Purpose

This guide is designed to help user quickly get acquainted with the features and functionality of **Oracle Banking Retail Deposits Cloud Service**. It provides an overview to the product and the steps involved in the creation and the maintenance of Retail Deposits.

Audience

This user guide is intended for the following end Users / User Roles in a Bank:

Table User Roles

User Role	Functions
Back Office Clerk	Input functions for contracts
Back Office Managers/Officers	Authorization functions
Product Managers	Product definition and authorization
End of Day Operators	Processing during End of Day/ Beginning of Day
Financial Controller/Product Managers	Generation of reports

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which user supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that user enter.

Related Documents

The related documents are as follows:

- Account Configurations User Guide
- Getting Started User Guide
- Oracle Banking Common Core User Guide
- Security Management System User Guide

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table Abbreviations

Abbreviation	Definition
ATM	Automated Teller Machine
BBAN	Basic Bank Account Number
CASA	Current and Savings Account User Guide
CD	Certificate of Deposit
ECA	External Credit Approval
EOD	End of Day

Table (Cont.) Abbreviations

Abbreviation	Definition
EPCRS	Employee Plans Compliance Resolution System
FDIC	Federal Deposit Insurance Corporation
FMV	Fair Market Value
GL	General Ledger
IBAN	International Bank Account Number
IDI	Insured Depository Institution
IRA	Individual Retirement Account
LOV	List of Values
MMDA	Money Market Deposit Account
ROT	Roth IRA
SMDIA	Standard Maximum Deposit Insurance Amount
TRA	Traditional IRA

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Basic Actions

This topic describes about basic actions that can be performed on a screen.

Table Basic Actions

Action	Applicable Stages	Description
Approve	Approval	The system displays a section where approval remarks if any can be input. Click OK to submit. The transaction is sent to the Host system through <i>Oracle Banking Routing Hub</i> . The Host system validates the transaction again and the transaction is created if all the validations are successful. If the transaction fails, the transaction is moved to Handoff retry stage, and user can view the error message. In this stage, the authorizer can retry or reject the transaction. On reject, the transaction is sent back to the maker to modify or delete it.
		Note : The maker checker validation will be provided if the same maker tries to approve the transaction.
Audit	Initiation, Approval and Hand off Retry	Audit details provide the logs of users who have acted on the transaction, the transaction date, and the time for all stages that the transaction has passed through.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Auto Authorizatio n	Initiation	Auto authorization can be configured for the branch servicing screens by creating a Rule based on life cycle code. The steps to create the Auto authorization as follows:
		Create the fact value as LIFECYCLECODE.
		2. Create Rule to enable Auto authorization for any servicing screen and add the expression in Rule for that screen's lifecycle code. While creating a Rule the product processor should be given as DEPOSIT and fact should be selected as LIFECYCLECODE. For Example:
		IF (LIFECYCLECODE == TDPOMN)
		output
		Section1 LEVEL:0
		Create or modify a Rule Group with Name DepositRuleGroup and map the Rule(s) created in the step (2).
		Note You can define one single Rule for all the screens and add the expression for the life cycle code or you can define individual Rule for each screen and map to the Rule
		Note: For more information, refer to the Oracle Banking Common Core User Guide to create Fact, Rule and Rule Group.
Back	Initiation, Approval, and Hand off Retry	In case the user missed to specify or need to modify the details in the previous segment, click to navigate to the previous segment.
Cancel	Initiation, Approval and Hand off Retry	Cancel operation cancels the transaction input midway without saving any data. The user is alerted that the input data would be lost before confirming the cancellation.
Change Log	Approval	When the authorizer clicks on the Change Log button, the system displays the changes made to the transaction in a pop-up window. By default, the change log is set to display only modified values. The Change Log button has two options, they are, All and Updated . The All button displays both modified and non-modified fields and the Updated button displays only the modified fields. The old and new values are displayed so that the authorizer can compare or verify the values and decide on further action. Also, the new values appear is red for easy recognition.
Close	Initiation, Approval and Hand off Retry	Users can close the transaction input screen. The system displays a warning message to the user that any unsaved data would be lost. User can either choose to ignore the message and close the screen or choose to Save and Close the transaction.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Delete	Initiation	Delete operation deletes the transaction without saving any data. The user is alerted that the input data would be lost before confirming the deletion.
Document	Initiation, Approval and Hand-off Retry	The maker of the transaction can click on Document to upload documents that are relevant to the transaction. Once uploaded, the documents are available for viewing during authorization or by the maker.
Host Error	Hand Off Retry	Hand off Retry comes into use whenever a transaction input from the mid-office system fails authorization due to Host System rejection. The authorizer of the transaction can view the reason for Host rejection and take appropriate action.
i icon	Initiation, Approval and Hand-off Retry	To view the Customer details such as the photograph, signature, customer ID, Account Branch, and balance, the i icon is used. The i icon becomes active once the maker of the transaction inputs the account number and tabs out of the field. The i icon is useful to inquire customer information about both the debit and the credit account numbers.
Maximize	Initiation, Approval and Hand off Retry	User can maximize the transaction input screen.
Memo	Initiation, Approval, and Hand off Retry	The memos are displayed for the account number specified. If no memos are maintained and you click Memo , then a message is displayed that there are no memos maintained for the account. You can view the memos displayed in the dialog box and then click the Close icon to close. Memos are displayed upfront in Initiation and Authorization screens. In Hand-off Retry screens, you can click Memo to view the memos if any. The Memos will not be displayed in inquiry screen and Deposit 360 screen. The customer level memos having end date same as current system date are only displayed in the screens. In case of account level memos, there are no restrictions on displaying the memos. These memos are not editable.
Minimize	Initiation, Approval and Hand-off Retry	Users can minimize the transaction input screen. When the screen is minimized, it appears as to a separate tab within the same web page.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Multi-Level Authorizatio n	Initiation	Multi-level authorization can be configured for the branch servicing screens by creating a Rule based on life cycle code. The steps to create the Multi-level authorization as follows:
		Create the fact value as LIFECYCLECODE.
		Create Rule to enable Multi-level authorization for any servicing screen and add the expression in the Rule for that screen's lifecycle code. While creating a Rule the product processor should be given as DEPOSIT and fact should be selected as LIFECYCLECODE. For Example:
		IF (LIFECYCLECODE == TDPYIN)
		output
		Section1 LEVEL:1~DSR_FA_TDPAYIN_AUTH, LEVEL:2~DSR_FA_TDPAYIN_AUTH
		① Note
		If customer wants to use separate Functional Activity Code for each Level then Rule output need to be define like
		LVELE:1~ <functional_activity_code1>, LVELE:2~<functional_activity_code2></functional_activity_code2></functional_activity_code1>
		3. Create or modify a Rule Group with name ApprovalRuleGroup and map the rule(s) created in the step (2).
		① Note
		You can define one single rule for all the screens and add the expression for the life cycle code or you can define individual rule for each screen and map to the rule group.
		Note : The maker checker validation will be provided if the same maker tries to authorize the single or multi-level approval tranaction.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Overrides	Initiation, Approval and Hand-off Retry	If override messages had appeared during initiation stage and they were accepted by the maker during submission, the Overrides button appears in the Initiation screen if the transaction is subsequently rejected by the authorizer.
		On the Override Details section, click Decline to go back to the transaction screen to modify or cancel it, or click Accept to complete the initiation stage and move the transaction to the approval stage. The Overrides button is displayed in the Approval and Hand-off retry stage if there were any override messages generated during initiation and accepted by the maker. When the Overrides button is clicked, the system displays the overrides accepted by the maker.
		After verifying the transaction and override details, the authorizer can either approve or reject the transaction. Existing Approve Transaction section is modified to display the overrides if any overrides are raised during the initiation submits.
Reject	Approval and Hand off Retry	When an authorizer chooses to reject a transaction, the Reject icon is used. The system displays a pop-up screen to capture the Rejection remarks if any. Click OK for the transaction to be routed back to the initiation stage. Subsequently, the maker can modify or delete the transaction details.
Remarks	Initiation, Approval and Hand-off Retry	Remarks can be used either by the maker or the authorizer of the transaction to optionally capture useful information about the transaction.
Reset	Hand off Retry	The reset button clears all the details displayed on the screen and allows input or selection of a different customer number.
Retry	Hand off Retry	The possibility of retrying a transaction arises when transaction input from the mid-office system fails authorization due to Host System rejection. Such host-rejected transactions will be present in the Hand off Retry queue in the Task Wizard. The Retry option is available only to the authorizer. Upon Retry, the transaction is sent to the host once again through Oracle Banking Routing Hub. Optionally, the authorizer can also Reject the transaction in which case it is routed back to the maker.
Save and Close	Initiation	In case a transaction has to be closed midway due to a lack of sufficient information, the maker of the transaction can choose this option. On Save and Close , the input details are saved and the transaction screen is closed. Saved transaction details will be available in My task . Users can select the transaction from My Task and proceed with the transaction or delete it.
Submit	Initiation	After submitting the initiation stage, the system validates the transaction with the host and displays the errors or overrides if any. In case of an error, you can modify and resubmit or cancel the transaction. In case of an override, you can modify and resubmit or proceed with the transaction by accepting the overrides.

Specify **User Name** and **Password**, and login to **Home** screen.

Configurations

This topic contains the following **Configurations** as subtopics:

Retail Deposits Business Product

Users can classify the customer accounts of the bank into different groups and assign each group an identifying code.

Deposit Pay-in Maintenance

The deposit pay-ins to be done by GL, user needs to maintain the GL details through the Deposit Pay-in Maintenance screen.

External Parameter Configuration

The External Parameter Configuration screen enables financial institutions to manage and maintain bank-specific settings required for processing external transactions.

Penalty Parameters Configuration

To configure the penalty days basis the deposit tenure.

• State Group Parameters Configuration

This allow users to define state group parameters for the escheatment parameters across the currencies.

State Group Mapping Configuration

This allows the user to map the state group ID to state codes and business products so that the escheatment parameters can be mapped as per the state.

IRA Parameters Configuration

This is a common screen where an user can capture parameters that are common across, IRA savings as well as IRA Certificate of Deposits.

IRA Plans Configuration

This is a common screen where an user can choose plans that are common for IRA savings as well as IRA Certificate of Deposits.

• IRA Customer Plan Configuration

This is a common screen where an user can choose plans that are common for IRA savings as well as IRA Certificate of Deposits.

Retail Deposits IRA Product

Users can classify an IRA accounts of the bank into different groups and assign each group an identifying code.

1.1 Retail Deposits Business Product

Users can classify the customer accounts of the bank into different groups and assign each group an identifying code.

Each group is referred to as a **Business Product** and is maintained in the **Retail Deposits Business Product Configuration** screen. User also define certain common fields applicable to the accounts in this business product, such as the General Ledger lines to which the accounts in this report to facilities granted to the account holders.

Business Product definition and various features are captured across the following subscreens covered as subtopics.

- Basic Details
- Features
- Preferences
- Tenor Parameters
- Rate Chart Parameters
- Maturity Instructions
- Maturity Holiday Treatment
- Interest
- MIS

This topic contains the following sub-topics:

Create Business Product

This topic describes the systematic instructions to create business product. The maintenance screen allows the user to configure business product parameters.

View Business Product

This topic explains the systematic instructions to view the list of configured business product parameters.

1.1.1 Create Business Product

This topic describes the systematic instructions to create business product. The maintenance screen allows the user to configure business product parameters.

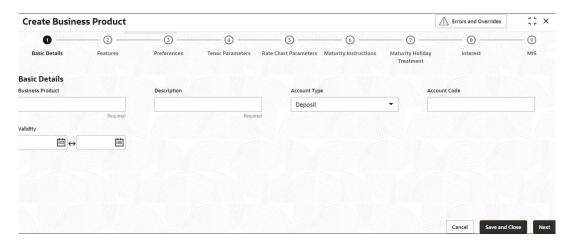

The fields marked as **Required** are mandatory.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click Retail Deposits Business Product. Under Retail Deposits Business Product, click Create Business Product.

The Create Business Product screen displays.

Figure 1-1 Create Business Product - Basic Details

3. Specify the fields on the **Basic Details** screen.

For more information on fields, refer to the field description table below.

Table 1-1 Basic Details - Field Description

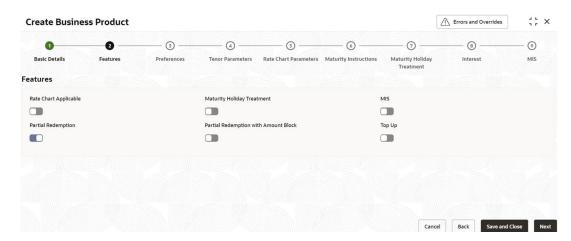

Field	Description
Business Product	Specify the business product code to be maintained. This indicates the class code or template code. This code is referenced during the deposit creation.
Description	Specify the description for the business product.
Account Type	Specify the account as Deposit . This is the default value.
Account Code	As per your bank's requirement, you can choose to classify business products into different account codes. The bank can decide the way the business products are to be assigned to different account codes. An account code can consist of a maximum of four characters.
	An account code can be part of the customer account mask.
	If the customer account mask consists of an account code, the value in this field is used as part of deposit account number generation.
Validity	Specify the validity period of the business product by specifying the start date and the end date. End date is optional.

4. After specifying the fields in the Basic Details screen, click Next.

The Features screen displays.

Figure 1-2 Create Business Product - Features

5. Specify the fields on **Features** screen.

For more information on fields, refer to the field description table below.

Table 1-2 Features - Field Description

Field	Description
Rate Chart Applicable	Switch this toggle ON , if balance and tenor based rates are applicable. If this option is enabled, the Rate Chart Parameters data segment will be displayed in the screen.
Maturity Holiday Treatment	Switch this toggle ON , if maturity holiday treatment is applicable. It determines the treatment applicable for deposit account, if the maturity date falls on a holiday. If this option is enabled, the Maturity Holiday Treatment data segment will be displayed in the screen.
MIS	Switch this toggle ON , to capture the MIS details for the product. If this option is enabled, the MIS data segment will be displayed in the screen.
Partial Redemption	Switch this toggle ON , to indicate that partial redemption is allowed. If this option is not enabled, then partial redemption will not be allowed on deposits under this business product. The default value is OFF .
Partial Redemption with Amount Block	Switch this toggle ON , to indicate that partial redemption is allowed for the deposits with amount blocks. If the deposit is linked partially then partial redemption of the deposit will be allowed only if you enable this option. The default value is OFF .
Тор Uр	User can top-up an existing deposit by adding funds to the deposit account.

6. After specifying the fields in the **Features** screen, click **Next**.

The **Preferences** screen displays.

Cancel Back Save and Close Next

Figure 1-3 Create Business Product - Preferences

7. Specify the fields on Preferences in Deposits screen.

Click **Add** button in the **Preferences** screen to specify the currency code, minimum opening deposit amount, maximum opening deposit amount, and top up units. For more information on fields, refer to the field description table below.

Table 1-3 Preferences - Field Description

Field	Description
Minimum and Maximum Limits for Deposits	The min and max limits feature in Deposits business product allows for the bank to include the limits for deposit opening, top-up and deposit lifecycle balance threshold for deposit processing

Table 1-3 (Cont.) Preferences - Field Description

Field	Description
	Description
Threshold Type	This field is a dropdown list. This field denotes the event type for which the minimum and maximum limits are being defined. This field will support the below 3 types as static values: Deposit Creation: This type to be selected for defining
	the minimum and maximum limits of the deposit amount that is required for opening a deposit. If there are no values provided for this field, then it is understood that there is no minimum or maximum deposit opening amount limits.
	 Top-up: This type to be selected for defining the minimum and maximum limits of the amount when processing a top-up transaction for the deposit. If there are no values provided for this field, then it is understood that there is no minimum or maximum amount limits for top-up. Top-up units: This field is applicable only when the "Threshold Type" is Top-up. This is an existing field and this denotes the incremental unit in which the top-up can be done. Eg: If this value is 50, then the top-up can be done for \$50, \$100, \$150, \$200 and so on. Balance Threshold: This type to be selected for defining the minimum and maximum deposit balance over the lifecycle of the deposit (that is, the balance in the deposit account at any point in the deposit lifecycle cannot breach these limits). Eg: Any lifecycle operation such as a deposit opening, top-up, redemption cannot breach these limits. If there are no values provided for this field, then it is understood that there is no minimum or maximum amount limits to be validated over the lifecycle of the deposit.
	The values for minimum and maximum amounts provided for the threshold type "Deposit Creation" cannot breach the limits if provided for the "Balance Threshold".
	Similarly, the values for minimum and maximum amounts provided for the threshold type "Top-up" cannot breach the limits if provided for the "Balance Threshold".
Minimum Amount	Specify the minimum opening deposit amount for the deposit product. If the deposit funding amount is less than minimum opening deposit amount, then the system will reject the deposit creation.
Maximum Amount	Specify the maximum opening deposit amount for the deposit product. If the deposit funding amount is greater than the maximum opening deposit amount, then system will reject the deposit creation.
Units	Specify the top-up units for the deposit product. The top- ups done on the deposit product should be basis the units if configured. Eg: If top-up unit is USD 500, then top-up can be done for UDS 500, USD 1000, USD 1500 etc.
Action	Click the Edit icon to edit the values specified, or click Delete icon to delete the added row.

Table 1-3 (Cont.) Preferences - Field Description

Field	Description
Deposit Statement	Switch this toggle ON , to specify the cycle, and statement format to get the deposit statement for the transactions.
Credit GL	Specify the GL to which an account balance should belong. Click Search icon and select the credit GL from the list of values.
Funding Options	Specify the option(s) through which the deposit can be funded. When the deposit is opened, a validation ensures that the deposit is funded only through the selected option(s). The available options are External Account, Check, General Ledger, and Account.
Deposit Creation without Funding	System will support the capability to allow opening a zero balance deposit by the bank, which can be funded later. It is to be noted that this funding should happen within the configured number of days at the deposit business product, if not, then the zero balance deposit will be closed automatically.
Zero Balance Deposit	Switch this toggle ON to enable the system allows for a zero balance deposit account to be created under the business product. In such cases the deposit account origination system will not be passing the payin details during deposit opening as this deposit will be funded later. The default value is OFF .
Hold Period for Zero Balance Deposit (in days)	Select the days to configure the Zero Balance Deposit. Once a zero balance deposit is created, it is expected that the deposit will be funded within the days configured as part of this field. Eg: if the value configured as part of this field is '7 days' then: - If the customer funds (this funding will be considered as an initial funding) within 7 days of opening the deposit then the deposit account will continue to be active. The interest accruals under this CD will be considered from the date of funding the deposit accountIf the customer fails to fund the deposit within the configured 7 days, then the system will process the closure of this deposit with zero balance as part of the EOD batch process. Note: This field is applicable only if the flag Zero Balance Deposit is set to On.
Prior Notice Days for Zero Balance Deposit Closure	Select the notice days prior to the Zero balance Deposit closure date in case of no funding received by the end of the hold period. An event is published to Event Delivery Platform (EDP) on the said date for the subscribing system to notify the customer of the upcoming closure of zero balance deposit in case the funding is not received by the due date.

8. After specifying the fields in the **Preferences** screen, click **Next**.

The **Tenor Parameters** screen displays.

1. Figure 1-4 Create Business Product - Tenor Parameters

9. Specify the fields on **Tenor Parameters** screen.

Click **Add** button in the **Tenor Parameters** data segment to add the applicable tenors. For more information on fields, refer to the field description table below.

Table 1-4 Tenor Parameters - Field Description

Field	Description
Tenor Parameters	This section determines the list of applicable tenors for a business product and also the minimum, maximum and default tenor for a business product.
Applicable Tenors	Click on Add to specify multiple tenors that are applicable for the business product. If Applicable Tenors are defined for a business product then the deposit can be created only with one of the tenors mentioned in the configured list. The deposit creation will fail in case the deposit is booked with any other tenor not part of the maintained list.
Days	Specify the tenor value in Days .
Months	Specify the tenor value in Months .
Years	Specify the tenor value in Years .
Minimum Tenor	Specify the minimum tenor for which deposits should be created under this business product. If the deposit is booked for a tenor that is less than the minimum tenor then the deposit creation fails with an appropriate error message. If applicable tenor is configured, then it needs to be made sure that the minimum tenor is less than the least value of the configured applicable tenors.
Days	Specify the minimum tenor in terms of days.
Months	Specify the minimum tenor in terms of months.
Years	Specify the minimum tenor in terms of years.

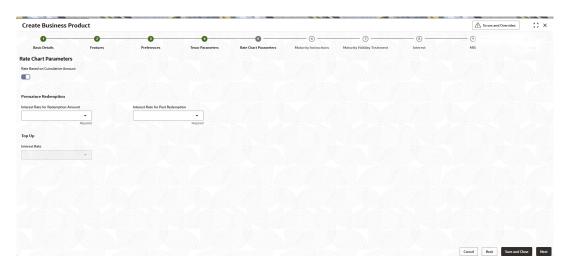

Table 1-4 (Cont.) Tenor Parameters - Field Description

Field	Description
Default Tenor	User can define a tenor for the deposits that are opened under the business product. Deposits opened under the business product will automatically acquire this tenor. However, user can change the tenor to suit the requirements of a specific deposit. The default tenor should be within the minimum and maximum range specified. The default tenor is mandatory for a business product. If applicable tenors are also configured, then one of the applicable tenors needs to be captured as a default tenor.
Days	Specify the default tenor in terms of days.
Months	Specify the default tenor in terms of months.
Years	Specify the default tenor in terms of years.
Maximum Tenor	Specify the maximum tenor for which deposits can be created under this business product. If the deposit is booked beyond the maximum tenor then the deposit creation fails with an appropriate error message. If applicable tenor is configured, then it needs to be made sure that the maximum tenor is more than the max value of the configured applicable tenors.
Days	Specify the maximum tenor in terms of days.
Months	Specify the maximum tenor in terms of months.
Years	Specify the maximum tenor in terms of years.

10. After specifying the fields in the **Tenor Parameters** screen, click **Next**.

The Rate Chart Parameters screen displays.

Figure 1-5 Create Business Product - Rate Chart Parameters

11. Specify the fields on Rate Chart Parameters screen.

For more information on fields, refer to the field description table below.

Table 1-5 Rate Chart Parameters - Field Description

Field	Description
Rate Chart Parameters	This determines if rate chart is applicable for the business product and the premature redemption details for the deposits if rate chart is allowed.
Rate Based On Cumulative Amount	Switch this toggle ON to indicate that the system should arrive at the interest rate of a new deposit using the cumulative amount of other active deposits, under the same business product, customer, and currency. The default value is OFF .
Interest Rate for Redemption Amount	Select the interest rate to be applied for the redemption amount, from the drop-down list. The list of values are as follow: Continue Existing As on Opening Date As on Redemption Date Special Rate Code As on Rate Revision Events The default value is Continue Existing.
Interest Rate for Post Redemption	Select the interest rate to be applied after redemption of deposit, from the drop-down list. The list of values are as follows: Continue Existing As on Opening Date As on Redemption Date As on Rate Revision Events The default value is Continue Existing.
Interest Rate	 Select the interest to be applied on the top-up deposit, from the drop-down list. The list of values as follow: Current - Select this option to apply the current interest rate of the deposit on the top-up amount. As on Opening Date - Select this option to apply the interest rate based on the slab as on the value date of deposit opening. If top-up is made to a deposit after rollover, the rate as on rollover date will be considered for rate pick up. As on Top Up Value Date - Select this option to apply the interest rate based on the slab as on the value date of the top-up.

Figure 1-6 Create Business Product - Maturity Instructions

13. Specify the fields on Maturity Instructions screen.

For more information on fields, refer to the field description table below.

Table 1-6 Maturity Instructions - Field Description

Field	Description
Maturity Instructions	This determines the default maturity instructions for accounts opened under the business product.
Auto Rollover	Switch this toggle ON to automatically rollover the deposits on maturity date. The default value is OFF .
Month-End Maturity Deposit	Switch this toggle ON to indicate that the deposit is a month-end maturing deposit (i.e., the deposit matures on the last working day of the month). The default value is OFF .
Rollover to a Different Product	Switch this toggle button ON for selection only if the Maturity Instructions selected for the product is 'Auto Rollover' If this flag is OFF when Auto-Rollover is ON , then the deposits opened under this business product can rollover to the same product only. This flag status also determines if the override of Target Product at Rollover will be allowed to be overridden at account level The default value for this field is OFF
Target Product at Rollover	Switch this toggle ON for selection only if the field Rollover to a Different Product is selected as ON . This LOV lists the configured deposit product codes along with product descriptions, in the system. The user can choose the target product code from the list to which the deposit account needs to rollover to on maturity (if the maturity instruction is rollover). The Target product must be of the same type. Eg: Normal CD to show only normal CD products as part of the List of Values (LOV) This is an optional field.

