

Oracle® Banking Cash Management

Release Notes

Release 14.7.1.0.0

F77017-01

May 2023

Copyright © 2020, 2023, Oracle and/or its affiliates.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

Background

Oracle Banking Cash Management enables a financial institution to manage the account receivables and account payables of their corporate customers. Oracle Banking Cash Management provides a technology platform capable of capturing account receivables and account payables of corporates across disparate accounts and locations. This in turn enables better management of working capital for the corporate.

Purpose

The purpose of this Release Notes is to highlight the various features in Oracle Banking Cash Management release to meet various challenges faced by financial institutions. It addresses each of the cash management processes from design through execution. Its unique value lies in its ability to provide the business with predefined processes and a world-class framework that takes care of business risk and compliance needs.

Audience

This guide is intended for the following audience:

- Customers
- Partners

| OS | Operating System |
| UI | User Interface |

Product Summary

Oracle Banking Cash Management Release is built to meet various challenges faced by financial institutions. It addresses each of the cash management processes from design through execution. Its unique value lies in its ability to provide the business with predefined processes and a world-class framework that takes care of business risk and compliance needs.

List of Topics

This guide is organized as follows:

Table 2 List of Topics

| Topics | Description |
|--------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Release Notes | This topic provides the information on the release enhancements for Oracle Banking Cash Management. |
| Components of the Software | This topic consists of the technology pre-requisites required for Oracle Banking Cash Management. |
| Environment Details | This topic provides the information on the environment details for Oracle Banking Cash Management. |
| Third-Party Software | This topic provides the information on licensing of third-party software that are packaged with Oracle Banking Cash Management. |

1

Release Notes

This topic provides the information about the release notes added to the product in this release.

This topic contains the following subtopics:

- [Release Highlights](#)
This topic provides the information on the release highlights added to the product in this release.
- [Release Enhancements](#)
This topic provides the information about the Release Enhancements for the current release.
- [Deprecated Features](#)
This topic provides the information on the features deprecated from the product in this release.

1.1 Release Highlights

This topic provides the information on the release highlights added to the product in this release.

The scope of the current release Oracle Banking Cash Management is to deliver the following enhancements:

- UI Enhancement in Charge Decisioning/Preferential Pricing screen
- UI Enhancement in System Parameters screen
- Changes in Menu names
- Remapping of Inquiry menu
- New Alerts added for Cash Deposit
- New Alerts added for Cash Withdrawal
- UI Enhancement in Receivables Inquiry screen
- Netting Inquiry
- Netting Dashboard
- Day Zero System Parameters
- Traditional ALTA theme replaced with Redwood Theme
- Implemented remote caching solution for static/dynamic data using Oracle Coherence
- UI Extensibility to extend to all Inquiry screens
- Patchset Upgrade using Oracle Banking Microservices Architecture Installer

1.2 Release Enhancements

This topic provides the information about the Release Enhancements for the current release.

This topic contains the following subtopics:

- [Functional Features](#)
This topic provides the information about the various functional features added in this release.
- [Technical Changes](#)
This topic provides the information about the technical changes added in this release.
- [Non-Functional Features](#)
This topic provides the information about the non-functional features changes added in this release.

1.2.1 Functional Features

This topic provides the information about the various functional features added in this release.

UI Enhancement in Charge Decisioning/Preferential Pricing screen

An **External Pricing** toggle is newly introduced in **Charge Decisioning/Preferential Pricing** maintenance screens to allow the external pricing to be levied on transactions and configure the charges from an external system.

The following fields are newly introduced and will appear only if the **External Pricing** toggle is switched ON:

- **External Pricing System**
- **External Pricing Identifier**
- **External Pricing Identifier Description**

UI Enhancement in System Parameters screen

As a part of this release, the following UI enhancements are performed in the **System Parameters** screen:

- The **Allow Cashflow ML** flag is moved from the Receivables and Payables module to Cash Management.
- The **Transaction History Days – Cashflows** field is moved from the Receivables and Payables module to Cash Management.

Changes in Menu Names

As a part of this release, all the maintenance and summary screens have been renamed with the appropriate descriptions. For example, the **Cashflow Code** menu is renamed from **Create/View** to **Create Cashflow Code/View Cashflow Code** accordingly.

Remapping of Inquiry menu

As a part of this release, all the inquiry screens are moved from the individual modules (Collections, Netting and Cash Flow Forecasting) to **Inquiry** menu under **Cash Management** main menu.

New Alerts added for Cash Deposit

As a part of the release, the following alerts are added for **Cash Deposit** in the **Alert Decisioning** screen:

- **Cash Deposit - Approved**
- **Cash Deposit - Rejected**
- **Cash Deposit - Rework**
- **Cash Deposit - Pending For Approval**

New Alerts added for Cash Withdrawal

As a part of the release, the following alerts are added for **Cash Withdrawal** in the **Alert Decisioning** screen:

- **Cash Withdrawal Entry - Approved**
- **Cash Withdrawal Entry - Rejected**
- **Cash Withdrawal Entry - Rework**
- **Cash Withdrawal Entry - Pending For Approval**

UI Enhancement in Receivables Inquiry screen

As a part of the release, the **Funding Request Date** value is removed from the **Date Reference Basis** dropdown list in the **Receivables Inquiry** screen. The **Funding Request Date** will not be displayed if the application code is configured only for Oracle Banking Cash Management.

Netting Inquiry

A **Netting Inquiry** screen has been introduced to inquire about the status of netting transaction records based on the various search parameters.

Netting Dashboard

A **Netting Transactions** dashboard has been introduced to view the status of netting transactions, initiated post-trigger of the Netting Calculation batch.

