### Purpose

Welcome to the **Savings Account Origination** user guide for Oracle Banking Origination. This document provides an overview of the Savings Account Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a Savings Account Origination.

### **Audience**

This user manual is intended for the Relationship Managers (RMs) and Sales Officers incharge of sourcing the Savings Account Products from prospect and customer of the bank. The user manual is also intended for the other bank personas such as Bank Operations Manager, Account Opening Officers or Branch Managers who may handle the specific stages of the lifecycle of the Savings Account Origination process based on the bank's internal operation and policies.

# **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

### **Access to Oracle Support**

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

# **Diversity and Inclusion**

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

### Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

# Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Table 1 Acronyms table

Abbreviation	Description
DS	Data Segment
System	Oracle Banking Origination Module
OBA	Oracle Banking Accounts
ОВО	Oracle Banking Origination

# **Basic Actions**

**Table 3 Basic Actions** 

Actions	Functions
Request Clarification	Used to raise a new clarification request. The system allows placing a request for clarification that is needed from the Customer to proceed ahead with the application. The clarification can be for any additional details, confirming specific information, the requirement for any additional document, and so on, from the customer. For more information on Request Clarification, refer to the section Request Clarification.
Back	Used to navigate to the previous data segment within a stage.
Next	Used to navigate to the next data segment, after successfully capturing the data. The system validates all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. Users will not be able to proceed to the next data segment, without capturing the mandatory data.

Table 3 (Cont.) Basic Actions

Actions	Functions
Save & Close	Used to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.
Cancel	Used to close the application without saving. This tasks appears in Free Task, once the transaction is canceled.

# **Screenshot Disclaimer**

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

## Overview

This topic describes the information on the various features of the Savings Account Origination module.

Oracle Banking Origination is the middle office banking solution with a comprehensive coverage of Retail Banking Origination processes for Savings Account, Current Account, Term Deposit, Credit Cards and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan for Individual customers, and Term Loan and Business Loan for Small and Medium Business customers.

- Saving Account
- Current Account
- Term Deposit Account
- Credit Card Account
- Retail Loans Account

It is a Host-Agnostic solution.

It enables banks to deliver improved user experience for various bank personas such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/Managers, Loan Officers, and Credit Officers and so on, handling defined functions in the lifecycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architectured by our new platform solution. The random access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the account open process before the Savings Account is created in the Host. The new workflow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

The initiation request for a Savings Account can be originated by authorized branch users or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services made available on digital devices like tablets or mobiles. The initiation of Savings Account request can be made for both new and existing customer types. Also, the system supports processing of the savings account request from the customer which are directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST based service APIs.

Refer to the detailed setup and operation workflows for both asset and liability products initiation made available in the **Operations User Guide**.

# Savings Account Origination

This topic describes the information on the defined stages through which the Savings Account Application has to flow before it is ready to be sent to the Host for Account Creation.

As detailed in the **Operations User Guide**, all the Product Originations are initiated in the **Application Initiation** stage from the Product Catalogue. The Cart Operation in Product Catalogue allows to originate single or multiple Product initiation. Once the Savings Account Product origination process is initiated either as a single product origination or as part of the multiple product selection, Process Orchestrator generates the Savings Account Process Reference Number on submit of the **Application Initiation** stage. Process Orchestrator also updates the record in the **Free Task** process for the **Application Entry** stage also referred as Task from orchestrator perspective.

The Savings Account Origination Process flow comprises of the following stages and the detailed information of the same is available in the following topics:

### Application Entry Stage

This topic describes the information on the various data segments to capture the required data in the Application Entry stage.

### Overdraft Limit Details Stage

This topic describes the information on the various data segments to capture the required data for the Overdraft Limit Details stage.

### Application Enrichment Stage

This topic describes the information on the various data segments to view and update the required data for the Application Enrichment stage.

### Account Funding Stage

This topic describes the process of initial funding of an account. In this stage user can provide initial funding details before opening an account.

### Underwriting Stage

This topic describes the information on the various data segments to access the credit rating and capture the required data for the Underwriting stage.

### Application Assessment

This topic describes the information on the various data segments to update the required data and assess the application in the Application Assessment stage.

### Manual Credit Assessment Stage

This topic describes the information on the various data segments to assess the application manually in the Manual Credit Assessment stage.

### Manual Credit Decision Stage

This topic describes the information on the various data segments to review and approve the application manually in the Manual Credit Decision stage.

#### Account Parameter Setup Stage

This topic describes the information on the various data segments to setup the required account parameters in the Account Parameter Setup stage.

### Supervisor Application Approval Stage

This topic describes the information on the various data segments to view and approve the price change in the Supervisor Application Approval stage.

### Offer Issue Stage

This topic describes the information on the various data segments to generate the offer in the Offer Issue stage.

### Offer Accept / Reject Stage

This topic describes the information on the various data segments to accept / reject the offer in the Offer Accept / Reject stage.

### Post Offer Amendment Stage

This topic describes the information on the various data segments to request for amendment of overdraft in the Post Offer Amendment stage.

### Account Approval Stage

This topic describes the information on the various data segments to view the captured details and approve the application in the Account Approval stage

### Manual Retry Stage

This topic describes the information on the various data segments on the Manual Retry stage.

### Account Funding

This topic describes the process of initial funding of an account. This stage appears once the account is opened.

#### Global Actions

This topic provides the detailed on the actions that can be performed in all stages.

# 2.1 Application Entry Stage

This topic describes the information on the various data segments to capture the required data in the Application Entry stage.

Process Orchestrator updates the record in the **Free Task** process for the **Application Entry** stage also referred as Task from orchestrator perspective. The user can **Acquire and Edit** or **Acquire** the task from the **Action** column and the header respectively as per requirement.

The **Application Entry** stage will be automatically submitted, in case the Bank level configuration for allowing full Application submission is set as **Yes** and the user has updated all the data segment of **Application Entry** stage as part of the **Application Initiation** stage itself by clicking on the **Application** button available in the **Product Details** data segment.

After successful submission of **Application Entry** stage, a request for the initial funding transaction is sent to **Teller Module**, if **Fund By** option is selected as **Cash**. The status of the **Teller Transaction** is then validated in the **Initial Funding Details** data segment of **Account Funding** stage.

The **Application Entry** stage has the following reference data segments:

#### Applicant

This topic provides the systematic instructions to capture the customer-related information for the application.

### Account Details

This topic provides the systematic instructions to view and modify the account details.

#### Stake Holder Details

This topic provides the systematic instructions to capture the stake holder details related information for the business.

#### Financial Details

This topic provides the systematic instructions to capture the financial details of a single customer or multiple customers in case of joint applicants.

#### Collateral Details

This topic provides the systematic instructions to capture the collateral which is offered by the customer as security for Overdraft limit.

#### NomineeDetails

This topic provides the systematic instructions to capture the details of the nominee for the account.

#### Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.

### Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

### 2.1.1 Applicant

This topic provides the systematic instructions to capture the customer-related information for the application.

The details captured of the customer in the Application Initiate stage appears in this data segment. The user can update further fields for supplementing the customer related information.

### For Individual Customer Type

The topic describes the process to capture or edit customer information of Individual type of customer.

For Small and Medium Business (SMB) Customer Type

The topic describes the process to capture or edit customer information of Small and Medium Business type of customers.

### 2.1.1.1 For Individual Customer Type

The topic describes the process to capture or edit customer information of Individual type of customer.

### To capture applicants details:

1. In the Saving Application Entry stage, update the customer details in the Applicants data segment based on the respective customer type.

The Applicant - Individual screen displays.

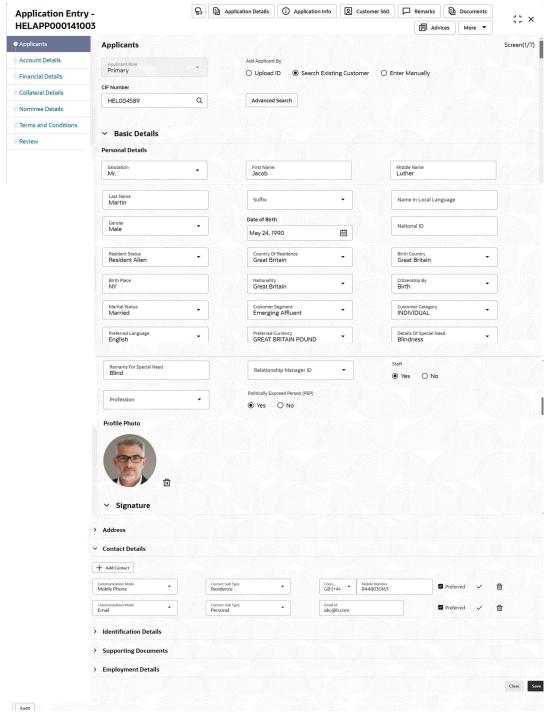

Figure 2-1 Applicant - Individual

2. Specify the relevant details in data fields. The fields which are marked as **Required** are mandatory. For more information on fields, refer to the field description table below:

For more information on the fields, refer to the field description table below:

Table 2-1 Applicant- Individual – Field Description

Field	Description
Applicant Role	Displays the applicant role. By default the Primary role appears in this field.
	Select the applicant role incase user add multiple applicant in single application.
Add Applicant By	Select the mode from which the user need to add new applicant. The available options are:  Upload ID - Using this option user can upload identification document of the applicant to extract the details.  Search Existing Customer - This option is used if the applicant is an existing customer of the bank. On selecting the existing customer, the details appears in the respective sections which are already stored.  Enter Manually - This option is used if user wish to enter all the applicant details manually.
Document Name	Select the document which is used from extracting applicant details. The available options are: State Issued Drivers License Passport This field appears if the Upload ID option is selected from the Add Applicant By drop down list.
Country of Issue	Select the country in which the document is issued. This field appears if the <b>Upload ID</b> option is selected from the <b>Add Applicant By</b> drop down list.
Select and Drop here	Drag and drop the document file or click on <b>Select or drop files</b> here to browse and upload the document from the local system. PNG & JPEG file formats are supported. 10MB maximum file size is allowed. This field appears if the <b>Upload ID</b> option is selected from the <b>Add</b> Applicant By drop down list.
CIF Number	Search and select the CIF number.  This field appears if the <b>Search Existing Customer</b> option is selected from the <b>Add Applicant By</b> drop down list.
Advanced Search	Click this button to perform party search using advance parameters. For more information on advance search, refer the <b>Advanced Search</b> section below.  This field appears if the <b>Search Existing Customer</b> option is selected from the <b>Add Applicant By</b> drop down list.
Basic Details	In this section the user can manually capture the basic details of applicant. This section appears if the <b>Enter Manually</b> option is selected from the <b>Add Applicant By</b> drop down list.
Title	Select the title of the applicant from the drop-down list.
First Name	Specify the first name of the applicant.
Middle Name	Specify the middle name of the applicant.
Last Name	Specify the last name of the applicant.
Suffix	Specify the suffix for the applicant. This options in this list appears based on the configured entity code in the Oracle Banking Party product.
Name In Local Language	Specify the applicant's name in their local language.

Table 2-1 (Cont.) Applicant- Individual – Field Description

Field	Description
Gender	Specify the Gender of the applicant from the drop-down list.
Date of Birth	Select the date of birth of the applicant.
National ID	
	Specify the national identification code of the applicant.
Resident Status	Select the residential status of the applicant from the drop-down list.  Available options are:
	Non-Resident Alien
	Resident Alien     Citizen
Otire of Decidence	0.00
County of Residence	Search and select the country code of which the applicant is a resident.
Birth Country	Specify the birth country of the applicant.
Birth Place	Specify the birth place where the applicant has born.
Nationality	Search and select the country code where the applicant has nationality.
Citizenship By	Search and select the country code for which applicant has citizenship.
Marital Status	Select the marital status of the customer from the drop-down list. Available options are:
	Married
	Unmarried
	Legally Separated
	• Widow
Customer Segment	Select the segment of the customer. Available options are:
	Emerging Affluent
	High Net worth Individuals
	Mass Affluent
	Ultra HNI
Customer Category	Select the category of the customer.
Preferred Language	Select the preferred language.
Preferred Currency	Select the preferred currency.
Details Of Special Need	Select the special need details. Available options are:
	• Blindness
	Cerebral Palsy
	Low vision
	<ul><li>Locomotor disability</li><li>Leprosy-cured</li></ul>
	Mental retardation
	Mental illness
	Hearing Impairment
Remarks For Special Need	Specify the remarks for the special need selected.
Relationship Manager ID	Search and select the Relationship Manager ID for the applicant.
Staff	Select the toggle to indicate if the customer is employee of the bank.
Profession	Select the profession of the customer.
Politically Exposed Person	Select to indicate if the customer are politically exposed person.
I Shilicany Exposed Ferson	ocioci to indicate il the customer are politically exposed person.

Table 2-1 (Cont.) Applicant- Individual – Field Description

Field	Description
Profile Photo	Drag and drop the document file or click on <b>Select or drop files here</b> to browse and upload the document from the local system.  PNG & JPEG file formats are supported.  10MB maximum file size is allowed.
Signatures	In this section you can add new signature and view the already added signature of the customer.  Click the Add Signature button to select the file to upload signature.  Click Cancel button to discard the added details.  On Submit, signature will be handed off to Oracle Banking Party.
Upload Signature	Drag and drop the signature file or click on <b>Select or drop files here</b> to browse and upload the signature from the local system.  PNG & JPEG file formats are supported.  10MB maximum file size is allowed.
Uploaded Signature	Displays the uploaded signature.
Remarks	Specify the remarks related to the signature. Click <b>Save</b> to save the uploaded file.
Signature ID	Displays the Signature ID for the added signature along with the image and remark.
Action	Click Edit to edit the added signatures  Click to delete the added signatures.
Address	This section displays the added address of the applicant. It is mandatory to add communication address of the applicant.  Click the Add Address button to add address details.  Click to perform below actions on the added address details,  To view the address details, click View.  To edit the address details, click Edit.  To delete the address details, click Delete.
Address Type	Select the address type for the applicant from the drop-down list.  Residential Address Communication Address
Location	Select and search the location.
Current Address	Select to indicate if you want to mark entered address as current address type.
Preferred Address	Select to indicate if you want the selected address type as preferred address type.  This field is non editable if the <b>No</b> option is selected in the <b>Current Address</b> field.
Address Since	Select the date from when you are connected with the given address.
Address Till	Select the date till when you were connected with the given address. This field appears if the <b>No</b> option is selected in the <b>Current Address</b> field.

Table 2-1 (Cont.) Applicant- Individual – Field Description

Field	Description
Address	Specify the address to search for the already captured address.
	Based on the configuration, on entering a few letters, the system fetches the related address that is already captured.
	Based on the selection, the fields are fetched in the address section.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.
Country	Select and search the country code.
State / Country Sub Division	Specify the state or country sub division. This field appears based on the selected country code.
Zip Code / Post Code	Specify the zip or post code of the address.
Addition Info	In this section you can provide addition information.
Sub Department	Specify the sub department.
Department	Specify the department.
Building Number	Specify the building number.
Post Box	Specify the post box code.
District Name	Specify the district name.
Floor	Specify the floor number.
Room	Specify the room number.
Locality	Specify the locality.
Landmark	Specify the landmark.
Contact Name / Narrative	Specify the name of the contact person.
<added record="" tile=""></added>	In this tile you can view the added address details.  Below details appears in the tile:  Current status> this flag appears only if Yes option is selected.  Preferred ID status> this flag appears only if Yes option is selected.  Address Type  Address dates  Adress line 1,2,3  Country  State  Click the Edit to edit the added adress details.  Click the View to view the added address details.
Contact Details	In this section you can provide digital contact details.
Communication Mode	Select the communication mode from the drop-down list. The available options are:  Mobile Phone Email
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list.  The drop-down list option consist of countrycode, country name and subscriber dialing code.  This field appears only if you select the <b>Mobile Phone</b> option as communication mode.

Table 2-1 (Cont.) Applicant- Individual – Field Description

Field	Description
Mobile Number	Specify the mobile number.
Email Id	Specify the email ID. This field appears only if you select the <b>Email</b> option as communication mode.
Preferred	Select to indicate if the given record is the preferred one.
Action	You can edit or delete the added mobile details.
Identification Details	You can add, view and edit the identification details in this section.  Click the <b>Add ID</b> button to add Identification details.
ID Type	Specify the ID type. The available options are:  Military ID Birth Certificate SIN Permanent Resident Card () SIN Passport SSN
ID Status	Specify the status of the selected ID type.  The available options are:  Verification Pending  Applied For  Available  Notice Received
Unique ID	Specify the unique identification code of the selected type. You can enter the unique ID only if the <b>ID Status</b> is <b>Available</b> .
Place Of Issue	Specify the place where the ID is issued to the user.
Issue Date	Specify the date from which the ID is valid.
Expiry Date	Specify the date till which the ID is valid.
Preferred	Select to indicate whether added ID details are preferred among all others.  In case of multiple ID details, it is mandatory to mark any one of the ID details as Preferred.
Remark	Specify the remark. Click the <b>Save</b> button to save the entered ID details.

Currency	Select the currency of the selected type. The currencies that are paired with product appears for selection.
Amount	Specify the amount for the selected type.
Amount ( <account Currency&gt;)</account 	Displays the monthly amount of the selected type. The system evaluates and converts the amount which is entered in the <b>Amount</b> field with the <b>Currency</b> which is selected in the <b>Account Details</b> data segment.

Table 2-8 (Cont.) Financial Details: Individual – Field Description

Field	Description
Action	Select the action to perform on added record.  • Figure 2-14 Edit  - Click to edit the record.  • Figure 2-15 Delete
	- Click to delete the record.
Total Asset	Displays the total asset of all the added asset type along with the selected account currency.
Total Liability	Displays the total liability of all the added liability type along with the selected account currency.