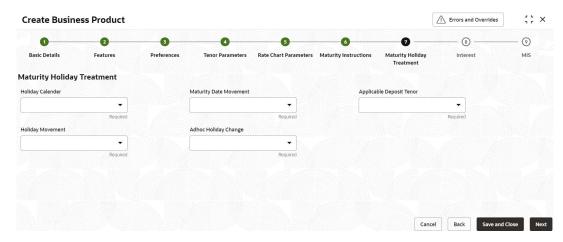

Table 1-6 (Cont.) Maturity Instructions - Field Description

Field	Description
Re-pick up Business Product Tenor on Rollover	Switch this toggle ON to enable re-pick up of the business product tenor on rollover. During rollover, the system will pick up the default tenor of the business product. The default value is OFF .
Close on Maturity	Switch this toggle ON to close the deposit account on maturity date and transfer the amount as per the pay-out details maintained for the deposit. The default value is OFF .
Cascade Month-End Maturity Date	Switch this toggle ON to cascade the month end maturity date of the deposit. If not selected then, the maturity date will fall in line with the account open date. The default value is OFF .
Maturity Notice Period	Specify the number of days before which the customer notification is to be sent for deposit maturity.
Grace Days After Rollover	Specify the number of days after rollover during which the customer can request modifications or operations such as redemption without incurring any penalty.

14. After specifying the fields in the Maturity Instructions screen, click Next.

The Maturity Holiday Treatment screen displays.

Figure 1-7 Create Business Product - Maturity Holiday Treatment

15. Specify the fields on Maturity Holiday Treatment screen.

For more information on fields, refer to the field description table below.

Table 1-7 Maturity Holiday Treatment - Field Description

Field	Description
Holiday Treatment	This determines the holiday treatment if the maturity of the deposit falls on a holiday.

Table 1-7 (Cont.) Maturity Holiday Treatment - Field Description

Field	Description
Holiday Calendar	Select the holiday calendar applicable to the business product from the drop-down list. This list displays the following values: • Ignore - Select this option to ignore all other holiday parameters for the business product. By default, this option is selected. • Branch - Holiday calendar will be based on the branch holiday maintenance of the respective branch. • Currency - Holiday calendar will be based on the currency maintenance done at bank level for the respective currency. • Both Branch and Currency - Holiday calendar is based on both branch and currency holiday maintenance. The holiday calendar is used to arrive at the maturity date. The holiday calendar defined at the business product is applicable to all deposits opened under the business product. User cannot modify the Holiday Calendar if there are active accounts under the business product. The default value is Ignore.
Holiday Movement	Select the working day to which the holiday should be moved from the adjoining drop-down list. This list displays the following values: No Change - If you select this option, then there is no change in the maturity date. By default, this option is selected. Previous Working Day - In case the computed maturity date is a holiday, then system moves the maturity date to the previous working day for the corresponding Holiday Calendar chosen. Next Working Day - In case the computed maturity date is a holiday, then system moves the maturity date to the next working day for the corresponding Holiday Calendar chosen. Holiday movement is adjusting the next maturity date when the maturity date falls on a holiday, based on the Holiday Calendar chosen. Holiday Movement is not applicable if you select Ignore option for Holiday Calendar. Note User cannot modify the Holiday Movement if there are active account under the business product. The default value is No Change.

Table 1-7 (Cont.) Maturity Holiday Treatment - Field Description

Field	Description
Maturity Date Movement	Select the maturity date movement across months from the drop-down list: • Allowed - The maturity date is moved across months. If the computed maturity date falls on a Holiday, then the maturity date can be moved to the next or previous working day, based on the holiday movement option, even if it falls in a different month. By default, this option is selected. • Previous/Next Working Day of the Same Month - After moving the maturity date, if the adjusted maturity date falls in the previous/next month, then the system moves the maturity date forward or backward to the next/previous working day of the same month. • No Change in Maturity Date - If the adjusted maturity date falls on next/previous month, then the system ignores the movement and considers the computed maturity date as the maturity date even it falls on a holiday. Maturity date across months is applicable only when the maturity date is adjusted to previous or next working day. The default value is Allowed.
Adhoc Holiday Change	 Select the adhoc holiday change from the drop-down list. The list displays the following values: Change Maturity Date and Generate Advice - System updates the maturity date and the rollover maturity date as per the deposit holiday calendar maintenance, generates an advice to the customer. By default, this option is selected. Generate Advice - System generates an advice on deposits having maturity date falling on a holiday. No Action - If this is selected, the maturity date does not change. In this case the system will not generate advices for the deposit. The adhoc holiday change is the change in branch and currency holiday calendar after opening the deposit due to adhoc change in holiday or branch transfer of the deposit. System ignores the value of Adhoc Holiday Change if you select the Ignore option for Holiday Calendar. The default value is Change Maturity Date and Generate Advice.
Applicable Deposit Tenor	Select the deposit tenor, applicable to the deposit for interest rate pick-up, from the drop-down list. This list displays the following values: Original Tenor - If you select this option, then the system considers the tenor which is defaulted from the business product or modified at the account level. By default, this option is selected. Deposit Tenor - If you select this option, then the system considers the tenor based on the adjusted maturity date. The default value is Original Tenor.

Click the Add button. The Add Interest screen displays.

For more information on fields, refer to the field description table below.

Table 1-8 Interest - Field Description

Field	Description
Product Code	Specify the interest product code that should be linked to the account. The adjoining option list displays all valid Interest and Charge (IC) products available in the system. User can select the appropriate one.
Currency	Select the Currency from the drop-down list defined for the interest product.
Rate Change on Interest Liquidation	Switch this toggle ON , then on every interest liquidation new rates are picked up for the interest calculation. However, you cannot toggle this switch once authorized.
Rate Change on Rollover	Switch this toggle ON to re pick up the rate activity on the rollover of deposit. The rate is picked up for fixed and rate chart allowed deposits.
Continue Spread on Rollover	This is defaulted based on the Interest and Charges product. Switch this toggle ON to enable continued variance on rollover. The system will default account variance as current value to the rollover deposit for the next cycle. If you toggle OFF this, then the account variance will not be carried forward to the next rollover cycle.
Open	Switch this toggle ON to make the product applicable. More than one IC product may be applicable for a business product at the same time. The default value is ON .
Action	Click Edit icon to edit the values in a row, or click Delete icon to delete the rows.

 After specify the details in the Add Interest screen. Click Add or Add Another button to include the interest parameters in the Interest screen.

18. After specifying the fields in the Interest screen, click Next.

The MIS screen displays.

19. Specify the fields on MIS screen.

For more information on fields, refer to the field description table below.

Table 1-9 MIS - Field Description

Field	Description
MIS Group	Select the MIS group applicable for the deposit business product from the selection list. The list is populated based on the MIS configuration maintained in common core.
Description	The system displays the description. This is auto populated.
SECTOR	Specify the sector to be associated.
SECTOR Description	The description of the sector is displayed.

20. After specifying all the details, click **Save and Close** to complete the steps or click **Cancel** to exit without saving.

1.1.2 View Business Product

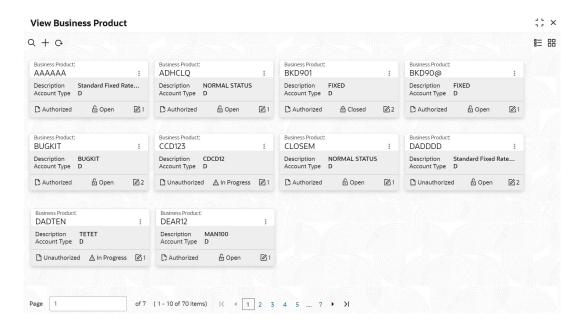

This topic explains the systematic instructions to view the list of configured business product parameters.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- Under Configurations, click Retail Deposits Business Product. Under Retail Deposits Business Product, click View Business Product.

The View Business Product screen displays.

Figure 1-10 View Business Product

For more information on fields, refer to the field description table below.

Table 1-10 View Business Product - Field Description

Field	Description
Business Product	Displays the business product.
Description	Displays the description of the business product.
Account Type	Displays the type of deposit account.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.2 Deposit Pay-in Maintenance

The deposit pay-ins to be done by GL, user needs to maintain the GL details through the Deposit Pay-in Maintenance screen.

To link appropriate GLs in case the pay in option chosen is pay in by GL, user need to maintain the **Branch Code**, **Pay-In Option**, and **General Ledger Code**.

This topic contains the following sub-topics:

Create Payin Maintenance

This topic describes the systematic instructions to create pay-in maintenance.

View Payin Maintenance

This topic explains the systematic instructions to view the list of payin maintenance parameters.

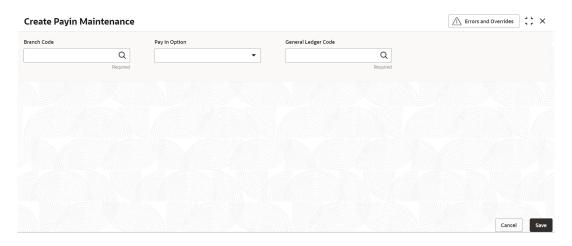

1.2.1 Create Payin Maintenance

This topic describes the systematic instructions to create pay-in maintenance.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click Deposit Payin Maintenance, under Deposit Payin Maintenance, click Create Payin Maintenance.

The Create Payin Maintenance screen displays.

Figure 1-11 Create Payin Maintenance

The fields marked as **Required** are mandatory.

3. Specify the fields on Create Payin Maintenance screen.

For more information on fields, refer to the field description table below.

Table 1-11 Create Payin Maintenance - Field Description

Field	Description
Branch Code	Specify the branch code for which user want to maintain payin parameters. Click Search icon, it displays all valid branch codes maintained in the system. User can select the appropriate one.

Table 1-11 (Cont.) Create Payin Maintenance - Field Description

Field	Description
Pay In Option	Select the pay in option from the drop-down list. The available Options are: Pay in by GL - While creating a deposit, if the pay-in option is specified as GL, then the GL maintained at the maintenance screen should be selected. If the offset account for pay in is not specified then GL account maintained in the pay-in maintenance screen is defaulted, thus creating a Deposit. Pay in by Cash - While creating a deposit, if the pay in option is specified as Cash and the offset account for pay in is not specified, then the system debits the GL account specified in maintenance screen, thus creating a Deposit.
General Ledger Code	Specify the GL code that should be picked up by the system for the Deposit pay in. Click Search icon, it displays all valid GLs maintained in the system. User can select the appropriate one.

 After specifying all the details, click Save to complete the steps. Or click Cancel to exit without saving.

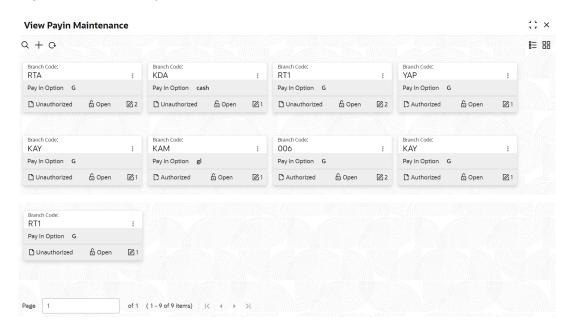

1.2.2 View Payin Maintenance

This topic explains the systematic instructions to view the list of payin maintenance parameters.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- Under Configurations, click Deposit Payin Maintenance. Under Deposit Payin Maintenance, click View Payin Maintenance.

The View Payin Maintenance screen displays.

Figure 1-12 View Payin Maintenance

For more information on fields, refer to the field description table below.

Table 1-12 View Payin Maintenance - Field Description

Branch Code	Displays the branch code.
Pay In Option	Displays the pay in option.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.3 External Parameter Configuration

The External Parameter Configuration screen enables financial institutions to manage and maintain bank-specific settings required for processing external transactions.

This interface allows administrators and operational users to define critical parameters—such as payment modes, external check payouts, and record-matching rules—that govern how external integrations and payments are handled for each participating bank.

By using this configuration, organizations ensure compliance with external bank standards, streamline transaction processing, and reduce operational risk by centralizing control and visibility over key attributes. The intuitive layout supports easy modification, clear oversight of current settings, and precise configuration tailored to each bank's requirements. Settings managed here directly influence automated transaction handling, payouts, and the consolidation of matching data from different sources, helping banks maintain consistency, efficiency, and regulatory adherence across all deposit and payment activities.

This topic contains the following sub-topics:

- <u>Create External Parameter Configuration</u>
 This topic describes the systematic instructions to create external parameter configuration screen.
- <u>View External Parameter Configuration</u>
 This topic explains the systematic instructions to view external parameter configuration.

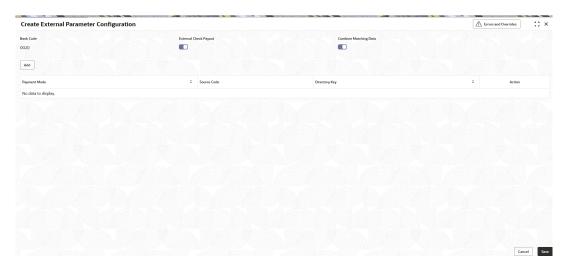

1.3.1 Create External Parameter Configuration

This topic describes the systematic instructions to create external parameter configuration screen.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click External Parameter Configuration, under External Parameter Configuration, click Create External Parameter Configuration.

The Create External Parameter Configuration screen displays.

Figure 1-13 Create External Parameter Configuration

Specify the fields on Create External Parameter Configuration screen.

Table 1-13 Create External Parameter Configuration - Field Description

Field	Description
Branch Code	Specifies the bank code for which the parameters are maintained. This will generally be defaulted to the only value that is available as part of the bank maintenance in common core (system allows only one bank code to be maintained for a bank/ Financial Institution (FI) in common core and that value will be defaulted here).
External Check Payout	For pay-out by check, this flag denotes if a third-party check processing system is responsible for generation and production of physical check OR if OBPM system is responsible for generation of the Demand Draft (DD)/ Banker's Check (BC). The default value for this flag is Off . If this flag is On then OBA will supplement the necessary data needed to the third-party check processing system for generating the pay-out check. If this flag is Off then OBA will call the OBPM service with the necessary data so that OBPM can generate the pay-out check (DD/ BC) as required by the Financial Institution (FI).
Combine Matching Data	This flag is applicable for selection only when External Check Payout flag is enabled. If this flag is On then OBA will combine any matching records basis Party, beneficiary and check dispatch address and provide the data as a single entry. If the flag is Off then OBA will not combine any matching data and will supplement the data as is as required by the third-party check processing system.
Payment Mode	This field is part of a multi-grid and denotes the types of payment/ settlement modes applicable for a deposit, which could be Account, GL, Check, Wire etc.

Table 1-13 (Cont.) Create External Parameter Configuration - Field Description

Field	Description
Source Code	This field is part of a multi-grid and denotes the source for each payment/ settlement mode selected.
Directory Key	This field is part of a multi-grid and denotes the Directory Key applicable for the payment/ settlement mode. This will be from the list of Network Directory Keys maintained in the CMC maintenance Local Bank Directory . The routing number will be determined basis this value for the payment/ settlement mode.
Action	Displays the actions available for the entered line.

After specifying all the details, click Save to complete the steps. Or click Cancel to exit without saving.

1.3.2 View External Parameter Configuration

This topic explains the systematic instructions to view external parameter configuration.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click External Parameter Configuration. Under External Parameter Configuration, click View External Parameter Configuration.

The View External Parameter Configuration screen displays.

Figure 1-14 View External Parameter Configuration

Table 1-14 View External Parameter Configuration - Field Description

Field	Description
Branch Code	Displays the branch code.

Table 1-14 (Cont.) View External Parameter Configuration - Field Description

Field	Description
External Check Payout	Displays whether payouts via external checks are enabled for the selected bank.
Combine Matching Data	Displays whether to combine data from multiple matching records during processing .
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.4 Penalty Parameters Configuration

To configure the penalty days basis the deposit tenure.

This configuration enables you to determine the penalty days to be considered for penalty calculation (for early redemption) basis the deposit tenor. The configuration will consider the tenor range when determining the penalty days for early redemption of the CD.

For the below configuration,

Table 1-15 Penalty

Deposit Term (in Days)	Penalty Period (in Days)
30	10
50	30
150	70
275	100
365	100

In this case, we will convert the original CD term into days and select the appropriate penalty days for a CD tenor range.

For example, If CD tenor post conversion is 75 days, the penalty period is 30 days. (i.e) for a deposit tenor between 50 to 149 days penalty period is 30, similarly if deposit tenor is between 150 to 274 days the penalty period considered for penalty calculation is 100 days.

This topic contains the following sub-topics:

- <u>Create Penalty Parameters Configuration</u>
 This topic describes the systematic instructions to create penalty parameters configuration.
- View Penalty Parameters Configuration
 This topic explains the systematic instructions to view the list of penalty parameters configuration.

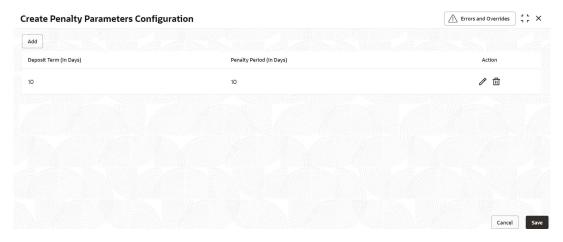

1.4.1 Create Penalty Parameters Configuration

This topic describes the systematic instructions to create penalty parameters configuration.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click Penalty Parameters Configuration, under Penalty Parameters Configuration, click Create Penalty Parameters Configuration.

The Create Penalty Parameters Configuration screen displays.

Figure 1-15 Create Penalty Parameters Configuration

3. Specify the fields on **Create Penalty Parameters Configuration** screen.

Click the Add button in the Add Penalty Days to Deposit Parameters. The Add Penalty Parameters screen displays.

Figure 1-16 Add Penalty Parameters

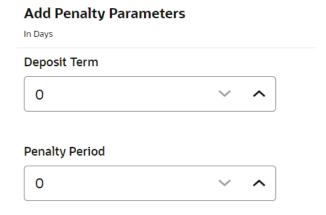

Table 1-16 Create Penalty Parameters Configuration - Field Description

Field	Description
Deposit Term	Specify the tenor of the deposit in days.
Penalty Period	Specify the penalty period to be considered for penalty calculation in days. For each specified deposit term, a penalty period can be configured and when there is a premature redemption of the deposit, the penalty is calculated basis the term of the deposit and the corresponding penalty days maintained for the deposit term in this maintenance.

Example for penalty calculation based on the maintained parameters:

Deposit Amount - \$10,000

The deposit rate for a 3 year CD is 3%

Scenario: Customer has opened a 3 year CD of \$10,000 on 01-Jan-2023. Maturity date for the same will be is 31-Dec-2026.

Customer wishes to pre-close the CD after 6 months from the date of deposit that is 01-July-2023.

Then the interest is calculated at the rate original rate of 3% for 6 months as per US requirements.

Considering the below penalty configuration in the bank level:

Table 1-17 Penalty Configuration

Deposit Term	Penalty Period
30 days	30 days
90 days	60 days
6 months	90 days
1 year	180 days
3 year	180 days
5 year	360 days

Penalty is calculated at the original CD rate of 3% for a period of 180 days (6 months) since the CD tenor is 3 years in the example above.

So, considering simple interest - Interest = (10000*(0.03/12)*6) = \$150

AND Penalty = (10000*(0.03/12))*6 = \$150

Therefore, in this case the final payout will be = Principal + Interest – Penalty = 10000 +150 - 150 = \$10000.

(i) Note

The example does not take tax into consideration. For simplicity purposes, simple interest formula is used for calculating interest and penalty.

- Click the Add or Add Another button to include the penalty parameters in the Create Penalty Parameters Configuration screen.
- After specifying all the details, click Save to complete the steps. Or, click Cancel to exit without saving.

1.4.2 View Penalty Parameters Configuration

This topic explains the systematic instructions to view the list of penalty parameters configuration.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations or .
- Under Configurations, click Penalty Parameters Configuration. Under Penalty Parameters Configuration, click View Penalty Parameters Configuration.

The View Penalty Parameters Configuration screen displays.

Table 1-18 View Payin Maintenance - Field Description

Field	Description
Branch Code	Displays the branch code.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.5 State Group Parameters Configuration

This allow users to define state group parameters for the escheatment parameters across the currencies.

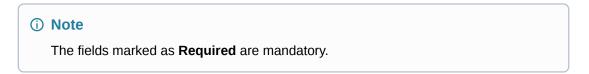

This topic contains the following sub-topics:

- <u>Create State Group Parameters Configuration</u>
 This topic describes the systematic instructions to create state group parameters configuration.
- View State Group Parameters Configuration
 This topic explains the systematic instructions to view the list of state group parameters configuration.

1.5.1 Create State Group Parameters Configuration

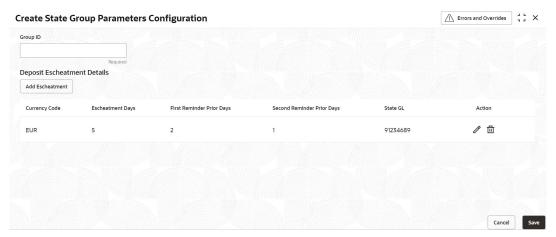

This topic describes the systematic instructions to create state group parameters configuration.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click State Group Parameters Configuration, under State Group Parameters Configuration, click Create State Group Parameters Configuration.

The Create State Group Parameters Configuration screen displays.

Figure 1-18 Create State Group Parameters Configuration

Specify the fields on Create State Group Parameters Configuration screen.
 Click the Add Escheatment button. The Add Escheatment Parameters screen displays.

Figure 1-19 Add Escheatment Parameters

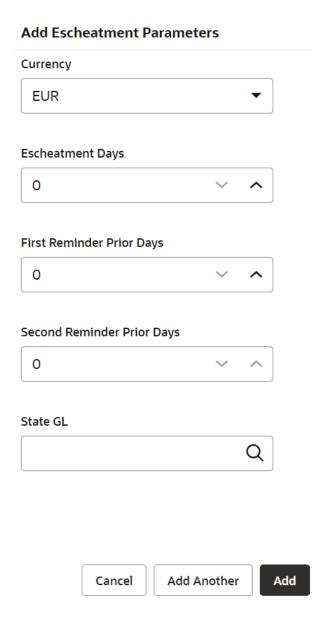

Table 1-19 Create State Group Parameters Configuration - Field Description

Field	Description
Group ID	Specify the state group ID. This should be an unique alphanumeric code.
Currency	Select the currency from the drop-down list for which the grouping has to be done.
Escheatment Days	Specify the escheatment days for the state group ID and currency. The escheatment date is calulated for the deposit basis this configured escheatment days.

Table 1-19 (Cont.) Create State Group Parameters Configuration - Field Description

Field	Description
First Reminder Prior Days	Specify the first reminder notice prior days based on which the first notification prior to escheatment marking will be sent to the customer. For Example: If first reminder prior days is 10 then the first notice will be sent 10 days before the deposit is marked as escheated.
Second Reminder Prior Days	Specify the second reminder notice prior days based on which the second notification prior to escheatment marking will be sent to the customer. The second reminder prior days needs to be less than the first reminder prior days.
	For Example: If first reminder prior days is 10 then the first notice will be sent 10 days before the deposit is marked as escheated and if second reminder prior days is 5 in this case, then the second reminder prior notice will be sent 5 days before the deposit is due to be marked as escheated.
State GL	Specify the State GL to which the escheated funds has to be transferred, when the deposit is marked for escheatment processing and eventually closed after transferring the funds on the escheatment date.

- Click the Add or Add Another button to include the escheatment parameters in the Create State Group Parameters Configuration screen.
- **4.** After specifying all the details, click **Save** to complete the steps. Or, click **Cancel** to exit without saving.

1.5.2 View State Group Parameters Configuration

This topic explains the systematic instructions to view the list of state group parameters configuration.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations or .
- 2. Under Configurations, click State Group Parameters Configuration. Under State Group Parameters Configuration, click View State Group Parameters Configuration.

The View State Group Parameters Configuration screen displays.

Field	Description
Group ID	Displays the group ID.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.6 State Group Mapping Configuration

This allows the user to map the state group ID to state codes and business products so that the escheatment parameters can be mapped as per the state.

This topic contains the following sub-topics:

<u>Create State Group Mapping Configuration</u>
 This topic describes the systematic instructions to create state group mapping configuration.