Day Zero System Parameters

As a part of this release, a new **System Parameters** maintenance screen has been introduced to view and modify the day zero parameters for Cash Management and Receivables & Payables application.

Receivables and Payables > System Parameters > View System Parameters

Cash Management > System Parameters > View System Parameters

The following tabs are introduced for the respective application:

- Cash Management

- Workflow Parameters
- Integration Parameters
- Receivables & Payables
 - Workflow Parameters
 - Dashboard Parameters
 - Integration Parameters

UI Enhancement on Allocation Details tab under Payment Inquiry screen

As a part of this release, the following field names are renamed in the **Allocation Details** tab under the **Payment Inquiry** screen.

- **Allocation Date** is renamed as **Date**
- **Allocation Status** is renamed as **Status**

UI Enhancement on Charge Preferential Pricing screen

As a part of this release, the **Count of Slip** value is added in **Charge Criteria** drop-down list under **Charge Preferential Pricing** screen.

UI Enhancement on Create Reconciliation Rule Definition screen

As a part of this release, the **Finance Payment Recon** value is now driven by the application parameter flag and it is removed in **Recon Category** drop-down list under **Create Reconciliation Rule Definition** screen.

1.2.2 Technical Changes

This topic provides the information about the technical changes added in this release.

- Oracle Database 19c Enterprise Edition Release is upgraded to 19.18.0.0.0
- Deployment of 14.7.1 binaries to be done on Java Runtime 11.0.16
- Api-gateway Update: Zuul is replaced with spring-cloud-gateway, and Spring Oauth version updated
- Zookeeper version 3.6.3 is embedded with Kafka version 2.13-3.4.0

1.2.3 Non-Functional Features

This topic provides the information about the non-functional features changes added in this release.

Redwood Theme Adaption

The Oracle Redwood user experience has been implemented across all the screens in the Oracle Banking Cash Management appshell to provide a consistent and effective user experience to drive efficiency.

This implementation does not affect any functionality. A few more details are listed below as Redwood comes into play:

1. Oracle JET class has been deprecated.
2. Inline styling in HTML has been deprecated.

3. CSS utility classes are being used on the component level instead of Custom classes for font size, font-color, padding, margin, bg-color, heading, etc.
4. Images are no longer used for icons.
5. Libraries like lux, moment js, math js, jszip, and timsort are deprecated.

Coherence Cache

Oracle Banking Cash Management now supports Coherence. Coherence stores frequently accessed data as serialized key-value pairs for a fast read, write, and query operations to achieve maximum application performance and stability.

The use cases for coherence in domain services include replacing REST API calls to common core services with coherence wrapper methods, replacing Spring caches and new methods to cache processed data.

Refer **Oracle Banking Microservices Architecture Installation Guide** for the detailed explanation on Coherence implementation with plato-coherence-server.

UI Extensibility to extend to all Inquiry screens

Oracle Banking Cash Management now supports the UI extensibility for all Inquiry screens.

Patchset Upgrade using Oracle Banking Microservices Architecture Installer

Oracle Banking Microservices Architecture Installer supports the patchset upgrade for the product and related services.

1.3 Deprecated Features

This topic provides the information on the features deprecated from the product in this release.

Not Applicable

2

Components of the Software

This topic provides the information on the components of the software.

Documents Accompanying the Software

The various documents accompanying the software are as follows:

- Product Release Note and Installer Kit
- User and Installation manuals

Software Components

Software Components of Oracle Banking Cash Management that form part of this release are as follows:

- Core
 - UI Components (Knockout, OJET, Lux)
 - The Swagger / YAML for the services supported
 - Configuration files for the services
 - Service Components
 - Tables, Sequences, Static Data
- Installation utilities
 - Installation documents for Database, UI, Web services

A

Environment Details

This topic describes about Tech Stack details of Oracle Banking Cash Management.

Tech Stack – Oracle Banking Cash Management

Table A-1 Tech Stack – Oracle Banking Cash Management

| Component | Deployment option | Machine | Operating System | Software | Version Number |
|--------------------------------|----------------------------|--------------------|-------------------------------------------------|----------------------------------------------------------|-------------------------------|
| Oracle Banking Cash Management | Single Instance Standalone | Application Server | Oracle Enterprise Linux Server 8.3 (x86 64 Bit) | Oracle WebLogic Server | 14.1.1.0.0 + Patch 32077936** |
| | | | | Java HotSpot (TM) JDK (with WebLogic Application Server) | Oracle JDK 11.0.16 |
| | | Database Server | Oracle Enterprise Linux Server 8.3 (x86 64 Bit) | Oracle Database 19c Enterprise Edition Release | 19.18.0.0.0 |
| | | Message Broker | Oracle Enterprise Linux Server 8.3 (x86 64 Bit) | Apache Kafka | 2.13-3.4.0 |
| Apache ZooKeeper | 3.6.3 | | | | |

**** Patch 32077936:** JSF APPLICATION RESPONSE ISSUE FOR HTTPS PROTOCOL WHEN HTTP2 IS ENABLED, needs to be applied to Weblogic version 14.1.1.0.0.

Client Machines:

For detailed information on Browser Support, please refer to the Oracle Software Web Browser Support Policy at : <https://www.oracle.com/middleware/technologies/browser-policy.html>

Note:

Browser support is no longer based on Operating Systems but strictly tied to the browser themselves, no matter on which Operating Systems they are installed. Current release is certified on client workstations with Windows 10 and Mac OS.

Table A-2 UI Stack

| Software Type | Recommended Software | Version Number |
|---------------|----------------------|----------------|
| UI | Oracle JET | v13.0.0 |

B

Third-Party Software

This topic describes about the license information for third-party software.

For information on the third-party software, refer to the **Oracle Banking Cash Management License Guide** in the OHC Documentation Library.
