Purpose

Welcome to the **Savings Account Origination** user guide for Oracle Banking Origination. This document provides an overview of the Savings Account Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a Savings Account Origination.

Audience

This guide provides instructions and information about the Saving Account product to help various bank users to deliver quick and efficient service to both customer and prospects.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners,

we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Basic Actions

Table 3 Basic Actions

Actions	Functions
Request Clarification	Used to raise a new clarification request. The system allows placing a request for clarification that is needed from the Customer to proceed ahead with the application. The clarification can be for any additional details, confirming specific information, the requirement for any additional document, and so on, from the customer. For more information on Request Clarification, refer to the section Request Clarification.
Back	Used to navigate to the previous data segment within a stage.
Next	Used to navigate to the next data segment, after successfully capturing the data. The system validates all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. Users will not be able to proceed to the next data segment, without capturing the mandatory data.
Save & Close	Used to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.

Table 3 (Cont.) Basic Actions

Actions	Functions
Cancel	Used to close the application without saving. This task appears in Free Task, once the transaction is canceled.

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1

Overview

This topic describes the information on the various features of the Savings Account Origination module.

Oracle Banking Origination is the middle office banking solution with a comprehensive coverage of Retail Banking Origination processes for Savings Account, Current Account, Term Deposit, Credit Cards and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan for Individual customers, and Term Loan and Business Loan for Small and Medium Business customers.

- Saving Account
- Current Account
- Term Deposit Account
- Credit Card Account
- Retail Loans Account

It is a Host-Agnostic solution.

It enables banks to deliver improved user experience for various bank personas such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/Managers, Loan Officers, and Credit Officers and so on, handling defined functions in the lifecycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architected by our new platform solution. The random access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the account open process before the Savings Account is created in the Host. The new workflow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

The initiation request for a Savings Account can be originated by authorized branch users or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services made available on digital devices like tablets or mobiles. The initiation of Savings Account request can be made for both new and existing customer types. Also, the system supports processing of the savings account request from the customer which are directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST based service APIs.

Note:

Refer to the detailed setup and operation workflows for both asset and liability products initiation made available in the **Operations User Guide**.

2

Savings Account Origination

This topic describes the information on the defined stages through which the Savings Account Application has to flow before it is ready to be sent to the Host for Account Creation.

As detailed in the **Operations User Guide**, all the Product Originations are initiated in the **Application Initiation** stage from the Product Catalogue. The Cart Operation in Product Catalogue allows to originate single or multiple Product initiation. Once the Savings Account Product origination process is initiated either as a single product origination or as part of the multiple product selection, Process Orchestrator generates the Savings Account Process Reference Number on submit of the **Application Initiation** stage. Process Orchestrator also updates the record in the **Free Task** process for the **Application Entry** stage also referred as Task from orchestrator perspective.

The Savings Account Origination Process flow comprises of the following stages and the detailed information of the same is available in the following topics:

- [Application Entry Stage](#)
This topic describes the information on the various data segments to capture the required data in the Application Entry stage.
- [Debit Assessment](#)
The topic describes the debit assessment process.
- [Manual Debit Assessment](#)
The topic describes the manual debit assessment process.
- [Application Enrichment Stage](#)
This topic describes the information on the various data segments to view and update the required data for the Application Enrichment stage.
- [Account Funding Stage](#)
This topic describes the process of initial funding of an account. In this stage user can provide initial funding details before opening an account.
- [Account Approval Stage](#)
This topic describes the information on the various data segments to view the captured details and approve the application in the Account Approval stage
- [Account Funding](#)
This topic describes the process of initial funding of an account. This stage appears once the account is opened.
- [Global Actions](#)
This topic provides the detailed on the actions that can be performed in all stages.

2.1 Application Entry Stage

This topic describes the information on the various data segments to capture the required data in the Application Entry stage.

Process Orchestrator updates the record in the **Free Task** process for the **Application Entry** stage also referred as Task from orchestrator perspective. The user can **Acquire and Edit** or **Acquire** the task from the **Action** column and the header respectively as per requirement.

The **Application Entry** stage will be automatically submitted, in case the Bank level configuration for allowing full Application submission is set as **Yes** and the user has updated all the data segment of **Application Entry** stage as part of the **Application Initiation** stage itself by clicking on the **Application** button available in the **Product Details** data segment.