Financial Details - for Small and Medium Business customer type

Figure 2-16 Financial Details - SMB

- 3. Click Next. The system validates the date specified in Last Update On with Financial Details Validity Period and, if date specified in Last Update On exceeds the date specified in Financial Details Validity Period at Business Product Preferences configurations, the system displays the following error message:
- 4. Click **Yes** to reatin the existing financial details and proceed with the next data segment.

OR

Click **No** to edit financial details and proceed.

### 2.1.5 Collateral Details

This topic provides the systematic instructions to capture the collateral which is offered by the customer as security for Overdraft limit.

Collateral details will be sent to the host to be made available under local collateral. The relevant service APIs will be made available for both Push and Pull details of collaterals.

Capturing of Collateral details in Oracle Banking Origination is also enabled with an option to onboard collateral using the Oracle Banking Credit Facility Process Management integration services. In such cases, the collateral details will be sent to the Collateral onboarding systems for performing the Valuation, obtaining the Legal opinion and recording the perfection details. These details will be made available on Oracle Banking Origination in the respective Data segments in read only mode.

The user can acquire the application from Free Tasks list.

#### To add collaterals details:

- Click Next in the previous data segment to proceed with next data segment, after successfully capturing the data.
- Click Add Collateral to capture the collateral details.

The Collateral Details screen displays.

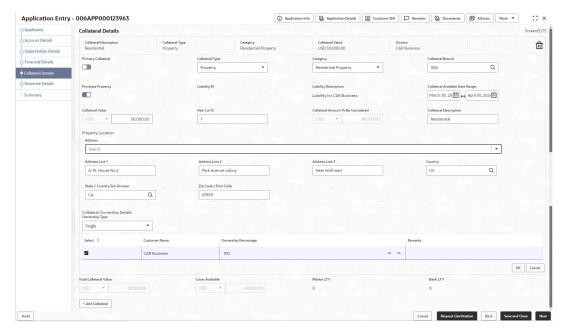

Figure 2-17 Collateral Details

If the **Collateral Type** is selected as **Term Deposit**, the following **warningmessage** displays when the OD Limit expiry date is more than the Maturity Date of the term deposit. The **Warning Message** popup screen displays.

3. Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 2-9 Collateral Details - Field Description

Field	Description
Primary Collateral	Specify the primary collateral.
Collateral Type	Select the collateral type. Available options are:
	<ul> <li>Property</li> <li>Guarantee</li> <li>Vehicle</li> <li>Precious Metal</li> <li>Deposits</li> </ul>
	<ul> <li>Bonds</li> <li>Stocks</li> <li>Insurance</li> <li>Accounts Receivable</li> <li>Inventory (Stock of Material)</li> </ul>
Category	Select the collateral category. Available options are:  If Collateral type is selected as Property  Residential Property  Vacant Land  Under Construction  If Collateral type is selected as Guarantee  Personal Guarantee  Guarantee and Indemnity  Government Guarantee  Family Guarantee  If Collateral type is selected as Vehicle  Passenger Vehicle
	<ul> <li>Commercial Vehicle         If Collateral type is selected as Precious Metal         </li> <li>Precious Metal         If Collateral type is selected as Deposits     </li> <li>Term Deposit         If Collateral type is selected as Bonds         </li> <li>Secured Bonds</li> <li>Unsecured Bonds</li> <li>Investment Bonds</li> <li>If Collateral type is selected as Stocks</li> <li>Domestic Stock</li> </ul>

Remark	Displays the remark of the customer.  The fields appears if you select the <b>Property</b> option from the <b>Collateral Type</b> list.
Market LTV	Displays the market LTV.
Bank LTV	Displays the bank LTV.
Collateral Description	Displays the description of the collateral.
Collateral Type	Displays the collateral type.
Category	Displays the category of the collateral.
Collateral Value	Displays the collateral value.
Owners	Displays the owner names of the collateral.
<actions></actions>	Displays the actions that you can perform on the added collateral.  - Click delete to delete the added collateral.  - Click down arrow to view the collateral details.
Total Collateral Value	Displays the total value of collateral.
	This field will be auto updated based on the number of collaterals.
Cover Available	Displays the cover available.  This field will be auto updated based on the number of collaterals.

All the fields are fetched from Oracle Banking Credit Facilities Process Management in read only mode, if integrated with Oracle Banking Credit Facilities Process Management.

4. Click Next to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The User cannot to proceed to the next data segment, without capturing the mandatory data.

### 2.1.6 NomineeDetails

This topic provides the systematic instructions to capture the details of the nominee for the account.

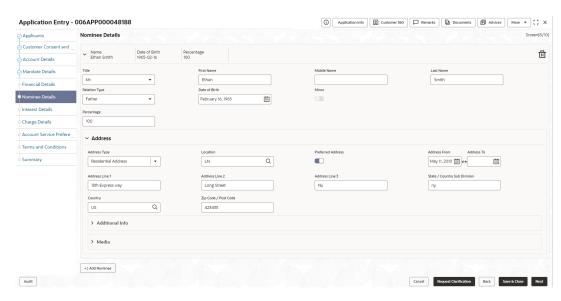

The Nominee Details is a non-mandatory data segment. If required, It allows capturing multiple nominees for the account. Nominee can be a minor, in that case, it is mandatory to provide details of the guardian. For SMB Customer, Nominee Details are allowed only for Proprietary type of Business Accounts.

#### To add nominee details:

 Click Next in from the previous data segment to proceed with the next data segment, after successfully capturing the data.

The Nominee Details screen displays.

Figure 2-18 Nominee Details

2. Specify the fields on **Nominee Details** screen.

Table 2-10 Details - Field Description

Field	Description
Title	Select the title of the applicant.

Table 2-10 (Cont.) Details - Field Description

Field	Description
First Name	Specify the first name of the applicant.
Middle Name	Specify the middle name of the applicant.
Last Name	Specify the last name of the applicant.
Relationship Type	Select the relationship type of the nominee with the applicant.
Date of Birth	Select the applicant's date of birth.
Minor	Select to indicate if nominee is minor.
Add Guardian	Click the Add Guardian link to add the guardian details.
	The link appears if the <b>Minor</b> field is enabled.
	This field is conditional mandatory.
Percentage	Specify the percentage to be considered for distribution of the account balance in case of uneventful death of the applicant.
Address	This section displays the added address of the applicant. It is mandatory to add communication address of the applicant.
	Click to add address details.
	to dad address details.
	Click to perform below actions on the added address details,
	To view the address details, click <b>View</b> .
	To edit the address details, click <b>Edit</b> .
	To delete the address details, click <b>Delete</b> .
Address Type	Select the address type for the applicant from the drop-down list.
	Residential Address
	Communication Address
Location	Select and search the location.
Current Address	Select to indicate if you want to mark entered address as current address type.
Preferred Address	Select to indicate if you want the selected address type as preferred address type.
Address From	Select the date from when you are connected with the given address.
Address To	Select the date till when you were connected with the given address.
Address	Specify the address to search for the already captured address.
	Based on the configuration, on entering a few letters, the system fetches the related address that is already captured.
	Based on the selection, the fields are fetched in the address section.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.
Country	Select and search the country code.
State / Country Sub Division	Specify the state or country sub division. This field appears based on the selected country code.
Zip Code / Post Code	Specify the zip or post code of the address.
Addition Info	In this section you can provide addition information.
Sub Department	Specify the sub department.
Department	Specify the department.
Building Number	Specify the building number.
Post Box	Specify the post box code.

Table 2-10 (Cont.) Details - Field Description

Field	Description
District Name	Specify the district name.
Floor	Specify the floor number.
Room	Specify the room number.
Locality	Specify the locality.
Landmark	Specify the landmark.
Contact Name / Narrative	Specify the name of the contact person.
Contact Details	In this section you can provide digital contact details.
<communication mode=""></communication>	Select the communication mode from the drop-down list. The available options are:
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list.  The drop-down list option consist of countrycode, country name and subscriber dialing code.  This field appears only if you select the <b>Mobile Phone</b> option as communication mode.
Mobile Number	Specify the mobile number.
Preferred	Select to indicate if the given mobile number is the preferred number.
Action	You can edit or delete the added mobile details.
Email Id	Specify the email ID. This field appears only if you select the <b>Email</b> option as communication mode.
Preferred	Select to indicate if the given email ID is the preferred ID.
Action	You can edit or delete the added email details.
Add Nominee	Click to add additional nominee for the account.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

### **Guardian Details**

This screen allows to capture details of the guardian of the minor nominee.

### To add guardian details:

4. Click Add Guardian Details on Nominee Details screen.

The Guardian Details screen is displayed

Figure 2-19 Guardian Details

- Specify the details in the relevant data fields.
  - Refer the **Nominee Details** field description table for detailed information on each field.
- Click Save to save the guardian details

### 2.1.7 Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.

In this data segment user can capture term and conditions consents from the applicants. The customer consents are same across products but few term and conditions defer based on the applied products. They appears in questionnaire format based on the configurations. This questionnaire is mapped at product configuration level. It is mandatory to accept all term and condition to proceed with application.

This data segment comprises of below sections:

- **Term and Conditions for all products** In this section the term and conditions which are applicable for all the products appears in the questionnaire format.
- **Term and Conditions for <Selected Product>** In this section the term and conditions which are applicable for all the selected product appears in the questionnaire format.

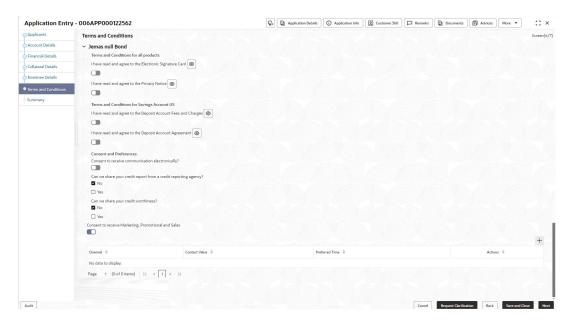

### To capture terms and conditions:

 Click Next from pervious data segment to proceed with the next data segment, after successfully capturing the data.

The **Term and Conditions** screen appears

Figure 2-20 Term and Conditions

- 2. Click to view the term and conditions.
- 3. Select the toggle button to accept the term and conditions.
- 4. In the Consents to receive Marketing Promotional and Sales section, enter the channel and details.
- Click Add Channel to add the relevant details.

The below fields contain channel data:

- Channel
- Contact Value
- Preferred Time
- Time Zone
- Actions
- 6. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

# 2.1.8 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

The Summary displays the tiles for all the data segments in the Application Entry stage. The tiles display the important details captured in the specified data segment.

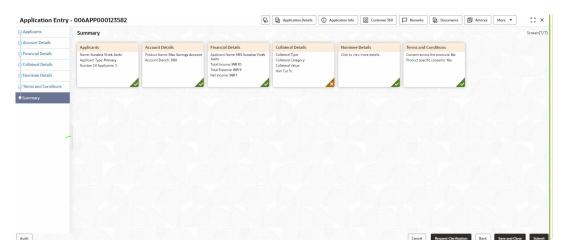

### To view the summary of all data segment

 Click Next in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-21 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on summary tiles, refer to the field description table below.

Table 2-11 Summary - Application Entry - Field Description

Data Segment	Description
Applicants	Displays the applicants details
Account Details	Displays the account details.
Stake Holder Details	Displays the Stake Holder details
	This data segment appears only if the <b>Customer Type</b> is selected as <b>Small and Medium Business (SMB)</b> .
Financial Details	Displays the financial details.
Collateral Details	Displays the collateral details.
Nominee Details	Displays the nominee details.
Term and Conditions	Displays the term and conditions.

- Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage are verified. The Overrides screen is displayed.
- 3. In the Override screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click Accept Overrides& Proceed to proceed.

OR

Click **Proceed**. The Checklist screen appears.

- In the Checklist screen the system displays the error message if document checklist is not verified. Click Proceed Next to proceed. The Outcome screen appears.
- 5. In the Outcome screen, select appropriate option from the Select to Proceed field.
  - Select the Proceed to proceed with the application. By default this option is selected. It
    will logically complete the Application Entry stage for the saving application. The
    Workflow Orchestrator will automatically move this application to the next processing
    stage, SavingApplication Enrichment. The stage movement is driven by the

business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- Select the Reject by Bank to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- Click Submit to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers [Saving Account] to the Application Enrichment stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

### **Application De-Dupe:**

Based on the configuration available at the Bank level / Properties Table, the Dedupe service call can be enabled or disabled for the product Origination.

If application dedupe service is enabled, System will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

### Note:

- If an application is returned to the Application Entry-stage from any other subsequent stages, Oracle Banking Origination will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case the party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting the Application Entry stage. The user has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.
- Unique process reference numbers will be generated and made available in the Free Task grid for the respective Customer Onboarding, Collateral Onboarding requests, which need to picked up by the concerned users in the Oracle Banking Party / Oracle Banking Credit Facilities Process Management modules.

# 2.2 Overdraft Limit Details Stage

This topic describes the information on the various data segments to capture the required data for the Overdraft Limit Details stage.

Users having functional access to the Overdraft Limit Details stage will be able to view the record in the Free Task process.

This stage is not applicable for **SMB Customers**.

The **Overdraft Limit Details** stage has the following reference data segments:

#### Account Limit Details

This topic provides the systematic instructions to update the overdraft limit requested by the customer.

### Collateral Details

This topic provides the systematic instructions to capture the collateral which is offered by the customer as security for Overdraft limit.

### Temporary Overdraft Limit

This topic provides the systematic instructions to view the configuration required for temporary overdraft limit to be provided to the account.

### Advance against Uncollected Funds

This topic provides the systematic instructions to view the configuration required for advance against uncollected fund to be provided to the account.

### Summary - Overdraft Limit Details

This topic provides the systematic instruction to view the tiles for all the data segments in the Overdraft Limit Details stage.

### 2.2.1 Account Limit Details

This topic provides the systematic instructions to update the overdraft limit requested by the customer.

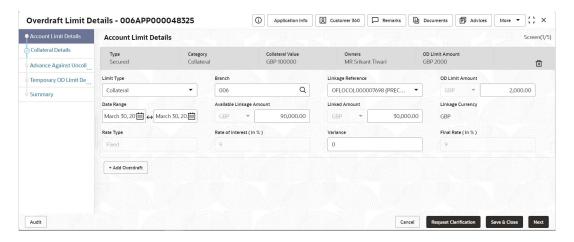

The Account Limit Details allows to update the overdraft limit requested by the customer.

#### To add account limit details:

 On acquiring the Overdraft Limit Details task, the Account Limit Details data segment appears.

The **Account Limit Details** screen displays.

Figure 2-22 Account Limit Details

- 2. Click Add Overdraft to capture the overdraft limits.
- **3.** Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 2-12 Account Limit Details – Field Description

Field	Description
Limit Type	Select the limit type from the drop-down list.
	Note:  System defaults the same limit type for the subsequent overdraft details added.
Branch	Specify the branch code where the account limit is configured.
Linkage Reference	Select the linkage reference number from the dropdown list.
OD Limit Amount	Select the currency and specify the overdraft limit amount for the account.
Date Range	Select the date range within when the account limit is valid.
Available Linkage Amount	Specify the available linkage amount of the collateral.
Linked Amount	Select the currency and specify the linked amount.
Linkage Currency	Displays the linkage currency.
Rate Type	Displays the rate type as per the limit type is selected. The available options are: Fixed Floating
Rate Code	Displays the rate code.
	Note:  This field displays if the Rate Type is selected as Floating.
Base Rate	Displays the base rate.
	Note:  This field displays if the Rate Type is selected as Floating.

Table 2-12 (Cont.) Account Limit Details – Field Description

Field	Description
Rate of Interest	Displays the rate of interest.
	Note:  This field displays if the Rate Type is selected as Fixed.
Variance	Specify the variance.
	Note:  This field displays if the Rate Type is selected as Fixed.
Margin	Specify the margin.
	Note:  This field displays if the Rate Type is selected as Floating.
Final Rate	Displays the effective rate calculated and based on the below parameters:  Rate Value and the Margin for floating rate type.  Rate of Interest and the Variance for fixed rate type.

Click Add Overdraft to capture the multiple overdraft limits.

OR

Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

### 2.2.2 Collateral Details

This topic provides the systematic instructions to capture the collateral which is offered by the customer as security for Overdraft limit.

Collateral details will be sent to the host to be made available under local collateral. The relevant service APIs will be made available for both Push and Pull details of collaterals.

Capturing of Collateral details in Oracle Banking Origination is also enabled with an option to onboard collateral using the Oracle Banking Credit Facility Process Management integration services. In such cases, the collateral details will be sent to the Collateral onboarding systems for performing the Valuation, obtaining the Legal opinion and recording the perfection details. These details will be made available on Oracle Banking Origination in the respective Data segments in read only mode.

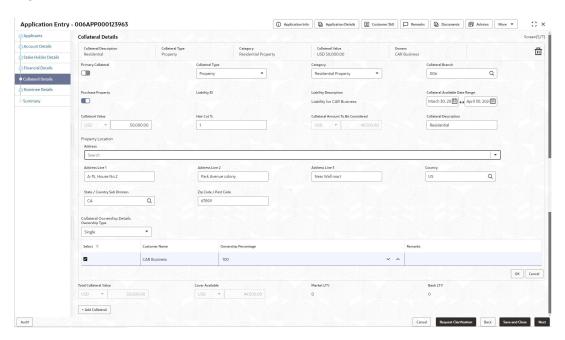

The user can acquire the application from Free Tasks list.

### To add collaterals details:

- Click Next in the previous data segment to proceed with next data segment, after successfully capturing the data.
- 2. Click Add Collateral to capture the collateral details.

The Collateral Details screen displays.

Figure 2-23 Collateral Details

If the **Collateral Type** is selected as **Term Deposit**, the following **warningmessage** displays when the OD Limit expiry date is more than the Maturity Date of the term deposit. The **Warning Message** popup screen displays.

Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

All the fields are fetched from Oracle Banking Credit Facilities Process Management in read only mode, if integrated with Oracle Banking Credit Facilities Process Management.

