Index

# Preface

This guide provides step-by-step instructions to open a current account.

- Purpose This topics decribes the current account opening process.
- Audience
- Documentation Accessibility
- Diversity and Inclusion
- Conventions
- Acronyms and Abbreviations
- Symbol and Icons
- Basic Actions
- Screenshot Disclaimer

# Purpose

This topics decribes the current account opening process.

Welcome to the **Current Account Origination** user guide for Oracle Banking Origination. This document provides an overview of the Current Account Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a Current Account Origination.

# Audience

This user guide is intended for the Relationship Managers (RMs) and Sales Officers in-charge of sourcing the Current Account Products from prospect and customer of the bank. This user guide is also intended for the other bank personas such as Bank Operations Manager, Account Opening Officers or Branch Managers who may handle the specific stages of the lifecycle of the Current Account Origination process based on the bank's internal operation and policies.

# **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

#### Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

# **Diversity and Inclusion**

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to

build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

# Conventions

The following text conventions are used in this document:

Convention	Meaning Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.					
boldface						
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.					
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.					

# Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

#### Table Acronyms table

Abbreviation	Description				
DS Data Segment					
System	Oracle Banking Origination Module				
OBA	Oracle Banking Accounts				
ОВО	Oracle Banking Origination

# **Basic Actions**

Table Basic Actions	Table	Basic Actions
---------------------	-------	---------------

Actions	Functions					
Actions	Functions					
Request Clarification	Jsed to raise a new clarification request. The system allows placing a request for clarification that is needed from the Customer to proceed ahead with the application. The clarification can be for any additional details, confirming specific information, the requirement for any additional document, and so on, from the customer. For more information on Request Clarification, refer to the section Request Clarification.					
Back	Used to navigate to the previous data segment within a stage.					
Next	Used to navigate to the next data segment, after successfully capturing the data. The system validates all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. Users will not be able to proceed to the next data segment, without capturing the mandatory data.					
Save & Close	Used to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.					

## Table (Cont.) Basic Actions

Actions	Functions
Cancel	Used to close the application without saving. This tasks appears in Free Task, once the transaction is canceled.

# **Screenshot Disclaimer**

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

# 1 Overview

This topic describes the information on the various features of the current account origination process.

#### **Product Introduction**

Oracle Banking Origination is the middle office banking solution with a comprehensive coverage of account opening processes of the below product for both Individual as well as Small and Medium Business type of customers:

- Saving Account
- Current Account
- Term Deposit Account
- Retail Loans Account

It is a Host-Agnostic solution

It enables banks to deliver the improved user experience for various bank persons such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/ Managers, Loan Officers, and Credit Officers and more, handling defined functions in the lifecycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business-driven, is hosted and architectured by our new platform solution. The random access navigation between data segments within a given stage are with appropriate validations helps to enable the business user to capture apt information anytime during the account open process before created account in the Host. The new workflow supports capturing relevant documents, stage-wise, and the generation of advice and notifications dynamically.

The account opening request is initiated by authorized branch user or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services. These services are available on digital devices like tablets or mobiles. The account opening request can be initiated for both both new and existing customer types. Also, the system supports the processing of the account opening request from the customer directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST-based service APIs.

This user guide explains the workflow for the Current Account Origination process and further details the data that needs to capture in the data segment linked to the specific stages.

# 2 Initiating Current Account Opening Process

This topic describes the information on the defined stages through which the Current Account Application has to flow before it is ready to be sent to the Host for Account Creation.

As detailed in the **Operations User Guide**, the account opening applications of all product are initiated in the application initiation stage from the Product Catalogue. The Cart Operation in Product Catalogue allows to originate, Single or Multiple Product initiation. Once the current account product origination process is initiated either by a single product origination or multiple product selection, the process orchestrator generates the current account process reference number on submit of application initiation stage. The process orchestrator updates the record in the free task process for the 'Application Entry' stage and is referred to as task from the orchestrator perspective.

#### To acquire and edit respective stage:

1. From Home screen, click Tasks. Under Tasks, click Free Tasks. The Free Tasks screen is displayed.

#### Figure 2-1 Free Tasks

 Click Acquire & Edit from the Actions column against the stage which user wants to update.

The Current Account Origination Process flow comprises of the below stages and the detailed information of the same is available in the below sections:

Application Entry Stage

This topic describes the information on the various data segments to capture the required data in the Application Entry stage.