After successful submission of **Application Entry** stage, a request for the initial funding transaction is sent to **Teller Module**, if **Fund By** option is selected as **Cash**. The status of the **Teller Transaction** is then validated in the **Initial Funding Details** data segment of **Account Funding** stage.

The **Application Entry** stage has the following reference data segments:

- [Applicant](#)
This topic provides the systematic instructions to capture the customer-related information for the application.
- [Account Details](#)
This topic provides the systematic instructions to view and modify the account details.
- [Stake Holder Details](#)
This topic provides the systematic instructions to capture the stake holder details related information for the business.
- [BeneficiaryDetails](#)
This topic provides the systematic instructions to capture the details of the nominee for the account.
- [Terms and Conditions](#)
This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.
- [Summary](#)
This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

2.1.1 Applicant

This topic provides the systematic instructions to capture the customer-related information for the application.

The details captured of the customer in the Application Initiate stage appears in this data segment. The user can update further fields for supplementing the customer related information.

- [For Individual Customer Type](#)
The topic describes the process to capture or edit customer information of Individual type of customer.
- [For Small and Medium Business \(SMB\) Customer Type](#)
The topic describes the process to capture or edit customer information of Small and Medium Business type of customers.

2.1.1.1 For Individual Customer Type

The topic describes the process to capture or edit customer information of Individual type of customer.

To capture applicants details:

1. In the Saving Application Entry stage, update the customer details in the Applicants data segment based on the respective customer type.

The **Applicant - Individual** screen displays.

Contact Details	In this section you can provide digital contact details.
<Communication Mode>	<p>Select the communication mode from the drop-down list. The available options are:</p> <ul style="list-style-type: none"> Mobile Phone Email

Table 2-8 (Cont.) Details - Field Description

Field	Description
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list. The drop-down list option consist of countrycode, country name and subscriber dialing code. This field appears only if you select the Mobile Phone option as communication mode.
Mobile Number	Specify the mobile number.
Preferred	Select to indicate if the given mobile number is the preferred number.
Action	You can edit or delete the added mobile details.
Email Id	Specify the email ID. This field appears only if you select the Email option as communication mode.
Preferred	Select to indicate if the given email ID is the preferred ID.
Action	You can edit or delete the added email details.
Add Beneficiary	Click to add additional nominee for the account.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

Guardian Details

This screen allows to capture details of the guardian of the minor nominee.

To add guardian details:

- Click **Add Guardian Details** on Nominee Details screen.
The **Guardian Details** screen is displayed

Figure 2-11 Guardian Details

- Specify the details in the relevant data fields.
Refer the **Beneficiary Details**field description table for detailed information on each field.
- Click **Save** to save the guardian details

2.1.5 Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.

In this data segment user can capture term and conditions consents from the applicants. The customer consents are same across products but few term and conditions defer based on the applied products. They appears in questionnaire format based on the configurations. This questionnaire is mapped at product configuration level. It is mandatory to accept all term and condition to proceed with application.

This data segment comprises of below sections:

- **Term and Conditions for all products** - In this section the term and conditions which are applicable for all the products appears in the questionnaire format.
- **Term and Conditions for <Selected Product>** - In this section the term and conditions which are applicable for all the selected product appears in the questionnaire format.
- **Consents and Preferences** - In this section the user capture the consents and preferences of customer as E-Sign, Marketing Communications, and Privacy Information.

To capture terms and conditions:

1. Click **Next** from pervious data segment to proceed with the next data segment, after successfully capturing the data.

The **Term and Conditions** screen appears

Figure 2-12 Term and Conditions

2. Click  to view the term and conditions.
3. Select the toggle button to accept the term and conditions.
4. In the **Consents to receive Marketing Promotional and Sales** section, enter the channel and details.
5. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are

not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.1.6 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