4. Click Next to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The User cannot to proceed to the next data segment, without capturing the mandatory data.

# 2.2.3 Temporary Overdraft Limit

This topic provides the systematic instructions to view the configuration required for temporary overdraft limit to be provided to the account.

The Temporary Overdraft Limit data segment displays the configuration required for temporary overdraft limit to be provided to the account.

### To add temporary overdraft limit:

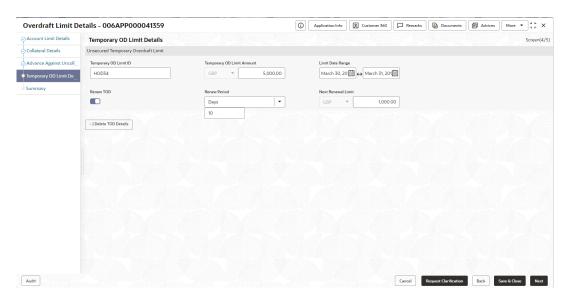

- Click Next in the previous data segment to proceed with next data segment, after successfully capturing the data.
- Click Add TOD Details to capture the Temporary Overdraft Limit Details.

The Unsecured Temporary Overdraft Limit Details screen displays.

User can move to the next data segment without capturing the Temporary Overdraft Limit Details.

Figure 2-24 Unsecured Temporary Overdraft Limit Details

Note:

The user can move to the next data segment without capturing the Temporary Overdraft Limit Details.

3. Specify the details in the relevant data fields.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-14 Temporary Overdraft Limit – Field Description

Field	Description
Temporary OD Limit ID	Specify the temporary overdraft limit ID.
Temporary Overdraft Limit Amount	Select the currency and specify the temporary overdraft limit amount.
Limit Start Date	Select the limit start date.
Limit End Date	Select the limit expiry date.
Renew TOD	Select to indicate if temporary overdraft limit is to be renewed.
Renew Period	In case of TOD renewal is allowed, select the period from the drop- down list. Available options are:
	• Days
	Months
	Year
Next Renewal Amount	In case of TOD renewal is allowed, specify the renewal amount.

4. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

# 2.2.4 Advance against Uncollected Funds

This topic provides the systematic instructions to view the configuration required for advance against uncollected fund to be provided to the account.

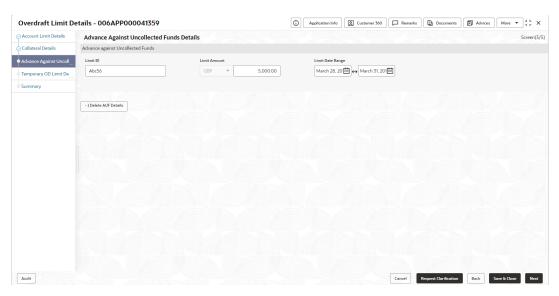

The Advance against Uncollected Funds data segment displays the configuration required for advance against uncollected fund to be provided to the account.

### To add uncollected funds details:

- Click Next in the previous data segment to proceed with next data segment, after successfully capturing the data
- 2. Click Add AUF Details to capture the Advance Against Uncollected Funds.

The Advance against Uncollected Funds screen displays.

Figure 2-25 Advance against Uncollected Funds

3. Specify the details in the relevant data fields.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-15 Advance against Uncollected Funds – Field Description

Field	Description
Limit ID	Specify the advance against uncollected funds limit ID.
Limit Amount	Select the currency and specify the AUF limit amount.
Limit Date Range	Select the limit date range.

4. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

## 2.2.5 Summary - Overdraft Limit Details

This topic provides the systematic instruction to view the tiles for all the data segments in the Overdraft Limit Details stage.

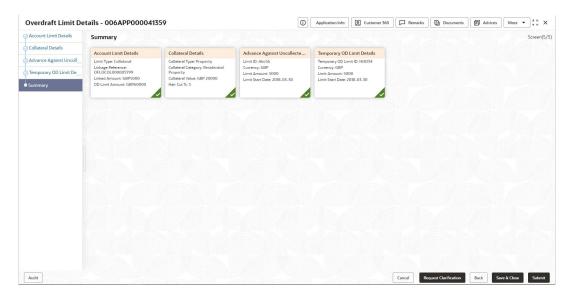

The Summary displays the tiles for all the data segments in the Overdraft Limit stage. The tiles display the important details captured in the specified data segment.

### To view the summary of the stage:

 Click Next in the previous data segment screen to proceed with next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-26 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-16 Summary - Overdraft Limit Details - Field Description

Data Segment	Description
Account Limit Details	Displays the account limit details.
Collateral Details	Displays the collateral details.
Temporary Overdraft Limit	Displays the temporary overdraft limit.
Advance against Uncollected Funds	Displays the advance against uncollected funds.

Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified. The Overrides screen is displayed.

Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. Click **Proceed Next**. The **Checklist** screen is displayed.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

- Click Save & Proceed. The Outcome screen is displayed.
- 5. In the **Outcome** screen, select appropriate option from the **Select to Proceed** field.
  - Select the Proceed to proceed with the application. By default this option is selected. It
    will logically complete the Overdraft Limit Details stage for the loan application. The
    Workflow Orchestrator will automatically move this application to the next processing
    stage, Application Enrichment. The stage movement is driven by the business
    configuration for a given combination of Process Code, Life Cycle and Business
    Product Code.

- Select the Return to Application Entry to return to application entry stage. The
  system generates the Application Entry task that appears in Free Task to acquire and
  edit.
- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- Click Submit to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers to the Application Enrichment stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

If the **Collateral Type** is selected as **Term Deposit** in **Collateral Details** data segment and the **Fund the account** toggle is OFF in the **Product Details** data segment, the submit of the Application Enrichment stage will move the application into the **Account Parameter Setup** stage

If the selected **Collateral Type** is other than Term Deposit in **Collateral Details** data segment, and the **Fund the account** toggle is OFF in the **Product Details** data segment, the submit of the Application Enrichment stage will move the application into the **Underwriting** stage.

If the **Fund the Account** toggle is ON in the **Product Details** data segment, the submit of the Application Enrichment stage, will move the application to **Account Funding** stage.

# 2.3 Application Enrichment Stage

This topic describes the information on the various data segments to view and update the required data for the Application Enrichment stage.

Users having functional access to the Application Enrichment stage will be able to view the record in the Free Task process.

### To enrich an application:

- 1. Scan the records that appears in the Free Task list.
- 2. Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Application Enrichment stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

Interest Details

This topic provides the systematic instructions to view the interest applicable for the account.

Advance against Uncollected Funds

This topic provides the systematic instructions to view the configuration required for advance against uncollected fund to be provided to the account.

Temporary Overdraft Limit

This topic provides the systematic instructions to view the configuration required for temporary overdraft limit to be provided to the account.

#### Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Application Enrichment stage.

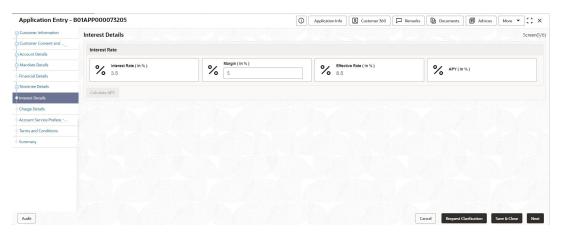

### 2.3.1 Interest Details

This topic provides the systematic instructions to view the interest applicable for the account.

The Interest Details data segment displays the interest applicable for the account.

On acquiring the Application Enrichment task, the Interest Details data segment appears.
 The Interest Details screen displays.

Figure 2-27 Interest Details

2. Specify the details in the relevant data fields.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-17 Interest Details - Field Description

Field	Description
Interest Product Name	Displays the interest product name attached to the host product linked with the business product.
Payout Frequency	Displays the payout frequency of the interest product name attached to the host product linked with the business product.
Interest Rate	Displays the interest rate applicable for the account.
Margin (%)	Select the margin in percentage.
Final Rate	Displays the final rate calculated based on the <b>Interest Rate</b> and the <b>Margin</b> specified.

Table 2-17 (Cont.) Interest Details - Field Description

Field	Description
APY (in %)	Displays the annual percentage yield value in percentage. Below is the formula to calculate the APY,
	Annual Percentage Yield = (1 + Interest Rate ÷ The number of Compounding in a year) ^ (Number of compounding in a year) – 1
	This is applicable for the Credit Interest
APR	Display the annual percentage rate value.
	This is applicable for debit interest.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

## 2.3.2 Advance against Uncollected Funds

This topic provides the systematic instructions to view the configuration required for advance against uncollected fund to be provided to the account.

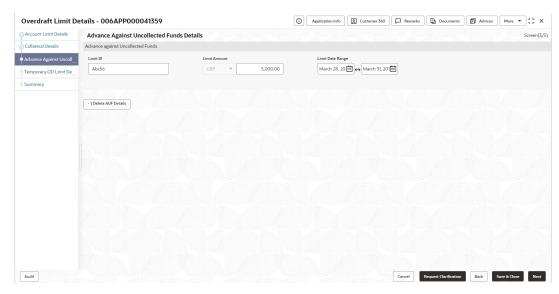

The Advance against Uncollected Funds data segment displays the configuration required for advance against uncollected fund to be provided to the account.

#### To add uncollected funds details:

- Click Next in the previous data segment to proceed with next data segment, after successfully capturing the data
- Click Add AUF Details to capture the Advance Against Uncollected Funds.

The Advance against Uncollected Funds screen displays.

Figure 2-28 Advance against Uncollected Funds

3. Specify the details in the relevant data fields.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-18 Advance against Uncollected Funds – Field Description

Field	Description
Limit ID	Specify the advance against uncollected funds limit ID.
Limit Amount	Select the currency and specify the AUF limit amount.
Limit Date Range	Select the limit date range.

4. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

## 2.3.3 Temporary Overdraft Limit

This topic provides the systematic instructions to view the configuration required for temporary overdraft limit to be provided to the account.

The Temporary Overdraft Limit data segment displays the configuration required for temporary overdraft limit to be provided to the account.

### To add temporary overdraft limit:

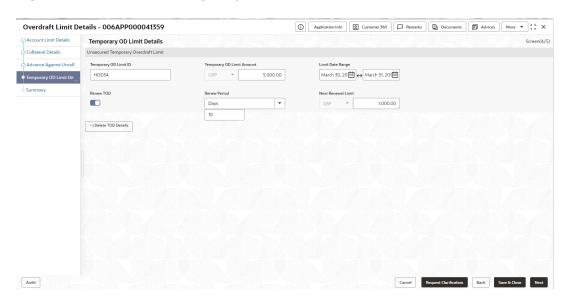

- Click Next in the previous data segment to proceed with next data segment, after successfully capturing the data.
- 2. Click **Add TOD Details** to capture the Temporary Overdraft Limit Details.

The Unsecured Temporary Overdraft Limit Details screen displays.

User can move to the next data segment without capturing the Temporary Overdraft Limit Details.

Figure 2-29 Unsecured Temporary Overdraft Limit Details

Note:

The user can move to the next data segment without capturing the Temporary Overdraft Limit Details.

3. Specify the details in the relevant data fields.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-19 Temporary Overdraft Limit – Field Description

Field	Description
Temporary OD Limit ID	Specify the temporary overdraft limit ID.
Temporary Overdraft Limit Amount	Select the currency and specify the temporary overdraft limit amount.
Limit Start Date	Select the limit start date.
Limit End Date	Select the limit expiry date.
Renew TOD	Select to indicate if temporary overdraft limit is to be renewed.
Renew Period	In case of TOD renewal is allowed, select the period from the drop- down list. Available options are:
	• Days
	Months
	Year
Next Renewal Amount	In case of TOD renewal is allowed, specify the renewal amount.

4. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

## 2.3.4 Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Application Enrichment stage.

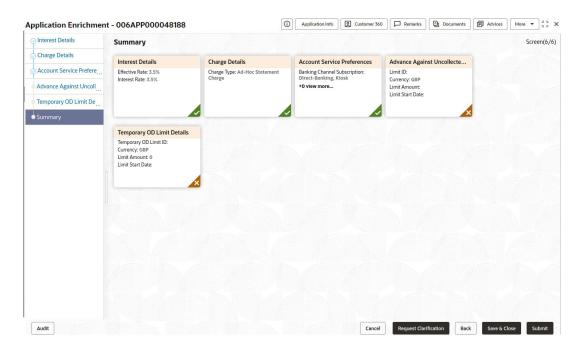

The Summary displays the tiles for all the data segments in the Application Enrichment stage. The tiles display the important details captured in the specified data segment.

### To view the summary of all data segment:

 Click Next in the previous data segment to proceed with the next data segment, after successfully capturing the data..

The Summary screen displays.

Figure 2-30 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 2-20 Summary – Field Description

Data Segment	Description
Account Details	Displays the account details.
Customer Information	Displays the customer information details

Data Segment	Description
Customer Consents and Preference	Displays the customer consents and preferences.
Relationship	Displays the relationships.
Stake Holder Details	Displays the Stake Holder details
	This data segment appears only if the <b>Customer Type</b> is selected as <b>Small and Medium Business (SMB)</b> .
Mandate Details	Displays the mandate details.
Financial Details	Displays the financial details.

Table 2-20 (Cont.) Summary - Field Description

Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage are verified. The Overrides screen is displayed.

Displays the term and conditions.

Displays the collateral details.

Displays the nominee details.

3. In the Override screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click Accept Overrides& Proceed to proceed.

OR

Collateral Details

**Nominee Details** 

**Term and Conditions** 

Click Proceed. The Checklist screen appears

- 4. In the Checklist screen the system displays the error message if document checklist is not verified. Click Proceed Next to proceed. The Outcome screen appears.
- 5. In the Outcome screen, select appropriate option from the Select to Proceed field.
  - Select the Proceed to proceed with the application. By default this option is selected. It
    will logically complete the Application Entry stage for the saving application. The
    Workflow Orchestrator will automatically move this application to the next processing
    stage, SavingApplication Enrichment. The stage movement is driven by the
    business configuration for a given combination of Process Code, Life Cycle and
    Business Product Code.
  - Select the Reject by Bank to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- Click Submit to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers [Saving Account] to the Application Enrichment stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

### **Application De-Dupe:**

Based on the configuration available at the Bank level / Properties Table, the Dedupe service call can be enabled or disabled for the product Origination.

If application dedupe service is enabled, System will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

### Note:

- If an application is returned to the Application Entry-stage from any other subsequent stages, Oracle Banking Origination will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case the party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting the Application Entry stage. The user has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.
- Unique process reference numbers will be generated and made available in the Free Task grid for the respective Customer Onboarding, Collateral Onboarding requests, which need to picked up by the concerned users in the Oracle Banking Party / Oracle Banking Credit Facilities Process Management modules.

# 2.4 Account Funding Stage

This topic describes the process of initial funding of an account. In this stage user can provide initial funding details before opening an account.

In this stage user can provide initial funding details before opening an account.

This stage appears only if the **Fund Post Account Opening** toggle is not selected in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

#### To add funding details:

- 1. Scan the records that appears in the Free Task list.
- 2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Account Funding** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

#### Initial Funding Details

This topic provides the systematic instructions to view and modify the initial funding details captured in the **Application Entry** stage.

#### Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Account Funding stage.

# 2.4.1 Initial Funding Details

This topic provides the systematic instructions to view and modify the initial funding details captured in the **Application Entry** stage.

The Initial Funding Details data segment displays the Initial Funding details captured in the Application Entry stage. The **Transaction Reference Number** and the **Transaction Status** is either auto-populated or has to be manually captured based on the configuration. Automatic option is supported only for the Initial Funding with Cash mode. Manual process is supported for Account Transfer, Other Bank Check, and Cash mode of initial funding.

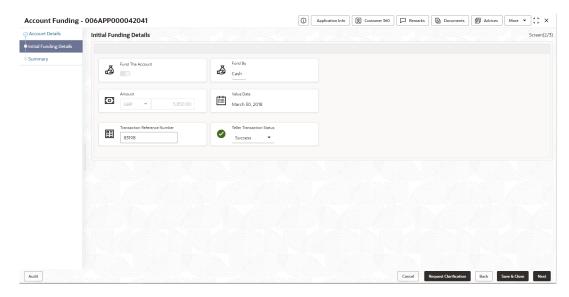

For more details on the Modes and the Manual/Automatic Process configuration, refer to the **Configurations User Guide**.

#### To add initial funding details:

 On acquiring the Account Funding task, the Initial Funding Details data segment appears.

The Initial Funding Details screen displays.

Figure 2-31 Initial Funding Details

Specify the fields on Initial Funding Details screen.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-21 Initial Funding Details – Field Description

Field	Description
Fund the Account	Displays the Fund the Account selected in the Account Details Data Segment in Application Entry stage.
Fund By	Displays the Fund by option selected in the Account Details Data Segment in Application Entry stage.
Amount	Displays the amount of the initial funding updated in the Account Details data segment in Application Entry stage.
Value Date	Displays the value date of the initial funding updated in the Account Details data segment in Application Entry stage.
Account Number	Displays the account number for the initial funding transaction which was selected in the <b>Account Details</b> data segment of the <b>Application Entry</b> stage  This field appears only if the <b>Fund By</b> is selected as <b>Account Transfer</b> .
Account Name	Displays the account name for the selected account number.  This field appears only if the <b>Fund By</b> is selected as <b>Account Transfer</b>
Check Number	
Check Date	Display the Check number.  Displays the Check date.
Bank Name	Displays the bank name.
Bulk Nume	This field is applicable only if the <b>Fund By</b> is selected as <b>Other Bank Check</b> .
Branch Name	Displays the Branch name.
	This field is applicable only if the <b>Fund By</b> is selected as <b>Other Bank Check</b> .
Check Routing Number	Displays the Check routing number.
	This field is applicable only if the <b>Fund By</b> is selected as <b>Other Bank Check</b> .
GL Account Number	Displays the GL account number for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.
GL Account Description	Displays the GL account description for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.
Transaction Reference Number	Displays the transaction reference number for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.
Teller Transaction Status	Select the status of the transaction if the Fund By option is selected as Cash.  The available options are:  In Progress  Pending  Success  Displays the status of the transaction if the Fund By option is selected other than Cash.  The status of the teller transaction should be Success for the submission of the Account Funding stage.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are

not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

## 2.4.2 Summary

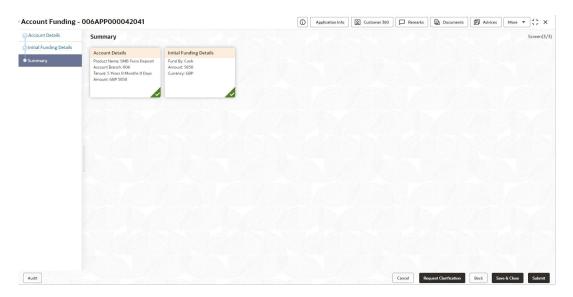

This topic provides the systematic instructions to view the tiles for all the data segments in the Account Funding stage.

