## Overview

This topic describes the information on the various features of the current account origination process.

### Product Introduction

Oracle Banking Origination is the middle office banking solution with a comprehensive coverage of account opening processes of the below product for both Individual as well as Small and Medium Business type of customers:

- Saving Account
- Current Account
- Term Deposit Account
- Credit Card Account
- Retail Loans Account

It is a Host-Agnostic solution

It enables banks to deliver the improved user experience for various bank persons such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/Managers, Loan Officers, and Credit Officers and more, handling defined functions in the lifecycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business-driven, is hosted and architected by our new platform solution. The random access navigation between data segments within a given stage are with appropriate validations helps to enable the business user to capture apt information anytime during the account open process before created account in the Host. The new workflow supports capturing relevant documents, stage-wise, and the generation of advice and notifications dynamically.

The account opening request is initiated by authorized branch user or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services. These services are available on digital devices like tablets or mobiles. The account opening request can be initiated for both both new and existing customer types. Also, the system supports the processing of the account opening request from the customer directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST-based service APIs.

This user guide explains the workflow for the Current Account Origination process and further details the data that needs to capture in the data segment linked to the specific stages.

## Initiating Current Account Opening Process

This topic describes the information on the defined stages through which the Current Account Application has to flow before it is ready to be sent to the Host for Account Creation.

As detailed in the **Operations User Guide**, the account opening applications of all product are initiated in the application initiation stage from the Product Catalogue. The Cart Operation in Product Catalogue allows to originate, Single or Multiple Product initiation. Once the current account product origination process is initiated either by a single product origination or multiple product selection, the process orchestrator generates the current account process reference number on submit of application initiation stage. The process orchestrator updates the record in the free task process for the 'Application Entry' stage and is referred to as task from the orchestrator perspective.

**To acquire and edit respective stage:**

1. From **Home** screen, click **Tasks**. Under **Tasks**, click **Free Tasks**. The **Free Tasks** screen is displayed.

access rights will be able to acquire and proceed with the next processing stage of the application.

#### Application De-Dupe:

Based on the configuration available at the Bank level / Properties Table, the Dedupe service call can be enabled or disabled for the product Origination.

If application dedupe service is enabled, System will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

#### Note:

- If an application is returned to the Application Entry-stage from any other subsequent stages, Oracle Banking Origination will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case the party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting the Application Entry stage. The user has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.

## 2.7.3 Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Application Assessment stage.

The Summary displays the tiles for all the data segments in the Application Assessment stage. The tiles display the important details captured in the specified data segment.

**To view the captured details:**

1. Click **Next** in **Assessment Details** screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

**Figure 2-49 Summary**

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

**Table 2-33 Summary - Application Assessment – Field Description**

Data Segment	Description
<b>Qualitative Scorecard Details</b>	Displays the qualitative scorecard details.
<b>Assessment Details</b>	Displays the assessment details.

2. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified. The Overrides screen is displayed.

Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. Click **Proceed Next**. The **Checklist** screen is displayed.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

4. Select the checkbox to accept the checklist. Click **Save & Proceed**. The **Outcome** screen is displayed.
5. In the **Outcome** screen, select appropriate option from the **Select to Proceed** field.

- Select the **Proceed** to proceed with the application. By default this option is selected. If the Proceed option is selected, then the application proceeds based on the assessment decision.
  - It will logically complete the **Application Assessment** stage for the saving application if the system recommendation is **Approved**. The Workflow Orchestrator will automatically move this application to the **Account Parameter Setup** stage.
  - If the system recommendation is **Manual** then, the Manual Credit Assessment stage is generated for this saving application.
  - If the system recommendation is **Rejected** then the application is terminated. The stage movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code.
- Select the **Return to Application Entry Stage** to make application entry stage available in free task for edit.
- Select the **Return to Application Enrichment Stage** to make enrichment stage available in free task.
- Select the **Return to Overdraft Limit Details** to make overdraft limit details stage available in free task.
- Select the **Return to Initial Funding Details** to make account funding details stage available in free task.
- Select the **Return to Application Underwriting Stage** to make underwriting stage available in free task.
- Select the **Reject Application** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.