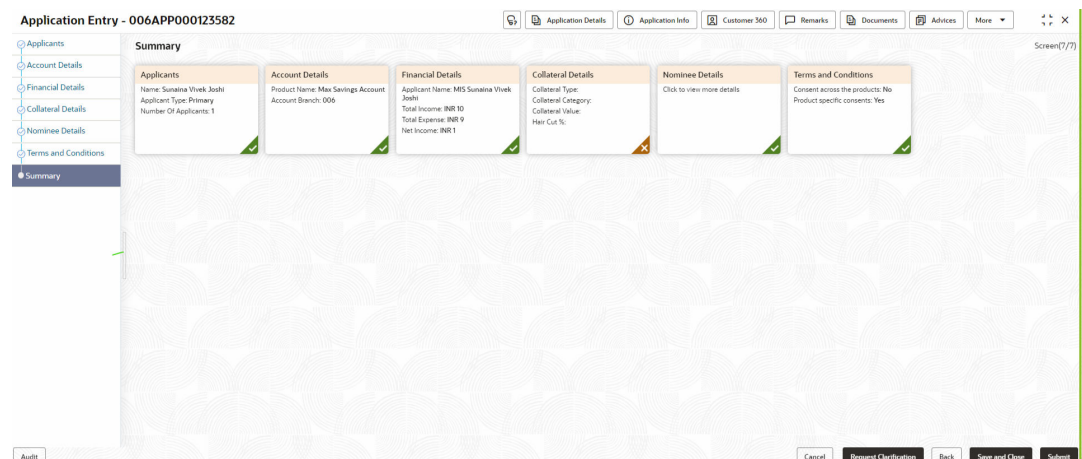

The Summary displays the tiles for all the data segments in the Application Entry stage. The tiles display the important details captured in the specified data segment.

To view the summary of all data segment

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-13 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on summary tiles, refer to the field description table below.

Table 2-9 Summary - Application Entry – Field Description

Data Segment	Description
Applicants	Displays the applicants details
Account Details	Displays the account details.
Stake Holder Details	Displays the Stake Holder details This data segment appears only if the Customer Type is selected as Small and Medium Business (SMB) .
Financial Details	Displays the financial details.
Collateral Details	Displays the collateral details.
Beneficiary Details	Displays the beneficiary details.
Term and Conditions	Displays the term and conditions.

2. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage are verified. The **Overrides** screen is displayed.
3. In the **Override** screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click **Accept Overrides& Proceed** to proceed.
OR
Click **Proceed**. The Checklist screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed. The **Outcome** screen appears.
5. In the **Outcome** screen, select appropriate option from the **Select to Proceed** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Entry** stage for the saving application. The Workflow Orchestrator will automatically move this application to the next processing stage, **SavingApplication Enrichment**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers [Saving Account] to the Application Enrichment stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

Application De-Dupe:

Based on the configuration available at the Bank level / Properties Table, the Dedupe service call can be enabled or disabled for the product Origination.

If application dedupe service is enabled, System will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

 **Note:**

- If an application is returned to the Application Entry-stage from any other subsequent stages, Oracle Banking Origination will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case the party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting the Application Entry stage. The user has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.
- Unique process reference numbers will be generated and made available in the Free Task grid for the respective Customer Onboarding, Collateral Onboarding requests, which need to be picked up by the concerned users in the Oracle Banking Party / Oracle Banking Credit Facilities Process Management modules.

2.2 Debit Assessment

The topic describes the debit assessment process.

In the process of account opening of saving product this stage appears if the Know Your Customer (KYC) is not completed for the applicants involved in the applications.

This stage appears in following conditions:

- The applicant is new.
- Existing customer but the KYC stage is not completed.
- Existing customer but the KYC stage is Referred.

To open Debit Assessment task:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Debit Assessment** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Bureau Information](#)
This topic describes the bureau information details.
- [Summary](#)
This topic describes summary of all the data segment.

2.2.1 Bureau Information

This topic describes the bureau information details.

In this data segment user can view the bureau information of application and status of all the applicants that are involved in the application.

1. On acquiring the Manual Debit Assessment task, the Bureau Information data segment appears and call to bureau service is initiated for display the bureau information related to application and applicants.

The **Bureau Information** screen appears.

Figure 2-14 Bureau Information

2.5 Account Funding Stage

This topic describes the process of initial funding of an account. In this stage user can provide initial funding details before opening an account.

In this stage user can provide initial funding details before opening an account.

This stage appears only if the **Fund Post Account Opening** toggle is not selected in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

To add funding details:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Account Funding** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Initial Funding Details](#)
This topic provides the systematic instructions to view and modify the initial funding details captured in the **Application Entry** stage.
- [Summary](#)
This topic provides the systematic instructions to view the tiles for all the data segments in the Account Funding stage.

2.5.1 Initial Funding Details

This topic provides the systematic instructions to view and modify the initial funding details captured in the **Application Entry** stage.

The Initial Funding Details data segment displays the Initial Funding details captured in the Application Entry stage. The **Transaction Reference Number** and the **Transaction Status** is either auto-populated or has to be manually captured based on the configuration. Automatic option is supported only for the Initial Funding with Cash mode. Manual process is supported for Account Transfer, Other Bank Cheque, and Cash mode of initial funding.

