# **Business Savings Account Application**

This topic describes the structure of the Business Savings Account application, which captures information regarding the stakeholders business details, stakeholder details and account preferences

A savings account is an interest-bearing deposit account held at a bank or in a financial institution that yields a modest interest. Business savings accounts are a great means by way of which businesses can save money that can be made available for short-term business needs.

The business savings account application of OBDX has been created to enable customers to apply for savings accounts easily by providing minimal details of the business and stakeholders. Applicants can quickly apply for savings accounts by simply specifying their business details, stakeholder details and account preferences.

The application form is OCR (Optical Character Recognition) enabled so as to save the prospect applicant's time and effort in filling out the application form. The various sections of the form get prefilled with information fetched through OCR based on the document uploaded in the inline Upload Documents section provided against each section for which OCR is supported. If the Nominee Information section is enabled for the Savings Account product category, this feature is also enabled to prefill nominee information by fetching information from the nominee's ID proof document.

Businesses that are existing digital banking customers can simply provide their online banking credentials to have the Business Details section of the form prefilled with information as maintained with the bank. The applicant will be able to define stakeholder information as required and can add multiple stakeholders.

The application tracker has been built so as to enable tracking of the application once it has been submitted. The application tracker also enables the applicant to retrieve and complete an application that has been saved. Additionally, the applicant can view documents that have been uploaded as part of the application form and can also view details as defined in the application form in PDF format.

Following are the steps involved in the application submission:

- User Type Selection: The first step in applying for a product is to select the user type so
  as to be displayed product categories and subsequently products which are applicable to
  you. i.e. select tab 'Personal' if you are a retail individual and select tab 'Business' if you
  are applying on behalf of your small-medium business.
- Product Category Selection: Once you have selected a user type, all the product categories that contain products for the specific user type, are displayed. Select any product category of choice.
- Product Selection: All the products belonging to the selected product category will be
  listed here. Each product will be listed as a separate card which will display the name and
  image of the product along with a short description, features and the options to view further
  details, or to apply for the product. The additional option to select the product so as to
  compare it with others within the same category will also be provided on each card. You
  can select a maximum of three products for comparison.
- Kick Off: This page serves as an introduction to the application form. The various steps
  involved in an application are displayed on this page. You can also view the documents

required to be uploaded as part of the application. As a business applicant, you can identify how you are going to proceed with the application. If your business is new to the bank, you can continue as a guest, or if your business has an existing relationship with the bank, you can select the provided option to simply login with your online banking credentials so as to have certain sections such as Business Details pre-populated in the application.

- Mobile Verification: This step is applicable if you are filling out the application as a new/
  unregistered business customer. You will be instructed to enter your registered business
  mobile number, after which the system will identify whether the mobile number is already
  registered with the bank or not. You will then be required to enter the OTP sent to this
  mobile number in order to proceed with the application form.
- Business Details: This section captures information related to your business which
  includes information such as the business legal name, date and country of registration,
  registered address and other contact details.
- Stakeholder Information: In this section, you can specify information pertaining to the stakeholders of the business. This will include basic information such as the relationship of the stakeholder with the business, date of association and ownership percentage, depending on the type of stakeholder (relationship with the business). Depending on whether the stakeholder is an existing customer of the bank or if they are new to the bank, you will either be required to simply capture basic information such as customer ID, name, date of birth or extensive information including address and contact details.
- **Upload Documents**: Upload documents is not available as a separate step in the application form, rather it is provided inline with every step that supports OCR and for which document proof would be required. The steps for which the option to upload documents is provided are Business Details, Stakeholder Information (only in the case of prospect stakeholders).
- Savings Account Specifications: The bank may offer certain add-on services for the account. These might include a Debit Card, Passbook, Cheque Book, Access to Direct Banking, Phone Banking, etc. In this section, you can define your preferences with regards to these features. You can also specify the currency in which you would like the account to be maintained and define your preferences regarding account statement frequency and mode of delivery. Additionally, any other information pertaining to the activities to be performed on the account might also be required to be specified.
- Review and Submit: Once you have filled out all the information required in the
  application form, you will be displayed this information on the review page. You can verify
  the details provided and if required, can edit the information in any sections by selecting
  the option provided against each section.
- Terms of Service: On having reviewed the application, you can then proceed to view the
  terms and conditions of the savings account that is being applying for. You can also add a
  digital signature by means of uploading a document containing your (a stakeholder's)
  signature or by physically signing the provided space if you are filling out the application
  from a touchscreen device.
- **Confirmation**: Once you have submitted your application after having reviewed it and having accepted the terms and conditions, a confirmation page will be displayed. This page will display a success message along with the application reference number. You can track your application on the basis of this reference number. Additionally, this page will also contain a button, by clicking on which you can navigate to the application tracker.