6. Enter the remarks in **Remarks**.

7. Click **Submit**. The **Confirmation** screen is displayed.

On successful submission the above pop-up appears and displays the next stage in which the application has moved. Application Reference Number and the Process Reference Number is also displayed. Click on '**Close**' to close the pop-up screen. Alternatively click on '**Go to FreeTask**' to launch the **Free Task** menu. If you have access to the next stage, you would be able to view the Application number and take action on it.

8. Click **Close** to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers to the Manual Credit Assessment stage. This

application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

## 2.8 Manual Credit Assessment Stage

This topic describes the information on the various data segments to assess the application manually in the Manual Credit Assessment stage.

The Manual Credit Assessment stage of the Current Account (with overdraft) opening process workflow will enable the bank to manually assess the application and provide the recommendation for the approval / rejection of the application. As a reference, the relevant completed data segments will be made available to the Approver before the application can be moved to the next stage. These completed data segments are from Underwriting Stage. The data segments are displayed in view only mode for the Credit Officer to analyze.

### To capture manual assessment details:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Manual Assessment** stage is displayed.

The Manual Assessment stage has the following data segments in which the user can only view the data:

- **Credit Rating Details**: - For detailed information, refer the Credit Rating Details data segment in the Underwriting stage.
- **Legal Opinion** - For detailed information, refer the Legal Opinion data segment in the Underwriting stage.
- **Valuation Details** - For detailed information, refer the Valuation Details data segment in the Underwriting stage.

Refer below chapters for detailed information on data segment that are editable.

## Simplified Application

This topic describes the concept and process of single stage application.

### What is Simplified Application?

The Simplified Application is introduced to open an account in a smooth single process culminating the long account opening process. In this process the user can directly create and application and update details with multiple data segments in a single view.

### How to configure Simplified Application for a product?

To enable a simplified account opening process, select the **Simplified Application** flag in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

Once the product is configured for simplified application, the user can configure the business process such as stages, data segments, document checklist and so on, in the **Business Process Configuration** screen.

### How to process the simplified application?

After configuring the product and process, the user can initiate a single-stage application by navigating the menu. Below is the detailed process for opening an account using a simplified application.

#### To open an account using simplified application process:

1. From the **Menu**, select the **Retail Origination**. The Retail Origination menu appears.
2. From the **Retail Origination**, select the **New Application**. The New Application page appears with list of product types which are configured.
3. Select the appropriate product and click **Apply**.  
The Application Entry stage appears. The data segments in this stage appears based on the business process configuration.
  - **Applicant** : In this data segment user can capture applicant details such as basic, address, signature, employment, identification. Multiple applicants are allowed with different roles. Refer **Applicant** data segment from the **Application Entry** stage of this guide.
  - **Account Details**: In this data segment user can capture the product details to configure the account. Refer **Account Details** data segment from the **Application Entry** stage of this guide.
  - **Nominee Details**: In this data segment user can capture the nominee details. Refer the **Nominee Details** data segment from the **Application Entry** stage of this guide.
  - **Interest and Charges**: In this data segment user can view the interest and charges that are applicable. Refer the **Interest and Charges** data segment from the **Application Entry** stage of this guide.
  - **Term and Conditions**: In this data segment user can capture the term, conditions and consents of the customer. Refer the **Term and Conditions** data segment from the **Application Entry** stage of this guide.