Note:

For more details on the Modes and the Manual/Automatic Process configuration, refer to the **Configurations User Guide**.

To add initial funding details:

1. On acquiring the **Account Funding** task, the **Initial Funding Details** data segment appears.

The **Initial Funding Details** screen displays.

Figure 2-21 Initial Funding Details

2. Specify the fields on **Initial Funding Details** screen.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-17 Initial Funding Details – Field Description

Field	Description
Fund the Account	Displays the Fund the Account selected in the Account Details Data Segment in Application Entry stage.
Fund By	Displays the Fund by option selected in the Account Details Data Segment in Application Entry stage.
Amount	Displays the amount of the initial funding updated in the Account Details data segment in Application Entry stage.
Value Date	Displays the value date of the initial funding updated in the Account Details data segment in Application Entry stage.
Account Number	Displays the account number for the initial funding transaction which was selected in the Account Details data segment of the Application Entry stage This field appears only if the Fund By is selected as Account Transfer .
Account Name	Displays the account name for the selected account number. This field appears only if the Fund By is selected as Account Transfer
Cheque Number	Display the cheque number.
Cheque Date	Displays the cheque date.
Bank Name	Displays the bank name. This field is applicable only if the Fund By is selected as Other Bank Cheque .

Table 2-17 (Cont.) Initial Funding Details – Field Description

Field	Description
Branch Name	Displays the Branch name. This field is applicable only if the Fund By is selected as Other Bank Cheque .
Cheque Routing Number	Displays the cheque routing number. This field is applicable only if the Fund By is selected as Other Bank Cheque .
GL Account Number	Displays the GL account number for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.
GL Account Description	Displays the GL account description for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.
Transaction Reference Number	Displays the transaction reference number for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.
Teller Transaction Status	Select the status of the transaction if the Fund By option is selected as Cash . The available options are: <ul style="list-style-type: none"> • In Progress • Pending • Success Displays the status of the transaction if the Fund By option is selected other than Cash . The status of the teller transaction should be Success for the submission of the Account Funding stage.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.5.2 Summary

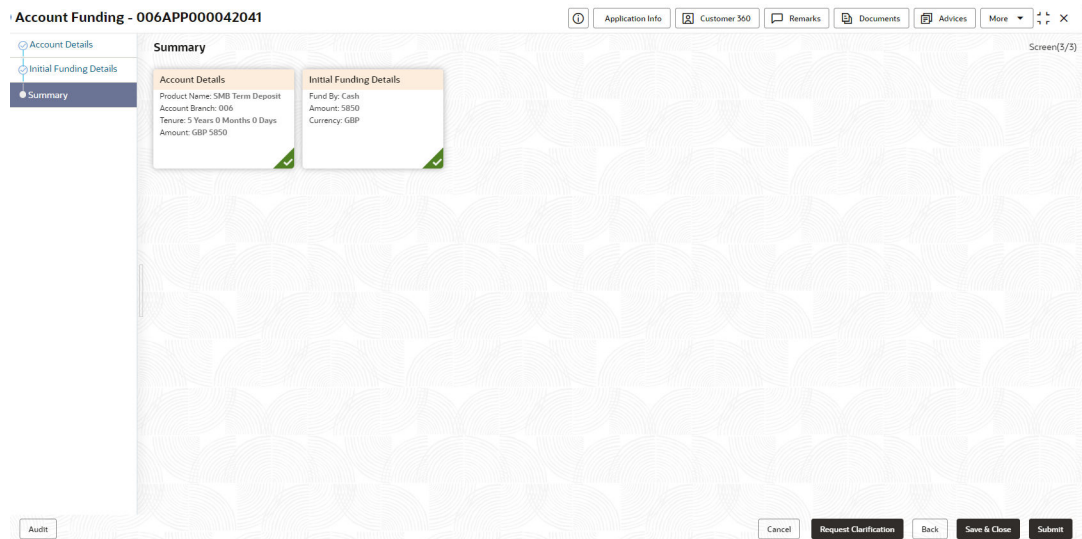

This topic provides the systematic instructions to view the tiles for all the data segments in the Account Funding stage.

The Summary displays the tiles for all the data segments in the Account Funding stage. The tiles display the important details captured in the specified data segment.