- Application Documents
   This topic describes the process of the documents that are uploaded related to application.
- Debit Assessment The topic describes the debit assessment process.
- Manual Debit Assessment The topic describes the manual debit assessment process.

Application Enrichment Stage

This topic describes the information on the various data segments to view and update the required data for the Application Enrichment stage.

- Account Funding
   This topic describes the process of initial funding of an account. This stage appears once
   the account is opened.
- Application Approval Stage

This topic describes the information on the various data segments to view the captured details and approve the application in the Application Approval stage

Account Funding

This topic describes the process of initial funding of an account. This stage appears once the account is opened.

• Global Actions This topic provides the detailed on the actions that can be performed in all stages.

# 2.1 Application Entry Stage

This topic describes the information on the various data segments to capture the required data in the Application Entry stage.

Based on the access configuration, user can view the records in **Free Task**. In this stage user can capture the details that are required to open a current account. This stage is automatically submited on below conditions:

- If the bank level configuration for allowing the full application submission is set as Yes.
- If the user captures the required details in all the data segments of the **Application Entry** stage as part of the **Application Initiation** stage on clicking the **Application** button in the **Product Details** data segment.

## To open Current Account Application Entry task:

- 1. Scan the records that appears in the Free Task list.
- 2. Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Current Account Application Entry stage is displayed.

The data segments appears as configured in business process. Refer below sections for detailed information of each data segment.

• Applicant

This topic provides the systematic instructions to capture the customer-related information for the application.

- Account Details
   This topic provides the systematic instructions to view and modify the account details.
- Stake Holder Details This topic provides the systematic instructions to capture the stake holder details related information for the business.
- BeneficiaryDetails
   This topic provides the systematic instructions to capture the details of the Beneficiary for the account.
- Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.

## Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

# 2.1.1 Applicant

This topic provides the systematic instructions to capture the customer-related information for the application.

The **Applicant** data segment displays the details captured for the customer in the Application Initiate stage and allows updating further fields for supplementing the customer related information.

• For Individual Customer Type

The topic describes the process to capture or edit customer information of Individual type of customer.

For Small and Medium Business (SMB) Customer Type

The topic describes the process to capture or edit customer information of Small and Medium Business type of customers.

## 2.1.1.1 For Individual Customer Type

The topic describes the process to capture or edit customer information of Individual type of customer.

## To capture applicant details:

1. In the Current Application Entry stage, update the customer details in the Applicant data segment based on the respective customer type.

The Applicant - Individual screen displays.

2. Specify the relevant details in data fields. The fields which are marked as **Required** are mandatory. For more information on fields, refer to the field description table below:

For more information on the fields, refer to the field description table below:

Table 2-1	Applicant- Individual – Field Description
	Applicate marriada inclusion provin

Field	Description
Applicant Role	Displays the applicant role. By default the Primary role appears in this field.
	Select the applicant role incase user add multiple applicant in single application.

Field	Description
Add Applicant By	Select the mode from which the user need to add new applicant. The available options are: • <b>Upload ID</b> - Using this option user can upload identification
	<ul> <li>document of the applicant to extract the details.</li> <li>Search Existing Customer - This option is used if the applican is an existing customer of the bank. On selecting the existing customer, the details appears in the respective sections which are already stored.</li> <li>Enter Manually - This option is used if user wish to enter all the applicant details manually.</li> </ul>
Document Name	Select the document which is used from extracting applicant details. The available options are:
	<ul><li>State Issued Drivers License</li><li>Passport</li></ul>
	This field appears if the <b>Upload ID</b> option is selected from the <b>Add Applicant By</b> drop down list.
Country of Issue	Select the country in which the document is issued. This field appears if the <b>Upload ID</b> option is selected from the <b>Add</b> <b>Applicant By</b> drop down list.
Select and Drop here	Drag and drop the document file or click on <b>Select or drop files</b> here to browse and upload the document from the local system.
	PNG & JPEG file formats are supported.
	10MB maximum file size is allowed.
	This field appears if the <b>Upload ID</b> option is selected from the <b>Add Applicant By</b> drop down list.
CIF Number	Search and select the CIF number.
	This field appears if the <b>Search Existing Customer</b> option is selected from the <b>Add Applicant By</b> drop down list.
Advanced Search	Click this button to perform party search using advance parameters. For more information on advance search, refer the <b>Advanced</b> <b>Search</b> section below.
	This field appears if the <b>Search Existing Customer</b> option is selected from the <b>Add Applicant By</b> drop down list.
Basic Details	In this section the user can manually capture the basic details of applicant. This section appears if the <b>Enter Manually</b> option is selected from the <b>Add Applicant By</b> drop down list.
Salutation	Select the salutation of the applicant from the drop-down list.
First Name	Specify the first name of the applicant.
Middle Name	Specify the middle name of the applicant.
Last Name	Specify the last name of the applicant.
Suffix	Specify the suffix for the applicant. This options in this list appears based on the configured entity code in the Oracle Banking Party product.
Gender	Specify the Gender of the applicant from the drop-down list.
Date of Birth	Select the date of birth of the applicant.

