Loans Syndication

Loan Syndication is a lending process in which a group of lenders provide loan to one or more borrowers. Each lender in the syndicate contributes part of the loan amount, and they all share in the lending risk. The loan is governed by a single Loan Agreement. However, each Lender of the Syndicated Loan maintains a separate claim on and bears the credit risk for the respective portion of the loan provided by it.

OBCLPM is capable of managing Pre-Mandate, Post-Mandate, Closing stages of Loan Syndication Origination and Drawdown.

OBCLPM has the below processes:

- Pre Mandate Lead Arranger Process – To handle the Bank role to invite Arrangers and to finalize the Mandate with the Borrower.

- Pre Mandate Co-Arranger Process – To support the Lead Arranger to finalize the Mandate with the Borrower.

- Post Mandate Agent Process – To manage the Agency role in Syndication Origination as a continuation of any of the Pre Mandate Process or as standalone process.

- Post Mandate Arranger Process – To manage the Arranger role in Syndication Origination to arrange Participants as a continuation of any of the Pre Mandate Process or as standalone process.

- Post Mandate Participant Process – To manage the Participant role in Syndication Origination.

- Operations Enrichment Process - To capture the details available during the Syndication Origination stages as a continuation of any of the Post Mandate process or as standalone process to handover the details for the creation of Syndicated Deal in the back office.

- Participant Drawdown – to manage Syndicated Loan Participant Drawdown of a participant bank.

- Agency Drawdown – to manage Syndicated Loan Drawdown of an Agent Bank.

This topic contains the following sub-topics:

- [Pre-Mandate Lead Arranger](#)
  Use Pre-mandate lead arranger to manage the beginning of the Syndication process.

  Use Consolidate Rollover to consolidate one or more contracts into a single parent contract.

- **Natural Language Processing**
  Use Natural Language Processing to initiate the NLP process from syndication service with the document ID (from document management system), document type and document content.

1.1 Pre-Mandate Lead Arranger

Use Pre-mandate lead arranger to manage the beginning of the Syndication process.

Pre-mandate lead arranger process manages the beginning of the Syndication process until the execution of the Mandate Letter. This process can manage initial analysis of borrower requirement, Solution Proposal and negotiation with Borrower, Inclusion of Co-Arrangers before or after the Solution Proposal, Obtaining Credit Approvals, Preparation of Mandate Documents and its execution. Upon Completion of Pre-mandate process, the details are handed over for the creation of respective Post Mandate Process.

The process flow for Pre-Mandate Lead Arranger undergoes goes the below stages:

Entry

Pre-Mandate process starts with the biding from the Borrower or the Bank approaching the Borrower User capture the basic details such as Borrower Information, Borrower Related Parties, Syndication Requirement, Expected Collateral value. Borrower and Borrower Related parties are sent to Borrower on-boarding team to start the Borrower evaluation process. If more than one Borrower and related parties are there, then that many process are initiated.

Review Pre Analysis

You can wait for the response from Borrower domain to get the initial analysis on the parties. Based on the response, you can take the appropriate decision to proceed. Up on proceeding

with the syndication application, you can create a task with internal legal department to prepare or review the draft Confidentiality Agreement (NDA).

NDA Preparation

Internal legal teams prepare and share the draft Confidentiality Agreement (NDA).

NDA Scrutiny

Up on receipt of draft NDA from the legal with their respective comment, you need to send the NDA to the Borrower for review after the Scrutiny. If any amendments required, then the document is sent back to the Legal team for modification. You can send multiple advises at this stage with attaching the different versions of the NDA.

Borrower Review - NDA

Borrower reviews and sign the NDA if the Borrower is agreeable with the format else sends the borrower comments to the Legal for modification of the draft. Execution of the documents takes place outside the system and Loans only track the status of the document).

Initiate QE

Once the NDA is signed, you can initiate quick evaluation on the customer with the credit system and wait for the evaluation results or you can only perform the evaluation in credit system. You can view the status of the evaluation and receive the result of the evaluation.

Review QE and Solution Structuring

Upon reviewing the customer evaluation, you can take a decision to proceed with the syndication and draft a solution. In addition, you take a decision to proceed with the arrangers or not. If the Arranger Invitation DS is filled at least with one arranger then the application will trigger a different flow, in which you can invite the arrangers to participate and help in providing the solution.

Solution Firming

This decision is reviewed by the approver. Approver can either approve the solution or cancel the application or proceed with the application in two ways one with co-Arranger and one without Co-arranger. If the process is without co-arrangers, then after the solution firming approval, you can send the solution to the borrower or modify the solution or cancel the application.

Solution with Arrangers

If any arranger details are captured other than the home bank, then you can follow this process. Send invitation to the Arrangers captured in the Arranger Invitation data segment. Advice is sent to the Arrangers along with Confidentiality Agreement (NDA). You can wait for the response from arrangers. You can track the acceptance response, the status of NDA execution, and also able to send the reminders.

For the arrangers which are shown interest in the syndication and returned the signed NDA, you can send the additional details about the Borrower. Advice is sent to the Arrangers with attachments. (Inter stage advises). For arrangers which are responded with not interested can mark as rejected. You can capture more arrangers if required other than the invitations send earlier.