The Summary displays the tiles for all the data segments in the Account Funding stage. The tiles display the important details captured in the specified data segment.

1. Click **Next** in **Initial Funding Details** screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-32 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 2-22 Summary - Account Funding - Field Description

Data Segment	Description
Account Details	Displays the account details.
Initial Funding Details	Displays the initial funding details.

Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified. The Overrides screen is displayed.

Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, the user can go back and correct the data to make ensure overrides do not arise.

3. Click **Proceed Next**. The **Checklist** screen is displayed.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

- Select the checkbox to accept the checklist. Click Save & Proceed. The Outcome screen is displayed.
- 5. In the Outcome screen, select appropriate option from the Select to Proceed field.
  - Select the Proceed to proceed with the application. By default this option is selected. It
    will logically complete the Account Funding Stage for the loan application. The
    Workflow Orchestrator will automatically move this application to the next processing
    stage, Underwriting. The stage movement is driven by the business configuration for
    a given combination of Process Code, Life Cycle and Business Product Code.
  - Select the Return to Overdraft Limit Details to return to overdraft limit details stage, the system generate the Overdraft Limit Details stage that appears in Free Task to acquire and edit.
  - Select the Return to Application Entry to return to application entry stage. The
    system generates the Application Entry task that appears in Free Task to acquire and
    edit.
  - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- Click Submit. The Confirmation screen is displayed.

On successful submission the above pop-up appears and displays the next stage in which the application has moved. Application Reference Number and the Process Reference Number is also displayed.

Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Saving Account] to the Underwriting on Host stage. This application is available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application. The following notification will be sent to the user, if application is initiated from assisted channel, and to the Oracle Banking Digital Experience customer, if application is initiated from self-service.

# 2.5 Underwriting Stage

This topic describes the information on the various data segments to access the credit rating and capture the required data for the Underwriting stage.

The underwriting process of the lender bank is set to determine if the overdraft application is an acceptable risk. It is a process to assess the borrower's ability to repay the overdraft based on an analysis of their credit, financial capacity, and collateral provided by the borrower.

The Underwriting stage is the next representative stage in the Saving Account Open process. After the Application Enrichment / Account Funding stage is completed successfully, the application can be acquired by the user who has the access rights for the given stage and progress with the data capture.

#### To add underwriting details:

- Scan the records that appears in the Free Task list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Underwriting stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

#### · Credit Rating Details

This topic provides the systematic instructions to view the information on the External Rating Agencies Rating / Scores for the Applicant.

#### Valuation Details

This topic provides the systematic instructions to capture the information on the asset valuation done by the bank approved valuator.

#### Legal Opinion

This topic provides the systematic instructions to capture the legal opinion provided by the bank approved lawyer and decision provided thereon.

#### Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

# 2.5.1 Credit Rating Details

This topic provides the systematic instructions to view the information on the External Rating Agencies Rating / Scores for the Applicant.

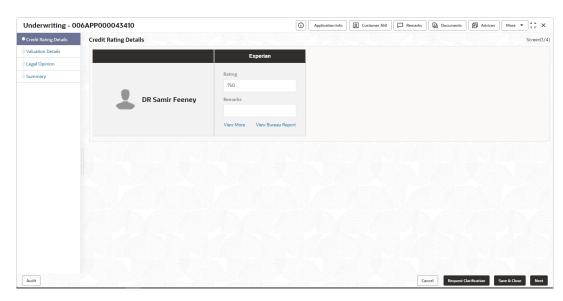

Credit Rating Details is the first data segment of **Underwriting** stage. The user can acquire the application from Free Tasks list. If the applicants are more than one, accordingly the information against each applicant / borrower will be provided. The interface with external rating agencies will be provided.

Oracle Banking Origination is integrated with Bureau Integration Service to fetch the details of the Rating for the given applicant(s). The Bank will have an option to use this integration service or use the manual process of entering the Bureau score in the Credit Rating DS.

1. Click **Acquire and Edit** in the **Free Tasks** for the application for which Underwriting stage has to be acted upon.

The Credit Rating Details screen displays.

Figure 2-33 Credit Rating Details

2. Specify the fields on **Credit Rating Details** screen.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

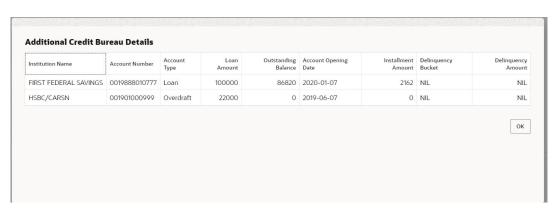

Table 2-23 Credit Rating Details – Field Description

Field	Description
Customer Name	Displays the customer name.
Agency Name	Displays the configured agency.
Ratings	Displays the ratings. The system populates the credit rating score from the Bureau Integration Service.
Remarks	Specify the remarks.

3. Click View More to view the additional Credit Bureau details.

The Additional Credit Bureau Details screen displays.

Figure 2-34 Additional Credit Bureau Details

For more information on fields, refer to the field description table.

Table 2-24 Additional Credit Bureau Details - Field Description

Field	Description
Institution Name	Displays the institution name.
Account Number	Displays the account number of the applicant.
Account Type	Displays the account type.
Loan Amount	Displays the overdraft amount.
Outstanding Balance	Displays the outstanding balance.
Account Opening Date	Displays the account opening date.
Installment Amount	Displays the installment amount.

Table 2-24 (Cont.) Additional Credit Bureau Details – Field Description

Field	Description
Delinquency Bucket	Displays the delinquency bucket.
Delinquency Amount	Displays the delinquency amount.

Oracle Banking Origination has been integrated with Bureau Integration Service which will make a call to the Credit Bureau to get Credit Rating Score and additional details.

Click View Bureau Report to view and download the bureau report from the external agency.

## 2.5.2 Valuation Details

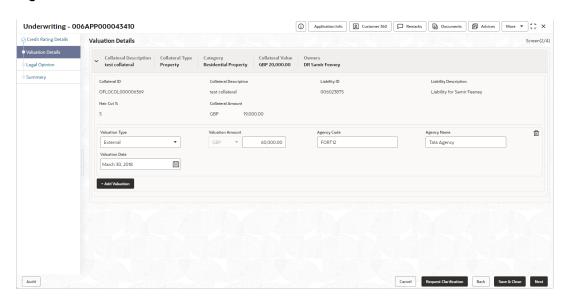

This topic provides the systematic instructions to capture the information on the asset valuation done by the bank approved valuator.

Valuation Details is the next data segment of **Underwriting** stage. This segment enables the user to capture the information on the asset valuation done by the bank approved valuator.

 Click Next in the Credit Rating Details screen to proceed with the next data segment, after successfully capturing the data.

The Valuation Details screen displays.

Figure 2-35 Valuation Details

Specify the fields on Valuation Details screen.

The fields, which mentioned as Required, are mandatory.

If Oracle Banking Origination is integrated with Oracle Banking Credit Facilities Process Management, the valuation details will be fetched from integration service and the values will be displayed in the respective fields as read only data. In the absence of Oracle Banking Credit Facilities Process Management integration, the user has to capture the valuation details manually in this data segment.

For more information on fields, refer to the field description table.

Table 2-25 Valuation Details – Field Description

Field	Description
Collateral Description	Displays the collateral description which is added.
Collateral Type	Displays the collateral type which is added.
Category	Displays the category of the collateral which is added.
Collateral Value	Displays the value of the collateral which is added.
Owners	Displays the owner's name of the collateral.
Collateral ID	Displays the Collateral ID.
Collateral Description	Displays the description of the collateral.
Liability ID	Displays the Liability ID
Liability Description	Displays the Liability description.
Hair Cut %	Displays the Hair cut percentage.
Collateral Amount	Displays the collateral amount.
Valuation Type	Select the type of valuation. Available options are
	External
	Internal
Valuation Amount	Specify the valuation amount of the collateral.
Agency Code	Specify the agency code.
Agency Name	Specify the name of agency.
Valuation Date	Select the valuation date. Date should not be earlier than the Application Date.
Add Valuation	Click <b>Add Valuation</b> to add valuation details. Add the valuation details if you want to evaluate the collateral.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

All the fields will be fetched from Oracle Banking Credit Facilities Process Management in read only mode if integrated with Oracle Banking Credit Facilities Process Management.

# 2.5.3 Legal Opinion

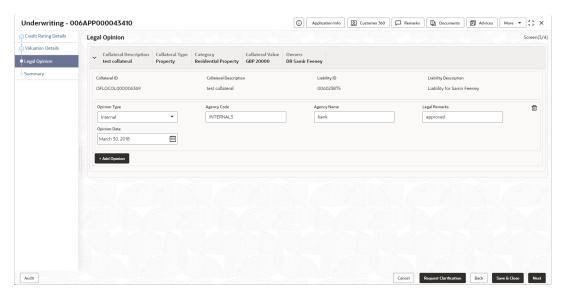

This topic provides the systematic instructions to capture the legal opinion provided by the bank approved lawyer and decision provided thereon.

Legal Opinion is the next data segment of **Underwriting** stage. This segment allows the user to capture the legal opinion provided by the bank approved lawyer and decision provided thereon.

 Click Next from the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Legal Opinion** screen displays.

Figure 2-36 Legal Opinion

2. Specify the fields on Legal Opinion screen.

The fields, which mentioned as Required, are mandatory.

If Oracle Banking Origination is integrated with Oracle Banking Credit Facilities Process Management, the Legal Opinion details will be fetched from integration service and the values will be displayed in the respective fields as read only data. In the absence of Oracle Banking Credit Facilities Process Management integration, the user has to capture the Legal Opinion details manually in this data segment.

For more information on fields, refer to the field description table.

Table 2-26 Legal Opinion - Field Description

Field	Description
Collateral Description	Displays the collateral description which is added.
Collateral Type	Displays the collateral type which is added.
Category	Displays the category of the collateral which is added.
Collateral Value	Displays the value of the collateral which is added.
Owners	Displays the owner's name of the collateral.
Collateral ID	Displays the Collateral ID.
Collateral Description	Displays the description of the collateral.
Liability ID	Displays the Liability ID
Liability Description	Displays the Liability description.
Opinion Type	Select the opinion type. Available options are:
	External
	• Internal
Agency Code	Specify the agency code.
Agency Name	Specify the agency name.

Table 2-26 (Cont.) Legal Opinion – Field Description

Field	Description
Legal Remarks	Specify the legal remarks.
Opinion Date	Select the opinion date. Date should not be earlier than the Collateral Valuation Date.
Add Opinion	Click Add Opinion to add the legal opinion received from multiple agencies (both internal and external).

### Note:

All the fields will be fetched from Oracle Banking Credit Facilities Process Management in read only mode if integrated with Oracle Banking Credit Facilities Process Management.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

All the fields will be fetched from Oracle Banking Credit Facilities Process Management in read only mode if integrated with Oracle Banking Credit Facilities Process Management.

## 2.5.4 Summary

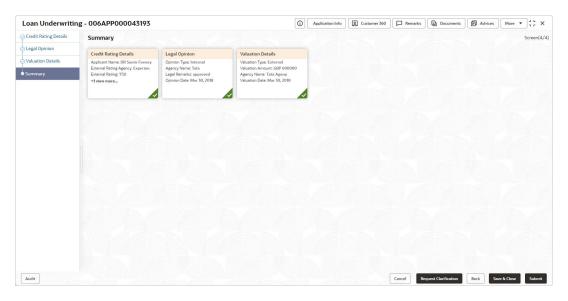

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-37 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-27 Summary - Underwriting - Field Description

Data Segment	Description
Credit Rating Details	Displays the credit rating details.
Valuation Details	Displays the valuation details.
Legal Opinion	Displays the legal opinion details.

- Click Submit to reach the OUTCOME, where the overrides, checklist and the documents for this stage can be validated or verified. The Overrides screen is displayed.
- 3. Click Accept Overrides & Proceed. The Checklist screen is displayed.
- 4. Click **Save&Proceed**. The **Outcome** screen is displayed.

The **Select an Outcome** has following options for this stage:

- Select **Proceed** outcome from the drop-down list. It will logically complete the Underwriting stage for the Application. The Workflow Orchestrator will automatically move this application to the next processing stage, Application Assessment. The stage movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code
- Select the Return to Initial Funding Stage to make Account Funding Stage available in free task for edit.
- Select the Return to Overdraft Limit Details to make Overdraft Limit Details stage available in free task.
- Select the Return to Application Entry Stage to make application entry stage available in free task for edit.
- Select the **Reject by bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- Click Submit to submit the Underwriting stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Saving Account] to the Underwriting on Host stage. This application is available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application. The following notification will be sent to the user, if application is initiated from assisted channel, and to the Oracle Banking Digital Experience customer, if application is initiated from self-service.

# 2.6 Application Assessment

This topic describes the information on the various data segments to update the required data and assess the application in the Application Assessment stage.

Users having functional access to the Application Enrichment stage will be able to view the record in the Free Task process.

The Assessment stage enables the bank to assess the Overdraft Limit request of the customer and based on the Assessment Score the User can decide on granting the Overdraft Limit for the Saving Account being originated. System derives the recommendation based on the total weightage score. The total weightage score is calculated based on the parameters configured in the Scorecard Model.

Similarly, the Qualitative Score is calculated based on the answers provided to the questionnaire configured in the Qualitative Scorecard ID.

#### To assess the saving application:

- Scan the records that appears in the Free Task list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Application Assessment stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

#### Qualitative Scorecard

This topic provides the systematic instructions to capture the relevant evaluation details Applicant wise (if more than one applicant) and the scores are automatically displayed based on the Question / Answer configuration provided for this type of score card.

#### Assessment Details

This topic provides the systematic instructions to view the total weightage score of the Applicant or Applicants, in case of multiple Applicants in the Saving Account with Overdraft.

### Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Application Assessment stage.

# 2.6.1 Qualitative Scorecard

This topic provides the systematic instructions to capture the relevant evaluation details Applicant wise (if more than one applicant) and the scores are automatically displayed based on the Question / Answer configuration provided for this type of score card.

The **Qualitative Scorecard** screen enables the user to capture the relevant evaluation details Applicant wise (if more than one applicant) and the scores are automatically displayed based on the Question / Answer configuration provided for this type of score card.

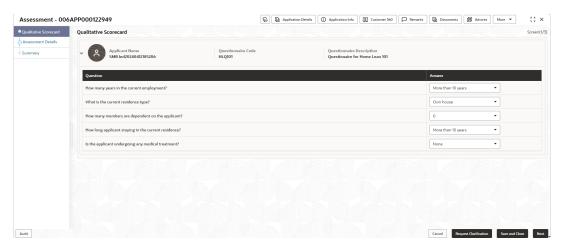

The relevant qualitative score card ID is attached to the Savings Account Business Product and thereby the Saving Account inherits the score card attributes for evaluation.

1. On acquiring the **Assessment** task from the Free Task, the **Qualitative Scorecard** screen appears.

The Qualitative Scorecard screen displays.

Figure 2-38 Qualitative Scorecard

2. Specify the fields on **Qualitative Scorecard** screen.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-28 Qualitative Scorecard - Field Description

Field	Description
Applicant Name	Displays the name of the applicant.
Questionnaire Code	Displays the Questionnaire code.
Questionnaire Description	Displays the description of the Questionnaire code.
Question	Displays the question configured for the Questionnaire code.
Answer	Select the answer from the drop-down values available. The answers are populated based on the Answers configured in the Questionnaire code.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

# 2.6.2 Assessment Details

This topic provides the systematic instructions to view the total weightage score of the Applicant or Applicants, in case of multiple Applicants in the Saving Account with Overdraft.

The **Assessment Details** Data Segment displays the total weightage score of the Applicant or Applicants, in case of multiple Applicants in the Saving Account with Overdraft. **Assessment Details** screen enables the user to understand the evaluation and provide the system recommendation based on the following parameters.

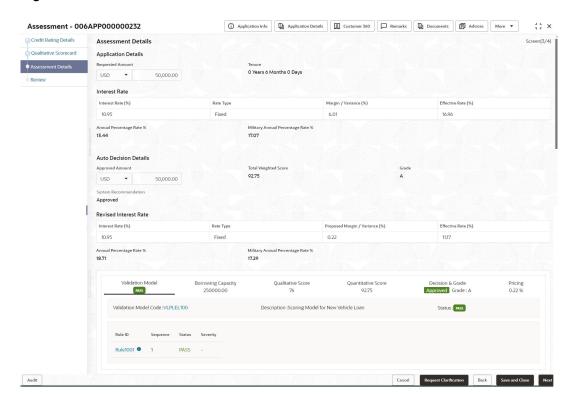

- Validation Model
- Borrowing Capacity

- Qualitative Score
- Quantitative Score
- Decision and Grade
- Pricing
- Click Next in the previous data segment to proceed with next data segment, after successfully capturing the data.

The Assessment Details - Validation Model screen displays.

