Purpose

This guide is designed to help you to quickly get acquainted with the Oracle Banking Originations Cloud Service system. This guide provides an overview of the Retail Loan Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a Retail Loan Origination.

Before you begin

Kindly refer to the **Getting Started User Guide** for common elements, including Symbols and Icons, Conventions Definitions, and so forth.

Module Prerequisite

Specify the **User Name** and **Password**, and login to **Home** screen.

Audience

This guide provides instructions and information about the Retail Loan product to help various bank users to deliver quick and efficient service to both customer and prospects.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related Resource

The related documents are as follows:

- *Operations User Guide*
- *Configuration User Guide*
- *Alerts and Dashboard User Guide*

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

1

Overview

Oracle Banking Originations Cloud Service is the middle office banking solution with a comprehensive coverage of account opening processes of the below product for both Individual as well as Small and Medium Business type of customers:

- Saving Account
- Current Account
- Term Deposit Account
- Retail Loans Account

It is a Host-Agnostic solution.

It enables banks to deliver the improved user experience for various bank persons such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/Managers, Loan Officers, and Credit Officers and more, handling defined functions in the lifecycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business-driven, is hosted and architecture by our new platform solution. The random access navigation between data segments within a given stage are with appropriate validations helps to enable the business user to capture apt information anytime during the account open process before created account in the Host. The new workflow supports capturing relevant documents, stage-wise, and the generation of advice and notifications dynamically.

The account opening request is initiated by authorized branch user or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services. These services are available on digital devices like tablets or mobiles. The account opening request can be initiated for both new and existing customer types. Also, the system supports the processing of the account opening request from the customer directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST-based service APIs.

2

Loan Simulation and Quick Assessment

This topic describes the systematic instructions to initiate the loan simulation and quick assessment process.

Loan Simulation:

Loan Simulation is an independent feature that enables users to create loan schedules, find interest rates (including margins), and gather other important information for both new and existing customers by inputting basic borrower details. This loan simulation process is designed specifically for individual customers.

Quick Assessment:

The Quick Assessment improves the Loan Simulation process by enabling bankers to check an applicant's eligibility before starting a loan application. After the Loan Simulation results are displayed, users with the necessary access can move on to the Quick Assessment.

- [Loan Simulation](#)
This topic describes the systematic instructions to initiate the loan simulation application.
- [Quick Assessment](#)
This topic describes the systematic instructions of Quick Assessment.

2.1 Loan Simulation

This topic describes the systematic instructions to initiate the loan simulation application.

To enable a loan simulation process, select the Loan Simulation toggle in the **Business Product Details** data segment of the **Business Product Configuration** screen.

To capture loan simulation applicant process:

1. From the **Menu**, click the **Retail Origination** and click **Retail Origination**.
2. Under the **Retail Origination**, click the **Loan Simulation**.

The **Loan Simulation** screen displays.

Figure 2-1 Loan Simulation

Simulation ID	Customer Name	Mobile Number	SSN / National ID	Status	Action
006SIM000001641	David	+44 8448030165		In Progress	 
006SIM000001640	David	+44 8448030165		In Progress

Table 2-2 Add Applicants

Field	Descriptions
Product Type	Select the product type of the applicant from the drop-down list. The available options are: - Home Loan - Education Loan - Personal Loan - Vehicle Loan
Product	Select the product from the drop-down list based on the product type.
Add Applicant	Click add applicant to add the new applicant.
Applicant Role	Displays the applicant role. The available options are: - Primary - Joint
Add Applicant By	Select the mode from which the user need to add new applicant. The available options are: Search Existing Customer - This option is used if the applicant is an existing customer of the bank. When a customer is selected, their details appear in the corresponding sections. Enter Manually - This option allows the user to manually enter all of the applicant's information.

Table 2-2 (Cont.) Add Applicants

Field	Descriptions
CIF Number	Search and select the CIF number. This field appears if the Search Existing Customer option is selected from the Add Applicant By drop down list. The system verifies whether the selected CIF number is valid or not . If the response is invalid CIF, an error message will indicate that the chosen CIF belongs to an Invalid Customer Status. The account opening process is not initiated by the customer.
First Name	Specify the first name of the applicant.
Middle Name	Specify the middle name of the applicant.
Last Name	Specify the last name of the applicant.
SSN/National ID	Specify the SSN/National ID.
Date of Birth	Select the date of birth of the applicant.
Address Details	This section displays the address details of the applicant.
Add Address	Add the address of the applicant.
Address Type	Select the address type from the drop-down list. The available options are: • Communication Address • Residential Address
Location	Specify the location of the applicant.
Current Address	Select the current from the drop-down list. The available options are: • Yes • No
Preferred Address	Select the preferred address. The available options are: • Yes • No
Address Since	Select the date when the applicant began residing at the specified address.
Address From	Select the date when the applicant began residing at the specified address. This field appears if the No option is selected in the Current Address field.
Address To	Select the date when the applicant last lived at the specified address. This field appears if the No option is selected in the Current Address field.
Address	Specify the address to search for the already captured address. Based on the configuration, on entering a few letters, the system fetches the related address that is already captured. Based on the selection, the fields are fetched in the address section.
Address Line 1	Specify the building name. Note: The maximum length is 35 characters.
Address Line 2	Specify the street name. Note: The maximum length is 35 characters.
Address Line 3	Specify the city or town name. Note: The maximum length is 35 characters.
Country	Select and search the country code.
State / Country Sub Division	Specify the state or country sub division. This field appears based on the selected country code.

Table 2-2 (Cont.) Add Applicants

Field	Descriptions
Zip Code/ Pin Code	Specify the zip or post code of the address.
Contact Details	This section displays the contact details.
Add Contact	Add the contact details of the applicant.
Communication Mode	Select the communication mode from the drop-down list. The available options are: • Mobile Phone • Email
Contact Sub Type	Select the contact type from the drop-down list. The available options are: • Residence • Business • Mobile • Others
Preferred	Select to indicate if the given record is the preferred one.
Action	Click delete to delete the contact details.
Identification Details	This section displays the identification details.
Add ID	Add the ID details of the applicant.
ID Type	Select the ID type from the drop-down list.
ID Status	Select the ID status from the drop-down list. The available options are: • Available • Applied For
Unique ID	Specify the unique identification code of the selected type.
Place of Issue	Specify the place where the ID is issued to the user.
Issue Date	Specify the date from which the ID is valid.
Expiry Date	Specify the date till which the ID is valid.
Remarks	Specify the remarks. Click the Save button to save the entered ID details.
Preferred ID	Select the preferred ID from the drop-down list. The available options are: • Yes • No
Save	Click save to save the application.
Cancel	Click cancel to cancel the application.

6. Click **Save** to define the loan requirements. The following screen displays

Figure 2-4 Loan Requirements

Loan Requirement

Currency: USD | Loan Amount: 500000 | Years: 5 | Months: 4 | Rate Type: Fixed

Loan Purpose: Buy a New Home

Simulate | Terminate | Save & Close | Apply

Table 2-3 Loan Requirements

Field	Description
Loan Requirements	Displays the loan requirements details.
Currency	Select preferred currency from the drop-down list.
Loan Amount	Specify the loan amount.
Years	Specify the loan tenure years.
Months	Specify the loan tenure in months
Rate Type	Displays the rate type. The system fetches the rate type from host back end product to which this loan account is mapped via the Business Product configuration.
Loan Purpose	Select the purpose of the loan from the drop-down list.
Simulate	Click simulate to simulate the loan application. During simulate the system will lockup in the Origination preferences configuration for the default Stage that needs to be considered for Loan Simulation (e.g. EPI,, POI etc.)

7. Click **Simulate**.

The Simulation details display on the screen.

Figure 2-5 Loan Simulation

The screenshot displays the 'Loan Simulation - 006SIM000000251' window. It includes sections for 'Product Type' (Personal Loan), 'Applicants' (Jacob Luther Martin), and 'Loan Requirement' (Currency: USD, Loan Amount: 4,500,000.00, Months: 60, Rate Type: Fixed, Loan Purpose: Construction). A 'Simulate' button is at the bottom left. On the right, a summary table shows: Principal (USD 10,020.00), Interest, Total Repayment (USD 10,000.00), No. of Installments, Effective Rate, Annual Percentage Rate, Monthly Installment (USD 321.77), and Repayment Type (EPI). Buttons for 'View Schedule', 'View Credit Rating', 'Execution Summary', and 'Quick Assessment' are also present.