View State Group Mapping Configuration
 This topic explains the systematic instructions to view the list of state group mapping configuration.

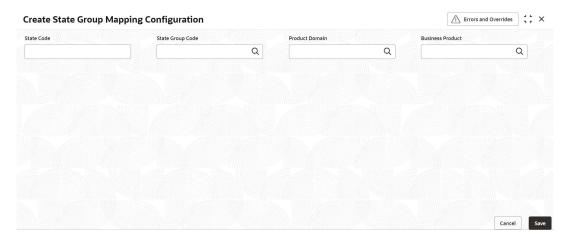

1.6.1 Create State Group Mapping Configuration

This topic describes the systematic instructions to create state group mapping configuration.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- 2. Under Configurations, click State Group Mapping Configuration, under State Group Mapping Configuration, click Create State Group Mapping Configuration.

The Create State Group Mapping Configuration screen displays.

Figure 1-21 Create State Group Mapping Configuration

3. Specify the fields on **Create State Group Mapping Configuration** screen.

For more information on fields, refer to the field description table below.

Table 1-21 Create State Group Mapping Configuration - Field Description

Field	Description
State Code	Specify the state code or click the Search icon to view and select the state group code from the list displayed.
State Group Code	Specify the state group code or click Search icon to view and select the state group code from the list displayed. The Group IDs maintained as part of state group parameters configuration are displayed for selection in the list.
Product Domain	Specify the product domain or click the Search icon to view and select the product domain from the list displayed.
Business Product	Specify the business product or click the Search icon to view and select the business product from the list displayed.

4. After specifying all the details, click **Save** to complete the steps. Or, click **Cancel** to exit without saving.

1.6.2 View State Group Mapping Configuration

This topic explains the systematic instructions to view the list of state group mapping configuration.

- 1. On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations or .
- 2. Under Configurations, click State Group Mapping Configuration. Under State Group Mapping Configuration, click View State Group Mapping Configuration.

The View State Group Mapping Configuration screen displays.

Figure 1-22 View State Group Mapping Configuration

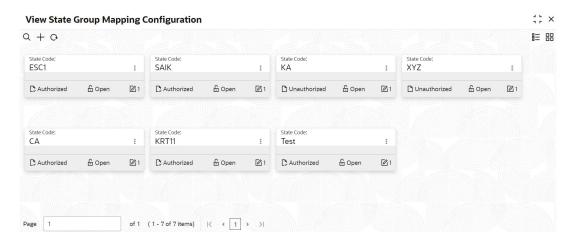

Table 1-22 View State Group Mapping Configuration - Field Description

Field	Description
State Code	Displays the state code.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.7 IRA Parameters Configuration

This is a common screen where an user can capture parameters that are common across, IRA savings as well as IRA Certificate of Deposits.

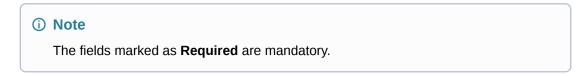

This screen captures information that are common or applicable across all IRA plan types, such as federal, and state penalty tax rates to be applied in case of an early distribution from an IRA account, previous financial year contribution period, age cutoff for penalty application.

This topic contains the following sub-topics:

- <u>Create IRA Parameters</u>
 This topic explains the systematic instructions to create IRA parameters.
- <u>View IRA Parameters</u>
 This topic explains the systematic instructions to view the list of configured IRA parameters.

1.7.1 Create IRA Parameters

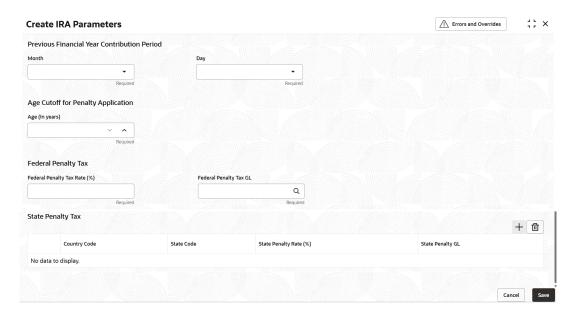

This topic explains the systematic instructions to create IRA parameters.

- 1. On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click IRA Parameters Configuration.
- Under IRA Parameters Configuration, click Create IRA Parameters.

The Create IRA Parameters screen displays.

Figure 1-23 Create IRA Parameters

3. Specify the fields on Create IRA Parameters screen.

For more information on fields, refer to the field description table below.

Table 1-23 Create IRA Parameters - Field Description

Field	Description
Month and Day	This is the date by which tax returns need to be filed for the previous year. Contributions for prior year are possible to be done only till this date of this current year. For example, if this value is set to April 15th, then it implies that the customer can do a contribution that can be considered for the previous financial year until the April 15th of the current financial year.
	Note: The customer has an option to choose if the contribution being done to the IRA plan is for the current/ previous financial year and accordingly the same can be defined and the right contribution code will be attached during the processing of the contribution transaction.
Age Cutoff for Penalty Application	This is the customer age before which if any distribution is done in an IRA account it would be deemed as a premature distribution and federal and state penalty tax will apply. Note: It is to be noted that distributions will stop being deemed premature in the year after the year in which the customer reaches the cutoff age for penalty application.
Federal Penalty Tax Rate (%)	This field captures the Federal penalty tax rate to be applied as penalty tax on in case of a premature distribution.
Federal Penalty Tax GL	This field captures the GL account to which the federal penalty tax amount is to be accounted.
Country Code	Specify the applicable country code from the list of values.
State Code	Specify the applicable state code from the list of values.
State Penalty Rate (%)	This field defines the state penalty percentage to apply on early distribution from an IRA account over and above the federal penalty rate if any, if the customer withdraws from the IRA before customer reaches the configured age threshold for penalty. The system considers the Customer's residential address state code to determine the corresponding state penalty rate to apply on early distribution.
State Penalty GL	Select from the list of GL account numbers, the GL account to which the state penalty amount needs to be accounted.

4. After specifying all the details, click **Save** to complete the steps. Or, click **Cancel** to exit without saving.

1.7.2 View IRA Parameters

This topic explains the systematic instructions to view the list of configured IRA parameters.

- 1. On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click IRA Parameters Configuration.
- 2. Under IRA Parameters Configuration, click View IRA Product.

The View IRA Parameters screen displays.

Figure 1-24 View IRA Parameters

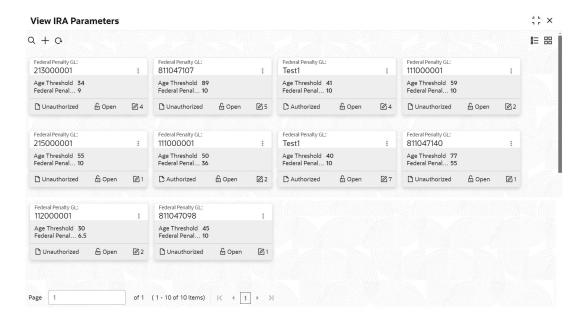

Table 1-24 View IRA Parameters - Field Description

Field	Description
Federal Penalty GL	Displays the federal penalty GL.
Age Threshold	Displays the age threshold.
Federal Penalty Rate	Displays the federal penalty tax rate.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.8 IRA Plans Configuration

This is a common screen where an user can choose plans that are common for IRA savings as well as IRA Certificate of Deposits.

This is a common screen where an user can define plan level attributes that are common for IRA savings as well as IRA Certificate of Deposits.

This screen captures data that are specific to a IRA plan type such as Contribution Limits, Age cut-off and Contribution limits beyond age-cut-off (catch-up contribution limits), List of

applicable contribution and distribution codes that can be associated while doing a contribution OR distribution transaction for the IRA plan, and so on.

Note: The contribution, distribution and exception codes (exception codes for exception from early distribution penalty in exception cases) are static configurations that can be associated to a IRA transaction during a contribution or distribution to an IRA plan.

This topic contains the following sub-topics:

- <u>Create IRA Plans</u>
 This topic explains the systematic instructions to create IRA plans.
- View IRA Plans
 This topic explains the systematic instructions to view the list of configured IRA plans.

1.8.1 Create IRA Plans

This topic explains the systematic instructions to create IRA plans.

(i) Note

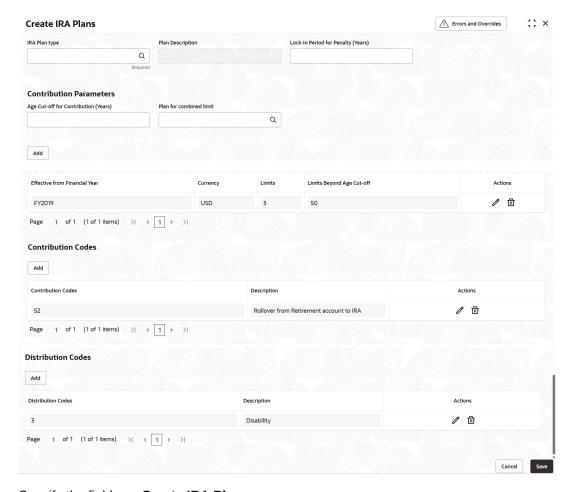

The fields marked as **Required** are mandatory.

- 1. On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click IRA Plans Configuration.
- 2. Under IRA Plans Configuration, click Create IRA Plans.

The **Create IRA Plans** screen is displayed.

Figure 1-25 Create IRA Plans

3. Specify the fields on **Create IRA Plans** screen.

Table 1-25 Create IRA Plans - Field Description

Field	Description
IRA Plan type	Click the Search icon to select the value from the list. The values are as follow: • TRA – Traditional IRA • ROT – Roth IRA
Plan Description	Based on the selection of the IRA Plan Type , the plan description is displayed.
Lock-in Period for Penalty (Years)	This field captures the number of years before which, if a distribution is made on a ROTH IRA, the penalty will apply for distribution (withdrawals). This field is applicable only if the selected IRA type is ROT (Roth IRA).

Table 1-25 (Cont.) Create IRA Plans - Field Description

Field	Description
Age Cut-off for Contribution (Years)	This field specifies whether the age of the customer is to be taken into consideration while doing contribution transactions. The User can proceed to set up the contribution limits for the plan basis the customer age. For Example: If the value of this field is 50 years then separate contribution limits can be set for customers who are less than or equal to 50 years and greater than 50 years. The User can leave it blank if the contribution limit for a plan does not differ by age.
Plan for combined limit	The user can select the plan from the list of values, for which the contribution limits below will be cumulatively applicable. In this case during IRA transaction, the system will check if there is a plan mapped in this field for combined limit check and if yes, the system will validate the cumulative contributions against the contribution limit defined for both the plans.
	For Example:
	It is to be noted that, currently the regulation requires combined limit validation across Traditional and Roth IRA plans for a customer. Therefore, in this case the user can select the plan for combined limit as "ROT" when setting up the contribution limits data for IRA plan "TRA" -Traditional. In which case, the system will consider the contribution limits set cumulatively for all IRA accounts under both Traditional and Roth plans of the customer.
	Note : If combined limit check is applicable, that is, the plan details for combined limit is provided, then the system will validate that the contribution limits cannot be provided for the plan attached in the field Plan for combined limit when the plan-wise parameter maintenance is done for the same plan.

4. Click Add button in the Contribution Parameters section.

The **Add Contribution Parameters** screen is displayed.

Figure 1-26 Add Contribution Parameters

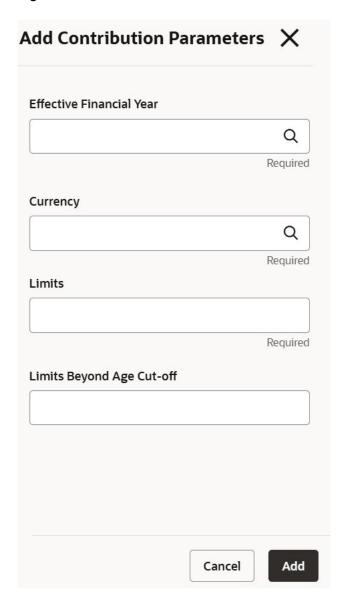

Table 1-26 Create IRA Plans_Add Contribution Parameters - Field Description

Field	Description
Effective Financial Year	The user can set Financial Year wise contribution limits in this screen. The user will select the value of the Financial Year (from the financial year list maintained as part of Interest and charges period code definition) to set the contribution limits for the mentioned financial year. If there are no contribution limits set for the current Financial Year, then the system will consider the latest set Financial Year limits as contribution limits for the IRA plan.
Currency	This field denotes the currency for defining the contribution limit amounts for the plan. This can always be USD for IRA plans.

Table 1-26 (Cont.) Create IRA Plans_Add Contribution Parameters - Field Description

Field	Description
Limits	 This amount field defines the contribution limit for the plan. If the field Age Cutoff for contribution is provided for the plan, then this value denotes the contribution limits for customers whose age is less than or equal to the configured Age Cut-off. If the field Age Cutoff for contribution is not provided for the plan, then this value denotes the generic contribution limits for all customer ages.
Limits Beyond Age Cut-off	This amount field defines the contribution limit for the plan for customers whose age is greater than the configured Age Cut-off. This field is required only if an age value is provided for the Age Cutoff for contribution field. If no age value is given, this field does not need to be captured.

- Click Add button to add the contribution parameters detail in the main screen, or Click Cancel button to close the Add Contribution Parameters screen.
- 6. Click Add button in the Contribution Codes section.

The Add Contribution Code screen is displayed.

Figure 1-27 Add Contribution Code

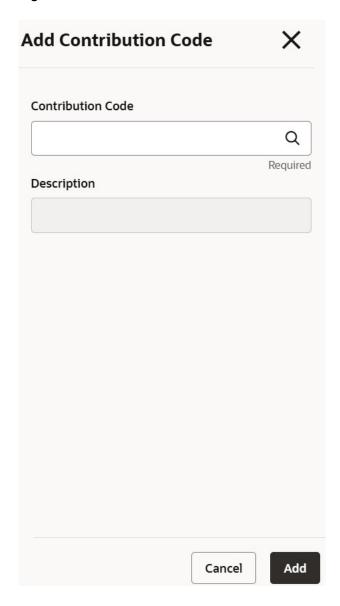

Table 1-27 Create IRA Plans_Add Contribution Parameters - Field Description

Field	Description
Contribution Code	Click the Search icon to select the Contribution Code from the list of values available as part of static maintenance. Refer the <i>Contribution Code Maintenance</i> table for the codes list.
Description	Based on the selection of Contribution Code , the description is displayed.
Actions	It allows the user to edit or delete the record.

Table 1-28 Contribution Code Maintenance

Code	IRS Description
50	Prior Year contribution
51	Current Year contribution
52	Rollover from Retirement account to IRA
53	Employer contribution prior year
54	Employer contribution current year
55	Direct Rollover
56	Late Rollover
57	Recharacterized rollover deposit
58	Trustee to Trustee Transfer
59	Roth Conversion

- 7. Click **Add** button to add the contribution code detail in the main screen, or Click **Cancel** button to close the **Add Contribution Code** screen.
- 8. Click Add button in the Distribution Codes section.

The Add Distribution Code screen is displayed.

Figure 1-28 Add Distribution Code

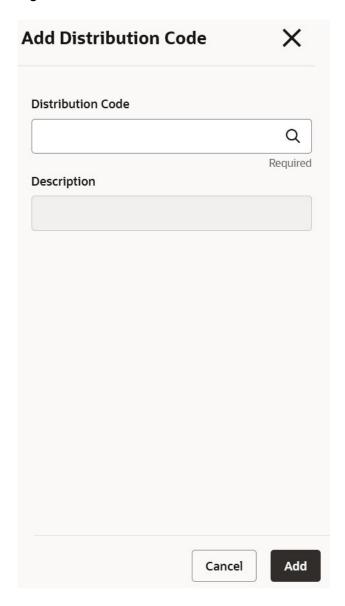

Table 1-29 Create IRA Plans_Add Distribution Parameters - Field Description

Field	Description
Distribution Code	Click the Search icon to select the Distribution Code from the list of values available as part of static maintenance. Refer the <i>Distribution Code Maintenance</i> table for the codes list.
Description	Based on the selection of Distribution Code , the description is displayed.
Actions	It allows the user to edit or delete the record.

Table 1-30 Distribution Code Maintenance

Code	IRS Description
1	Early distribution, no known exception (in most cases, under age 59½).
2	Early distribution, exception applies (under age 59½).
3	Disability
4	Death
5	Prohibited Transaction (this generally means the account is no longer an IRA).
6	Section 1035 exchange (a tax-free exchange of life insurance, annuity, qualified long-term care insurance, or endowment contracts).
7	Normal distribution
8	Excess contributions plus earnings/excess deferrals (and/or earnings) taxable in current year.
9	Cost of current life insurance protection.
Α	May be eligible for 10-year tax option.
В	Designated Roth account distribution.
С	Reportable death benefits under section 6050Y.
D	Annuity payments from nonqualified annuities and distributions from life insurance contracts that may be subject to tax under section 1411.
Е	Distributions under Employee Plans Compliance Resolution System (EPCRS).
F	Charitable gift annuity.
G	Direct rollover and direct payment (distribution to a qualified plan, a section 403(b) plan, a governmental section 457(b) plan, or an IRA).
Н	Direct rollover of a designated Roth account distribution to a Roth IRA.
J	Early distribution from a Roth IRA, no known exception (in most cases, under age 59½).
К	Distribution of traditional IRA assets not having a readily available FMV (fair market value).
L	Loans treated as deemed distributions under section 72(p).
М	Qualified plan loan offset.
N	Recharacterized IRA contribution made for current year.
Р	Excess contributions plus earnings/excess deferrals taxable in previous year.
Q	Qualified distribution from a Roth IRA.
R	Recharacterized IRA contribution made for previous year and recharacterized in current year.
S	Early distribution from a SIMPLE IRA in first 2 years, no known exception (under age 59½).
Т	Roth IRA distribution, exception applies.
U	Dividend distribution from ESOP under section 404(k). (this distribution isn't eligible for rollover).
W	Charges or payment for purchasing qualified long-term care insurance contracts under combined arrangements.

(i) Note

Joint holders can never be associated to an IRA account. Therefore, system to validate and do not allow joint accounts to be opened for IRA plans. While joint accounts are not allowed, it is important to note that custodian and guardians can still be attached to an IRA account.

Click Add button to add the distribution code detail in the main screen, or Click Cancel button to close the Add Distribution Code screen.

(i) Note

For distribution transaction where exception is applicable, the list of below exception codes and descriptions will be applicable. This is a common list of codes for all IRA plan types.

Table 1-31 Exception Codes for Distribution Transaction

Code	Exception
1	First Time Home Buyer
2	Closing of account within 7 days of opening
3	Terminally ill patient
4	SCRA on active duty
5	Divorce
6	Disaster recovery distribution upto \$22,000 to qualified individuals
7	Emergency Personal Expense
8	Medical Expenses

10. After specifying all the details, click Save to complete the steps. Or, click Cancel to exit without saving.

1.8.2 View IRA Plans

This topic explains the systematic instructions to view the list of configured IRA plans.

- On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click IRA Plans Configuration.
- 2. Under IRA Plans Configuration, click View IRA Plans.

The View IRA Plans screen is displayed.

Figure 1-29 View IRA Plans

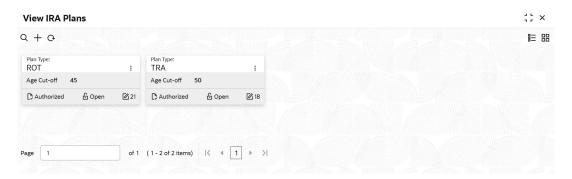

Table 1-32 View IRA Plans - Field Description

Field	Description
Plan Type	Displays the type of IRA plan.
Age Cut-off	Displays the cut-off age for IRA plan.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.9 IRA Customer Plan Configuration

This is a common screen where an user can choose plans that are common for IRA savings as well as IRA Certificate of Deposits.

This is a common screen where an user can define plan level attributes that are common for IRA savings as well as IRA Certificate of Deposits.

This screen captures data that are specific to a IRA plan type such as Contribution Limits, Age cut-off and Contribution limits beyond age-cut-off (catch-up contribution limits), List of applicable contribution and distribution codes that can be associated while doing a contribution OR distribution transaction for the IRA plan, and so on.

Note: The contribution, distribution and exception codes (exception codes for exception from early distribution penalty in exception cases) are static configurations that can be associated to a IRA transaction during a contribution or distribution to an IRA plan.

This topic contains the following sub-topics:

<u>Create IRA Customer Plan Configuration</u>
 This topic explains the systematic instructions to create IRA Customer plans.

View IRA Customer Plan Configuration
 This topic explains the systematic instructions to view the list of configured IRA Customer plans.

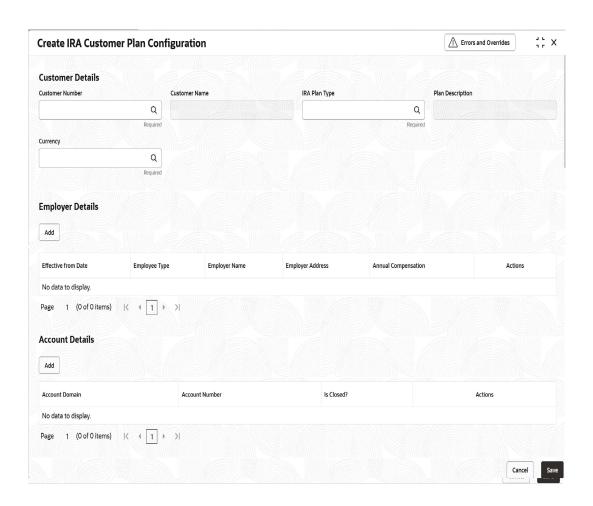

1.9.1 Create IRA Customer Plan Configuration

This topic explains the systematic instructions to create IRA Customer plans.

- On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click IRA Customer Plans Configuration.
- Under IRA Customer Plans Configuration, click Create IRA Customer Plans.
 The Create IRA Customer Plans screen is displayed.

Figure 1-30 Create IRA Customer Plans

3. Specify the fields on **Create IRA Customer Plans** screen.

For more information on fields, refer to the field description table below.

Table 1-33 Create IRA Customer Plans - Field Description

Field	Description
Customer Number	The customer ID of the customer who holds the plan
Customer Name	Name of the customer who holds the plan. This is automatically populated based on the selected Customer ID
IRA Plan Type	This is the plan of the customer, in which the transaction is being carried out. This can take values TRA for Traditional or ROT for Roth or SEP for SEP as available in the static maintenance provided.
Plan Description	The description of the IRA plan type selected. This is automatically populated based on the selected Plan Type.
Employer Details	Maintains the employment history for the customer with the required details as expected by the plan. This is a multi-grid field.
Effective from Date	Denotes the "effective from" date of the employment for the owner/customer.
Employee Type	"Denotes the type of employment the customer held with the employer. This is a LOV/ dropdown and the supported values are: Employee Self-Employed
Employer Name	This is a free text field. The employer name is captured as part of this field
Employer Address	This is a free text field. The employer address is captured as part of this field.
Currency	This LOV allows the user to select the currency under which the "Annual Compensation" of the employee will be defined. In case of IRA – this currency value can be defaulted to "USD" as required.
Annual Compensation	This field will capture the annual compensation of the employee using which the contribution limits will be defined at plan level for SEP IRA
Actions	It allows the user to edit or delete the record
Account Details	This multi-grid will display all the accounts ALREADY associated to the IRA plan selected for the customer. This grid will also allow user to ADD any customer IRA accounts for which there is no plan associated (that is, a plan was not associated/ user missed associating a plan to the account during origination). When the account is added to the grid, then this IRA account of the customer will automatically be assigned to the mentioned plan selected in the maintenance screen.
Account Domain	Denotes the account domain. Retail Accounts for IRA savings accounts and Retail Deposits for IRA CD accounts
Account Number	Denotes the IRA Savings OR IRA CD account number that is associated to the plan for the customer
Is Closed?	Denotes if the said IRA account is closed/ not
Actions	It allows the user to edit or delete the record

4. After specifying all the details, click **Save** to complete the steps. Or, click **Cancel** to exit without saving.

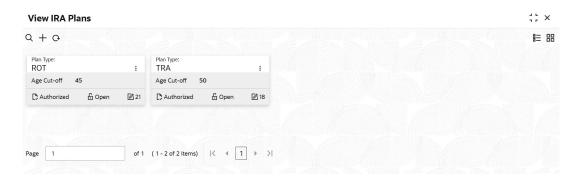

1.9.2 View IRA Customer Plan Configuration

This topic explains the systematic instructions to view the list of configured IRA Customer plans.

- On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click IRA Plans Configuration.
- Under IRA Customer Plans Configuration, click View IRA Customer Plan Configuration.