Table 2-1	(Cont.) Applicant- Individual – Field Description
-----------	---------------------------------------------------

Field	Description
Citizenship Status	Select the citizenship status of the applicant from the drop-down list Available options are:
	Non-Resident Alien
	Resident Alien
	Citizen
Country of Residence	Search and select the country code of which the applicant is a resident.
Birth Place	Specify the birth place where the applicant has born.
Nationality	Search and select the country code where the applicant has nationality.
Citizenship By	Search and select the country code for which applicant has citizenship.
Marital Status	Select the marital status of the customer from the drop-down list. Available options are:
	Married
	Unmarried
	Legally Separated     Widow
	Registered Domestic Partnerships
Customer Segment	Select the segment of the customer. Available options are:
Customer Segment	Emerging Affluent
	High Net worth Individuals
	Mass Affluent
	Ultra HNI
	• Very HNI
Customer Category	Select the category of the customer.
Staff	Select the toggle to indicate if the customer is employee of the bank
Politically Exposed Person	Select to indicate if the customer are politically exposed person.
Profile Photo	Drag and drop the document file or click on <b>Select or drop files</b> here to browse and upload the document from the local system.
	PNG & JPEG file formats are supported.
	10MB maximum file size is allowed.
Signatures	In this section you can add new signature and view the already added signature of the customer.
	Click the Add Signature button to select the file to upload signature.
	Click Cancel button to discard the added details.
	On <b>Submit</b> , signature will be handed off to Oracle Banking Party.
Upload Signature	Drag and drop the signature file or click on <b>Select or drop files her</b> to browse and upload the signature from the local system.
	PNG & JPEG file formats are supported.
	10MB maximum file size is allowed.
Uploaded Signature	Displays the uploaded signature.
Remarks	Specify the remarks related to the signature.
Oliverations ID	Click <b>Save</b> to save the uploaded file.
Signature ID	Displays the Signature ID for the added signature along with the image and remark.

Table 2-1 (Cont.) Applicant- Individual – Field Description

Table 2-2 (Cont.) Small and Medium Business – Field Description

Field	Description
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list. The drop-down list option consist of countrycode, country name and subscriber dialing code. This field appears only if you select the <b>Mobile Phone</b> option as communication mode.
Mobile Number	Specify the mobile number.
Preferred	Select to indicate if the given mobile number is the preferred number.
Action	You can edit or delete the added mobile details.
Email Id	Specify the email ID. This field appears only if you select the <b>Email</b> option as communication mode.
Preferred	Select to indicate if the given email ID is the preferred ID.
Action	You can edit or delete the added email details.

Table 2-2 (Cont.) Small and Medium Business – Field Description

#### **Advanced Search**

You can perform an advanced search for the party by providing additional information.

Refer above **Advanced Search** section for more details.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data. If the Customer Dedupe check is enabled, the application will perform the Dedupe check for the new customer details on clicking Next button. For more information, refer the Customer Dedupe Check section.

#### **Customer Dedupe Check:**

Based on the configuration set in the **Origination Preference** screen, the customer dedupe serivce is enabled.

If the **Customer Dedupe** service check is enabled, upon capturing the New Customer details, the system compares the same with the existing customers records. If there are any matching hits, the list of Duplicate records which matches to the New Customer Details will be displayed.

The customer details are compared based on a set of attributes configured. (Refer to Oracle Banking Party Documentation for Dedupe attributes configuration).

4. Click **Next** to perform the dedupe check and display the result.

The De-Dupe Result screen is displayed

## Table 2-5 (Cont.) Stakeholder - Field Description

4. To onboard the New Customers, disable the **Existing Customer** toggle. By Default, the **Existing Customer** is enabled.