	Value
Principal	USD 10,020.00
Interest	
Total Repayment	USD 10,000.00
No. of Installments	Capitalized Charges
Effective Rate	USD 20.00
Annual Percentage Rate	Total
Monthly Installment	USD 10,020.00
Repayment Type	USD 321.77
	EPI

Using validation model, validations such as gender-based or minor-related eligibility checks are performed during Loan Simulation.

8. Click the **Principal** link.

A pop-up displays the breakdown of principal amount, that are:

- **Requested Loan Amount:** Displays the original loan amount.
- **Capitalized Charge:** Displays the sum of all the charges capitalized in the **Charge Details** screen.
- **Total:** Displays the sum of requested loan amount and capitalized charges.

9. Click **Interest Rate**.

The **Interest Details** section displays the interest applicable for the account.

Retail Loans Account Origination Process

This topic describes about the Retail Loans Account Origination Process.

This document provides an overview of the retail account open process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a retail loan account open process.

The document is designed to help you create the following types of retail loan:

- Individual customers
 - Housing Loan
 - Personal Loan
 - Vehicle Loan
 - Education Loan
 - Loan Against Deposits
- Small and Medium Business customers
 - Business Loan
 - Term Loan

Retail loan account open process enables the bank to leverage on the state of the art technology used for business modelling, help extend the boundaries of potential markets, provide for Banking at Doorstep and ensure the convenience of banking with primary focus on customer service.

We shall look at the reference workflows of the retail loan account process before understanding how the configuration and capture of data can be done. These stages are mandatory or non-mandatory based on the business process configurations. The process management flow is basically routed through various stages to capture relevant data before it is ready to be sent to the host for account creation.

- [Retail Loan Account](#)
This topic describes information about retail loan account.
- [Application Entry Stage](#)
This topic describes the systematic instructions to initiate the loan application entry stage.
- [Application Enrichment Stage](#)
This topic describes the systematic instructions to move the loan application to enrichment stage.
- [Application Documents](#)
This topic describes the process of the documents that are uploaded related to application.
- [Loan Underwriting](#)
This topic describes the systematic instructions to move the loan application to underwriting stage.
- [Loan Assessment Stage](#)
This topic describes the systematic instructions to move the loan application to assessment stage.

- [Manual Credit Assessment](#)
This topic describes the systematic instructions to move the loan application to manual credit assessment stage.
- [Manual Credit Decision](#)
This topic describes the systematic instructions to move the loan application to manual credit decision stage.
- [Account Parameter Setup](#)
This topic describes the systematic instructions to move the loan application to account parameter setup stage.
- [Supervisor Application Approval Stage](#)
This topic describes the information on the various data segments to view and approve the price change in the Supervisor Application Approval stage.
- [Offer Issue Stage](#)
This topic describes the information on the various data segments to generate the offer in the Offer Issue stage.
- [Offer Accept / Reject Stage](#)
This topic describes the information on the various data segments to accept / reject the offer in the Offer Accept / Reject stage.
- [Post Offer Amendment Stage](#)
This topic describes the information on the various data segments to request for amendment of loan application in the Post Offer Amendment stage.
- [Account Approval Stage](#)
This topic describes the information on the various data segments to view the captured details and approve the application in the Account Approval stage
- [Global Actions](#)
This topic provides the detailed on the actions that can be performed in all stages.

3.1 Retail Loan Account

This topic describes information about retail loan account.

The initial request for a loan can be made through any of the following:

- Authorized branch users
- Relationship managers
- Authorized bank agents
- Traditional branch channel
- Specialized protocol services available on digital devices such as tablets or mobiles

The initiation of loan request can be made for both new and existing customer types. Also, the platform supports the processing of the loan request from the customer which is directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST based service APIs.

The selection of the relevant loan product on which the loan is required can be initiated using this process, provided the user has the required access rights.

Please refer to the detailed setup and operation workflows for both asset and liability products initiation made available in the Operations user guide.

To acquire and edit the task:

1. From **Home** screen, click **Tasks**. Under **Tasks**, click **Free Tasks**. The **Free task** screen displays.

Figure 3-1 Free Tasks

2. Click **Acquire & Edit** to navigate to the appropriate stage.

3.2 Application Entry Stage

This topic describes the systematic instructions to initiate the loan application entry stage.

Based on the access configuration, user can view the records in Free Task. In this stage user can capture the details that are required to open a current account. This stage is automatically submitted on below conditions:

- If the bank level configuration for allowing the full application submission is set as **Yes**.
- If the user captures the required details in all the data segments of the **Application Entry** stage as part of the **Application Initiation** stage on clicking the Application button in the **Product Details** data segment.

To open retail loan application entry task:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Application Entry** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Applicant](#)
In this data segment you can view and edit the customer information which is captured while initiating an loan account application.
- [Relationships](#)
This topic describes the systematic instructions to add relationship details of the applicant.
- [Loan Details](#)
This topic describes the systematic instructions to configure the loan product.
- [Stake Holder Details](#)
This topic provides the systematic instructions to capture the stake holder details related information for the application.

- [Financial Details](#)
This topic provides the systematic instructions to capture the financial details of a single customer or multiple customers.
- [Collateral Details](#)
This topic provides the systematic instructions to capture the collateral which is offered by the customer as security for retail loan.
- [Terms and Conditions](#)
This topic describes the terms and conditions that are mandatory to accept for to proceed with account opening process.
- [Review](#)
This topic provides instruction to view all the data segments in the Loan Application Entry Process.

3.2.1 Applicant

In this data segment you can view and edit the customer information which is captured while initiating an loan account application.

The **Applicant** data segment displays the details captured for the customer in the Application Initiate stage and allows to update further for supplementing the customer related information. The user can capture data for both new as well existing customer. If the existing customer is selected the system fetches store data and populates in the respective fields. The user can edit the fetched data.

- [For Individual Customer Type](#)
The topic describes the process to capture or edit applicant of Individual type of customer.
- [For Small and Medium Business \(SMB\) Customer Type](#)
The topic describes the process to capture or edit customer information of Small and Medium Business type of customers.

3.2.1.1 For Individual Customer Type

The topic describes the process to capture or edit applicant of Individual type of customer.

To capture applicant details:

1. In the Application Entry stage, update the customer details in the Applicant data segment based on the respective customer type.

The **Applicant - Individual** screen displays.

- Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 3-2 Small and Medium Business – Field Description

Field	Description
Customer Type	Displays the customer type based on the product selected.
Doing Business As	Displays the business name of the SMB customer.
Registration Number	Displays the registration number of the business.
Date of Registration	Displays the registration date of the business.
Edit	Click Edit to modify the existing customer details and address details. Click Save to save the modified details and click Cancel to cancel the modifications. The Edit appears only for existing customers.
Existing Customer	Select to indicate if customer is existing customer.
CIF Number	Search and select the CIF number.
Advance Search	Click this button to perform party using advance parameters. For more information on advance search, refer the Advanced Serach section below.
Doing Business As	Specify the name of the business.
Registration Number	Specify the registration number of the business.
Date of Registration	Select the registration date of the business.
Country of Registration	Search and select the country code where the business is registered.
SMB Classification	Select the SMB Classification from the dropdown list. Available options are: • Micro • Small • Medium
Customer Category	Search and select the customer category.
SMB Registration Number	Specify the SMB registration number.
Tax Identification Number	Specify the tax identification number of the SMB customer.
Goods and Service Tax ID	Specify the goods and service tax ID.
Business License	Specify the business license.
Preferred Language	Select the preferred language.
Preferred Currency	Select the preferred currency.
Relationship Manager ID	Specify the relationship manager ID.
Upload Logo	Click Upload Logo button to upload the logo for the business.
Address	This section displays the added address of the applicant. It is mandatory to add communication address of the applicant.  Click  to add address details.  Click  to perform below actions on the added address details, • To view the address details, click View. • To edit the address details, click Edit. • To delete the address details, click Delete.

