Purpose

This guide is designed to help acquaint you with the Oracle® Banking Cash Management.

It provides an overview of the system and guides you, through the various steps involved in setting up and providing the cash management services for the customers of your bank.

Audience

This guide is intended for the following User/User Roles:

Table 1 Audience

Role	Function
Back office executive	Input functions for transactions
Back office managers/officers	Authorization of functions
Product Managers	Product definition and authorization

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup? ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related Resources

The related documents are as follows:

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Screenshot Disclaimer

Personal information used in the interface or documents are dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of acronyms and abbreviations that are used in this guide are as follows:

Abbreviation	Description
BOP	Beginning of the Period
BIC	Bank Identifier Code
Cr	Credit
Dr	Debit
EOD	End of Day
EOP	End of the Period
EFT	Electronic Funds Transfer
FIFO	First In First Out
HAFO	Highest Amount First Out
LAFO	Lowest Amount First Out
LIFO	Last In First Out
MIS	Management Information System
OBCM	Oracle Banking Cash Management
OBSCF	Oracle Banking Supply Chain Finance
OBSCFCM	Oracle Banking Supply Chain Finance and Cash Management
PO	Purchase Order
PUA	Payment Under Approval
UI	User Interface
VAM	Virtual Account Management

Table 2 Acronyms and Abbreviations

Basic Actions

The basic actions performed in the screens are as follows:

Table 3 Basic Actions

Actions	Description
New	 Click New to add a new record. The system displays a new record to specify the required data. The fields marked as Required are mandatory. This button is displayed only for the records that are already created.
Save	Click Save to save the details entered or selected in the screen.
Unlock	 Click Unlock to update the details of an existing record. The system displays an existing record in editable mode. This button is displayed only for the records that are already created.

Actions	Description	
Authorize	 Click Authorize to authorize the record created. A maker of the screen is not allowed to authorize the same. Only a checker can authorize a record. This button is displayed only for the already created records. For more information on the process, refer Authorization Process. 	
Approve	 Click Approve to approve the initiated record. This button is displayed once you click Authorize. 	
Reject	Click Reject to reject the initiated record.This button is displayed once you click Authorize.	
Audit	 Click Audit to view the maker details, checker details of the particular record. This button is displayed only for the records that are already created. 	
Close	Click Close to close a record. This action is available only when a record is created.	
Confirm Click Confirm to confirm the action performed.		
Cancel	Click Cancel to cancel the action performed.	
Compare	 Click Compare to view the comparison through the field values of old record and the current record. This button is displayed in the widget once you click Authorize. 	
View	 Click View to view the details in a particular modification stage. This button is displayed in the widget once you click Authorize. 	
View Difference only	 Click View Difference only to view a comparison through the field element values of old record and the current record, which has undergone changes. This button is displayed once you click Compare. 	
Expand All	Click Expand All to expand and view all the details in the sections. • This button is displayed once you click Compare .	
Collapse All	 Click Collapse All to hide the details in the sections. This button is displayed once you click Compare. 	
Menu Item Search	 Specify the menu name to search and select the required screens from the list. This option is used to search and navigate the required screens. 	
ОК	Click OK to confirm the details in the screen.

1 Overview of Receivables and Payables

This topic describes the information on the overview, benefits and functionalities of Receivables and Payables module.

Overview

Receivables and Payables module in Oracle® Banking Cash Management enables a financial institution to manage the account receivables and account payables of their corporate customers. Oracle® Banking Cash Management provides a technology platform capable of capturing account receivables and account payables of corporates across disparate accounts and locations.

Receivables and Payables refers to instruments such as invoices, purchase orders, debit notes, and credit notes, based on which finances can be availed and settled.

- An instrument is referred to as a **Receivable** if a corporate customer is expecting to receive a payment for it. For example: Invoices are receivables for corporate customers, if they are a supplier.
- An instrument is referred to as a **Payable** if a corporate customer is expected to make a
 payment towards the instrument. For example: Invoices are payables for corporate
 customers, if they are a buyer.

Note:

Receivables and Payables module is consumed by both **Oracle® Banking Supply Chain Finance** and **Oracle® Banking Cash Management**.

Benefits

- Cost Reduction Increased visibility of transactions and easy reconciliation help corporates manage and control their cash flow and reduce costs.
- Smart Processing of Receivables and Payables Facilitate efficient receivable and payable management through enhanced automation and straight-through processing of key processes.
- Regulatory Environment Leverage flexible configuration to launch quickly, respond to regulatory changes and expand into new geographies.

Functionality

- E-Invoice and Purchase Order
- Debit Note and Credit Note
- Reconciliation
- Allocation of Payments
- Pricing

Home: Dashboard

Successfully signing into the Oracle® Banking Cash Management application displays the Dashboard as your home screen. It is a collection of various portlets that are displayed based on your role and access rights. The Dashboard enables easy access and analysis of transactional and static data through these interactive and contextual portlets. User can drag and move different portlets, resize, auto adjust the size, and expand/collapse the portlet.

On starting the Oracle® Banking Cash Management application, the below login screen is displayed:

Figure 1-1 Login

- 1. Specify User Name and Password to access the application.
- 2. Click **Sign In** to log into application. The **Dashboard** screen displays.

Figure 1-2 Dashboard

Oracle® Banking Cash Management Dashboard currently consists of the following mentioned portlets for Receivables and Payables management:

- **Top 5 Corporates:** This portlet displays information on the top five customers with respect to their total Receivables and Payables. On clicking the table icon at the top-right, the graph populates the business volume data of the same top 5 customers in tabular format.
- Aging of Invoices: This widget displays invoice aging information in the form of a doughnut. The graph displays the invoice amount volume split as per aging buckets which are configurable at the time of implementation i.e. 0-30 days, 30-60 days, and so on. Range criteria can be defined with a maximum of 6 ranges. On clicking any of the range buckets on the graph, a pop-up window appears with the list of corporates whose invoices are due for that ageing bucket. Clicking on the '+' (expand) icon against each corporate; launches invoice details pertaining to the information of that specific corporate such as supplier name, 'Invoice Due Date From', 'Invoice Due Date To'. Click the bar-chart icon on the top-right corner to change the view from doughnut (default) to bar chart. You can also flip the widget to view the same details for aging of overdue invoices.
- Invoices Raised: This portlet displays the data for financed and non-financed Invoices on monthly basis as a bar graph. On clicking the table icon on the top-right

corner, the same data is displayed in tabular format with invoices grouped into monthly buckets. On clicking the bar graph, the screen will pop up with the corporate name and aggregated invoice amount and further clicking on the '+' (expand) icon beside the corporate name launches the Invoice Inquiry screen with data of invoices specific to the corporate, along with other relevant details as per the selected date.

- **Business Volume Trends:** This widget displays the business trends (total receivables and payables) of the previous six months including the current month based on historic data. The trend line is plotted based on the highs/ peak.
- **Payments Invoice Recon:** This widget provides a snapshot of the reconciliation details of payments against the entity selected, i.e., invoice, cash flow, allocation, or finance. Click the respective icons to view these details as a doughnut or as a line graph. You can view the volume percentage of payment records that are manually reconciled, auto-reconciled, partially reconciled, and unreconciled. Using the filter options, you can select a specific customer and/or modify the date range. Click the refresh icon to reset the data. If you have selected the line-graph option, you can click on specific trend-line points where the Volume (Y) axis meets the Month (X) axis. A pop-up window appears, displaying the names of the corporates and the count of records for that particular month and the reconciliation status.

Perform the following actions on the **Dashboard** screen:

- To add more portlets, click **Add** icon located at the top-right corner of the **Dashboard**.
- To remove a portlet, click **Remove** icon located at the portlet's top-right corner.
- To configure the portlet, click **Configure Tile** icon located at the portlet's top-left corner.
- To flip the portlet view, click **Flip Forward** or **Flip Back** icon.
- To change the portlet's position, click and hold the **Drag to reorder** icon at the portlet's bottom-center and then move the portlet to the desired position.
- To apply filters on the portlet's data, click **Filter** icon to view the pop up to select the filter values.

2 System Parameters

This topic describes the information to view and modify the day-zero system parameters for Receivables and Payables module.

This screen displays the day-zero system parameters which are setup during implementation. The day-zero parameters are segregated into the following data segments.

- Workflow Parameters
- Dashboard Parameters
- Integration Parameters
- View System Parameters
 This topic describes the systematic instruction to view, modify, or authorize the day zero
 system parameters for Receivables and Payables module.

2.1 View System Parameters

This topic describes the systematic instruction to view, modify, or authorize the day zero system parameters for Receivables and Payables module.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables & Payables. Under Receivables & Payables, click System Parameters.
- 2. Under System Parameters, click View System Parameters.

The View System Parameters screen displays.

Figure 2-1 View System Parameters

- 3. Filter the records in the View screen:
 - a. Click **Search** icon to view the filters.

The user can filter the records using the following parameters:

- Record Status
- Authorization Status
- b. Select the required filter criteria and click **Search** to filter the records.
- c. Click Reset to reset the filter criteria.
- 4. Click **Refresh** icon to refresh the records.
- 5. Click **Options** icon and select **Unlock** to modify the records.

The System Parameters - Workflow Parameters screen displays.

6. On **Workflow Parameters** tab, select the toggles to configure the workflow parameters.

For more information on fields, refer to the field description table.

 Table 2-1
 Workflow Parameters - Field Description

Field	Description
File Parsing Behavior	 Select the type of file parsing behavior. The available options are: Reject All Records - If one record in a file fails, all records should be marked as fail and the entire file should be rejected. Reject Specific Records - If one record in a file fails, the system should move on to the other records and mark the file processing as success with relevant records failed / passed.
Lien Marking	Select the toggle switch to enable or disable the Lien Marking in the host application.
Manual Invoice Processing	Select the toggle switch to enable or disable the manual enrichment required for invoice processing.
Auto Auth - Relationship	Select the toggle switch to enable or disable the auto authorization for the relationship management.

Field	Description
Auto Auth - Invoice	Select the toggle switch to enable or disable the auto
	authorization for invoice transactions.
Auto Auth - Auto Recon	Select the toggle switch to enable or disable the auto authorization for automatic reconciliation.
Auto Auth - Manual Recon	Select the toggle switch to enable or disable the auto authorization for manual reconciliation.
Auto Auth - Credit Note Creation	Select the toggle switch to enable or disable the auto authorization for credit note creation.
Auto Trigger Recon - Payment Upload	Select the toggle switch to enable or disable the auto trigger of Recon when the payment file/record is uploaded.
Auto Auth - Dynamic Discounting	Select the toggle switch to enable or disable the auto authorization for dynamic discounting.
Auto Auth - PO Creation and Processing	Select the toggle switch to enable or disable the auto authorization for PO creation and processing transactions.
PO Creation - Bulk	Select the toggle switch to enable or disable the auto authorization for bulk PO creation.
Validate Linked Purchase Orders	Select the toggle switch to enable or disable the validation of the purchase orders linked with invoice during creation or upload.
Additional Duplication Check Required	Select the toggle switch to enable or disable the additional duplication check while creating the instruments.
Invoice Duplication Check Parameters	Select the additional parameters to perform a duplication check while creating an invoice. You can select multiple parameters in this field.
	This field is displayed only if the Additional Duplication Check Required toggle switch is enabled.
Debit Note Duplication Check Parameters	Select the additional parameters to perform a duplication check while creating a debit note. You can select multiple parameters in this field.
	This field is displayed only if the Additional Duplication Check Required toggle switch is enabled.
Credit Note Duplication Check Parameters	Select the additional parameters to perform a duplication check while creating a credit note. You can select multiple parameters in this field.
	This field is displayed only if the Additional Duplication Check Required toggle switch is enabled.
PO Duplication Check Parameters	Select the additional parameters to perform a duplication check while creating a purchase order. You can select multiple parameters in this field.
	This field is displayed only if the Additional Duplication Check Required toggle switch is enabled.

Netting Enabled	Select the toggle switch to enable or disable the netting transaction for the receivables and payables.

Table 2-3 Integration Parameters - Field Description

11. Click **Save and Close** to save the record and send for authorization (if applicable).

Note:

If any flag in the system parameters is changed, the system promptly updates it upon authorization. However, processing the impact of the flag takes approximately 1-2 hours.

- **12.** On the **View System Parameters** screen, click **Options** icon and then select any of the following options:
 - a. Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click **Approve** to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - **b.** View To view the record details.

3 Maintenance for Receivables and Payables

This topic describes the maintenance of reference data to be set on day zero to use the Receivables and Payables functionality.

To enable the functioning of Receivables and Payables within the Cash Management module, certain reference data needs to be set up on day zero. The user need to set up reference data like relationship master, recon rules, charges, accounting, tolerance, payment terms, etc. The user may also need to identify administrators to perform admin related tasks (creating users, assigning tasks and functions to the users as per their profile).