The **Customer Onboarding** screen is displayed.

## Figure 2-9 Customer Onboarding

Customer Onboarding	×
Customer Category *	
Ψ	
	Save

- 5. Select the appropriate option from the Customer Category list.
  - a. If you select Individual option to onboard individual type of customer, refer field description table and procedure from 3.1.1.1 For Individual Customer Type of Customer Information data segment.
  - b. If you select Small and Medium Business option to onboard small and medium business type of customer, refer field description table and procedure from 3.1.1.2 For Small and Medium Business Customer Type of Customer Information data segment.
- 6. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

On submission of Application Entry stage, Stakeholder Onboarding request gets initiated for the new customers.

The request for New Stakeholder Onboarding is addressed by the underlying API call, which also generates the New Party reference number, thereby circumventing the usual process of generating a Unique Process reference number / Task.

# 2.1.4 BeneficiaryDetails

This topic provides the systematic instructions to capture the details of the Beneficiary for the account.

The Beneficiary Details is a non-mandatory data segment. If required, It allows capturing multiple beneficiaries for the account. Beneficiary can be a minor, in that case, it is mandatory to provide details of the guardian. For SMB Customer, Beneficiary Details are allowed only for Proprietary type of Business Accounts.

## To add beneficiary details:

 Click Next in from the previous data segment to proceed with the next data segment, after successfully capturing the data.

The Beneficiary Details screen displays.

### Figure 2-13 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on summary tiles, refer to the field description table below.

Data Segment	Description
Applicants	Displays the applicants details
Account Details	Displays the account details.
Stake Holder Details	Displays the Stake Holder details
	This data segment appears only if the <b>Customer Type</b> is selected as <b>Small and Medium Business (SMB)</b> .
Financial Details	Displays the financial details.
Collateral Details	Displays the collateral details.
Beneficiary Details	Displays the beneficiary details.
Term and Conditions	Displays the term and conditions.

Table 2-7 Summary - Application Entry – Field Description

- 2. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage are verified. The **Overrides** screen is displayed.
- 3. In the **Override** screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click **Accept Overrides& Proceed** to proceed.

### OR

Click Proceed. The Checklist screen appears.

- In the Checklist screen the system displays the error message if document checklist is not verified. Click Proceed Next to proceed. The Outcome screen appears.
- 5. In the **Outcome** screen, select appropriate option from the **Select to Proceed** field:
  - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Entry** stage for the saving application. The

Workflow Orchestrator will automatically move this application to the next processing stage, **SavingApplication Enrichment.** The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- If the Overdraft Requested toggle is OFF then, submit of this stage, will move the application into the Application Enrichment stage.
- If the Overdraft Requested toggle is ON then, submit of this stage, will move the application into the Overdraft Limit Stage.
- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- Click Submit to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- 7. Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers [Current Account] to the Application Enrichment stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

#### **Application De-Dupe:**

Based on the configuration available at the Bank level / Properties Table, the Dedupe service call can be enabled or disabled for the product Origination.

If application dedupe service is enabled, System will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

### Note:

- If an application is returned to the Application Entry-stage from any other subsequent stages, Oracle Banking Origination will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case the party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting the Application Entry stage. The user has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.

8.

# **2.2 Application Documents**

This topic describes the process of the documents that are uploaded related to application.

The Application Documents stage provides the view of the outbound documents that are generated and dispatched to the applicants invloved in the application.

### To generate and disptach the outbond documents:

- 1. Scan the records that appears in the Free Task list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Application Documents stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- Document Generation In this data segment you can generate and dispatch the documents that are configured.
- Document Acceptance
   In this data segment you can capture the acceptance of the documents that are already generated and dispatched.
- Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

### 2.2.1 Document Generation

In this data segment you can generate and dispatch the documents that are configured.