- 
- **Review:** In this data segment user can review all the details that are captured on clicking on each data segment tile.
4. On submitting the Application Entry stage, next stage is triggered based on the business process configuration.
  5. After completing the Know Your Customer (KYC) process, the account number is generated and application proceed to approval stage. The Account Approval stage is generated. All the data segments of the Application Entry stage appears. The user can only view those stages. The Approval Details data segment is enabled to capture account approval status. For more information refer the **Approval Details** data segment of the **Account Approval** stage in this guide.
    - If the Rejected option is selected in the Approval Details data segment then this application is terminated.
    - If the Approved option is selected in the Approval Details data segment then the application's payload are proceed for account creation.
  6. An account is created on approving the application in the **Account Approval** stage.
  7. Below tasks are aslo generated in this process:
    - If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.
    - If the business process is configured to include Account Funding, then the **Account Funding** stage is generated after account creation.

## Instant Current Account Origination Process

This topic describes the information about Instant Current Account Origination Process.

Additional Instant Business Process is available wherein various stages in the Reference Flow for Current Account have been automated.

This allows Instantaneous Account origination from Self-Service Channel such as Oracle Banking Digital Experience for existing Customer who are KYC Compliant and New Customers for whom KYC is completed in Oracle Banking Digital Experience. KYC Type supported for the STP is Identification and Address only and the same has to be configured in Oracle Banking Party Module.

### Note:

Refer the **Retail Onboarding User Guide** for more details.

Based on whether the Application has been initiated by self-service channel or by a Branch personnel the automatic submission of the stages or skipping of the stages are done by the system.

This process is not applicable for Small and Medium Business customers.

### Prerequisite:

- For the automatic submission to work, it is expected that document and checklist are not configured in any of the stages.
- Initial Funding is either not taken for the Account or taken as Account Transfer for which the mode configured has to be 'H' which represents that the selected Account will be debited by the Host as part of the Account Opening Process (Allowed for both Self-Service Channel and Branch Initiated Applications) or Initial Funding is taken via External Bank Account Transfer on self-service channel (This mode is not allowed for Branch Initiated Applications). For more details refer **Initial Funding Configuration** in the **Configurations User Guide**.

In the Instant Current Account Origination Reference Business Process, the stages that have been configured are mentioned below.

- **Application Entry Stage:** On successful submission of the Current Account Application from self-service channel, the system starts the Application Entry stage without any manual intervention and completes the Data Segment level validation. On successful completion of the validation, the system automatically submits the Application Entry Stage. Similarly, for the Branch initiated Application also this stage is automatically submitted, if the data segment configured for Application Entry stage are updated in the Application Initiate Stage itself by clicking the 'Application' button in the Product Details Data Segment.
- **Account Funding Stage:** On successful submission of the Application Entry Stage, system checks if Initial Funding has been updated for the Account Opening or not.
  - The initial funding mode allowed for self-service initiated applications are External Bank Account Transfer and Account Transfer.

- 
- In case Initial Funding has been taken for the Account via the External Bank Account Transfer in the self-service channel, system starts the Application Funding Stage and validates the Initial Funding Details Data Segment and submits the Application Funding Stage automatically.
  - For Application where the Initial Funding is updated as Account Transfer or where no funding has been taken for the Account, this stage is skipped completely by the system for Application initiated from Self-Service Channel and Branch Initiated Applications.
  - For the Branch Initiated Applications wherein the Initial Funding has been taken in Cash or Other Bank Cheque, this stage has to be manually actioned by the Branch User having access permission for this stage.
  - **Account Approval Stage:** System skips this stage for self-service initiated application and submits the application directly to the Product Processor for Account Creation. However, for Branch initiated Application considering the 4-eye principle, system expects the application to be approved by a Supervisor. Hence this stage, will have to be picked and actioned by the Supervisor User. Supervisor User can either approve or reject the Application. On submission of this stage by selecting 'approve' outcome, system submits the Application to the Product Processor for Account Creation.
  - **Handoff Retry:** Application moves to this stage and appears in the Free Task only if the Current Account creation has been rejected by Product Processor. User having the required access rights can pick such task and can retry submission to Host after taking required actions on the Failure reason.