Table 3-2 (Cont.) Small and Medium Business – Field Description

Field	Description
Address Type	Select the address type for the applicant from the drop-down list. • Residential Address • Communication Address
Location	Select and search the location.
Current Address	Select to indicate if the user wants to mark entered address as current address type.
Preferred Address	Select to indicate if the user wants the selected address type as preferred address type.
Address Since	Select the date when the applicant began residing at the specified address.
Address From	Select the date when the applicant began residing at the specified address. This field appears if the No option is selected in the Current Address field.
Address To	Select the date when the applicant last lived at the specified address. This field appears if the No option is selected in the Current Address field.
Address	Specify the address to search for the already captured address. Based on the configuration, on entering a few letters, the system fetches the related address that is already captured. Based on the selection, the fields are fetched in the address section.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.
Country	Select and search the country code.
State / Country Sub Division	Specify the state or country sub division. This field appears based on the selected country code.
Zip Code / Post Code	Specify the zip or post code of the address.
Contact Details	In this section, user can provide digital contact details. Click add contact button to add new contact details.
<Communication Mode>	Select the communication mode from the drop-down list. The available options are: • Mobile Phone • Email
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list. The drop-down list option consist of country code, country name and subscriber dialing code. This field appears only if user selects the Mobile Phone option as communication mode.
Mobile Number	Specify the mobile number.
Preferred	Select to indicate if the given mobile number is the preferred number.
Action	User can edit or delete the added mobile details.
Email Id	Specify the email ID. This field appears only if user selects the Email option as communication mode.
Preferred	Select to indicate if the given email ID is the preferred ID.
Action	User can edit or delete the added email details.

Advanced Search

User can perform an advanced search for the party by providing additional information.

Refer above **Advanced Search** section for more details.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data. If the **Customer Dedupe** check is enabled, the application will perform the Dedupe check for the new customer details on clicking **Next** button. For more information, refer the **Customer Dedupe Check** section.

Customer Dedupe Check:

Based on the configuration set in the **Origination Preference** screen, the customer dedupe service is enabled.

If the **Customer Dedupe** service check is enabled, upon capturing the New Customer details, the system compares the same with the existing customers records. If there are any matching hits, the list of Duplicate records which matches to the New Customer Details will be displayed.

The customer details are compared based on a set of attributes configured. (Refer to Oracle Banking Party Documentation for Dedupe attributes configuration).

- Click **Next** to perform the dedupe check and display the result.

The **Dedupe Result** screen is displayed

Figure 3-6 Dedupe Results

The screenshot shows a window titled "De-Dupe Results" with a close button (X). Below the title bar, it says "Following matching records are found, Please verify". There are two sections, each with a header and a table of matching records.

Vikash Kumar

Return On Equity	Specify the return on equity.
Return On Asset	Specify the return on asset.

- Click **Next**. The system validates the date specified in **Last Update On** with Financial Details Validity Period and, if date specified in **Last Update On** exceeds the date specified in Financial Details Validity Period at Business Product Preferences configurations, the system displays the following error message:
- Click **Yes** to retain the existing financial details and proceed with the next data segment.
OR
Click **No** to edit financial details and proceed.

3.2.6 Collateral Details

This topic provides the systematic instructions to capture the collateral which is offered by the customer as security for retail loan.

Collateral details is a data segment to capture the collateral which is offered by the customer as security for the loan. Collateral details will be sent to the host to be made available under local collateral. The relevant service APIs will be made available for both Push and Pull details of collaterals.

Capturing of Collateral details in Oracle Banking Originations Cloud Service is also enabled with an option to onboard collateral using the Oracle Banking Credit Facility Process Management integration services. In such cases, the collateral details will be sent to the Collateral onboarding systems for performing the Valuation, obtaining the Legal opinion and recording the perfection details. These details will be made available on Oracle Banking Originations Cloud Service in the respective Data segments in read only mode.

To add collateral details:

- Click **Next** in previous data segments to proceed with the next data segment, after successfully capturing the data.

- Click **Add Collateral** to capture the collateral details.
The **Collateral Details** screen displays.

If the **Collateral Type** is selected as **Term Deposit**, the **warning message** displays when the OD Limit expiry date is more than the Maturity Date of the term deposit.

- Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 3-11 Collateral Details - Field Description

Field	Description
Add	Select the collateral. The available option are: New Collateral Existing Collateral Note: When Oracle Banking Retail Lending Servicing is the host, the system supports secured loan origination using existing collateral. The existing collateral details of the customer are fetched from the collateral product processor. If sufficient unutilized collateral balance is available, it can be used for a new loan for the customer(s).
Applicant	Select the applicant from the drop-down list to fetch existing collateral details. This field appears when the Existing Collateral option is selected.
Primary Collateral	Select the primary collateral. The available option are: Yes No

Table 3-11 (Cont.) Collateral Details - Field Description

Field	Description
Collateral Type	Select the collateral type. Available options are: • Property • Guarantee • Vehicle • Precious Metal • Deposits • Bonds • Stocks • Insurance • Accounts Receivable • Inventory (Stock of Material) The above options displays based on the initial setup.
Category	Select the collateral category. Available options are: If Collateral type is selected as Property • Residential Property • Vacant Land • Under Construction If Collateral type is selected as Guarantee • Personal Guarantee • Guarantee and Indemnity • Government Guarantee • Family Guarantee If Collateral type is selected as Vehicle • Passenger Vehicle • Commercial Vehicle If Collateral type is selected as Precious Metal • Precious Metal If Collateral type is selected as Deposits • Term Deposit If Collateral type is selected as Bonds • Secured Bonds • Unsecured Bonds • Investment Bonds If Collateral type is selected as Stocks • Domestic Stock If Collateral type is selected as Insurance • Life Insurance If Collateral type is selected as Accounts Receivable • Bill Receivable • Trade Receivable If Collateral type is selected as Inventory (Stock of Material) • Stock of Raw Materials • Finished Goods • Packaging Materials The above options displays based on the initial setup.
Collateral Branch	Displays the branch of the collateral.

Table 3-11 (Cont.) Collateral Details - Field Description

Field	Description
Term Deposit Number	Select the Term Deposit Number from the list. The Term Deposit which has crossed the maturity date and the Allow Collateral Linkage disabled, will not appear in the list.
Maturity Date	Select the Maturity Date of the term deposit.
Available Linkage Amount	Specify the available linkage amount.
Linked Amount	Specify the linked amount.
Linkage Currency	Displays the linkage currency.
Guarantee Type	Specify the type of guarantee. This field appears only if the collateral type is Guarantee .
Currency	Specify the currency of the collateral value.
Collateral Value	Specify the collateral value.
Collateral Description	Specify the collateral description.
Mark Collateral For Refinance	Specify if an added collateral should be consider for refinance.
Applicants	This section displays the applicants name and remarks that are involved in the loan application. These applicants are also related to the added collateral.
Guarantor	This section displays the guarantor name.
Purchase Property	Specify whether the collateral property being added is being purchased. This field appears if the Property option is selected from the Collateral Type list.
Liability ID	Displays the Liability ID
Liability Description	Displays the Liability description.
Collateral Available Date Range	Select the date range of the collateral. The range indicates the date from and date up to, which the collateral is available.
Collateral Value	Specify the value of the collateral.
Hair Cut %	Specify the percentage of Hair Cut.
Collateral Amount To Be Considered	Displays the collateral amount to be considered. Collateral Amount = (Hair Cut % Collateral Value)
Collateral Description	Specify the collateral description.
Property Location	In this section, user can enter property address which is added as collateral. This section appears only if user select Property from the Collateral Type list. The fields appears if user select the Property option from the Collateral Type list.
Address	Specify the address to search already captured address. Based on configuration, on entering few letters, the system fetches the related address that are already captured. Based on the selection, the fields are auto populated in the address section.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.
State / Country Sub Division	Specify the state or country sub division.

Table 3-11 (Cont.) Collateral Details - Field Description

Field	Description
Country	Select and search the country code.
Zip Code / Post Code	Specify the zip or post code of the address.
Collateral Ownership Details	In this section, specify the ownership details of the collateral property. This section displays all the customers that are involved in the loan application. The fields appears if user select the Property option from the Collateral Type list.
<Added record tile>	In this tile, user can view the added details. Click Add to add the applicant collateral ownership details. Click Edit to edit the added collateral ownership details.  Click  to delete the collateral ownership details.
Ownership Type	Select the ownership type of the property. The available options are • Single • Joint The fields appears if user select the Property option from the Collateral Type list.
Select	Select the appropriate customer as owner from the list. The fields appears if user select the Property option from the Collateral Type list.
Customer Name	Displays the customer name along with title. The fields appears if user select the Property option from the Collateral Type list.
Ownership Percentage	Displays the percentage of the ownership of the customer. The fields appears if user select the Property option from the Collateral Type list.
Remark	Displays the remark of the customer. The fields appears if user select the Property option from the Collateral Type list.
Action	Click  to edit the added signatures Click  to delete the added signatures.
Market LTV	Displays the market LTV.
Bank LTV	Displays the bank LTV.
Collateral Description	Displays the description of the collateral.
Collateral Type	Displays the collateral type.
Category	Displays the category of the collateral.
Collateral Value	Displays the collateral value.
Owners	Displays the owner names of the collateral.
<Actions>	Perform the below action on the added collateral. •  - Click delete to delete the added collateral. •  - Click down arrow to view the collateral details.