Figure 2-39 Assessment Details - Validation Model

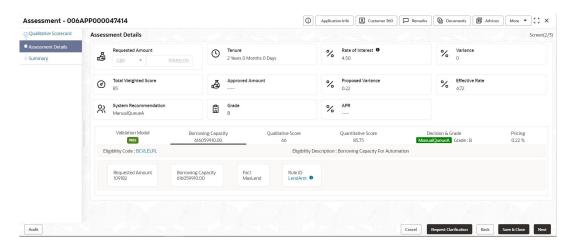

2. Click **Borrowing Capacity** tab under **Assessment Details** screen to view the borrowing capacity of the applicant.

The Assessment Details - Borrowing Capacity screen displays.

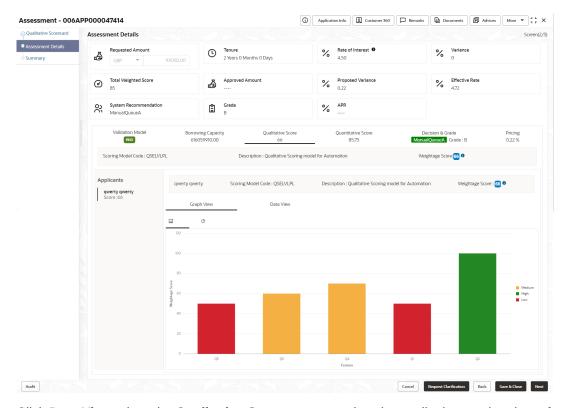

Figure 2-40 Assessment Details - Borrowing Capacity

3. Click **Qualitative Score** tab under **Assessment Details** screen to view the qualitative score for the applicant.

The Assessment Details – Qualitative Score – Graph View screen displays.

Figure 2-41 Assessment Details - Qualitative Score - Graph View

 Click Data View tab under Qualitative Score screen to view the qualitative scoring data of the applicant.

The Assessment Details – Qualitative Score – Data View screen displays.

For more information on fields, refer to the field description table.

Table 2-29 Assessment Details – Field Description

Field	Description
Rate Percentage	Displays the rate percentage.
Requested Amount	Specify the requested overdraft amount.
Tenure	Displays the tenure.
Base Rate	Displays the base type.
	This field appears if the rate type is <b>Floating</b> .
Rate of Interest	Displays the rate of interest.
	This field appears if the rate type is <b>Fixed</b> .
Margin	Displays the margin.
	This field appears if the rate type is <b>Floating</b> .
Variance	Displays the variance.
	This field appears if the rate type is <b>Fixed</b> .
Total Weightage Score	Displays the total weightage score.
Approved Amount	Displays the approved overdraft amount.
Proposed Margin	Displays the proposed margin.
	This field appears only for <b>Floating</b> rate type.
Proposed Variance	Displays the proposed variance.
	This field appears if the rate type is <b>Fixed</b> .
Effective Rate	Displays the effective rate of interest.

Table 2-29 (Cont.) Assessment Details – Field Description

Field	Description
System Recommendation	Displays the system recommendations.
	Available options are:
	Approved
	Manual
	Rejected
Grade	Displays the grade of the applicant.
Validation Model	This sections displays the validation model details.
Validation Model Code	Displays the validation model code configured for the product.
Description	Displays the description of the configured validation model.
Status	Displays the overall status of the validation model.
Rule ID	Displays the Rule ID configured in the validation model.
Sequence	Displays the sequence of the configured rules.
Status	Displays the status of the configured rule.
Borrowing Capacity	This section displays the borrowing capacity details.
Eligibility Code	Displays the unique eligibility code configured for the product.
Eligibility Description	Displays the description of the configured eligibility.
Requested Amount	Displays the requested card limit.
	If the calculated Borrowing Capacity is more than the Requested Amount, then Approved Amount is stamped to Requested Amount.
Borrowing Capacity	Displays the calculated borrowing capacity of the applicant.
Fact	Displays the fact configured in the eligibility code.
Rule ID	Displays the rule configured in the eligibility code.
Qualitative Score	This section displays the qualitative score details.
Scoring Model Code	Displays the scoring model code configured for the product.
Description	Displays the description of the scoring model.
Application Score	Displays the overall application score for the applicant(s).
	The application score also appears in the respective applicant's tab in case of the multiple applicants.
Qualitative Score - Scoring Details	This section displays the qualitative score details.
Question Code	Displays the question code configured for Qualitative Scoring Model
Question	Displays the question configured in question code.
Value	Displays the answers provided by the applicant.
Score	Displays the calculated score based on the answers.
Scoring Model Code	Displays the scoring model code configured for the product.
Description	Displays the description of the scoring model.
Weightage Score	Displays the overall weightage score for the applicant(s).
	The weightage score also appears in the respective applicant's tab in case of the multiple applicants.
Quantitative Score - Scoring Details	This section displays the Quantitative Score Details.
Feature	Displays the feature configured in the Quantitative Scoring Model.
Value	Displays the value of the application for the configured feature.
Range Type	Displays the range type configured in the Quantitative Scoring Model.
Range	Displays the range for the value of the application.

Table 2-29 (Cont.) Assessment Details - Field Description

Field	Description
Weightage %	Displays the weightage percentage configured for the feature.
Score	Displays the score configured for the range.
Weightage Score	Displays the calculated weightage for each feature.
Decision & Grade	This section displays the decision and grade details.
Model Code	Displays the model code configured for the product.
Model Description	Displays the description of the model code.
Decision	Displays the recommended decision for the application.
Grade	Displays the recommended grade for the application
Decision & Grade – Decision	This section displays the decision and grade details.
Quantitative Score	Displays the overall quantitative score of the application.
Quantitative Score Range	Displays the range for the quantitative score.
Decision	Displays the decision configured for the quantitative score.
Decision & Grade – Grade	This section displays the decision and grade details.
Quantitative Score	Displays the overall quantitative score of the application.
Quantitative Score Range	Displays the range for the quantitative score.
Grade	Displays the grade configured for the quantitative score.
Pricing	This section displays the pricing details.
Pricing Model Code	Displays the pricing model code configured for the product.
Model Description	Displays the description of the pricing model code.
Rate Type	Displays the rate type.
Rate Percentage	Displays the rate percentage.

### Note:

Based on the range of qualitative and quantitative scores, the system provides a suggestive recommendation and the overdraft amount which can be sanctioned.

# 2.6.3 Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Application Assessment stage.

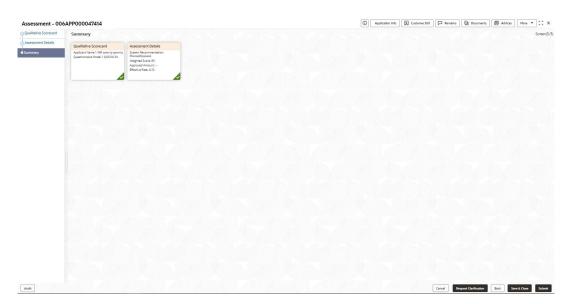

The Summary displays the tiles for all the data segments in the Application Assessment stage. The tiles display the important details captured in the specified data segment.

### To view the captured details:

 Click Next in Assessment Details screen to proceed with the next data segment, after successfully capturing the data.

The Summary screen displays.

Figure 2-47 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 2-30 Summary - Application Assessment – Field Description

Data Segment	Description
Qualitative Scorecard Details	Displays the qualitative scorecard details.
Assessment Details	Displays the assessment details.

2. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified. The Overrides screen is displayed.

Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. Click **Proceed Next**. The **Checklist** screen is displayed.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

- Select the checkbox to accept the checklist. Click Save & Proceed. The Outcome screen is displayed.
- 5. In the **Outcome** screen, select appropriate option from the **Select to Proceed** field.
  - Select the Proceed to proceed with the application. By default this option is selected. If the Proceed option is selected, then the application proceeds based on the assessment decision.
    - It will logically complete the Application Assessment stage for the saving application if the system recommendation is Approved. The Workflow Orchestrator will automatically move this application to the Account Parameter Setup stage.

- If the system recommendation is Manual then, the Manual Credit Assessment stage is generated for this saving application.
- If the system recommendation is **Rejected** then the application is terminated. The stage movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code.
- Select the Return to Application Entry Stage to make application entry stage available in free task for edit.
- Select the Return to Application Enrichment Stage to make enrichment stage available in free task.
- Select the Return to Overdraft Limit Details to make overdraft limit details stage available in free task.
- Select the Return to Initial Funding Details to make account funding details stage available in free task.
- Select the Return to Application Underwriting Stage to make underwriting stage available in free task.
- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- Click Submit. The Confirmation screen is displayed.

On successful submission the above pop-up appears and displays the next stage in which the application has moved. Application Reference Number and the Process Reference Number is also displayed. Click on 'Close' to close the pop-up screen. Alternatively click on 'Go to FreeTask' to launch the Free Task menu. If you have access to the next stage, you would be able to view the Application number and take action on it.

Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers to the Manual Credit Assessment stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

# 2.7 Manual Credit Assessment Stage

This topic describes the information on the various data segments to assess the application manually in the Manual Credit Assessment stage.

The Manual Credit Assessment stage of the saving account (with overdraft) opening process workflow will enable the bank to manually assess the application and provide the recommendation for the approval / rejection of the application. As a reference, the relevant completed data segments will be made available to the Approver before the application can be moved to the next stage. These completed data segments are from Underwriting Stage. The data segments are displayed in view only mode for the Credit Officer to analyze.

#### To capture manual assessment details:

- Scan the records that appears in the Free Task list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Manual Assessment stage is displayed.

The Manual Assessment stage has the following data segments in which the user can only view the data:

- Credit Rating Details: For detailed information, refer the Credit Rating Details data segment in the Underwriting stage.
- Legal Opinion For detailed information, refer the Legal Opinion data segment in the Underwriting stage.
- **Valuation Details** For detailed information, refer the Valuation Details data segment in the Underwriting stage.

Refer below chapters for detailed information on data segment that are editable.

#### Manual Assessment

This topic provides the systematic instructions to modify the account details and recommend for the approval / reject the saving account application.

#### Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

## 2.7.1 Manual Assessment

This topic provides the systematic instructions to modify the account details and recommend for the approval / reject the saving account application.

Manual Assessment is the data segment which enables the bank user to modify the account details and recommend for the approval / reject the saving account application. The user can acquire the application from Free Tasks list and assess all the View Only data segments.

 On acquiring the Manual Credit Assessment Stage from Free Tasks or clicking Next from the previosu data segment, the Manual Assessment screen is displayed.

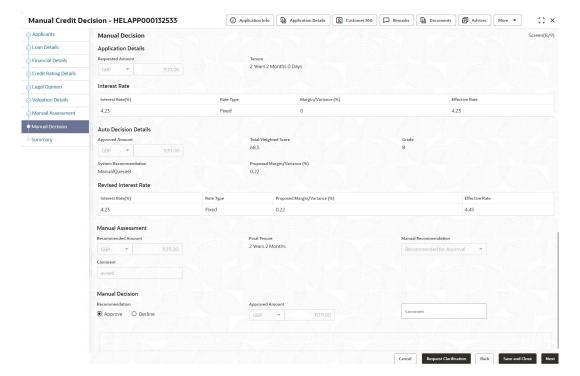

Figure 2-48 Manual Assessment

Specify the fields on Manual Assessment screen.

For more information on fields, refer to the field description table. Refer to **Assessment Details** screen for the detailed explanation of Validation Model, Borrowing Capacity, Qualitative Score, Quantitative Score, Decision & Grade and Pricing tabs.

Table 2-31 Manual Assessment – Field Description

Field	Description
Rate Percentage	Displays the rate percentage.
Requested Amount	Specify the requested overdraft amount.
Tenure	Displays the tenure.
Base Rate	
Dase Rate	Displays the base type.  This field appears if the rate type is <b>Floating</b> .
<b>D</b>	
Rate of Interest	Displays the rate of interest.
	This field appears if the rate type is <b>Fixed</b> .
Margin	Displays the margin.
	This field appears if the rate type is <b>Floating</b> .
Variance	Displays the variance.
	This field appears if the rate type is <b>Fixed</b> .
Total Weightage Score	Displays the total weightage score.
Approved Amount	Displays the approved overdraft amount.
Proposed Margin	Displays the proposed margin.
	This field appears only for <b>Floating</b> rate type.
Proposed Variance	Displays the proposed variance.
	This field appears if the rate type is <b>Fixed</b> .
Effective Rate	Displays the effective rate of interest.
System Recommendation	Displays the system recommendations.
	Available options are:
	Approved
	Manual
	Rejected
Grade	Displays the grade of the applicant.
Validation Model	This sections displays the validation model details.
Validation Model Code	Displays the validation model code configured for the product.
Description	Displays the description of the configured validation model.
Status	Displays the overall status of the validation model.
Rule ID	Displays the Rule ID configured in the validation model.
Sequence	Displays the sequence of the configured rules.
Status	Displays the status of the configured rule.
Borrowing Capacity	This section displays the borrowing capacity details.
Eligibility Code	Displays the unique eligibility code configured for the product.
Eligibility Description	Displays the description of the configured eligibility.
Requested Amount	Displays the requested card limit.
	If the calculated Borrowing Capacity is more than the Requested Amount, then Approved Amount is stamped to Requested Amount.
Borrowing Capacity	Displays the calculated borrowing capacity of the applicant.
Fact	Displays the fact configured in the eligibility code.
Rule ID	Displays the rule configured in the eligibility code.

Table 2-31 (Cont.) Manual Assessment – Field Description

Rate Percentage	Displays the rate percentage.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

## 2.7.2 Summary

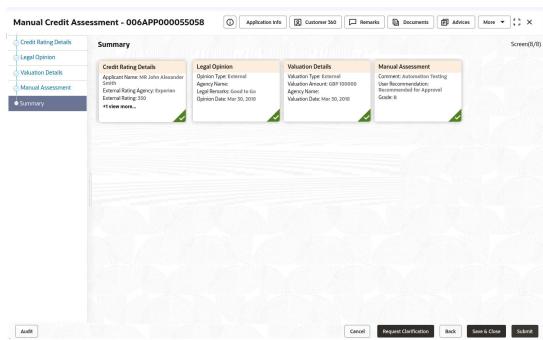

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

1. Click **Next** in the previous data segmentscreen to proceed with the next data segment, after successfully capturing the data.

The **Summary Manual Credit Assessment** screen displays.

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-32 Summary - Manual Credit Assessment - Field Description

Data Segment	Description
Credit Rating Details	Displays the credit rating details.
Valuation Details	Displays the valuation details.
Legal Opinion	Displays the legal opinion.
Manual Assessment	Displays the Manual assessment details.

- Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified. The Overrides screen is displayed.
- 3. Click Accept Overrides & Proceed. The Checklist screen is displayed.
- 4. Click Save & Proceed. The Outcome screen is displayed.
- In the Outcome screen, select appropriate option from the Select to Outcome field.
- **6.** Select **Proceed** outcome from the drop-down list.

It will logically complete the **Manual Credit Assessment** stage for the Saving Account (with overdraft) Application. The workflow will automatically move this application to the next processing stage, **Manual Credit Decision** stage.

The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- Enter the remarks in Remarks.
- Click Submit to submit the manual credit assessment. The confirmation screen appears
  with the submission status, the Application Reference Number and the Process Application
  Reference Number.
- Click Close to close the window.

OR

Click **Go to Free Task.** The system successfully moves the Application Reference Number along with the sub process reference numbers [Saving Account] to the Manual Credit Decision stage. This application will be available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

# 2.8 Manual Credit Decision Stage

This topic describes the information on the various data segments to review and approve the application manually in the Manual Credit Decision stage.

Manual Credit Decision stage of the saving account (with overdraft) opening process workflow will enable the bank to make the decision on whether the recommended overdraft limit can be approved to the applicant.

### To capture manual credit decision details:

- Scan the records that appears in the Free Task list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Manual Credit Decision stage is displayed.

The Manual Credit Decision stage has the following data segments in which the user can only view the data:

- Account Details For detailed information, refer the Account Details data segment in the Application Entry stage.
- Customer Information For detailed information, refer the Customer Information data segment in the Application Entry stage.
- **Financial Details**: For detailed information, refer the Financial Details data segment in the Application Entry stage.
- **Credit Rating Details**: For detailed information, refer the Credit Rating Details data segment in the Underwriting stage.

- Valuation Details For detailed information, refer the Valuation Details data segment in the Underwriting stage.
- Legal Opinion For detailed information, refer the Legal Opinion data segment in the Underwriting stage.
- Manual Assessment For details information, refer the Assessment Details data segment in the Manual Credit Assessment stage.

Refer below chapters for detailed information on data segment that are editable.

#### Manual Decision

This topic provides the systematic instructions to review and approve the application manually in manual credit decision stage.

Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

## 2.8.1 Manual Decision

This topic provides the systematic instructions to review and approve the application manually in manual credit decision stage.

Manual Decision is the first data segment of Manual Credit Decision stage. The user can acquire the application from Free Tasks list.

 Click Acquire and Edit in the Free Tasks screen of the previous stage – Manual Credit Assessment stage.

The Manual Decision screen displays.

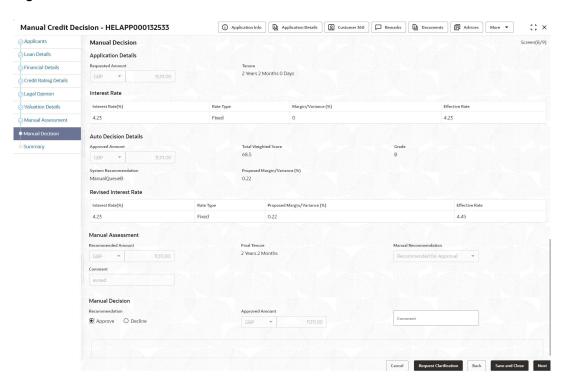

Figure 2-50 Manual Decision

Specify the fields on Manual Decision screen.