1. Click **Next** in **Initial Funding Details** screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-22 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 2-18 Summary - Account Funding – Field Description

Data Segment	Description
Account Details	Displays the account details.
Initial Funding Details	Displays the initial funding details.

2. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified. The **Overrides** screen is displayed.
 Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, the user can go back and correct the data to make ensure overrides do not arise.
3. Click **Proceed Next**. The **Checklist** screen is displayed.
 Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.
4. Select the checkbox to accept the checklist. Click **Save & Proceed**. The **Outcome** screen is displayed.
5. In the **Outcome** screen, select appropriate option from the **Select to Proceed** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Account Funding Stage** for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **Underwriting**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - Select the **Return to Application Entry** to return to application entry stage. The system generates the Application Entry task that appears in **Free Task** to acquire and edit.

- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit**. The **Confirmation** screen is displayed.
On successful submission the above pop-up appears and displays the next stage in which the application has moved. Application Reference Number and the Process Reference Number is also displayed.
 7. Click **Close** to close the window.
OR
Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Saving Account] to the Underwriting on Host stage. This application is available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application. The following notification will be sent to the user, if application is initiated from assisted channel, and to the Oracle Banking Digital Experience customer, if application is initiated from self-service.

2.6 Account Approval Stage

This topic describes the information on the various data segments to view the captured details and approve the application in the Account Approval stage

To approve an account opening:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Account Approval stage is displayed.

The Account Approval stage has the following data segments which user can only view:

- **Applicants** – For detailed information, refer the Customer Information data segment in the Application Entry stage.
- **Account Details** - For detailed information, refer the Account Details data segment in the Application Entry stage.
- **Mandate Details** – For detailed information, refer the Mandate Details data segment in the Application Entry stage.
- **Beneficiary Details** – For detailed information, refer the Beneficiary Details data segment in the Application Entry stage.
- **Stake Holder Details** – For detailed information, refer the Stake Holder Details data segment in the Application Entry stage.
- **Terms and Conditions** – For detailed information, refer the Terms and Conditions data segment in the Application Entry stage.
- **Interest Details**: For details information, refer the Interest Details data segment in the Application Enrichment stage.
- **Charge Details**: For details information, refer the Charge Details data segment in the Application Enrichment stage.
- **Initial Funding Details**: For details information, refer the Initial Funding Details data segment in the Account Funding stage.

Refer below chapters for detailed information on data segment that are editable.

- [Collateral Perfection Details](#)

This topic provides the systematic instructions to view the tiles for all the data segments of the Savings Account Origination Process.

2.6.1 Collateral Perfection Details

This topic provides the systematic instructions to view the collateral perfection details.

Collateral Perfection Details is the first data segment of Account Approval stage.

1. Click **Next** in the **Assessment Summary** screen for the application for which Account Approval stage has to be acted upon.

If the **Customer Type** is selected as **Individuals**,

The **Collateral Perfection Details** screen displays.

Figure 2-23 Collateral Perfection Details

The screenshot displays the 'Collateral Perfection Details' screen within the Oracle Account Approval system. The interface includes a navigation menu on the left with options like Customer Information, Account Details, Mandate Details, Nominee Details, Financial Details, Terms and Conditions, Interest Details, Charge Details, Account Limit Details, Temporary OD Limit De, Advance Against Uncoll, Initial Funding Details, Valuation Details, Legal Opinion, Assessment Summary, Collateral Perfection De, Approval Details, and Summary. The main content area shows a form with the following fields and values:

Collateral Description	Collateral Type	Collateral Category	Collateral Value	Owners
test collateral	Property	Residential Property	GBP 20000	MR AutoFNN AutoMNN AutoLNN

Below this table, there are several input fields:

- Collateral ID: OFLOCOL000015000
- Collateral Description: test collateral
- Liability ID: 006007061
- Liability Description: Liability for AutoFNN AutoMNN AutoLNN
- Registration Authority: J0hn
- Registration Request Date: July 21, 2020
- Registration Date: July 11, 2020
- Confirmation Date: July 10, 2023
- Registration Status: Inprogress
- Registration Reference Number: 34235435435

At the bottom of the screen, there are buttons for 'Cancel', 'Request Clarification', 'Back', 'Save & Close', and 'Next'.

2. Specify the fields on **Collateral Perfection Details** screen.
For more information on fields, refer to the field description table.