Table 3-11 (Cont.) Collateral Details - Field Description

Field	Description
Total Collateral Value	Displays the total value of collateral. This field will be auto updated based on the number of collaterals.
Cover Available	Displays the cover available. This field will be auto updated based on the number of collaterals.

Note

All the fields are fetched from Oracle Banking Credit Facilities Process Management in read only mode, if integrated with Oracle Banking Credit Facilities Process Management.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The User cannot to proceed to the next data segment, without capturing the mandatory data.

3.2.7 Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.

In this data segment user can capture terms and conditions consents from the applicants. The customer consents are same across products but few terms and conditions defer based on the applied products. They appears in questionnaire format based on the configurations. This questionnaire is mapped at product configuration level. It is mandatory to accept all terms and condition to proceed with application.

This data segment comprises of below sections:

- Terms and Conditions for all products** - In this section the terms and conditions which are applicable for all the products appears in the questionnaire format.
- Terms and Conditions for <Selected Product>** - In this section the terms and conditions which are applicable for all the selected product appears in the questionnaire format.

To capture terms and conditions:

- Click **Next** from previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Terms and Conditions** screen appears

Figure 3-18 Terms and Conditions

2. Click  to view the terms and conditions.
3. In the **Customer Consent across Products** section, select to capture the customer consents.
4. In the **Terms and Conditions for Lending Application** section, select to accept the product level terms and conditions.
5. Click **Add Channel** to add the relevant details.

The below fields contain channel data:

- Channel
 - Contact Value
 - Preferred Time
 - Time Zone
 - Actions
6. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

3.2.8 Review

This topic provides instruction to view all the data segments in the Loan Application Entry Process.

The system will display the summary of each of the data segments in as many sections as the number of data segments in the given stage.

To view the summary of all the data segments:

1. Click **Next** from previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Review** screen displays.

Remarks

Cancel

Submit

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Entry** stage for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **LoanApplication Enrichment**. For **Loan Against Deposit** origination process, it move into the **Account Approval** stage. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the **Application Entry** stage.
The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**.

The system successfully moves the Application Reference Number along with the process reference numbers [Retail Loans] to the Application Enrichment stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

Application De-Dupe:

Based on the configuration set in the Origination Preference screen, the application dedupe service is enabled.

If application dedupe service is enabled, System will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

Note

- If an application is returned to the Application Entry-stage from any other subsequent stages, Oracle Banking Originations Cloud Service will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case the party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting the Application Entry stage. The user has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.
- Unique process reference numbers will be generated and made available in the Free Task grid for the respective Customer Onboarding, Collateral Onboarding requests, which need to be picked up by the concerned users in the Oracle Banking Party / Oracle Banking Credit Facilities Process Management modules.

3.3 Application Enrichment Stage

This topic describes the systematic instructions to move the loan application to enrichment stage.

The **Loan Application Enrichment** stage is the next representative and optional stage in the Retail Loan Account Open process. Effectively, the user can move the application to the **Loan Underwriting** stage without capturing the details in any of the data segments of **Loan Application Enrichment** stage. After the **Loan Application Entry** stage is completed successfully, the application can be acquired by the user who has the access rights for the given stage and progress with the data capture. The user can acquire the application from **Free Tasks** list.

Users having functional access to the **Application Enrichment** stage will be able to view the record in the Free Task process.

To enrich an application:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Application Enrichment** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Mortgage Insurance](#)
This topic describes the systematic instructions to configure the mortgage insurance.
- [Interest and Charges](#)
This topic describes systematic instructions to configure loan interest and charges details.
- [Loan Disbursement Details](#)
This topic describes systematic instructions to configure loan disbursement details.
- [Loan Repayment Details](#)
This topic describes systematic instructions to enables the user to capture the loan repayment details.
- [Review](#)
This topic provides the systematic instruction to view all the data segments in the Application Enrichment stage.

3.3.1 Mortgage Insurance

This topic describes the systematic instructions to configure the mortgage insurance.

In this data segment, you can capture mortgage insurance details. This data segment appears based on the following conditions

- If the LMI rule is selected while configuring the product
- If the rule outcome determines the mortgage insurance need.

To add mortgage insurance details:

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

Figure 3-21 Mortgage Insurance

Table 3-13 Mortgage Insurance – Field Description

Field	Description
Insured Amount	Displays the mortgage amount that is insured
Insurance Provider	Displays the name of insurance provider.
Insurance Premium	Displays the premium amount of the insurance.
Insurance Provider	Specify the name of the insurance provider.
Insurance ID	Specify the identification number of the insurance policy which is taken against your mortgage.
Insurance Amount	Specify the amount that is insured.
Insurance Quote/ Premium	Specify the insurance premium.
Lender Stamp Duty	Specify the stamp duty amount which lender pays.
Lender GST	Specify the good and services tax amount which lender pays.
Total Lender Premium	Displays the total amount of premium. The system populates the value based on following formula, Total Lender Premium = Lender Stamp Duty + Lender GST.
Borrower Stamp Duty	Specify the stamp duty amount which borrower pays.
Borrower GST	Specify the good and services tax amount which borrower pays.

Table 3-13 (Cont.) Mortgage Insurance – Field Description

Field	Description
Borrower Premium	Displays the premium amount that borrower pays. The system populates the value based on following formula, $\text{Borrower Premium} = \text{Insurance Quote/Premium} - \text{Total Lender Premium} - \text{Borrower Stamp Duty} - \text{Borrower GST}$
Total Borrower Premium	Displays the total premium amount of the borrower. The system populates the value based on the following formula: $\text{Total Borrower Premium} = \text{Borrower Premium} + \text{Borrower Stamp Duty} + \text{Borrower GST}$

2. Enter the relevant details.
3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

3.3.2 Interest and Charges

This topic describes systematic instructions to configure loan interest and charges details.

In this data segment the **Interest Details** section displays the interest applicable for the account.

The **Charge Details** section enables the user to display the charges applicable or levied for this loan application. These charge details are fetched from the Host (APIs – Pull).

To add interest and charges details:

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Interest and Charges** screen appears.

2. Specify the fields on **Interest and Charges** screen.

For more information on fields, refer to the field description table.

Table 3-14 Interest and Charges – Field Description

Field	Description
Interest Details	Displays the interest details in this section.
Interest Description	Displays the interest description of the selected interest rate code.
Interest Rate (%)	Specify the interest rate. Interest Rate is fetched from host back end product to which this loan account is linked through the Business Product configuration. The system validates the Floor and Ceiling rates for each interest component. - If the effective rate is less than the floor rate, the system stamps the floor rate for that component. - If the effective rate is greater than the ceiling rate, the system stamps the ceiling rate for that component.
Rate Type	Displays the rate type. The system fetches the rate type from host back end product to which this loan account is mapped through the Business Product configuration.

Table 3-14 (Cont.) Interest and Charges – Field Description

Field	Description
Margin / Variance (%)	Click the link of margin or variance in percentage. It displays the pop-up list of all margins. • Product Margin • Risk based Margin • Discretionary Margin • Relationship Benefit Margin • Bundle Margin The Margin field appears if the Rate Type is selected as Floating. The Variance field appears if the Rate Type is selected as Fixed. This field is editable if the Margin Allowed toggle is ON at the product level. The Bundle Margin is displayed in the drop-down list only if loan is opened as part of a bundle application and bundle margin benefit is applicable.
Effective Rate (%)	Displays the effective rate for the loan calculated as Interest Rate + or – Margin/Variance .
Action	• Click  to edit the added records • Click  to save the records. • Click  to delete the added records.
Charge Details	In this section, displays the all charge details.
Charge Description	Displays the type of charges. The system also displays the total values of uncapitalized and capitalized charges and insurance.
Amount	Displays the amount.
Rate	Displays the rate for the charge component.
Waive	The user will have the option to waive all charges or selectively waive a particular type of charge.
Capitalize	Select if you want to capitalize the fees. The charges cannot be capitalized if the same are waived in this case this field appears disabled. This option is enabled only for the fees that are set to capitalize while configuring product.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

3.3.3 Loan Disbursement Details

This topic describes systematic instructions to configure loan disbursement details.

The **Loan Disbursement Details** are pushed into the host as a part of account open process data share – API's are provided for the same. The **Loan Disbursement Details** enables the user to capture the various disbursement methods.

To add loan disbursement details:

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Loan Disbursement Details** screen displays.

Figure 3-23 Loan Disbursement Details

- Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 3-15 Loan Disbursement Details – Field Description

Field	Description
Settlement Required	Select to indicate whether the settlement required. The available options are: - Yes - No
Requested Loan Amount	Displays the loan amount that is requested to borrow. This value fetched from the Loan Details data segment.
Loan Amount	Displays the requested or approved loan amount. - This field displays the requested loan amount from the Loan Details data segment in Application Enrichment stage. - This field displays the approved loan amount from the Decision service in Account Parameter Setup stage.
Number of Disbursement	Select the number of disbursements for disbursing the loan amount. The value one appears by default. The user can increase the number of disbursement to get loan amount disburse in multiple stages. The Disbursement Schedule section appears if the value in this field is more than one.
First Disbursement Date	Select the first disbursement date.

Table 3-15 (Cont.) Loan Disbursement Details – Field Description

Field	Description
Split Disbursement	Select to indicate the loan amount should be disbursed in multiple modes. The available options are: Yes: If this option is selected then Add Mode button appears to add additional disbursement mode. No: This option indicates that the user wants to continue with the single disbursement mode. If the Refinance Allowed toggle is ON in the Business Product Details data segment of the Business Product Configuration, the user can split the loan amount into multiple accounts. Note: This fields displays the values when Split Disbursement is selected as Yes in Loan Details data segment.
Disbursement Schedule	This section appears if the value in Number of Disbursement field is selected more than one. Stage Date Amount Of Disbursement Total Disbursement
Stage	Specify the stage name when the specified amount must be disbursed.
Date	Select the date when the specified amount must be disbursed. This field is in read-only if the Frequency Based toggle is ON.

3. Click **Add Mode** to add additional details for each disbursement mode.

The **Loan Disbursement Details - Additional details** screen displays. In this screen, the fields appear based on the disbursement mode selected.

- Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 3-18 Loan Repayment Details – Field Description

Field	Description
Loan Tenure	Displays the selected loan tenure.
Maturity Date	Displays the maturity date based on the First Repayment Date and Loan Tenure .

Table 3-18 (Cont.) Loan Repayment Details – Field Description

Field	Description
	Click this icon to add repayment stage details.
Stage	Select the type of repayment. All type of repayment methods configured in the Business Product Preferences data segments of the Business Product Configuration screens appears in the drop-down list. If User Defined Schedule is selected, system will validate with the stage sequence rule maintained in Business Product and will not allow to add additional stages with User Defined Schedule.
Stage Term <Term Unit>	Displays the default stage term configured in the Business Product Preferences data segments of the Business Product Configuration screens. The separate column appears for separate term units.
Repayment Frequency	Select the repayment frequency from the drop-down list. The available options appears based on the configuration set in the Business Product Preferences data segments of the Business Product Configuration screens: • Daily • Weekly • Bi-Weekly • Monthly • Quarterly • Half Yearly • Yearly The above options displays based on initial setup. Note: If the stage is selected as User Defined Schedule and BULLET, this field is defaulted to Not Applicable.
Rate Type	Select the rate type from the drop-down list. The available options are: • Fixed • Float
Repayment Schedule	Displays the repayment schedule details.
Manage Installment Details	Click this option to capture the user defined schedules. Note: This option is enabled if UDS stage is selected in Business Product Configuration.
First Repayment Date	Select the first repayment date of the sanctioned loan amount. • If Type of Repayment is selected as BULLET then the first installment date is defaulted to the Maturity Date and number of installments will be set as one. • If Type of Repayment is selected as BULLET and in Business Product Configuration screen , Moratorium is allowed for the selected product then Moratorium will be set to Zero. Note: If User Defined Schedule is selected as stage then First Repayment Date will be hidden.

Table 3-18 (Cont.) Loan Repayment Details – Field Description

Field	Description
Repayment Mode	Select the repayment mode from the drop-down list. The available options are: • Own Internal Account- If the mode selected as Internal Account, then the system enables the fields for Customer Account and Branch. By default, the system populates the internal account selected in Disbursement data segment. However, if user wishes to have a different account, he/she can select another customer account of the CIF and account branch displays in the branch field. • External Account - If the mode selected is external account, the system creates a Periodic Instruction Maintenance, at host as a part of Loan Account opening process. • Capture Later - If the mode selected is Capture Later, the system will allow to proceed with the loan origination flow without capturing the repayment details. Note : The system defaults to the GL account in the absence of the repayment account. The above options displays based on the initial setup.
Customer Account	Click Search icon and select the customer account number. This field displays if Repayment Mode is selected as Internal Account .
Branch Code	Specify the branch code associated with customer account number. This field displays if Repayment Mode is selected as Internal Account .
Bank Code	Specify the bank code. This field displays if Repayment Mode is selected as External Account .
Bank Name	Specify the bank name. This field displays if Repayment Mode is selected as External Account .
Branch Address	Specify the branch address. This field displays if Repayment Mode is selected as External Account .
External Account Number	Specify the external account number. This field displays if Repayment Mode is selected as External Account .
Borrower Name	Specify the borrower name. This field displays if Repayment Mode is selected as External Account .

3. Click the **Show Repayment Schedule** button to generate the repayment schedule which displays the details of installment amount with the principal and interest break up for the given tenure.

Below fields appears in the section and displays the respective details:

- **Loans Amount**
- **Loan Financed**
- **Term**
- **Interest Rate %**
- **Finance Charges**

- **APR(%)**
- **Sr No.**
- **Date**
- **Installment**
- **Principal**
- **Interest**
- **Outstanding Balance**

For more information, refer to the topic.

4. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The User cannot to proceed to the next data segment, without capturing the mandatory data.

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Enrichment** stage for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **Application Documents**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the **Application Enrichment** stage.
The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
 7. Click **Close** to close the window.
OR
Click **Go to Free Task**.
The system successfully moves the Application Reference Number along with the process reference numbers [Retail Loans] to the **Application Documents** stage.
If the **Collateral Type** is selected as **Term Deposit** in **Collateral Details** data segment, then submit of the Loan Application Enrichment stage, will move the application into the **Account Parameter Setup** stage.
If the selected **Collateral Type** is other than **Deposits** in **Collateral Details** data segment, then submit of the **Loan Application Enrichment** stage, will move the application into the **Underwriting** stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3.4 Application Documents

This topic describes the process of the documents that are uploaded related to application.

The Application Documents stage provides the view of the outbound documents that are generated and dispatched to the applicants involved in the application.

To generate and dispatch the outbound documents:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Application Documents stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Document Generation](#)
In this data segment you can generate and dispatch the documents that are configured.
- [Document Acceptance](#)
In this data segment you can capture the acceptance of the documents that are already generated and dispatched.
- [Review](#)
This topic provides the systematic instructions to view the summary of each data segment in the Application Documents stage.

3.4.1 Document Generation

In this data segment you can generate and dispatch the documents that are configured.

In the Document Generation data segment, the list of documents that are maintained within the document generation event and fulfills the rule criteria are pre-populated in the tabular format. This document generation events are defined in the **Advice Maintenance** screen. Each documents appears separately to generate and dispatch.

To generate and dispatch the document:

1. On acquiring the **Application Document** task, the **Document Generation** stage is displayed.

Figure 3-37 Document Generation

2. In the **Document Generation** section, select the check box to select the document from the list. It is mandatory to select at least one document

The below actions can be performed on the selected document:

- **Generate:** Click this button to generate the selected document. On clicking this button, the system invokes a call to the report generation service which generates a PDF output for the advice configured in the **Advice Maintenance** screen. Once the output is generated the documents are stored in the document managed service (DMS) along with the reference ID. This reference ID fetches the document on click the **Generate Document** link in the Document column.
- **Dispatch:** Click this button to dispatch the selected generated documents. User can only dispatch those documents which are not already dispatched. On clicking this button, the system validates whether the document is already generated. Once the validation is successful the system dispatch the document to the default setting defined in the **Advice Maintenance** screen.
- **Reset:** Click this button to reset the action performed on the document.

For more information on fields, refer to the field description table.

