This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Purpose

This guide is designed to help acquaint you with the Oracle Banking application. This guide provides answers to specific features and procedures that the user need to be aware of the module to function successfully.

Before you Begin

Kindly refer to our **Getting Started User Guide** for common elements, including Symbols and Icons, Conventions Definitions, and so forth.

Pre-requisites

Specify **User ID** and **Password**, and login to **Home** screen.

Audience

This document is intended for the following audience:

- Customers
- Partners

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at <u>Critical Patches</u>, <u>Security Alerts and Bulletins</u>. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by <u>Oracle Software Security Assurance</u>.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related Resources

For more information on any related features, refer to the following documents:

- Oracle Banking Digital Experience Installation Manuals
- Oracle Banking Digital Experience Licensing Manuals

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.

Convention	Meaning
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.

Acronyms and Abbreviations

The list of the acronyms and abbreviations used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Abbreviation	Description
OBDX	Oracle Banking Digital Experience

Basic Actions

Most of the screens contain icons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 2 Basic Actions and Descriptions

Action	Description
Back	In case you missed to specify or need to modify the details in the previous segment, click Back to navigate to the previous segment.
Cancel	Click Cancel to cancel the operation input midway without saving any data. You will be alerted that the input data would be lost before confirming the cancellation.
Next	On completion of input of all parameters, click Next to navigate to the next segment.
Save	On completion of input of all parameters, click Save to save the details.
Save & Close	Click Save & Close to save the data captured. The saved data will be available in View Business Product with <i>In Progress</i> status. You can work on it later by picking it from the View Business Product .
Submit	On completing the input of all parameters, click Submit to proceed with executing the transaction.
Reset	Click Reset to clear the data entered.
Refresh	Click Refresh to update the transaction with the recently entered data.
Download	Click Download to download the records in PDF or XLS format.

Symbols and Icons

The following are the symbols/icons you are likely to find in this guide:

Table 3 Symbols and Icons

Symbols and Icons	Description
•	Add data segment
×	Close
r 7	Maximize
J L	Minimize
▼	Open a list
	Open calendar
Q	Perform search
:	View options
888	View records in a card format for better visual representation.
=	View records in tabular format for better visual representation.

Post-requisites

After finishing all the requirements, please log out from the **Home** screen.

Merchant Payments

This topic describes the functionality related to merchant payments.

A merchant account is a type of bank account that enables businesses to accept payments in multiple ways, typically using debit or credit cards. A merchant account is established under an agreement between an acceptor and a merchant acquiring bank for the settlement of payments.

Merchant Onboarding facilitates the system administrator to set up and maintain merchants using the channel-banking platform. This, in turn, enables the users to initiate merchant based payments using the channel banking facility.

Merchant Management: Enables the administrator to create and maintain merchant details.

For more information on merchant management, refer **Merchant Management** section of **User Manual Oracle Banking Digital Experience Core**.

External Payments Interface: Provides facility for interfacing with merchant sites and initiate a payment towards a merchant.

External Payments Interface

This topic describes the External Payments Interface (EPI), which provides the capability of interfacing with merchant websites.

The application supports the facility to interface with third party systems. Through the support of external payment interfaces, the bank's customers can make purchases from merchant sites by using their bank accounts. A transaction through EPI is performed as follows:

- A customer logs on to the merchant site. This could be an online shopping site, online travel booking or any other site where the customer is required to initiate a payment towards a merchant.
- The customer reaches the page on the merchant's site wherein he is required to select a mode of payment. The customer selects the mode of payment as bank account and selects the bank.
- The customer is redirected to the bank's internet banking URL wherein he is required to enter his login credentials.
- On successful verification of the customer's login credentials, the screen on which the customer can verify the defaulted account number and confirm the transaction appears.
- If no account number is defaulted, the customer can select the account from which the funds are to be debited and can then proceed to confirm the transaction.
- The customer is redirected to the merchant site on which the status of the transaction is displayed.

Pre-requisites:

- Transaction access is provided to business user
- CASA accounts are maintained in the host system under a party ID mapped to the user
- Merchants are maintained within OBDX

To perform a transaction through EPI:

- Login to the Merchant URL.
- From the Merchant Site URL, click External Payments Interface

The **Merchant Details** screen appears.

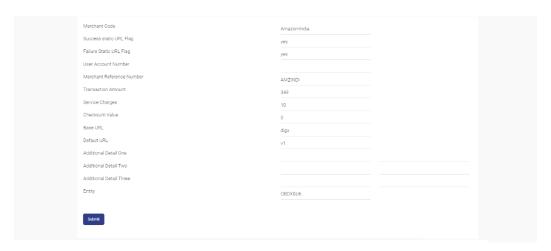

(i) Note

The following **Merchant Details** screen is a dummy merchant screen and the fields indicate the parameters to be received by the Bank portal from the Merchant portal.

Figure 2-1 Merchant Details

(i) Note

The fields which are marked as Required are mandatory.

For more information on fields, refer to the field description table.

- 3. In the **Merchant Code** field, enter the ID of the merchant.
- 4. In the User Account Number field, select the account number of the user that is to be debited (The user needs to mandatorily select the account number, only if 'Default customer's debit account number as request parameter' check box is not selected by bank administrator in the 'Merchant Maintenance' screen).

- 5. Enter the other relevant merchant details.
- 6. Click Submit.

The user will be redirected to the bank portal from the merchant site.

Figure 2-2 Bank Portal

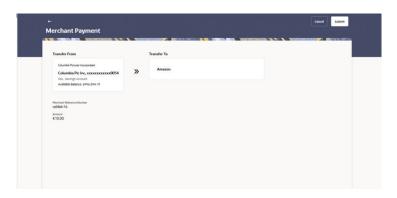

- 7. Enter your login credentials.
- 8. Click Login.

The External Payments Interface - Complete Payment screen appears.

Figure 2-3 External Payments Interface – Complete Payment

Note

The fields which are marked as Required are mandatory.

For more information on fields, refer to the field description table.

Table 2-2 Field Description

Field Name	Description
Transfer From	The account from which the amount is to be transferred. Account number gets defaulted if user has only one CASA or Default customer's debit account number as request parameter flag is set as 'Yes' by the selected merchant.
	Otherwise, user gets an option to select an account number from which the amount needs to be debited.
Transfer To	Name of the merchant.
Merchant Reference	Reference number of the merchant.
Amount	The payment amount to be transferred from the account is displayed as a read only field.

- 9. Click **Submit** to pay.
- 10. The Review screen appears.

Perform one of the following actions:

- Verify the details and click Confirm.
- Click Cancel to cancel the transaction.
- **11.** The details submitted by the user will be updated in the host system. The success message appears along with the reference number.

FAQ

1. Can I change the transaction amount?

No, you cannot change the transaction amount; it is fetched from the merchant URL to indicate the amount that will be debited from your account.

2. Can I go back to the merchant URL?

No, you cannot go back to merchant URL. You have to cancel the transaction and reinitiate the transaction for the same.

3. What will be the transaction currency?

The transaction currency will be the currency as defined by and received from the Merchant's site.

4. Can I select any account number out of the multiple accounts mapped to me, for the purpose of making the payment?

Yes, you can select any account number from multiple accounts mapped to you, only if the flag for defaulting the customer's account is set as 'No' in the merchant maintenance screen.

5. What happens if the transaction amount is less than set Transaction Limit?

If the transaction amount is less than the minimum limit or more than the maximum transaction limit set by the Bank, the user will not be able to initiate the transaction.