Maintaining Core Reference Data

Certain core reference data is required to be set up for execution of Receivables and Payables transactions such as country list, currency, customer category, holiday list, list of financial institutions/banks, branch, FX rates, and so on.

Refer Oracle Banking Common Core User Guide for setting up core reference data

This topic contains the following subtopics:

Accounting Maintenance

This topic describes the information to setup the reference data for Accounting such as account mapping, entry codes, roles, and accounting entries in Cash Management system.

- Charges Maintenance This topic describes the information to maintain the charges in Cash Management system.
- Commodity Maintenance

This topic describes the information to maintain the commodity details to each supplier for creation of invoice data either through UI or upload.

- Division Code Maintenance This topic describes the information to maintain the division codes for parties in Cash Management system.
- Reconciliation Rules Maintenance

This topic describes the information to maintain the Reconciliation Rules in Cash Management system.

• Tolerance Maintenance

This topic describes the information to configure an acceptable discrepancy between invoice/cashflow outstanding amount and payment amount to enable automatic matching of invoices/cashflows with the respective payment records.

- Payment Terms Maintenance
 This topic describes the information to maintain specific payment frequencies and dates
 for buyers making bulk payments on repetitive fixed dates.
- Relationship Maintenance This topic describes the information to create linkage between corporates and counterparty.

Alerts Maintenance

This topic describes the information to setup the reference data for Alerts such as contact details, definition and decisioning in Cash Management system.

3.1 Accounting Maintenance

This topic describes the information to setup the reference data for Accounting such as account mapping, entry codes, roles, and accounting entries in Cash Management system.

This topic contains the following subtopics:

Accounting Role

This topic describes the information to setup the reference data for Accounting roles in Cash Management system.

Entry Codes

This topic describes the information to setup the reference data for entry codes in Cash Management system.

Accounting Entries

This topic describes the information to setup the reference data for Accounting entries in Cash Management system.

• External Account Mapping

This topic describes the information to create external account mapping. i.e. mapping of a customer external account to a specific product, event, etc. in Cash Management system.

• Internal Account Mapping This topic describes the information to setup the reference data for internal account mapping in Cash Management system.

3.1.1 Accounting Role

This topic describes the information to setup the reference data for Accounting roles in Cash Management system.

This topic contains the following subtopics:

- Create Accounting Role
 This topic describes the systematic instruction to create role codes for the purpose
 of accounting.
- View Accounting Role

This topic describes the systematic instruction to view, modify, delete, or authorize accounting role records that have been created.

3.1.1.1 Create Accounting Role

This topic describes the systematic instruction to create role codes for the purpose of accounting.

This is required to identify the Dr or Cr leg in an accounting entry. Dr or Cr legs with other parameters like amount type, are created through **Entry Codes** submenu.

Specify User ID and Password, and login to Home screen.

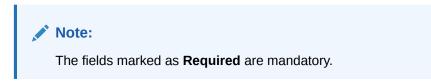

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Accounting. Under Accounting, click Role.
- 3. Under Role, click Create Account Role.

The Create Account Role screen displays.

Figure 3-1 Create Account Role

Create Account Role			A Errors & Overrides	::×
Accounting Role Code	Accounting Role Description			
Required	R	lequired		
			Cancel	Save

4. Specify the fields on **Create Account Role** screen.

For more information on fields, refer to the field description table.

 Table 3-1
 Create Account Role - Field Description

Field	Description
Accounting Role Code	Specify a unique code for the accounting role being created.
Accounting Role Description	Specify a description to associate with the role.

5. Click **Save** to save the record and send it for authorization.

3.1.1.2 View Accounting Role

This topic describes the systematic instruction to view, modify, delete, or authorize accounting role records that have been created.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Accounting. Under Accounting, click Role.
- 3. Under Role, click View Account Role.

The View Account Role screen displays.

- 4. Filter the records in the View screen:
 - a. Click Search icon to view the filters. The user can filter the records by Accounting Role Code, Accounting Role Description, Authorization Status and Record Status.
 - b. Select the required filter criteria and click Search button to filter the records.
 - c. Click **Reset** to reset the filter criteria.
- 5. Click **Refresh** icon to refresh the records.
- 6. Click **Options** icon and then, select any of the following options:
 - a. **Unlock** To modify the record details. Refer to the **Create** screen for the field level details.
 - **b.** Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click Approve to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click **View** to view the record details.
 - Click **Proceed** to delete the record.
 - d. Copy To copy the record parameters for creating a new record.
 - e. View To view the record details.

f. **Reopen** – To reopen the closed record.

3.1.2 Entry Codes

This topic describes the information to setup the reference data for entry codes in Cash Management system.

This topic contains the following subtopics:

Create Entry Codes

This topic describes the systematic instruction to create entry codes or Dr and Cr legs for an accounting entry.

View Entry Codes

This topic describes the systematic instruction to view, modify, delete, or authorize accounting entry codes that have been created.

3.1.2.1 Create Entry Codes

This topic describes the systematic instruction to create entry codes or Dr and Cr legs for an accounting entry.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Accounting. Under Accounting, click Entry Codes.
- 3. Under Entry Codes, click Create Account Entry Code.

The Create Account Entry Code screen displays.

- 6. Click **Reset** to clear the selected values, if required.
- 7. Click **Save** to save the data and send it for authorization.

3.1.5.2 View Internal Account Mapping

This topic describes the systematic instruction to view, modify, delete, or authorize internal account mapping records that have been created.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Accounting. Under Accounting, click Internal Account Mapping.
- 3. Under Internal Account Mapping, click View Internal Account Mapping.

The View Internal Account Mapping screen displays.

- 4. Filter the records in the **View** screen:
 - a. Click **Search** icon to view the filters. The user can filter the records by Branch, Product, Role, Party, Location, Authorization Status and Record Status.
 - b. Select the required filter criteria and click **Search** button to filter the records.
 - c. Click Reset to reset the filter criteria.
- 5. Click **Refresh** icon to refresh the records.
- 6. Click **Options** icon and then select any of the following options:
 - Unlock To modify the record details. Refer to the Create screen for the field level details.
 - Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click Approve to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click View to view the record details.
 - Click Proceed to delete the record.
 - d. **Copy** To copy the record parameters for creating a new record.

- e. View To view the record details.
- f. Reopen To reopen the closed record.

3.2 Charges Maintenance

This topic describes the information to maintain the charges in Cash Management system.

Banks can levy charges on services extended to corporates with respect to managing and financing receivables and payables, like documentation charges, handling charges and so on. These charges can be configured at default/global level for specific products or parties. The levying of the charges can be triggered by specific events such as auto-debit, EOD, etc. Once configured, the charges would get levied for manual as well as auto processing mode for transactions.

Charge pricing is determined by configuring various pricing methods such as fixed amount, fixed percentage, slab based pricing, count based pricing and so on. The frequency of calculation and collection, such as, daily/weekly/monthly/yearly, can also be defined for a charge.

Banks are also empowered to configure flexible and preferential pricing as per corporate risk profile and assessment.

This topic contains the following subtopics:

- Charge Code
 This topic describes the information to setup the reference data for charge codes in Cash Management system.
- Charge Rule Maintenance This topic describes the information to setup the rules for charge pricing/charge calculation based on the bank's requirements in Cash Management system.
- Charge Decisioning

This topic describes the information to map the charge rule template and charge code to a specific products in Cash Management system.

Charge Preferential Pricing
 This topic describes the information to configure the special pricing or charge
 application for a specific corporate in Cash Management system.

3.2.1 Charge Code

This topic describes the information to setup the reference data for charge codes in Cash Management system.

Create Charge Code

This topic describes the systematic instruction to manage the charge code.

• View Charge Code

This topic describes the systematic instruction to view, modify, delete, or authorize the charge codes that have been created.

3.2.1.1 Create Charge Code

This topic describes the systematic instruction to manage the charge code.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Charges. Under Charges, click Charge Code.
- 3. Under Charge Code, click Create Charge Code.

The **Create Charge Code** screen displays.

Field	Description
Field	Description
Charge Pricing Description	Specify the pricing description of charge.
Annum Basis	Select the number of days to be considered in a year for tenor- based calculations.
Pricing Category	Select the pricing category. Based on the selected category, pricing methods will be loaded.
Pricing Method	Select the method to configure the charge pricing.
Pricing Currency	Select the currency in which pricing is to be done.
Charge in Txn Currency	Switch the toggle ON if the charge should be levied in transaction currency otherwise charge will get levied in pricing currency.
Min/Max Validation Criteria	Specify whether the charges should be applied based on the range of amount or percentage.
Min. Charge Amount/ Percent	Specify the minimum charge amount/ percentage to be considered. This field is displayed based on the value selected in the Min/Max Validation Criteria field.
Max. Charge Amount/ Percent	Specify the maximum charge amount/ percentage to be considered. This field is displayed based on the value selected in the Min/Max Validation Criteria field.
Fixed Amount	Specify the charge amount. This field is displayed only if Pricing Category is selected as Fixed Amount .

Field	Description
Flat Charge	Switch the toggle ON if the flat charge should be applied. This field is displayed only if Pricing Category is selected as Fixed Percent .
Fixed Percent	Specify the charge percentage. This field is displayed only if Pricing Category is selected as Fixed Percent .
From	Displays the start value of the amount/ percent/ duration range. This field is displayed only if Pricing Category is selected as Tier Based Categories.
То	Specify the end value of the amount/ percent/ duration range. This field is displayed only if Pricing Category is selected as Tier Based Categories.
Amount	Specify the charge amount. This field is displayed only if Pricing Category is selected as Tier Based Amount or Tier Based Mixed .
Units	Specify the number of charge unit. This field is displayed only if Pricing Category is selected as Tier Based Amount and Pricing Method is selected as count-based.
Percent	Specify the charge percentage. This field is displayed only if Pricing Category is selected as Tier Based Percent or Tier Based Mixed .

Table 3-7 (Cont.) Create Rule Maintenance - Field Description

- 5. Click **Add** to add the charge rule details to the grid.
 - a. Select the record in the grid and then click $\frac{1}{2}$ icon in the Action column.
 - b. Click Edit to edit the selected row.
 - c. Click **Delete** to delete the selected row.
- 6. Click Reset to reset the fields, if required.
- 7. Click **Save** to save the record and send it for authorization.

3.2.2.2 View Charge Rule Maintenance

This topic describes the systematic instruction to view, modify, delete, or authorize the charge rules that have been created.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Charges. Under Charges, click Charge Rule Maintenance.

3. Under Charge Rule Maintenance, click View Rule Maintenance.

The View Rule Maintenance screen displays.

Figure 3-16 Create Charge Decisioning

4. Specify the fields on **Create Charge Decisioning** screen.

 Table 3-8
 Create Charge Decisioning - Field Description

Field	Description
Event	Select the event on the occurrence of which, the charge should be applied.
Filter Criteria	Select the appropriate filter criteria on which the charge is required to be calculated and debited. This can be Default, or Instrument Type Status Based.
Instrument Type	 Select the instrument type for which the charge is to be mapped. The options are: PO Invoice Debit Note Cheque This field appears only if the Filter Criteria is selected as Instrument Type.
Instrument Status	Select the relevant status of the instrument based on which the charge would get levied. Different charges and pricing can be configured for combination of instruments and their status. The options are: Accepted Approved Assigned Cancelled Disputed Financed Partial Financed Raised Rejected This field appears only if the Filter Criteria is selected as Instrument Type.
Inherit Charges	 Specify if default charges should be inherited as set up for default filter criteria or should be overridden as well. The options are: Inherit Default Charges Inherit Default Charges and Override
Charge Code	Select the charge code for which the decisioning is to be configured.
Charge Sharing	Switch the toggle ON if charge sharing is applicable.