Table 3-22 Document Generation – Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. This link appears only if the document is generated.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment. If the primary or joint applicant is minor, the guardian or custodian name will display as the receiving party associated with the minor applicant.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen. The available options are: • Email • Post • Print • e-Sign Remote • e-Sign In-Person
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. • If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. • If the delivery mode is Post then the preferred address of every recipient is displayed. • If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. • If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on clicking Generate or Dispatch button. Once the dispatch process is initiated for the generated documents, the status appears based on the selected default mode of delivery. • If the mode of delivery is Email then on the successful trigger the status appears as Email Sent. • If the mode of delivery is E-Sign Remote or E-Sign In-Person then on the successful trigger the status appears as E-Signing Initiated. • If the mode of delivery is Post then on the successful trigger the status appears as Dispatched. • If the mode of delivery is Print then on the successful trigger the status appears as Ready for Print. • In case the dispatch process fails due to technical error then the status appears as Failed.
Status Details	Displays the status details of the document. Click the icon to view the generation and dispatched details of document along with the date and time.

Table 3-22 (Cont.) Document Generation – Field Description

Field	Description
Action	Select the appropriate icon to perform respective action. - Click  to edit the delivery mode. - Click  to save the edited delivery mode. This icon appears once you are edit mode.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

3.4.2 Document Acceptance

In this data segment you can capture the acceptance of the documents that are already generated and dispatched.

The Document Acceptance data segment populates the list of documents that appeared in the **Document Generation** data segment and are mark as **Yes** in the **Acceptance** field in the **Advice Maintenance** screen.

If the document is marked as No in the Acceptance field in the Advice Maintenance screen then the e-sign acceptance process is not required for that document and hence it will not appear in this data segment.

To accept the document:

- Click **Next** in previous data segment screen to proceed with the next data segment, after successfully capturing the data.

The **Document Acceptance** screen appears.

Figure 3-38 Document Acceptance

- In the **Document Acceptance** section, select the check box to select the document from the list and perform appropriate actions.

For more information on fields, refer to the field description table.

Table 3-23 Document Acceptance – Field Description

Field	Description
Refresh Status	Click Refresh Status button to refresh the status of the documents.
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. • Generated Document: This link appears only if the document is generated atleast onces. • Accepted Document: This link appears only if the E-Signed document is uploaded.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment. If the primary or joint applicant is minor, the guardian or custodian name will display as the receiving party associated with the minor applicant.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen. The available options are: • Email • Post • Print • e-Sign Remote • e-Sign In-Person
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. • If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. • If the delivery mode is Post then the preferred address of every recipient is displayed. • If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. • If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on the document.
Status Details	Displays the status details of the document. Click the icon to view the generation, dispatched and acceptance details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. • View: You can view the documents only if the Delivery Mode is defined as E-Sign Remote or E-Sign In-Person. • Upload Document: You can upload documents only if the Delivery Mode is defined as Email, Print or Post. • Delete: You can upload documents only if the Delivery Mode is defined as Email, Print or Post.

Table 3-23 (Cont.) Document Acceptance – Field Description

Field	Description
Customer Response	Select the customer response for the documents. The available options are: • Accept: Select to accept the application documents. You can select this option only if the acceptance status of all the document is Accepted. • Reject: Select to reject the application documents. If the acceptance status of any one of the document is declined then this option appears auto-selected. • Amend: Select to amend the application document status.
Date of Response	Select the date on which the customer response is captured. This date should be greater or equal to current date.
Reason	Select the reject reason from the drop-down list.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

3.4.3 Review

This topic provides the systematic instructions to view the summary of each data segment in the Application Documents stage.

The system shows the summary of each data segment in the given stage.

To view the summary of all the data segments:

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Review** screen displays.

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.

The **Checklist** screen appears.

4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Documents** stage for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **Loan Assessment**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the **Application Documents** stage.

The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**.

The system successfully moves the Application Reference Number along with the process reference numbers [Retail Loans] to the Loan Assessment stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3.5 Loan Underwriting

This topic describes the systematic instructions to move the loan application to underwriting stage.

The underwriting process of the lender bank is set to determine if a borrower's loan application is an acceptable risk. It is a process to assess the borrower's ability to repay the Loan based on an analysis of their credit, financial capacity, and collateral provided by the borrower. The **Loan Underwriting** stage is the next representative stage in the Retail Loan Account Open process. After the **Loan Application Enrichment** stage is completed successfully, the application can be acquired by the user who has the access rights for the given stage and progress with the data capture.

To add underwriting details:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Underwriting** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Credit Rating Details](#)
This topic provides the systematic instructions to view the information on the External Rating Agencies Rating/Scores for the Applicant.
- [Legal Opinion](#)
This topic provides the systematic instructions to capture the legal opinion provided by the bank approved lawyer and decision provided thereon.
- [Valuation Details](#)
This topic provides the systematic instructions to capture the information on the asset valuation done by the bank approved valuator.
- [Review](#)
This topic provides the systematic instructions to view the summary of each of the data segments in the Loan Underwriting Stage.

3.5.1 Credit Rating Details

This topic provides the systematic instructions to view the information on the External Rating Agencies Rating/Scores for the Applicant.

Credit Rating Details is the first data segment of **Loan Underwriting** stage. The user can acquire the application from Free Tasks list. This data segment will provide the information on the External Rating Agencies Rating/Scores for the Loan Applicant. If the applicants are more than one, accordingly the information against each applicant/borrower will be provided. The interface with external rating agencies will be provided.

Oracle Banking Originations Cloud Service is now integrated with Bureau Integration Service to fetch the details of the Rating for the given applicant(s). The Bank will have an option to use this integration service or use the manual process of entering the Bureau score in the Credit Rating data segment.

To view the credit rating details of loan:

1. On acquiring the **Underwriting** task, the **Credit Rating Details** data segment appears.

Figure 3-41 Credit Rating Details

Bureau	Rating	Remarks	Details	Bureau Report
Experian	750		View	View
Equifax	750		View	View

2. Specify the details in the relevant fields. For more information on fields, refer to the field description table below

Table 3-25 Credit Rating Details – Field Description

Field	Description
<Customer Name along with applicant role tag>	Displays the customer name along with applicant role.
Bureau	Displays the name of configured bureau agency.
Ratings	Displays the credit score rating. The system populates the credit rating score from the Bureau Integration Service.
Remarks	Specify the remarks.

3. Click **View** from the **Details** column to view the additional Credit Bureau details.
The **Additional Credit Bureau Details** screen displays.

Figure 3-42 Additional Credit Bureau Details

Bureau Details								
Institution Name	Account Number	Account Type	Loan Amount	Outstanding Balance	Account Opening Date	Installment Amount	Delinquency Bucket	Delinquency Amount
HSBC/CARSN	001901000999	Overdraft	22000	0.00	June 7, 2019	0.00	NIL	NIL
FIRST FEDERAL SAVINGS	0019888010777	Loan	100000	86820.00	January 7, 2020	2162.00	NIL	NIL

4. For more information on fields, refer to the field description table below.

Field	Description
Institution Name	Displays the institution name.
Account Number	Displays the account number of the applicant.
Account Type	Displays the account type.
Loan Amount	Displays the loan amount.
Outstanding Balance	Displays the outstanding balance.
Account Opening Date	Displays the account opening date.
Installment Amount	Displays the installment amount.
Delinquency Bucket	Displays the delinquency bucket.

Table 3-26 (Cont.) Additional Credit Bureau Details – Field Description

Field	Description
Delinquency Amount	Displays the delinquency amount.

Note

Oracle Banking Originations Cloud Service has been integrated with Bureau Integration Service which will make a call to the Credit Bureau to get Credit Rating Score and additional details.

- Click **View** from the **Bureau Report** column to view and download the bureau report from the external agency.
- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The User cannot to proceed to the next data segment, without capturing the mandatory data.

3.5.2 Legal Opinion

This topic provides the systematic instructions to capture the legal opinion provided by the bank approved lawyer and decision provided thereon.

Legal Opinion is the next data segment of **Loan Underwriting** stage. This segment allows the user to capture the legal opinion provided by the bank approved lawyer and decision provided thereon.

To add legal opinion:

- Click **Next** in previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Legal Opinion** screen displays.

Figure 3-43 Legal Opinion

- Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

If Oracle Banking Originations Cloud Service is integrated with Oracle Banking Credit Facilities Process Management, the Legal Opinion details will be fetched from integration service and the values will be displayed in the respective fields as read only data. In the absence of Oracle Banking Credit Facilities Process Management integration, the user has to capture the Legal Opinion details manually in this data segment.