In the Document Generation data segment, the list of documents that are maintained within the document generation event and fulfills the rule criteria are pre-populated in the tabular format. This document generation events are defined in the **Advice Maintenance** screen. Each documents appears seperately to generate and dispatch. **To generate and dispatch the document:** 

1. On acquiring the **Application Document** task, the **Document Generation** stage is displayed.

Application Documents - 006APP000127550			Application Info	Application Details	Customer 360	ocuments 🛛 🗊 Advices	More •

udit						Canc	el Request Clarification	Save and Close Nex

Figure 2-14 Document Generation

2. In the **Document Generation** section, select the check box to select the document from the list. It is mandatory to select atleast one document

You can perform below actions on the seletced document:

- Generate: You can click this button to generate the selected document. On clicking
  this button the system invokes a call to the report generation service which generates
  a PDF output for the advice onfigured in the Advice Maintenance screen. Once the
  output is generated the documents are stored in the document managed service
  (DMS) along with the reference ID. This reference ID fetches the document on click
  the Generate Docoument link in the Documen column.
- **Dispatch**: You can click this button to dispatch the selected generated documents. You can only dispatch those documents which are not already disptached. On clicking this button the system validates whether the document is already generated. Once the validation is successful the system dispatch the document to the default setting defined in the Advice Maintenance screen.
- **Reset**: You can click this button to reset the action performed on the document.

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. This link appears only if the document is generated.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.
Delivery Details	<ul> <li>Displays the delivery details of the generated documents based on the default delivery mode.</li> <li>If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed.</li> <li>If the delivery mode is Post then the preferred address of every recipient is displayed.</li> <li>If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated.</li> <li>If the delivery mode is Print then the Not Applicable text appears.</li> </ul>
Status	<ul> <li>Displays the status of the documents based on the actions performed on clicking Generate or Dispatch button.</li> <li>Once the dispatch process is initiated for the generated documents, the status appears based on the selected default mode of delivery.</li> <li>If the mode of delivery is Email then on the successful trigger the status appears as Email Sent.</li> <li>If the mode of delivery is E-Sign Remote or E-Sign In-Person then on the successful trigger the status appears as Dispatched.</li> <li>If the mode of delivery is Post then on the successful trigger the status appears as Dispatched.</li> <li>If the mode of delivery is Print then on the successful trigger the status appears as Ready for Print.</li> <li>In case the dispatch process fails due to technical error then the status appears as Failed.</li> </ul>

Table 2-8 Document Generation – Field Description

Field	Description

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

## 2.4 Manual Debit Assessment

The topic describes the manual debit assessment process.

In the process of an account opening of deposit product this stage appears if the bureau status of any applicant is mark as **Referred**. The user can manual change the status of the applicant to proceed.

#### To open manual debit assessment task:

- 1. Scan the records that appears in the **Free Task** list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Manual Debit Assessment stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

The Manual Debit Assessment stage has the following reference data segments:

- Bureau Information This topic describes the bureau information details.
- Manual Decision The topic describes the manual decision process.
- Summary This topic describes summary of all the data segment.

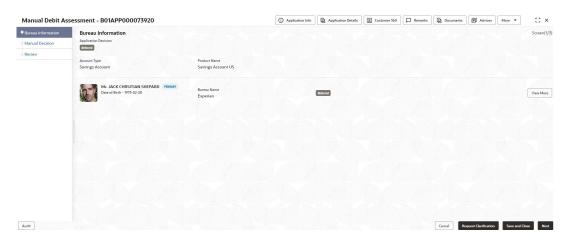

### 2.4.1 Bureau Information

This topic describes the bureau information details.

In this data segment user can view the bureau information of application and status of all the applicants that are involved in the application.

1. On acquiring the Manual Debit Assessment task, the Bureau Information data segment appears and call to bureau service is initiated for display the bureau information related to application and applicants.

The Bureau Information screen appears.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

### 2.5.2 Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Application Enrichment stage.

The tiles display the important details captured in the specified data segment.

1. Click **Next** in **Account Service Preferences** screen to proceed with the next data segment, after successfully capturing the data.

The Summary - Application Enrichment screen displays.

Figure 2-23	Summary - Application Enrichment
-------------	----------------------------------

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 2-17 Summary - Application Enrichment – Field Description

Data Segment	Description
Interest Details	Displays the interest details.
Charge Details Displays the charge details.	
Temporary Overdraft Limit	Displays the temporary overdraft limit.
Advance against Uncollected Funds	Displays the advance against uncollected funds.

2. Click Request Clarification to raise a new clarification request. The system allows placing a request for clarification that is needed from the Customer to proceed ahead with the application. The clarification can be for any additional details, confirming specific information, the requirement for any additional document, and so on, from the customer. For more information on Request Clarification, refer to the section Request Clarification.

- 3. Click **Back** to navigate to the previous data segment within a stage.
- 4. Click **Save and Close** to save the data captured. The captured data is available in the **My Task** list for the user to continue later.
- 5. Click **Cancel** to terminate the application and the status of the application. Such applications cannot be revived later by the user.
- 6. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist, and documents for this stage can be validated or verified.

The Stage Movement Submission - Override screen displays.

Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, the user can go back and correct the data to ensure overrides do not arise.

7. Click Proceed Next.

The Stage Movement Submission - Checklist screen displays.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

- 8. Select the checkbox to accept the checklist.
- 9. Click Save and Proceed.

The **Stage Movement Submission - Outcome** screen displays. For more information on fields, refer to the field description table.

Table 2-18	Stage Movement Submission - Outcome – Field Description
------------	---------------------------------------------------------

Field	Description
Select an Outcome	Select the option from the drop-down list. The available options are: Proceed Return to Overdraft Limit Details Return to Application Entry Reject By Bank
Remarks	Specify the remarks, if any.

Outcomes configured in the Workflow Orchestrator for the business process is available in the drop-down list.

10. Click Submit.

The Confirmation screen displays.

### Figure 2-24 Confirmation

If the **Collateral Type** is selected as **Term Deposit** in **Collateral Details** data segment and the **Fund the account** toggle is OFF in the **Product Details** data segment, the submit of the Application Enrichment stage will move the application into the **Account Parameter Setup** stage.

If the selected **Collateral Type** is other than Term Deposit in **Collateral Details** data segment, and the **Fund the account** toggle is OFF in the **Product Details** data segment, the submit of the Application Enrichment stage will move the application into the **Underwriting** stage.

If the **Fund the Account** toggle is ON in the **Product Details** data segment, the submit of the Application Enrichment stage, will move the application to **Account Funding** stage.

On successful submission, the above pop-up appears and displays the next stage in which the application has moved. **Application Reference Number** and the **Process Reference Number** is displayed. Click **Close** to close the pop-up screen. Alternatively click **Go to Free Task** to launch the **Free Task** menu. If you have access to the next stage, you would be able to view the Application number and take action on it.

11. Click Go to Free Task.

The Free Tasks screen displays.

## 2.6 Account Funding

This topic describes the process of initial funding of an account. This stage appears once the account is opened.

In this stage you can initiate fund for an account post account opening. This stage appears if the **Fund Post Account Opening** toggle is selected in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

#### To add funding details:

- 1. Scan the records that appears in the Free Task list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Account Funding stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

Account Funding Details

This topic provides the systematic instructions to add the funding details post opening account is complete.

Approval Details	Displays the approval details.

Table 2-22 Summary - Account Approval - Field Description

Supervisor can verify the KYC Verification status of the Customer from the Customer 360 in the Header. Only if the KYC Status is 'Success' will the application be allowed to proceed further. Click **Submit** to submit the Account Approval stage and proceed to submit the Account Opening request to Host.

 Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified. The Overrides screen is displayed.

Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, the user can go back and correct the data to ensure overrides do not arise.

3. Click Proceed Next. The Checklist screen is displayed.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

- 4. Select the checkbox to accept the checklist.
- 5. Click Save & Proceed. The Outcome screen is displayed.
- 6. In the Outcome screen, select appropriate option from the Select to Proceed field.
  - Select the **Proceed** to proceed with the application. By default this option is selected. If the Proceed option is selected, then the application proceeds based on the assessment decision.
  - Select the **Return to Application Entry Stage** to make application entry stage available in free task for edit.
  - Select the Return to Application Enrichment Stage to make enrichment stage available in free task.
  - Select the **Return to Overdraft Limit Details** to make overdraft limit details stage available in free task.
  - Select the **Return to Initial Funding Details** to make account funding details stage available in free task.
  - Select the Return to Application Underwriting Stage to make underwriting stage available in free task.
  - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- 7. Enter the remarks in **Remarks**.
- 8. Click Submit. The Confirmation screen is displayed.

On submission of this stage, the Workflow Orchestrator will automatically move this application to the next processing stage, **Account Create on Host** which has been automated. The account will be successfully created in Product Processer, if all the required validation is successful.

In case due to any error the account creation is rejected on Product Processer side, the application moves to the **Manual Retry Stage** 

## 2.8 Account Funding

This topic describes the process of initial funding of an account. This stage appears once the account is opened.

In this stage you can initiate fund for an account post account opening. This stage appears if the **Fund Post Account Opening** toggle is selected in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

### To add funding details:

- 1. Scan the records that appears in the **Free Task** list.
- 2. Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Account Funding stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

Account Funding Details

This topic provides the systematic instructions to add the funding details post opening account is complete.

Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Account Funding stage

Cancel Save Request

- 3. In the **Request Clarification** screen enter the subject and description.
- Click Add Documentbutton to upload the document which supports the clarification request.
- 5. Specify the details in the relevant data fields while adding documents. For more information on fields, refer to the field description table.

Field	Description
Document Type	Select the document type.
Document Code	Select the document code.
Document Title	Specify the document title.
Document Description	Specify the description for the document.
Remarks	Specify the remarks for the document.
Expiry Date	Select the document expiry date.
Details	<ul> <li>Click the details icon to view below details of the documents:</li> <li>Uploaded Time: Displays the uploaded date and time of the document in hours and mins.</li> <li>Uploaded By: Displays the user name who uploaded the document .</li> <li>Stage Uploaded: Displays the stage name on which the document is uploaded.</li> </ul>
Document	Click Click to select the document from machine to upload. You can remove the uploaded document before saving the record from the Action column. Post saving the record you must delete the record to remove the document. Below actions are perfrom on the uploaded document You can preview already uploaded document. You can download already uploaded document.
Actions	<ul> <li>You can perfrom below actions on the added record:</li> <li>Click to save the record.</li> <li>Click to delete the record.</li> </ul>

Table 2-30 Upload Document – Field Description

6. Once the details are updated, click **Save**. Clarification Request once raised moves the application to 'Awaiting Customer Clarification' state. The application continues to be assigned to the user who had raised the request. All the applications for which the specified user has requested clarification can be viewed and actioned from the **Awaiting Customer Clarification** sub-menu available under **Task** menu.

Select the Application from the **Awaiting Customer Clarification** sub-menu available under the **Task** menu. Click on the **Clarification Details** from the header.

7. Select the specific clarification to take action on it.

Allowed actions are as following:

Adding New Conversation

- Withdraw Clarification
- Accept Clarification

Once the Clarification is either withdrawn or accepted, the application moves back to the **My Task** sub-menu available under **Task** menu, post which the user can edit the application and submit the specified stage. Clarification once raised and actioned are available throughout the application processing by the other users working on the other stages of the application by clicking on **Clarification Details** from the header.

# 3 Simplified Application

This topic describes the concept and process of single stage application.

### What is Simplified Application?

The Simplified Application is introduced to open an account in a smooth single process culminating the long account opening process. In this process the user can directly create and application and update details with multiple data segmenst in a single view.

### How to configure Simplified Application for a product?

To enable a simplified account opening process, select the **Simplified Application** flag in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

Once the product is configured for simplified application, the user can configure the business process such as stages, data segments, document checklist and so on, in the **Business Process Configuration** screen.

### How to process the simplified application?

After configuring the product and process, the user can initiate a single-stage application by navigating the menu. Below is the detailed process for opening an account using a simplified application.

#### To open an account using simplified application process:

- 1. From the Menu, select the Retail Origination. The Retail Origination menu appears.
- 2. From the **Retail Origination**, select the **New Application**. The New Application page appears with list of product types which are configured.
- Select the appropriate product and click Apply. The Application Entry stage appears. The data segments in this stage appears based on the business process configuration.
  - **Applicant** : In this data segment user can capture applicant details such as basic, address, signature, employment, identification. Mutiple applicants are allowed with different roles. Refer **Applicant** data segment from the **Application Entry** stage of this guide.
  - Account Details: In this data segment user can capture the product details to configure the account. Refer Account Details data segment from the Application Entry stage of this guide.
  - Beneficiary Details: In this data segment user can capture the beneficiary details. Refer the Beneficiary Details data segment from the Application Entry stage of this guide.
  - Interest and Charges: In this data segment user can view the interest and charges that are applicable. Refer the Interest and Charges data segment from the Application Entry stage of this guide.