Solution Restructuring

All the above activities performed in the previous stage is reviewed by the Approver and every action is processed after the approval at this stage. You can proceed to prepare the Proposal in coordination with the Arrangers. These discussions are outside the system and only proposal is captured in the system. After the solution firming approval, you can send the solution to the borrower and arrangers or modify the solution or cancel the application.

You can send the solution to the Borrower and arrangers and wait for the Borrower response.

Customer Acceptance

In this you can follow up with the borrower if no response. Advice is sent at this stage (Inter stage). Modify the proposal based on the comments from the Borrower. Cancel the application if the Borrower is not agreeing with the Proposal. Advises are sent to borrower and arrangers. Proceed with the next phase Pre-Mandate once the proposal is finalized with the Borrower. Advises are sent to borrower and arrangers.

Arranger Invitation

Once the proposal is agreed with the Borrower, you can proceed with the syndication with co-arrangers if not included already. This stage is occurred only if you decide to proceed with co-arrangers and the co-arrangers are not selected before the solution proposal. This flow is not applicable if the arrangers are already finalized.

Capture the details of the Arrangers and send the invitations to the selected arrangers. Advice to be sent to the Arrangers along with Confidentiality Agreement (NDA). Up on sending the invites, you can come back to the Arranger invite stage to track the responses from the arrangers. You can track the acceptance response and the status of NDA execution and also send the reminders.

For the arrangers which are shown interest in the syndication and returned the signed NDA, you can send the additional details about the Borrower. Advice to be sent to the Arrangers with attachments. (Inter stage advises). For arrangers which are responded with not interested should mark as rejected. You can capture more arrangers if required other than the invitations send earlier.

Once all the arrangers signed the NDA, you can proceed to the next stage or you can take decision to proceed with the responded arrangers. You can intimate the arrangers regarding the finalization of arrangers.

Approval

All the above activities performed in the previous stage is reviewed by the approver and every action is processed after the approval at this stage.

Arranger Commitment Confirmation

At this stage you can conduct the arranger meeting and capture the proposed amount from each arranger for their participation. Meeting will be outside the application.

You can also finalize the syndication party roles of each arranger.

Upon discussion with the arrangers, you can finalize the allocation for each arrangers and send for the approval.

If the co-arrangers are finalised before Customer acceptance of the solution, then the process starts from this stage. In addition, if the lead Bank is proceeding without any coarranger, then the process starts from this stage.

Allocation Approval

If the approver is not agreeable to the allocation, you can redo the allocation.

Upon finalization of the allocation you can initiate the credit approval for self arranged portion if the syndication arrangement is underwriting.

Review Credit Approval

If the credit approval is not received for the self-allotted amount then you should go back and redo the allocation. Once the credit approval is obtained, finalized allocation information is sent to the arrangers. Advises are sent to the arrangers.

If the self arrangement is on Best effort basis, then no credit approval is required and you can initiate the preparation of the mandate document with the help of internal legal upon finalization of the allocation.

Prepare Mandate Docs

Internal legal prepares the Mandate documents and sends to the user for review.

Mandate Docs Scrutiny

You can do the scrutiny of the documents and send it back to the legal if any modification is required. Else you can send the documents to the arrangers for their review. Advice is sent to the arrangers.

Arranger Comments

You can wait for arrangers comments on the mandate documents and if the arrangers are not agreed with the mandate documents, then you can send the mandate documents to the internal legal for modification. Once the arrangers agree on the mandate documents, then the mandate documents are sent to the borrower for the review. Advice is sent to the borrower.

Borrower Review - Mandate Docs

If the borrower is not acceptable with the mandate documents the same is sent to the internal legal for amendments along with the comments from the borrower. Cancel the application if borrower is not interested. If the borrower agrees with the mandate documents then the mandate documents are sent to all the parties for execution. Advises are sent to all the parties.

Execution Status

You can track the status of the execution of mandate documents from all the parties. You can send the fully executed documents to all the parties. Advice will be sent. With this the premandate stage is closed.

1.4 Post Mandate Arranger

Use Post Mandate Arranger process to help the Bank to manage role of an arranger.

Post Mandate Arranger process helps the Bank to manage role of an Arranger post executing the Mandate Letter. This process involves the Syndication Invitation to the Participant Banks, Participation Allocation, Risk Review for self-participation, KYC, Internal Approvals, Execution of Transaction Documentss and Condition Precedent confirmation. Upon completion of origination process, the details are handed over to the Operations Enrichment Process accordingly.

The process flow for Post Mandate Arranger undergoes goes the below stages:

1. **Entry**
   The data available during the Pre Mandates are automatically fed in or captured manually.

   Movement of this stage creates two parallel processes for the user and which is worked separately.

   • Participant Allocation

   • Transaction Documents Review

   Participant Allocation can be processed in two ways:

   • Proceed with Additional Participants

   • Proceed without Additional Participants

   For Proceed without Additional Participants, User will move to the Participant Allocation stage after entry.

   Process flow for Proceed with Additional Participants undergoes goes the below stages:

2. **Participant Invitation**
   You can capture the details of the Participants and send the invitations to the selected Participants. After sending the invites, you can track the responses from the Participants and the status of NDA execution.