Field	Description
Sharing Percentage Allocation	Click the link to specify the sharing percentage for each party. This link is displayed only if the Charge Sharing toggle is enabled.
Party To Charge	Select the party to be charged. The options are: Beneficary/Counter Party Buyer Import Factor Insurance Party Payment Party Party to Charge Supplier This field appears only if the Charge Sharing toggle is disabled.
Charge Pricing Rule	Click the search icon to select the charge pricing rule to be applied.
External Pricing	Switch the toggle ON to allow the user to configure the external pricing. By default, this toggle will be OFF.
Charge Criteria	 Select the criteria to be considered based on which the charge should be calculated. The options are: Count of POs Parent Charge Code Count of Invoice Invoice Amount PO Amount
External Pricing System	Select the external pricing system from the dropdown list for which the external charges needs to be configured. This field appears only if the External Pricing toggle is ON.
External Pricing Identifier	Specify the unique identifier for the external pricing system. This field appears only if the External Pricing toggle is ON.
External Pricing Identifier Description	Specify the brief description about the external pricing identifier. This field appears only if the External Pricing toggle is ON.
Parent Charge Code	Select the parent charge code. The field displays if the Charge Criteria is selected as Parent Charge Code .
Reference Tenor Start Date	Specify which date should be considered to calculate the start of charge tenor duration. The options are: Business Date Invoice Date Invoice Due Date
Reference Tenor End Date	 Specify which date should be considered to calculate the end of charge tenor duration. The options are: Business Date Invoice Due Date

Table 3-8 (Cont.) Create Charge Decisioning - Field Description

Field	Description
Effective Date	Click the calendar icon to select the start date of the charge decisioning validity.
Expiry Date	Click the calendar icon to select the end date of the charge decisioning validity.
Auto Waive	Switch the toggle ON to enable automatic charge waiving at the time of transaction processing.
	This field is displayed only if Filter Criteria is selected as Instrument Type Status Based .
Allow Waiver	Switch the toggle ON to enable manual charge waiving at the time of transaction processing.
	If the Auto Waive toggle is switched ON, then this toggle is switched OFF and disabled by default.
Allow Pricing Modification	Switch the toggle On to allow pricing rule modification at the time of transaction processing.
	If the Auto Waive toggle is switched ON, then this toggle is switched OFF and disabled by default.
Allow Override	Switch the toggle On to enable overriding of charge amount at the time of transaction processing.
	If the Auto Waive toggle is switched ON, then this toggle is switched OFF and disabled by default.
Collection Parameters	Displays the fields related to Collection Parameters under this section.
Collection Type	Select how the charge should be collected. The options are: • Periodic • Online
Frequency	Select the frequency of charge collection. The options are: Daily Weekly Monthly Half Yearly This field is displayed only if the Collection Type is
	selected as Periodic .

Table 3-8 (Cont.) Create Charge Decisioning - Field Description

Field	Description
Reference Period	Select when the collection should take place for the selected frequency.
	For monthly or half-yearly frequency, the collection can take place either at the beginning of the period (BOP) or end of the period (EOP).
	For weekly frequency, the collection can happen on a specific day of the week.
	This field is displayed only if the Collection Type is selected as Periodic .
Units	Specify whether the charge collection should take place as per units of specified frequency. If the monthly frequency is specified and the number of units is 2, then the charge would be collected once in two months.
	This field is displayed only if the Collection Type is selected as Periodic .
Calculation Parameters	Displays the fields related to Calculation Parameters under this section.
Calculation Type	Select how the charge should be calculated. The options are: • Periodic • Online
Frequency	Select the frequency of charge calculation. The options are: Daily Weekly Monthly Half Yearly
	This field is displayed only if the Calculation Type is selected as Periodic .
Reference Period	Select when the calculation should take place for the selected frequency.
	For monthly or half-yearly frequency, the calculation can take place either at the beginning of the period (BOP) or end of the period (EOP).
	For weekly frequency, the calculation can happen on a specific day of the week.
	This field is displayed only if the Calculation Type is selected as Periodic .

Table 3-8 (Cont.) Create Charge Decisioning - Field Descripti

Field	Description
Units	Specify whether the charge calculation should take place as per units of specified frequency. If the monthly frequency is specified and the number of units is 2, then the charge would be calculated once in two months.
	This field is displayed only if the Calculation Type is selected as Periodic .
Add/Override Charges	Displays the details of new charges added in this grid.
Default Charges	Displays the default charges configured for the selected event in this grid, if the Inherit Charges is selected as Inherit Default Charges . These charges cannot be modified.

Table 3-8 (Cont.) Create Charge Decisioning - Field Description

5. Click **Sharing Percentage Allocation** link to specify the sharing percentage for each party.

The Charge Sharing Allocation popup screen displays.

- 4. Filter the records in the View screen:
 - a. Click the **Search** icon to view the filters. The user can filter the records by Instrument Type, Instrument Status, Product, Credit/Debit Status, Event, Authorization Status and Record Status.
 - b. Select the required filter criteria and click **Search** button to filter the records.
 - c. Click Reset to reset the filter criteria.
- 5. Click Refresh icon to refresh the records.
- 6. Click **Options** icon and then, select any of the following options:
 - a. **Unlock** To modify the record details. Refer to the **Create** screen for the field level details.
 - **b.** Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click **View** to view the record details.
 - Select the record and click **Approve** to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click **View** to view the record details.
 - Click **Proceed** to delete the record.
 - d. Copy To copy the record parameters for creating a new record.
 - e. View To view the record details.
 - f. **Reopen** To reopen the closed record.

3.2.4 Charge Preferential Pricing

This topic describes the information to configure the special pricing or charge application for a specific corporate in Cash Management system.

- Create Charge Preferential Pricing This topic describes the systematic instruction to maintain the charges for specific products or parties.
- View Charge Preferential Pricing

This topic describes the systematic instruction to view, modify, delete, or authorize charge preferential pricing records that have been created.

3.2.4.1 Create Charge Preferential Pricing

This topic describes the systematic instruction to maintain the charges for specific products or parties.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Charges. Under Charges, click Charge Preferential Pricing.
- 3. Under Charge Preferential Pricing, click Create Preferential Pricing.

The Create Preferential Pricing screen displays.

Figure 3-20 Create Preferential Pricing

4. Specify the fields on **Create Preferential Pricing** screen.

 Table 3-9
 Create Preferential Pricing - Field Description

Field	Description
Filter Criteria	Select the appropriate filter criteria for specific application of accounting entries. Based on the selected criteria, the Party ID, Instrument Type, Instrument Status and Customer Category fields are displayed.
Party	Click the search icon to select the party to map the preferential pricing to. This field is displayed only if the Filter Criteria is selected as Party .
Instrument Type	Select the type of instrument to map the preferential pricing to. Instrument statuses are available based on the selected instrument type. This field is displayed only if the Filter Criteria is selected as Instrument Type .
Instrument Status	Select the status of the instrument to map the preferential pricing to. This field is displayed only if the Filter Criteria is selected as Instrument Type .
Customer Category	Click the search icon to select the customer category. This field is displayed only if the Filter Criteria is selected as Customer Category .
Charge Code	Click the search icon to select the charge code for pricing configuration.
Charge Criteria	Select the criteria to be considered based on which charge should be calculated. The options are: Count of POs Parent Charge Code Count of Invoices Invoice Amount PO Amount
Charge Pricing Rule	Click the search icon to select the charge pricing rule to be applied.
Parent Charge Code	Select the parent charge code. This field is displayed if the Charge Criteria is selected as Parent Charge Code .

Field	Description
External Pricing	Switch the toggle ON to allow the user to configure the external pricing. By default, this toggle will be OFF.
External Pricing System	Select the external pricing system from the dropdown list for which the external charges needs to be configured. This field appears only if the External Pricing toggle is ON.
External Pricing Identifier	Specify the unique identifier for the external pricing system. This field appears only if the External Pricing toggle is ON.
External Pricing Identifier Description	Specify the brief description about the external pricing identifier. This field appears only if the External Pricing toggle is ON.
Reference Tenor Start Date	Specify which date should be considered to calculate the start of tenor duration.
Reference Tenor End Date	Specify which date should be considered to calculate the end of tenor duration.
Effective Date	Click the calendar icon to select the start date of the preferential charge validity.
Expiry Date	Click the calendar icon to select the end date of the preferential charge validity.
Charge Application	Switch the toggle ON to enable charge application.
Allow Waiver	Switch the toggle ON to enable charge waiving.
Allow Override	Switch the toggle ON to enable overriding of the charge.
Allow Pricing Modification	Switch the toggle ON to allow pricing modification.
Collection Parameters	Displays the fields related to Collections Parameters.
Collection Type	 Select how the pricing should be collected. The options are: Periodic Online
Frequency	 Select the frequency of charge collection. The options are: Daily Weekly Monthly Half Yearly This field is displayed only if the Collection Type is selected as Periodic.

Table 3-9 (Cont.) Create Preferential Pricing - Field Description

Field	Description
Reference Period	Select when the collection should take place for the selected frequency.
	For monthly or half-yearly frequency, the collection can take place either at the beginning of the period (BOP) o end of the period (EOP).
	For weekly frequency, the collection can happen on a specific day of the week.
	This field is displayed only if the Collection Type is selected as Periodic .
Units	Specify whether the charge collection should take place as pe units of specified frequency.
	This field is displayed only if the Collection Type is selected as Periodic .
Calculation Parameters	Displays the fields related to Calculation Parameters.
Calculation Type	Select how the pricing should be calculated. The options are: • Periodic • Online
Frequency	 Select the frequency of charge calculation. The options are: Daily Weekly Monthly Half Yearly
	This field is displayed only if the Calculation Type is selected as Periodic .
Reference Period	Select when the calculation should take place for the selected frequency.
	For monthly or half-yearly frequency, the calculation car take place either at the beginning of the period (BOP) o end of the period (EOP).
	For weekly frequency, the calculation can happen on a specific day of the week.
	This field is displayed only if the Calculation Type is selected as Periodic .
Units	Specify whether the charge calculation should take place as per units of specified frequency.
	This field is displayed only if the Calculation Type is selected as Periodic .
Charges Grid	Displays the details of the preferential pricing added as an entry in this grid.

Table 3-9 (Cont.) Create Preferential Pricing - Field Description

- 5. Click Add to add the details to the grid.
- 6. Click **Reset** to reset the rows in the grid.
- 7. Click the hyperlink in the table grid to view the details of the pricing rule.

The Charge Pricing Rule Details screen displays.

 - b. Select the required filter criteria and click Search button to filter the records.
 - c. Click Reset to reset the filter criteria.
- 5. Click Refresh icon to refresh the records.
- 6. Click **Options** icon and then, select any of the following options:
 - a. Unlock To modify the record details. Refer to the Create screen for the field level details.
 - **b.** Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click Approve to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click **View** to view the record details.
 - Click **Proceed** to delete the record.
 - d. Copy To copy the record parameters for creating a new record.
 - e. View To view the record details.
 - f. Reopen To reopen the closed record.

3.3 Commodity Maintenance

This topic describes the information to maintain the commodity details to each supplier for creation of invoice data either through UI or upload.

This topic contains the following subtopics:

Create Commodity

This topic describes the systematic instruction to create a commodity record required for creation of invoice/PO record.

View Commodity

This topic describes the systematic instruction to view, modify, delete, or authorize the commodities that have been created.

3.3.1 Create Commodity

This topic describes the systematic instruction to create a commodity record required for creation of invoice/PO record.

Newly created alert types take effect once authorized and cannot be modified thereafter.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Commodity. Under Commodity, click Create Commodity.

The Create Commodity screen displays.

- e. View To view the record details.
- f. Reopen To reopen the closed record.

3.5 Reconciliation Rules Maintenance

This topic describes the information to maintain the Reconciliation Rules in Cash Management system.

Reconciliation is one of the core modules of Oracle® Banking Cash Management application which can be performed for two categories namely **Invoice payment** and **Cash flow payment**.

- Invoice/Debit Note with Payment: Any outstanding invoice/debit note due from buyer can be reconciled against payment(s), as per the reconciliation rules configured in the application.
- **Cashflow with Payment**: Any outstanding expected cash flow raised by a corporate in the application, can be reconciled against payment(s), as per the reconciliation rules configured for this category in the application.
- **Invoice with Credit Note**: Any outstanding invoice due from buyer can be reconciled against credit note(s), as per the reconciliation rules configured in the application.

This topic contains the following subtopics:

Reconciliation Rule Definition

This topic describes the information to configure recon rules for reconciliation category in Cash Management system.

Reconciliation Rule Decision
 This topic describes the information to set the priority for the execution of recon rules.

3.5.1 Reconciliation Rule Definition

This topic describes the information to configure recon rules for reconciliation category in Cash Management system.

There are two types of rules can be configured; **Exact** and **Generic**.

For the 'Exact' type of rule, attributes of one entity are mapped with attributes of another entity, e.g.: for 'Expected Debit/Credit to Payment' recon category attributes of expected debit/credit entity are mapped to attributes of payment entity and similarly for 'Invoice to Payment' recon category, attributes of invoice are mapped to attributed of payment for matching purpose. Also, multiple recon rules can be defined at global/default level or mapped to the corporate with priority assignment.

For the 'Generic' type of rule, user can configure generic reconciliation methods such as FIFO, LIFO, HAFO, and LAFO. As per selected method: one can choose 'Based on' attribute. For example, in 'FIFO' for Invoice Payment recon category, one can choose 'Invoice Date' or 'Invoice Due Date'. Similarly, in 'FIFO' for Expected Cashflow recon category, one can choose 'Expected Date' or 'Revised Expected Date'.

This topic contains the following subtopics:

- Create Exact Reconciliation Rule Definition This topic describes the systematic instruction for setting up recon rule for Exact reconciliation category.
- Create Generic Reconciliation Rule Definition This topic describes the systematic instruction for setting up recon rule for 'Generic' reconciliation category.
- View Reconciliation Rule Definition
 This topic describes the systematic instruction to view, modify, delete, or authorize
 the reconciliation rule definitions.

3.5.1.1 Create Exact Reconciliation Rule Definition

This topic describes the systematic instruction for setting up recon rule for Exact reconciliation category.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Reconciliation. Under Reconciliation, click Reconciliation Rule Definition
- 3. Under Reconciliation Rule Definition, click Create Reconciliation Rule Definition.

The Create Reconciliation Rule Definition screen displays.

Figure 3-28 Create Exact Reconciliation Rule Definition

Table 3-14 (Cont.) Exact Recon - Attributes

- g. Click starts with, ends with and Contains to define the text to be validated based on each selection.
- h. Click Operator to specify how to compare defined values.
- i. Repeat the above steps to add more conditions and/or group of conditions.
- j. Click **Delete** icon to delete the condition located at the right-bottom of the condition container.
- **k.** Click **AND** / **OR** to define how many conditions or combination of conditions should be matched to execute the recon rule.
- I. Click Validate and Preview to check if the added conditions are valid or not.

The Allocation Basis Grid displays.

Figure 3-32 Allocation Basis Grid

		+
llocation Attribute 🗘	Percentage 🗘	Action 🗘
Credit Account no ×	50	世
Remitter Account no ×	50	団

- 6. In the Allocation Basis Grid section, perform the following steps to define percentage of account/attribute allocation:
 - a. Click Add to add a new row.
 - **b.** Double click the row to add/edit attribute and percentage.
 - c. Repeat the above steps to add more attributes.
 - d. Click **Delete** icon under **Action** column to remove the allocation row.
- 7. Click Save to save the record and send it for authorization.

3.5.1.2 Create Generic Reconciliation Rule Definition

This topic describes the systematic instruction for setting up recon rule for 'Generic' reconciliation category.

Specify User ID and Password, and login to Home screen.

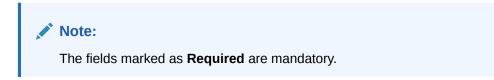

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Reconciliation. Under Reconciliation, click Reconciliation Rule Definition
- 3. Under Reconciliation Rule Definition, click Create Reconciliation Rule Definition.

The Create Reconciliation Rule Definition screen displays.

Figure 3-33 Create Generic Reconciliation Rule Definition

Create Reconciliation Rule Definition				Overrides JL X
Rule Description	Recon Category	Recon Type	Allocation Details	
RULE2	Invoice/Debit Notes to Credi 🔻	Exact Generic	Select	-

4. Specify the fields on Create Generic Reconciliation Rule Definition screen.

For more information on fields, refer to the field description table.

Field	Description				
Rule Description	Specify the description of recon rule.				
Recon Category	 Select any one of the below category of recon for which rule is defined. Invoice/Debit Notes to Credit Notes Recon Invoice/Debit Notes to Payment Recon Expected Cashflow To Payment Recon Allocation of Payment to Virtual Accounts 				
Recon Type	Select Generic as the category of the Recon definition.				
Allocation Basis	Select the value to specify whether the allocation should be done based on account or attribute.				

Table 3-15 Create Generic Reconciliation Rule Definition - Field Description

Figure 3-34 Generic Recon Rule

Base Entity	Generic Criteria	Based On Attribute		
Invoice	HAFO 👻	Invoice Amount		
				Cancel Save

5. In the Generic Recon section, perform the following steps:

The Base Entity is auto-populated based on selected Recon Category.

- a. In the Generic Criteria list, select the generic rule to be defined. viz. FIFO First In First Out, LIFO – Last In First Out, HAFO – Highest Amount First Out and LAFO – Least Amount First Out.
- b. In the Based On Attribute list, select the entity attribute on which the rule would be based. The available attributes are based on the combination of selected recon category and generic criteria.

The Allocation Basis Grid section displays.

Figure 3-35 Allocation Basis Grid

		+
Allocation Attribute 🗘	Percentage 🗘	Action \$
Credit Account no ×	50	
Remitter Account no ×	50	団

- 6. In the Allocation Basis Grid section, perform the following steps to define account/attribute allocation basis which the allocation would be done and percentage.
 - a. Click Add icon to add a new row.
 - **b.** Double click the row to add/edit attribute/account and appropriate percentage.
 - c. Repeat the above steps to add more attributes.
 - d. Click Delete icon under Action column to remove the allocation row.
- 7. Click Save to save the record and send it for authorization.

3.5.1.3 View Reconciliation Rule Definition

This topic describes the systematic instruction to view, modify, delete, or authorize the reconciliation rule definitions.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Reconciliation. Under Reconciliation, click Reconciliation Rule Definition.
- 3. Under Reconciliation Rule Definition, click View Reconciliation Rule Definition.

The View Reconciliation Rule Definition screen displays.

- 4. Filter the records in the View screen:
 - a. Click **Search** icon to view the filters. The user can filter the records by Rule Id, Rule Description, Recon Category, Recon Type, Allocation Details, Authorization Status, and Record Status.
 - b. Select the required filter criteria and click **Search** button to filter the records.
 - c. Click Reset to reset the filter criteria.
- 5. Click **Refresh** icon to refresh the records.
- 6. Click **Options** icon and then, select any of the following options:
 - a. **Unlock** To modify the record details. Refer to the **Create** screen for the field level details.
 - Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click Approve to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click **View** to view the record details.
 - Click **Proceed** to delete the record.
 - d. Copy To copy the record parameters for creating a new record.
 - e. View To view the record details.
 - f. **Reopen** To reopen the closed record.

3.5.2 Reconciliation Rule Decision

This topic describes the information to set the priority for the execution of recon rules.

This topic contains the following subtopics:

Create Recon Rule Decision

This topic describes the systematic instruction for mapping recon rule to a corporate or product or counterparty and assign appropriate priority in case multiple rules are mapped to a specific entity.

View Recon Rule Decision
 This topic describes the systematic instruction to view, modify, delete, or authorize
 the reconciliation rule decision.

3.5.2.1 Create Recon Rule Decision

This topic describes the systematic instruction for mapping recon rule to a corporate or product or counterparty and assign appropriate priority in case multiple rules are mapped to a specific entity.

Specify User ID and Password, and login to Home screen.

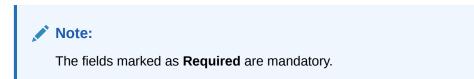

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Reconciliation. Under Reconciliation, click Recon Rule Decision
- 3. Under Recon Rule Decision, click Create Recon Rule Decision.

The Create Recon Rule Decision screen displays.

4. Specify the fields on Create Recon Rule Decision screen.

For more information on fields, refer to the field description table.

Field	Description
Filter Criteria	Select the appropriate filter criteria to map the reconciliation rule for specific application. The available options are: Corporate Based CounterParty Based Relationship and CounterParty Based Relationship Based Default
Program	Click the Search icon and select the program to setup the recon rule for. This field is displayed only if the Filter Criteria is selected as Program Based .
Counterparty Id	Click the Search icon and select the counterparty to setup the recon rule for. This field is displayed only if the Filter Criteria is selected as CounterParty Based .
Corporate	Click the Search icon and select the corporate to setup the recon rule for. This field is displayed only if the Filter Criteria is selected as Corporate Based .
Relationship Code	Click the Search icon and select the relationship to setup the recon rule for. This field is displayed only if the Filter Criteria is selected as Relationship Based .
Priority	Specify the priority to apply the rules in ascending order.
Recon Category	Select the category of recon rule being mapped. For example: Expected Debit/Credit to Payment Recon, or Invoice Payment Recon.
Recon Type	Select the type of reconciliation as either Generic or Exact rule.
Rule Id	Click Search icon to search and select all the existing rules available for recon category and type.
Rule Id Description	Displays the description of the rule based on the selected rule.
Execute Generic Recon	Select the option if generic recon is to be executed if there are more than one matching record post exact reconciliation and if generic recon rule is to be executed for matching outstanding payment to invoice or cashflow. This field is enabled only if Recon Type is selected as Exact .

Table 3-16 Create Recon Rule Decision - Field Description

- 5. Click **Reset** to reset the fields, if required.
- 6. Click Add/Edit to add the details to the grid.
 - Once an entry is made to the grid, click **Option** icon in the **Action** column, to edit or delete it.
 - Click Edit Table icon to add/remove columns to be displayed in the grid.
- 7. Perform the following steps to take action on the records in the grid.
 - Select the record in the grid and click **Option** icon in the **Action** column.
 - Click **Edit** to modify the details.
 - Click **Delete** to remove the record.

8. Click **Save** to save the record and send it for authorization.

3.5.2.2 View Recon Rule Decision

This topic describes the systematic instruction to view, modify, delete, or authorize the reconciliation rule decision.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed
- The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Reconciliation. Under Reconciliation, click Recon Rule Decision.
- 3. Under Recon Rule Decision, click View Recon Rule Decision.

The View Recon Rule Decision screen displays.

 - Click Proceed to delete the record.
- d. Copy To copy the record parameters for creating a new record.
- e. View To view the record details.
- f. Reopen To reopen the closed record.

3.6 Tolerance Maintenance

This topic describes the information to configure an acceptable discrepancy between invoice/ cashflow outstanding amount and payment amount to enable automatic matching of invoices/ cashflows with the respective payment records.

Reconciliation of repayments with invoices/cashflows are executed basis configured exact and generic reconciliation rules such as FIFO, LIFO etc. Through this functionality, user can configure an acceptable discrepancy between invoice/cashflow outstanding amount and payment amount to enable automatic matching of invoices/cashflow with the respective payment records. Tolerances allow outstanding payments and invoice/cashflow records to match even if the respective amount differ. Similarly, tolerance can be configured for other categories as well. Without the tolerance configuration, user intervention would be required for matching invoices/cashflows and payment records that does not have equated amounts.

This topic contains the following subtopics:

- Create Tolerance
 - This topic describes the systematic instruction to create a tolerance.
- View Tolerance This topic describes the systematic instruction to view, modify, delete, or authorize tolerance details.

3.6.1 Create Tolerance

This topic describes the systematic instruction to create a tolerance.

Newly created tolerance takes effect once authorized and cannot be modified thereafter.

Specify User ID and Password, and login to Home screen.

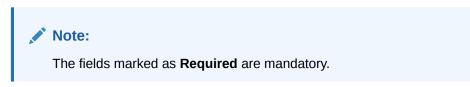

- On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- Under Maintenance, click Tolerance. Under Tolerance, click Create Tolerance.
 The Create Tolerance screen displays.

 - e. View To view the record details.
 - f. Reopen To reopen the closed record.

3.7 Payment Terms Maintenance

This topic describes the information to maintain specific payment frequencies and dates for buyers making bulk payments on repetitive fixed dates.

Payment frequencies such as weekly, monthly etc. can be maintained against each buyer.

This topic contains the following subtopics:

Create Payment Terms

This topic describes the systematic instruction to create a payment term for a buyer.

View Payment Terms

This topic describes the systematic instruction to view, modify, delete, or authorize payment terms details.

3.7.1 Create Payment Terms

This topic describes the systematic instruction to create a payment term for a buyer.

Newly created payment terms takes effect once authorized and cannot be modified thereafter.

Specify User ID and Password, and login to Home screen.

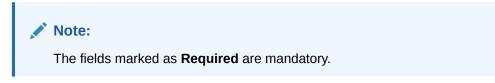

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Payment Terms. Under Payment Terms, click Create Payment Terms.

The Create Payment Terms screen displays.

 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click **View** to view the record details.
 - Click **Proceed** to delete the record.
 - d. **Copy** To copy the record parameters for creating a new record.
 - e. View To view the record details.
 - f. Reopen To reopen the closed record.

3.8 Relationship Maintenance

This topic describes the information to create linkage between corporates and counterparty.

Corporate/Back-office users can link their customers or non-customers as counterparties through this module. In case, if record of non-customer to be linked is not established in the application, then the same can be created through this screen.

This topic contains the following subtopics:

- Create Relationship
 This topic describes the systematic instruction to create relationship between corporates and buyers, or suppliers counterparties.
- View Relationship This topic describes the systematic instruction to view, modify, delete, or authorize relationship details.
- View Non Customer

This topic describes the systematic instruction to view, modify, delete, or authorize non-customer details.

3.8.1 Create Relationship

This topic describes the systematic instruction to create relationship between corporates and buyers, or suppliers counterparties.

Newly created relationships take effect once authorized and cannot be modified post authorization. However, the counterparty can be added/modified.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Relationship Management. Under Relationship Management, click Create Relationship.

The **Create Relationship - Customer** screen displays if the **Corporate Id** is selected with the Customer.

3. Specify the fields on **Create Relationship** screen.

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

 Table 3-20
 Create Relationship - Field Description

Field	Description
Relationship Code	Specify the unique relationship code to be created. This field cannot be modified once authorized.
Relationship Description	Specify the description of the code.
Corporate Id	Click the Search icon to select the corporate for whom the linkage to counterparty is required.

Field	Description
Product Category	Select the applicable product categories as Receivables and Collections and/or Payables . The Search fields and result data grid for each category is displayed upon selecting the category.
Effective From	Click the Calendar icon to select the date from which the relationship is active. The system considers the branch date, if this field is left blank.
Valid Till	Click the Calendar icon and select the date till which the relationship would be valid.
Receivable Parameters	Select the parameters required for Receivables in the following fields.
Auto-Debit Applicable	Switch the toggle ON, if the automatic debit facility is applicable for receivables at the relationship level.
Holiday Treatment	Select the value to specify how to treat transactions falling on holidays. The options are: • Previous Business Date • Next Business Date
Auto Acceptance Applicable	Switch the toggle ON, if the auto acceptance should be enabled for the receivables.
No. of Days	Specify the number of day(s) post which the auto-acceptance is triggered for the receivables. This field displays only if the Auto Acceptance Applicable toggle is enabled.
Allow Overdue Receivables	Switch the toggle ON to allow the creation of overdue invoices and debit notes for the relationship.
Maximum Days Overdue	Specify the maximum number of days post the invoice/debit- note due date (if maintained), until when the creation of the receivable is allowed. This field displays only if the Allow Overdue Receivables toggle is enabled.
Validate Linked Purchase Orders	Switch the toggle ON to validate the purchase orders linked with invoice during creation or upload.
Excess Handling	Select how excess payment made towards settling of outstanding invoice/finance, should be handled. The options are: • Refund to beneficiary or payment party • Auto-Reconcile • Manually-Reconcile • Auto-Reconcile and Refund
Excess Refund Party	 Select the party to refund the excess amounts to. The options are: Payment Party Beneficiary/Counter Party
Excess Refund Payment Mode	Select the mode of payment for the excess payment refund. The options are: • Account Transfer • Cheque • EFT

Table 3-20 (Cont.) Create Relationship - Field Description

Field	Description
Field	Description
Payables Parameters	Select the parameters required for Payables in the following fields.
Auto-Debit Applicable	Switch the toggle ON, if the automatic debit facility is applicable for payables at the relationship level.
Holiday Treatment	 Select the value to specify how to treat transactions falling on holidays. The options are: Previous Business Date Next Business Date
Auto Acceptance Applicable	Switch the toggle ON, if the auto acceptance should be enabled for the payables.
No. of Days	Specify the number of day(s) post which the auto-acceptance is triggered for the payables. This field displays only if the Auto Acceptance Applicable toggle is enabled.
Allow Overdue Receivables	Switch the toggle ON to allow the creation of overdue invoices and debit notes for the relationship.
Maximum Days Overdue	Specify the maximum number of days post the payment due date (if maintained), until when the creation of the payable is allowed. This field displays only if the Allow Overdue Receivables toggle is enabled.
Validate Linked Purchase Orders	Switch the toggle ON to validate the purchase orders linked with invoice during creation or upload.
Excess Handling	Select how excess payment made towards settling of outstanding invoice/finance, should be handled. The options are: • Refund to beneficiary or payment party • Auto-Reconcile • Manually-Reconcile • Auto-Reconcile and Refund
Excess Refund Party	 Select the party to refund the excess amounts to. The options are: Beneficiary/Counter Party Payment Party
Excess Refund Payment Mode	 Select the mode of payment for the excess payment refund. The options are: Account Transfer Cheque EFT

Table 3-20 (Cont.) Create Relationship - Field Description

4. In the grid section, click **Add** icon to add the selected values in the grid.

A message appears enquiring if the relationship parameters should be applied to the counterparty record.

5. Click **Confirm**, if the relationship parameters must be percolated to the counterparty. Else, click **Cancel**.

Note:

If you click 'Confirm', the values of Auto-Debit Applicable, Holiday Treatment, Auto Acceptance Applicable, No. of Days, Allow Overdue Receivables, and Maximum Days Overdue fields are percolated to the counterparty being added. On clicking 'Cancel', these fields remain NULL at the counterparty-level.

- 6. Perform the following steps in the grid.
 - a. Click Search icon in the Buyer/Supplier Name and select the buyer/supplier.
 - b. Click Add icon to add Non Customer details.

Note:

Relationship cannot be created between non-customers, i.e., noncustomers cannot be added if the selected Corporate Id is a non-customer.

The Non Customer - Basic Info screen displays.

- f. **Reopen** To reopen the closed record.

3.9 Alerts Maintenance

This topic describes the information to setup the reference data for Alerts such as contact details, definition and decisioning in Cash Management system.

This topic contains the following subtopics:

Alert Contact Details

This topic describes the information to setup the reference data to maintain the contact details of the party for alert codes in Cash Management system.

Alert Definition

This topic describes the information to maintain the alert definitions in Cash Management system.

• Alert Decisioning This topic describes the information to set and manage the alerts in Cash Management system.

3.9.1 Alert Contact Details

This topic describes the information to setup the reference data to maintain the contact details of the party for alert codes in Cash Management system.

The user can maintain contact details for multiple alerts for a selected party.

This topic contains the following subtopics:

- Create Alert Contact Details
 This topic describes the systematic instruction to create a record of party contact details
 for alerts.
- View Alert Contact Details

This topic describes the systematic instruction to view, modify, or authorize the alert contact details.

3.9.1.1 Create Alert Contact Details

This topic describes the systematic instruction to create a record of party contact details for alerts.

A newly created contact details record takes effect once authorized and cannot be modified thereafter.

Specify User ID and Password, and login to Home screen.

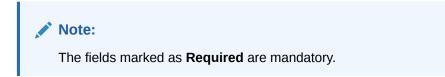

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Alerts. Under Alerts, click Alert Contact Details.
- 3. Under Alert Contact Details, click Create Alert Contact Details.

The Create Alert Contact Details screen displays.

 - f. Reopen To reopen the closed record.

3.9.2 Alert Definition

This topic describes the information to maintain the alert definitions in Cash Management system.

The **Alert Definition** functionality can be used to configure and manage the types of alerts. User can define alert categories for various events. These defined alerts can be further used in the **Alert Decisioning** screen to set alerts.

This topic contains the following subtopics:

- Create Alert Definition
 This topic describes the systematic instruction to configure and manage various types of alerts.
 - View Alert Definition This topic describes the systematic instruction to view, modify, or authorize the alert definitions.

3.9.2.1 Create Alert Definition

This topic describes the systematic instruction to configure and manage various types of alerts.

Newly created alert types take effect once authorized and cannot be modified thereafter.

Specify User ID and Password, and login to Home screen.

1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.

- 2. Under Maintenance, click Alerts. Under Alerts, click Alert Definition.
- 3. Under Alert Definition, click Create Alert Definition. The Create Alert Definition screen displays.

3.9.3 Alert Decisioning

This topic describes the information to set and manage the alerts in Cash Management system.

The **Alert Decisioning** functionality is used to choose from the defined alerts and set the same for a recipient. The delivery mode and frequency for sending the alerts can also be defined.

This topic contains the following subtopics:

- Create Alert Decisioning This topic describes the systematic instruction to set the delivery mode and frequency of sending alerts to a recipient.
- View Alert Decisioning This topic describes the systematic instruction to view, modify, or authorize alert decisioning record details.

3.9.3.1 Create Alert Decisioning

This topic describes the systematic instruction to set the delivery mode and frequency of sending alerts to a recipient.

Newly set decisioning records take effect once authorized. The phone number and email ID are obtained from the records maintained in the **Alert Contact Details** screen. Additional contact information can be entered in this screen.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Alerts. Under Alerts, click Alert Decisioning.
- 3. Under Alert Decisioning, click Create Alert Decisioning.

The Create Alert Decisioning screen displays.

Number of Alerts	Specify the total alerts to be sent.
Interval Days	Specify the interval in days between each alert.

- **11.** Click **Add/Edit** to add alert decision details in the grid or modify a selected records from the grid.
- **12.** Perform the following steps to take action on the records in the grid.
 - a. Select the record in the grid and click Options icon under the Action column.
 - b. Click Edit to modify records in the grid.
 - c. Click **Delete** to remove the record.
- 13. Click Save to save the record and send it for authorization.

3.9.3.2 View Alert Decisioning

This topic describes the systematic instruction to view, modify, or authorize alert decisioning record details.

A tile is present for each record that has been created. The bottom portion of each record-tile displays the following:

- The status, whether Authorized, Unauthorized, or Rejected
- Open or Closed

• The number of times the record has been submitted by the Maker added.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Maintenance.
- 2. Under Maintenance, click Alerts. Under Alerts, click Alert Decisioning.
- 3. Under Alert Decisioning, click View Alert Decisioning.

The View Alert Decisioning screen displays.

- 4. Filter the records in the View screen:
 - a. Click **Search** icon to view the filters. The user can filter the records by Corporate Id, Authorization Status, Record Status and Category.
 - b. Select the required filter criteria and click Search button to filter the records.
 - c. Click **Reset** to reset the filter criteria.
- 5. Click **Refresh** icon to refresh the records.
- 6. Click **Options** icon and then, select any of the following options:
 - Unlock To modify the record details. Refer to the Create screen for the field level details.
 - **b.** Authorize To authorize or reject the record. Authorizing/Rejecting requires necessary access rights.
 - Optional: Click View to view the record details.
 - Select the record and click Approve to approve the record.
 - Select the record and click **Reject** to reject the record. Specify the relevant comments in the pop-up window that appears, and click **Confirm**.
 - c. Delete/Close To remove the record.
 - Optional: In the confirmation pop-up window, click **View** to view the record details.
 - Click **Proceed** to delete the record.
 - d. Copy To copy the record parameters for creating a new record.

- e. View To view the record details.
- f. **Reopen** To reopen the closed record.

4 Create Receivables and Payables

This topic describes the systematic instruction to create invoices/purchase orders/debit notes/ credit notes.

The user can search the invoices/purchase orders/debit notes/credit notes based on various parameters such as reference number, supplier, buyer, date range, and so on and change their processing status.

Specify User ID and Password, and login to Home screen.

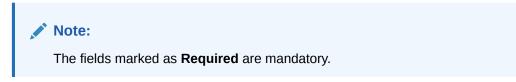

1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Create Receivables and Payables.

The Create Receivables and Payables screen displays.

Figure 4-1 Create Receivables and Payables

nstrument Type	R	ecord Status		Branch	Processing Date	
Select	•	New	In Progress	004-FLEXCUBE-UNIVERSAL	 April 29, 2022 	Proceed

2. Specify the details on the Create Receivables and Payables screen.

For more information on fields, refer to the field description table.

 Table 4-1
 Create Receivables and Payables - Field Description

Field	Description
Instrument Type	 Select the instrument type. The available options are: Invoice Purchase Order Debit Note Credit Note
Record Status	Click on the respective switch to create a new/existing invoices.
Branch	Specify your branch. By default, the branch of the logged-in user is selected.
Processing Date	Displays the date on which the instrument is processed.

The user can create the following instruments.

Create Invoice

This topic describes the systematic instruction to create an invoice using Create Receivables and Payables screen.

- Create Purchase Order
 This topic describes the systematic instruction to create a purchase order using
 Create Receivables and Payables screen.
- Create Debit Note

This topic describes the systematic instruction to create a debit note using Create Receivables and Payables screen.

Create Credit Note

This topic describes the systematic instruction to create a credit note using Create Receivables and Payables screen.

4.1 Create Invoice

This topic describes the systematic instruction to create an invoice using Create Receivables and Payables screen.

1. On Create Receivables and Payables screen, select Invoice from the Instrument Type list.

Basic Information

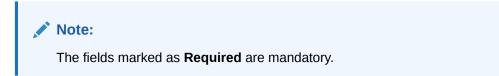

2. Click **Proceed** to view the screen for populating the invoice details.

The Invoice - Basic Information screen displays.

The relevant purchase order records are displayed.

c. Select the records and click **Save** to link the purchase orders to the invoice.

The **Link Purchase Orders** section displays with the linked purchase orders.For more information on fields, refer to the field description table.

Field	Description
Purchase Order Number	Displays the purchase order numbers of the same buyer-seller combination as the invoice.
Purchase Order Amount	Displays the purchase order amount.
Purchase Order Available Amount	Displays the purchase order amount as purchase order available amount. Once a purchase order is linked to an invoice, Purchase Order Available Amount = Purchase Order Amount - Invoice Allocated Amount.

Field	Description
Invoice Allocated Amount (PO CCY)	Displays the invoice amount allocated to a purchase order in PO currency. This field is editable and allows you to add the amount manually as well. On entering this value, the invoice allocation percentage is automatically updated. If Purchase Order Available Amount is greater than or equal to Invoice Amount, the entire invoice amount is allocated to the PO by default. If not, the invoice Amount to the extent of PO Available Amount is allocated to the purchase order.
Exchange Rate	Displays the exchange rate between invoice currency and PO currency.
Invoice Allocated Amount (Inv CCY)	Displays the invoice amount allocated to a purchase order in invoice currency.
Invoice Allocation Percentage	Displays the percentage of invoice amount allocated to a purchase order. This field is editable and allows you to add the percentage manually as well. On entering this value, the invoice allocated amount is automatically updated.
Purchase Order Available Amount Post- Linkage	Displays the available purchase order amount post the linkage with invoice.
Action	 Displays the following options to edit or delete the purchase order record. Click Edit icon to edit the record. Click Delete icon to delete the record.

- 7. Switch the Add Commodities toggle ON to add the Commodity details.
- 8. In the Add Commodities section, click Add icon to add the commodity details.

 Table 4-5
 Commodity Details - Field Description

Field	Description
Commodity Details	Displays the fields related to the Commodity details. This section appears if the Add Commodities toggle is switched ON.
Commodity Name	Displays the commodity name based on the selected commodity code.
PO Number	Displays the reference number of the linked purchase orders.
Unit	Select the measuring unit for the goods.
Quantity	Specify the quantity of the goods as per selected measuring unit.
Unit Cost	Specify a single unit's cost of the goods.
Discount (%)	Specify the percentage of discount to be applied on the total cost.
Discount Amount	Displays the discount amount based on the discount percentage.
Tax (%)	Specify the percentage of tax to be applied on total amount post discounting.
Tax Amount	Displays the tax amount based on tax percentage.

Field	Description
Net Cost (PO Ccy)	Displays the total amount of the commodity after discount, and inclusion of tax. Total Net Cost should be equal to Total Invoice Allocated Amount. The value is displayed in the PO Currency.
Net Cost (Inv Ccy)	Displays the total amount of the commodity after discount, and inclusion of tax. Total Net Cost should be equal to Total Invoice Allocated Amount. The value is displayed in the Invoice Currency.
Action	 Displays the following options to edit or delete the commodity details. Click Edit icon to edit the record. Click Delete icon to delete the record.

- **13.** Review the detail of the credit note being created and perform any of the below action from the **Summary** screen.
 - Click **Save and Close** to save the credit note details and submit it for authorization.
 - Click Back to go to the Commodity and Pricing screen.
 - Click **Cancel** to cancel the creation of the credit note.

5 Receivables and Payables Management

This topic describes the systematic instruction to process and take various actions on instruments (Invoices/Purchase Order/Debit Note/Invoice & Debit Note).

The user can search for the instruments based on the various parameters such as file name, reference number, supplier, date range, amount range, and so on.

Specify User ID and Password, and login to Home screen.

1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Receivables and Payables Management.

The Receivables and Payables Management screen displays.

Figure 5-1 Receivables and Payables Management

- 4. Specify the value for at least one mandatory field to search the instrument(s).
- 5. Click Search to view the search results.
- 6. Click **Reset** to clear the search fields.
- Accept Receivables and Payables This topic describes the systematic instruction to accept the invoices/debit notes/ purchase orders.
- Assignment Receivables and Payables This topic describes the systematic instruction to assign the invoices/debit notes.
- Cancel Receivables and Payables This topic describes the systematic instruction to cancel the invoices/debit notes/ purchase orders.
- Edit Receivables and Payables This topic describes the systematic instruction to edit the invoices/debit notes/ purchase orders.
- Initiate Finance for Receivables and Payables
 This topic describes the systematic instruction to initiate finance for the invoices/ debit notes/purchase orders that are linked to a program and have been accepted.
- Link Program for Receivables and Payables This topic describes the systematic instruction to link program for the invoices/ debit notes/purchase orders.
- Raise Dispute for Receivables and Payables This topic describes the systematic instruction to raise dispute for the invoices/ debit notes.
- Reassign Receivables and Payables This topic describes the systematic instruction to reassign the invoices/debit notes.

- Resolve Dispute on Receivables and Payables This topic describes the systematic instruction to resolve dispute on the invoices/debit notes.
- Write Off Disputed Receivables and Payables This topic describes the systematic instruction to write off the disputed invoices/debit notes.
- Mark PUA (Payment Under Approval) for Receivables and Payables This topic describes the systematic instruction to mark PUA (Payment Under Approval) for the invoices/debit notes.
- Mark Indirect Payment for Receivables and Payables This topic describes the systematic instruction to mark indirect payment for the disputed invoices/debit notes.
- Accept Early Payment for Receivables and Payables This topic describes the systematic instruction to accept the invoices/debit notes for early payment offer.
- Link Purchase Orders for Receivables and Payables This topic describes the systematic instruction to link the Purchase Orders for the invoices.

5.1 Accept Receivables and Payables

This topic describes the systematic instruction to accept the invoices/debit notes/purchase orders.

Perform the following steps post searching the invoices/debit notes/purchase orders for the **Accept** action:

- 1. On Receivables and Payables Management screen, select the action as Accept.
- 2. Click **Proceed** to view the search parameters.
- 3. Specify the value for at least one mandatory field to search the instrument(s).
- 4. Click **Search** to view the search results.

- 5. Optional: In the **Reference/PO Number** column, click the link to view the details of the instrument.
- 6. Select the invoice/debit note/PO to be accepted.
- 7. Optional: In the **Remarks** field, enter the remarks for the new acceptance amount.

- 8. In the Acceptance Amount field, enter the amount to be accepted.
- 9. Click Apply to make changes in the grid.
- 10. If required, click Undo to revert the applied changes.
- Click Submit to accept the invoice/debit note/PO and send it for authorization (if applicable).

5.2 Assignment Receivables and Payables

This topic describes the systematic instruction to assign the invoices/debit notes.

Perform the following steps post searching the invoices/debit notes for the **Assignment** action:

Note:

This action is available only if the Receivables and Payables module is integrated with **Oracle Banking Supply Chain Finance** system.

- 1. On Receivables and Payables Management screen, select the action as Assignment.
- 2. Click Proceed to view the search parameters.
- 3. Specify the value for at least one mandatory field to search the instrument(s).
- 4. Click Search to view the search results.

The Assignment Receivables and Payables screen displays.

- 5. Optional: In the **Reference/PO Number** column, click the link to view the details of the instrument.
- 6. Select the invoice/debit note/PO to be edited.

The existing information gets auto-populated in the respective fields in the **Basic Details**, **Shipment Information** and **Pricing** tabs.

7. Switch the **Bulk Edit** toggle ON to edit the multiple instruments together.

Note:

Bulk edits can be done for instruments of the same buyer and seller only.

8. Specify/Modify the required fields.

Note:

Refer the **Create Receivables and Payables** topic for more information on the fields.

- 9. Click **Apply** to make changes in the grid.
- **10.** If required, click **Undo** to revert the applied changes.
- **11.** Click **View Edits** hyperlink in the **Review Edits** column to view the modified information.

The View Edits popup screen displays.

12. Click **Submit** to accept the invoice/debit note/purchase order and send it for authorization (if applicable).

5.5 Initiate Finance for Receivables and Payables

This topic describes the systematic instruction to initiate finance for the invoices/debit notes/ purchase orders that are linked to a program and have been accepted.

Perform the following steps post searching the invoices/debit notes/PO for the **Initiate Finance** action:

Note: This action is available only if the Receivables and Payables module is integrated with Oracle Banking Supply Chain Finance system. On Receivables and Payables Management screen, select the action as Initiate Finance.

- 2. Click **Proceed** to view the search parameters.
- 3. Specify the value for at least one mandatory field to search the instrument(s).
- 4. Click **Search** to view the search results.

The Initiate Finance - Invoice/Debit Note screen displays.

-------------	-----------------------------------

5. Optional: In the **Reference/PO Number** column, click the link to view the details of the instrument.

- 6. Select the invoice/debit note/PO to be financed.
- 7. Optional: In the **Remarks** field, enter the remarks about new finance amount.
- 8. Switch ON the **Auto-Apportion** switch to initiate the finance with available financial amount or with multiple finances of lesser amount.

Note:

If the **Auto-Apportion** switch is ON, the Finance Amount entered will be apportioned equally across the selected invoices/debit notes/PO. If the switch is OFF, the Finance Amount entered will be applied as-is to all the selected invoices/debit notes/PO.

- 9. In the **Finance Amount** field, enter the amount to be financed.
- **10.** Click **Apply** to make changes in the grid.
- **11.** If required, click **Undo** to revert the applied changes.
- 12. Click Submit to initiate finance and send it for authorization (if applicable).

A finance disbursement task is created in the **Free Tasks**, which can be acquired and processed.

Note:

For more information, refer the **Finance Disbursement** section in the **Oracle Banking Supply Chain Finance User Guide**.

5.6 Link Program for Receivables and Payables

This topic describes the systematic instruction to link program for the invoices/debit notes/ purchase orders.

Perform the following steps post searching the invoices/debit notes/purchase orders for the **Link Program** action:

Note:

This action is available only if the Receivables and Payables module is integrated with **Oracle Banking Supply Chain Finance** system.

- 1. On Receivables and Payables Management screen, select the action as Link Program.
- 2. Click Proceed to view the search parameters.
- 3. Specify the value for at least one mandatory field to search the instrument(s).
- 4. Click **Search** to view the search results.

The Link Program - Invoice/Debit Note screen displays.

- 7. Optional: In the **Remarks** field, enter the remarks for writing-off the disputed amount.
- 8. Click Apply to make changes in the grid.
- 9. If required, click Undo to revert the applied changes.
- Click Submit to write-off the disputed invoice/debit note and send it for authorization (if applicable).

5.11 Mark PUA (Payment Under Approval) for Receivables and Payables

This topic describes the systematic instruction to mark PUA (Payment Under Approval) for the invoices/debit notes.

Payment under Approval is a scenario where the buyer defaults, the import factor may make a payment to the export factor by extension to the seller.

Perform the following steps post searching the invoices/debit notes for the Mark PUA action:

Note:

This action is available only if the **Receivables and Payables** module is integrated with **Oracle Banking Supply Chain Finance** system.

- 1. On Receivables and Payables Management screen, select the action as Mark PUA.
- 2. Click **Proceed** to view the search parameters.
- 3. Specify the value for at least one mandatory field to search the instrument(s).
- 4. Click **Search** to view the search results.

The Mark PUA for Invoice/Debit Note screen displays.

- 8. Click Apply to make changes in the grid.
- 9. If required, click **Undo** to revert the applied changes.
- 10. Click Submit to mark PUA and send it for authorization (if applicable).

5.12 Mark Indirect Payment for Receivables and Payables

This topic describes the systematic instruction to mark indirect payment for the disputed invoices/debit notes.

Indirect Payment is a two-factor payment scenario where the buyer directly pays the supplier bypassing the import factor and export factor.

Perform the following steps post searching the invoices/debit notes for the **Mark Indirect Payment** action:

- 3. Specify the value for at least one mandatory field to search the instrument(s).
- 4. Click **Search** to view the search results.

The Mark Indirect Payment for Invoice/Debit Note screen displays.

- 8. Click **Apply** to make changes in the grid.
- 9. If required, click **Undo** to revert the applied changes.
- Click Submit to mark the invoice/debit note for indirect payment and send it for authorization (if applicable).

5.13 Accept Early Payment for Receivables and Payables

This topic describes the systematic instruction to accept the invoices/debit notes for early payment offer.

Perform the following steps post searching the invoices/debit notes for the **Accept Early Payment Offer** action:

	Note: This action is available only if the Receivables and Payables module is integrated with Oracle Banking Supply Chain Finance system.
1	On Receivables and Payables Management screen, select the action as Accept Early Payment.

- 2. Click **Proceed** to view the search parameters.
- 3. Specify the value for at least one mandatory field to search the instrument(s).
- 4. Click Search to view the search results.

Figure 5-34 Link Purchase Orders

- 5. Optional: In the **Reference/PO Number** column, click the link to view the details of the instrument.
- 6. Select the invoice to link a purchase order.
- 7. Optional: In the Remarks field, enter the remarks for the purchase order linking.
- 8. Click Link Purchase Orders, and select the purchase order to be linked.
- 9. Click **Apply** to make changes in the grid.
- **10.** If required, click **Undo** to revert the applied changes.
- 11. Click Submit to link the purchase orders and send it for authorization (if applicable).

A link purchase order task is created in the **Free Tasks** under **Instruments** menu, which can be acquired and processed.

6 Machine Learning

This topic describes the information to train the system for feeding the invoice/PO details.

By using NLP toolkit under Machine Learning, the user can train the system to fetch data from images (pdf or jpg format) of invoice/PO. Invoice engine reads the data extracted from images and creates invoices from the same.

Create Use Case

This topic describes the systematic instruction to create, modify, authorize, and view the use cases to be utilized for machine learning.

Create Annotated File

This topic describes the systematic instruction to create an annotated file where the user can insert an invoice/PO image file and tag the labels to extract the values from images.

- Model Training
 This topic describes the systematic instruction to train the model created by using Annotator.
- Model Management

This topic describes the systematic instruction to authorize trained models created form the annotated file.

- Upload Documents This topic describes the systematic instruction to upload the scanned images of the invoice/PO to be auto-fetched by system and create invoice/PO from the same.
- View Transaction Log

This topic describes the systematic instruction to view status-wise processing details of each uploaded documents.

6.1 Create Use Case

This topic describes the systematic instruction to create, modify, authorize, and view the use cases to be utilized for machine learning.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Machine Learning. Under Machine Learning, click NLP Tool Kit.
- 2. Under NLP Tool Kit, click Use Case Definition.

The Use Case Definition screen displays.

- 4. In the Use Case Name field, enter name of the use case to be defined.
- 5. In the **Description** field, enter the description of the use case.
- 6. In the **Straight Through Processing** option, select **Yes** in case if the use case should be auto-processed without user intervention. Else, select **No**.
- 7. Click Add icon to add a row for tag information.
- 8. Double click on the row in table edit the tag details.
- 9. Select the row and then click **Remove** icon to delete the row.
- 10. Click **Save** to create the use case and send it for authorization.

6.2 Create Annotated File

This topic describes the systematic instruction to create an annotated file where the user can insert an invoice/PO image file and tag the labels to extract the values from images.

By using this sub-menu, the user can create the annotated file.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Machine Learning. Under Machine Learning, click NLP Tool Kit.
- 2. Under NLP Tool Kit, click Annotator.

The Annotator screen displays.

Figure 6-3 Annotator

					Back Submit

- **12.** If required, click **Expand All** to view allocation details or **Collapse All** to hide the same.
- **13**. Click **Submit** to send the record(s) for authorization.

If **De-Allocate** option is selected:

- **14.** On **List of Payments** section, select the payment to be de-allocated.
- 15. Click Proceed.

The Confirmation message for de-allocation displays.

16. Click Confirm.

The status of the transaction message displays.

8 Manual Reconciliation

This topic describes the information to manually 'Reconcile' or 'De Reconcile' the payments/ credit notes against invoices or cashflows in case of exceptions in the auto recon process.

In Manual Reconciliation, the back-office user can search and reconcile records basis on invoice related attributes, or payment related attributes, or cashflow related attributes depending upon the selected reconciliation category. From the search result, user can choose how to reconcile the data i.e. 'One Invoice to Many Payments' or 'Many Invoice to One Payment' or 'One Cashflow to Many Payment', and so on.

Similarly, user can de-reconcile any record that was reconciled manually or automatically. This is useful to correct the reconciliation, incorrectly done manually or by automatic rule engine.

The user can select a value from the list for the field 'Reconciled by'. Based on the value selected, the grid below will enable/disable 'Invoices/Cashflows' and/or 'Payments' row post selection.

• Search

This topic describes the information to search the transactions for performing the manual reconciliation differs as per the recon category.

Reconcile

This topic describes the systematic instruction to select multiple records or single record to reconcile.

De-Reconcile

This topic describes the systematic instruction to select multiple records or single record to de-reconcile.

8.1 Search

This topic describes the information to search the transactions for performing the manual reconciliation differs as per the recon category.

This topic contains the following subtopics:

- Invoice/Debit Notes to Payments/Credit Notes Recon This topic describes the systematic instruction to search the invoices/payments to reconcile or de-reconcile.
- Expected Cashflow to Payments Recon
 This topic describes the systematic instruction to search the invoices/payments to
 reconcile or de-reconcile.

8.1.1 Invoice/Debit Notes to Payments/Credit Notes Recon

This topic describes the systematic instruction to search the invoices/payments to reconcile or de-reconcile.

1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Manual Recon.

The Manual Recon screen displays.

Figure 8-1 Manual Recon

6. Specify the fields on Manual Recon - Search screen.

Note:

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Field	Description
Reconcile Method	Specify whether the reconciliation was done by using 'Auto' or 'Manual' method. This field is displayed only when 'Action' is selected as 'De Reconcile'.
Reconciliation Reference No	Click the Search icon to select the reconciliation reference number. This field is mandatory and displayed for only 'Manual' de- reconciliation method.
Reconcile Date From	Click the Calendar icon to specify start date of range within which record was reconciled. This field is displayed only when 'Action' is selected as 'De Reconcile'.
Reconcile Date To	Click the Calendar icon to specify end date of range within which record was reconciled. This field is displayed only when 'Action' is selected as 'De Reconcile'.
Invoices	Displays the following fields under the Invoices section.
Buyer	Click the Search icon to search buyer mentioned in the invoice
Supplier	Click the Search icon to search supplier by whom invoice is generated.
Invoice Number	Specify the specific internal invoice reference number to search.
Invoice Currency	Specify the currency selected for Invoice.
Date Reference Basis	Select the value to specify the reference for date criteria.
Date From	Click the Calendar icon to specify the start date of range for selected date reference basis.
Date To	Click the Calendar icon to specify the end date of range for selected date reference basis.
Relationship	Click the Search icon to select the relationship code used in the transaction.
Program	Click the Search icon to select the program linked with the invoice. This field is applicable to only OBSCF system.
Amount Reference Basis	Select the reference basis of the amount range as base invoice amount or net invoice amount.
Amount From	Specify the lowest amount of the range.
Amount To	Specify the highest amount of the range.
Account Number	Click the Search icon to select the account number. This field is enabled only after selecting supplier.
Payments	Displays the following fields under the Payments section.
Payment Number	Specify the unique reference number generated while making a payment.
Date Reference Basis	Select the reference basis of the date range as payment date or value date.
Date From	Click the Calendar icon and select the start of the date-range.
Date To	Click the Calendar icon and select the end of the date-range.
Payment Party	Click the Search icon to select the party who made the payment.

 Table 8-1
 Manual Recon - Field Description

Field	Description
Beneficiary Id	Click the Search icon to select the beneficiary id or name who received the payment. In case if supplier is selected in the 'Invoice' search parameter; then the same gets auto-populated here.
Payment Type	Select the option that the payment is to be made towards.
Remarks	Specify the remarks added in the transaction.
Counter Party	Click the Search icon to select the counterparty.
Payment Mode	Select the mode by using which payment was done. For example: Account Transfer, NEFT etc.
Debit-Credit Indicator	Select the value to specify whether the transaction is of debit or credit type.
Remitter Account Number	Click the Search icon and select the remitter account of the transaction.
Credit Account Number	Click the Search icon and select the account credited with the amount.
Payment Currency	Select the currency in which payment is done.
Amount From	Select the minimum amount of the payment range.
Amount To	Select the maximum amount of the payment range.
Account Owner	Click the Search icon and select the owner of the account.
Relationship	Click the Search icon to select the relationship code used in the transaction.
Program	Click the Search icon to select the linked program. This field is applicable only to the Oracle Banking Supply Chain Finance system.
Payment Towards	Select what the payment has been made towards.
Indirect Payment	Select whether any indirect payment is made.
Credit Notes	Displays the following fields under the Credit Notes section.
Credit Note Number	Specify the unique reference number generated for the credit note.
Buyer	Click the Search icon to search buyer mentioned in the credit note.
Supplier	Click the Search icon to search supplier by whom credit note is generated.
Remarks	Specify the remarks added in the transaction.
Currency	Specify the currency selected for credit note.
Amount From	Select the minimum amount of the credit note range.
Amount To	Select the maximum amount of the credit note range.
Relationship	Click the Search icon to select the relationship code used in the transaction.
Date Reference Basis	Select the reference basis of the date range as payment date or value date.
Date From	Click the Calendar icon and select the start of the date-range.
Date To	Click the Calendar icon and select the end of the date-range.
Program	Click the Search icon to select the linked program. This field is applicable only to the Oracle Banking Supply Chain Finance system.

- 8. In the Invoices section,
 - a. Select the invoice(s) to be reconciled.
 - b. In the Amt to be Reconciled (Inv Ccy) field, enter the amount to be reconciled in invoice currency.
- 9. Optional: In the Rule Details column, click Details hyperlink to view rule details.
- 10. Click **Proceed** to move to the **Allocation** stage.

The Allocation screen displays.

- **11.** Perform the following steps to allocate payment manually:
 - a. In the **Allocation Required** column, enable the toggle to allocate account and percentage.
 - b. In the Virtual Account column, select the account to be allocated.
 - c. In the Allocated Amount column, specify the amount to be allocated for the respective virtual account.
 - d. In the **Percentage** column, specify the percentage of the amount.
- 12. Click **Submit** to confirm the reconciliation and send the record for authorization.

Note:

A cashflow record is automatically created for every new invoice/debit note record, if the 'Create Cashflow from Invoice' system-level configuration flag is set to 'Yes'. In this case, the 'Not to be Reconciled Directly' record-level flag is also defaulted to 'Y', so that if the invoice is reconciled with payments or credit notes, then the corresponding cashflow record should not be considered for auto or manual reconciliation. The same is true with reconciliation of debit notes with payments or credit notes.

8.3 De-Reconcile

This topic describes the systematic instruction to select multiple records or single record to de-reconcile.

The user can use this option to de-reconcile 'Invoice/Debit Notes to Payment/Credit Notes' or 'Expected Cashflow to Payment' that are reconciled incorrectly due to some erroneous mapping of payments to an invoice/cashflow either automatically or manually.

1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Manual Recon.

The Manual Recon screen displays.

Figure 8-8 Manual Recon

Manual Recon				, r ×
Action	Recon Category	Branch	Processing Date	
De Reconcile 🔹	Expected Cashflow to Payment	004-FLEXCUBE-UNIVERSAL-B	April 29, 2022	Proceed

- 2. In the Action field, select the action to be performed as **Reconcile** or **De Reconcile**.
- 3. In the Recon Category list, select the category as Invoice/Debit Notes to Payment/Credit Notes.
- In the Branch list, select the branch for which reconciliation needs to be done. By default, the branch of the logged-in user is selected.
- 5. Click **Proceed** to view the search parameters to search transactions.

The Manual Recon - Search section displays.

								Proceed

- 7. Select the records to de-reconcile.
- 8. Click **Proceed** to send the record for authorization of de-reconciliation.

9 Payment Management

This topic describes the systematic instruction to stop the payment from being reconciled automatically or manually.

By using this screen, the user can mark the payment for 'Not to be Reconciled' or 'Not to be Auto-Reconciled'

Specify User ID and Password, and login to Home screen.

1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Payment Management.

The Payment Management screen displays.

Figure 9-1 Payment Management

Payment Management			
Branch 004-FLEXCUBE-UNIVERSAL	Action Select	Processing Date January 20, 2020	Proceed
	Not to be Auto-Recon		
	Mark Refund		
	Not to be Recon		

- 2. In the **Branch** list, select the branch for which the payment needs to be managed.
- 3. In the Action list, select any one of the following:
 - Not to be Recon: To stop payment from being manually reconciled.
 - Not to be Auto-Recon: To stop payment from being automatically reconciled.
 - Mark for Refund: To mark the unreconciled portion of a payment for refund. This
 action is applicable only to unreconciled or part-reconciled payments, which are not
 in processing stage, and which have flags set to 'l' (invoice), or 'F' (finance), or null.
- 4. Click **Proceed** to view the search parameters.
- 5. Specify the fields on **Payment Management** screen.

Note:

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Table 9-1 Payment Management - Field Description

Field	Description
Payment Number	Specify the payment reference number to be searched.

Field	Description
Payment Mode	Select the mode of payment to search the payment by.
Debit-Credit Indicator	Select the value to specify whether the payment is of type credit or debit.
Payment Party	Click the Search icon and select the party making the payment.
Counter Party	Click the Search icon and select the counter-party for the payment.
Beneficiary	Click the Search icon and select the beneficiary of the payment.
Remitter Account Number	Click the Search icon and select the remitter's account number used for the payment.
Credit Account Number	Click the Search icon and select the account of the beneficiary.
Payment Towards	 Select the entity towards which the payment has been initiated. The options are: None Virtual Account Expected Cashflow Finance Invoice
Payment Type	Select the value to specify the type of payment.
Recon Status	Select the current recon status of the payment.
Allocation Status	Select the allocation status of the payment.
Amount Reference	Select the value to specify the reference for amount criteria.
Currency	Select the currency of the amount.
Amount From	Specify the start of the amount-range within which the payment needs to be searched.
Amount To	Specify the end of the amount-range within which the payment needs to be searched.
Date Reference Basis	Select the value to specify the reference for date criteria.
Date From	Click the Calendar icon and select the starting-range of the payment/value date.
Date To	Click the Calendar icon and select the range-ending of the payment/ value date.