Table 2-19 Collateral Perfection Details – Field Description

Field	Description
Applicant Name	Displays the applicant name.
Date of Birth	Displays the applicant's date of birth.
E-mail	Displays the e-mail id of the applicant.
Mobile	Displays the mobile number of the applicant.
Collateral ID	Displays the Collateral ID.
Collateral Description	Displays the description of the collateral.
Liability ID	Displays the Liability ID
Liability Description	Displays the Liability description.

Table 2-19 (Cont.) Collateral Perfection Details – Field Description

Field	Description
Registration Authority	Specify the name of the registration authority.
Registration Request Date	Select the date when the registration is requested.
Registration Date	Select the date when the registration is completed.
Confirmation Date	Select the date when the registration is confirmed.
Registration Status	Specify the status of registration.
Registration Reference Number	Specify the registration reference number.

 **Note:**

All the fields will be fetched from Oracle Banking Credit Facilities Process Management in read only mode if integrated with Oracle Banking Credit Facilities Process Management.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.6.2 Approval Details

This topic provides the systematic instructions to view and approve the application.

1. Click **Next** in previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Approval Details** screen displays.

Figure 2-24 Approval Details

2. Specify the details in the relevant data fields.

 **Note:**

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-20 Approval Details - Field Description

Field	Description
Applicant Name	Displays the applicant name.
Account Type	Displays the account type.
Account Branch	Displays the account branch.
Product Code	Displays the product code.
Product Name	Displays the product name.
Account Currency	Displays the account currency.
Host Product Code	Displays the host product code mapped to the business product.
Host Product Description	Displays the host product description mapped to the business product.

4. Click **Add Document** button to upload the document which supports the clarification request.
5. Specify the details in the relevant data fields while adding documents. For more information on fields, refer to the field description table.

Table 2-29 Upload Document – Field Description

Field	Description
Document Type	Select the document type.
Document Code	Select the document code.
Document Title	Specify the document title.
Document Description	Specify the description for the document.
Remarks	Specify the remarks for the document.
Expiry Date	Select the document expiry date.
Details	Click the details icon to view below details of the documents: <ul style="list-style-type: none"> Uploaded Time: Displays the uploaded date and time of the document in hours and mins. Uploaded By: Displays the user name who uploaded the document . Stage Uploaded: Displays the stage name on which the document is uploaded.

Table 2-29 (Cont.) Upload Document – Field Description

Field	Description
Document	<p>Click</p> <p></p> <p>to select the document from machine to upload.</p> <p>You can remove the uploaded document before saving the record from the Action column. Post saving the record you must delete the record to remove the document.</p> <p>Below actions are perform on the uploaded document</p> <ul style="list-style-type: none"> You can preview already uploaded document. You can download already uploaded document.
Actions	<p>You can perform below actions on the added record:</p> <ul style="list-style-type: none"> Click  to save the record. Click  to delete the record.

6. Once the details are updated, click **Save**. Clarification Request once raised moves the application to 'Awaiting Customer Clarification' state. The application continues to be assigned to the user who had raised the request. All the applications for which the specified user has requested clarification can be viewed and actioned from the **Awaiting Customer Clarification** sub-menu available under **Task** menu.

Select the Application from the **Awaiting Customer Clarification** sub-menu available under the **Task** menu. Click on the **Clarification Details** from the header.

7. Select the specific clarification to take action on it.

Allowed actions are as following:

- Adding New Conversation
- Withdraw Clarification
- Accept Clarification

Once the Clarification is either withdrawn or accepted, the application moves back to the **My Task** sub-menu available under **Task** menu, post which the user can edit the application and submit the specified stage. Clarification once raised and actioned are available throughout the application processing by the other users working on the other stages of the application by clicking on **Clarification Details** from the header.

3

Simplified Application

This topic describes the concept and process of single stage application.

What is Simplified Application?

The Simplified Application is introduced to open an account in a smooth single process culminating the long account opening process. In this process the user can directly create and application and update details with multiple data segments in a single view.

How to configure Simplified Application for a product?

To enable a simplified account opening process, select the **Simplified Application** flag in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

Once the product is configured for simplified application, the user can configure the business process such as stages, data segments, document checklist and so on, in the **Business Process Configuration** screen.

How to process the simplified application?

After configuring the product and process, the user can initiate a single-stage application by navigating the menu. Below is the detailed process for opening an account using a simplified application.