3. **Approval**
   You can send the additional details about the Borrower to the Participants, who has shown interest in the Syndication and returned the signed NDA. For Participants, who has responded with not interested should be marked as rejected. If required, you should capture more Participants, other than the ones invited earlier.

4. **Participant Commitment Confirmation**
   Once all the Participants sign the NDA, you can decide to proceed to next stage or to proceed with the responded Participants. Finalization of Participants are intimated to the

Participants. You can then move to the Participant Allocation stage. You can capture the proposed amount from each Participant for their participation. After discussion with the Participants, you can finalize the allocation for each Participant and send for the approval.

5. **Allocation Approval**
    The approver reviews the allocation. If the approver does not agree to the allocation, you should re-allocate. On finalization of the allocation you can initiate the credit approval request for self-participant portion with CFPM. If there is self-participation for the Arranger, ensure there is self-participant commitment allocation given.

6. **Review Credit Approval**
    The credit response is reviewed. If the Credit approval request is rejected for the self allotted amount, then the user should re-allocate. Once the Credit approval is obtained, you can proceed to the next stage after sending the notice to the Participants. If there is no self-participation, then no credit approval is required and you can move to the next stage after sending the notice to the Participants.

7. **KYC and Internal Approvals**
    You can check KYC and all the internal departmental approvals for completion. Completion of KYC and Internal departmental Approvals are outside this application. If KYC and Internal departments are pending and the docs are not in order, you should wait until it is confirmed.

8. **Track Executed Documents**
    You can track the execution status of all the docs and check if the same bank is managing the Agency role and if there is self-participation for arranger. If there is no self-participation, then the process ends. If the arranger is self-participant and playing the role of the Agent, then move to Receive Condition Precedent Satisfaction. If the arranger is self-participant and the Agent is different, then hand over the data to the Operations Enrichment and move to Receive Condition Precedent Satisfaction.

9. **Receive Condition Precedent Satisfaction**
    You can wait for the Condition Precedent to be satisfied, after satisfaction send it for approval. After Condition Precedent Satisfaction is satisfied. You can approve it and then with this Post Mandate Arranger process ends.

Transaction Documents Review

This is managed as a parallel process. Process flow for Transaction Documents Review undergoes goes the below stages:

1. **Transaction Docs Review**
    You will receive the Draft mandate Documentss from the Agent and send it to internal legal for review.

2. **Documents Review by Legal**
    The documents is reviewed by the internal legal and the response is given to the RM

3. **Review Legal Comments**
    The legal comments are reviewed. If any amendments required, then you can send it to Agent to make the changes. On receipt of execution version of the documents, with no further comments on the documents, you should move to the KYC and Internal Approvals stage.

Table 1-106   Holiday Preferences - Field Description

Field	Description
Ignore Holidays	You have to check this option to instruct the system to ignore the holiday. Payment schedules are processed as per the due date even if the schedule falls due on a holiday
Cascading Schedules	If one schedule has been moved backward or forward in view of a holiday, cascading schedules would mean that the other schedules are accordingly shifted. If you do not want to cascade schedules, then only the schedule falling on a holiday is shifted, as specified, and the others remain as they were
Move Across Month	If you have indicated either forward or backward movement, and the moved schedule date crosses over into a different month, you can indicate whether such movement is allowable; it will be allowable only if you indicate so in the 'Move Across Months' field.
Include Branch Holiday	Select this option to indicate that you want the system to check whether a schedule date falls on a local holiday defined for the branch. The system checks the holiday table for your branch. If it encounters a contract entered in your branch, with a schedule date falling on a branch holiday, the holiday is handled according to the holiday-handling preferences you specify
Use Facility Currency	If you choose this option, the system checks whether the schedule date falls on a holiday defined for the currency of the facility (borrower) contract, if this currency is different from the holiday currency you have indicated
Use Contract Currency	If you choose this option, the system checks whether the schedule date falls on a holiday defined for the currency of the drawdown contract, if this currency is different from both the holiday currency and the facility currency (if any) you have indicated
Use Tranche Currency	If you choose this option, the system checks whether the schedule date falls on a holiday defined for the currency of the tranche (borrower), if this currency is different from the holiday currency you have indicated

Table 1-106   (Cont.) Holiday Preferences - Field Description

Field	Description
Use Local Currency	If you choose this option, the system checks whether the schedule date falls on a holiday defined for the local currency, if this currency is different from the holiday currency, facility currency and contract currency you have indicated. The system checks the holiday table for the currencies you have specified. If it encounters a contract using any of the specified currencies, with a schedule date falling on a holiday for any of the currencies, the holiday is handled according to the holiday-handling preferences you specify
Move Revision Schedules	You may check this option to indicate that the holiday processing rule should be applied to interest rate revision schedules as well
Move Payment Schedules	You may check this option to indicate that the holiday processing rule should be applied on repayment schedules as well. This is applicable only to drawdown products
Move Commitment Reduction Schedules	Select check box to indicate the holiday processing rule should be applied on commitment schedules. This is applicable only to tranche products.

1.8 Agency Drawdown

Use Agency Drawdown to submit the Drawdown notice to Agent Bank to arrange the funds on a certain date.