For more information on fields, refer to the field description table. Refer to **Assessment Details** screen for the detailed explanation of Validation Model, Borrowing Capacity, Qualitative Score, Quantitative Score, Decision & Grade and Pricing tabs.

**Table 2-33 Manual Decision – Field Description** 

Field	Description
Requested Amount	Displays the requested overdraft amount.
Tenure	· · ·
	Displays the overdraft tenure.
Base Rate	Displays the base rate.
	This field appears only for <b>Floating</b> rate type.
Margin	Displays the margin.
	This field appears only for <b>Floating</b> rate type.
Total Weightage Score	Displays the total weightage score.
Approved Amount	Displays the approved overdraft amount.
	This field appears blank by default.
	If the approver selects the recommendation as Approve, then the
	recommended amount gets defaulted as approved amount.
Proposed Margin	Displays the proposed margin.
	This field appears only for <b>Floating</b> rate type.
Effective Rate	Displays the effective rate of interest.
Recommended Amount	Displays the recommended overdraft amount.
Final Tenure	Displays the final overdraft tenure.
Manual Recommendation	Displays the manual recommendation.
Comments	Displays the comments.
System Recommendation	Displays the system recommendations.
Recommendation	Select the recommendation. Available options are
	Approve
	Decline
	If the approver selects the recommendation as <b>Approve</b> , then the recommended amount gets defaulted as approved amount.
Action	Displays the user action based on user recommendation.
Comments	Specify the comment on the user action.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

# 2.8.2 Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

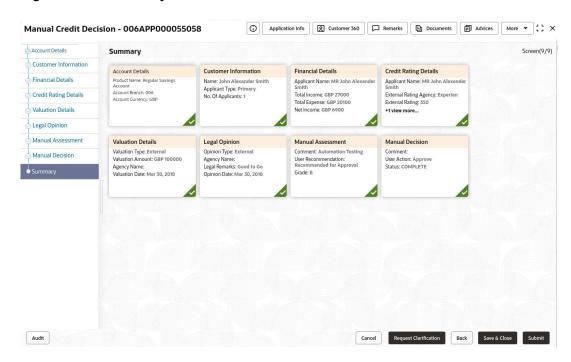

The system will display the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

 Click Next in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-51 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 2-34 Summary - Manual Credit Decision - Field Description

Field	Description
Account Details	Displays the account details.
Customer Information	Displays the customer information.
Financial Details	Displays the financial details.
Credit Rating Details	Displays the credit rating details.
Valuation Details	Displays the valuation details.
Legal Opinion	Displays the legal opinion.
Manual Assessment	Displays the manual assessment.
Manual Decision	Displays the manual decision.

- Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified. The Overrides screen is displayed.
- 3. Click Accept Overrides & Proceed. The Checklist screen is displayed.
- 4. Click Save & Proceed. The Outcome screen is displayed.
- 5. In the Outcome screen, select appropriate option from the Select to Outcome field.
  - Select the Proceed to proceed with the application. It will logically complete the
    Manual Credit Decision stage for the Saving Account (with overdraft) Application.
    Upon submit, a Pricing call will be made by Oracle Banking Origination to Decision
    Service to get the Interest rate. The Workflow Orchestrator will automatically move this
    application to the next processing stage, Account Parameter Setup stage. The stage

movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code.

- Select the Return to Manual Credit Assessment Stage to make underwriting stage available in free task.
- 6. Click **Submit**. The **Confirmation** screen is displayed.
- Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Saving Account] to the Account Parameter Setup stage. This application will be available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

# 2.9 Account Parameter Setup Stage

This topic describes the information on the various data segments to setup the required account parameters in the Account Parameter Setup stage.

The Account Parameter Setup stage is the next representative stage in the Saving Account Open process. After the Application Assessment or Manual Credit Decision stage is completed successfully, the user who has the access rights for the given stage, can acquire the application and progress with the data capture. The user can acquire the application from Free Tasks list.

The Account Parameter Setup stage has the following reference data segments:

- Interest and Charge This data segment is editable. For detailed information, refer the Interest and Charge data segment in the Application Enrichment stage.
- Advance against Uncollected Funds This data segment is editable. For detailed information, refer the Advance against Uncollected Funds data segment in the Overdraft Limit stage.
- **Temporary Overdraft Limit** This data segment is editable. For detailed information, refer Temporary Overdraft Limit data segment in the Overdraft Limit stage.
- Account Limit Details This data segment is ready only. For detailed information, refer Account Limit Details data segment in the Overdraft Limit stage.

All the data segments are carried forward from Application Enrichment stage. If the details are captured in Application Enrichment stage, the same will be fetched automatically. The user can modify the captured details and all the data segments are mandatory to capture the details to move the application to the next stage.

Summary - Account Parameter Setup

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

# 2.9.1 Summary - Account Parameter Setup

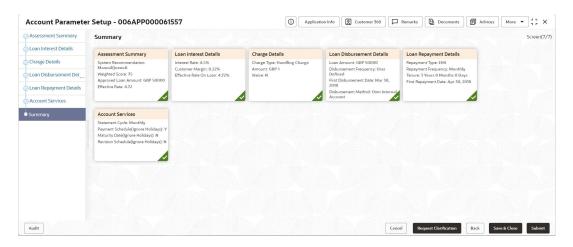

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

 Click Next in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The Summary screen displays.

Figure 2-52 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-35 Summary – Field Description

Field	Description
Interest Details	Displays the interest details.
Charge Details	Displays the charge details.
Advance against Uncollected Funds Details	Displays the Advance against Uncollected Funds details.
Temporary Overdraft Limit Details	Displays the Temporary Overdraft Limit details.
Account Services Preferences	Displays the account services preferences.
Account Limit Details	Displays the account limit details.

- Click Submit to reach the OUTCOME, where the overrides, checklist and the documents for this stage can be validated or verified. The Overrides screen is displayed.
- 3. Click Accept Overrides & Proceed. The Checklist screen is displayed.
- 4. Click Save & Proceed. The Outcome screen is displayed.

- 5. In the **Outcome** screen, select appropriate option from the **Select to Outcome** field.
  - Select the Proceed to proceed with the application It will logically complete the
    nextstage for the Saving Account Application. The Workflow Orchestrator will
    automatically move this application to the next processing stage. The stage movement
    is driven by the business configuration for a given combination of Process Code, Life
    Cycle and Business Product Code.
    - If there is no change in Interest or Charges details, the workflow will automatically move this application to the Offer Issue stage.
    - If there is any change in Interest or Charges details, submit of this stage, will move the application into the Supervisor Application Approval stage. Select the Return to Application Entry Stage to make application entry stage available in free task for edit.
  - Select the Return to Credit Decision Stage to make credit decision stage available in free task.
  - Select the Return to Credit Assessment Stage to make credit assessment stage available in free task.
  - Select the Return to Assessment Stage to make assessment stage available in free task
  - Select the Return to Initial Funding Stage to make initial funding stage available in free task.
  - Select the Return to Overdraft Limit Details Stage to make overdraft limit details stage available in free task.
  - Select the Return to Application Enrichment Stage to make enrichment stage available in free task.
  - Select the Return to Application Entry Stage to make application entry stage available in free task.
  - Select the Return to Application Underwriting Stage to make underwriting stage available in free task.
  - Select the Reject by Bank toreject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- Click Submit.to submit the account parameter setup stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Saving Account] to the Account Approval stage. This application is will be available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

# 2.10 Supervisor Application Approval Stage

This topic describes the information on the various data segments to view and approve the price change in the Supervisor Application Approval stage.

In this stage supervisor can approve the application.

Pricing Change Approval

This topic provides the systematic instructions to view and approve the pricing change.

Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

# 2.10.1 Pricing Change Approval

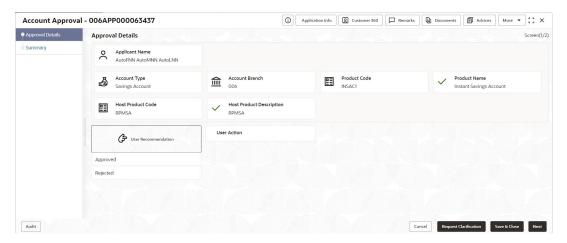

This topic provides the systematic instructions to view and approve the pricing change.

Pricing Change Approval is the first data segment of Supervisor Application Approval stage. The user can acquire the application from Free Tasks list.

 Click Acquire and Edit in the Free Tasks screen of the previous stage – Account Parameter Setup stage.

The **Pricing Change Approval** screen displays.

Figure 2-53 Pricing Change Approval

Specify the fields on Pricing Change Approval screen.

For more information on fields, refer to the field description table.

**Table 2-36 Pricing Change Approval – Field Description** 

Field	Description
Applicant Name	Displays the applicant name.
Account Type	Displays the account type.
Account Branch	Displays the account branch name.
Product Code	Displays the product code selected for this saving account.
Product Name	Displays the product name selected or this saving account.
Approved Amount	Displays the final approved overdraft amount.
OD Tenure	Displays the final OD tenure for the approved amount.
Existing Values	Displays the existing values.
Rate Type	Displays the rate type.
Base Rate	Displays the rate of interest for the approved overdraft amount.
Margin	Displays the margin.

Table 2-36 (Cont.) Pricing Change Approval – Field Description

Field	Description
Effective Rate	Displays the effective rate.
Handling Charges	Displays the handling charges.
Revised Values	Displays the revised values against the existing values.
Rate Type	Displays the rate type.
Base Rate	Displays the rate of interest for the approved overdraft amount.
Margin	Displays the margin.
Effective Rate	Displays the effective rate.
Handling Charges	Displays the handling charges.
User Recommendation	Select the user recommendation. Available options are: Approved Rejected
User Action	Displays the user action based on user recommendation.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

# 2.10.2 Summary

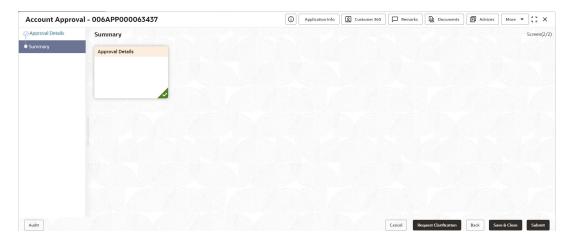

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

 Click Next in Pricing Change Approval screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-54 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-37 Summary - Pricing Change Approval – Field Description

Data Segment	Description
Pricing Change Approval	Displays the pricing change approval details.

- 2. Click **Submit** to reach the **OUTCOME**, where the Overrides, Checklist and the Documents for this stage can be validated or verified. The **Overrides** screen is displayed.
- Click Accept Overrides & Proceed. The Checklist screen is displayed.
- Click Save & Proceed. The Outcome screen is displayed.
- 5. In the **Outcome** screen, select appropriate option from the Select to Outcome field.
- 6. Select Proceed outcome from the drop-down list. It will logically complete the Supervisor Application Approval stage for the Saving Application. The Workflow Orchestrator will automatically move this application to the next processing stage.

If the Supervisor has approved the price change, submit of this stage, will move the application to **Offer Issue** stage.

If the Supervisor has rejected the price change, the application will be routed back to **Account Parameter Setup** stage.

The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- Click Submit. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Saving Account] to the **Offer Issue Stage** for Individual Customers. This application will be available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

# 2.11 Offer Issue Stage

This topic describes the information on the various data segments to generate the offer in the Offer Issue stage.

After due diligence and Account Parameter setup, the Application will move to the Offer issue stage where the user will generate the offer letter. As a reference, the relevant completed data segments will be made available to the user before the application can be moved to the next stage. These completed data segments are from the Application Underwrite Stage and Application Assessment Stage. The data segments are displayed in view only mode for the user to browse.

In the Offer Issue stage, provide the required details under each data segment.

The **Offer Issue** stage has the following reference data segments:

• **Credit Rating Details**: - For detailed information, refer the Credit Rating Details data segment in the Underwriting stage.

- Valuation Details For detailed information, refer the Valuation Details data segment in the Underwriting stage.
- **Legal Opinion** For detailed information, refer the Legal Opinion data segment in the Underwriting stage.

Refer below chapters for detailed information on data segment that are editable.

- Assessment Summary
   This topic provides the systematic instructions to view the assessment summary of the Savings Account application.
- Document Generation
   In this data segment you can generate and dispatch the documents that are configured.
- Summary Offer Issue
   This topic provide the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

# 2.11.1 Assessment Summary

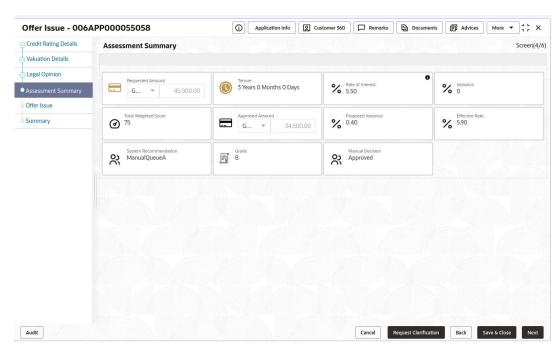

This topic provides the systematic instructions to view the assessment summary of the Savings Account application.

Assessment Summary is the view only data segment of Offer Issue stage.

1. Click **Acquire and Edit** in the **Free Tasks** screen for the application for which Account Approval stage has to be acted upon.

The **Assessment Summary** screen displays.

Figure 2-55 Assessment Summary

2. The user can view the details in the relevant data fields.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-38 Assessment Summary – Field Description

Field	Description
Requested Amount	Displays the requested overdraft amount.
Tenure	Displays the tenure.
Base Rate	Displays the base rate.
Margin	Displays the variance rate.
	This field appears only for <b>Floating</b> rate type.
Total Weightage Score	Displays the total weightage score.
Approved Amount	Displays the final approved overdraft amount.
Proposed Margin	Displays the proposed variance.
	This field appears only for <b>Floating</b> rate type.
Effective Rate	Displays the effective rate of interest.
System Recommendation	Displays the system recommendations.
Grade	Displays the grade of the applicant.
Manual Decision	Displays the manual decision.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

## 2.11.2 Document Generation

In this data segment you can generate and dispatch the documents that are configured.

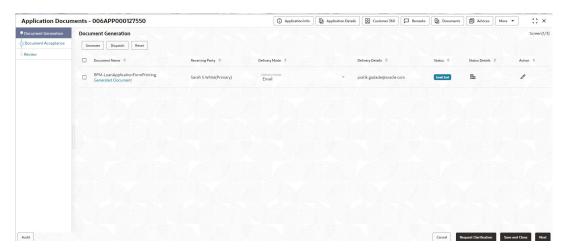

In the Document Generation data segment, the list of documents that are maintained within the document generation event and fulfills the rule criteria are pre-populated in the tabular format. This document generation events are defined in the **Advice Maintenance** screen. Each documents appears seperately to generate and dispatch.

To generate and dispatch the document:

 On acquiring the Application Document task, the Document Generation stage is displayed.

Figure 2-56 Document Generation

2. In the **Document Generation** section, select the check box to select the document from the list. It is mandatory to select atleast one document

You can perform below actions on the seletced document:

- **Generate**: You can click this button to generate the selected document. On clicking this button the system invokes a call to the report generation service which generates a PDF output for the advice onfigured in the Advice Maintenance screen. Once the output is generated the documents are stored in the document managed service (DMS) along with the reference ID. This reference ID fetches the document on click the Generate Docoument link in the Documen column.
- **Dispatch**: You can click this button to dispatch the selected generated documents. You can only dispatch those documents which are not already disptached. On clicking this button the system validates whether the document is already generated. Once the validation is successful the system dispatch the document to the default setting defined in the Advice Maintenance screen.
- Reset: You can click this button to reset the action performed on the document.

**Table 2-39 Document Generation – Field Description** 

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. This link appears only if the document is generated.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column.  The name appears as captured in the Applicant data segment.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.

Table 2-39 (Cont.) Document Generation – Field Description

Field	Description
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode.  If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed.  If the delivery mode is Post then the preferred address of every recipient is displayed.  If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated.  If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on clicking Generate or Dispatch button.  Once the dispatch process is initiated for the generated documents, the status appears based on the selected default mode of delivery.  If the mode of delivery is Email then on the successful trigger the status appears as Email Sent.  If the mode of delivery is E-Sign Remote or E-Sign In-Person then on the successful trigger the status appears as E-Signing Initiated.  If the mode of delivery is Post then on the successful trigger the status appears as Dispatched.  If the mode of delivery is Print then on the successful trigger the status appears as Ready for Print.  In case the dispatch process fails due to technical error then the status appears as Failed.
Status Details	Displays the status details of the document. Click the icon to view the generation and dispatched details of document along with the date and time.
Action	<ul> <li>Select the appropriate icon to perform respective action.</li> <li>Click to edit the delivery mode.</li> <li>Click to save the edited delivery mode. This icon appears once you are edit mode.</li> </ul>

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

# 2.11.3 Summary - Offer Issue

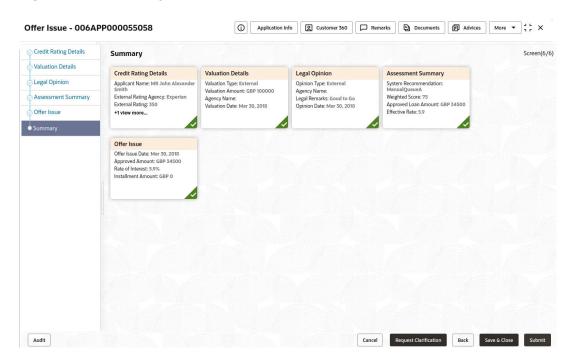

This topic provide the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

1. Click **Next** in **Offer Issue** screen to proceed with the next data segment, after successfully capturing the data.

The **Summary - Offer Issue** screen displays.

Figure 2-57 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-40 Summary - Offer Issue - Field Description

Data Segment	Description
Credit Rating Details	Displays the credit rating details.
Valuation Details	Displays the valuation details.
Legal Opinion	Displays the legal opinion details.
Assessment Summary	Displays the assessment details.
Offer Issue	Displays the offer issue details.