The View IRA Customer Plan Configuration screen is displayed.

Figure 1-31 View IRA Customer Plan Configuration

For more information on fields, refer to the field description table below.

Table 1-34 View IRA Customer Plan Configuration- Field Description

Field	Description
Customer Number	The customer ID of the customer who holds the plan
Plan Type	This is the plan of the customer, in which the transaction is being carried out. This can take values TRA for Traditional or ROT for Roth or SEP for SEP as available in the static maintenance provided.
Currency	This LOV allows the user to select the currency. This will be USD in general for IRA.

1.10 Retail Deposits IRA Product

Users can classify an IRA accounts of the bank into different groups and assign each group an identifying code.

For example, user may define a group called IRACRT for retirement certificate accounts and assign a plan (Traditional OR Roth) to each of the IRA certificate opened under the product. Each group is referred to an IRA Product and is maintained in the Retail Deposits IRA Product configuration screen.

An IRA Product definition and various features are captured across the following sub-screens covered as subtopics.

- Basic Details
- Features
- Preferences
- Tenor Parameters
- Rate Chart Parameters
- Maturity Instructions
- Maturity Holiday Treatment
- Interest
- MIS

This topic contains the following sub-topics:

Create IRA Product

This topic describes the systematic instructions to create IRA product. The maintenance screen allows the user to configure IRA product parameters.

View IRA Product

This topic explains the systematic instructions to view the list of configured IRA product parameters.

1.10.1 Create IRA Product

This topic describes the systematic instructions to create IRA product. The maintenance screen allows the user to configure IRA product parameters.

The fields marked as **Required** are mandatory.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- Under Configurations, click Retail Deposits IRA Product. Under Retail Deposits IRA Product, click Create IRA Product.

The Create IRA Product screen displays.

Figure 1-32 Create IRA Product - Basic Details

3. Specify the fields on the Basic Details screen.

For more information on fields, refer to the field description table below.

Table 1-35 Basic Details - Field Description

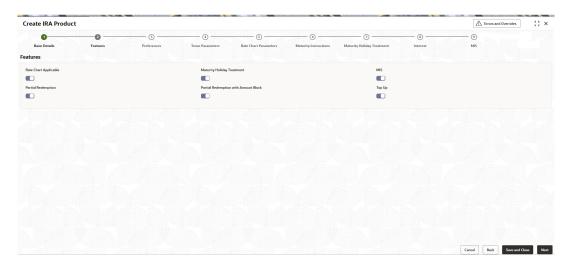

Field	Description
IRA Product	Specify the IRA product code to be maintained. This indicates the class code or template code. This code is referenced during the deposit creation.
Description	Specify the description for the IRA product.
Account Code	As per your bank's requirement, you can choose to classify IRA products into different account codes. The bank can decide the way the IRA products are to be assigned to different account codes. An account code can consist of a maximum of four characters.
	An account code can be part of the customer account mask.
	If the customer account mask consists of an account code, the value in this field is used as part of deposit account number generation.
Validity	Specify the validity period of the IRA product by specifying the start date and the end date. End date is optional.

4. After specifying the fields in the **Basic Details** screen, click **Next**.

The Features screen displays.

Figure 1-33 Create IRA Product - Features

5. Specify the fields on **Features** screen.

For more information on fields, refer to the field description table below.

Table 1-36 Features - Field Description

Field	Description
Rate Chart Applicable	Switch this toggle ON , if balance and tenor based rates are applicable. Only if this button is on the related data segnet will be displayed for capture. If this option is enabled, the Rate Chart Parameters data segment will be displayed in the screen.
Maturity Holiday Treatment	Switch this toggle ON , if maturity holiday treatment is applicable. It determines the treatment applicable for deposit account, if the maturity date falls on a holiday. If this option is enabled, the Maturity Holiday Treatment data segment will be displayed in the screen.
MIS	Switch this toggle ON , to capture the MIS details for the product. If this option is enabled, the MIS data segment will be displayed in the screen.
Partial Redemption	Switch this toggle ON , to indicate that partial redemption is allowed. If this option is not enabled, then partial redemption will not be allowed on deposits under this IRA product. The default value is OFF .
Partial Redemption with Amount Block	Switch this toggle ON , to indicate that partial redemption is allowed for the deposits with amount blocks. If the deposit is linked partially then partial redemption of the deposit will be allowed only if you enable this option. The default value is OFF .
Тор Up	Switch this toggle ON , to indicate that Top-up (adding of additional funds to the IRA CD during the life cycle) is allowed for the deposits. The default value is OFF .

6. After specifying the fields in the **Features** screen, click **Next**.

The **Preferences** screen displays.

Figure 1-34 Create IRA Product - Preferences

7. Specify the fields on **Preferences** in **Deposits** screen.

Click **Add** button in the **Preferences** screen to specify the currency code, minimum opening deposit amount, maximum opening deposit amount, and top up units. For more information on fields, refer to the field description table below.

Table 1-37 Preferences - Field Description

Field	Description
Minimum and Maximum Limits for Deposits	The min and max limits feature in Certificate of Deposit business product allows for the bank to include the limits for deposit opening, top-up and deposit lifecycle balance threshold for deposit processing
Currency Code	Specify the currency code or click Search icon to select the applicable currency from the list for which the minimum and maximum opening deposit amount is to be maintained.

Table 1-37 (Cont.) Preferences - Field Description

Field	Description
Threshold Type	 This field is a dropdown list. This field denotes the event type for which the minimum and maximum limits are being defined. This field will support the below 3 types as static values: Certificate of Deposit Creation: This type to be selected for defining the minimum and maximum limits of the deposit amount that is required for opening a deposit. If there are no values provided for this field, then it is understood that there is no minimum or maximum deposit opening amount limits. Top-up: This type to be selected for defining the minimum and maximum limits of the amount when processing a top-up transaction for the deposit. If there are no values provided for this field, then it is understood that there is no minimum or maximum amount limits for top-up. Top-up units: This field is applicable only when the "Threshold Type" is Top-up. This is an existing field and this denotes the incremental unit in which the top-up can be done. Eg: If this value is 50, then the top-up can be done. Eg: If this value is 50, then the top-up can be done for \$50, \$100, \$150, \$200 and so on. Balance Threshold: This type to be selected for defining the minimum and maximum deposit balance over the lifecycle of the deposit (that is, the balance in the deposit account at any point in the deposit lifecycle cannot breach these limits). Eg: Any lifecycle operation such as a deposit opening, top-up, redemption cannot breach these limits. If there are no values provided for this field, then it is understood that there is no minimum or maximum amount limits to be validated over the lifecycle of the deposit. Note: The values for minimum and maximum amounts provided for the threshold type Certificate of Deposit cannot breach the limits if provided for the Balance Threshold. Similarly, the values for minimum and maximum amounts provided for the threshold type Top-up cannot breach the limits if provided for the Balance Threshold.
Minimum Amount	Specify the minimum opening deposit amount for the deposit product. If the deposit funding amount is less than minimum opening deposit amount, then the system will reject the deposit creation.
Maximum Amount	Specify the maximum opening deposit amount for the deposit product. If the deposit funding amount is greater than the maximum opening deposit amount, then system will reject the deposit creation.
Units	Specify the top-up units for the deposit product. The top- ups done on the deposit product should be basis the units if configured. Eg: If top-up unit is USD 500, then top-up can be done for UDS 500, USD 1000, USD 1500 etc.
Action	Click the Edit icon to edit the values specified, or click Delete icon to delete the added row.

Table 1-37 (Cont.) Preferences - Field Description

	I
Field	Description
Deposit Statement	Switch this toggle ON , to specify the cycle, and statement format to get the deposit statement for the transactions.
Credit GL	Specify the GL to which an account balance should belong. Click Search icon and select the credit GL from the list of values.
Funding Options	Specify the option(s) through which the Certificate of deposit can be funded. When the deposit is opened, a validation ensures that the deposit is funded only through the selected option(s). The available options are External Account, Check, General Ledger, and Account.
Deposit Creation without Funding	System will support the capability to allow opening a zero balance deposit by the bank, which can be funded later. It is to be noted that this funding should happen within the configured number of days at the deposit business product, if not, then the zero balance deposit will be closed automatically.
Zero Balance Deposit	Switch this toggle ON to enable the system allows for a zero balance deposit account to be created under the business product. In such cases the deposit account origination system will not be passing the payin details during Certificate of deposit opening as this deposit will be funded later. The default value is OFF .
Hold Period for Zero Balance Deposit (in days)	Select the days to configure the Zero Balance Deposit. Once a zero balance deposit is created, it is expected that the Certificate of deposit will be funded within the days configured as part of this field. Eg: if the value configured as part of this field is '7 days' then: - If the customer funds (this funding will be considered as an initial funding) within 7 days of opening the deposit then the deposit account will continue to be active. The interest accruals under this CD will be considered from the date of funding the deposit accountIf the customer fails to fund the deposit within the configured 7 days, then the system will process the closure of this deposit with zero balance as part of the EOD batch process. Note: This field is applicable only if the flag Zero Balance Deposit is set to On.
Prior Notice Days for Zero Balance Deposit Closure	Select the notice days prior to the Zero balance Deposit closure date in case of no funding received by the end of the hold period. An event is published to Event Delivery Platform (EDP) on the said date for the subscribing system to notify the customer of the upcoming closure of zero balance deposit in case the funding is not received by the due date.

8. After specifying the fields in the **Preferences** screen, click **Next**.

The **Tenor Parameters** screen displays.

Figure 1-35 Create IRA Product - Tenor Parameters

9. Specify the fields on **Tenor Parameters** screen.

Click **Add** button in the **Tenor Parameters** data segment to add the applicable tenors. For more information on fields, refer to the field description table below.

Table 1-38 Tenor Parameters - Field Description

Field	Description
Tenor Parameters	This section determines the list of applicable tenors for a IRA product and also the minimum, maximum and default tenor for a IRA product.
Applicable Tenors	Click on Add to specify multiple tenors that are applicable for the IRA product. If Applicable Tenors are defined for a IRA product then the deposit can be created only with one of the tenors mentioned in the configured list. The deposit creation will fail in case the deposit is booked with any other tenor not part of the maintained list.
Days	Specify the tenor value in Days .
Months	Specify the tenor value in Months .
Years	Specify the tenor value in Years .
Minimum Tenor	Specify the minimum tenor for which deposits should be created under this IRA product. If the deposit is booked for a tenor that is less than the minimum tenor then the deposit creation fails with an appropriate error message. If applicable tenor is configured, then it needs to be made sure that the minimum tenor is less than the least value of the configured applicable tenors.
Days	Specify the minimum tenor in terms of days.
Months	Specify the minimum tenor in terms of months.
Years	Specify the minimum tenor in terms of years.

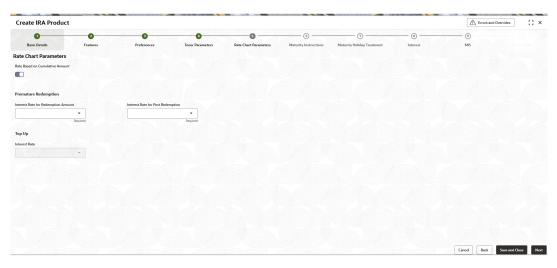

Table 1-38 (Cont.) Tenor Parameters - Field Description

Field	Description
Default Tenor	User can define a tenor for the deposits that are opened under the IRA product. Deposits opened under the IRA product will automatically acquire this tenor. However, user can change the tenor to suit the requirements of a specific deposit. The default tenor should be within the minimum and maximum range specified. The default tenor is mandatory for a IRA product.
	If applicable tenors are also configured, then one of the applicable tenors needs to be captured as a default tenor.
Days	Specify the default tenor in terms of days.
Months	Specify the default tenor in terms of months.
Years	Specify the default tenor in terms of years.
Maximum Tenor	Specify the maximum tenor for which deposits can be created under this IRA product. If the deposit is booked beyond the maximum tenor then the deposit creation fails with an appropriate error message. If applicable tenor is configured, then it needs to be made sure that the maximum tenor is more than the max value of the configured applicable tenors.
Days	Specify the maximum tenor in terms of days.
Months	Specify the maximum tenor in terms of months.
Years	Specify the maximum tenor in terms of years.

10. After specifying the fields in the **Tenor Parameters** screen, click **Next**.

The Rate Chart Parameters screen displays.

Figure 1-36 Create IRA Product - Rate Chart Parameters

11. Specify the fields on Rate Chart Parameters screen.

For more information on fields, refer to the field description table below.

Table 1-39 Rate Chart Parameters - Field Description

Field	Description
Rate Chart Parameters	This determines if rate chart is applicable for the IRA product and the premature redemption details for the deposits if rate chart is allowed.
Rate Based On Cumulative Amount	Switch this toggle ON to indicate that the system should arrive at the interest rate of a new deposit using the cumulative amount of other active deposits, under the same IRA product, customer, and currency. The default value is OFF .
Interest Rate for Redemption Amount	Select the interest rate to be applied for the redemption amount, from the drop-down list. The list of values are as follow: Continue Existing As on Opening Date As on Redemption Date Special Rate Code As on Rate Revision Events The default value is Continue Existing.
Interest Rate for Post Redemption	Select the interest rate to be applied after redemption of deposit, from the drop-down list. The list of values are as follows: Continue Existing As on Opening Date As on Redemption Date As on Rate Revision Events The default value is Continue Existing.
Interest Rate	 Select the interest to be applied on the top-up deposit, from the drop-down list. The list of values as follow: Current - Select this option to apply the current interest rate of the deposit on the top-up amount. As on Opening Date - Select this option to apply the interest rate based on the slab as on the value date of deposit opening. If top-up is made to a deposit after rollover, the rate as on rollover date will be considered for rate pick up. As on Top Up Value Date - Select this option to apply the interest rate based on the slab as on the value date of the top-up.

12. After specifying the fields in the Rate Chart Parameters screen, click Next.

The Maturity Instructions screen displays.

Figure 1-37 Create IRA Product - Maturity Instructions

13. Specify the fields on Maturity Instructions screen.

For more information on fields, refer to the field description table below.

Table 1-40 Maturity Instructions - Field Description

Field	Description
Maturity Instructions	This determines the default maturity instructions for accounts opened under the IRA product.
Auto Rollover	Switch this toggle ON to automatically rollover the deposits on maturity date. The default value is OFF .
Month-End Maturity Deposit	Switch this toggle ON to indicate that the deposit is a month-end maturing deposit (i.e., the deposit matures on the last working day of the month). The default value is OFF .
Rollover to a Different Product	Switch this toggle button ON for selection only if the Maturity Instructions selected for the product is Auto Rollover . If this flag is OFF when Auto-Rollover is ON , then the deposits opened under this business product can rollover to the same product only. This flag status also determines if the override of Target Product at Rollover will be allowed to be overridden at account level The default value for this field is OFF
Target Product at Rollover	Switch this toggle ON for selection only if the field Rollover to a Different Product is selected as ON . This LOV lists the configured deposit product codes along with product descriptions, in the system. The user can choose the target product code from the list to which the deposit account needs to rollover to on maturity (if the maturity instruction is rollover). The Target product must be of the same type. Eg: IRA CD to show only IRA CD products as part of the List of Values (LOV) This is an optional field.

Table 1-40 (Cont.) Maturity Instructions - Field Description

Field	Description
Re-pick up Business Product Tenor on Rollover	Switch this toggle ON to enable re-pick up of the IRA product tenor on rollover. During rollover, the system will pick up the default tenor of the IRA product. The default value is OFF .
Close on Maturity	Switch this toggle ON to close the deposit account on maturity date and transfer the amount as per the pay-out details maintained for the deposit. The default value is OFF .
Cascade Month-End Maturity Date	Switch this toggle ON to cascade the month end maturity date of the deposit. If not selected then, the maturity date will fall in line with the account open date. The default value is OFF .
Maturity Notice Period	Specify the number of days before which the customer notification is to be sent for deposit maturity.
Grace Days After Rollover	Specify the number of days after rollover during which the customer can request modifications or operations such as redemption without incurring any penalty.

14. After specifying the fields in the **Maturity Instructions** screen, click **Next**.

The Maturity Holiday Treatment screen displays.

Figure 1-38 Create IRA Product - Maturity Holiday Treatment

15. Specify the fields on Maturity Holiday Treatment screen.

For more information on fields, refer to the field description table below.

Table 1-41 Maturity Holiday Treatment - Field Description

Field	Description
Holiday Treatment	This determines the holiday treatment if the maturity of the
	deposit falls on a holiday.

Table 1-41 (Cont.) Maturity Holiday Treatment - Field Description

Field	Description
Holiday Calendar	Select the holiday calendar applicable to the IRA product from the drop-down list. This list displays the following values: • Ignore - Select this option to ignore all other holiday parameters for the IRA product. By default, this option is selected. • Branch - Holiday calendar will be based on the branch holiday maintenance of the respective branch. • Currency - Holiday calendar will be based on the currency maintenance done at bank level for the respective currency. • Both Branch and Currency - Holiday calendar is based on both branch and currency holiday maintenance. The holiday calendar is used to arrive at the maturity date. The holiday calendar defined at the IRA product is applicable to all deposits opened under the IRA product. User cannot modify the Holiday Calendar if there are active accounts under the IRA product. The default value is Ignore.
Holiday Movement	Select the working day to which the holiday should be moved from the adjoining drop-down list. This list displays the following values: No Change - If you select this option, then there is no change in the maturity date. By default, this option is selected. Previous Working Day - In case the computed maturity date is a holiday, then system moves the maturity date to the previous working day for the corresponding Holiday Calendar chosen. Next Working Day - In case the computed maturity date is a holiday, then system moves the maturity date is a holiday, then system moves the maturity date to the next working day for the corresponding Holiday Calendar chosen. Holiday movement is adjusting the next maturity date when the maturity date falls on a holiday, based on the Holiday Calendar chosen. Holiday Movement is not applicable if you select Ignore option for Holiday Calendar. Note User cannot modify the Holiday Movement if there are active account under the IRA product. The default value is No Change.

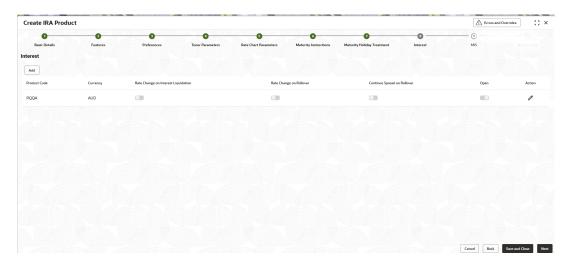

Table 1-41 (Cont.) Maturity Holiday Treatment - Field Description

Field	Description
Maturity Date Movement Across Months	 Select the maturity date movement across months from the drop-down list: Allowed - The maturity date is moved across months. If the computed maturity date falls on a Holiday, then the maturity date can be moved to the next or previous working day, based on the holiday movement option, even if it falls in a different month. By default, this option is selected. Previous/Next Working Day of the Same Month - After moving the maturity date, if the adjusted maturity date falls in the previous/next month, then the system moves the maturity date forward or backward to the next/previous working day of the same month. No Change in Maturity Date - If the adjusted maturity date falls on next/previous month, then the system ignores the movement and considers the computed maturity date as the maturity date even it falls on a holiday. Maturity date across months is applicable only when the maturity date is adjusted to previous or next working day. The default value is Allowed.
Adhoc Holiday Change	 Select the adhoc holiday change from the drop-down list. The list displays the following values: Change Maturity Date and Generate Advice - System updates the maturity date and the rollover maturity date as per the deposit holiday calendar maintenance, generates an advice to the customer. By default, this option is selected. Generate Advice - System generates an advice on deposits having maturity date falling on a holiday. No Action - If this is selected, the maturity date does not change. In this case the system will not generate advices for the deposit. The adhoc holiday change is the change in branch and currency holiday calendar after opening the deposit due to adhoc change in holiday or branch transfer of the deposit. System ignores the value of Adhoc Holiday Change if you select the Ignore option for Holiday Calendar. The default value is Change Maturity Date and Generate Advice.
Applicable Deposit Tenor	Select the deposit tenor, applicable to the deposit for interest rate pick-up, from the drop-down list. This list displays the following values: Original Tenor - If you select this option, then the system considers the tenor which is defaulted from the IRA product or modified at the account level. By default, this option is selected. Deposit Tenor - If you select this option, then the system considers the tenor based on the adjusted maturity date. The default value is Original Tenor.

16. After specifying the fields in the **Maturity Holiday Treatment** screen, click **Next**. The **Interest** screen displays.

Figure 1-39 Create IRA Product - Interest

17. Specify the fields on **Interest** screen.

Click the Add button. The Add Interest screen displays.

For more information on fields, refer to the field description table below.

Table 1-42 Interest - Field Description

	Burney Commence of the Commenc
Field	Description
Product Code	Specify the interest product code that should be linked to the account. The adjoining option list displays all valid Interest and Charge (IC) products available in the system. User can select the appropriate one.
Currency	Select the Currency from the drop-down list defined for the interest product.
Rate Change on Interest Liquidation	Switch this toggle ON , then on every interest liquidation new rates are picked up for the interest calculation. However, you cannot toggle this switch once authorized.
Rate Change on Rollover	Switch this toggle ON to re pick up the rate activity on the rollover of deposit. The rate is picked up for fixed and rate chart allowed deposits.
Continue Spread on Rollover	This is defaulted based on the Interest and Charges product. Switch this toggle ON to enable continued variance on rollover. The system will default account variance as current value to the rollover deposit for the next cycle. If you toggle OFF this, then the account variance will not be carried forward to the next rollover cycle.
Open	Switch this toggle ON to make the product applicable. More than one IC product may be applicable for a IRA product at the same time. The default value is ON .
Action	Click Edit icon to edit the values in a row, or click Delete icon to delete the rows.

- After specify the details in the **Add Interest** screen. Click **Add** or **Add Another** button to include the interest parameters in the Interest screen.
- **18.** After specifying the fields in the **Interest** screen, click **Next**.

The MIS screen displays.

Figure 1-40 Create IRA Product - MIS

19. Specify the fields on MIS screen.

For more information on fields, refer to the field description table below.

Table 1-43 MIS - Field Description

Field	Description
MIS Group	Select the MIS group applicable for the deposit IRA product from the selection list. The list is populated based on the MIS configuration maintained in common core.
Description	The system displays the description. This is auto populated.

20. After specifying all the details, click **Save and Close** to complete the steps or click **Cancel** to exit without saving.

1.10.2 View IRA Product

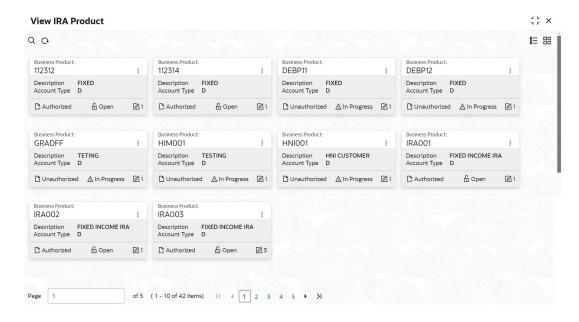

This topic explains the systematic instructions to view the list of configured IRA product parameters.

- On Home screen, under Menu, click Retail Deposits. Under Retail Deposits, click Configurations.
- Under Configurations, click Retail Deposits IRA Product. Under Retail Deposits IRA Product, click View IRA Product.

The View IRA Product screen displays.

Figure 1-41 View IRA Product

For more information on fields, refer to the field description table below.

Table 1-44 View Business Product - Field Description

Field	Description
Business Product	Displays the IRA business product.
Description	Displays the description of the IRA business product.
Account Type	Displays the type of deposit account.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

Servicing Configurations

The Oracle Banking Branch is installed with servicing configuration helps banks to build the desired workflow for servicing transactions.

- Branch Date Configurations
- Business Product Configuration

The Oracle Banking Branch is equipped with business product configuration helps banks to configure various services for retail bank offerings.

Business Process Configuration

The Oracle Banking Branch is installed with business process configuration helps banks to build the desired workflow for servicing transactions.

Servicing Configuration

The Oracle Banking Branch is installed with servicing configuration helps banks to build the desired workflow for servicing transactions.

Memo Maintenance

This topic describes the systematic instruction about Memo Maintenance. User can add, edit, or delete a memo using this screen.

Branch Servicing Auto Auth Setup

User can enable or deactivate the auto-authorization for servicing operations by using the **Branch Servicing Auto Auth Setup** screen.

2.1 Branch Date Configurations

For branch servicing operations, the system allows user to configure the branch date as either the Common Core Branch Date or the Teller Branch Date. By default, the system uses the Common Core Branch Date for these operations. If you prefer to use the Teller Branch Date, then you can change the default setting by updating the **tellerIntegrationEnabled** parameter in the obbrn-cmn-process-driver-serve to **Y**.

- When **tellerIntegrationEnabled** = **Y**, the system uses the Teller Branch Date for branch servicing transactions.
- When **tellerIntegrationEnabled** = **N**, the system uses the Common Core Branch Date for branch servicing transactions.

2.2 Business Product Configuration

The Oracle Banking Branch is equipped with business product configuration helps banks to configure various services for retail bank offerings.

This topic contains the following subtopics:

About Business Product Configuration

Business product configuration allows users to configure the various services for retail bank offerings. The details captured in the business product configuration are used for processing the servicing transactions.

Create Business Product

User can use this screen to create the business product and map it to the host product.

View Business Product

Oracle Banking Branch supports viewing the business product created. The **View Business Product** screen allows the user to view all of the authorized, unauthorized and closed business products. The 'Authorize' option is also available for supervisor users for approving the unauthorized business product.

2.2.1 About Business Product Configuration

Business product configuration allows users to configure the various services for retail bank offerings. The details captured in the business product configuration are used for processing the servicing transactions.

The business product created in Oracle Banking Branch is linked with the host product. There is only one golden source available for product creation or configuration, which is in the host. The business product created in Oracle Banking Branch allows configuring parameters that are more customer-facing and how the products are sold in banks.

The business product is linked to the business process so that the servicing transactions related to the selected business product will flow as per the business process definition. The business product process allows the user to create the business products and view the existing business products.

2.2.2 Create Business Product

User can use this screen to create the business product and map it to the host product.

The following data segments of the screen allows user to define the various elements for the products:

- Business Product Details
- Host Product Mapping

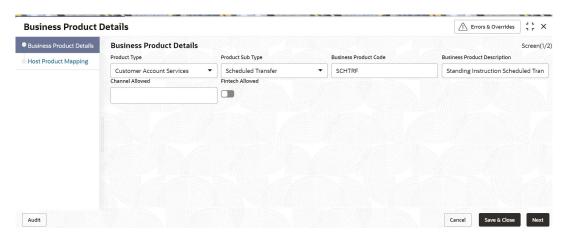

Perform the following steps to create business product:

 On the Home screen, from the Servicing Configurations, under Business Product, click Create Business Product. User can also open the screen by specifying Create Business Product in the search icon bar and selecting the screen.

The **Create Business Product** screen is displayed.

Figure 2-1 Create Business Product - Business Product Details

On the Business Product Details segment, specify the fields. For more information on fields, refer to the field description table.

Table 2-1 Business Product Details – Field Description

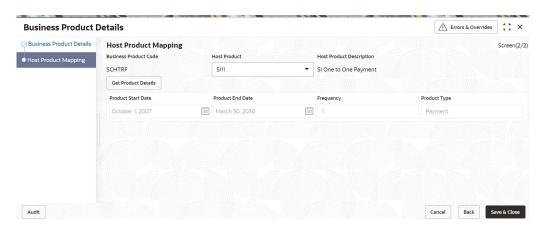

Field	Description
Product Type	Select the product from the drop-down list. The available options are: Customer Account Services Term Deposit Account Services Loan Account Services
Product Sub Type	Select the product sub-type from the drop-down list. Product sub-types supported are based on the Product Type selected.
	a. Customer Account Services
	b. Term Deposit Account Services
	c. Loan Account Services
Business Product Code	Specify the business product code.
	Note: The maximum length of the business product code should not be more than six characters. Alphanumeric and alphabets should be in the capital.
Business Product Description	Specify the business product description.
Channel Allowed	Select the channels that should be allowed for the business product from the drop-down list. For Example – Oracle Banking Digital Experience.
Fintech Allowed	Select if the business product is supported for servicing transactions from Fintech Companies.
Fintech Name	Select the Fintech Company name from the drop-down list. The system allows the selection of multiple companies. Note: This field is mandatory if Fintech Allowed is selected.

Click Next.

If Scheduled Transfer, Sweep In to Account, Sweep Out from Account, Term
Deposit Account Services, or Loan Account Services option is selected from the
Product Sub Type field in the Business Product Details segment, then the following
Host Product Mapping segment is displayed. In this data segment, the business
product is mapped to the host product and parameters for processing servicing
transactions are defined.

Figure 2-2 Create Business Product – Host Product Mapping

For more information on fields, refer to the field description table.

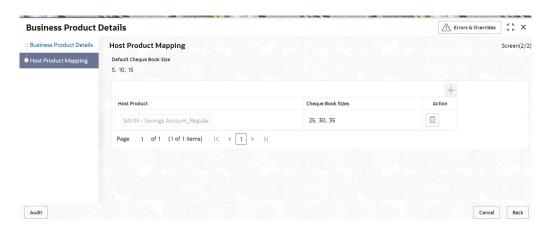

Table 2-2 Host Product Mapping - Field Description

Field	Description
Business Product Code	Displays the business product code defaulted from the Business Product Code entered in the Business Product Details data segment.
Host Product	Select the host product from the drop-down list.
Host Product Description	Displays the product description once the host product is selected in Select Host Product .
Get Products Details	Click Get Product Details, and the system will default the parameter configured at the host product. When user click this button, the system defaults the values in the following fields: - Product Start Date - Product End Date - Frequency - Product Type - Minimum Sweep Amount
Product Start Date	Displays the product start date defaulted from the host.
Product End Date	Displays the product end date defaulted from the host.
Frequency	Displays the frequency defaulted from the host.
Product Type	Displays the product type defaulted from the host.
Minimum Sweep Amount	Displays the minimum sweep amount defaulted from the host.
	Note: This field is displayed only if the Product Sub Type in the Business Product Details segment is selected as Sweep Out from Account or Sweep In to Account.

If Cheque Leaves Default option is selected from the Product Sub Type field in the Business Product Details segment, then the following Host Product Mapping segment is displayed.

Figure 2-3 Create Business Product – Host Product Mapping (Cheque Leaves Default)

For more information on fields, refer to the field description table.

Table 2-3 Create Business Product – Host Product Mapping (Cheque Leaves Default) – Field Description

Field	Description
Default Cheque Book Size	Specify the numeric values for cheque book sizes against those accounts, for which the Account Classes have not been mapped or that have been created newly in the system. Note: A Close icon is displayed next to the value specified as you tab out of the field. To remove the value, click the Close icon.
Host Product	Select the account classes defined in the system. Note: This field is enabled if you click the Add icon displayed above the table. An Account Class cannot belong to more than one group of Host Product.
Cheque Book Sizes	Specify numeric values for the cheque book sizes for the account classes selected. Note: This field is enabled if you click the Add icon displayed above the table. You are not allowed to enter duplicate values in this field.
Action	Displays the Delete icon to remove the row added. Note: This field is enabled if you click the Add icon displayed above the table.

4. Click Save & Close.

2.2.3 View Business Product

Oracle Banking Branch supports viewing the business product created. The **View Business Product** screen allows the user to view all of the authorized, unauthorized and closed

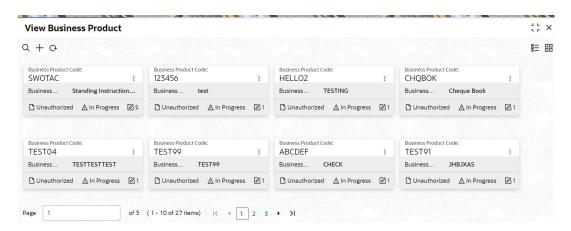

business products. The 'Authorize' option is also available for supervisor users for approving the unauthorized business product.

To view business product:

 On the Home screen, from the Servicing Configurations, under Business Product, click View Business Product. User can also open the screen by specifying View Business Product in the search icon bar and selecting the screen.

The View Business Product screen is displayed.

Figure 2-4 View Business Product

- 2. On the View Business Product screen, User can perform the following actions:
 - Search for a particular business product.
 - Add preference for a business product.
 - Refresh the page to view the latest updates.
 - Change view to grid or tile.
- 3. On the **View Business Product** screen, view the business product set for the required services. For more information on the options, refer to the table below.

Table 2-4 View Business Product - Field Description

Field	Description
Business Product Code	Displays the business product set for the service.
Business Product Description	Displays the description for the business product.

- 4. Each tile also displays the following information:
 - Authorized or Unauthorized
 - For Authorized status: The **Actions** icon provides the options to Unlock, Close, Copy, and View.
 - For Unauthorized status: The **Actions** icon provides the options to Unlock, Authorize, Delete, Copy, and View.
 - Open, In Progress, or Closed
 - Number of edits performed on the business product.

2.3 Business Process Configuration

The Oracle Banking Branch is installed with business process configuration helps banks to build the desired workflow for servicing transactions.

This topic contains the following subtopics:

About Business Process Configuration

The business process configuration defines the stages, respective data segments, checklists, documents required, and advice generation for the stages.

Create Business Process

The **Create Business Process** screen helps to configure the workflow for servicing transactions. This process will allow defining the data segments, checklists, documents, and advices for the stages defined in the process code selected for the lifecycle code and business product combination.

View Business Process

Oracle Banking Branch supports viewing the business process created. The **View Business Process** screen allows the user to view all of the authorized, unauthorized, and closed business processes. Authorize option is also available for supervisor users for approving unauthorized business processes.

2.3.1 About Business Process Configuration

The business process configuration defines the stages, respective data segments, checklists, documents required, and advice generation for the stages.

A business process can be defined as a set of activities and tasks that, once completed, will accomplish the distinct servicing processes. The business process must involve clearly defined inputs and a single output.

The business process definition will determine the different stages required for a given combination of the process code, life cycle, and business product code. The workflow management of these stages and the relevant stage movements are defined in Plato/ Conductor to:

- Orchestrate the microservices-based process flow
- Ensure a seamless transition of servicing process across various stages in that given order.

The Plato/Conductor process will drive the workflow from one stage to another based on the process outcomes at the respective stages and subject to fulfilling the mandatory data capture, confirmation on the mandatory checklist items, and submission of mandatory documents at the respective stages. The stages defined in the business process can be dynamically assigned to different user profiles or roles.

While performing the servicing transactions, the system picks the business process run-time and initiates the workflow based on the configuration. The prerequisites for configuring the business process are enumerated below:

Table 2-5 Prerequisites for Configuration - Field Description

Prerequisites	Description
Lifecycle	Lifecycle represents the cycle of the process for which the business process is created. These are factory-shipped codes and currently support servicing transactions such as customer account transactions, term deposit transactions, and loan account transactions.
Process Code	Process code defines the various stages relevant for servicing transactions. Process code configuration allows you to define the business process flow that needs to be mapped for the business product and lifecycle code combination in the business process configuration.
	A set of default process codes are factory-shipped for the reference workflow. User can also create process codes in CMC_TM_PROCESS_CODE and CMC_TM_PROCESS_STAGE tables.
Business Product	Business product maintenance allows configuring the various business products by the product offerings that the bank deals with. Each business product has a unique business process defined for a specific lifecycle code selected.

2.3.2 Create Business Process

The Create Business Process screen helps to configure the workflow for servicing transactions. This process will allow defining the data segments, checklists, documents, and advices for the stages defined in the process code selected for the lifecycle code and business product combination.

This screen allows configuring the elements for each of the stages of the servicing transactions. For information on the elements, refer to the table below:

Table 2-6 Elements of Business Process

Element	Description
Data Segment	A data segment, as the name suggests is an individual block of data. Bringing in data segments allows to break down a huge process into smaller units, which will be easier to update, maintain, and process. The business process consists of several data segments that make up the stage. Business process definition enables the user to perform the following: Add 'n' number of data segments to each stage. Set the data segment as mandatory or non-mandatory. Set the data segment as editable or non-editable. Control the sequence order of the data segments. Select the stage.
Document	The documents are required to be submitted by the customer for the servicing transactions.
Checklist	Checklists are distinct and a list of mandatory checkpoints for the servicing transactions to be configured by the bank.
Advices	Advices are an official letter of notices detailing an action taken or to be taken on a stated date by the bank. This is the final configuration for the Business Process creation.

Perform the following steps to create business process:

 On the Homepage, from the Servicing Configurations, under Business Process, click Create Business Process. You can also open the screen by specifying Create Business Process in the search icon bar and selecting the screen.

The Create Business Process screen is displayed.

Figure 2-5 Create Business Process

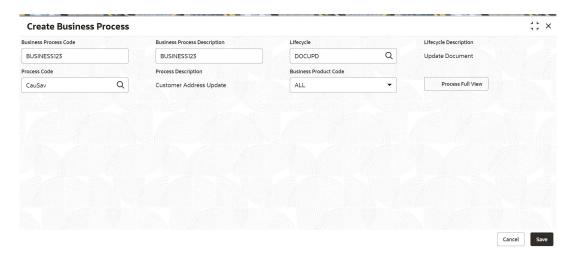

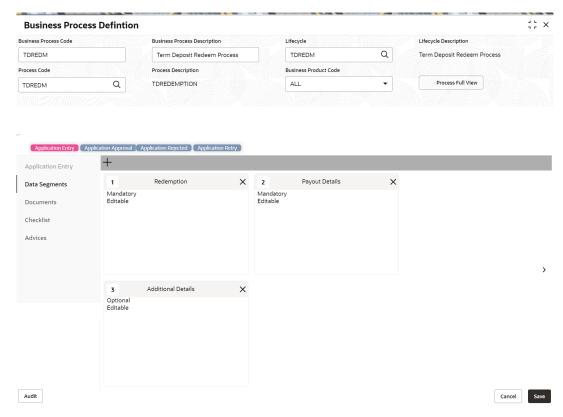

Figure 2-6 Create Business Process - Stages

On the Create Business Process screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-7 Create Business Process - Field Description

Field	Description
Business Process Code	Specify an alphanumeric business process code.
	Note: The maximum length allowed is 16.
Business Process	Specify the description of the business process code.
Description	Note: The maximum length allowed is 60 alphanumeric characters.
Lifecycle	Search and select the lifecycle code.
Lifecycle Description	Displays the description of the lifecycle selected.
Process Code	Search and select the process code of the business process flow that needs to be mapped for the lifecycle code and business process code combination.
	Note: Once user select the process code, the elements and stages are displayed on the screen.
Process Description	Displays the description of the selected process code.
Business Product Code	Specify the business product code for which the business process is being created. Alternatively, the system allows selecting 'All', in which case the business process will apply to all the business products that are associated with the lifecycle and process code.

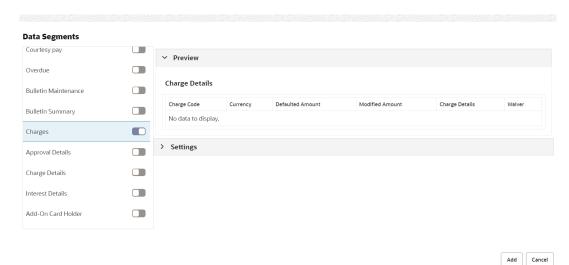

(i) Note

The system allows you to configure only one business process for a combination of **Lifecycle** and **Business Product Code**.

On the Create Business Process screen, click Data Segments tab and then click Add icon on the header panel.

The **Data Segments** screen is displayed.

Figure 2-7 Data Segments

4. On the **Data Segments** screen, select the required data segment or data segments for the selected stage, and specify the fields. For more information on fields, refer to the field description table.

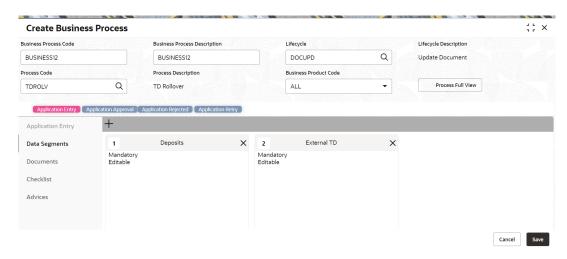

Table 2-8 Data Segments - Field Description

Field	Description
Preview	Click on this tab to view the data segment.
Settings	Specify the settings.
Mandatory	Select if the data segment is mandatory.
Editable	Select if the data segment is editable.
Select Products	Select the products for which the data segment is relevant.

5. On the **Data Segments** screen, click **Add**.

The Create Business Process screen is displayed with the data added segment.

Figure 2-8 Create Business Process - Added Data Segments

(i) Note

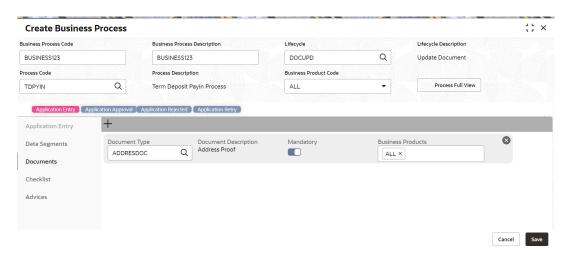

The system allows to re-sequence the data segment by dragging and dropping over the specific data segment.

6. On the **Create Business Process** screen, select the desired stage, and click **Document** tab to define the specific documentation requirement.

The **Documents** segment is displayed.

Figure 2-9 Create Business Process – Documents

On the **Documents** segment, specify the fields. For more information on fields, refer to the field description table.

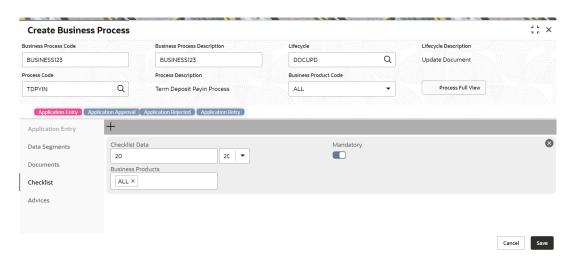

Table 2-9 Documents - Field Description

Field	Description
Document Type	Search and select the document type.
Document Description	Displays the corresponding description of the document.
Mandatory	Select if it is mandatory to submit the document for the stage.
Business Products	Select the required option for the document submission requirement. The available options are: Single Product List of Products All

On the Create Business Process screen, select the desired stage, and click Checklist tab.

The Checklist segment is displayed.

Figure 2-10 Create Business Process - Checklist

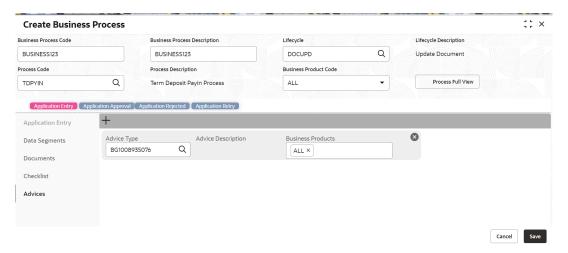

9. On the **Checklist** segment, specify the fields. For more information on fields, refer to the field description table.

Table 2-10 Checklist - Field Description

Field	Description
Checklist Data	It is a free-text field that allows to user to enter the checklists that must be validated as part of the selected stage.
Mandatory	Select if it is mandatory to submit the checklist for the stage.
Business Products	Select the required option to restrict the checklist. The available options are: Single Product List of Products All

10. On the Create Business Process screen, select the desired stage, and click Advices tab. The Advices segment is displayed.

Figure 2-11 Create Business Process – Advices

11. On the Advices segment, specify the fields. For more information on fields, refer to the field description table.

Table 2-11 Advices - Field Description

Field	Description
Advice Type	Search and select the required advice type from the displayed list of all the valid advices maintained, and that must be mapped to this stage.
Advice Description	Displays the corresponding description of the advice.
Business Products	Select the required option to restrict the advices. The available options are: Single Product List of Products All

12. Click **Save** to create the business process.

At this point, the status of the business process is unauthorized. A user with supervisor access has to approve the business process. Once approved, the status of the business process changes from unauthorized to authorized, and is activated for usage in the servicing transactions.

2.3.3 View Business Process

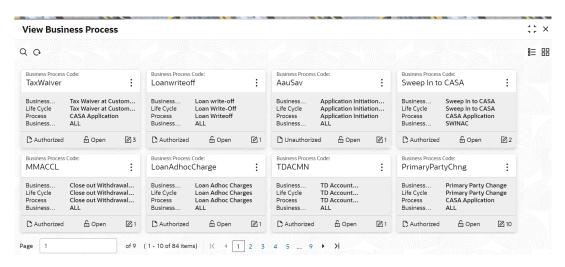

Oracle Banking Branch supports viewing the business process created. The **View Business Process** screen allows the user to view all of the authorized, unauthorized, and closed business processes. Authorize option is also available for supervisor users for approving unauthorized business processes.

Perform the following steps to view business process:

 On the Homepage, from the Servicing Configurations, under Business Process, click View Business Process. You can also open the screen by specifying View Business Process in the search icon bar and selecting the screen.

The **View Business Process** screen is displayed.

Figure 2-12 View Business Process

- 2. On the View Business Process screen, you can perform the following actions:
 - Search for a particular business process.
 - Add preference for a business process.
 - Refresh the page to view the lastest updates.
 - Change view to grid or tile.
- 3. On the **View Business Process** screen, view the business product set for the required services. For more information on the options, refer to the table below.

Table 2-12 View Business Process – Field Description

Field	Description
Business Process Code	Displays the business process set for the service.
Business Process Description	Displays the description for the business process.

Table 2-12 (Cont.) View Business Process – Field Description

Field	Description
Life Cycle	Displays the life cycle set for the business process.
Process	Displays the process.
Business Product	Displays the business code.

- 4. Each tile also displays the following information:
 - Authorized or Unauthorized
 - For Authorized status: The **Actions** icon provides the options to Unlock, Close, Copy, and View.
 - For Unauthorized status: The **Actions** icon provides the options to Unlock, Authorize, Delete, Copy, and View.
 - Open, In Progress, or Closed
 - Number of edits performed on the business process.

2.4 Servicing Configuration

The Oracle Banking Branch is installed with servicing configuration helps banks to build the desired workflow for servicing transactions.

This topic contains the following subtopics:

• Create Service Preferences

User can create service preferences for Transaction Code for Debit, Transaction Code for Credit, Exchange Rate Code, and Exchange Rate Type servicing screens using the **Create Service Preferences** screen.

View Service Preferences

User can view all of the authorized, unauthorized, and closed service preferences using the **View Service Preferences** screen. Authorize option is also available for supervisor users for approving unauthorized business processes.

2.4.1 Create Service Preferences

User can create service preferences for Transaction Code for Debit, Transaction Code for Credit, Exchange Rate Code, and Exchange Rate Type servicing screens using the **Create Service Preferences** screen.

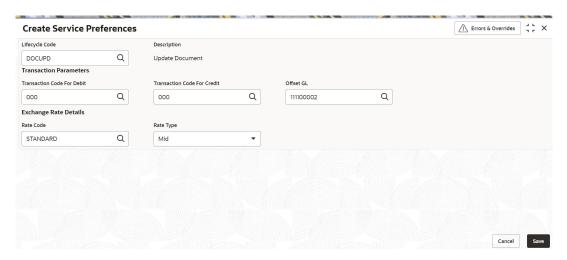

To create service preferences:

 On the Home screen, from the Servicing Configurations, under Servicing Configurations, click Create Service Preferences. User can also open the screen by specifying Create Service Preferences in the search icon bar and selecting the screen.

The Create Service Preferences screen is displayed.

Figure 2-13 Create Service Preferences

On the Create Service Preferences screen, select or specify the required details.

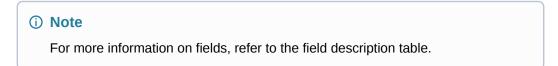

Table 2-13 Create Service Preferences – Field Description

Field	Description
Lifecycle Code	Select the lifecycle code for the servicing screens.
Description	Displays the description based on the lifecycle code selected.
Transaction Parameters	This section displays the fields to select the parameters for the transactions.
Transaction Code For Debit	Select the code for the debit transaction.
Transaction Code For Credit	Select the code for the credit transaction.
Offset GL	Select the offset GL for the transaction.
Exchange Rate Details	This section displays the fields to create the rate preferences.
Rate Code	Select the code for the exchange rate.
Rate Type	Select the type for the exchange rate. The available options are: • Mid • Buy/Sell

3. Click Save.

2.4.2 View Service Preferences

User can view all of the authorized, unauthorized, and closed service preferences using the **View Service Preferences** screen. Authorize option is also available for supervisor users for approving unauthorized business processes.

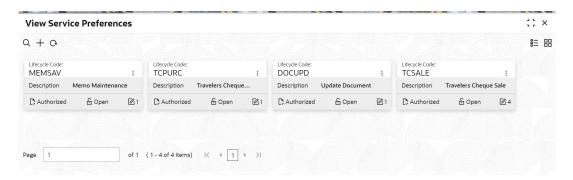

To view the service preferences:

 On the Home screen, from the Servicing Configurations, under Servicing Configurations, click View Service Preferences. User can also open the screen by specifying View Service Preferences in the search icon bar and selecting the screen.

The View Service Preferences screen is displayed.

Figure 2-14 View Service Preferences

- 2. On the View Service Preferences screen, User can perform the following actions:
 - Search for a particular service preference.
 - Add preference for a service.
 - Refresh the page to view the latest updates.
 - Change view to grid or tile.
- On the View Service Preferences screen, view the preferences set for the required services.

Table 2-14 View Service Preferences – Field Description

Field	Description
Lifecycle Code	Displays the lifecycle code set for the service.
Description	Displays the description for the lifecycle code.

- 4. Each tile also displays the following information:
 - Authorized or Unauthorized
 - For Authorized status: The **Actions** icon provides the options to Unlock, Close, Copy, and View.
 - For Unauthorized status: The **Actions** icon provides the options to Unlock, Authorize, Delete, Copy, and View.
 - Open, In Progress, or Closed
 - Number of edits performed on the set preferences.

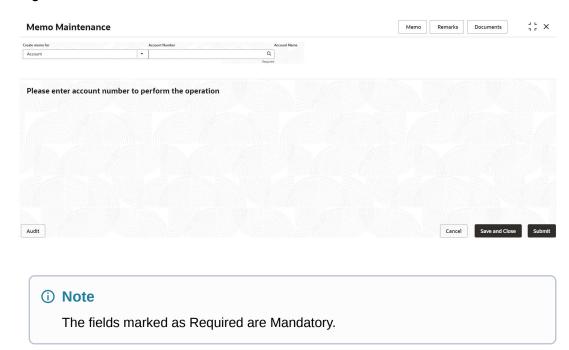

2.5 Memo Maintenance

This topic describes the systematic instruction about Memo Maintenance. User can add, edit, or delete a memo using this screen.

1. On the **Home** screen, from **Interaction Services**, under **Maintenance**, click **Memo Maintenance**, or specify the **Memo Maintenance** in the Search icon bar.

The Memo Maintenance screen is displayed.

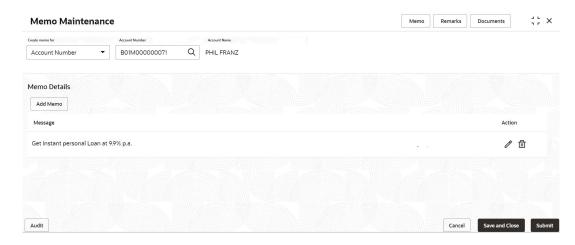

Figure 2-15 Memo Maintenance

2. On **Memo Maintenance** screen, perform the required action.

The memo maintenance details are displayed in the screen.

Figure 2-16 Memo Maintenance Details

3. On the **Memo Maintenance** screen, specify the fields.

(i) Note

For more information on fields, refer to the field description table.

Table 2-15 Memo Maintenance - Field Description

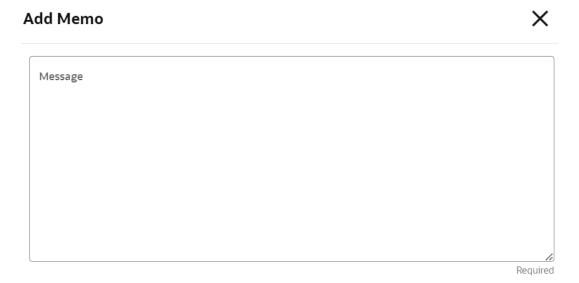

Field	Description
Create memo for	Select the option for creating memo. The available options are: Account: If user selects this option, then the Account Number and Account Name are displayed. Deposit: If user selects this option, then the Deposit Account Number and Account Name are displayed.
Message	Provide the text of the memo message.
Action	Click the Edit icon to edit the message or the Delete icon to delete the added memo.

Click Add Memo in the Memo Maintenance screen.

The **Add Memo** screen is displayed to specify the memo message.

Figure 2-17 Add Memo

Cancel Add Another Add

- a. Click **Cancel** to cancel the memo message.
- b. Click Add or Add Another to add the message in the main screen.
- Click Submit.

The screen is successfully submitted for authorization.

2.6 Branch Servicing Auto Auth Setup

User can enable or deactivate the auto-authorization for servicing operations by using the **Branch Servicing Auto Auth Setup** screen.

The auto authorization can be set for Accounts, Deposits, and IRA modules of servicing.

The fields marked as **Required** are mandatory.

To set up auto-authorization:

On the Home screen, from the Retail Servicing Configuration mega menu, click Branch Servicing Auto Auth Setup or specify Branch Servicing Auto Auth Setup in the search icon bar and select the screen.

The Branch Servicing Auto Auth Setup screen is displayed.

Figure 2-18 Branch Servicing Auto Auth Setup

- From the Accounts, Deposit, and IRA tabs, select the required screens for which autoauthorization is to be set from the Non-auto authorization screens section.
- Click Move to auto authorization.

The screens are removed from the Non-auto authorization screens section and displayed in the Auto authorization screens section.

For more information on fields, refer to the field description table.

Table 2-16 Branch Servicing Auto Auth Setup – Field Description

Field	Description
Non auto authorization screens	Select the screens to be auto-authorized from this section. User can also search for any required screen by specifying the screen name in the Search field.
Auto Authorized screens	This section displays the screens to be auto-authorized.
Lifecycle Code	Displays the lifecycle code of the screen.
Screen Name	Displays the screen set for auto-authorization.
Action	Displays the Delete icon. User can click to deactivate the screen from auto-authorization. Post deletion, the screen is added back to the Non auto authorization screens section.

(i) Note

If the user selects the screen and clicks Move to auto authorization, then to proceed with action in other tabs, the user should click **Save**. Else, the changes made by user will be lost if switched between the modules.

Click Save.

The updates are saved successfully.

Operations

This topic contains the following **Operations** as subtopics:

Customer Information

Customer Information gives the details of Customer ID, Customer Name and KYC details. When an account number is selected on the screen, the Customer Information appears in a widget on the right side.

Overview of Deposit Services

The **Deposit Services** module facilitates doing various transactions on Certificate of Deposit accounts.

Certificate of Deposit View

You can use the screen under the **Certificate of Deposit View** menu to view a 360 view of a CD account.

CD Transactions

You can use the screens under the **Transactions** menu to initiate deposit services transactions. A deposit with a fixed tenure or term is called as time deposit or Certificate of Deposit (CD). This chapter deals with transactions of a certificate of deposit.

CD Maintenances

You can maintain the CD account details in this section. A deposit with a fixed tenure or term is called as time deposit or Certificate of Deposit (CD).

CD Inquiries

A deposit with a fixed tenure or term is called as time deposit or Certificate of Deposit (CD). This chapter deals with inquiries of a certificate of deposit.

Statement

Under the **Statement** menu, you can perform the required actions related to statement of an account.

Access Restriction

Death Claim for Certificate of Deposits

This topic describes the processing of death claim in CDs.

Unlcaimed processing for Certificate of Deposits

This topic describes the processing of escheatment in CDs.

Certificate of Deposits Compounding

This topic describes the compounding details for CDs.

Annual Percentage Yield (APY) for Certificate of Deposits

This topic describes the processing of annual percentage yield in CDs.

Annual Percentage Yield Earned (APYE) for Certificate of Deposits

This topic describes the processing of annual percentage yield earned in CDs.

Interest Transaction History Inquiry for Certificate of Deposits

This topic describes the processing of interest transaction history inquiry for CDs.

Back-up Withholding Tax in Certificate of Deposits

This topic describes the processing of back-up withholding tax in Certificate of Deposits.

- Grace Days for Certificate of Deposits
 - This topic describes the details of grace days for CDs.
- <u>FDIC Modernization in Oracle Banking Retail Accounts</u>
 This topic describes the processing of FDIC Modernization in Certificate of Deposits.
- Prior Maturity Notices in Deposits

This topic describes the details of prior maturity notices in depositss.

- OFAC Processing in Certificate of Deposits
 This topic describes the processing of OFAC in CDs.
- Escheatment based on Last Contact Date in Certificate of Deposits
 This topic describes the escheatment based on last contact date in certificate of deposits.
- <u>Business Events in Oracle Banking Retail Deposits</u>
 This topic describes the processing of business events in online for Oracle Banking Retail Deposits.

3.1 Customer Information

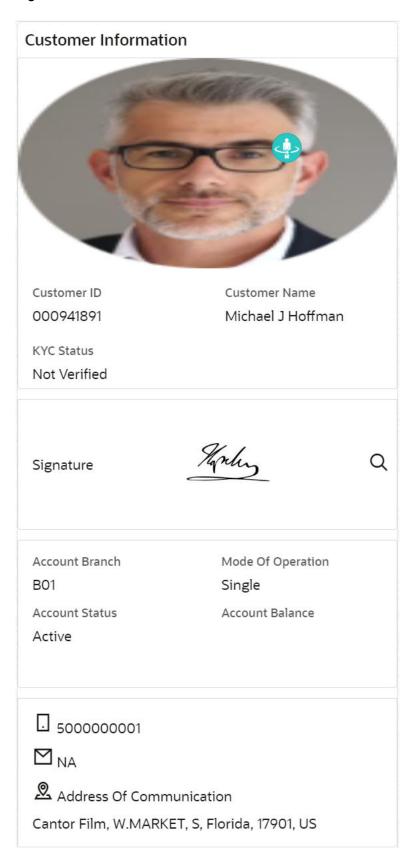

Customer Information gives the details of Customer ID, Customer Name and KYC details. When an account number is selected on the screen, the Customer Information appears in a widget on the right side.

To view the customer information:

1. Select or specify the account number in the screen..

Figure 3-1 Customer Information

For more information on fields, refer to the field description table.

Table 3-1 Customer Information - Field Description

Field	Description
<lmage></lmage>	Displays the image of the customer.
Customer ID	Displays the unique customer ID for the account number specified.
Customer Name	Displays the customer name for the account number specified.
KYC Status	Displays the current KYC status of the account.
Signature	Displays the customer's signature.
Account Name	Displays the account holder's name.
Account Branch	Displays the account holder's branch.
Mode of Operation	Displays the account's mode of operation.
Account Status	Displays the current status of the account. Note:
	The possible account status are Active , Closed , and Overdue .
Account Balance	Displays the total account available.
<phone number=""></phone>	Displays the customer's phone number.
<email id=""></email>	Displays the customer's email ID.
Address of Communication	Displays the complete address of the customer.

2. In this section, you can view the customer's basic information.

3. To launch the Customer 360 screen, click

3.2 Overview of Deposit Services

The **Deposit Services** module facilitates doing various transactions on Certificate of Deposit accounts.

About Main Menu

The **Deposit Services** is grouped into several menus. It is a large panel divided into groups of menu items, which simplifies the navigation.

3.2.1 About Main Menu

The **Deposit Services** is grouped into several menus. It is a large panel divided into groups of menu items, which simplifies the navigation.

The menu items are grouped based on the type of operation to be performed. In addition, the **Menu Item Search** helps to search and select a specific screen to navigate to any screen from the main menu items. The main menus are listed below:

Figure 3-2 Deposit Services Mega Menu

Certificate of Deposits Certificate of Deposit View Certificate of Deposit 360 Transactions **Account Opening** Top Up Redemption Maintenance Create Amount Block View and Modify Amount Block **Payout Modification** Account Modification Joint Holder Beneficiary Inquiries Account Transactions Certificate

Table 3-2 Menu Items

Interest Transactions

Menu Item	Description
Transactions	Teller or Supervisor can use to initiate certificate of deposit account opening.
Maintenance	Teller or Supervisor can use to perform the deposit services maintenance activities.
Inquiries	Teller or Supervisor can use to perform the deposit services inquiries.

3.3 Certificate of Deposit View

You can use the screen under the **Certificate of Deposit View** menu to view a 360 view of a CD account.

This topic contains the following subtopic:

Certificate of Deposit 360

The **Certificate of Deposit 360** screen provides a complete view of a customer's certificate of deposit account.

3.3.1 Certificate of Deposit 360

The **Certificate of Deposit 360** screen provides a complete view of a customer's certificate of deposit account.

The fields marked as **Required** are mandatory.

The various sections are:

- Deposit Information
- Account holders
- Account details
- Balances
- Instruction set
- Redemption Simulation
- Amount Block Details
- Rollover History
- Interest Rate Changes
- Overdue Transactions
- Recent Transactions
- Frequent Actions

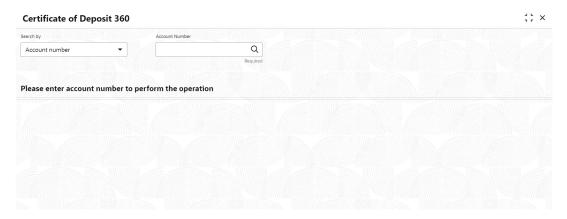

To view the certificate of deposit details:

 On the Home screen, from the Certificate of Deposit Services mega menu, under Certificate of Deposits and Certificate of Deposit View, click Certificate of Deposit 360 or specify Certificate of Deposit 360 in the search icon bar and select the screen.

The **Certificate of Deposit 360** screen is displayed.

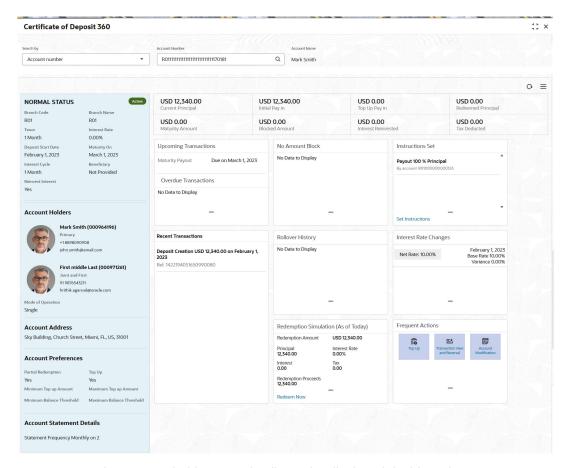

Figure 3-3 Certificate of Deposit 360

On the Certificate of Deposit 360 screen, click the Search icon or specify the Account Number and press the Tab or Enter key.

The details are displayed in the dashboard.

Figure 3-4 Deposit Details for Certificate of Deposit

User can see the account holder's CD details on the displayed dashboard. For more information on fields, refer to the field description table.

Table 3-3 Deposit 360 - Field Description

	T
Field	Description
Search By	Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.
	Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.
	A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.
	For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. Note:
	 The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen.
<product name=""></product>	Displays the product name from the product master.
<deposit status=""></deposit>	Displays the deposit status. The options for the status are: • Active • Matured • Closed
Branch Code	Displays the deposit branch code.
Branch Name	Displays the deposit branch name.
Tenor	Displays tenor for the deposit.
Interest Rate	Displays the term for the deposit and interest rate for the deposit. i Note If the main UDE is mapped at the Interest and Charges
	Product level, the interest rate will be displayed.
Deposit Start Date	Displays the value date of the deposit.
Maturity On	Displays the maturity date of the deposit.
Interest Cycle	Displays the cycle for interest calculation.
Beneficiary	Displays whether beneficiary is provided for the account.
Reinvest Interest	Displays if the interest from the CD is to be re-invested in the same deposit or paid out.
Account Holders	This widget displays the account holders detail.
	1

Table 3-3 (Cont.) Deposit 360 - Field Description

Field	Description
<name></name>	Displays the name of the account holder of the CD.
<customer id=""></customer>	Displays the customer ID of the holder.
<relationship></relationship>	Displays relationship as Primary/Secondary.
<mobile> Number</mobile>	Displays the mobile number with ISD code of the customer.
<email id=""></email>	Displays the email ID of the customer.
Mode of Operation	Displays the mode of operation for the deposit.
Account Address	This widget displays the preferred or primary customer's address.
Account Preferences	This widget displays the preferences set for the account.
Partial Redemption	Displays whether partial redemption is allowed for the CD product.
Top up	Displays whether a top-up is allowed for the account.
Minimum Top up Amount	Displays the minimum required amount for a top-up transaction on the CD account.
Maximum Top up Amount	Displays the maximum amount allowed for a top-up transaction on the CD account.
Minimum Balance Threshold	Displays the minimum threshold balance to be retained in the CD account.
Maximum Balance Threshold	Displays the maximum threshold balance allowed for the CD account.
Account Statement Details	This widget displays the statement frequency for the selected account.
Upcoming Transactions	This widget displays the details of upcoming transactions.
Overdue Transactions	Displays the details of overdue transactions.
Redemption Simulation (As of Today)	This widget displays the remdemption simulation of the day for the CD account. Click the View Error Details link to view the error message.
Instructions Set	This widget displays the payout instructions set on the CD account.
	Note To create new set of instructions for the CD account, click the Set Instructions link.
Recent Transactions	This widget displays the details of the recent transactions performed on the account.
<number> Amount Blocks</number>	This widget displays the amunt block details of the account.
	Note To manage the amount blocks, click the Manage Amount Blocks link.
<currency amount=""></currency>	Displays the currency and amount of block.
Block <number></number>	Displays the block number.
Туре	Displays the block type.

Table 3-3 (Cont.) Deposit 360 - Field Description

Field	Description
Expiry	Displays the expiry date of the block.
Interest Rate Changes	This widget displays the rate changes if any for the interest applied on the account.
Net Rate	Displays the net rate percentage of interest.
<date></date>	Displays the date of interest rate change.
Base Rate	Displays the base rate percentage of interest.
Variance	Displays the variance percentage of interest.
Rollover History	This widget displays the rollover history of the account.
<currency amount=""></currency>	Displays the currency and amount of rollover.
<component></component>	Displays the rollover component.
<date></date>	Displays the from and to date of the rollover.
<tenure></tenure>	Displays the tenure of rollover.
Frequent Actions	This widget displays the frequent actions that were performed on the account. (i) Note The actions are displayed as links. You can click the link and the related screen is opened in a new page.
	and the relation deleter to open at the reader.

(i) Note

- You can access different transactions for your account by clicking the Menu
 icon. This will show a list of links under various categories. Simply click on the
 link you need from the list. To learn how to complete the transactions using the
 links, please refer to the relevant chapters. For a visual guide, check the Mega
 Menu screenshot.
- If the most recent updates on the TD account are not visible on the screen, you can refresh it by clicking the **Refresh** icon. This will update the screen to show the latest changes.

If deposit account is closed, then all lifecycle operations are restricted from this screen.

3.4 CD Transactions

You can use the screens under the **Transactions** menu to initiate deposit services transactions. A deposit with a fixed tenure or term is called as time deposit or Certificate of Deposit (CD). This chapter deals with transactions of a certificate of deposit.

This topic contains the following subtopics:

Certificate of Deposit Account Opening
You can open a Certificate of Deposit account and simulate its creation by providing funds from Account, and Ledger modes or a combination of Account and Ledger modes.

Top Up

You can perform a CD top-up transaction using this screen.

Redemption

You can redeem a Certificate of Deposit using this screen. The redemption proceeds can be credited to Current and Savings Account, New Certificate of Deposit, Banker's Check, Demand Draft, or Ledger. The Certificate of Deposit can be redeemed in full or part.

<u>Certificate of Deposit Initial Funding</u>
 This topics describes about the certificate of deposit initial funding.

3.4.1 Certificate of Deposit Account Opening

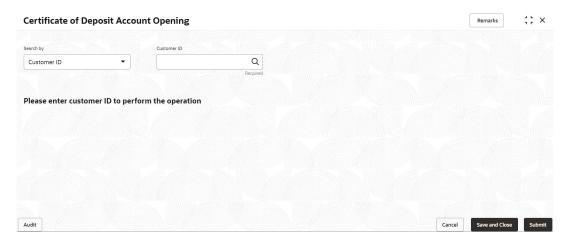

You can open a Certificate of Deposit account and simulate its creation by providing funds from Account, and Ledger modes or a combination of Account and Ledger modes.

 On the Homepage, from the Certificate of Deposit Services mega menu, under Certificate of Deposits and Transactions, click Account Opening, or specify Certificate of Deposit Account Opening in the search icon bar and select the screen.

The Certificate of Deposit Account Opening screen is displayed.

Figure 3-5 Certificate of Deposit Account Opening

On the Certificate of Deposit Account Opening screen, specify the customer number in the Customer ID field, and press Enter or Tab.

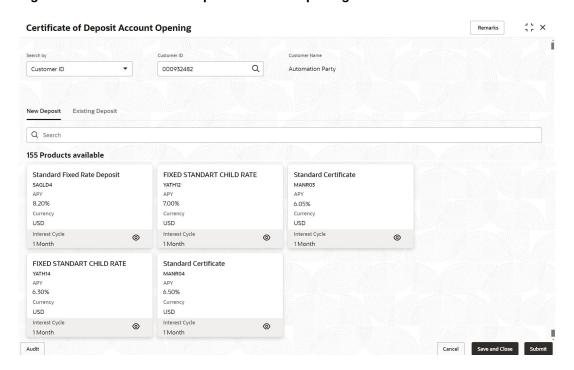

In the **Certificate of Deposit Account Opening** screen, all available CD account deposit accounts are displayed by the system.

① Note

The user can select different search criteria in the **Search by** drop-down on an account servicing screen to search for an account number. The search criteria options include **Account Number**, **Customer ID**, **Mobile Number**, **SSN**, and **Email ID**. However, the default option in the drop-down is an Account Number. If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen.

20. Click Submit.

The screen is successfully submitted for authorization.

Note

The CD account number is displayed when the CD account creation is successful.

3.4.2 Top Up

You can perform a CD top-up transaction using this screen.

(i) Note

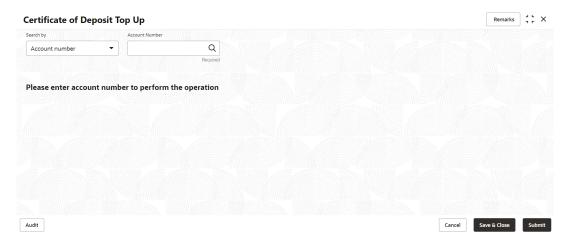

The fields marked as **Required** are mandatory.

 On the Homepage, from the Certificate of Deposit Services mega menu, under Certificate of Deposits, under Transactions, click Top Up or specify Top Up in the search icon bar and select the screen.

The Certificate of Deposit Top Up screen is displayed.

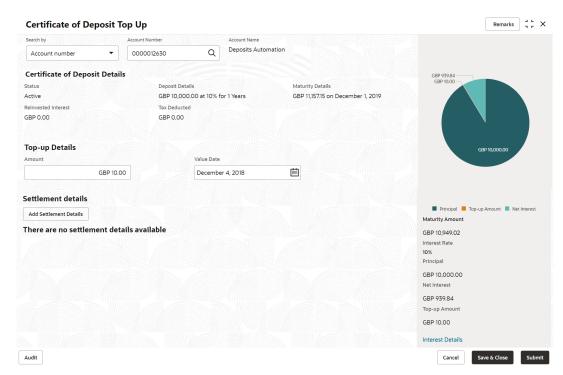

Figure 3-21 Certificate of Deposit Top Up

On the Certificate of Deposit Top Up screen, Click the Search icon or specify the account number in the Account Number field, and press Enter or Tab.

The Top Up details are displayed in the **Certificate of Deposit Top Up** screen.

Figure 3-22 Certificate of Deposit Top Up Details

3. In the **Certificate of Deposit Top Up** screen, perform the required action. For more information on fields, refer to the field description table.

Table 3-17 Certificate of Deposit Top Up – Field Description

Field	Description
Search By	Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.
	Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.
	A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.
	For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen.
Status	Displays the CD status. The possible options are: Active Matured
Deposit Details	 Closed Displays the principal balance of the CD, the rate of interest, and the tenor of the CD.
Maturity Details	Displays the proceeds due to the customer on maturity and the maturity date.
Reinvested Interest	Displays the amount and currency for the reinvested or paid out interest.
	 Note If the interest if of reinvest type, then the field name is displayed as Reinvested Interest. If the interest if of paid out type, then the field name is displayed as Paid out Interest.
Tax Deducted	Displays the actual tax deducted on reinvested or paid out interest till date.
Amount	Specify the amount which the customer wants to add to the principal of the CD.
Value Date	Specify the date from which the top-up is to take effect.

After specifying the amount in the Amount field in the Certificate of Deposit Top Up screen, the simulated output details are displayed on the right side of the screen.

Note

Computation will be triggered based on the inputs selected and output should be displayed on the panel on the right in a graphical format comparing the current principal, interest, and net proceeds at maturity with what the user would get after the top-up.

For more information on fields, refer to the field description table.

Table 3-18 Top-Up Simulation Details – Field Description

Field	Description
Maturity Amount	Displays the proceeds due to the customer on maturity after taking into consideration the top-up amount.
Interest Rate	Displays the Net interest on the principal (Interest – Tax).
Principal	Displays the total principal of the CD.
Net Interest	Displays the interest net amount.
Top-up Amount	Displays the top-up amount.

Click the Interest Details link in the CD simulation details of the Certificate of Deposit Top Up screen.

The Interest Details screen is displayed.

The screen is successfully submitted for authorization.

3.5 CD Maintenances

You can maintain the CD account details in this section. A deposit with a fixed tenure or term is called as time deposit or Certificate of Deposit (CD).

This topic contains the following subtopics:

Create Certificate of Deposit Amount Block

You can block the CD amount. A Certificate of Deposit can be blocked for certain amount due to different reasons like collateral to an overdraft, funds provider account during sweep transactions, and so on. Also, the Bank might receive request from any authorized external agencies to block the CD amount.

View and Modify Amount Block

You can view or modify the already added block details using this screen.

Payout Modification

You can view or modify the payout instructions maintained during the CD account opening using this screen. Also, you can create new payout instruction, if no instructions are maintained for the CD account.

Account Modification

You can modify certain attributes of the CD. Also, the account description and interest rates. Based on customer's request or otherwise, you can change the account description or interest rates associated with the account.

• Certificate of Deposit Joint Holder Maintenance

Certificate of Deposit account can be owned by single holder or multiple owners. This screen can be used for modifying the deposit account's joint holder details. You can either add joint holders for the first time or modify the existing joint holder relationship using this screen.

Certificate of Deposit Beneficiary Details Update

You can modify the existing beneficiary details, add a new beneficiary, and delete the existing beneficiary details added to the CD account using this screen.

Customer Relationship Maintenance

You can maintain customer relationships for a Certificate of Deposit such that the primary ownership of the account remains single but the account holder is linked to relationships such as Guardian or Custodian using the **Customer Relationship Maintenance** screen.

3.5.1 Create Certificate of Deposit Amount Block

You can block the CD amount. A Certificate of Deposit can be blocked for certain amount due to different reasons like collateral to an overdraft, funds provider account during sweep transactions, and so on. Also, the Bank might receive request from any authorized external agencies to block the CD amount.

This screen is applicable only for IRA Deposits.

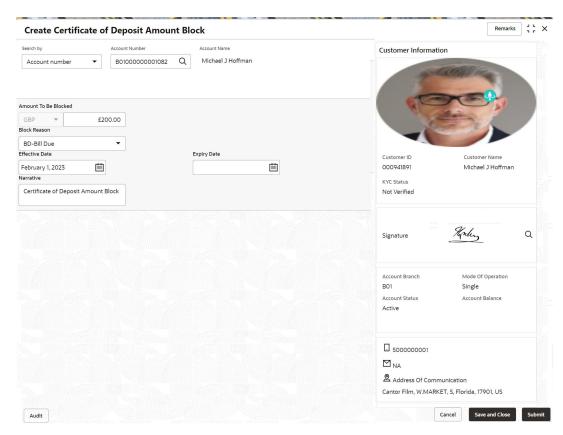

The fields marked as **Required** are mandatory.

To create amount block:

- On the Home screen, from the Certificate of Deposit Services mega menu, under Certificate of Deposits and Maintenance, click Create Amount Block, or specify Create Amount Block in the search icon bar and select the screen.
 - The Create Certificate of Deposit Amount Block screen is displayed.
- On the Create Certificate of Deposit Amount Block screen, click the Search icon or specify the account number in the Account Number field, and press Enter or Tab.
 - The details for the account entered are displayed.

Block Reason	Select reason for block from drop-down list.
Effective Date	Specify or select the effective date for the block. (i) Note This date cannot be less than current process date.
Expiry Date	Specify or select the expiry date for the block. (i) Note This date cannot be less than current process date and effective date.
Narrative	Specify the narration, if any for the block.

4. Click Submit.

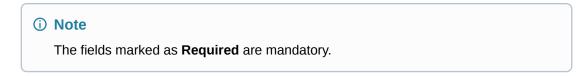

The screen is successfully submitted for authorization.

3.5.2 View and Modify Amount Block

You can view or modify the already added block details using this screen.

This screen is applicable only for IRA Deposits.

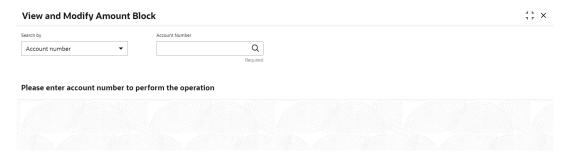

To view the amount block details:

 On the Home screen, from the Certificate of Deposit Services mega menu, under Certificate of Deposits and Maintenance, click View and Modify Amount Block, or specify View and Modify Amount Block in the search icon bar and select the screen.

The View and Modify Amount Block screen is displayed.

Figure 3-41 View and Modify Amount Block

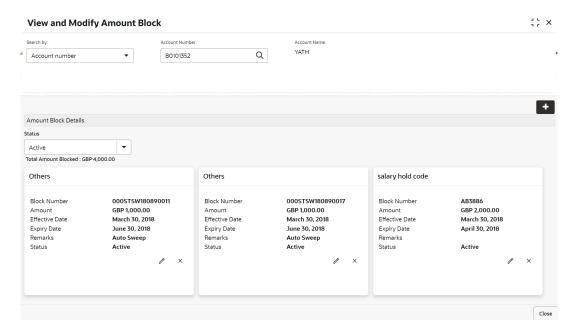

On the View and Modify Amount Block screen, click the Search icon or specify the account number in the Account Number field.

The Amount Block Details section is displayed.

Figure 3-42 View and Modify Amount Block Details

3. On the **Amount Block Details** section, view the block details. For more information on fields, refer to the field description table.

Table 3-36 View Amount Block Details - Field Description

Field	Description
Search By	Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.
	Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.
	A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.
	For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.
	 If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen.
Amount Block Details	This section displays the CD amount block details.
Total Amount Blocked	Displays the total amouont blocked on the CD account.

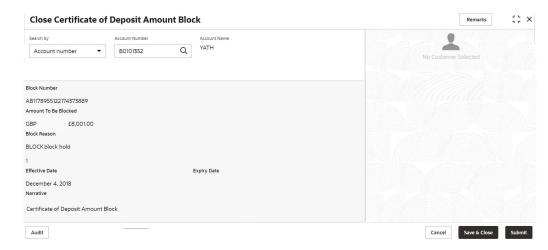

Table 3-36 (Cont.) View Amount Block Details - Field Description

Field	Description
<block reason=""></block>	Displays the block reason as the top of the widget.
Block Number	Displays the block number.
Amount	Displays the block amount along with the currency.
Blocked Reason	Displays the block reason along with code.
Effective Date	Displays the block effective date.
Expiry Date	Displays the block expiry date.
Remarks	Displays the block remarks.
Status	Displays the block status.

- You can add a CD amount block by clicking the Add icon. For more information, refer screen.
- You can edit a CD amount block details by clicking the Edit icon. For more information, refer Modify Amount Block.
- You can delete a CD amount block details by clicking the **Close** icon. The Close **Certificate of Deposit Amount Block** screen is displayed with the closed amount block details.

Click Submit.

The screen is successfully submitted for authorization.

3.5.5 Certificate of Deposit Joint Holder Maintenance

Certificate of Deposit account can be owned by single holder or multiple owners. This screen can be used for modifying the deposit account's joint holder details. You can either add joint holders for the first time or modify the existing joint holder relationship using this screen.

The fields marked as **Required** are mandatory.

A customer can be the sole or joint owner of a CD account. The joint accounts are accounts that are shared between two or more individuals. They can be operated either singly or jointly.

Note

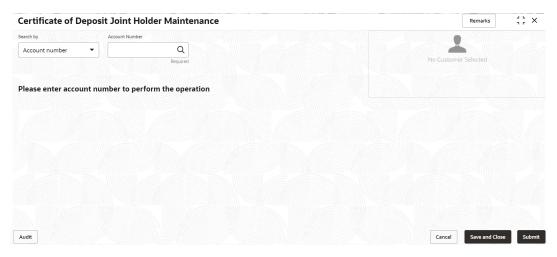

- If the user enters or chooses a minor account number, the system will show a
 notification indicating that the account holder is a minor and that joint holders
 cannot be added. Consequently, the user will be unable to take any further actions
 on the screen.
- When a user enters a major account number and attempts to add a minor as a
 joint holder, the system will show a notification indicating that a minor cannot be
 included as a joint account holder.

To maintain joint holder details:

 On the Home screen, from the Certificate of Deposit Services mega menu, under Certificate of Deposits, under Maintenance, click Joint Holder or specify Joint Holder in the search icon bar and select the screen.

The **Certificate of Deposit Joint Holder Maintenance** screen is displayed.

Figure 3-55 Certificate of Deposit Joint Holder Maintenance

Click the Search icon or specify the account number in the Account Number field, and press Enter or Tab.

The account holder details and mode of operation are displayed.

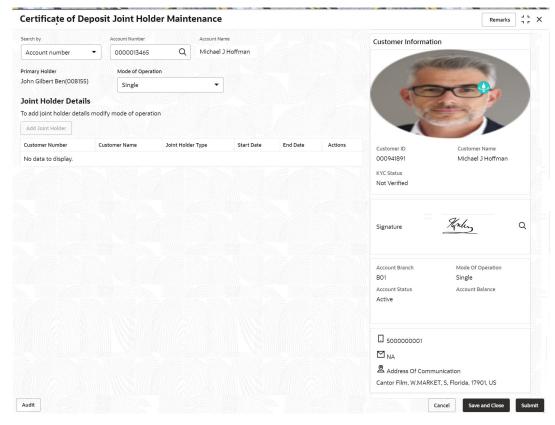

Figure 3-56 Certificate of Deposit Joint Holder Maintenance

You can view the account holder details of the selected Certificate of Deposit account number. For more information on fields, refer to the field description table.

Table 3-45 Certificate of Deposit Joint Holder Maintenance – Field Description

Field	Description
Search By	Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name. Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email. A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked. For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. (i) Note • The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number on which to perform a servicing operation. (i) Note • The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. • If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen.
Amount Name	Displays the name of the account holder for the selected account number.
Primary Holder	Displays the primary account holder's name.
Mode of Operation	Specify the mode of operation. The options are: Single JTWR - Joint Tenants with Right of Survivorship TIC - Tenants in Common TBE - Tenants by the Entirety Note The values in this filed are based on maintenance in the Account Operating Instruction Type, where the Category is set as Joint. But there is one exception for the value Single, which is pre-shipped in the routing hub configuration.

Table 3-45 (Cont.) Certificate of Deposit Joint Holder Maintenance – Field Description

Field	Description
Joint Holder Details	This section displays the existing joint holder details for a joint account. (i) Note You can perform the following actions in this section: • Add Joint Holder Details: For details on this action, refer Add Joint Holder. • Edit Joint Holder Details: For details on this action, refer Edit Joint Holder Details. • Delete Joint Holder Details: From the Actions field, click the Delete icon. A confirmation message is displayed that the action cannot be recovered. Click Delete to proceed with the deletion. • Convert Joint Account to Single Account: From the Mode of Operations field, select the Single option. A
	confirmation message is displayed. Click Confirm to proceed with the converstion.

Click Submit.

The screen is successfully submitted for authorization.

Maintain Joint Holder Details

You can add new joint holders, modify or delete the existing joint holders of CD account. You can also add, edit, or delete a joint holder of a CD account. Also, you can covert a joint holder account to single holder account and vice-versa.

Middle Name	Specify the beneficiary's middle name.
Last Name	Specify the beneficiary's last name.
Possession (%)	Specify the possession percentage to be given for the beneficiary.
Date of Birth	Select or specify the beneficiary's date of birth.

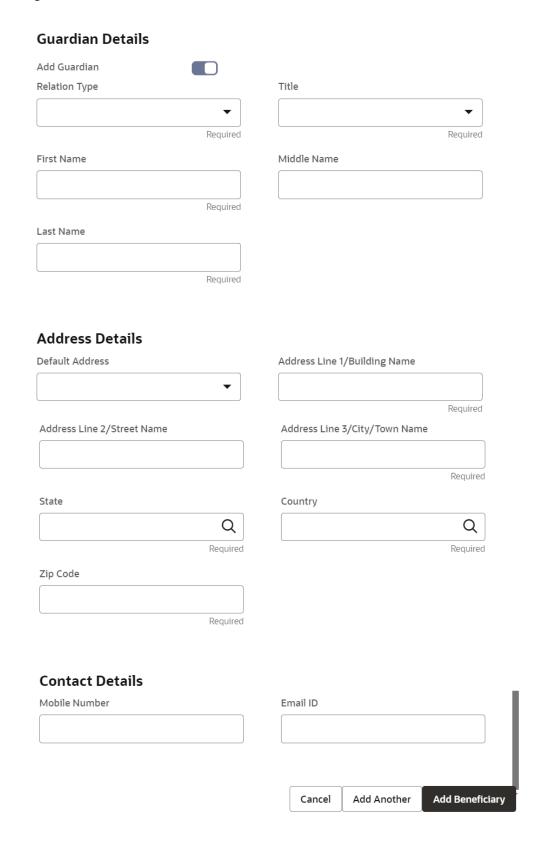

Table 3-48 (Cont.) Add Beneficiary Details – Field Description

Field	Description
Minor	Displays whether the added beneficiary is a minor based on the date of birth selected or specified.
	① Note
	The minor status will be derived based on the minor age limit maintained for the state (the state will be derived from the account's residential address).
	Find the below steps to configure minor age validation.
	a. Create a fact for values, State, and Age.
	 b. Create a rule for minor age validation with the required state and related age.
	IF
	((STATE==US)&&(AGE < 18))
	Output
	Section1 True
	c. Maintain a validation model with model code as VMMINORAGE and link the above rule.
	For more information, refer to the <i>Oracle Banking Common</i> Core User Guide to create Fact, Rule and Rule Group.
Address Details	This section displays the fields to capture the beneficiary's address.
Default Account Address	Switch to toggle ON to default the account address specified.
	Switch to toggle OFF to not to default the account address specified.
Address Line 1/Building Name	Specify the building of the beneficiary.
Address Line 2/Street Name	Specify the street of the beneficiary.
Address Line 3/City/Town Name	Specify the city or town of the beneficiary.
State	Specify the state of the beneficiary or click Search and select the state from the list of values.
Country	Country is defaulted based on the state selected and the user is allowed to change it.
Zip Code	Specify the zip code of the beneficiary.
Contact Details	This section displays the fields to capture the contact details.
Mobile Number	Specify the mobile number of the guardian.
Email ID	Specify the email ID number of the guardian.

• If the added beneficiary is a minor, its mandatory to add the guardian details. If required, you can also add gaurdian details for a major by switching to toggle **ON** from the **Add Gaurdian** field in the **Gaurdian Details** section

Figure 3-63 Guardian Details

For more information on fields, refer to the field description table.

Table 3-49 Guardian Details - Field Description

Field	Description
Add Guardian	Switch to toggle ON to add guardian details.
	Switch to toggle OFF to not to add the guardian details.
Relationship Type	Select the relationship type with the guardian.
Title	Select a title for the guardian.
First Name	Specify the guardian's first name.
Middle Name	Specify the guardian's middle name.
Last Name	Specify the guardian's last name.
Address Details	This section displays the fields to capture the guardian's address details.
Default Address	Select the default address for the guardian. The options are: — Beneficiary
	- Account
Address Line 1/Building Name	Specify the building of the guardian.
Address Line 2/Street Name	Specify the street of the guardian.
Address Line 3/City/Town Name	Specify the city or town of the guardian.
State	Specify the state of the guardian or click Search and select the state from the list of values.
Country	Country is defaulted based on the state selected and the user is allowed to change it.
Zip Code	Specify the zip code of the guardian.
Contact Details	This section displays the fields to capture the contact details.
Mobile Number	Specify the mobile number of the guardian.
Email ID	Specify the email ID number of the guardian.

Note

- The system defaults the customer's residential address, and personal details when the nominee details are defaulted from the customer.
- The system defaults the customer's residential address when the nominee or guardian address details are defaulted from the account.

3. Click Add Beneficiary.

To add another beneficiary, you can click **Add Another**.

The beneficiary details are saved and displayed in the **Certificate of Beneficiary Details Update** section.

4. Click Submit.

The screen is successfully submitted for authorization.

3.5.6.2 View Beneficiary Details

You can view the details of the beneficiary added to a CD account.

To view the beneficiary details:

In the Beneficiary Details section, click the Edit icon from the Actions field.
 The Beneficiary Details section is displayed.

Figure 3-64 View Beneficiary Details - Personal

2. You can view the required beneficiary details in the section displayed. For more information on fields, refer to the field description table.

Table 3-50 Beneficiary Details - Field Description

Field	Description
Personal Details	This section displays the personal details of the beneficiary.
Beneficiary Name	Displays the beneficiary name.
Date of Birth	Displays the beneficiary's date of birth.
Minor	Displays whether the added beneficiary is a minor.
Mobile Number	Displays the beneficiary's mobile number.
Email ID	Displays whether the email ID of the beneficiary.
Address	Displays the complete address of the beneficiary.

3. Click Close.

3.5.6.3 Edit Beneficiary Details

You can edit the beneficiary details that are already added to a CD account.

To edit a beneficiary:

- In the Beneficiary Details section, click the Edit icon from the Actions field. The **Edit Beneficiary** section is displayed.
- For information on fields and description, refer Add Beneficiary, as the fields in the Add Beneficiary section are same.
- Click Save.

3.5.7 Customer Relationship Maintenance

You can maintain customer relationships for a Certificate of Deposit such that the primary ownership of the account remains single but the account holder is linked to relationships such as Guardian or Custodian using the Customer Relationship Maintenance screen.

Note

The fields marked as **Required** are mandatory.

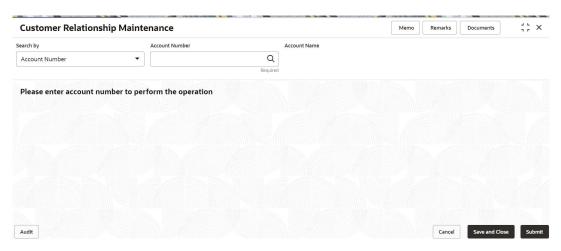

To maintain customer relationship:

On the Home screen, from the Certificate of Deposit Services mega menu, under Certificate of Deposits and Maintenances, click Customer Relationship Maintenance or specify Customer Relationship Maintenance in the search icon bar and select the screen.

The **Customer Relationship Maintenance** screen is displayed.

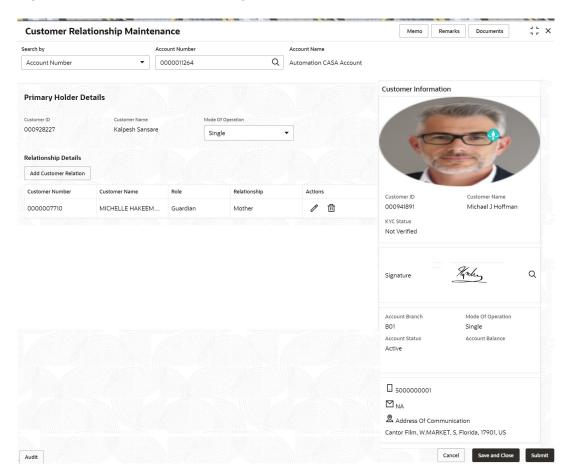

Figure 3-65 Customer Relationshio Maintenance

On the Customer Relationship Maintenance screen, click the Search icon or specify the Account Number and press the Tab or Enter key.

The Primary Holder Details and Relationship Details sections are displayed.

Figure 3-66 Customer Relationship Maintenance Details

Note

If there are no existing relations maintained for the account holder, then there are no details displayed in the **Realtionship Details** section. To add realtionship details, you need to click Add Customer Realtion.

You can maintain the required customer relationship details. For more information on fields, refer to the field description table.

Table 3-51 Customer Relationship Maintenance – Field Description

Field	Description
Search By	Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.
	Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.
	A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.
	For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation. The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen.
Primary Holder Details	This section displays the details of the primary account holder.
Customer ID	Displays the unique customer ID.
Customer Name	Displays the customer name of the certificate of deposit acocunt.
Mode of Operation	Select the mode of operation of the account. The options are: Operated by Gaurdian Operated by Custodian Single

Table 3-51 (Cont.) Customer Relationship Maintenance – Field Description

Field	Description
Relationship Details	This section displays the relationship details maintained for the account holder.
	Note To add relation details to a customer, click Add Customer Relation. For more information, refer Add Customer Relation.
Customer Number	Displays the customer number that was added for adding the relationship.
Customer Name	Displays the name of the customer linked to the customer ID.
Role	Displays the role of the relation added.
Relationship	Displays the relationship added for the account.
Actions	Displays the following actions that can be performed: : Click this icon, to edit the relationship details that were added for the customer. As you click this icon, a Edit Customer Relation section appears. : Click this icon, to delete the relationship details that were added for the customer.

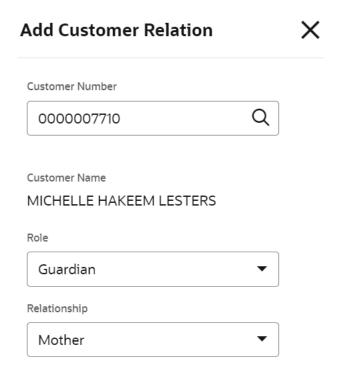

To add customer relation details:

a. In the Relationship Details section, click Add Customer Relation.

The Add Customer Relation section is displayed.

Figure 3-67 Add Customer Relation

b. In the **Add Customer Relation** section, you can maintain the required customer relation details. For more information on fields, refer to the field description table.

Table 3-52 Add Customer Relation – Field Description

Field	Description
Customer ID	Select or specify the customer ID for adding the relationship.
Customer Name	Displays the customer name for the selected customer ID.
Role	Select the role of the customer for maintaining the relationship details.
Relationship	Select the relationship with the customer.

c. Click Add.

The details are added and displayed in tabular format in the **Relationship Details** section. To add another customer relation to the customer, you can click **Add Another**.

Click Submit.

The screen is successfully submitted for authorization.

3.6 CD Inquiries

A deposit with a fixed tenure or term is called as time deposit or Certificate of Deposit (CD). This chapter deals with inquiries of a certificate of deposit.

This topic contains the following subtopics:

Transaction View and Reversal

You can view the certificate of deposit transaction details and reverse the top-up and redemption related transactions using the **Transaction View and Reversal** screen.

Certificate

You can specify a CD account number and generate the deposit certificate and displayed along with an option to email the PDF to the customer's registered email address using the **Certificate** screen. You can also perform this activity based on request from the deposit holder.

Interest Paid Out Details

You can inquire about the interest paid out details for a deposit account with a given period.

3.6.1 Transaction View and Reversal

You can view the certificate of deposit transaction details and reverse the top-up and redemption related transactions using the **Transaction View and Reversal** screen.

The fields marked as **Required** are mandatory.

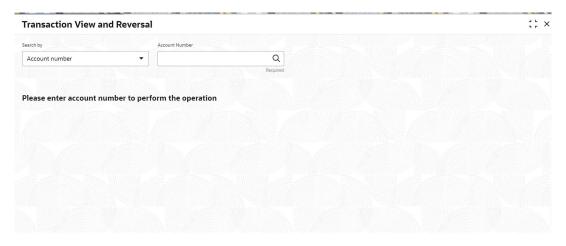

To view or perfrom transaction reversal:

 On the Home, from the Retail Deposit Services mega menu, under Term Deposits and Inquiries, click Transaction View and Reversal or specify Transaction View and Reversal in the search icon bar and select the screen.

The Transaction View and Reversal screen is displayed.

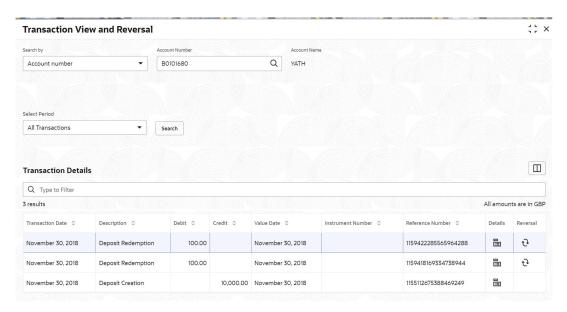

Figure 3-68 Transaction View and Reversal

- On the Transaction View and Reversal screen, click the Search icon or specify the account number in the Account Number field, and press the Tab or Enter.
- 3. Select the required details and click **Fetch**.