Agency Drawdown is a process in which the borrower submits the Drawdown notice to Agent Bank to arrange the funds on a certain date. Agent bank performs its due diligence on the Drawdown Notice and if satisfied then proceeds will be send to Borrower on the given date.

The process flow for Drawdown Agency undergoes the below stages:

1. **Entry**
   In this stage, Agent bank captures the funding requirement and perform the due diligence on the Drawdown notice received in form of PDF from the customer. Agent bank also verifies if all the Condition precedent along with Further Condition precedents and Drawdown Conditions have been satisfied.

2. **Verification**
   All the data gathered in the previous stage is checked and verified. If data input is incorrect, then the verifier can reject the application or send it back for correction. If the verifier is satisfied with all the data, then he can proceed. While submitting the stage all the notice configured is generated and send to respective parties. In case of any discrepancy, the bank reverts to borrower for more details or moves to next stage.

3. **Treasury Rate**
   If agent is also participating as one of the lenders to the deal and has to cover exposure, then for the same amount treasury ticket to be booked. Treasury reference number and rate are captured.

4. **Enrichment**
   Under this stage, bank can configure additional data segment to capture more data which are required.

5. **Funds Recon**
   Bank sends out the notices to all the lenders to arrange the funds on a Drawdown date. In addition, tracking for the lenders reply slip, if not received then reminder to be send.

   Agent reconciles each lenders share in Drawdown shares. If funds not received then reminders would be sent.

6. **Exceptional Settlement Risk Approval**
   If the funds from any lender is not received or sighted, then Intra-day Risk approvals for funds are arranged.You can request for intraday approval, if any lender has not sent the funds on DD date.

7. **Exceptional Compliance Approval**
   In case of drawdown, a sanction check is performed on borrower. If any hits are found, then compliance approval can be obtained.

8. **Approval**
   Post all the above step application lands into the final approval. After the approvals, cash is remitted to the borrower, before currency cut off.

Table 1-186   Payment Details - Field Description

Field	Description
Loan Contract Ref No	The Loan Contract Ref No for which the payment to be done.
Value Date	The date on which the contract comes into effect in the system.
Limit Date	The date to which the payment component details to be fetched for the selected loan.
Loan Amount	The Loan Amount associated with the contract.
Tax Details	Tax details associated with the loan contract.
Tax Rule	The rule maintenance is specific to each component in the system.
Basis Component	The component for which the LIQD (Liquidation, Reorganization, or Reconstruction) is triggered can be subjected to taxes according to the laws in your country.
Tax Category	Select the tax category from the drop-down list against each tax rule that is linked to a tax scheme.
Event	Specify the event upon which the tax is to be applied.
Waived	The late payment charge schedule which should be waived for a component.
Component Name	Name of component for which payment is done.
Amount Due	The amount is outstanding for the component being liquidated.
Overdue Days	The number of days outstanding for the component being liquidated.
Overdue	Amount overdue for the component when the grace period is over.
Outstanding	Outstanding amount of the payable component.
Payable Amount	The Payable amount to be given as part of payment for each component.
Tax	Taxes charged on the interest, principal, and so on.
Amount Waived	The amount waived for the contract.
Amount Capitalized	The amount capitalized for the contract.
Prepayment Penalty Amount	The Penalty amount to be given in case the payment type is prepayment.

Table 1-186   (Cont.) Payment Details - Field Description

Field	Description
Penalty Rate	Specify the Penalty Rate in this field to calculate the Penalty Amount for the prepaid Principal.
Prepayment Schedule Processing	If prepayment is done for a loan contract, the payment schedule will be based on LIFO and FIFO.
Total settlement Amount	The Total amount being paid for all the payment components.

When you pay the principal amount in advance, you violate the contract schedule in the case of a Prepayment Penalty. The user can collect a penalty in form of a penalty amount or a penalty rate against the principal amount as a result.

The user selects penalties based on two types: either by entering the penalty amount or the penalty rate, and also chooses FIFO, LIFO, or PRORATA from the **Prepayment Schedule Processing** drop-down for Prepayment Schedule Processing. If the prepayment schedule is selected as LIFO, then the **Reduce Tenor** applies. Otherwise, it defaults to FIFO.

If prepayment is done on a loan contract, then the schedule is rebuilt based on FIFO and LIFO logic.

FIFO

Once you select this option, the schedule will be rebuilt based on FIFO logic. During loan booking, lets consider the following schedule details for a contract on a monthly and bullet frequency. Schedules 11 and 1 are in charge of outlining the details:

- Principal amount - 12,000,000 USD
- Value date - 01 March 2005
- Maturity date - 01 March 2006

Table 1-187   Schedule payment

Start Date	Component	Frequency	No. of Schedules	Unit	Amount
01-Apr-05	Interest	Monthly	11	1	-
01-Apr-05	Principal	Monthly	11	1	1,000,000
01-Mar-06	Interest	Bullet	1	1	-
01-Mar-06	Principal	Bullet	1	1	1,000,000

If you select the prepayment schedule as FIFO, then the prepayment made on 15 April 2005 for 1,600,000 USD the schedules are built as given below:

Table 1-188   Schedule payment with FIFO logic

Start Date	Component	Frequency	No. of Schedules	Unit	Amount
01-Apr-05	Interest	Monthly	11	1	-
01-Apr-05	Principal	Monthly	1	1	1,000,000
15-Apr-05	Principal	Monthly	1	1	1,600,000
01-Jun-05	Principal	Monthly	1	1	400,000

Table 1-188   (Cont.) Schedule payment with FIFO logic

Start Date	Component	Frequency	No. of Schedules	Unit	Amount
01-Jul-05	Principal	Monthly	8	1	1,000,000
01-Mar-06	Interest	Bullet	1	1	-
01-Mar-06	Principal	Bullet	1	1	1,000,000

LIFO

You can rebuild the scheduled payment based on LIFO logic by choosing this option. If LIFO is selected during the prepayment made on 15 April 2005, build the schedules as follows:

Table 1-189   Schedule payment with LIFO logic

Start Date	Component	Frequency	No. of Schedules	Unit	Amount
01-Apr-05	Interest	Monthly	11	1	-
01-Apr-05	Principal	Monthly	1	1	1,000,000
15-Apr-05	Principal	Monthly	1	1	1,600,000
01-May-05	Principal	Monthly	9	1	1,000,000
01-Feb-06	Principal	Monthly	1	1	400,000
01-Mar-06	Interest	Bullet	1	1	-
01-Mar-06	Principal	Bullet	1	1	0

When you click the **Calculate** button, the Payable Amount, Tax, Amount Waived, and Amount Capitalized will be added to make up the total settlement amount.

1.18 Consolidate Rollover

Use Consolidate Rollover to consolidate one or more contracts into a single parent contract.

You can consolidate one or more contracts into a single parent contract. This can be done through the Consolidation Rollover menu under syndication module. You can initiate the process flow and the application moves through various stages of the business process flow. The process of consolidate rollover can be initiated by the Relationship Manager or any bank user (with relevant rights). The list of stages that are required for a Consolidate Rollover process is pre-defined in Conductor process and the data segments that are applicable for every stage can be configured in Business Process maintenance. Based on this setup, system derives the process flow for every loan application.

The process flow pre-defined for Consolidate Rollover is provided for quick reference:

1. Consolidation Rollover Entry

2. Consolidation Rollover Approval

3. Retry Consolidation Rollover Handoff

To initiate Consolidation Rollover

Specify the **User ID** and **Password**, and login to Homepage.

1. On the Homepage, from **Corporate Lending**, under **Operations**, click **Syndication**.

2. On the **Syndication**, click **Consolidation Rollover** .

   The **Consolidation Rollover** screen is displayed.

3. In the **Consolidation Rollover** screen, provide the required details.

Field	Description
Borrower Number	Click **Search** to view and select the required Customer Identification number or you can also type the Customer Number.
Customer Name	Based on the Customer Number selected, the information is auto populated.
Business Product	Click **Search** to view and select the required Business product. Based on the Business product, system derives the following details to process the loan application. • Applicable stages and its data segments • Required documents and checklists • Stage level advices
Application Date	Select an application date from the drop-down calendar. The system defaults the current system date as the application initiation date.
Facility Details	Displays the list of all facilities that are created for the Customer Number. You can select the appropriate Facility ID.
Tranche Details	Displays the list of all tranches under the facility that are created for the Customer. You can select the appropriate tranche ID under which the loans to be consolidated.

4. Click **Initiate** to begin the process.

   On submit of the screen, a unique Application Registration number is auto generated by the system, which are used throughout the process and for further tracking.

   Based on the user rights the system navigates the user to the first manual stage of the process flow.

   Data Segments

   Provides information about the usage of data segments that are configured at each stage. Every data segment can be configured as a mandatory or non-mandatory at Business

Process Code maintenance based on the business product code defined. Each data segment has the following action buttons.

- Back: System moves the task to the previous segment.

- Next: System moves the task to the next screen. If mandatory fields are not entered, system will display error.

- Save and Close: You can save and close the task and reopen it to work later.

- Cancel: You can cancel the task window and return to dashboard. The data input is not saved.

Each data segment has the option to upload the specific documents required for the application. Below are the sample date segment which can be configured for this process flow.

Field	Description
Rollover Type	Select the type of rollover you want to perform If consolidated option is selected, all selected drawdowns with the same combination of Tranche, Drawdown Product, Counterparty, Currency and Maturity Date is consolidated into a single contract upon rollover. If Consolidated + Split option is selected, the system first consolidates the selected drawdowns as per the consolidation instructions and then splits the net result of consolidation as per the split instructions.
Rollover Amount	Select the rollover amount option from the dropdown
Rollover Mode	Select the rollover mode from the dropdown
Maturity Date	You can capture the maturity date of the rolled over drawdown here. If you do not specify the maturity date, the system arrives at the maturity date based on the 'Roll By' value and the 'Maturity Days' specified for the drawdown.
Maturity Days	User can input the number of days that is to be added to the value date of the new consolidated drawdown to arrive at the maturity date of the drawdown.
Roll By	It indicate the tenor basis upon which the maturity days specified for the rolled-over contract will be derived

Alternate Risk Free Rate	If enabled Risk free Rate will be considered for computing
Min Rate	The minimum interest rate which has to be considered for computing
Max Rate	The maximum interest rate which has to be considered for computing
Rate Code	The system defaults the interest rate based on the rate code
Rate	The interest rate which has to be considered for computing
Margin	The margin to be applied on the interest rate for the component

1.18.2 Approval

Approval stage has the option to view and approve the details of the Consolidation Rollover application.