### 1.4 Kick Off page

This describes the product application process that you need to fill out to apply for the product.

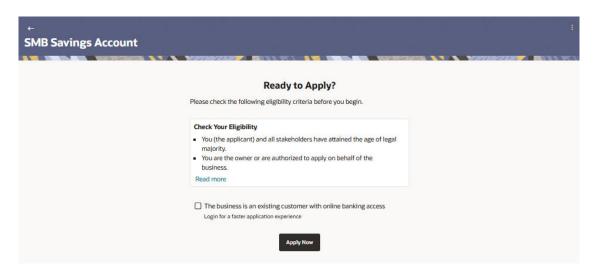

This page displays the various steps involved in the savings account application and provides the means by which you can proceed with the application. If your business has an existing relationship with the bank, you can select the provided option to Login with the business' login credentials. This will yield an application form that is much shorter than that of the form you would be required to fill, if your business was new to the bank. In this scenario, since the information of your business is already available with the bank, you would not be required to specify Business Details. If your business is new to the bank, you can select the option as provided, and proceed to provide information related to your business details, add stakeholders, etc.

Additionally, this page also provides links and information to:

- View the list of supporting documents required to be uploaded as part of a business savings account application.
- Register your business for online banking access if the business is an existing customer of the bank but does not have online banking access.
- Information pertaining to the application being saved and how you can retrieve it.
- Terms and conditions that need to be met in order to apply for the product.

### 1.5 Mobile Verification

This topic describes the registration process for guest customers, enabling them to track submitted applications and retrieve abandoned applications.

This step is applicable only for prospect/guest customers. This check is used to register guest customers so that they can track submitted applications and also retrieve applications that were abandoned before submission. This check is also used to identify whether the applicant is truly a new customer of if he/she is already an existing customer of the bank. Additionally, the system is able to identify if there are any existing applications in draft mode for the mobile number defined and can provide applicants with the option to continue with those applications if they wish to do so.

Once the mobile verification process is completed, the auto save capability of the application is enabled. Any entry/changes you make to the application form will get saved automatically.

# FAQ

1. Can I proceed with the application if the business is an existing customer of the bank but does not have online banking access?

No. In order to apply online, your business needs to have online banking access. Please contact the bank for information on how to gain access to online banking services for business customers.

- 2. How many products can I apply for as part of a bundled application?

  Out of the box, you can add a maximum of three products in a bundle. This number is configurable by the Bank and may change.
- 3. In case my application is saved as a draft, can I request a bank executive to complete this application on my behalf?
  Only you can resume and complete a draft application.
- 4. Can I cancel one of the product applications that has been submitted as part of a bundled application?

No. Currently, it is not possible to cancel a specific product application that is part of a bundled application. You can however, cancel the entire bundled application, if you wish to do so.

- 5. For how long I can access and resume my applications that are saved as drafts? This is based on the Bank's purging policy. The draft applications will be available for x days in the application tracker before they are purged by the bank.
- 6. Can I apply for a product that I have already applied for and that the bank is currently processing?

Yes, you can still submit an application for the same product. The decision to process or reject either of the two (or more) applications will rest on the bank.

- 7. I have started my application on my laptop. However, I have realized that some of the documents that I need to upload are available on my tablet. Do I need to abandon the application that I started on my laptop to restart the entire process on my tablet?
  - No, you can scan the QR code available on every step of the application form, post the Mobile Verification step, and resume the application from your tablet or mobile device.
- 8. Can bank administrators define the sequence in the steps of the application forms? Yes, bank administrators can configure the sequence of steps in the application forms of all product categories supported for online application, through the Origination Workflow Maintenance feature available on the OBDX platform.
- 9. How does OCR work?

The bank can integrate with the third party adapters that provide OCR services, through available hook points. The system will be able to prefill certain fields in the Personal Information section from data fetched from the applicant's uploaded documents.

Similarly, an out of box integration is available with the internal 'Document verification framework'.

Extensibility hooks can be used to support OCR for most identity and financial documents.