To open an account using simplified application process:

1. From the **Menu**, select the **Retail Origination**. The Retail Origination menu appears.
2. From the **Retail Origination**, select the **New Application**. The New Application page appears with list of product types which are configured.
3. Select the appropriate product and click **Apply**.
The Application Entry stage appears. The data segments in this stage appears based on the business process configuration.
 - **Applicant** : In this data segment user can capture applicant details such as basic, address, signature, employment, identification. Multiple applicants are allowed with different roles. Refer **Applicant** data segment from the **Application Entry** stage of this guide.
 - **Account Details**: In this data segment user can capture the product details to configure the account. Refer **Account Details** data segment from the **Application Entry** stage of this guide.
 - **Nominee Details**: In this data segment user can capture the nominee details. Refer the **Nominee Details** data segment from the **Application Entry** stage of this guide.
 - **Interest and Charges**: In this data segment user can view the interest and charges that are applicable. Refer the **Interest and Charges** data segment from the **Application Entry** stage of this guide.
 - **Term and Conditions**: In this data segment user can capture the term, conditions and consents of the customer. Refer the **Term and Conditions** data segment from the **Application Entry** stage of this guide.

- **Review:** In this data segment user can review all the details that are captured on clicking on each data segment tile.
4. On submitting the Application Entry stage, next stage is triggered based on the business process configuration.
Below are the stages are autogenerated if the Know Your Customer (KYC) process is not successfully completed:
 - **Debit Assessment:** If the applicants involved in a simplified application have not completed the Know Your Customer (KYC) process, then the **Debit Assessment** stage appears in the application process. The user having the required access rights can pick this task and can retry submission after taking required actions on the KYC non-compliance. Refer the **Debit Assessment** stage of this guide.
 - **Manual Debit Assessment:** If the bureau status of any applicant is marked as **Referred** then this stage appears in an account opening process. Refer the **Manual Debit Assessment** stage of this guide.
 5. After completing the Know Your Customer (KYC) process, the account number is generated and application proceed to approval stage. The Account Approval stage is generated. All the data segments of the Application Entry stage appears. The user can only view those stages. The Approval Details data segment is enabled to capture account approval status. For more information refer the **Approval Details** data segment of the **Account Approval** stage in this guide.
 - If the Rejected option is selected in the Approval Details data segment then this application is terminated.
 - If the Approved option is selected in the Approval Details data segment then the application's payload are proceed for account creation.
 6. An account is created on approving the application in the **Account Approval** stage.
 7. Below tasks are aslo generated in this process:
 - If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.
 - If the business process is configured to include Account Funding, then the **Account Funding** stage is generated after account creation.

4

Instant Savings Account Origination Process

This topic describes the information about Instant Savings Account Origination Process.

Additional Instant Business Process is available wherein various stages in the Reference Flow for Savings Account have been automated.

This allows Instantaneous Account origination from Self-Service Channel such as Oracle Banking Digital Experience for existing Customer who are KYC Compliant and New Customers for whom KYC is completed in Oracle Banking Digital Experience. KYC Type supported for the STP is Identification and Address only and the same has to be configured in Oracle Banking Party Module.

Note:

Refer the **Retail Onboarding User Guide** for more details.

Based on whether the Application is initiated by self-service channel or by a Branch personnel the automatic submission of the stages or skipping of the stages are done by the system.

This process is not applicable for Small and Medium Business customers.

Prerequisite:

- For the automatic submission to work, it is expected that document and checklist are not configured in any of the stages.
- Initial Funding is either not taken for the Account or taken as Account Transfer for which the mode configured has to be **H** which represents that the selected Account will be debited by the Host as part of the Account Opening Process (Allowed for both Self-Service Channel and Branch Initiated Applications) or Initial Funding is taken via External Bank Account Transfer on self-service channel (This mode is not allowed for Branch Initiated Applications).

Note:

For more details, refer to **Initial Funding Configuration** topic in the **Configurations User Guide**.

In the Instant Savings Account Origination Reference Business Process, the stages that are configured are mentioned below.

- **Application Entry Stage:** On successful submission of the Savings Account Application from self-service channel, the system starts the **Application Entry** stage without any manual intervention and completes the data segment level validation. On successful completion of the validation, the system automatically submits the **Application Entry** stage. Similarly, for the Branch initiated Application also this stage is automatically submitted, if the data segment configured for Application Entry stage are updated in the **Application**

Initiate stage itself by clicking the **Application** button in the **Product Details** data segment.