8. Select the payment records to process and then click **Submit** to send the records for authorization.

10 File Management

This topic describes the information on the File Management functionality provided in Receivables and Payables module.

The **File Management** functionality enables you to upload files in a pre-defined format. These files are auto-processed by the system based on their type and set rules. The process is mainly divided into two screens:

Upload Files

This topic describes the systematic instruction to upload a file for entering the instrument collection data into the system.

View File Upload Status

This topic describes the systematic instruction to manage the status of the uploaded files.

10.1 Upload Files

This topic describes the systematic instruction to upload a file for entering the instrument collection data into the system.

The uploaded files are not processed until it is approved. The file can contain data records of cashflow codes and cashflow transactions etc. The file format accepted by the system includes ".csv" files.

 - a. Click **Download** icon to download the file.
 - **b.** Click **View Remarks** in the **Action** column to view the comments added while rejecting the file.
 - c. Click View Status in the Action column to view more details of the rejected file.

11 Inquiries

This topic describes the information on the various inquiries supported in the Receivables & Payables module.

Accounting Inquiry

This topic describes the systematic instruction to search for accounting entries based on various criteria such as File Reference Number, Event, Product, Party, Account Number, and so on.

Charge Inquiry

This topic describes the systematic instruction to inquire charges applied to the customer based on the various criteria such as Charge Type, Charge Account, Transaction Reference Number, Date range, etc.

Credit Note Inquiry

This topic describes the systematic instruction to inquire credit notes applied to the customer based on the various criteria such as Credit Note Number, Buyer, Supplier, Date Range, and so on.

Payment Inquiry

This topic describes the systematic instruction to inquire real time status of payment based on the various criteria such as Payment Reference Number, Payment Party, Counterparty, Payment Range, Date Range, etc.

• Purchase Order Inquiry

This topic describes the systematic instruction to search for purchase orders based on various criteria such as File Reference Number, Purchase Order Number, Party, Purchase Order Status, Date Range, Currency and Amount Range.

Receivables Inquiry

This topic describes the systematic instruction to search for the invoices/debit notes based on the various criteria such as File Reference Number, External Invoice Number, Internal Invoice Reference Number, Buyer/Supplier, Status, Due Dates, etc.

11.1 Accounting Inquiry

This topic describes the systematic instruction to search for accounting entries based on various criteria such as File Reference Number, Event, Product, Party, Account Number, and so on.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Receivables And Payables. Under Receivables And Payables, click Inquiry.
- 2. Under Inquiry, click Accounting Inquiry.

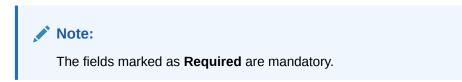

The Accounting Inquiry screen displays.

Figure 11-16 Receivables Inquiry

3. Specify the fields on **Receivables Inquiry** screen.

For more information on fields, refer to the field description table.

Field	Description		
File Name	Specify the name of the file used for uploading invoice.		
Instrument Type	Select the instrument type to specify whether the inquiry is for invoice or debit note.		
Reference Number	Specify the complete or partial reference number of the instrument to search for.		
Buyer	Click the Search icon to select the buyer mentioned in the invoice.		
Supplier	Click the Search icon to select the supplier mentioned in the invoice		
Relationship	Click the Search icon to select the relationship used for creating the invoice.		
Program	Click the Search icon to select the program linked with the invoice This field is applicable only for Oracle Banking Supply Chain Finance system.		
Instrument Status	Select the current instrument status to filter the search results. An invoice may have multiple attributes and a search can be performed on all these through a multi-select option for the instrument status field.		
Other Status	Select the applicable status to filter the search results. An invoice/ debit note may have multiple attributes and a search can be performed on all these through a multi-select option for the other status field. • Overdue • Approved		
	Assigned		
	Indirect Payment		
	Payment Under Approval		
	• Stale		

Field	Description		
Payment Status	 Select the payment status to filter the search results. Partial Paid Paid Unpaid 		
Finance Status	Select the finance status to filter the search results. Available options are: • Financed • Part Financed • Not Financed		
Amount Reference Basis	Select the reference for an amount range search.		
Currency	Select the currency of the instrument.		
Amount From	Specify the starting range of instrument amount to search.		
Amount To	Specify the ending range of instrument amount to search.		
Date Reference Basis	 Select the value to specify the reference for date criteria: Invoice/Debit Note Date Invoice/Debit Note Due Date Actual Payment Date Payment Due Date Funding Request Date 		
Date Range	Click the Calendar icon and select the start date and end date of the date range.		

Table 11-6 (Cont.) Receivables Inquiry - Field Description

4. Click **Search** to view the search results.

The Receivables Inquiry - Search Results screen displays.

12 Batch Jobs

This topic describes the events that are part of Beginning of Day (BOD) and End of Day (EOD) batch jobs run by the system on daily basis.

There are several activities required to be performed on a daily basis in the system. These activities are run by the system as a batch jobs at the beginning and/or end of the day.

EOD Batch

S No	Event Name	Description				
1	Stale Invoice	This event marks the Invoices as stale based on the configured settings for each product.				
2	Stale PO	This event marks the POs as stale based on the configure settings for each product.				
3	Invoice Acceptance	This event changes invoice status as accepted based on the configurations set in the system.				
4	Overdue Invoices	Updating the invoices as overdue.				
5	Invoice Charges	This event calculates the charges for invoices. Invoices are grouped into different bunches and all the applicable charges are applied for the particular bunch. Once the charges are applied, those are calculated immediately if they are online charges. In case of periodic charges, charges are calculated if the charge calculation date matches with the business date on which EOD is run. Accounting entries are posted once charges are calculated.				
6	PO Charges	This event calculates charges for the purchase orders. Purchase orders are grouped into different bunches and all the applicable charges are applied for a particular bunch. Once the charges are applied, those are calculated immediately if they are online charges. In case of periodic charges, charges are calculated if the charge calculation date matches with the business date on which EOD is run. Accounting entries posted once charges are calculated.				
7	Charges Batch Processing	This event calculates & collect periodic charges. All the charges for all the transactions present in the system are calculated and account entries are posted if the charge calculation date matches with the business date on which EOD is run.				

Table 12-1 EOD Batch

Note:

Refer the **Branch EOD** section in **Oracle Banking Common Core User Guide** to configure, invoke and view the EOD batch jobs.

Independent Batch

S No	Event Name	Description
1	Auto-Reconciliation	This job reconciles transactions for invoice, debit note, and finance, with payment/credit note based on configured auto-recon rules.
2	Future Dated Disbursement Processing	This job processes transactions with future dated disbursements.
3	Auto Debit Finance	This job processes auto debits for finance transactions as per configurations defined in the system.
4	Auto Debit Invoice	This job processes auto debits for invoice transactions as per configurations defined in the system.
5	Refund	This job processes refunds of excess, margin, and interest (where discounted loans are prematurely settled) against respective invoice-payment and finance settlement transactions as per configuration defined in the system.

Table 12-2	Independent Batch
------------	-------------------

Note:

Refer the **Task Management** section in **Tasks User Guide** to create, view, configure, trigger, and view status of the tasks.

13 Process Codes

This topic describes the information on the manual stages along with the functional activity codes.

Cash Management

The following table represents the manual stages in Cash Management workflow along with the functional activity codes which can be used for mapping in role activity screen under Security Management System menu.

Stage	Functional Activity Code	Description	
Processing	CMS_FA_MANUAL_ENRICH MENT	This is the processing stage of instrument collection where the maker can submit/reject an entry of instrument. If the entry is rejected, the record will be deleted and if submitted, then the transaction will be sent to the Authorization stag	
Authorization	CMS_FA_AUTHORISATION		
Rework	CMS_FA_CMSWK_REWOR K	If the checker rejects an entry, it goes to the rework stage where the maker can do the required modifications to the entry and submit it again.	
Posting Accounting Entries Exception	CMS_FA_POSTING_ACC_E XCEPTION	This is the accounting-posting workflow stage exception, where posting to FCUBS fails due to errors. These errors need to be resolved.	
Accounting Generation Exception	CMS_FA_ACC_GEN_EXCE PTION	This is the accounting-generation workflow stage exception, where accounting generation fails due to accounting setup errors. These accounting setup errors need to be resolved.	

Table 13-1 Functional Activity Code - Cash Management

Note:

Refer the **Role** section on **Oracle Banking Security Management System User Guide** to understand procedure for creating roles and assigning activity to it.

Recon

The following table represents the manual stages in Recon workflow along with the functional activity codes which can be used for mapping in role activity screen under Security Management System menu.

Stage	Functional Activity Code	Description	
Processing	SCFCM_FA_PROCESSIN G_AUTH_REJECT	This is a stage before authorization in which transaction is under processing before rejection.	
CL Exception	SCFCM_FA_CL_EXCEPTI ON	This stage is after authorization and transaction falls in this stage when integration for corporate lending is configured as 'Yes' in system parameters with another product and it fails.	
Accounting Regeneration Exception	SCFCM_FA_AC_REGEN_ EXCEPTION		
Authorization	SCFCM_FA_PROCESSIN G_AUTH	This is authorization step wherein user can either Approve/Reject the record. Transaction falls in this stage when auto-authorization is disabled in Product/Program parameters.	
Exception EX transact entries p 'Yes' in s		This stage is after authorization and transaction falls in this stage when accounting entries posting integration is configured as 'Yes' in system parameters with another product and posting fails.	
Limits Update Exception	SCFCM_FA_LIMITS_UPD _EX	This stage is after authorization and transaction falls in this stage when limits utilization/release fails due to technical error. The user can retry the transaction after the technical error is resolved.	
VAM Integration Exception	SCFCM_VAM_INTG_AUT H	This stage is after authorization and transaction falls in this stage when integration with virtual account management system fails.	
Master Update Retry	SCFCM_FA_MASTER_UP DATE_ERROR	This stage is after authorization and transaction falls in this stage when work table to main table approval update fails due to technical errors. The user can retry the transaction after the technical error is resolved.	

Table 13-2 Functional Activity Code - Recon

Note:

Refer the **Role** section on **Oracle Banking Security Management System User Guide** to understand procedure for creating roles and assigning activity to it.

Instrument

The following table represents the manual stages in Instrument workflow along with the functional activity codes which can be used for mapping in role activity screen under Security Management System menu.

Stage	Functional Activity Code	Description
MITagCorrection	SCFCM_FA_TXN_CREATE_ EXCEPTION	The transaction falls in this stage when transaction is not automatically created through file upload due to missing of tags.
Create Instrument Exception	SCFCM_FA_TXN_CREATE_ EXCEPTION	This is a stage before authorization and transaction falls in this stage if there is a technical error while creating a transaction for instrument.
Processing	SCFCM_FA_TXN_PROC	This is a stage before authorization and transaction falls in this stage when auto- processing is disabled in Program/Product parameters.
Transaction Rejection Approval	SCFCM_FA_TXN_REJECTI ON	This is a stage after authorization and transaction falls in this stage when it is rejected.
CL Exception	SCFCM_FA_CL_EXCEPTIO N	This stage is after authorization and transaction falls in this stage when integration for corporate lending is configured as 'Yes' in system parameters with another product and it fails.
Accounting Regeneration Exception	SCFCM_FA_AC_REGEN_E XCEPTION	This stage is after authorization and transaction falls in this stage when integration for accounting entries re-generation is configured as 'Yes' in system parameters with another product and regenerating the same fails.
Authorization	SCFCM_FA_TXN_AUTH	This is authorization step wherein user can either Approve/Reject the record. Transaction falls in this stage when auto-authorization is disabled in Product/Program parameters.
Accounting Post Exception	SCFCM_FA_ACC_POST_EX	This stage is after authorization and transaction falls in this stage when accounting entries posting integration is configured as 'Yes' in system parameters with another product and posting fails.
Limits Update Exception	SCFCM_FA_LIMITS_UPD_E X	This stage is after authorization and transaction falls in this stage when limits utilization/release fails due to technical error. The user can retry the transaction after the technical error is resolved.
Instrument Master Update Exception	SCFCM_FA_MASTER_UPD _EXCEPTION	This stage is after authorization and transaction falls in this stage when update of linked instrument in the master table fails due to technical errors. The user can retry the transaction after the technical error is resolved.
File Upload Exception	SCFCM_FA_FILE_UPLOAD _EX	This is a stage before authorization and transaction falls in this stage when upload of file fails.
Portal Response Exception	SCFCM_FA_PORTAL_RES_ EX	This is a stage where in portal does not respond due to the technical error. The user can retry the transaction after the technical error is resolved.

 Table 13-3
 Functional Activity Code - Instrument

Note:

Refer the **Role** section on **Oracle Banking Security Management System User Guide** to understand procedure for creating roles and assigning activity to it.