- Term and Conditions: In this data segment user can capture the term, conditions and consents of the customer. Refer the Term and Conditions data segment from the Application Entry stage of this guide.
- **Review**: In this data segment user can review all the details that are captured on clicking on each data segment tile.
- On submitting the Application Entry stage, next stage is triggered based on the business process configuration.
   Below are the stages are autogenerated if the Know Your Customer (KYC) process is not successfully completed:
  - Debit Assessment: If the applicants involved in a simplified application have not completed the Know Your Customer (KYC) process, then the Debit Assessment stage appears in the application process. The user having the required access rights can pick this task and can retry submission after taking required actions on the KYC non-compliance. Refer the Debit Assessment stage of this guide.
  - Manual Debit Assessment: If the bureau status of any applicant is marked as Referred then this stage appears in an account opening process. Refer the Manual Debit Assessment stage of this guide.
- 5. After completing the Know Your Customer (KYC) process, the account number is generated and application proceed to approval stage. The Account Approval stage is generated. All the data segments of the Application Entry stage appears. The user can only view those stages. The Approval Details data segment is enabled to capture account approval status. For more information refer the Approval Details data segment of the Account Approval stage in this guide.
  - If the Rejected option is selected in the Approval Details data segment then this application is terminated.
  - If the Approved option is selected in the Approval Details data segment then the application's payload are proceed for account creation.
- 6. An account is created on approving the application in the Account Approval stage.
- 7. Below tasks are aslo generated in this process:
  - If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.
  - If the business process is configured to include Account Funding, then the **Account Funding** stage is generated after account creation.

## 4 Instant Current Account Origination Process

This topic describes the information about Instant Current Account Origination Process.

Additional Instant Business Process is available wherein various stages in the Reference Flow for Current Account have been automated.

This allows Instantaneous Account origination from Self-Service Channel such as Oracle Banking Digital Experience for existing Customer who are KYC Compliant and New Customers for whom KYC is completed in Oracle Banking Digital Experience. KYC Type supported for the STP is Identification and Address only and the same has to be configured in Oracle Banking Party Module.

### Note:

Refer the Retail Onboarding User Guide for more details.

Based on whether the Application has been initiated by self-service channel or by a Branch personnel the automatic submission of the stages or skipping of the stages are done by the system.

This process is not applicable for Small and Medium Business customers.

#### **Prerequisite:**

- For the automatic submission to work, it is expected that document and checklist are not configured in any of the stages.
- Initial Funding is either not taken for the Account or taken as Account Transfer for which the mode configured has to be 'H' which represents that the selected Account will be debited by the Host as part of the Account Opening Process (Allowed for both Self-Service Channel and Branch Initiated Applications) or Initial Funding is taken via External Bank Account Transfer on self-service channel (This mode is not allowed for Branch Initiated Applications). For more details refer Initial Funding Configuration in the Configurations User Guide.

In the Instant Current Account Origination Reference Business Process, the stages that have been configured are mentioned below.

- Application Entry Stage: On successful submission of the Current Account Application from self-service channel, the system starts the Application Entry stage without any manual intervention and completes the Data Segment level validation. On successful completion of the validation, the system automatically submits the Application Entry Stage. Similarly, for the Branch initiated Application also this stage is automatically submitted, if the data segment configured for Application Entry stage are updated in the Application Initiate Stage itself by clicking the 'Application' button in the Product Details Data Segment.
- Account Funding Stage: On successful submission of the Application Entry Stage, system checks if Initial Funding has been updated for the Account Opening or not.
  - The initial funding mode allowed for self-service initiated applications are External Bank Account Transfer and Account Transfer.

- In case Initial Funding has been taken for the Account via the External Bank Account Transfer in the self-service channel, system starts the Application Funding Stage and validates the Initial Funding Details Data Segment and submits the Application Funding Stage automatically.
- For Application where the Initial Funding is updated as Account Transfer or where no funding has been taken for the Account, this stage is skipped completely by the system for Application initiated from Self-Service Channel and Branch Initiated Applications.
- For the Branch Initiated Applications wherein the Initial Funding has been taken in Cash or Other Bank Check, this stage has to be manually actioned by the Branch User having access permission for this stage.
- Account Approval Stage: System skips this stage for self-service initiated application and submits the application directly to the Product Processor for Account Creation. However, for Branch initiated Application considering the 4-eye principle, system expects the application to be approved by a Supervisor. Hence this stage, will have to be picked and actioned by the Supervisor User. Supervisor User can either approve or reject the Application. On submission of this stage by selecting 'approve' outcome, system submits the Application to the Product Processor for Account Creation.
- **Handoff Retry:** Application moves to this stage and appears in the Free Task only if the Current Account creation has been rejected by Product Processor. User having the required access rights can pick such task and can retry submission to Host after taking required actions on the Failure reason.

# 5 Error Codes and Messages

This topic contains error codes and messages.
