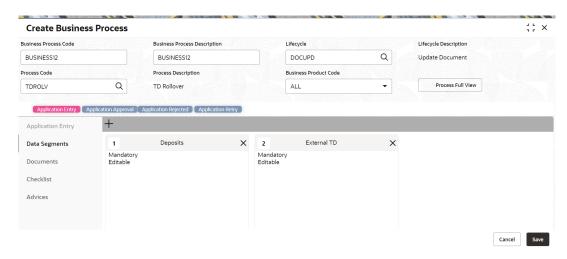

Table 2-8 Data Segments - Field Description

Field	Description
Preview	Click on this tab to view the data segment.
Settings	Specify the settings.
Mandatory	Select if the data segment is mandatory.
Editable	Select if the data segment is editable.
Select Products	Select the products for which the data segment is relevant.

5. On the **Data Segments** screen, click **Add**.

The Create Business Process screen is displayed with the data added segment.

Figure 2-8 Create Business Process - Added Data Segments

(i) Note

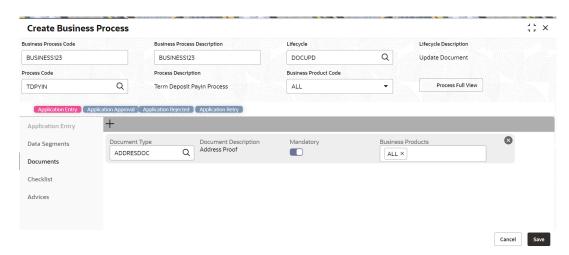

The system allows to re-sequence the data segment by dragging and dropping over the specific data segment.

6. On the **Create Business Process** screen, select the desired stage, and click **Document** tab to define the specific documentation requirement.

The **Documents** segment is displayed.

Figure 2-9 Create Business Process – Documents

On the **Documents** segment, specify the fields. For more information on fields, refer to the field description table.

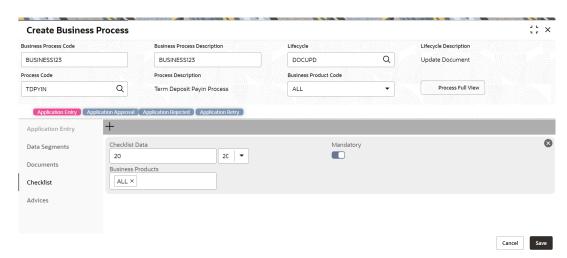

Table 2-9 Documents - Field Description

Field	Description
Document Type	Search and select the document type.
Document Description	Displays the corresponding description of the document.
Mandatory	Select if it is mandatory to submit the document for the stage.
Business Products	Select the required option for the document submission requirement. The available options are: Single Product List of Products All

On the Create Business Process screen, select the desired stage, and click Checklist tab.

The Checklist segment is displayed.

Figure 2-10 Create Business Process - Checklist

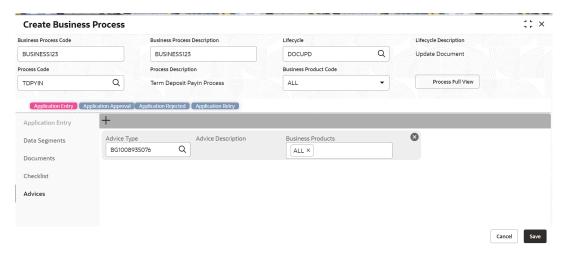

On the Checklist segment, specify the fields. For more information on fields, refer to the field description table.

Table 2-10 Checklist - Field Description

Field	Description
Checklist Data	It is a free-text field that allows to user to enter the checklists that must be validated as part of the selected stage.
Mandatory	Select if it is mandatory to submit the checklist for the stage.
Business Products	Select the required option to restrict the checklist. The available options are:  Single Product List of Products All

10. On the Create Business Process screen, select the desired stage, and click Advices tab. The Advices segment is displayed.

Figure 2-11 Create Business Process – Advices

11. On the Advices segment, specify the fields. For more information on fields, refer to the field description table.

Table 2-11 Advices - Field Description

Field	Description
Advice Type	Search and select the required advice type from the displayed list of all the valid advices maintained, and that must be mapped to this stage.
Advice Description	Displays the corresponding description of the advice.
Business Products	Select the required option to restrict the advices. The available options are:  Single Product List of Products All

12. Click **Save** to create the business process.

At this point, the status of the business process is unauthorized. A user with supervisor access has to approve the business process. Once approved, the status of the business process changes from unauthorized to authorized, and is activated for usage in the servicing transactions.

### 2.3.3 View Business Process

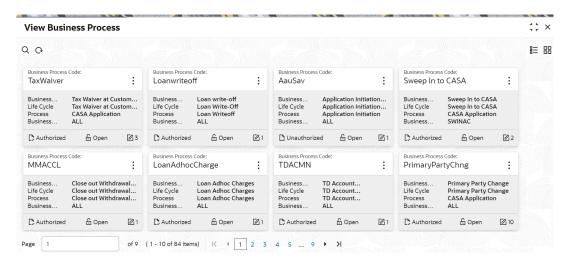

Oracle Banking Branch supports viewing the business process created. The **View Business Process** screen allows the user to view all of the authorized, unauthorized, and closed business processes. Authorize option is also available for supervisor users for approving unauthorized business processes.

Perform the following steps to view business process:

 On the Homepage, from the Servicing Configurations, under Business Process, click View Business Process. You can also open the screen by specifying View Business Process in the search icon bar and selecting the screen.

The **View Business Process** screen is displayed.

Figure 2-12 View Business Process

- 2. On the View Business Process screen, you can perform the following actions:
  - Search for a particular business process.
  - Add preference for a business process.
  - Refresh the page to view the lastest updates.
  - Change view to grid or tile.
- 3. On the **View Business Process** screen, view the business product set for the required services. For more information on the options, refer to the table below.

Table 2-12 View Business Process – Field Description

Field	Description
<b>Business Process Code</b>	Displays the business process set for the service.
Business Process Description	Displays the description for the business process.

Table 2-12 (Cont.) View Business Process - Field Description

Field	Description
Life Cycle	Displays the life cycle set for the business process.
Process	Displays the process.
Business Product	Displays the business code.

- 4. Each tile also displays the following information:
  - Authorized or Unauthorized
    - For Authorized status: The **Actions** icon provides the options to Unlock, Close, Copy, and View.
    - For Unauthorized status: The **Actions** icon provides the options to Unlock, Authorize, Delete, Copy, and View.
  - Open, In Progress, or Closed
  - Number of edits performed on the business process.

# 2.4 Servicing Configuration

The Oracle Banking Branch is installed with servicing configuration helps banks to build the desired workflow for servicing transactions.

This topic contains the following subtopics:

#### • Create Service Preferences

User can create service preferences for Transaction Code for Debit, Transaction Code for Credit, Exchange Rate Code, and Exchange Rate Type servicing screens using the **Create Service Preferences** screen.

View Service Preferences

User can view all of the authorized, unauthorized, and closed service preferences using the **View Service Preferences** screen. Authorize option is also available for supervisor users for approving unauthorized business processes.

### 2.4.1 Create Service Preferences

User can create service preferences for Transaction Code for Debit, Transaction Code for Credit, Exchange Rate Code, and Exchange Rate Type servicing screens using the **Create Service Preferences** screen.