The **Transactions Details** section is displayed.

Figure 3-69 Transaction Details of the Account

For more information on fields, refer to the field description table.

Table 3-53 Transaction View and Reversal – Field Description

Field	Description
Search By	Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name. Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email. A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find
	an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.
	For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.
	 Note: The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen.
Select Period	The date criteria are based on which the entries are to be displayed. Below are the options:
	 All Transactions Date Range Current Month Current Month Plus Previous Month Current Month Plus Previous 3 Months Current Month Plus Previous 6 Months
	 Note If the All Transactions option is selected, it displays all the transaction details. This is the default option. If the Date Range option is selected, then you need to select the from and to date from the fields displayed adjacent. If the Current Month, Current Month Plus Previous Month, Current Month Plus Previous 3 Months, or Current Month Plus Previous 6 Months option is selected, then the date range is accordingly defaulted and not enabled.
Transaction Details	This section displays the transaction details of the TD account. By default, all the transactions are displayed.

Table 3-53 (Cont.) Transaction View and Reversal – Field Description

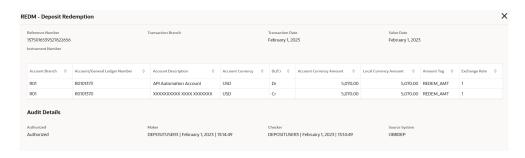

Field	Description
Type to Filter	A pattern filter will get applied to all the fields in the output grid. Whenever a match is found, the rows will become a part of the revised output.
Currency	Displays the currency for the transactions.
Number of Results	Displays the number of results available for the transactions.
Transaction Date	Displays the transaction date.
Description	Displays the description of the transaction.
Debit	Displays the debited amount in the transaction.
Credit	Displays the credited amount in the transaction.
Value Date	Displays the value date of the transaction.
Instrument Number	Displays the instrument number of the transaction.
Reference Number	Displays the reference number of the transaction.
Details	Displays the Details icon to view the account transaction details. For more information, refer <u>Transaction Details</u> .
Reversal	Displays the Reverse icon to reverse the transaction. For more information, refer Transaction Reversal. i Note This icon is displayed only for redemption and top-up related events. This icon is not displayed, if the transaction is already reversed.

To view transaction details:

a. Click the **Details** icon from the **Details** field.

The transaction and audit details are displayed in respective sections.

Figure 3-70 Transaction Details

For more information on fields, refer to the field description table.

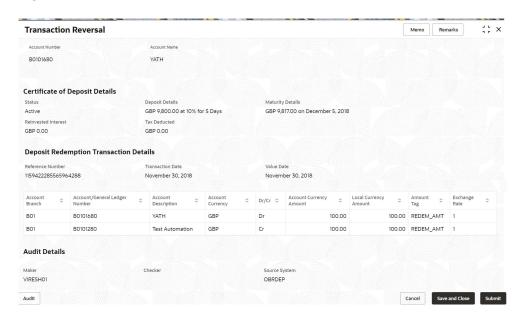

Table 3-54 Transaction and Audit Details - Field Description

Field	Description
Reference Number	Displays the unqiue reference number of the transaction.
Transaction Branch	Displays the branch from which the transaction was initiated.
Transaction Date	Displays the actual date of the transaction.
Value Date	Displays the value date of the transaction.
Instrument Number	Displays the instrument number related to the transaction.
Account Branch	Displays the branch of the account or GL.
Account/General Ledger Number	Displays the account or GL number of the transaction.
Account Description	Displays the name of the account or GL description.
Account Currency	Displays the currency of the account.
Dr/Cr	Displays whether the transaction is debit or credit.
Account Currency Amount	Displays the amount in account currency.
Local Currency Amount	Displays the amount in local currency.
Amount Tag	Display the amount tag for each leg of the transaction.
Exchange Rate	Displays the exchange rate of the transaction.
Audit Details	This section displays the audit details of the transaction.
Authorized	Displays the status of the authorization of the transaction.
Maker	Displays the maker name of the transaction.
Checker	Displays the checker name of the transaction.
Source System	Displays the name of the source system related to the transaction.

- **b.** Click the **Close** icon, to exit the section.
- To perform transaction reserval:
 - a. Click the Reverse icon from the Reversal field.

The **Transaction Reversal** screen is displayed.

Figure 3-71 Transaction Reversal

For more information on fields, refer to the field description table.

Table 3-55 Transaction Reversal - Field Description

Field	Description
Account Number	Displays the deposit account number of the transaction.
Account Name	Displays the account name for the account number displayed.
Certificate of Deposit Details	This section displays the details of the certificate of deposit.
Status	Displays the status of the deposit account.
Deposit Details	Displays the details of the certificate of deposit account.
Maturity Details	Displays the current maturity details of the account.
Reinvested Interest	Displays the reinvested interest amount along with currency.
Tax Deducted	Displays the tax deducted amount along with currency.
Deposit Redemption Transaction Details	This section displays the redemtpion transaction details of the deposit.
Reference Number	Displays the unquee reference number for the redemption transaction.
Transaction Date	Displays the transaction date of the redemption.
Value Date	Displays the value date of the redemption.
Account Branch	Displays the branch where the redepemtion transaction was performed.
Account/General Ledger Number	Displays the account or general ledger number related to the transaction.
Account Description	Displays the description for the account.
Account Currency	Displays the account currency for the transaction.
Dr/Cr	Displays the type of the transaction.
Account Currency Amount	Displays the amount in account currency.
Local Currency Amount	Displays the amount in local currency.
Amount Tag	Displays the amount tag for the transaction.
Exchange Rate	Displays the exchange rate of interest.
Audit Details	This section displays audit details of the transaction.
Maker	Displays the maker name of the transaction.
Checker	Displays the checker name of the transaction.
Source System	Displays the transaction's source system.

b. Click Submit.

The transaction is submitted successfully for reversal requrest.

4. Click Submit.

The screen is successfully submitted for authorization.

3.6.2 Certificate

You can specify a CD account number and generate the deposit certificate and displayed along with an option to email the PDF to the customer's registered email address using the **Certificate** screen. You can also perform this activity based on request from the deposit holder.

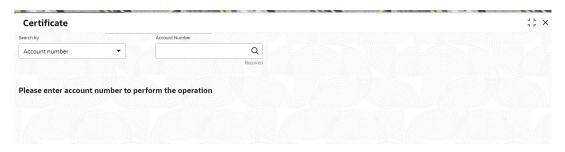

The fields marked as **Required** are mandatory.

To generate and view the deposit certificate:

 On the Home screen, from the Certificate of Deposit Services mega menu, under Certificate of Deposits and Inquiries, click Certificate or specify Certificate in the search icon bar and select the screen.

The Certificate screen is displayed.

Figure 3-72 Certificate

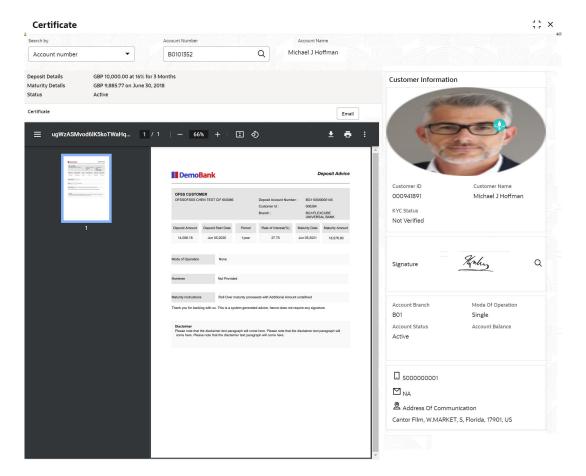

On the Certificate screen, click the Search icon or specify the Account Number and press the Tab or Enter key.

The deposit summary and certificate is displayed.

Figure 3-73 CD Certificate

3. You can view the certificate. For more information on fields, refer to the field description table.

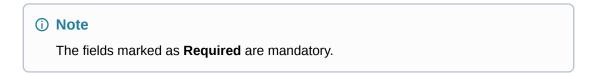

Table 3-56 Certificate – Field Description

Field	Description
Search By	Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name. Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email. A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked. For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.
	chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.
Deposit Details	Displays the deposit currency, amount, interest rate percentage, and tenure.
Maturity Details	Displays the maturity currency, amount, and date.
Status	Displays the current status of the account.
Certificate	This section displays the deposit certificate. (i) Note If required, user can send the certificate through email by selecting the Email option. When you click the Email button, a pop-up message will appear to verify the Email ID. The primary customer's registered email address is set as the default and shown on the screen. After the user verifies the email address, a message will be sent, and a notification indicating success or failure will appear in the top right corner of the screen to inform about the email status.

3.6.3 Interest Paid Out Details

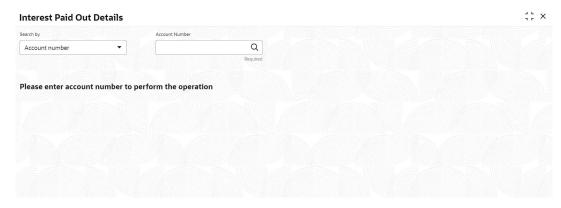

You can inquire about the interest paid out details for a deposit account with a given period.

 On the Homepage, from the Certificate of Deposit Services mega menu, click Interest Paid Out Details under Inquiries, or specify Interest Paid Out Details in the search icon bar and select the screen.

The Interest Paid Out Details screen is displayed.

Figure 3-74 Interest Paid Out Details

2. On the Interest Paid Out Details screen, click the Search icon or specify the account number in the Account Number field, and press Enter or Tab.

The system displays interest transaction details for the defaulted start and end date. The Interest transaction details are segregated for each auto renewal period in the lifecycle of the deposit in case any renewal happens for the given date range.

Field	Description		
Search By	Users can search for an account number by using any of the available search criteria. The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name. Other search options available in the Search by field are Customer		
	ID, SSN, Mobile Number, and Email. A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.		
	For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.		
	 Note: The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN. If user selects an account with closed status, then an appropriate message is displayed. The user will not be allowed to proceed with the required action in the screen. 		
Statement Period	This section displays the fields for selecting date range for generating the statement.		
	Note To generate statement for the account, you can select or specify the date range, and click Generate Statement .		
Start Date	Select or specify the start date for generating the statement.		
End Date	Select or specify the end date for generating the statement. (i) Note This field is enabled, as you select or specify a value in the Start Date field.		
Account Statement	This section displays the generated account statement.		
<status></status>	Displays the current status of the statement.		
Statement Period	Displays the period or date range of the statement.		
Statement Generated on	Displays the date on which the statement is generated.		

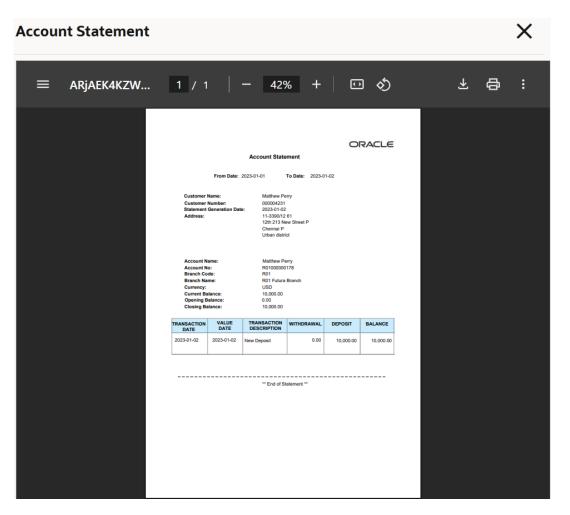

Table 3-58 (Cont.) Adhoc Account Statement - Field Description

Field	Description
<action></action>	Displays the following icons: : Click to view the generated statement. : Click to send the statement through preferred Email. A confirmation message is displayed for confirming the Email ID. Click Send, to proceed.

As you click , the following statement is displayed. If requried, you can download the statement.

Figure 3-78 Generated Statement

3.8 Access Restriction

The access restriction feature ensures that only authorized users can manage certain groups of customer accounts, like High Net Worth Individual (HNI) accounts. Access restrictions are applied at all stages of branch service transactions, including initiation, approval, hand-off, retries, and any multi-level authorization processes.

At the initiation stage, when the customer enters the account number, the system checks for access restrictions and shows an error if the user is not allowed access. For approval and hand-off retries, when the authorizer opens the approval screen, the system will again verify the access restrictions.

The Access Restriction can be enabled using the **User Creation** and **Party Creation** screens.

(i) Note

- Access restriction validation occurs after other checks, such as the account status (Open or Closed) and any staff restrictions.
- In the Customer Panel and Deposit 360 screen, joint holder details are restricted from view if the user does not have access to the joint holder's access group of the account.

Below is the use case:

Table 3-59 Access Restrictions Use Case

Customer	Customer Access Group	User Access	Branch Servicing Operations Allowed/Restricted?
000001	HNI	-	Restricted
000001	HNI	HNI	Allowed
000001	HNI	CELEBRITIES	Restricted
000002	-	-	Allowed
000002	-	HNI	Allowed

3.9 Death Claim for Certificate of Deposits

This topic describes the processing of death claim in CDs.

On expiry of a customer, the account proceeds/claims can be transferred to the descendants or beneficiaries of customers as per process.

When a customer expires, and the party application notifies that the customer status is updated to 'Deceased' all the associated deposits of the customer (both single and jointly held deposits) will be updated to status Blocked. Once the branch user receives the requisite documents (beneficiary details or Probate court order) the user will operationally ensure to unblock the deposit - transfer the proceeds to the beneficiary and then proceed to close the account.

(i) Note

The unblocking of account and transfer of proceeds if any to the beneficiary based on the probate court order/beneficiary details in account and subsequently closing the account of the deceased is an operational process.

3.10 Unlcaimed processing for Certificate of Deposits

This topic describes the processing of escheatment in CDs.

The escheatment laws differ by state in United States. The escheatment process will always be automatic.

The deposit is closed post the escheatment processing and the unclaimed funds are transferred to the state.

For a term deposit:

- The deposit should be matured or auto-renewed at least 'Once' before considering the same for Escheatment processing.
- Only non-financial transactions to be considered while determining escheatment periods (non-financial transactions at Customer level) for the deposits, which is 'Last Contact Date'.

(i) Note

The deposit will be considered for escheatment based on the customer last contact date with the bank.

Note

For more information about the configurations, refer to the sections *State Group Parameters* and *State Code Mapping* in the *Account Configurations User Guide*.

3.11 Certificate of Deposits Compounding

This topic describes the compounding details for CDs.

The system has been enhanced to support interest compound capability for term deposits, the system supports the compounding on a frequency basis as daily, monthly, quarterly, and half yearly.

3.12 Annual Percentage Yield (APY) for Certificate of Deposits

This topic describes the processing of annual percentage yield in CDs.

A yearly compounded interest rate is represented by the Annual Percentage Yield (APY). Banks publish APY figures for reasonable, single-point comparisons of different product offerings with varying compounding schedules in the United States.

For certificate of deposits, the Annual Percentage Yield (APY) is calculated using the same formula as for a savings account.

APY = $(1 + \text{Interest Rate} \div \text{The number of Compounding in a year}) ^ (Number of compounding in a year) - 1.$

3.13 Annual Percentage Yield Earned (APYE) for Certificate of Deposits

This topic describes the processing of annual percentage yield earned in CDs.

Banks publishes APYE figures in the periodic statements generated for the customer.

For certificate of deposits, the Annual Percentage Yield (APYE) is calculated using the same formula as for a savings account.

Formula: $100 [(1 + (Dividends earned _Balance)) 365]$ days in period - 1] = Balance = the average daily balance in the account for the period

Dividends earned = the actual amount of dividends earned for the period

Days in period = the actual number of days over which the dividends disclosed on the statement were earned

Example: Calculate the APYE for a statement period of 31 days for an account with an average daily balance of \$1,436.61 and dividends earned during the period of \$3.36:

 $100 [(1 + (3.36 \ 1436.61))^{365 \ 31) - 1] = 2.78875\%$

Rounded from the 3rd position, APY Earned = 2.79%

3.14 Interest Transaction History Inquiry for Certificate of Deposits

This topic describes the processing of interest transaction history inquiry for CDs.

During a particular period, this inquiry service provides information on the interest applied to a certificate of deposit. The details that can be inquired include the interest amount, the date on which the interest was applied, the current interest rate of the deposit, payout mode, and payout account details such as the account number if the payout was made to a checking or savings account.

3.15 Back-up Withholding Tax in Certificate of Deposits

This topic describes the processing of back-up withholding tax in Certificate of Deposits.

If a bank customer is a taxpayer receiving certain types of income payments, the IRS requires the payer of these payments to report them on an information return. The person or business (bank) paying the customer doesn't generally withhold taxes from these types of payments, as it is assumed the customer will report and pay taxes on this income when they file their federal income tax return.

There are situations when the bank is required to withhold at the current federal and state rate percent. This federal or state rate tax is taken from any future payments to ensure the IRS receives the tax due on this income. The situations are as below:

- Under the BWH-B program because the customer failed to provide a correct taxpayer identification number (TIN) to the bank for reporting on the required information return.
- Under the BWH-C program because the customer failed to report or underreported interest and dividend income they received on their federal income tax return.

 Customer wants the bank to voluntarily deduct the backup withholding tax on interest payments. The rate of deduction can be any value as required by the bank customer.

(i) Note

The marking of the related accounts of a customer as applicable for BWH Tax, will be done basis an event from *Oracle Banking Party Services*. Wherein when a customer is identified as applicable for BWH Tax/ the customer has opted for voluntary deduction of BWH Tax, then it is expected that Oracle Banking Party Services will publish an event which will be consumed by *Oracle Banking Accounts* for marking and deducting the BWH Tax for the customer.

The new System Data Elements as TAX_APPLICABLE, and VOLUNTARY_TAX_RATE are introduced and can be used in defining the tax formula in interest and charges module.

Note

For more details, refer to the Interest and Charges User Guide.

The deposit service has been enhanced to inculde the tax applicability and voluntary tax rate fields. Basis this fields, the Backup with holding tax (federal/state or voluntary) can be calcualted and applied for an account.

3.16 Grace Days for Certificate of Deposits

This topic describes the details of grace days for CDs.

The grace days will be applicable post the maturity of the deposit for the customer to decide on what the customer wants to do with the certificate of deposit.

- A configuration of the grace days for deposits at the product level, which will enable the user to define the grace days is available.
- The grace days will be applicable only for deposits with maturity instructions as autorenewal.
- For an auto-renewal deposit post the maturity of the deposit, the user will have a grace days (as per the configured no. of days) to perform the following actions:
 - Choose to close the deposit without incurring a penalty A penalty is not incurred when the user closes the deposit during the grace days.
 - Choose to top-up the deposit amount Top-up is allowed only during the grace days.

3.17 FDIC Modernization in Oracle Banking Retail Accounts

This topic describes the processing of FDIC Modernization in Certificate of Deposits.

The FDIC (Federal Deposit Insurance Corporation) protects the depositors of insured depository institutions (IDIs) against the loss of their deposits due to an IDI failure (up to the applicable insurance limit). The FDIC pays deposit insurance upon the failure of an IDI. In paying deposit insurance, the FDIC insures the balance of each depositor's accounts, dollar-for-dollar, including principal and any accrued interest, up to the applicable insurance limit. The basic amount of FDIC deposit insurance coverage provided to depositors of an IDI is referred

to as the Standard Maximum Deposit Insurance Amount ("SMDIA"). At present, the SMDIA is \$250,000.

Following the failure of an IDI, the FDIC as receiver will liquidate the institution's assets for the benefit of the institution's creditors. Through the FDIC's payment of deposit insurance, the depositors will recover their insured funds (i.e., funds up to the insurance limit) in full.

An identifier at the bank level is introduced to determine if the bank is marked for insolvency proceedings. Also, the hold reason can be selected and set at bank level for applying the provisional holds.

A new configuration screen is available to maintain the balance threshold and hold percentages across business products basis which the holds are calculated and applied as part of the insovency batch processing.

3.18 Prior Maturity Notices in Deposits

This topic describes the details of prior maturity notices in depositss.

Existing Notice days configuration at the business product level will be used to configure the prior days for notice generation. Notice generation will be applicable for both close-on-maturity and auto-renewal deposits. Basis the configuration, the notice generation will happen 'x' days before the maturity date of the deposit.

The static data for the maturity notices is listed below:

Table 3-60 Factory Shipped list of Facts

Domain	Category	Event	Facts	Fact Description
OBRDEP	NOTICES	TD/CD Maturity	F_CUST_TYPE	Account Customer Type

OBRDEP	NOTICES	TD/CD Maturity	F_APY	Transaction Account Annual Percentage Yield

3.19 OFAC Processing in Certificate of Deposits

This topic describes the processing of OFAC in CDs.

If a customer is identified as OFAC sanction hit - the OFAC data will report a match and the bank needs to block all the customer deposits for both transactions and modifications.

When an OFAC data match is reported for a customer or when an existing OFAC customer is removed from the sanction list in party management. A real-time block will be placed on the customer and the deposits restricting the customer to perform transactions/non-financial modifications.

3.20 Escheatment based on Last Contact Date in Certificate of Deposits

This topic describes the escheatment based on last contact date in certificate of deposits.

Similar to savings and checking account, the last contact date for certificate of deposit will be updated basis the last customer activity date if the bank level flag of consider customer activity for dormancy is checked. The escheatment date for the deposit is calculated based on this last contact date.

3.21 Business Events in Oracle Banking Retail Deposits

This topic describes the processing of business events in online for Oracle Banking Retail Deposits.

The System has the capability to generate events basis customer initiated or system-initiated actions. The system generates these events related to a customer and their accounts when activities or actions related to the customer or accounts take place that are useful for a service interaction. Some of these generated events are also important to be communicated to customers in a timely manner as per regulations.

The system has the capability to generate and handover the event with the required details to an external system through Event Delivery Platform (EDP) for their consumption and the external system can use the data handed over for any purpose as deemed necessary. For example, the external system can use the data for communicating the customer of the event with necessary details.

The following business events is available as follows:

- Create Deposit
- Change in maturity instructions for the deposit account
- Change of payout instructions
- Change in special condition for interest rate
- Topup Add funds to deposit principal
- Partial/ Full redemption of the deposit.

The static data is factory shipped as part of this release as below.

When the event happens and passes the underlying rule, the system will publish the event with necessary facts (Data) as shown in the table for the multiple third party systems to consume. A single event can be published to multiple consumers.

(i) Note

Facts and Rules are the key elements for generating the Business Events. Banks can configure the Facts and Rules, with the naming convention specified in the below tables respectively.

Payout Modification	DSR_FA_TDPOMN_SAVE	Initiation	Initiate the payout modification.

Table C-2 (Cont.) Functional Activity Codes for Certificate of Deposit Servicing Screens

Screen Name/API Name	Functional Activity Code	Action	Description
Payout Modification	DSR_FA_TDPOMN_AUTH	Authorization	Approve or Reject the payout modification request.
Account Modification	DSR_FA_TDACMN_SAVE	Initiation	Initiate the account modification.
Account Modification	DSR_FA_TDACMN_AUTH	Authorization	Approve or Reject the account modification.
Joint Holder	DSR_FA_UPJHTD_SAVE	Initiation	Initiate the Joint Holder maintenance.
Joint Holder	DSR_FA_UPJHTD_AUTH	Authorization	Approve or Reject the joint holder maintenance.
Beneficiary	DSR_FA_UPNMTD_SAVE	Initiation	Initiate the beneficiary details update.
Beneficiary	DSR_FA_UPNMTD_AUTH	Authorization	Approve or Reject the beneficiary details update request.
Customer Relationship Maintenance	DSR_FA_TDCURL_SAVE	Initiation	Initiate the customer relationship maintenance update.
Customer Relationship Maintenance	DSR_FA_TDCURL_AUTH	Authorization	Approve or Reject the customer relationship maintenance update.
Account Transactions View	DSR_FA_TDACTN_VIEW	Query Details	View deposit account transactions.
Reverse Transaction	DSR_FA_TDTRNREVR_SAVE	Initiation	Initiate deposit transaction reversal.
Reverse Transaction	DSR_FA_TDTRNREVR_AUTH	Authorization	Approve or Reject the deposit transaction reversal request.
Certificate	DSR_FA_TDCERT_VIEW	Query Details	View the deposit certificate.
Interest Paid Out Details	DSR_FA_TDINPO_VIEW	Query Details	View deposit interest paid out details.
Adhoc Account Statement	DSR_FA_TDADST_VIEW	Query Details	View the adhoc account statement for deposit.