1.19 Natural Language Processing

Use Natural Language Processing to initiate the NLP process from syndication service with the document ID (from document management system), document type and document content.

Natural Language Processing (NLP) is a process in which the system identifies the document ID, document type and content from an uploaded file and initiates the respective process.
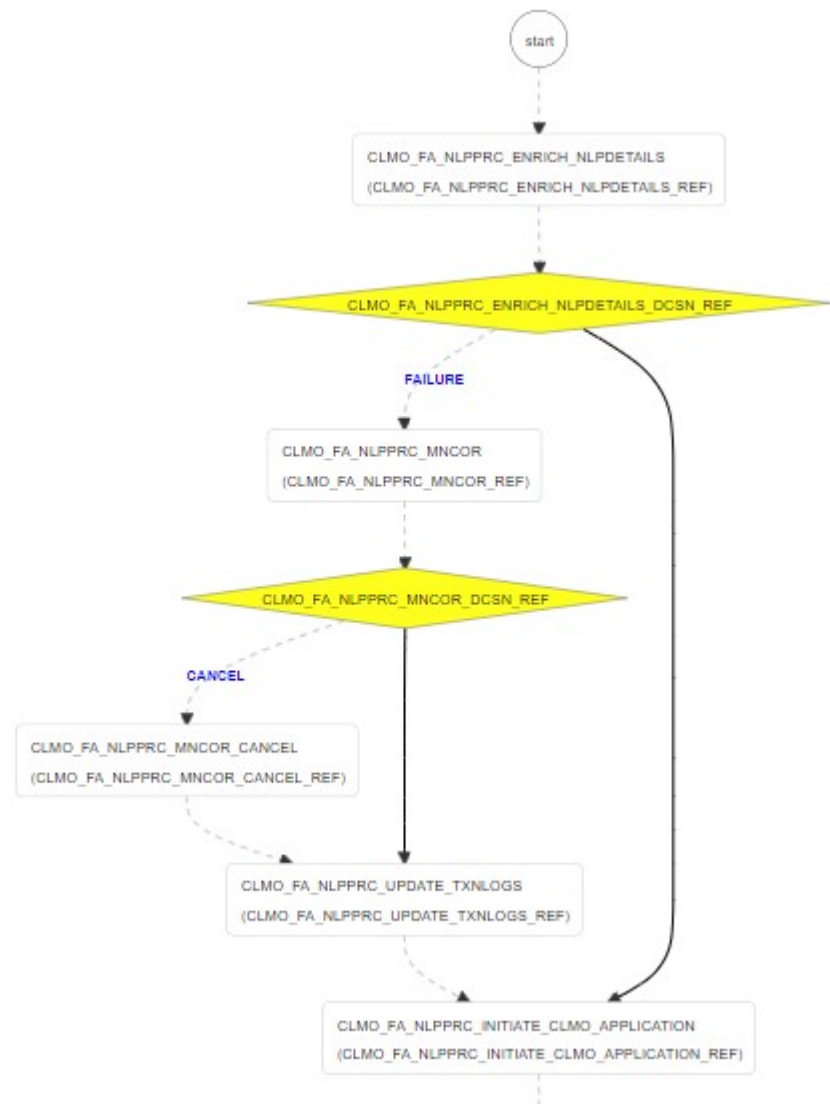

The process flow for NLP undergoes goes the below stages:

1. When a document is uploaded from or a poller receives a document of loan processing type, NLP framework will initiate the NLP process from syndication service with the document ID (from document management system), document type and document content.

2. These data is stored in NLP Data Segment. During this initiation, the process lands in a system task called Enrich NLP Details. Enrich NLP extracts the values along with the request and identify the respect business values for the extracted tags and also enriches the information.

3. Once the enrich identifies all the business values for the tags then data would go to the decision. If it is successful, then it initiates the respective process using the enriched values. And the workflow ends.
If it is failure, then process lands in the manual correction. You have the NLP values that separate during the initiation process. You can manually update the missing values and proceed.

4. The enrich values are updated, with that the NLP framework marks the document against the application for Transaction log update task and continues to initiate the process. With this the workflow ends.

5. On failure, it lands in Manual Retry stage. In this stage, you can retry the data. You can also check the NLP details again for correction. Then again the Transaction Logs are updated. On failure of initiation, it lands in decision. In the manual stage, you can cancel then the workflow is terminated.

6. User can choose to enable or disable the **genAIEnabled** toggle to initiate NLP at the use case level. If the **genAIEnabled** toggle is set to false, the logs will show the message `Cannot initiate NLP application as GenAI is not enabled`, and the application will not be initiated.

1.19.1 Participant Drawdown by Machine Learning

Use this process to help you to initiate the Syndication Participant Drawdown process with the support of Machine Learning.

This process helps you to initiate the Syndication Participant Drawdown process with the support of Machine Learning. On uploading the Drawdown notice from lead agent, the machine learning job automatically analyses the document, extract its contents and creates a Participant Drawdown task for the corresponding Syndication Facility and Tranche. This process also fills in the extracted information in the respective fields of the applicable data segments. This task is available in the task pool, enabling user to take forward for further evaluation and approvals.

Initiating Machine Learning Process for Drawdown

Machine Learning Process for Drawdown can be initiated by giving the basic registration details in the Initiation screen, provided the user has the required access rights.

How to reach here: Machine Learning >Document Upload
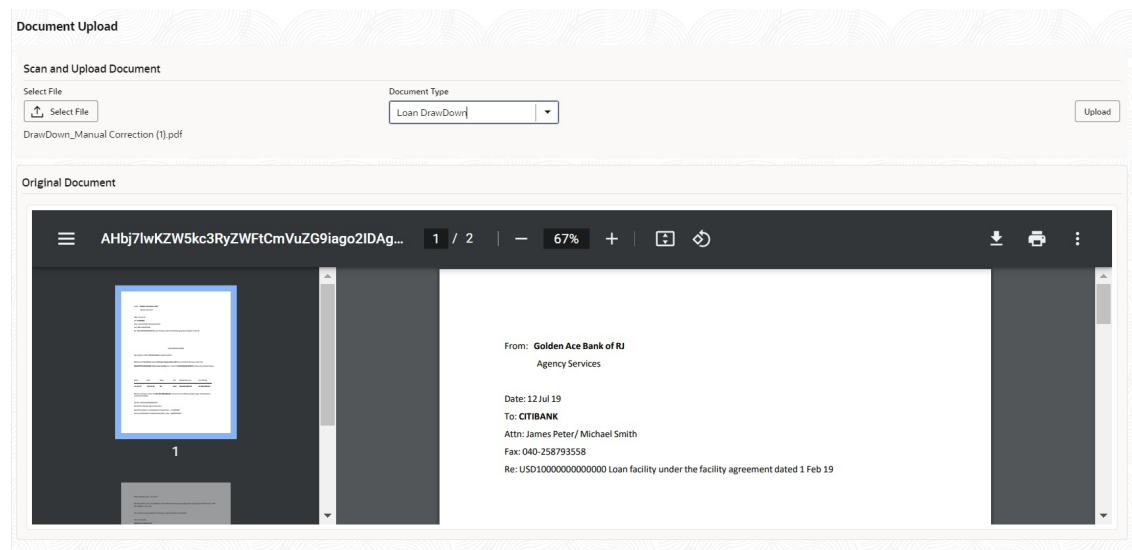

You need to go to the above specified menu option and select the file to upload. Once the Drawdown notice from the Agent is selected, the system reads the document and displays the content of the document. Select the appropriate Document Type from the drop-down and click **Upload** button to initiate the task.

Upon submitting the document ML process parses the document and initiate the Participant Drawdown process and the task is available in My Task of the user to proceed further. In case if the ML process is unable to initiate the Drawdown process, then the task is available in Free Task in manual correction stage. You can acquire the task and manually fill in the required details to initiate the process. The task moves to My Task upon providing the right information, for the user to proceed further with the additional information.

1.19.2 Drawdown Rollover by Machine Learning

Use Machine Learning for Rollover to initiate the Syndication Participant Drawdown Rollover process with the support of Machine Learning.

This process helps you to initiate the Syndication Participant Drawdown Rollover process with the support of Machine Learning. On uploading the Rollover notice from lead agent, the machine learning job automatically analyses the document, extract its contents and creates a Rollover task for the corresponding Syndication Facility and Tranche. This process also fills in the extracted information in the respective fields of the applicable data segments. This task is available in the task pool, enabling user to take forward for further evaluation and approvals.

Initiating Machine Learning Process for Rollover

Machine Learning Process for Rollover can be initiated by giving the basic registration details in the Initiation screen, provided you have required access rights.

How to reach here: Machine Learning >Document Upload

You need to go to the above specified menu option and select the file to upload. Once the Rollover notice from the Agent is selected, the system reads the document and displays the content of the document. Select the appropriate Document Type from the drop-down and click **Upload** to initiate the task.

Upon submitting the document ML process parses the document and initiate the Rollover process and the task is available in My Task of the user to proceed further. In case if the ML process is unable to initiate the Rollover process, then the task is available in Free Task in manual correction stage. You can acquire the task and manually fill in the required details to initiate the process. The task moves to My Task upon providing the right information, to proceed further with the additional information.

1.19.3 Loan Origination by Machine Learning

This process helps the user to initiate the Bilateral Loan Origination process with the support of Machine Learning. On uploading the Loan Details Agreement, the machine learning job automatically analyses the document, extract its contents and creates a Loan Origination task. This process also fills in the extracted information in the respective fields of the applicable data segments. This task is available in the task pool, enabling user to take forward for further evaluation and approvals.

Initiating Machine Learning Process for Loan Origination

Machine Learning Process for Loan Origination can be initiated by giving the basic registration details in the Initiation screen, provided you have the required access rights.

How to reach here: Machine Learning >Document Upload
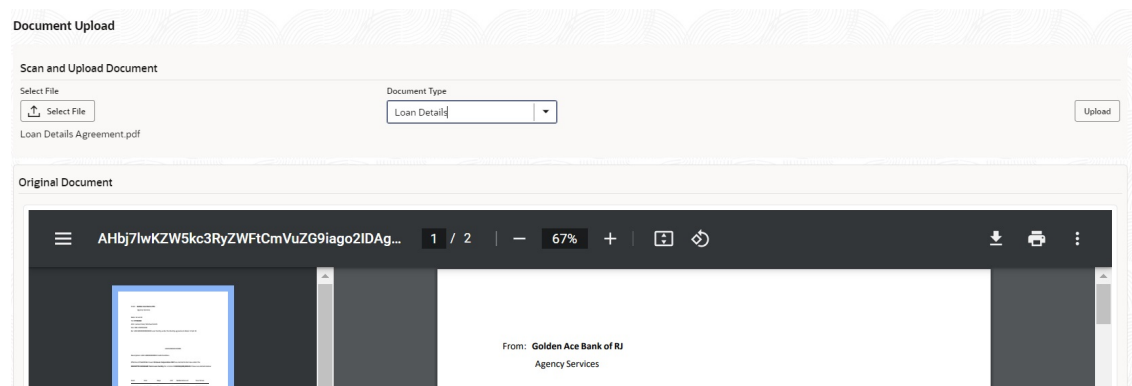

You need to go to the above specified menu option and select the file to upload. Once the Loan Details Agreement is selected, the system reads the document and displays the content of the document. Select the appropriate Document Type from the drop-down and click **Upload** to initiate the task.

Upon submitting the document ML process parses the document and initiate the Loan Origination process and the task is available in My Task of the user to proceed further. In case if the ML process is unable to initiate the Loan Origination process, then the task is available in Free Task in manual correction stage. You can acquire the task and manually fill in the required details to initiate the process. The task moves to My Task upon providing the right information, to proceed further with the additional information.

1.19.4 Sight Funding by Machine Learning

This process helps you to resolve the Payment advices received and match the same during the Syndication payment Process. On uploading the Payment Advises, the machine learning job automatically analyses the document, extract its contents park the item in the resolved queue. While the user process a Syndication Payment, during the sight fund stage, these resolved funds are available for matching.

Initiating Machine Learning Process for Sight Fund

Machine Learning Process for Sight Fund can be initiated by giving the basic registration details in the Initiation screen, provided you have the required access rights.

How to reach here: Machine Learning >Document Upload
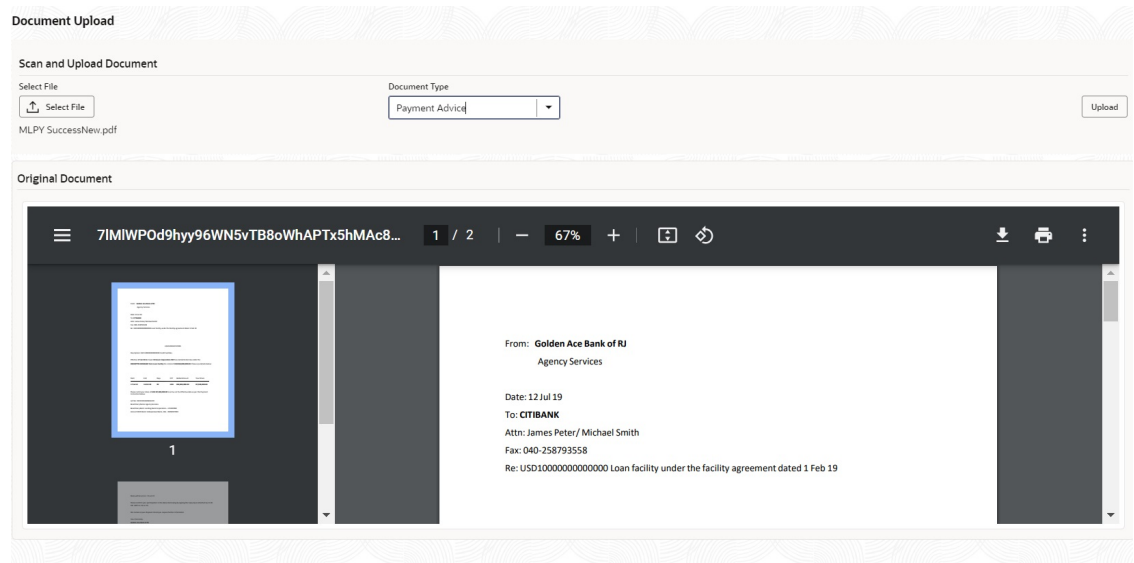

You need to go to the above specified menu option and select the file to upload. Once the Payment Advise is selected, the system reads the document and displays the content of the document. Select the appropriate Document Type from the drop-down and click **Upload** to initiate the task.

Upon submitting the document ML process parses the document and resolve the document and resolved task is available in My Task. This task gets closed once the corresponding fund is matched in the applicable Payment Process. In case if the ML process is unable to resolve the Payment advice, then the task will be available in Free Task in manual correction stage. You can acquire the task and manually fill in the required details to complete the process. The task moves to My Task upon providing the right information.
