Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Credit Cards Application

This topic describes the structure of the Credit Cards application, which captures information regarding the applicant's personal, employment, and financial information.

By definition, a credit card is a rectangular piece of plastic or metal issued by a bank or a financial institute to enable the card holder to borrow funds in order to purchase goods and services from merchants that accept cards for payment.

The credit card application has been built so as to capture basic personal, employment and financial information of the applicant. The applicant can also define preferences such as whether add-on card holders are to be added to the card and if balance transfers are to be defined.

The application form is OCR (Optical Character Recognition) enabled so as to save the applicant's time and effort in filling out the application form. The inline document upload feature that is provided on various sections of the form, enables the applicant to upload supporting documents to have the specific section prefilled with information.

Online KYC of the prospect can also be conducted by means of liveness check or through integration with third party identity verification service providers. For more information, please refer **User Manual Oracle Banking Digital Experience Originations - KYC Modes**.

Once the applicant's identity is verified successfully through online KYC, he/she will be able to proceed with the application form. The personal information section will also be prefilled with information as fetched on the basis of the identification provided.

Existing digital banking customers can simply provide their online banking credentials to log in to the system.

The application form also has the feature of QR code scan enablement which can be used to continue applications on mobile devices.

The application tracker has been built so as to enable tracking of the application once it has been submitted. The application tracker also enables the applicant to retrieve and complete an application that has been saved. Additionally, the applicant can view documents that have been uploaded as part of the application form and can also view details as defined in the application form in PDF format.

Note

- a. When integrated with OBO as the host, the Credit Card Preferences step will only contain the feature enabling the applicant to apply for add-on cards.
- b. OBDX is integrated with Oracle KYC to fetch the applicant's risk level (high risk or low risk) along with the reference number for the same as generated in the Oracle KYC system, at the time of application submission. OBDX will further send this information to the mid office system to be utilized as required.

Following are the steps involved in the application submission:

- **Product Selection:** All the products belonging to the selected product category will be listed here. Each product will be listed as a separate card which will display the name and

image of the product along with a short description, features and the options to view further details, or to apply for the product. The additional option to select the product so as to compare it with others within the same category will also be provided on each card. You can select a maximum of three products for comparison.

The Credit Cards listing page is further enhanced to group cards based on categories to which they belong, to make the task of browsing cards easier for the applicant. Applicants can also utilize the filter option to search for cards that best suit their needs. A hero banner is displayed at the top of the listing page that showcases all the featured credit cards.

- **Kick Off:** This page serves as an introduction to the application form. You can also view the documents required to be uploaded as part of the application. As an applicant, you can identify how you are going to proceed with the application. If you are a new/unregistered user, you can continue as a guest, or if you are an existing online banking customer you can login with your online banking credentials to have your information pre-populated in the application.
- **Mobile Verification:** This step is applicable if you are filling out the application as a new/unregistered user. You will be instructed to enter your mobile number, after which the system will identify whether your mobile number is already registered with the bank or not. You will then be required to enter the OTP sent to this mobile number in order to proceed with the application form.
- **Online KYC:** Online KYC of the applicant can be done through any of the following modes, depending on which mode has been enabled by the bank in the Originations Workflow Maintenance screen available to bank administrators.
 - a. Liveness Check – Selfie Capture
 - b. (National) ID Verification

For more information on Online KYC and modes, please refer to the user manual **User Manual Oracle Banking Digital Experience Originations - KYC Modes**

- **Personal Information:** This section captures information pertaining to your personal information which will include your full name, date of birth, address details, etc. You can opt to upload an identity proof document to have the information on this section pre-populated or you can alternately enter the required information manually.
- **Employment Information:** You can provide information pertaining to your employment, in this step. In addition to defining information of your primary employment, you can also furnish past employment details and/or other current employment details.
- **Financial Profile:** In this section, you can furnish details pertaining to your Income, Expense, Assets and Liabilities. This step will be part of the application form only if you have identified that you are currently employed by selecting the provided option on the disclaimer modal window.
- **Card Preferences:** In this section, you can customize the card you are applying for by defining preferences related to international usage, add-on cards and balance transfers.
- **Review and Submit:** Once you have filled out all the information required in the education loan application form, you will be displayed this information on the review page. You can verify the details provided and if required, can edit the information in any sections by selecting the option provided against each section.
- **Terms of Service:** On having reviewed the application, you can then proceed to view the terms and conditions of the education loan you are applying for. You can also add a digital signature by means of uploading a document containing your signature or by physically signing the provided space if you are filling out the application from a touchscreen device.
- **Confirmation:** Once you have submitted your application after having reviewed it and having accepted the terms and conditions, a confirmation page will be displayed. This

page will display a success message along with the application reference number. You can track your application on the basis of this reference number. Additionally, this page will also contain a button, by clicking on which you can navigate to the application tracker.

Apart from the **Review and Submit** and **Confirmation** steps, the sequence of the remaining steps may vary based on the configuration maintained for the product applications, by the bank.

To apply for a credit card:

- Perform anyone of the following navigation for the **Credit Cards** application.
 - From the Bank Portal page, goto **Product Offerings** section, and then click **Personal** tab, and then click **Credit Cards**.
 - From the Bank Portal page, click **Toggle menu**, then click **Menu**, and then click **Our Products**.

Under **Our Products**, click **Product Offerings**, and then click **Credit Cards**.

A screen containing the credit card products available for online application will be displayed.

1.12 Submitted Application - Confirmation

This topic describes the confirmation page that appears after application submission.

This page displays the name of the product that you have applied for along with the application reference number. It also provides a link by means of which you can track your application.

Figure 1-17 Confirmation

- Click on the **Track your application** link to navigate to the **Application Tracker** Login page.

For information on the **Application Tracker**, refer to the **Oracle Banking Digital Experience Retail Originations Application Tracker User Manual**.

1.13 Existing User

This topic describes the product application process for existing customers.

An application form being initiated by an existing online banking customer of the bank (registered user) will differ from that of one being initiated by a new/unregistered user.

You will be able to apply as an existing customer either by selecting the provided option on the kickoff page and proceeding to specify your login credentials (applicable if you have applied via the bank portal page) or by selecting the product of choice from the product showcase available to you post login via the hamburger menu. In either case, the application form will vary from that of a prospect customer's.

The system will identify your KYC status and depending on the status, you will either be allowed to proceed with the application or not i.e. if your Re-KYC is active you will be allowed to enter and submit your application form but if your Re-KYC is pending, depending on the configuration, you might either not be allowed to apply for the product or you will be allowed to proceed with the application which will also contain steps for ID verification (National ID and/or Liveliness Check based on what is configured).

The credit card application form for existing customers, with KYC status as active, will comprise of the following sections:

1. **Employment Information** – This section will only be part of the application form if employment information is to be captured for the product you have selected and if your employment information is either not maintained with the bank at all or if the information is maintained but is not current.
2. **Financial Information** – Like employment information, the financial information section will also be part of the application form only if it is configured for the product you have selected as well as certain factors such as whether your financial information is already maintained with the bank or not and if maintained whether the information is current or not. Hence, the financial information section will only be part of the application form if your information is either not maintained with the bank at all or if the information is maintained but is not current.
3. **Credit Preferences** – In this section, you can customize the card you are applying for by defining preferences related to international usage, add-on cards and balance transfers. If the host is OBO, the only preference enabled will be the option to apply for add-on cards.
4. **Terms of Service** – You will be required to read through and accept the terms and conditions related to the online application of the product you have selected.
5. **Confirm** – Once you have submitted your application, you will be displayed a confirmation page. This page will contain a success message along with the application reference number that you will be able to use to track your application in the application tracker.

FAQ

1. Can I proceed with the application if I am an existing customer of the bank but do not have online banking access?

You will need to first onboard yourself on the digital banking platform. You can do so by selecting the 'Register for online banking access' link on the kick off page or by selecting the 'Register Now' option provided on the login page. Once you have completed the registration process, you can login and proceed with application initiation.

2. I am applying for the product as a guest user. The address that is mentioned in the document that I have uploaded in support of the application is different from my current permanent address. Can I update that information in the application form?

Yes, all the information that is fetched from your document is displayed in editable format in the Personal Information section. You can update the required details and submit your application. However, please note that once your mobile number, as provided in the Mobile Verification page, is verified, you will not be able to modify it in the Personal Information section.

3. How many products can I apply for as part of a bundled application?

Out of the box, you can add a maximum of three products in a bundle. This number is configurable by the Bank and may change.

4. In case my application is saved as a draft, can I request a bank executive to complete this application on my behalf?

Only you can resume and complete a draft application.

5. Can I cancel one of the product applications that has been submitted as part of a bundled application?

No. Currently, it is not possible to cancel a specific product application that is part of a bundled application. You can however, cancel the entire bundled application, if you wish to do so.

6. If I am applying for a product as an existing user, can I update my personal information while initiating an application?

No, you cannot update any personal details while applying as an existing online banking customer. You may contact the bank to update your personal information before applying for a new product.

7. For how long I can access and resume my applications that are saved as drafts?

This is based on the Bank's purging policy. The draft applications will be available for x days in the application tracker before they are purged by the bank.

8. Can I apply for a product that I have already applied for and that the bank is currently processing?

Yes, you can still submit an application for the same product. The decision to process or reject either of the two (or more) applications will rest on the bank.

9. I have started my application on my laptop. However, I have realized that some of the documents that I need to upload are available on my tablet. Do I need to abandon the application that I started on my laptop to restart the entire process on my tablet?

No, you can scan the QR code available on every step of the application form, post the Mobile Verification step, and resume the application from your tablet or mobile device.

10. Can bank administrators define the sequence in the steps of the application forms?

Yes, bank administrators can configure the sequence of steps in the application forms of all product categories supported for online application, through the Origination Workflow Maintenance feature available on the OBDX platform.

11. How does National ID verification work?

The bank can integrate with government or other third party systems (which store and maintain data of National ID holders), through available hook points. Online authentication will be performed to verify the identity claim of the ID holder and to fetch the required personal information.

12. How does OCR work?

The bank can integrate with the third party adapters that provide OCR services, through available hook points. The system will be able to prefill certain fields in the Personal Information section from data fetched from the applicant's uploaded documents.

Similarly, an out of box integration is available with the internal 'Document verification framework'.

Extensibility hooks can be used to support OCR for most identity and financial documents.