- Click Submit to reach the OUTCOME, where the overrides, checklist and the documents for this stage can be validated or verified. The Override screen is displayed.
- 3. Accept the overrides and click **Proceed Next**. The **Checklist** screen is displayed.
- Click Proceed Next. The Outcome screen is displayed.
- 5. In the Outcome screen, select appropriate option from the Select to Outcome field.
  - Select Proceed outcome from the drop-down list. It will logically complete the Offer Issue stage for the Overdraft Application. The Workflow Orchestrator will automatically move this application to the next processing stage, Offer Accept/Reject. The stage movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code.
  - Select the Reject Application to reject the submission of this application. The
    application is terminated, and an email is sent to the borrower or customer with a
    rejection advice.

- Click Submit to submit the Offer Issue stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Overdraft] to the Application **Offer Accept / Reject** stage.

# 2.12 Offer Accept / Reject Stage

This topic describes the information on the various data segments to accept / reject the offer in the Offer Accept / Reject stage.

After the Offer Issue stage, the offer letter will be sent or communicated to the borrower or applicant. The **Offer Accept** *I* **Reject** stage will enable the user to record the customer response – Accept or Reject as the case may be. Also, the offer made can be amended based on Customer request – viz., change in Principal Amount, Interest Rate or Tenure. The post offer amend can be routed back to the relevant previous completed stages like Application Enrichment stage. If the business wants the Underwriting stage or the Application Assessment stage to be redone, they can be configured accordingly, post which the new offer with the revised terms will be issued to the borrower or applicant for acceptance.

#### To perform actions on issued offer:

- 1. Scan the records that appears in the Free Task list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Offer Accept /Reject stage is displayed.

In the Offer Accept / Reject stage, provide the required details under each data segment.

The Offer Accept / Reject stage has the following reference data segments:

- Offer Issue: For detailed information, refer the Offer Issue data segment in the Offer Issue stage.
- Assessment Summary For detailed information, refer the Assessment Summary data segment in the Offer Issue stage.

Refer below chapters for detailed information on data segment that are editable.

- Document Acceptance
   In this data segment you can capture the acceptance of the documents that are already generated and dispatched.
- Summary Offer Accept / Reject
   This topic provide the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

## 2.12.1 Document Acceptance

In this data segment you can capture the acceptance of the documents that are already generated and dispatched.

The Document Acceptance data segment populates the list of documents that appeared in the **Document Generation** data segment and are mark as **Yes** in the **Acceptance** field in the **Advice Maintenance** screen.

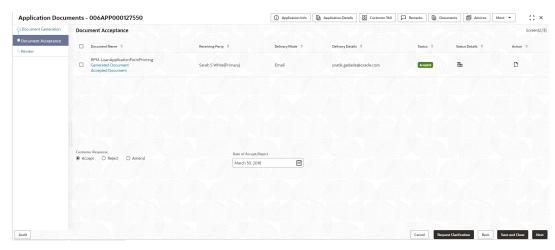

If the document is marked as No in the Acceptance field in the Advice Maintenance screen then the e-sign acceptance process in not required for that document and hence it will not appear in this data segment.

#### To accept the document:

1. Click **Next** in previous data segment screen to proceed with the next data segment, after successfully capturing the data.

The **Document Acceptance** screen appears.

Figure 2-58 Document Acceptance

2. In the **Document Acceptance** section, select the check box to select the document from the list and perform appropriate actions.

Table 2-41 Document Acceptance - Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document.  Generated Document: This link appears only if the document is generated atleast onces.  Accepted Document: This link appears only if the E-Signed document is uploaded.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column.  The name appears as captured in the Applicant data segment.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.

Table 2-41 (Cont.) Document Acceptance – Field Description

Field	Description
	Description
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode.  If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipent is displayed.  If the delivery mode is Post then the preferred address of every recipent is displayed.  If the delivery mode is e-Sign In-Person then the link is shared with every recipents and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated.  If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on the document.
Status Details	Displays the status details of the document. Click the icon to view the generation, dispatched and acceptance details of document along with the date and time.
Action	<ul> <li>Select the appropriate icon to perform respective action.</li> <li>View: You can view the documents only if the Delivery Mode is defined as E-Sign Remote or E-Sign In-Person.</li> <li>Upload Document: You can upload documents only if the Delivery Mode is defined as Email, Print or Post.</li> <li>Delete: You can upload documents only if the Delivery Mode is defined as Email, Print or Post.</li> </ul>
Customer Response	Select the customer response for the documents. The avaible options are:
	<ul> <li>Accept: Select to accept the application documents. You can select this option only if the acceptance status of all the document is Accepted.</li> <li>Reject: Select to reject the application documents. If the acceptance status of any one of the document is declined then this option appears auto-selected.</li> <li>Amend: Select to amend the application document status.</li> </ul>
Date of Response	Select the date on which the customer response is captured. This date should be greater or equal to current date.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

# 2.12.2 Summary - Offer Accept / Reject

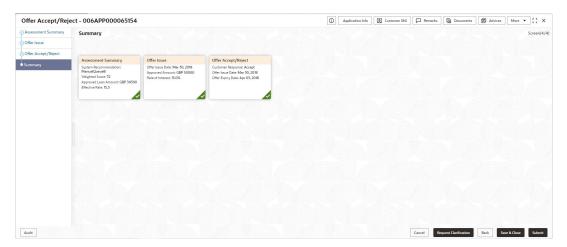

This topic provide the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

 Click Next in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-59 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-42 Summary - Offer Accept / Reject - Field Description

Data Segment	Description
Assessment Summary	Displays the assessment summary.
Offer Issue	Displays the offer issue details.
Offer Accept / Reject	Displays the offer accept / reject details.

- 2. Click **Submit** to reach the **OUTCOME**, where the Overrides, Checklist and the Documents for this stage can be validated or verified. The **Override** screen is displayed.
- 3. Accept Overrides and Click **Proceed Next.** The **Checklist** screen is displayed.
- 4. Click Save & Proceed Next. The Outcome screen is displayed.
- 5. In the Outcome screen, select appropriate option from the Select to Outcome field.
  - Select Proceed outcome from the drop-down list. It will logically complete the Offer Issue stage for the Overdraft Application. The Workflow Orchestrator will automatically move this application to the next processing stage, Offer Accept/Reject. The stage movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code.
    - If the Customer Response is selected as Accept in Offer Accept/Reject screen, then submit of this stage, will move the application into the Account Approval stage.
    - If the Customer Response is selected as Reject in Offer Accept/Reject screen, then submit of this stage, will terminate the application.
    - If the Customer Response is selected as Amend in Offer Accept/Reject screen, then submit of this stage, will move the application into the Post Offer Amendment stage.
  - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.

- Click Submit to submit the Offer Accept/Reject stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Overdraft] to the next processing stage on Host. This application will be available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

# 2.13 Post Offer Amendment Stage

This topic describes the information on the various data segments to request for amendment of overdraft in the Post Offer Amendment stage.

Post Offer Amendment stage enables the user to request for amendment of Overdraft components after the Offer is Issued by the bank. This stage will appear only if the **Customer Response** is selected as **Amend** in **Offer Accept/Reject** data segment.

#### To perform actions on post offer amendment:

- 1. Scan the records that appears in the Free Task list.
- 2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Post Offer Amendment stage is displayed

The **Post Offer Amendment** stage has the following data segments:Offer Accept / Reject – View only as available in Offer Accept / Reject stage

- Account Limit Details This data segment is editable. For detailed information, refer Account Limit Details data segment in the Overdraft Limit stage.
- Offer Issue This data segment is read only. For detailed information, refer the Offer Issue data segment in the Offer Issue stage.
- Offer Accept/ Reject This data segment is read only. For detailed information, refer the Offer Accept/ Reject data segment in the Offer Accept/ Reject stage.

Refer below chapters for detailed information on data segment that are editable.

#### Post Offer Amendment

This topic provides the systematic instructions to request for amendment of Overdraft components after the Offer is Issued by the bank.

#### Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

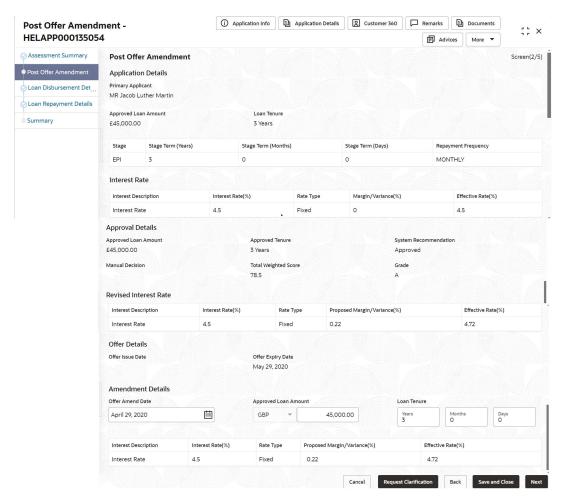

## 2.13.1 Post Offer Amendment

This topic provides the systematic instructions to request for amendment of Overdraft components after the Offer is Issued by the bank.

Post Offer Amendment data segment is the first data segment of Post Offer Amendment stage. The user can acquire the application from Free Tasks list.

 Click Acquire and Edit in the Free Tasks screen of the previous stage – Offer Accept / Reject stage. The **Post Offer Amendment** screen displays.

Figure 2-60 Post Offer Ammendment

2. Specify the fields on Post Offer Amendment screen.

Table 2-43 Post Offer Amendment – Field Description

Field	Description
Primary Applicant	Displays the primary applicant name.
Approved Loan Amount	Displays the approved loan amount.
Loan Tenure	Displays the selected loan tenure.
Stage	Select the type of repayment. All type of repayment methods configured in the Business Product Preferences data segments of the Business Product Configuration screens appears in the drop-down list.
Stage Term <term unit=""></term>	Displays the default stage term configured in the Business Product Preferences data segments of the Business Product Configuration screens.  The seperate column appears for seperate term units.

Table 2-43 (Cont.) Post Offer Amendment – Field Description

Field	Description
Repayment Frequency	Select the repayment frequency from the drop-down list. The available options appears based on the configuration set in the Business Product Preferences data segments of the Business Product Configuration screens:
	• Daily
	Weekly     Bi-Monthly
	Monthly
	Quarterly
	Half Yearly
	Yearly
Interest Description	Displays the interest description of the selected interest rate code.
Interest Rate (%)	Specify the interest rate.  Interest Rate is fetched from host back end product to which this loan account is mapped via the Business Product configuration.
Rate Type	Displays the rate type.
Margin / Variance ( %)	Specify the margin or variance in percentage.
Manual Decision	Displays the manual decision details
Proposed Margin/Variance %	Displays the margin or variance in rate percentage.
Total Weighted Score	Displays the total weighted score.
System Recomendation	Displays the system recommendations.
	Available options are:
	Approved
	Manual
	Rejected
Offer Issue Date	Displays the date of offer issued.
Offer Expiry Date	Displays the date based on the expiry period configuration done at the Business Product level which is used for this Overdraft.
Offer Amend Date	Displays the date of offer amend.
Effective Rate	Displays the amended effective rate.  Effective Rate = Rate of Interest + Margin/Variance.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

# 2.13.2 Summary

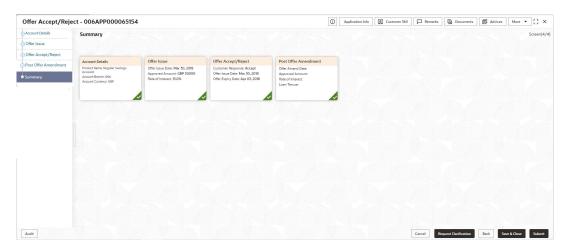

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

1. Click **Next** in **Post Offer Amendment** screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-61 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-44 Summary - Post Offer Amendment – Field Description

Data Segment	Description
Offer Issue	Displays the offer issue details.
Post Offer Amendment	Displays the post offer amendment details.

- 2. Click **Submit** to reach the **OUTCOME**, where the Overrides, Checklist and the Documents for this stage can be validated or verified. The **Override** screen is displayed.
- Accept Overrides and click Proceed Next. The Checklist screen is displayed.
- Click Proceed Next. The Outcome screen is displayed.
- 5. In the Outcome screen, select appropriate option from the Select to Outcome field.
  - Select **Proceed** outcome from the drop-down list. It will logically complete the **Post Offer Amend** stage for the Overdraft Application. The Workflow Orchestrator will automatically move this application to the next processing stage. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
    - If there is any change in Approved Amount and/or in Limit Date Range, then submit of this stage, will move the application to the Application Assessment stage.
    - If the changes are only in the Rate of Interest (Pricing), then submit of this stage, will move the application to the Supervisor Application Approval stage.
  - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- Click Submit to submit the Post Offer Amendment stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers to the stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

# 2.14 Account Approval Stage

This topic describes the information on the various data segments to view the captured details and approve the application in the Account Approval stage

#### To approve an account opening:

- 1. Scan the records that appears in the Free Task list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Account Approval stage is displayed.

The Account Approval stage has the following data segments which user can only view:

- Applicants For detailed information, refer the Customer Information data segment in the Application Entry stage.
- Account Details For detailed information, refer the Account Details data segment in the Application Entry stage.
- Mandate Details For detailed information, refer the Mandate Details data segment in the Application Entry stage.
- **Nominee Details** For detailed information, refer the Nominee Details data segment in the Application Entry stage.
- Stake Holder Details For detailed information, refer the Stake Holder Details data segment in the Application Entry stage.
- **Financial Details**: For detailed information, refer the Financial Details data segment in the Application Entry stage.
- Terms and Conditions For detailed information, refer the Terms and Conditions data segment in the Application Entry stage.
- Interest Details: For details information, refer the Interest Details data segment in the Application Enrichment stage.
- Charge Details: For details information, refer the Charge Details data segment in the Application Enrichment stage.
- Account Limit Details: For details information, refer the Account Limit Details data segment in the Overdraft Limit Details stage.
- Temporary OD Limit Details: For details information, refer the Temporary OD Limit Details data segment in the Overdraft Limit Details stage.
- Advance against Uncollected Funds: For details information, refer the Advance against Uncollected Funds data segment in the Overdraft Limit Details stage.
- Initial Funding Details: For details information, refer the Initial Funding Details data segment in the Account Funding stage.
- **Credit Rating Details**: For detailed information, refer the Credit Rating Details data segment in the Underwriting stage.
- Valuation Details For detailed information, refer the Valuation Details data segment in the Underwriting stage.

- **Legal Opinion** For detailed information, refer the Legal Opinion data segment in the Underwriting stage.
- Assessment Summary: For details information, refer the Assessment Summary data segment in the Offer Issue stage.

Refer below chapters for detailed information on data segment that are editable.

- Collateral Perfection Details
  - This topic provides the systematic instructions to view the collateral perfection details.
- Approval Details
  - This topic provides the systematic instructions to view and approve the application.
- Summary

This topic provides the systematic instructions to view the tiles for all the data segments of the Savings Account Origination Process.

### 2.14.1 Collateral Perfection Details

This topic provides the systematic instructions to view the collateral perfection details.

Collateral Perfection Details is the first data segment of Account Approval stage.

 Click Next in the Assessment Summary screen for the application for which Account Approval stage has to be acted upon.

Registration Status	Specify the status of registration.
Registration Reference Number	Specify the registration reference number.

#### Note:

All the fields will be fetched from Oracle Banking Credit Facilities Process Management in read only mode if integrated with Oracle Banking Credit Facilities Process Management.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

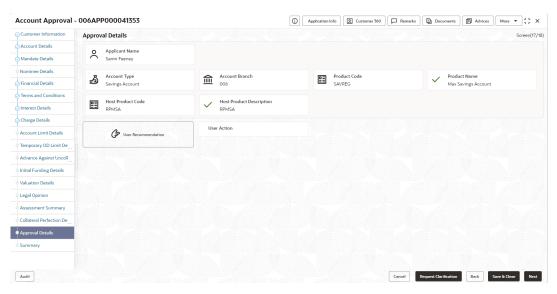

# 2.14.2 Approval Details

This topic provides the systematic instructions to view and approve the application.

 Click Next in previous data segment to proceed with the next data segment, after successfully capturing the data.

The Approval Details screen displays.

Figure 2-63 Approval Details

2. Specify the details in the relevant data fields.

Table 2-46 Approval Details - Field Description

Field	Description
Applicant Name	Displays the applicant name.
Account Type	Displays the account type.
Account Branch	Displays the account branch.
Product Code	Displays the product code.
Product Name	Displays the product name.
Account Currency	Displays the account currency.
Host Product Code	Displays the host product code mapped to the business product.
Host Product Description	Displays the host product description mapped to the business product.
Application Details	Displays the applicant details.
OD Amount	Displays the final approved overdraft amount.
OD Tenure	Displays the final tenure for the approved overdraft amount.
Limit Type	Displays the limit type.
Rate Type	Displays the rate type for the approved overdraft amount.
Margin	Displays the margin percentage.
Effective Rate	Displays the effective rate for the approved overdraft amount.

Table 2-46 (Cont.) Approval Details - Field Description

Field	Description
User Recommendation	Select the user recommendation. Available options are: Approved Rejected
User Action	Displays the user action based on user recommendation.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

## 2.14.3 Summary

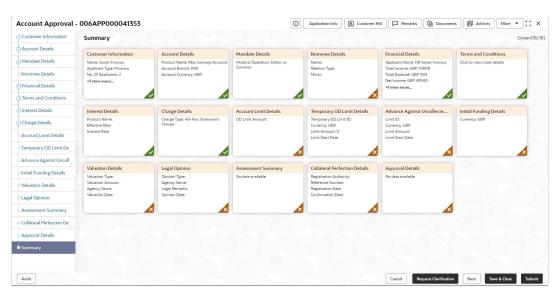

This topic provides the systematic instructions to view the tiles for all the data segments of the Savings Account Origination Process.

The Summary displays the tiles for all the data segments of the Savings Account Origination Process. The Tiles displays the important details captured in the specified data segment. It further allows to click on the specific tile to view the data segment and the details captured. You can additionally click on the data segment from the train on the left hand side to view the details of the data segment.

 Click Next in previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-64 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

Table 2-47 Summary - Account Approval - Field Description

Data Segment	Description
Account Details	Displays the account details.
<b>Customer Information</b>	Displays the customer information.
Stake Holder Details	Displays the stake holder details. This data segment appears only if the <b>Customer Type</b> selected as <b>Small and Medium Business (SMB)</b> .
Mandate Details	Displays the mandate details.
Nominee Details	Displays the nominee details.
Financial Details	Displays the financial details.
Interest Details	Displays the interest details.
Charge Details	Displays the charge details.
Account Limit Details	Displays the account limit details.
Temporary Overdraft Limit Details	Displays the Temporary Overdraft Limit details.
Advance against Uncollected Funds Details	Displays the Advance against Uncollected Funds details.
Initial Funding Details	Displays the initial funding details.
Credit Rating Details	Displays the credit rating details.
Valuation Details	Displays the valuation details.
Legal Opinion	Displays the legal opinion details.
Assessment Summary	Displays the assessment details.
Collateral Perfection Details	Displays the collateral perfection details.
Approval Details	Displays the approval details.

Supervisor can verify the KYC Verification status of the Customer from the Customer 360 in the Header. Only if the KYC Status is 'Success' will the application be allowed to proceed further. Click **Submit** to submit the Account Approval stage and proceed to submit the Account Opening request to Host.

Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified. The Overrides screen is displayed.

Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, the user can go back and correct the data to ensure overrides do not arise.

Click Proceed Next. The Checklist screen is displayed.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

- Select the checkbox to accept the checklist.
- Click Save & Proceed. The Outcome screen is displayed.
- 6. In the Outcome screen, select appropriate option from the Select to Proceed field.
  - Select the Proceed to proceed with the application. By default this option is selected. If the Proceed option is selected, then the application proceeds based on the assessment decision.
  - Select the Return to Application Entry Stage to make application entry stage available in free task for edit.

- Select the Return to Application Enrichment Stage to make enrichment stage available in free task.
- Select the Return to Overdraft Limit Details to make overdraft limit details stage available in free task.
- Select the Return to Initial Funding Details to make account funding details stage available in free task.
- Select the Return to Application Underwriting Stage to make underwriting stage available in free task.
- Select the Reject by Bank to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- 7. Click **Submit**. The **Confirmation** screen is displayed.

On submission of this stage, the Workflow Orchestrator will automatically move this application to the next processing stage, **Account Create on Host** which has been automated. The account will be successfully created in Product Processer, if all the required validation is successful.

In case due to any error the account creation is rejected on Product Processer side, the application moves to the **Manual Retry Stage** 

# 2.15 Manual Retry Stage

This topic describes the information on the various data segments on the Manual Retry stage.

As mentioned earlier, this stage appears in the Free Task only if the Savings Account creation has been rejected by Product Processor and the User has the required access rights for the same.

The Manual Retry Stage comprises of the below data segment:

Manual Retry Data Segment

#### **Manual Retry Data Segment**

Click **Acquire and Edit** in the **Free Tasks** screen for the application for which Manual Retry stage has to be acted upon.

# 2.16 Account Funding

This topic describes the process of initial funding of an account. This stage appears once the account is opened.

In this stage you can initiate fund for an account post account opening. This stage appears if the **Fund Post Account Opening** toggle is selected in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

#### To add funding details:

- Scan the records that appears in the Free Task list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Account Funding stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

Account Funding Details

This topic provides the systematic instructions to add the funding details post opening account is complete.

Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Account Funding stage

## 2.16.1 Account Funding Details

This topic provides the systematic instructions to add the funding details post opening account is complete.

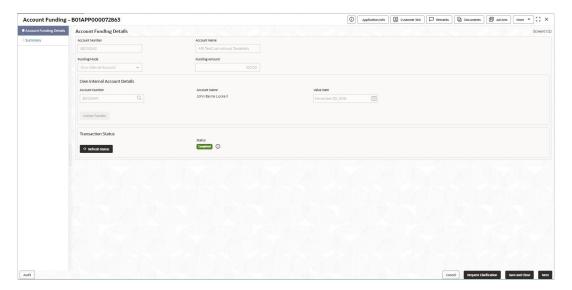

In this data segment you can provide funding details to fund already created account. The Account Number and Account Name appears in the repective fields.

#### To add funding details:

 On acquiring the Account Funding task, the Account Funding Details data segment appears

The **Account Funding Details** screen displays.

Figure 2-65 Account Funding Details

- 2. From the **Funding Mode** list, select the appropriate option. The fields appears based on the selected funding mode.
- 3. Enter the details in the respective fields.

The fields, which mentioned as Required, are mandatory.

Table 2-48 Account Funding Details - Field Description

Field	Description
Account	Displays the generated account number for which the initial funding is credited along with the primary account holder name.
Funding Mode	Specify the funding mode from the drop-down list. The avaliable options are: Own Internal Account Fund Later
Funding Amount	Specify the amount to be debited from the internal account to fund the newly generated account. Cheque Date	Specify the date on which the Cheque is deposited for transfer.  This field appears if the <b>Own Internal Account</b> option is selected from the <b>Funding Mode</b> list.
Value Date	Displays the current date on which the transfer is initiated. This field appears if the <b>Own Internal Account</b> option is selected from the <b>Funding Mode</b> list.
Transaction Status	In this section you can view the status of transaction which is initiated on initiating the fund transfer request.
Status	Displays the fund transfer status of the transaction.  To view more information on the transaction status, click
Rest	Click this button to reset the entered details and reinitiate the fund transfer. This option button appears if the <b>Own Internal Account</b> option is selected from the funding mode list, and only if the transaction fails post initiating the fund transfer request.

4. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message or highlights the mandatory fields for

the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

## 2.16.2 Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Account Funding stage

The Summary displays the tiles for all the data segments in the Account Funding stage. The tiles display the important details captured in the specified data segment.

#### To view the summary of each stage and submit:

1. Click **Next** in **Account Funding Details** screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 2-49 Summary

Data Segment	Description
Account Funding Details	Displays the account funding details.

Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified. The Overrides screen is displayed.

Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, the user can go back and correct the data to make ensure overrides do not arise.

3. Click **Proceed Next**. The **Checklist** screen is displayed.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

- 4. Click Proceed. The Outcome screen is displayed.
- 5. Click **Submit** to submit the application.

On successful submission the above pop-up appears and displays the next stage in which the application has moved. Application Reference Number and the Process Reference Number is also displayed.

## 2.17 Global Actions

This topic provides the detailed on the actions that can be performed in all stages.

This section appears are the top of the right pane and is applicable for all the account opening stage. You can add, edit, view or delete the information from the respective section.

Below are the list of global actions:

Application Info

In this section you can view the application number along with its product name.

Customer 360

In this section you can view the list of customers involved in the application.

Application Details

In this section you can view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.

Remarks

In this section you can view or the post the remarks.

Documents

In this section you can upload the document and also view the already uploaded documents.

Advices

You can view the advices that are shared with customer. Advices are generated post Application Entry stage is submitted.

Condition and Convenants

You capture conditions and convenants details for the loan applications.

Solicitor Details

You can add the solicitor details using this section.

Clarification Details

In this section you can request for clarifications.

## 2.17.1 Application Info

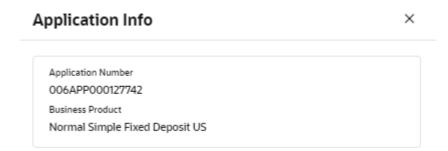

In this section you can view the application number along with its product name.

Click the Application Info button to view the details.

The **Application Info** screen appears with the Application Number and Business Product fields.

Figure 2-67 Application Info

## 2.17.2 Customer 360

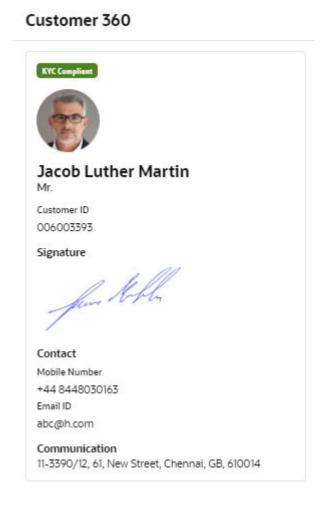

In this section you can view the list of customers involved in the application.

The seperate tiles of all the customers involved in the application appears. You can click on the respective customer tile to view the 360 degress details of that customer.

1. Click **Customer 360** to view the list of customer involved in the application.

The **Customer 360** screen is displayed.

Figure 2-68 Customer 360

The customer title comprises of below details:

- <Applicant Role>
- <KYC Status>
- <Applicant Image>
- <First Name, Middle Name, Last Name>
- <Title>
- Customer ID
- Signature
- Contact
- Communication
- Select the specific Customer ID to view their Mini Customer 360. The CIF Numbers are populated in the Customer 360 screen only post the CIF number has been keyed in the Applicant data segment.

# 2.17.3 Application Details

In this section you can view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.

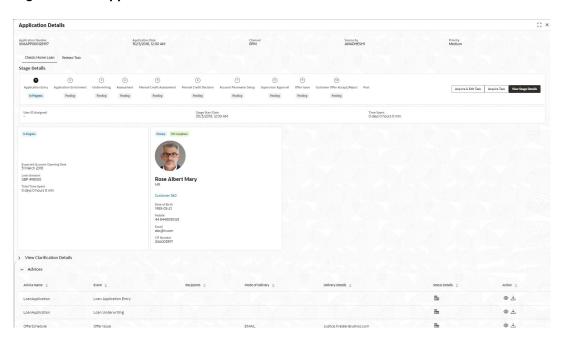

You can also track and launch the respective stage of the application.

#### To view the application details:

Click Application Details to view the application detials.

The Application Details screen is displayed.

Figure 2-69 Application Details

The **Application Details**screen displays separate cards for various products initiated as part of the single application. For more information on fields, refer to the field description table below.

Note:

The fields marked as **Required** are mandatory.

**Table 2-50 Application Details - Field Description** 

Description
Displays the application number.
Displays the date and time on which the application was initiated.
Displays the name of the user who has sourced the application.
Displays the channel name.
Displays the priority of the application.  High  Medium  Low
Displays the product name. In case on multiple product, different tabs appears with the respective product name. You can click the product names to view the respective application details.
In this section, all account opening stages appears with the status name and it's chronological order of the stage in the process.  You can click the number to perform below actions on the appeared stages:  • Acquire & Edit Task: Click this button to acquire and edit the selected stage.  • Acquire TaskClick this button to acquire the selected stage. You can edit it later.  • View Stage Details: Click this button to view the stage details.
Displays the <b>User ID</b> of the user currently working on the product process.
This field appears blank, in case the product process task is not acquired by any user.
Displays the start date of the current stage. It also display time in hours, mins and seconds.
Displays the days, hours and mins spent on the current selected stage.

Table 2-50 (Cont.) Application Details – Field Description

	Below actions are perfrom on the uploaded document You can preview already uploaded document. You can download already uploaded document.
Actions	You can perfrom below actions on the added record:
	Click  to save the record.
	Click to delete the record.

6. Once the details are updated, click Save. Clarification Request once raised moves the application to 'Awaiting Customer Clarification' state. The application continues to be assigned to the user who had raised the request. All the applications for which the specified user has requested clarification can be viewed and actioned from the Awaiting Customer Clarification sub-menu available under Task menu.

Select the Application from the **Awaiting Customer Clarification** sub-menu available under the **Task** menu. Click on the **Clarification Details** from the header.

7. Select the specific clarification to take action on it.

Allowed actions are as following:

- Adding New Conversation
- Withdraw Clarification
- Accept Clarification

Once the Clarification is either withdrawn or accepted, the application moves back to the **My Task** sub-menu available under **Task** menu, post which the user can edit the application and submit the specified stage. Clarification once raised and actioned are available throughout the application processing by the other users working on the other stages of the application by clicking on **Clarification Details** from the header.

# Simplified Application

This topic describes the concept and process of single stage application.

### What is Simplified Application?

The Simplified Application is introduced to open an account in a smooth single process culminating the long account opening process. In this process the user can directly create and application and update details with multiple data segmenst in a single view.

### How to configure Simplified Application for a product?

To enable a simplified account opening process, select the **Simplified Application** flag in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

Once the product is configured for simplified application, the user can configure the business process such as stages, data segments, document checklist and so on, in the **Business Process Configuration** screen.

### How to process the simplified application?

After configuring the product and process, the user can initiate a single-stage application by navigating the menu. Below is the detailed process for opening an account using a simplified application.

### To open an account using simplified application process:

- 1. From the Menu, select the Retail Origination. The Retail Origination menu appears.
- From the Retail Origination, select the New Application. The New Application page appears with list of product types which are configured.
- Select the appropriate product and click Apply.
   The Application Entry stage appears. The data segments in this stage appears based on the business process configuration.
  - Applicant: In this data segment user can capture applicant details such as basic, address, signature, employment, identification. Mutiple applicants are allowed with different roles. Refer Applicant data segment from the Application Entry stage of this guide.
  - Account Details: In this data segment user can capture the product details to configure the account. Refer Account Details data segment from the Application Entry stage of this guide.
  - Nominee Details: In this data segment user can capture the nominee details. Refer the Nominee Details data segment from the Application Entry stage of this guide.
  - Interest and Charges: In this data segment user can view the interest and charges that are applicable. Refer the Interest and Charges data segment from the Application Entry stage of this guide.
  - **Term and Conditions**: In this data segment user can capture the term, conditions and consents of the customer. Refer the **Term and Conditions** data segment from the **Application Entry** stage of this guide.

- Review: In this data segment user can review all the details that are captured on clicking on each data segment tile.
- **4.** On submitting the Application Entry stage, next stage is triggered based on the business process configuration.
- 5. After completing the Know Your Customer (KYC) process, the account number is generated and application proceed to approval stage. The Account Approval stage is generated. All the data segments of the Application Entry stage appears. The user can only view those stages. The Approval Details data segment is enabled to capture account approval status. For more information refer the Approval Details data segment of the Account Approval stage in this guide.
  - If the Rejected option is selected in the Approval Details data segment then this
    application is terminated.
  - If the Approved option is selected in the Approval Details data segment then the application's payload are proceed for account creation.
- 6. An account is created on approving the application in the Account Approval stage.
- Below tasks are aslo generated in this process:
  - If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.
  - If the business process is configured to include Account Funding, then the Account Funding stage is generated after account creation.

4

### **Instant Savings Account Origination Process**

This topic describes the information about Instant Savings Account Origination Process.

Additional Instant Business Process is available wherein various stages in the Reference Flow for Savings Account have been automated.

This allows Instantaneous Account origination from Self-Service Channel such as Oracle Banking Digital Experience for existing Customer who are KYC Compliant and New Customers for whom KYC is completed in Oracle Banking Digital Experience. KYC Type supported for the STP is Identification and Address only and the same has to be configured in Oracle Banking Party Module.

Refer the Retail Onboarding User Guide for more details.

Based on whether the Application is initiated by self-service channel or by a Branch personnel the automatic submission of the stages or skipping of the stages are done by the system.

This process is not applicable for Small and Medium Business customers.

### Prerequisite:

- For the automatic submission to work, it is expected that document and checklist are not configured in any of the stages.
- Initial Funding is either not taken for the Account or taken as Account Transfer for which
  the mode configured has to be H which represents that the selected Account will be
  debited by the Host as part of the Account Opening Process (Allowed for both Self-Service
  Channel and Branch Initiated Applications) or Initial Funding is taken via External Bank
  Account Transfer on self-service channel (This mode is not allowed for Branch Initiated
  Applications).

For more details, refer to **Initial Funding Configuration** topic in the **Configurations User Guide**.

In the Instant Savings Account Origination Reference Business Process, the stages that are configured are mentioned below.

 Application Entry Stage: On successful submission of the Savings Account Application from self-service channel, the system starts the Application Entry stage without any manual intervention and completes the data segment level validation. On successful completion of the validation, the system automatically submits the Application Entry stage.

Similarly, for the Branch initiated Application also this stage is automatically submitted, if the data segment configured for Application Entry stage are updated in the **Application** 

**Initiate** stage itself by clicking the **Application** button in the **Product Details** data segment.

- Account Funding Stage: On successful submission of the Application Entry stage, system checks if Initial Funding is updated for the Account Opening or not.
  - The initial funding mode allowed for self-service initiated applications are External Bank Account Transfer and Account Transfer.
  - If the Initial Funding has been taken for the Account via the External Bank Account
    Transfer in the self-service channel, the system starts the Application Funding Stage
    and validates the Initial Funding Details data segment and submits the Application
    Funding Stage automatically.
  - For Application where the **Initial Funding** is updated as Account Transfer or where no funding has been taken for the Account, this stage is skipped completely by the system for Application initiated from Self-Service Channel and Branch Initiated Applications.
  - For the Branch Initiated Applications wherein the Initial Funding has been taken in Cash or Other Bank Check, this stage has to be manually actioned by the Branch User having access permission for this stage.
- Application Approval Stage: System skips this stage for self-service initiated application
  and submits the application directly to the Product Processor for Account Creation.
  However, for Branch initiated Application considering the 4-eye principle, system expects
  the application to be approved by a Supervisor. Hence this stage, will have to be picked
  and actioned by the Supervisor User. Supervisor User can either approve or reject the
  Application. On submission of this stage by selecting Approve outcome, system submits
  the Application to the Product Processor for Account Creation.
- Handoff Retry: Application moves to this stage and appears in the Free Task only if the Savings Account creation has been rejected by Product Processor. The user having the required access rights can pick such task and can retry submission to Host after taking required actions on the Failure reason.

# Error Codes and Messages

This topic describes the error codes and messages.