Table 3-27 Legal Opinion – Field Description

Field	Description
Collateral Type	Displays the collateral type which is added.
Collateral Category	Displays the category of the collateral which is added.
Collateral ID	Displays the collateral ID.
Collateral Description	Displays the description of the collateral.
Liability ID	Displays the liability ID
Liability Description	Displays the liability description.
Owners	Displays the owners name of the collateral.
Add Opinion	Click Add Opinion to add the legal opinion received from multiple agencies (both internal and external).
Opinion Type	Select the opinion type. Available options are: • External • Internal
Agency Code	Specify the agency code.
Agency Name	Specify the agency name.
Legal Remarks	Specify the legal remarks.
Opinion Date	Select the opinion date. Date should not be earlier than the Collateral Valuation Date .
Action	• Click  to save the records. • Click  to remove the records. • Click  to edit the added records • Click  to delete the added records.

3. Click **Save** to save the legal opinions.
4. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The User cannot to proceed to the next data segment, without capturing the mandatory data.

3.5.3 Valuation Details

This topic provides the systematic instructions to capture the information on the asset valuation done by the bank approved valuator.

Valuation Details is the next data segment of Loan Underwriting stage. This segment enables the user to capture the information on the asset valuation done by the bank approved valuator.

To capture the valuation details:

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Valuation Details** screen displays.

Figure 3-44 Valuation Details

- Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

If Oracle Banking Originations Cloud Service is integrated with Oracle Banking Credit Facilities Process Management, the valuation details will be fetched from integration service and the values will be displayed in the respective fields as read only data. In the absence of Oracle Banking Credit Facilities Process Management integration, the user has to capture the valuation details manually in this data segment.

Table 3-28 Valuation Details – Field Description

Field	Description

Collateral Description	Displays the description of the collateral.
Liability ID	Displays the liability ID
Liability Description	Displays the liability description.
Hair Cut %	Displays the hair cut percentage.
Owners	Displays the owners name of the collateral.
Add Valuation	Click Add Valuation to add valuation details. Add the valuation details if the collateral is evaluated.
Valuation Type	Select the type of valuation. Available options are External Internal
Valuation Amount	Specify the valuation amount of the collateral.
Agency Code	Specify the agency code.
Agency Name	Specify the name of agency.
Valuation Date	Select the valuation date. Date should not be earlier than the Loan Application Date .

Table 3-28 (Cont.) Valuation Details – Field Description

Field	Description
Action	- Click  to save the records. - Click  to remove the records. - Click  to edit the added records - Click  to delete the added records.

Note

All the fields will be fetched from Oracle Banking Credit Facilities Process Management in read only mode if integrated with Oracle Banking Credit Facilities Process Management.

- Click **Save** to save the valuation details.
- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The User cannot to proceed to the next data segment, without capturing the mandatory data.

3.5.4 Review

This topic provides the systematic instructions to view the summary of each of the data segments in the Loan Underwriting Stage.

The system displays the summary of each of the data segments in the given stage.

To view the summary of all the data segments:

- Click **Next** in previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Review** screen displays.

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Loan Underwriting** stage for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **Loan Assessment**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the **Loan Underwriting** stage.
The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
 7. Click **Close** to close the window.
OR
Click **Go to Free Task**.
The system successfully moves the Application Reference Number along with the process reference numbers [Retail Loans] to the **Loan Assessment** stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3.6 Loan Assessment Stage

This topic describes the systematic instructions to move the loan application to assessment stage.

After the application entry, enrichment and underwriting data segment details are captured and verified, Oracle Banking Originations Cloud Service receives the assessment details from Decision Service.

Consequent to the Decision Service integration, the **Assessment Details** data segment screen displays the System recommended decision, Total Weighted score, Grade, recommended Pricing (based on the approval recommendation) for the Loan application, which is fetched real-time from Decision Service. Also, the detailed weightage score on the respective facts along with the Scoring model matrix is made available applicant wise for scrutiny and further action by the credit officer.

To assess the loan application:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Loan Assessment** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Qualitative Scorecard](#)
This topic provides the systematic instructions to capture the relevant evaluation details Applicant wise (if more than one applicant) and the scores are automatically displayed based on the Question / Answer configuration provided for this type of score card.
- [Assessment Details](#)
This topic provides the systematic instructions to view the total weightage score of the Applicant or Applicants, in case of multiple Applicants in the Loan Account with Overdraft.
- [Review](#)
This topic provides the systematic instructions to view the summary of each data segment in the Loan Assessment stage.

3.6.1 Qualitative Scorecard

This topic provides the systematic instructions to capture the relevant evaluation details Applicant wise (if more than one applicant) and the scores are automatically displayed based on the Question / Answer configuration provided for this type of score card.

Qualitative Scorecard Details is the first data segment of Loan Assessment stage. The user can acquire the application from Free Tasks list.

The Qualitative score card screen enables the user to capture the relevant evaluation details Applicant wise (if more than one applicant) and the scores are automatically displayed based on the Question / Answer configuration provided for this type of score card. The relevant qualitative score card ID is attached to the Loan Business Product and thereby the Loan Account which uses this Business product inherits the score card attributes for evaluation.

To capture the qualitative scorecard details:

1. On acquiring the **Loan Assessment** task from the **Free Task**.

The **Qualitative Scorecard** screen appears.

Figure 3-47 Qualitative Scorecard

The screenshot displays the 'Qualitative Scorecard' interface. At the top, there's a header with 'Assessment - 006APP000160846' and navigation tabs: 'Qualitative Scorecard', 'Application Details', 'Application Info', 'Customer 360', 'Documents', and 'More'. Below the header, the 'Qualitative Scorecard' section is active, showing a questionnaire for 'Mr. Brett G Dalton Jr.' (marked as 'PENDING'). The questionnaire is titled 'HEQ101 - Questionnaire for Home Loan 101'. It contains four questions with dropdown answers:

Question	Answer
How many years in the current employment?	Less than 3 years
What is the current residence type?	Rented
How many members are dependent on the applicant?	1
How long applicant staying in the current residence?	Less than 3 years

At the bottom, there are buttons for 'Audit', 'Cancel', 'Request Clarification', 'Save and Close', and 'Next'. The screen is labeled 'Screen(1/3)' in the top right corner.

2. Specify the fields on **Qualitative Scorecard** screen.

For more information on fields, refer to the field description table.

Table 3-30 Qualitative Scorecard – Field Description

Field	Description
Applicant Name	Displays the name of the applicant.
Questionnaire Code	Displays the Questionnaire code.
Questionnaire Description	Displays the description of the Questionnaire code.
Question	Displays the question configured for the Questionnaire code.

Table 3-30 (Cont.) Qualitative Scorecard – Field Description

Field	Description
Answer	Select the answer from the drop-down values available. The answers are populated based on the Answers configured in the Questionnaire code. According to the AI feature enabled in the Origination Preference screen, the drop-down value is automatically selected based on the response from the Large Language Model.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The user cannot proceed to the next data segment, without capturing the mandatory data.

3.6.2 Assessment Details

This topic provides the systematic instructions to view the total weightage score of the Applicant or Applicants, in case of multiple Applicants in the Loan Account with Overdraft.

Assessment Details is the next data segment of Loan Assessment stage. The user can acquire the application from FREE TASK. **Assessment Details** screen enables the user to understand the evaluation and provide the system recommendation based on the following parameters.

- **Validation Model**
- **Borrowing Capacity**
- **Qualitative Score**
- **Quantitative Score**
- **Decision and Grade**
- **Pricing**

To view assessment details:

1. Click **Next** in previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Assessment Details – Validation Model** screen displays.

Remarks

Cancel Submit

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. If the Proceed option is selected, then the application proceeds based on the assessment decision.
 - It will logically complete the **Loan Assessment** stage for the loan application if the system recommendation is **Approved**. The Workflow Orchestrator will automatically move this application to the **Account Parameter Setup** stage.

- If the system recommendation is **Manual** then, the Manual Credit Assessment stage is generated for this loan application.
 - If the system recommendation is **Rejected** then the application is terminated. The stage movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
 - Select the **Return to Application Entry Stage** to make application entry stage available in free task for edit.
 - Select the **Return to Application Enrichment Stage** to make enrichment stage available in free task.
 - Select the **Return to Application Underwriting Stage** to make underwriting stage available in free task.
 - Select the **Reject Application** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the **Loan Assessment** stage.
- The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.
- OR
- Click **Go to Free Task**.

The system successfully moves the Application Reference Number along with the process reference numbers [Retail Loans] to the Manual Credit Assessment stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3.7 Manual Credit Assessment

This topic describes the systematic instructions to move the loan application to manual credit assessment stage.

The Manual Credit Assessment stage of the retail loan account open process work-flow is enabled the bank to manually assess the application and provide the recommendation for the approval / rejection of the application. As a reference, the relevant completed data segments will be made available to the Approver before the application can be moved to the next stage. These completed data segments are from the Application Entry Stage, Application Underwrite Stage and Application Assessment Stage. The data segments are displayed in view only mode for the Credit Officer to analyze.

