This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Related Resources](#)
- [Conventions](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)

## Purpose

This guide provides the information on the Alerts set up in Virtual Account Management System.

## Audience

This guide is intended for WebLogic admin or ops-web team who are responsible for installing the OFSS banking products.

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### **Access to Oracle Support**

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

## Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Related Resources

The related documents are as follows:

- *Oracle Banking Security Management System User Guide*
- *Oracle Banking Common Core User Guide*
- *Oracle Banking Getting Started User Guide*

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## Screenshot Disclaimer

Personal information used in the interface or documents are dummy and does not exist in the real world. It is only for reference purposes.

## Acronyms and Abbreviations

The list of acronyms and abbreviations that are used in this guide are as follows:

**Table 1 Acronyms and Abbreviations**

Abbreviation	Description
API	Application Programming Interface
EOD	End of Day

# 1

## Introduction

This guide provides the background information on archival jobs.

This guide outlines the process for scheduling and monitoring archival and purge jobs. These jobs can be set up using CRON expressions to run at designated intervals, with daily or more frequent scheduling being advisable. Each job handles a Task Flow linked to one or more Tasks, which are executed according to established frequencies and retention policies. The terms Task Flow and Execution Flow can be used interchangeably.

For Detailed Information, refer to **Oracle Banking Microservices Platform Foundation User Guide**.

# 2

## Archival Job Execution Flow

This topic provide information about the Archival Job Execution Flow.

Each of the job checks for the retention periods in the following order in single execution cycle.

### DELETE\_RETENTION\_PERIOD

Checks for records that have reached DELETE\_RETENTION\_PERIOD for the Task Flow. All matching records are deleted permanently from Purge schema tables.

### PURGE\_RETENTION\_PERIOD

Checks for records that have reached PURGE\_RETENTION\_PERIOD for the Task Flow. All matching records are moved from archival schema tables to purge schema tables.

### ARCHIVAL\_RETENTION\_PERIOD

The system transfers records that have met the ARCHIVAL\_RETENTION\_PERIOD for the Task Flow from the domain schema tables to the archival schema tables.

**Table 2-1 Execution Order**

Retention Type	Data Movement
DELETE_RETENTION_PERIOD	Delete from Purge Schema Tables
PURGE_RETENTION_PERIOD	Move from Archival Schema Tables to Purge Schema Tables
ARCHIVAL_RETENTION_PERIOD	Move from Domain Schema Tables to Archival Schema Tables

These retention periods are shipped as default configuration but can be editable as per preference.

# 3

## Scheduling the Archival Jobs

This topic provides information about the Archival Jobs.

These jobs can be scheduled under **Configure Tasks** screen via CRON expressions.

### Configuration Requirements

1. **CRON Expression:** Users need to set up the CRON expression to specify how often the job runs. For instance, the CRON expression ``0 */10 * * *`` means the job will execute every 10 minutes, daily.
2. **Task Trigger Name:** When you choose a Task Name, the task trigger name will automatically set itself. However, it's advisable to give it a clear name, particularly when adding additional trigger parameters for certain branches.
3. **Additional Trigger Parameters:** To enable branch-specific account closure, extra parameters must be provided in the **Additional Trigger Parameters** field. The supported format is key:::value. For instance, `branchCode:::000;userId:::ADMINUSER1`.
4. **Priority of Parameters:** The `branchCode` and `userId` in the **Additional Trigger Parameters** take precedence over default values.
  - **Default Values:** If `branchCode` and `userId` are not supplied in the **Additional Trigger Parameters**, default values from the **PROPERTIES** are used. Ensure that the following entries have valid user and branch code values, along with applicable roles to run the job:
    - a. APPLICATION = "plato-batch-server", KEY = "batchServer.userId", VALUE = "<user-id>"
    - b. APPLICATION = "plato-batch-server", KEY = "batchServer.branchCode", VALUE = "<branch-code>"
5. **Saving the Configuration:** Save the configuration, and the job will be scheduled according to the provided CRON expression.

For Detailed Information, refer to **Oracle Banking Microservices Platform Foundation User Guide**

# 4

## Supported Archival Usecases

This topic provide information about the Intraday Jobs that runs during the day based on the configured frequency.

Oracle Banking Virtual Account Management Cloud Service currently ships multiple audit archival configurations and it can be checked on screens available under **Oracle Banking Microservices Platform Foundation User Guide** and are available to be scheduled via Jobs listed below.

### Note:

Job listed below are per application subdomain which processes all Task Flows configured and pre-shipped. At most single schedule configuration per Job is required.

#### 1. ArchivalJobVAM

**Table 4-1 Task Flows**

Task Flow	Task
plato_event_control	<ul style="list-style-type: none"><li>• account_eventhub_task1</li><li>• account_eventhub_task2</li><li>• account_eventhub_task3</li></ul>

#### 2. ArchivalJobVAS

**Table 4-2 Task Flows**

Task Flow	Task
dashboard_event_control	<ul style="list-style-type: none"><li>• statement_eventhub_task1</li><li>• statement_eventhub_task2</li><li>• statement_eventhub_task3</li><li>• statement_eventhub_task4</li><li>• statement_eventhub_task6</li><li>• statement_eventhub_task7</li><li>• statement_eventhub_task8</li><li>• statement_eventhub_task9</li></ul>