- **Account Funding Stage:** On successful submission of the **Application Entry** stage, system checks if Initial Funding is updated for the Account Opening or not.
 - The initial funding mode allowed for self-service initiated applications are External Bank Account Transfer and Account Transfer.
 - If the Initial Funding has been taken for the Account via the External Bank Account Transfer in the self-service channel, the system starts the **Application Funding Stage** and validates the **Initial Funding Details** data segment and submits the **Application Funding Stage** automatically.
 - For Application where the **Initial Funding** is updated as Account Transfer or where no funding has been taken for the Account, this stage is skipped completely by the system for Application initiated from Self-Service Channel and Branch Initiated Applications.
 - For the Branch Initiated Applications wherein the **Initial Funding** has been taken in Cash or Other Bank Cheque, this stage has to be manually actioned by the Branch User having access permission for this stage.
- **Application Approval Stage:** System skips this stage for self-service initiated application and submits the application directly to the Product Processor for Account Creation. However, for Branch initiated Application considering the 4-eye principle, system expects the application to be approved by a Supervisor. Hence this stage, will have to be picked and actioned by the Supervisor User. Supervisor User can either approve or reject the Application. On submission of this stage by selecting **Approve** outcome, system submits the Application to the Product Processor for Account Creation.
- **Handoff Retry:** Application moves to this stage and appears in the Free Task only if the Savings Account creation has been rejected by Product Processor. The user having the required access rights can pick such task and can retry submission to Host after taking required actions on the Failure reason.

SIGNIFICANT CHANGES

You have advised us that there are no foreseeable significant changes to your circumstances that will affect your ability to meet your contracted repayments. You have advised us that significant changes to your circumstances may occur that could adversely affect your ability to meet your contracted repayments and you have plans in place to ensure that you will be able to continue to make repayments if these circumstances occur.

Privacy Statement

We would like to inform you that:

Purpose of collection

Personal information is information about an identifiable individual and includes facts or an opinion about you which identifies you or by which your identity can be reasonably determined. The collection of your personal information is essential to enable us to conduct our business of offering and you with our range of financial products and services.

We collect personal information for the purposes of:

identifying and protecting you when you do business with us establishing your requirements and providing the appropriate product or service setting up, administering and managing our products and services assessing and investigating and if accepted, managing a claim made by you under one or more of our product and training and developing our staff and representatives. We may be required by law to collect your personal information. These include, but are not limited to, anti-money laundering and taxation laws.

Consequences if personal information is not provided

If we request personal information about you and you do not provide it, we may not be able to provide you with the financial product or service that you request, or provide you with the full range of services we offer.

Disclosure

We use and disclose your personal information for the purposes we collected it. We may also use and disclose your personal information for a secondary purpose that is related to the purpose for which we collected it. This would happen in cases where you would reasonably expect us to use or disclose your personal information for that secondary purpose. In the case of sensitive information, any secondary purpose, use or disclosure will be directly related to the purpose collection.

When necessary and in connection with purposes of collection, we may disclose your personal information to and/or collect your personal information from:

Other companies within the. Where required or authorized under our relationship with our joint venture companies. Information technology providers, including hardware and software vendors and consultants such as programmers research and development service providers your advisers, agents or representatives our advisers, agents or representatives if required or authorized to do so, regulatory bodies and government agencies financial advisers lenders' mortgage insurers and values credit reporting agencies legal and other professional advisers printers and mail house service providers manufacturers for plastic card production (e.g. debit and credit cards) external dispute resolution schemes.

Disclosure overseas

There are also instances where we may have to send your personal information overseas or collect personal information from overseas. These instances include: sending your personal information to companies in the group. When you have asked us to do so when we are authorised or required by law to do so when we have outsourced a business activity or function to an overseas service provider with whom we have a contractual arrangement certain electronic transactions or when it is necessary in order to facilitate a transaction on your behalf. We will only send your personal information overseas or collect personal information about you from overseas for the purposes in this statement.

Access

You can request access to the personal information we hold about you by contacting us. In some circumstances, we are able to deny your request for access to personal information. If we deny your request for access, we will tell you why. If accessing your personal information will take an extended period of time, we will inform you of the likely delay. For more detailed requests for access to personal information, for example, access to

information held in archives, a fee may be charged to cover the associated cost of retrieval and supplying this information.

Marketing

We would like to use and disclose your personal information to keep you up to date with the range of products and services available from. Generally, our companies in the group will use and disclose your personal information for 's marketing purposes. If you do not want us to use and disclose your personal information for the purpose of marketing products and services to you, you should contact us and tell us.

Contact

Please contact us to:
