Purpose

This guide is designed to help you quickly get acquainted with the queries, queues and transactions supported in Oracle® Banking Virtual Account Management Cloud Service.

Audience

This guide is intended for Back Office Data Entry Clerk, Back Office Managers/Officers, Product Managers, End of Day Operators, and Financial Controller users.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve.

Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related Resources

The related documents are as follows:

- Oracle Banking Security Management System User Guide
- Oracle Banking Common Core User Guide
- Oracle Banking Getting Started User Guide
- Overview User Guide
- Configuration User Guide

Conventions

The following text conventions are used in this document:

Convention	Meaning Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.					
boldface						
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.					
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.					

Screenshot Disclaimer

Personal information used in the interface or documents are dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of acronyms and abbreviations that are used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Abbreviation	Description
DDA	Demographic Data Access
ECA	External Customer Account

Basic Actions

The basic actions performed in the screens are as follows:

Table 2 Basic Actions

Actions	Description
New	 Click New to add a new record. The system displays a new record to specify the required data. The fields marked with Required are mandatory. This button is displayed only for the records that are already created.
Save	Click Save to save the details entered or selected in the screen.
Unlock	 Click Unlock to update the details of an existing record. The system displays an existing record in editable mode. This button is displayed only for the records that are already created.
Authorize	 Click Authorize to authorize the record created. A maker of the screen is not allowed to authorize the same. Only a checker can authorize a record. This button is displayed only for the already created records. For more information on the process, refer Authorization Process.
Approve	Click Approve to approve the initiated record. This button is displayed once you click Authorize.
Reject	Click Reject to reject the initiated record. This button is displayed once you click Authorize.
Audit	 Click Audit to view the maker details, checker details of the particular record. This button is displayed only for the records that are already created.
Close	Click Close to close a record. This action is available only when a record is created.
Confirm	Click Confirm to confirm the action performed.
Cancel	Click Cancel to cancel the action performed.
Compare	 Click Compare to view the comparison through the field values of old record and the current record. This button is displayed in the widget once you click Authorize.
View	 Click View to view the details in a particular modification stage. This button is displayed in the widget once you click Authorize.
View Difference only	 Click View Difference only to view a comparison through the field element values of old record and the current record, which has undergone changes. This button is displayed once you click Compare.
Expand All	 Click Expand All to expand and view all the details in the sections. This button is displayed once you click Compare.
Collapse All	Click Collapse All to hide the details in the sections. This button is displayed once you click Compare.
ОК	Click OK to confirm the details in the screen.

Symbols and Icons

1 Introduction

The transaction is a process of money transfer, typically for corporates by banks. It includes banking products, payments, international trade and other services. Every day there are more than several billions of transactions are made around the world. It is an extraordinary amount of money that is transferred from one account to another.

2 Transactions

This topic provides the information about the Transactions related maintenances.

This topic contains the following subtopics:

- Amount Block
 This topic provides the information about the Amount Block.
- Internal Transfer This topic provides information about the Internal Transfer.
- Journal Online This topic provides information about the Journal Online.
- Release Uncollected Amount This topic provides the information about the Release Uncollected Amount.

2.1 Amount Block

This topic provides the information about the Amount Block.

Amount block is used to block a specified amount for a virtual account. When an amount is blocked for a virtual account, the available balance for transaction is the current balance minus the defined amount block.

For example, If the total amount in the account is \$10,000 and the amount block is \$1,000, the available balance for transaction is \$9,000.

This topic contains the following subtopics:

Create Amount Block

This topic describes the systematic instructions to create an amount block for a virtual account.

• View Amount Block This topic describes the systematic instructions to view the list of amount blocks for a virtual account.

2.1.1 Create Amount Block

This topic describes the systematic instructions to create an amount block for a virtual account.

Specify User ID and Password, and login to Home screen.

- On Home screen, click Virtual Account Management. Under Virtual Account Management, click Transactions.
- 2. Under Transactions, click Amount Block. Under Amount Block, click Create Amount Block.

The Create Amount Block screen displays.

Figure 2-1 Create Amount Block

3. Specify the fields on **Create Amount Block** screen.

For more information on fields, refer to the field description table.

Table 2-1 Create Amount Block – Field Description

Field	Description		
Effective Date	Select a start date for the amount block from the drop-down calendar.		
Expiry Date	Select an expiry date for the amount block from the drop-down calendar.		
Block Type	Select a block type from the drop-down list.		
Reference Number	The system generates a reference number.		
Source Code	Click Search to view and select the required source code.		
Source Reference Number	Specify the system generates a default reference number.		
Branch	Displays the branch number.		
Skip DDA Entries	If enabled, indicates to skip underlying real account block.		

4. Click Add icon to add a row and specify the required details.

The **Amount Block Details** screen displays. For more information on fields, refer to the field description table.

Table 2-2 Amount Block Details – Field Description

Field	Description
Account Number	Click Search icon to view and select the account number.
Account Branch	Based on the Account Number selected, the information is auto- populated.
Block Currency	Click Search icon to view and select a currency.
Requested Amount in Block Currency	Specify an amount for the blocked currency.

Field	Description	
Account Currency	Based on the Account Number selected, the information is autopopulated.	
Requested Amount in Account Currency	Specify the requested amount block.	
Released Amount in Block Currency	The system generates the release amount.	
Outstanding Amount in Block Currency	The system generates the outstanding amount.	
ECA System Reference Number	Displays the ECA system reference number details.	
Real Account Number	The system generates the real account number.	
Real Account Branch	The system generates the real account branch.	
Real Account Currency	The system generates the real account currency.	
Real Account Amount	The system generates the real account amount.	
Real Account Exchange Rate	The system generates the real account exchange rate.	
Remarks	Specify additional details of the amount block.	

Table 2-2 (Cont.) Amount Block Details – Field Description

- 5. Click **Delete** icon to delete the selected row.
- 6. Click **Save** to save the details.

The user can view the configured amount block in the View Amount Block.

7. Click **Cancel** to close the details without saving.

2.1.2 View Amount Block

This topic describes the systematic instructions to view the list of amount blocks for a virtual account.

The user can block an amount using the Create Amount Block.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Virtual Account Management. Under Virtual Account Management, click Transactions.
- 2. Under Transactions, click Amount Block. Under Amount Block, click View Amount Block.

The View Amount Block screen displays.

Transaction Status	Displays the transaction status of the record. The options are: • Active • Expired • Released • Pending

2.2 Internal Transfer

This topic provides information about the Internal Transfer.

The internal transfer is used to transfer funds from one virtual account to another virtual account that are mapped to same real account of the same customer. Internal transfers are processed immediately so that, the funds become available in the receiving account straight away.

This topic contains the following subtopics:

Create Internal Transfer

This topic describes the systematic instructions to configure internal transfer from one virtual account to another within the structure mapped to the same account of the customer.

View Internal Transfer

This topic describes the systematic instructions to view the list of configured internal transfer details for a customer.

2.2.1 Create Internal Transfer

This topic describes the systematic instructions to configure internal transfer from one virtual account to another within the structure mapped to the same account of the customer.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Virtual Account Management. Under Virtual Account Management, click Transactions.
- 2. Under Transactions, click Internal Transfer. Under Internal Transfer, click Create Internal Transfer.

The Create Internal Transfer screen displays.

Create Internal Transfer			45 -

Figure 2-3 Create Internal Transfer

3. Specify the fields on Create Internal Transfer screen.

For more information on fields, refer to the field description table.

Table 2-4 Create Internal Transfer – Field Description

Field	Description
Booking Reference Number	The system generates the booking reference number.
Booking Date	By default, the application date is selected as the booking date.
Value Date	Click Calendar to select a value date from the drop-down calendar.

Field	Description
Source Code	Click Search icon to view and select the source code.
Source Reference Number	Specify the source reference number.
Customer Number	Click Search icon to view and select the customer number.
Real Account Number	Displays the real account number associated with the selected virtual account number. Note: The information gets populated based on the selection of Virtual Account Number in Transaction Details section.
Real Account Branch	Displays the real account branch associated with the Real Account Number .
Original Reference Number	The system generates the original reference number.
Transaction Details	The below fields describes about the transaction details section.
Virtual Account Number	Click Search icon to view and select the virtual account number for the transaction.
Currency	Displays the currency of the selected Virtual Account Number.
Amount	Specify the amount.
Transaction Code	Click Search icon to view and select the transaction code. To create a new transaction code, refer to Transaction Code in the Oracle Banking Common Core User Guide .
Debit/Credit Indicator	Select one of the options to indicate if the transaction is debit/credit.
Offset Details	The below fields describes about the offset details section.
Virtual Account Number	Click Search icon to view and select the virtual account number. The list of virtual accounts are displayed based on the Virtual Account selected in Transaction details section and are linked to the same real account. The offset Virtual account will always be of the same currency as that of the Virtual account selected in Transaction details section.
Currency	Displays the currency of the selected Virtual Account Number.
Amount	The system populates the amount entered in the Transaction Details .
Transaction Code	Click Search icon to view and select the transaction code.
Debit/Credit Indicator	Select one of the options to indicate if the transaction is debit/credit. If the Transaction Details is selected as Debit, the Offset Details is automatically selected as Credit. As both cannot be debit/credit.
Others	The below field describes about the others section.
Remarks	Specify the additional information about the internal transfer fund.

Table 2-4 (Cont.) Create Internal Transfer – Field Description

4. Click **Save** to save the details.

The user can view the configured internal transfer details in the View Internal Transfer.

5. Click Cancel to close the details without saving.

2.2.2 View Internal Transfer

This topic describes the systematic instructions to view the list of configured internal transfer details for a customer.

The user can perform an internal transfer using the Create Internal Transfer.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Virtual Account Management. Under Virtual Account Management, click Transactions.
- 2. Under Transactions, click Internal Transfer. Under Internal Transfer, click View Internal Transfer.

The View Internal Transfer screen displays.

emarks				
			Cancel	nfirm

- 6. Specify the remarks in the **Remarks** field.
- 7. Click **Confirm** to reverse the journal transaction.

Note:

Once the maker reverses the journal transaction, the checker needs to authorize the original journal transaction which is marked for reversal. The system will automatically create a reversal transaction in authorized status once the original journal marked for reversal is authorized.

SL No	Description	Processing Reference Number	Original Reference Number	Authorization Status	Transaction Status
1	Maker creates a Journal transaction	TXREF1234567	-	Unauthorized	Active
2	Checker approves the journal transaction	TXREF1234567	-	Authorized	Active
3	Maker reverses the journal transaction	TXREF1234567	-	Unauthorized	Reversed
4a	Checker approves the journal transaction marked for reversal	TXREF1234567	-	Authorized	Reversed
4b	System automatically creates a reversal transaction in authorized status	REVREF12345 67	TXREF1234567	Authorized	Active

Table 2-8 Journal Reversal - Sample Process Flow

2.4 Release Uncollected Amount

This topic provides the information about the Release Uncollected Amount.

Uncollected funds are generally released automatically after a specified time interval. It is referred as **Availability Information** and maintained at a transaction code level in Oracle® Banking Virtual Account Management Cloud Service.

However, the user can also release the uncollected funds manually through **Release Uncollected Amount** screen.

This topic contains the following subtopics:

Release Uncollected Amount

This topic describes the systematic instructions to release uncollected funds manually for credit transactions for which the manual release has been specified at a transaction code level or which are yet to be released automatically.

View Released Uncollected Amount

This topic describes the systematic instructions to view a list of manually released uncollected amount.

2.4.1 Release Uncollected Amount

This topic describes the systematic instructions to release uncollected funds manually for credit transactions for which the manual release has been specified at a transaction code level or which are yet to be released automatically.

For automatic release, the user can release the funds before the expected release date.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Virtual Account Management. Under Virtual Account Management, click Transactions.
- 2. Under Transactions, click Release Uncollected Amount. Under Release Uncollected Amount, click Release Uncollected Amount.

The Release Uncollected Amount screen displays.

J Queries

This topic provides the information about the Queries related maintenances.

This topic contains the following subtopics:

- Account Sanction Status History This topic describes the systematic instructions to view the history of sanction status updates of a virtual account.
 - Transaction Enquiry
 This topic describes the systematic instructions to view a list of transaction performed in virtual account(s) or virtual identifier accounts for a given period.
- Account Transaction Limit Utilization
 This topic describes the systematic instructions to view the current transaction limit utilization for a specific virtual account.
- Adhoc Account Report

This topic describes the systematic instructions to generate and download the Adhoc account report.

- View Generated Statements This topic describes the systematic instructions to query and view the already generated SWIFT, ISO and PDF statement details.
 - Virtual Account Statement This topic describes the systematic instructions to generate the list of all transactions and their effective account balances in a PDF format.
- Inter Entity Positions

This topic describes the systematic instructions to view the positions between the two entities of a specific customer for a day or for a given period.

3.1 Account Sanction Status History

This topic describes the systematic instructions to view the history of sanction status updates of a virtual account.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Virtual Account Management. Under Virtual Account Management, click Queries.
- 2. Under Queries, click Account Sanction Status History.

The Account Sanction Status History screen displays.

All Screens	VAM-ACCK-008	EAC is success for \$1Â

Table A-1	(Cont.)	Error Codes and Messages
-----------	---------	--------------------------

Corror Norro	Funer Code	
Screen Name	Error Code	Error Message
Amount Block	VAB-ECA-75	EAC failed
All Screens	VAM-ACCK-010	EAC failed
Amount Block	VAB-ECA-64	During full release, txn amt must be equal to outstanding amount
Amount Block	VAB-ECA-71	Debits are not allowed on \$1 account
Journal Online	VAM-EAC-005	Debits are not allowed on \$1 account
All Screens	VAM-ACCK-005	Debits are not allowed on \$1 account
Amount Block	VAB-ECA-53	Data Merged successfully in the User Queue
Journal Online	VAT-JNOL-007	Currency URL building has failed, so transaction save failed
Amount Block	VAB-ECA-47	Currency URL building has failed, so Currency Conversion failed
Amount Block	VAB-ECA-48	Currency Conversion amount and rate is null
Journal Online	VAT-JNOL-008	Currency amount and rate is null for \$1 and \$2
Journal Online	VAM-EAC-004	Credits are not allowed on \$1 account
All Screens	VAM-ACCK-004	Credits are not allowed on \$1 account
Amount Block	VAB-ECA-49	CreateECA of EDA Failed and also failed to rollback the balance of CreateBlock
Amount Block	VAB-ECA-36	Combination of Virtual Account and ECA Block Ref does not exists in the VAB details table
Amount Block	VAB-ECA-51	CloseECA of EDA failed and also Failed to rollback the balance of releaseBlock
All Screens	GCS-MOD-001	Closed Record cannot be modified
Internal Transfer	VAI-INT-09	Cannot be Reversed as the txn is unauthorized!
Amount Block	VAB-ECA-19	Cannot be Released as the Amount Block is unauthorized!
Amount Block	VAB-ECA-33	Cannot be Lock/Released as the record is unauthorized
Journal Online	VAT-EAC-010	Call for Account Check failed
Journal Online	VAT-JNOL-057	Branch is not maintained in VAM
Internal Transfer	VAI-INT-31	Booking date is not in the required format
Internal Transfer	VAI-INT-30	Booking date is different from Current Application date
Journal Online	VAT-JNOL-032	Booking date defaulted to current Application date
Journal Online	VAT-JNOL-036	Booking date and Application date are different
Journal Online	VAT-JNOL-041	Block reference number should not be sent for transactions which are not being posting to DDA system
Amount Block	VAB-ECA-28	Block Ref number is already locked by \$1 Process Reference number
Amount Block	VAB-ECA-40	Block Details list is emptyÂ
Amount Block	VAB-ECA-09	Authorized record cannot be deleted
Internal Transfer	VAI-INT-04	Authorized record cannot be deleted
Journal Online	VAT-JNOL-023	Authorize the reversal transaction not the original transaction

Table A-1	(Cont.)	Error Codes and Messages
-----------	---------	--------------------------

Screen Name	Error Code	Error Message
Amount Block	VAB-ECA-50	Authorize of Block failed and also failed to rollback balanceÂ
Journal Online	VAT-JNOL-047	Authorization Failed
Journal Online	VAT-JNOL-051	Approved record cannot be modify
Amount Block	VAB-ECA-80	amount block queue is already approved
Amount Block	VAB-ECA-58	Amount Block Queue cannot be Approved before updating exchange rate
Amount Block	VAB-ACC-143	Amount Block not allowed for virtual account/s with posting restrictions for specific status
Amount Block	VAB-ACC-142	Amount block not allowed as closure request initiated for virtual account
Amount Block	VAB-ECA-35	Already Unlocked as Part of Compensation of Lock and Release Amount Block
Internal Transfer	VAI-INT-13	Already reversed record cannot be reversed
Amount Block	VAB-ECA-38	Already locked By some other Block Reference Nos
All Screens	EDA-ACC-009	All the GLs and real accounts are maintained properly
All Screens	VAI-IDCH-04	Account Numbers are repeated

Table B-1 (Co	ont.) List of Functiona	al Activity Codes
---------------	-------------------------	-------------------

This topic provides list of events and its purpose.

Table C-1	List of Events

Events	Purpose
vas.genericdashboardeventrequest	Event is generated for unauthorised transaction count
txnExternalAccountEntriesnotification	Event is generated when async mode is Y for transactions, publish transactions to external-DDA so that batch can process the records
van.internalbookingauthorized	Event is generated when an Internal Transfer transaction is authorized
vat.transactionjournalauthorized	Event is generated to make statement entries from transaction journal
vat.txnjournalexchratequeuenotificatio n	Event is generated for exchange rate queue notification for transactions
va.genericnotification	Event is generated whenever there is a debit or credit on a virtual account. These debits or credits can be originated from any source like journal postings, internal transfers or interest liquidation.
vat.trnfailednotification	Event will raised when we post an journal entry and that got failed
vamlm.vamchargebasisnotification	 Event raised to update the action and count related to account Creation/Closure/Reopen Transaction create/reverse Sweep transaction in Oracle Banking Liquidity Management
eca.amountblockauthorizenotification	Event is generated when ECA amount block is authorized.
eca.amountblockcreatenotification	Event is generated when ECA amount block is created.
eca.amountblockdeletenotification	Event is generated when ECA amount block is deleted.
eca.amountblockreleasenotification	Event is generated when ECA amount block is released.
vas.generateStmtEvent	Event is generated after statement gets generated.
vae.statementpreferencenotification	Event is generated whenever the statement generation preference changes.
vat.transactionjournalnotification	Event is generated to make statement entries from transaction journal.