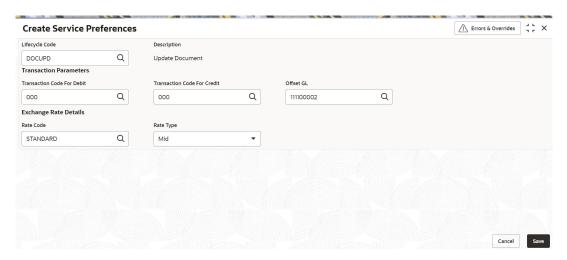

#### To create service preferences:

 On the Home screen, from the Servicing Configurations, under Servicing Configurations, click Create Service Preferences. User can also open the screen by specifying Create Service Preferences in the search icon bar and selecting the screen.

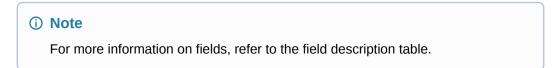

The Create Service Preferences screen is displayed.

Figure 2-13 Create Service Preferences

On the Create Service Preferences screen, select or specify the required details.

**Table 2-13 Create Service Preferences – Field Description** 

Field	Description
Lifecycle Code	Select the lifecycle code for the servicing screens.
Description	Displays the description based on the lifecycle code selected.
Transaction Parameters	This section displays the fields to select the parameters for the transactions.
Transaction Code For Debit	Select the code for the debit transaction.
Transaction Code For Credit	Select the code for the credit transaction.
Offset GL	Select the offset GL for the transaction.
Exchange Rate Details	This section displays the fields to create the rate preferences.
Rate Code	Select the code for the exchange rate.
Rate Type	Select the type for the exchange rate. The available options are:  • Mid • Buy/Sell

3. Click Save.

## 2.4.2 View Service Preferences

User can view all of the authorized, unauthorized, and closed service preferences using the **View Service Preferences** screen. Authorize option is also available for supervisor users for approving unauthorized business processes.

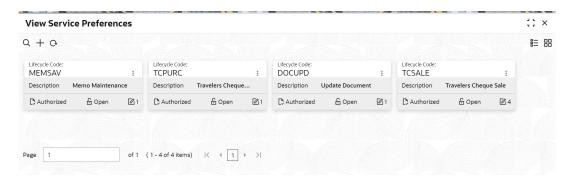

To view the service preferences:

 On the Home screen, from the Servicing Configurations, under Servicing Configurations, click View Service Preferences. User can also open the screen by specifying View Service Preferences in the search icon bar and selecting the screen.

The View Service Preferences screen is displayed.

Figure 2-14 View Service Preferences

- 2. On the View Service Preferences screen, User can perform the following actions:
  - Search for a particular service preference.
  - Add preference for a service.
  - Refresh the page to view the latest updates.
  - Change view to grid or tile.
- On the View Service Preferences screen, view the preferences set for the required services.

For more information on the options, refer to the table below.

Table 2-14 View Service Preferences – Field Description

Field	Description
Lifecycle Code	Displays the lifecycle code set for the service.
Description	Displays the description for the lifecycle code.

- 4. Each tile also displays the following information:
  - Authorized or Unauthorized
    - For Authorized status: The **Actions** icon provides the options to Unlock, Close, Copy, and View.
    - For Unauthorized status: The **Actions** icon provides the options to Unlock, Authorize, Delete, Copy, and View.
  - Open, In Progress, or Closed
  - Number of edits performed on the set preferences.

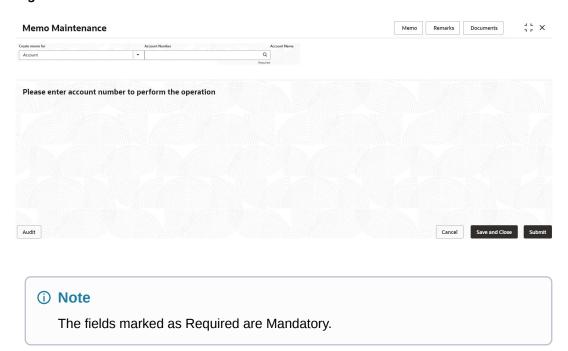

# 2.5 Memo Maintenance

This topic describes the systematic instruction about Memo Maintenance. User can add, edit, or delete a memo using this screen.

1. On the **Home** screen, from **Interaction Services**, under **Maintenance**, click **Memo Maintenance**, or specify the **Memo Maintenance** in the Search icon bar.

The Memo Maintenance screen is displayed.

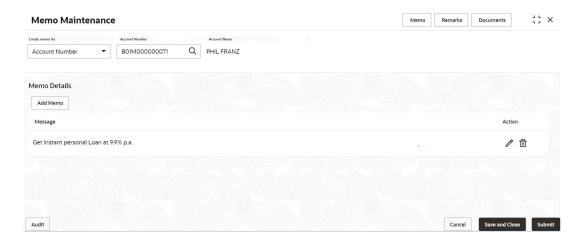

Figure 2-15 Memo Maintenance

2. On **Memo Maintenance** screen, perform the required action.

The memo maintenance details are displayed in the screen.

Figure 2-16 Memo Maintenance Details

3. On the **Memo Maintenance** screen, specify the fields.

#### (i) Note

For more information on fields, refer to the field description table.

Table 2-15 Memo Maintenance - Field Description

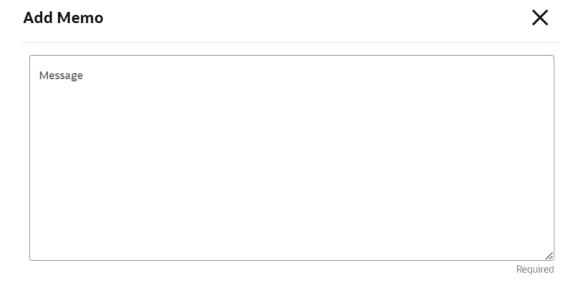

Field	Description
Create memo for	Select the option for creating memo. The available options are:  Account: If user selects this option, then the Account Number and Account Name are displayed.  Deposit: If user selects this option, then the Deposit Account Number and Account Name are displayed.
Message	Provide the text of the memo message.
Action	Click the <b>Edit</b> icon to edit the message or the <b>Delete</b> icon to delete the added memo.

Click Add Memo in the Memo Maintenance screen.

The **Add Memo** screen is displayed to specify the memo message.

#### Figure 2-17 Add Memo

Cancel Add Another Add

- a. Click **Cancel** to cancel the memo message.
- b. Click Add or Add Another to add the message in the main screen.
- 5. Click Submit.

The screen is successfully submitted for authorization.

# 2.6 Branch Servicing Auto Auth Setup

User can enable or deactivate the auto-authorization for servicing operations by using the **Branch Servicing Auto Auth Setup** screen.

The auto authorization can be set for Accounts, Deposits, and IRA modules of servicing.

The fields marked as **Required** are mandatory.

#### To set up auto-authorization:

On the Home screen, from the Retail Servicing Configuration mega menu, click Branch Servicing Auto Auth Setup or specify Branch Servicing Auto Auth Setup in the search icon bar and select the screen.

The Branch Servicing Auto Auth Setup screen is displayed.

Figure 2-18 Branch Servicing Auto Auth Setup

- From the Accounts, Deposit, and IRA tabs, select the required screens for which autoauthorization is to be set from the **Non-auto authorization screens** section.
- Click Move to auto authorization.

The screens are removed from the Non-auto authorization screens section and displayed in the Auto authorization screens section.

For more information on fields, refer to the field description table.

Table 2-16 Branch Servicing Auto Auth Setup – Field Description

Field	Description
Non auto authorization screens	Select the screens to be auto-authorized from this section. User can also search for any required screen by specifying the screen name in the <b>Search</b> field.
Auto Authorized screens	This section displays the screens to be auto-authorized.
Lifecycle Code	Displays the lifecycle code of the screen.
Screen Name	Displays the screen set for auto-authorization.
Action	Displays the <b>Delete</b> icon. User can click to deactivate the screen from auto-authorization. Post deletion, the screen is added back to the <b>Non auto authorization screens</b> section.

#### (i) Note

If the user selects the screen and clicks Move to auto authorization, then to proceed with action in other tabs, the user should click Save. Else, the changes made by user will be lost if switched between the modules.

Click Save.

The updates are saved successfully.

# **Operations**

This topic contains the following **Operations** as subtopics:

#### Customer Information

Customer Information gives the details of Customer ID, Customer Name and KYC details. When an account number is selected on the screen, the Customer Information appears in a widget on the right side.

#### Overview of Deposit Services

The **Deposit Services** module facilitates various transactions on Term Deposit accounts.

#### Deposit View

User can use the screen under the **Deposit View** menu to view a 360 view of a TD account.

#### TD Transactions

User can use the screens under the **Transactions** menu to initiate deposit services transactions. A deposit with a fixed tenure or term is called as time deposit or Term Deposit (TD). This chapter deals with transactions of a term deposit.

#### TD Maintenances

You can maintain the TD account details in this section. A deposit with a fixed tenure or term is called as time deposit or Term Deposit (TD).

#### TD Inquiries

A deposit with a fixed tenure or term is called as time deposit or Term Deposit (TD). This chapter deals with inquiries of a term deposit.

#### Prior Maturity Notices in Deposits

This topic describes the details of prior maturity notices in depositss.

- Access Restriction
- Multi-Currency Accounts
- Business Events in Oracle Banking Retail Deposits

This topic describes the processing of business events in online for Oracle Banking Retail Deposits.

## 3.1 Customer Information

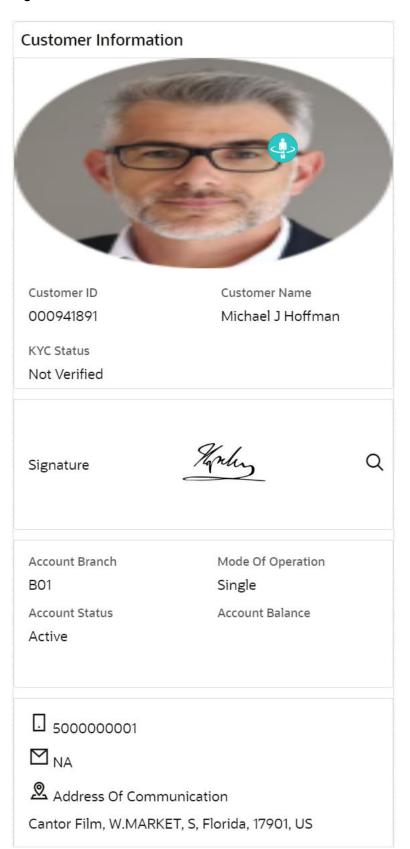

Customer Information gives the details of Customer ID, Customer Name and KYC details. When an account number is selected on the screen, the Customer Information appears in a widget on the right side.

#### To view the customer information:

**1.** Select or specify the account number in the screen..

Figure 3-1 Customer Information

For more information on fields, refer to the field description table.

Table 3-1 Customer Information - Field Description

Field	Description
<lmage></lmage>	Displays the image of the customer.
Customer ID	Displays the unique customer ID for the account number specified.
Customer Name	Displays the customer name for the account number specified.
KYC Status	Displays the current KYC status of the account.
Signature	Displays the customer's signature.
Account Name	Displays the account holder's name.
Account Branch	Displays the account holder's branch.
Mode of Operation	Displays the account's mode of operation.
Account Status	Displays the current status of the account.  Note:
	The possible account status are <b>Active</b> , <b>Closed</b> , and <b>Overdue</b> .
Account Balance	Displays the total account available.
<phone number=""></phone>	Displays the customer's phone number.
<email id=""></email>	Displays the customer's email ID.
Address of Communication	Displays the complete address of the customer.

2. In this section, you can view the customer's basic information.

3. To launch the Customer 360 screen, click

# 3.2 Overview of Deposit Services

The **Deposit Services** module facilitates various transactions on Term Deposit accounts.

About Main Menu

The **Deposit Services** is a large panel divided into groups of menu items, which simplifies the navigation.

### 3.2.1 About Main Menu

The **Deposit Services** is a large panel divided into groups of menu items, which simplifies the navigation.

The menu items are grouped based on the type of operation to be performed. In addition, the **Menu Item Search** helps to search and select a specific screen to navigate to any screen from the main menu items. The main menus are listed below:

Figure 3-2 Deposit Services Mega Menu

# Certificate of Deposits Certificate of Deposit View Certificate of Deposit 360 Transactions **Account Opening** Top Up Redemption Maintenance Create Amount Block View and Modify Amount Block **Payout Modification** Account Modification Joint Holder Beneficiary Inquiries **Account Transactions** Certificate

Table 3-2 Menu Items

Menu Item	Description
Transactions	Teller or Supervisor can use to initiate term deposit account opening.
Maintenance	Teller or Supervisor can use to perform the deposit services maintenance activities.
Inquiries	Teller or Supervisor can use to perform the deposit services inquiries.

# 3.3 Deposit View

User can use the screen under the **Deposit View** menu to view a 360 view of a TD account.

This topic contains the following subtopic:Deposit 360

Interest Paid Out Details

The **Deposit 360** screen provides a complete view of a customer's term deposit account.

# 3.3.1 Deposit 360

The **Deposit 360** screen provides a complete view of a customer's term deposit account.

The various sections are:

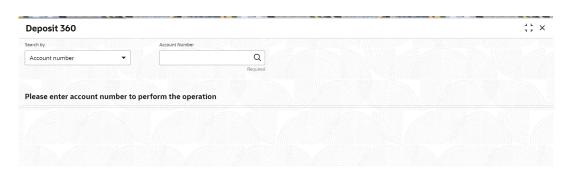

- Deposit Information
- Account holders
- Account details
- Balances
- Instruction set
- Redemption Simulation
- · Amount Block Details
- Rollover History
- Interest Rate Changes
- Overdue Transactions
- Recent Transactions
- Frequent Actions

#### To view the term deposit details:

On the Home screen, from the Retail Deposit Services mega menu, under Term
 Deposits and Deposit View, click Deposit 360 or specify Deposit 360 in the search icon bar and select the screen.

The **Deposit 360** screen is displayed.

Figure 3-3 Deposit 360

The fields marked as **Required** are mandatory.

On the Deposit 360 screen, click the Search icon or specify the Account Number and press the Tab or Enter key.

The details are displayed in the dashboard.

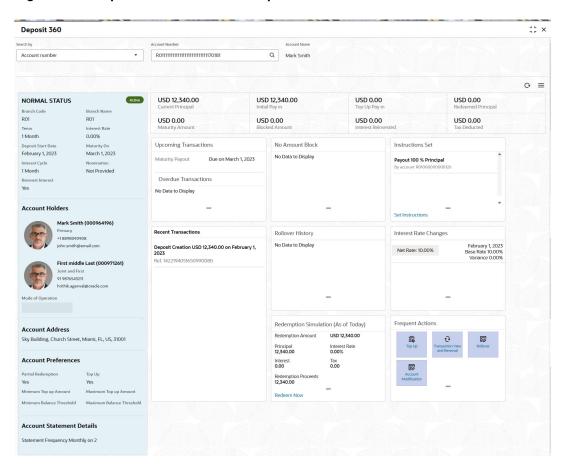

Figure 3-4 Deposit Details for Term Deposit

3. User can see the account holder's TD details on the displayed dashboard. For more information on fields, refer to the field description table.

Table 3-3 Deposit 360 - Field Description

Field	Description
Search By	Users can search for an account number by using any of the
Coulon By	available search criteria.  The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the <b>Search</b> icon. Users can also search for the specific account number by providing customer ID, account number, or account name.
	Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.
	A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.
	For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.
	<b>Note:</b> The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.
<product name=""></product>	Displays the product name from the product master.
<deposit status=""></deposit>	Displays the deposit status. The possible options are:  • Active  • Matured  • Closed
Branch Code	Displays the branch code of the account.
Branch Name	Displays the deposit branch name.
Tenor	Displays the tenor for the deposit account.
Interest Rate	Displays the rate of interest for the account.
Deposit Start Date	Displays the value date of the deposit.
Maturity On	Displays the maturity date of the deposit.
Interest Cycle	Displays the period for interest cycle.
Nomination	Displays whether nomination is added to the account.
Reinvest Interest	Displays whether the interest from the TD account is to be reinvested in the same deposit or paid out.
Account Holders	This widget displays the account holder details.
<name></name>	Displays the name of the account holder of the TD.
<customer id=""></customer>	Displays the customer ID of the holder.
<relationship></relationship>	Displays relationship as <b>Primary</b> or <b>Secondary</b> .
<mobile number=""></mobile>	Displays the mobile number with ISD code of the customer.
<email id=""></email>	Displays the email ID of the customer.
Mode of Operation	Displays the mode of operation set for the account.
Account Address	This widget displays the preferred account set for the account.
Account Details	This widget displays the account details.

Table 3-3 (Cont.) Deposit 360 - Field Description

Field	Description
Account Preferences	This widget displays the preferences for the account.
Partial Redemption	Displays whether partial redemption is allowed for the TD product.
Premature Redemption	Displays whether premature redemption is allowed for the TD product.
Тор ир	Displays whether a top-up is allowed for the account.
Minimum Top up Amount	Displays the minimum required amount for a top-up transaction on the CD account.
Maximum Top up Amount	Displays the maximum amount allowed for a top-up transaction on the CD account.
Minimum Balance Threshold	Displays the minimum threshold balance to be retained in the CD account.
Maximum Balance Threshold	Displays the maximum threshold balance allowed for the CD account.
Account Statement Details	This widget the frequency details for the account statement.
Current Principal	Displays the currently remaining principal balance in the deposit.
Initial Pay in	Displays the initial payin done to create the deposit.
Topup Pay in	Displays the subsequent top-ups done.
Redeemed Principal	Displays the principal redeemed in case any premature redemption have happened.
Maturity Amount	Displays the proceeds that will be paid out on maturity. This value will be net of tax.
Blocked Amount	Displays the total block amount on the deposit.
Interest Paid out or Interest Reinvested	Displays the amount and currency for the reinvested or paid out interest.  Note:  If the interest if of reinvest type, then the field name is displayed
	<ul> <li>as Reinvested Interest.</li> <li>If the interest if of paid out type, then the field name is displayed as Paid out Interest.</li> </ul>
Tax Deducted	Displays the tax deducted.
Upcoming Transactions	This widget displays the details of upcoming transactions.
Overdue Transactions	Displays the details of overdue transactions.
Redemption Simulation (As of Today)	This widget displays the redemption simulation of the day for the TD account. Click the <b>View Error Details</b> link to view the error message.
Instructions Set	This widget displays the set of instructions set on the TD account.  Note: To create new set of instructions for the TD account, click the Set Instructions ink. For more information, refer Term Deposit Payout Modification screen.
Recent Transactions	This widget displays the details of the recent transactions performed on the account.
<number> Amount Blocks</number>	This widget displays the amount block details of the account.  Note:To manage the amount blocks, click the Manage Amount  Blocks link. For more information, refer View and Modify Amount  Block screen.
<currency amount=""></currency>	Displays the currency and amount of block.
Block <number></number>	Displays the block number.
L	· ·

Table 3-3 (Cont.) Deposit 360 - Field Description

Field	Description
Туре	Displays the block type.
Expiry	Displays the expiry date of the block.
Interest Rate Changes	This widget displays the rate changes if any for the interest applied on the account.
Net Rate	Displays the net rate percentage of interest.
<date></date>	Displays the date of interest rate change.
Base Rate	Displays the base rate percentage of interest.
Variance	Displays the variance percentage of interest.
Rollover History	This widget displays the rollover history of the account.
<currency amount=""></currency>	Displays the currency and amount of rollover.
<component></component>	Displays the rollover component.
<date></date>	Displays the from and to date of the rollover.
<tenure></tenure>	Displays the tenure of rollover.
Frequent Actions	This widget displays the frequent actions that were performed on the account.  Note: The actions are displayed as links. You can click the link and the related screen is opened in a new page.

#### Note

- User can access different transactions for your account by clicking the Menu
  icon. This will show a list of links under various categories. Simply click on the
  link you need from the list. To learn how to complete the transactions using the
  links, please refer to the relevant chapters. For a visual guide, check the Mega
  Menu screenshot.
- If the most recent updates on the TD account are not visible on the screen, you can refresh it by clicking the **Refresh** icon. This will update the screen to show the latest changes.

If deposit account is closed, then all lifecycle operations are restricted from this screen.

# 3.4 TD Transactions

User can use the screens under the **Transactions** menu to initiate deposit services transactions. A deposit with a fixed tenure or term is called as time deposit or Term Deposit (TD). This chapter deals with transactions of a term deposit.

This topic contains the following subtopics:

- <u>Term Deposit Account Opening</u>
   User can open a Term Deposit account and simulate its creation by providing funds from Account, and Ledger modes or a combination of Account and Ledger modes.
- <u>Top Up</u>
   User can perform a TD top-up transaction using this screen.

#### Redemption

Redeem a Term Deposit using the **Term Deposit Redemption** screen. The redemption proceeds can be credited to Current and Savings Account, New Term Deposit, Banker's Cheque, Demand Draft, or Ledger. The user can redeem the Term Deposit in full or in part.

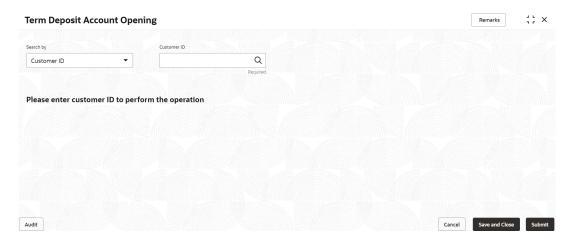

### 3.4.1 Term Deposit Account Opening

User can open a Term Deposit account and simulate its creation by providing funds from Account, and Ledger modes or a combination of Account and Ledger modes.

1. On the Homepage, from the Retail Deposit Services mega menu, under Term Deposits and Transactions, click Account Opening, or specify Term Deposit Account Opening in the search icon bar and select the screen.

The Term Deposit Account Opening screen is displayed.

Figure 3-5 Term Deposit Account Opening

The fields marked as **Required** are mandatory.

2. On the **Term Deposit Account Opening** screen, specify the customer number in the **Customer ID** field, and press **Enter** or **Tab**.

In the **Term Deposit Account Opening** screen, all available TD account deposit accounts are displayed by the system.

Table 3-4 Term Deposit Account Opening – Field Description

Field	Description
Search By	Users can search for an account number by using any of the available search criteria.  The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the <b>Search</b> icon. Users can also search for the specific account number by providing customer ID, account number, or account name.
	Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.
	A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked. For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.
	Note     The label of the field adjacent to the Search by field changes dynamically. For example, if the Account
	number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.  If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen.

Table 3-5 Active Deposit Product – Field Description

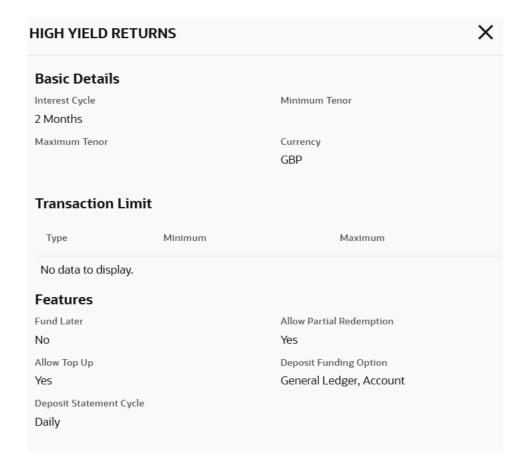

Field	Description
Product Description	Displays the description of the product.
Product Code	Displays the product code.
Currency	Displays the currency code.
Interest Cycle	Displays the interest cycle in months.

- On the Term Deposit Account Opening screen, click Search bar to search for products based on the product code, product description, and currency to search or filter the deposit products.
- 4. Click **View** icon in the product widget, to view additional details of the product.

The account detail screen is displayed with basic product details and allowed features.

Figure 3-7 Term Deposit Account Opening - View Product Details

For more information on fields, refer to the field description table.

Table 3-6 View Details – Field Description

Field	Description
Basic Details	This section displays the basic details of the account.
APY	Displays the APY percentage of the deposit.
Interest Cycle	Displays the deposit's interest cycle.
Minimum Tenor	Displays the minimum tenor for deposit.
Maximum Tenor	Displays the maximum tenor for deposit.
Currency	Displays the deposit amount currency.
Transaction Limit	This section displays the details of the transaction limit.
Туре	Displays the type of transaction
Minimum	Displays the minimum deposit amount.
Maximum	Displays the maximum deposit amount.
Features	This section displays the features of the deposit account.
Fund Later	Displays whether fund later is allowed for the selected account.
Allow Partial Redemption	Displays whether partial redemption is allowed on the account or not.
Allow Top Up	Displays whether top up is allowed on the account or not.

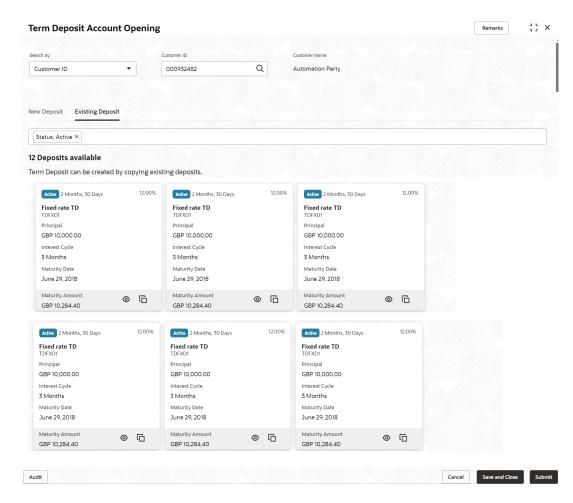

Table 3-6 (Cont.) View Details - Field Description

Field	Description
Deposit Funding Option	Displays the allowed funding options. The possible options are:  Ledger  Account Instrument
Deposit Statement Cycle	Displays the statement cycle maintained for the deposit.

#### 5. Click Existing Deposit tab.

The customer sees all available deposit accounts displayed by the system, with the default setting showing active account details.

Figure 3-8 Term Deposit Account Opening - Existing Deposit

For more information on fields, refer to the field description table.

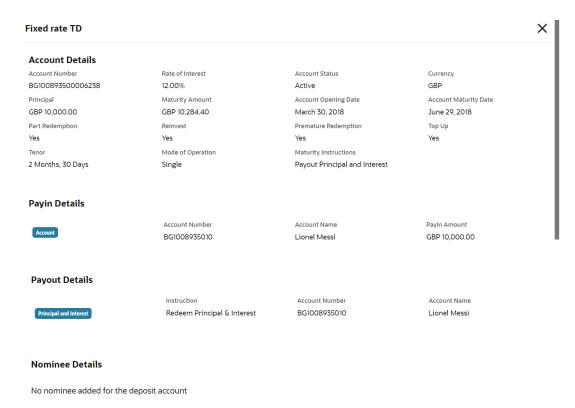

Table 3-7 Existing Deposit Account – Field Description

Field	Description
Status	Displays the status of the account. The available options are:  • Active
	Matured
	Closed
Interest Rate	Displays the rate of interest for an account.
Product Description	Displays the product description.
Product Code	Displays the product code.
Account Number	Displays the existing deposit account number of the customer.
Principal	Displays the amount available in an account.
Interest Cycle	Displays the interest payout cycle.
Maturity Date	Displays the maturity date.
Maturity Amount	Displays the maturity amount.

- 6. In Search bar, the user can search the accounts with different status (Active, Closed, Matured and All) if the user search with All, then the system displays Active, Closed, and Matured deposits accounts of a customer.
- 7. Click View icon in the existing product widget, to view additional details of the account.
  The view screen is displayed with account details, payin details, payout details, nominee details and joint holder details if available.

Figure 3-9 Term Deposit Account Opening - Existing Deposit

On Term Deposit Account Opening screen, the user will be able to create new TD in two methods.

They are as follows:

- Copying the existing account to create new deposit
- Selecting the product to create new deposit.

The two methods are explained in the below steps.

9. Click **Copy** icon in the existing account tile, to copy the existing details of an account.

On copying the account, the system defaults the Account details (i.e. Deposit Amount, Tenor, Reinvest Interest, Maturity Instruction), Payin Details, Payout Details, Nominee Details, and Joint Holder Details if any. All these details are displayed by default and the user is allowed to modify the value.

### Note

- The payin details will not be defaulted, if the Payin account is closed or payin GL is not valid for the branch.
- The payout details will not be defaulted, if account payout mode is other than the account, multi-mode payout, and payout account is closed.
- Nominee details are nullified, if nominee customer ID is closed.
- Existing guardian details are nullified, if nominee become major for the new account.
- On the Term Deposit Account Opening screen, select the product to create a new deposit account.

The **Term Deposit Account Opening** is displayed with the **Deposit Details** fields to specify the details.

Table 3-8 Term Deposit Account Opening - Deposit Details - Field Description

Field	Description
<product name=""></product>	Displays the name of the deposit product selected.
<product description=""></product>	Displays the description of the deposit product selected.
Fund Later	Switch the <b>Toggle On</b> to fund the amount later. Switch the <b>Toggle Off</b> to fund the amount now.
Deposit Amount	When user Specify the deposit amount, the system simulate the maturity amount and interest details based on given deposit amount, defaulted tenor, and account opening date. The tenor opening date and reinvest interest is defaulted.
Maturity Type	Select the option for TD maturity from the drop-down. The available options are:  Tenure: If user selects this option, then specify the tenure for maturity in years, months, and days in the fields displayed adjacent.  The tenor maintained at product will be defaulted and the user is allowed to modify it.  Date: If user selects this option, then specify or select the date.

Table 3-8 (Cont.) Term Deposit Account Opening - Deposit Details - Field Description

Field	Description
Tenor	Specify the tenor for the interest. User can mention the tenor in Years, Months, and Days.
Interest Cycle	Specify the cycle for charging the interest. User can specify the tenor in <b>Years</b> , <b>Months</b> , and <b>Days</b> .  By default, the interest cycle is set based on the product. If required, users can modify it. The interest cycle can be set to <b>Years</b> , <b>Months</b> , <b>Days</b> or combination of year, month, and days.
	Note: This field can only be modified if the Account Level Liquidation Preferences option is enabled at the Interest and Charge product level.
Interest Rate	Displays the interest rate of the deposit and it is defaulted from the product, when you specified the deposit amount.
Reinvest Interest	Select the option from drop-down for reinvest interest. Select <b>Yes</b> to reinvest the interest in TD. This is the default value.
	<ul> <li>Select No to be paid out the interest.</li> <li>Note: If Reinvest Interest is No, then the interest paid out account details need to be provided while capturing the payout details.</li> </ul>
Maturity Instructions	The product displays its default maturity instructions, which the user can modify. The following maturity instructions are supported.  Reinvest Interest is selected as Yes:  Redeem Principal and Interest  Rollover Principal and Redeem Interest  Special Rollover  No Instruction  Reinvest Interest is selected as No:  Redeem Principal  Rollover Principal  Rollover Principal  Note:  Rollover Principal and Redeem Interest, and Special rollover are not displayed if rollover is not enabled for the selected product.  The maturity instruction defined at product will be defaulted as maturity instruction and the user is allowed to change it.
Mode of Operation	Select the mode of operation from the drop-down. The available options are:  Single Jointly Either Anyone or Survivor Former or Survivor Mandate Holder If the Mode of Operation is single, the Joint Holder Details will not be displayed.
Open Date	This date is defaulted as the current branch date and user is allowed to modify it.
Account Name	The Customer name is defaulted as the account name and the user is allowed to modify the name.

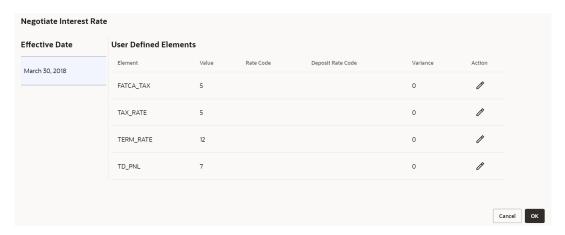

If the user wishes to change the selected product before the save/submit operation, click **Switch Product** in the deposit details screen, and the system displays a confirmation message related to clearing the input details. On confirmation, all input details are cleared and the user will navigate to the product selection screen.

12. Click **Negotiate Rate** link, to negotiate the interest rate by modifying the variance.

The **Negotiate Interest Rate** is displayed.

Figure 3-11 Negotiate Interest Rate

**13.** On **Negotiate Interest Rate** screen, perform the required action. For more information on fields, refer to the field description table.

Table 3-9 Negotiate Rate – Field Description

Field	Description
Effective Date	Displays the date from which the interest rate is effective.
User Defined Elements	This section displays the user defined element details.
Element	Displays the user defined elements that are already linked to the Interest product.
Value	Displays the user defined value.
Rate Code	Displays the rate code for the user defined value.
Deposit Rate Code	Displays the deposit rate code for the user defined value.
Variance	Displays the variance for the user defined value and the user is allowed to modify the value.
Action	Click the <b>Edit</b> icon, to edit only the variance in user defined elements.

The system displays the TD details, derived from the input data, in the widget on the right side of the **Term Deposit Account Opening** screen.

- **14.** Click **Interest Details** link in the simulation widget to view the interest details.
  - Click Interest Details link in the simulation widget to view the interest details.
     The Interest Details screen is displayed.

#### 20. Click Submit.

The screen is successfully submitted for authorization.

The TD account number is displayed when the TD account creation is successful.

# 3.4.2 Top Up

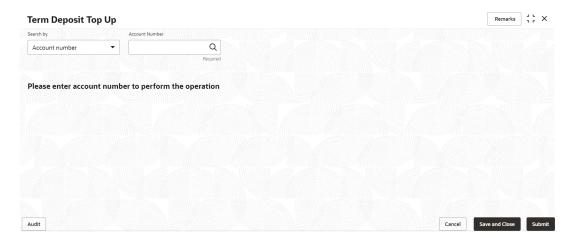

User can perform a TD top-up transaction using this screen.

 On Homepage, from the Retail Deposit Services mega menu, under Term Deposits, under Transactions, click Top Up.

The **Term Deposit Top Up** screen is displayed.

Figure 3-21 Term Deposit Top Up

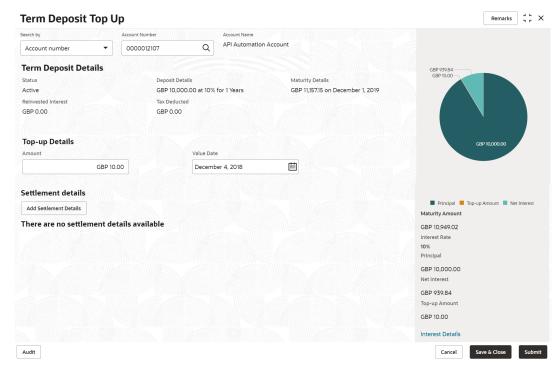

The fields marked as **Required** are mandatory.

On the Term Deposit Top Up screen, Click the Search icon or specify the account number in the Account Number field, and press Enter or Tab.

The Top Up details are displayed in the **Term Deposit Top Up** screen.

Figure 3-22 Term Deposit Top Up Details

3. In the **Term Deposit Top Up** screen, specify the fields. For more information on fields, refer to the field description table.

Table 3-18 Term Deposit Top Up – Field Description

Field	Description
Search By	Users can search for an account number by using any of the available search criteria.  The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the <b>Search</b> icon. Users can also search for the specific account number by providing customer ID, account number, or account name.
	Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.
	A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.
	For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.  Note:
	<ul> <li>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</li> <li>If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen.</li> </ul>
Status	Displays the TD status. The available options are:  Active  Matured
Deposit Details	Closed     Displays the principal balance of the TD, the rate of interest, and the
Maturity Details	tenor of the TD.  Displays the proceeds due to the customer on maturity and the maturity date.
Reinvested Interest	Displays the amount and currency for the reinvested or paid out interest.
	<ul> <li>Note</li> <li>If the interest if of reinvest type, then the field name is displayed as Reinvested Interest.</li> <li>If the interest if of paid out type, then the field name is displayed as Paid out Interest.</li> </ul>
Tax Deducted	Displays the actual tax deducted on reinvested or paid out interest till date.
Amount	Specify the amount which the customer wants to add to the principal of the TD.
Value Date	Specify the date from which the top-up is to take effect.

After specifying the amount in the Amount field in the Term Deposit Top Up screen, the simulated output detail displays on the right side of the screen.

## (i) Note

Computation will be triggered based on the inputs selected and output should be displayed on the panel on the right in a graphical format comparing the current principal, interest, and net proceeds at maturity with what the user would get after the top-up.

For more information on fields, refer to the field description table.

Table 3-19 Top-Up Simulation Details – Field Description

Field	Description
Maturity Amount	Displays the proceeds due to the customer on maturity after taking into consideration the top-up amount.
Interest Rate	Displays the Net interest on the principal (Interest – Tax).
Principal	Displays the total principal of the TD.
Net Interest	Displays the interest net amount.
Top-up Amount	Displays the top-up amount.

Click the Interest Details link in the TD simulation details of the Term Deposit Top Up screen.

The Interest Details screen is displayed.

Effective Date	Displays the date from which the interest rate is effective.
Status	Displays the status of the interest.
Action	Click <b>Mark as Closed</b> , to close the interest rate.  Click <b>View Details</b> , to view the user defined values.
User Defined Values	This section displays the user defined values details.  (i) Note  This section is displayed if you click View Details from the Action field.
Element	Displays the element details.
Value	Displays the user defined value.
Rate Code	Displays the rate code for the user defined value.
Deposit Rate Code	Displays the deposit rate code for the user defined value.
Variance	Displays the variance for the user defined value.
Action	Click the <b>Edit</b> icon, to edit the user defined value details.  Click the <b>Delete</b> icon, to delete the user defined value entry.  Click the <b>Save</b> icon, to confirm the edited details. This icon is displayed, only after you click the edit icon.

 In the Interest Rate and User Defined Values section, click the Add icon, to add a new row.

## 4. Click Submit.

The screen is successfully submitted for authorization.

# 3.5.5 Term Deposit Joint Holder Maintenance

Term Deposit account can be owned by single holder or multiple owners. This screen can be used for modifying the deposit account's joint holder details. You can either add joint holders for the first time or modify the existing joint holder relationship using this screen.

The fields marked as **Required** are mandatory.

A customer can be the sole or joint owner of a TD account. The joint accounts are accounts that are shared between two or more individuals. They can be operated either singly or jointly.

### Note

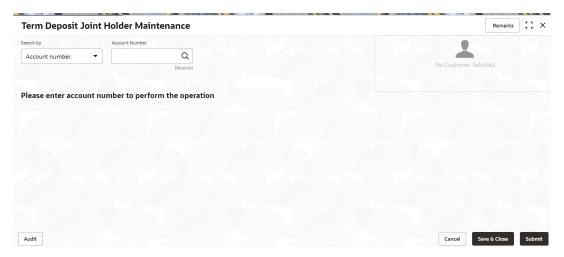

- If the user enters or chooses a minor account number, the system will show a
  notification indicating that the account holder is a minor and that joint holders
  cannot be added. Consequently, the user will be unable to take any further actions
  on the screen.
- When a user enters a major account number and attempts to add a minor as a
  joint holder, the system will show a notification indicating that a minor cannot be
  included as a joint account holder.

### To maintain joint holder details:

 On the Home screen, from the Retail Deposit Services mega menu, under Term Deposits, under Maintenance, click Joint Holder or specify Joint Holder in the search icon bar and select the screen.

The **Term Deposit Joint Holder Maintenance** screen is displayed.

Figure 3-50 Term Deposit Joint Holder Maintenance

2. Click the **Search** icon or specify the account number in the **Account Number** field, and press **Enter** or **Tab**.

The account holder details and mode of operation are displayed.

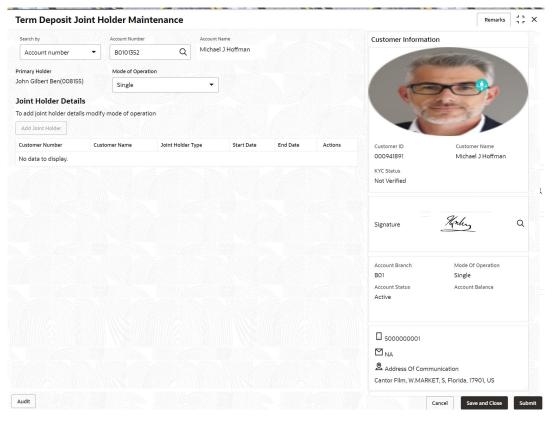

Figure 3-51 Term Deposit Joint Holder Details

3. You can view the account holder details of the selected Term Deposit account number. For more information on fields, refer to the field description table.

**Table 3-41** Term Deposit Joint Holder Maintenance – Field Description

Field	Description
Search By	Users can search for an account number by using any of the available search criteria.  The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the <b>Search</b> icon. Users can also search for the specific account number by providing customer ID, account number, or account name.
	Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.
	A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.
	For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.
	<ul> <li>Note:</li> <li>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</li> <li>If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen.</li> </ul>
Amount Name	Displays the name of the account holder for the selected account number.
Primary Holder	Displays the primary account holder's name.
Mode of Operation	Specify the mode of operation.  (i) Note
	The mode of operations are maintained in the host system and fetched in the list.

For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.			
Start Date	The Start date is defaulted as the account opening or renewed date in case of rolled over TD and user is allowed to modify the defaulted value.  In case of rolled over deposit, the start date will be the new TD start date.			
End Date	The end date will default to the current branch date and the user is allowed to modify the defaulted value.			
Search	Click this button to search the interest paid out details for a given date range.			
Total Interest Amount	Displays the total interest amount for each life cycle of TD and the given date range.			
Transaction Date	Displays the transaction date.			
Interest Rate	Displays the final interest rate.			
Interest Amount	Displays the liquidated interest amount (without deducting tax).			
Payout Account	Displays the interest payout account.			
Payout Mode	Display interest payout mode , the possible values are Account, Ledger, and Deposit.			
Reference Number	Displays the transaction reference number.			

3. Click Close icon to close the Interest Paid Out Details screen.

# 3.7 Prior Maturity Notices in Deposits

This topic describes the details of prior maturity notices in depositss.

Existing Notice days configuration at the business product level will be used to configure the prior days for notice generation. Notice generation will be applicable for both close-on-maturity and auto-renewal deposits. Basis the configuration, the notice generation will happen 'x' days before the maturity date of the deposit.

The static data for the maturity notices is listed below:

Table 3-52 Factory Shipped list of Facts

Domain	Category	Event	Facts	Fact Description
OBRDEP	NOTICES	TD/CD Maturity	F_CUST_TYPE	Account Customer Type
OBRDEP	NOTICES	TD/CD Maturity	F_CUST_NO	Account Customer Number
OBRDEP	NOTICES	TD/CD Maturity	F_CUST_NAME	Account Customer Name
OBRDEP	NOTICES	TD/CD Maturity	F_ACC_NAME	Account Name
OBRDEP	NOTICES	TD/CD Maturity	F_ACC_NO	Account Number
OBRDEP	NOTICES	TD/CD Maturity	F_CCY	Account Currency
OBRDEP	NOTICES	TD/CD Maturity	F_ACC_ADD	Account Address
OBRDEP	NOTICES	TD/CD Maturity	F_MAT_DATE	Account Maturity Date
OBRDEP	NOTICES	TD/CD Maturity	F_NEXT_MAT_DA TE	Account Next Maturity Date
OBRDEP	NOTICES	TD/CD Maturity	F_INT_RATE	Transaction Account Interest Rate
OBRDEP	NOTICES	TD/CD Maturity	F_MAT_AMOUNT	Transaction Account Maturity Amount
OBRDEP	NOTICES	TD/CD Maturity	F_APY	Transaction Account Annual Percentage Yield

### 3.8 Access Restriction

The access restriction feature ensures that only authorized users can manage certain groups of customer accounts, like High Net Worth Individual (HNI) accounts. Access restrictions are applied at all stages of branch service transactions, including initiation, approval, hand-off, retries, and any multi-level authorization processes.

At the initiation stage, when the customer enters the account number, the system checks for access restrictions and shows an error if the user is not allowed access. For approval and hand-off retries, when the authorizer opens the approval screen, the system will again verify the access restrictions.

The Access Restriction can be enabled using the **User Creation** and **Party Creation** screens.

### (i) Note

- Access restriction validation occurs after other checks, such as the account status (Open or Closed) and any staff restrictions.
- In the Customer Panel and Deposit 360 screen, joint holder details are restricted from view if the user does not have access to the joint holder's access group of the account.

Below is the use case:

Table 3-53 Access Restrictions Use Case

Customer	Customer Access Group	User Access	Branch Servicing Operations Allowed/Restricted?
000001	HNI	-	Restricted
000001	HNI	HNI	Allowed
000001	HNI	CELEBRITIES	Restricted
000002	-	-	Allowed
000002	-	HNI	Allowed

## 3.9 Multi-Currency Accounts

The multi-currency accounts functionality helps the customer to improve customer experience and operational efficiency. This kind of account is useful for the customer's dealing with international payments or perform transactions in different currencies.

The following are the financial screens, where multi-currency functionality is supported:

- Account 360
- Overdraft Limit Summary
- Unsecured Overdraft Limit
- Temporary Overdraft Limit
- Advance Against Uncollected Funds
- Create Amount Block
- View and Modify
- Amount Block
- Account Transactions
- Account Balance Inquiry
- Secured Overdraft Limit

The following are the non-financial screens, where multi-currency functionality are supported:

- Account Address Update
- Joint Holder Maintenance
- Nominee/Beneficiary Details Update

- Account Preferences
- Customer Relationship Maintenance
- Account Statement Frequency
- Activate Dormant/Inactive Account
- Account Status Change
- Cheque Book Request
- Stop Cheque Payment
- · Cheque Book Status
- View/Modify Stop Cheque
- Account Closure Inquiry
- Memo Maintenance

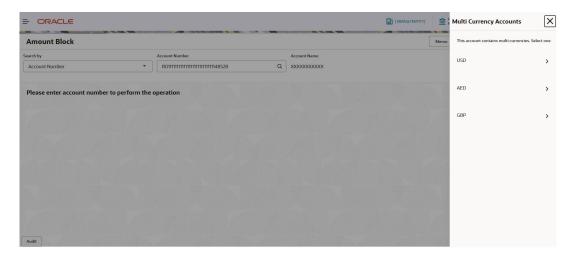

The following are the screens, where multi-currency functionality is not supported:

- Courtesy Pay Maintenance
- Account Garnishment
- Online Account Sweep In
- Online Account Sweep History
- Regulation D Transaction Inquiry
- Account Closure

### To set currency from multi-currency:

Specify the account number in the financial screens.
 The following screens is displayed.

Figure 3-68 Multi Currency Accounts

- 2. In the **Multi Currency Accounts** section, select the currency.
- **3.** The currency gets defaulted, for the specific screen.

## 3.10 Business Events in Oracle Banking Retail Deposits

This topic describes the processing of business events in online for Oracle Banking Retail Deposits.

The System has the capability to generate events basis customer initiated or system-initiated actions. The system generates these events related to a customer and their accounts when activities or actions related to the customer or accounts take place that are useful for a service interaction. Some of these generated events are also important to be communicated to customers in a timely manner as per regulations.

The system has the capability to generate and handover the event with the required details to an external system through Event Delivery Platform (EDP) for their consumption and the external system can use the data handed over for any purpose as deemed necessary. For example, the external system can use the data for communicating the customer of the event with necessary details.

The following business events is available as follows:

- Create Deposit
- Change in maturity instructions for the deposit account
- Change of payout instructions
- Change in special condition for interest rate
- Topup Add funds to deposit principal
- Partial/ Full redemption of the deposit.

The static data is factory shipped as part of this release as below.

When the event happens and passes the underlying rule, the system will publish the event with necessary facts (Data) as shown in the table for the multiple third party systems to consume. A single event can be published to multiple consumers.

#### Note

Facts and Rules are the key elements for generating the Business Events. Banks can configure the Facts and Rules, with the naming convention specified in the below tables respectively.

EVENT_TD_ACC_STMT_NOTICE	Depoist account periodic statement rule

# Accounting Entries for Top-up and Redemption **Events for Certificate Products**

The user needs to maintain separate accounting entries in Interest Accounting Entries maintenance screen for Top up and Redemption events.

### **Accounting Entries for DTOP Event**

For DTOP Event, (Topup) the accounting entries is maintained as follows:

Table A-1 Accounting Entries for Top-Up

Accounting Role	Amount Tag	Debit/Credit Indicator
TDACCOUNT	TD-PRINC	Credit
TDOFFSET	TD-PRINC	Debit

### **Accounting Entries for REDM Event**

For REDM Event, (Redemption) the accounting entries is maintained as follows:

### (i) Note

The assumption for the setup below is that **AP01** represents the IC Rule.

Table A-2 Accounting Entries for Redemption

Accounting Role	Amount Tag	Debit/Credit Indicator
AP01-ACCR-1	ILIQ	Debit
AP01-BOOK-1	ILIQ	Credit
AP01-TPBL-3	TAX	Credit
AP01-BOOK-3	TAX	Debit
AP01-PNL-2	ILIQ	Credit
AP01-BOOK-2	ILIQ	Debit

# **Functional Activity Codes**

This topic provides the functional activity codes available in Oracle Banking Retail Deposits and Oracle Banking Retail Deposits Servicing.

Table B-1 Functional Activity Codes for Oracle Banking Retail Deposits

Screen Name/API Name	Functional Activity Code	Action	Description

Table B-2 Functional Activity Codes for Term Deposit Servicing Screens

Screen Name/API Name	Functional Activity Code	Action	Description
Deposit 360	DSR_FA_TDCODV_VIEW	Query Details	View the Deposit 360 details.
Account Opening	DSR_FA_TDPYIN_SAVE	Initiation	Initiate the deposit account opening.
Account Opening	DSR_FA_TDPYIN_AUTH	Authorization	Approve or Reject the deposit account opening request.
Top Up	DSR_FA_TDTPUP_SAVE	Initiation	Initiate the deposit top up.
Тор Uр	DSR_FA_TDTPUP_AUTH	Authorization	Approve or Reject the deposit top up request.
Redemption	DSR_FA_TDREDM_SAVE	Initiation	Initiate the deposit redemption.
Redemption	DSR_FA_TDREDM_AUTH	Authorization	Approve or Reject the deposit redemption request.
Create Amount Block	DSR_FA_CRTDBK_SAVE	Initiation	Initiate the deposit create amount block.
Create Amount Block	DSR_FA_CRTDBK_AUTH	Authorization	Approve or Reject the deposit create amount block request.
Modify Amount Block	DSR_FA_MOTDBK_SAVE	Initiation	Initiate the deposit modify amount block.
Modify Amount Block	DSR_FA_MOTDBK_AUTH	Authorization	Approve or Reject the deposit modify amount block request.
View Amount Block	DSR_FA_TDAMBK_VIEW	Query Details	View the deposit amount block.
Close Amount Block	DSR_FA_CLTDBK_SAVE	Initiation	Initiate the close amount block.
Close Amount Block	DSR_FA_CLTDBK_AUTH	Authorization	Approve or Reject the close amount block request.
Payout Modification	DSR_FA_TDPOMN_SAVE	Initiation	Initiate the payout modification.

Table B-2 (Cont.) Functional Activity Codes for Term Deposit Servicing Screens

Screen Name/API Name	Functional Activity Code	Action	Description
Payout Modification	DSR_FA_TDPOMN_AUTH	Authorization	Approve or Reject the payout modification request.
Account Modification	DSR_FA_TDACMN_SAVE	Initiation	Initiate the account modification.
Account Modification	DSR_FA_TDACMN_AUTH	Authorization	Approve or Reject the account modification.
Joint Holder	DSR_FA_UPJHTD_SAVE	Initiation	Initiate the Joint Holder maintenance.
Joint Holder	DSR_FA_UPJHTD_AUTH	Authorization	Approve or Reject the joint holder maintenance.
Beneficiary	DSR_FA_UPNMTD_SAVE	Initiation	Initiate the beneficiary details update.
Beneficiary	DSR_FA_UPNMTD_AUTH	Authorization	Approve or Reject the beneficiary details update request.
Account Transactions View	DSR_FA_TDACTN_VIEW	Query Details	View deposit account transactions.
Reverse Transaction	DSR_FA_TDTRNREVR_SAVE	Initiation	Initiate deposit transaction reversal.
Reverse Transaction	DSR_FA_TDTRNREVR_AUTH	Authorization	Approve or Reject the deposit transaction reversal request.
Certificate	DSR_FA_TDCERT_VIEW	Query Details	View the deposit certificate.
Interest Paid Out Details	DSR_FA_TDINPO_VIEW	Query Details	View deposit interest paid out details.