To capture manual credit assessment details:

1. Scan the records that appears in the **Free Task** list.

2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Manual Credit Assessment** stage is displayed

The Manual Credit Assessment stage has the following data segments in which the user can only view the data:

- **Loan Details** - For detailed information, refer the Loan Details data segment in the Application Entry stage.
- **Customer Information** – For detailed information, refer the Customer Information data segment in the Application Entry stage.
- **Financial Details:** - For detailed information, refer the Financial Details data segment in the Application Entry stage.
- **Credit Rating Details:** - For detailed information, refer the Credit Rating Details data segment in the Loan Underwriting stage.
- **Legal Opinion** - For detailed information, refer the Legal Opinion data segment in the Loan Underwriting stage.
- **Valuation Details** - For detailed information, refer the Valuation Details data segment in the Loan Underwriting stage.

Refer below chapters for detailed information on data segment that are editable.

- [Manual Assessment](#)
This topic provides the systematic instructions to modify the account details and recommend for the approval / reject the loan application.
- [Review](#)
This topic provides the systematic instruction to view all the data segments in the Manual Credit Assessment stage.

3.7.1 Manual Assessment

This topic provides the systematic instructions to modify the account details and recommend for the approval / reject the loan application.

Manual Assessment is the data segment which enables the bank user to modify the loan details and recommend for the approval/reject the loan application. The user can acquire the application from Free Tasks list and assess all the View Only data segments.

To capture manual assessment:

1. On acquiring the **Manual Credit Assessment** task from the **Free Tasks**.

The **Manual Credit Assessment** screen displays.

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3.8 Manual Credit Decision

This topic describes the systematic instructions to move the loan application to manual credit decision stage.

The **Manual Credit Decision** stage of the retail loan account open process work-flow enables the bank to make the decision on whether the recommended loan amount can be approved to the loan applicant / borrower.

To capture manual credit decision details:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the Action column of the appropriate record. The Manual Credit Decision stage is displayed.

The Manual Credit Decision stage has the following data segments in which the user can only view the data:

- **Loan Details** - For detailed information, refer the Loan Details data segment in the Application Entry stage.
- **Customer Information** – For detailed information, refer the Customer Information data segment in the Application Entry stage.
- **Financial Details:** - For detailed information, refer the Financial Details data segment in the Application Entry stage.
- **Credit Rating Details:** - For detailed information, refer the Credit Rating Details data segment in the Loan Underwriting stage.
- **Valuation Details** - For detailed information, refer the Valuation Details data segment in the Loan Underwriting stage.
- **Legal Opinion** - For detailed information, refer the Legal Opinion data segment in the Loan Underwriting stage.
- **Manual Assessment** – For details information, refer the Assessment Details data segment in the Manual Credit Assessment stage.

Refer below chapters for detailed information on data segment that are editable.

- [Manual Decision](#)
This topic provides the systematic instructions to review and approve the application manually in manual credit decision stage.
- [Review](#)
This topic provides the systematic instruction to view all the data segments in the in the Manual Credit Decision stage.

3.8.1 Manual Decision

This topic provides the systematic instructions to review and approve the application manually in manual credit decision stage.

Manual Decision is the first data segment of Manual Credit Decision stage. The user can acquire the application from Free Tasks list.

To capture manual decision:

1. On acquiring the **Manual Credit Decision** task from the **Free Task**.

The **Manual Credit Decision** displays.

The system successfully moves the Application Reference Number along with the process reference numbers to the Account Parameter Setup stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3.9 Account Parameter Setup

This topic describes the systematic instructions to move the loan application to account parameter setup stage.

The **Account Parameter Setup** stage is the next representative stage in the Retail Loan Account Open process. After the **Loan Assessment** or **Manual Credit Decision** is completed successfully, the application can be acquired by the user who has the access rights for the given stage and progress with the data capture. The user can acquire the application from **Free Tasks** list.

The **Account Parameter Setup** stage has the following reference data segments:

- **Interest and Charges Details** - For detailed information, refer the Loan Interest and Charge details data segment in the Application Enrichment stage.
- **Mortgage Insurance** – For detailed information, refer the Mortgage Insurance data segment in the Application Enrichment stage.
- **Loan Disbursement** - For detailed information, refer the Loan Disbursement data segment in the Application Enrichment stage.
- **Loan Repayment** - For detailed information, refer the Loan Repayment data segment in the Application Enrichment stage.
- **Assessment Details** - For detailed information, refer the Manual Assessment data segment in the Manual Credit Assessment stage.

All the data segments are carried forward from **Application Enrichment**. If the details are captured in **Application Enrichment**, the same will be fetched automatically. The user can modify the captured details and all the data segments are mandatory to capture the details to move the application to the next stage.

If there is any change in the price (interest), the application will be redirected to the **Supervisor Approval**, otherwise submitting this step will move the application to the next reference stage which is the **Offer Issue**.

Note

Refer to the **Application Enrichment Stage** for the detailed explanation.

- [Review](#)
This topic provides the systematic instruction to view all the data segments in the Account Parameter Setup stage.

3.9.1 Review

This topic provides the systematic instruction to view all the data segments in the Account Parameter Setup stage.

The system displays the summary of each of the data segments in the given stage.

To view the summary of all the data segments:

1. Click **Next** in previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Review** screen displays.

Outcome

Select an Outcome
Proceed

Remarks

Cancel Submit

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Account Parameter Setup** stage for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **Supervisor Approval or Offer Issue**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- The application will be directly moved to Offer Issue stage if there is no change in Loan Interest data segment.
 - The application will be moved to Supervisor Approval stage if there is any change in Price (Interest) in Loan Interest data segment.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the **Account Parameter Setup** stage.
- The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.
- OR
- Click **Go to Free Task**.
- The system successfully moves the Application Reference Number along with the process reference numbers to the Supervisor Approval or Offer Issue stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3.10 Supervisor Application Approval Stage

This topic describes the information on the various data segments to view and approve the price change in the Supervisor Application Approval stage.

The **Supervisor Application Approval** stage has the following data segments in which the user can only view the data:

- **Assessment Details** - For detailed information, refer the Manual Assessment data segment in the Manual Credit Assessment stage.
- [Approval Details](#)
This topic provides the systematic instructions to view and approve the application.
- [Review](#)
This topic provides the systematic instruction to view all the data segments in the Supervisor Approval stage.

3.10.1 Approval Details

This topic provides the systematic instructions to view and approve the application.

The **Approval Details** is the first data segment of **Supervisor Approval** stage. The user can acquire the application from **Free Tasks** list.

1. On acquiring the **Supervisor Approval** stage the **Approval Details** data segment appears
The **Approval Details** screen displays.

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Supervisor Approval** stage for the Loan Application. The Workflow Orchestrator will automatically move this application to the next processing stage, **Offer Issue**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - Select the **Return to Application Entry Stage** to make application entry stage available in free task for edit.

- Select the **Return to Application Enrichment Stage** to make enrichment stage available in free task.
 - Select the **Return to Application Underwriting Stage** to make underwriting stage available in free task.
6. Click **Submit** to submit the **Supervisor Approval** stage.
The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
 7. Click **Close** to close the window.

OR

Click **Go to Free Task**.

The system successfully moves the Application Reference Number along with the process reference numbers [Retail Loans] to the **Offer Issue** stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3.11 Offer Issue Stage

This topic describes the information on the various data segments to generate the offer in the Offer Issue stage.

After due diligence and Assessment approval, the Application will move to the Offer issue stage where the Approver will generate the offer letter. As a reference, the relevant completed data segments will be made available to the Approver before the application can be moved to the next stage. These completed data segments are from the Application Underwrite Stage and Application Assessment Stage. The data segments are displayed in view only mode for the Approver to browse.

To perform actions on issued offer:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Offer Issue** stage is displayed.

In the Offer Issue stage, provide the required details under each data segment. The Offer issue stage has the following reference data segments:

- **Credit Rating Details**: - For detailed information, refer the Credit Rating Details data segment in the Loan Underwriting stage.
- **Valuation Details** - For detailed information, refer the Valuation Details data segment in the Loan Underwriting stage.
- **Legal Opinion** - For detailed information, refer the Legal Opinion data segment in the Loan Underwriting stage.

Refer below chapters for detailed information on data segment that are editable.

- [Assessment Summary](#)
This topic provides the systematic instructions to view the assessment summary.

- [Document Generation](#)
In this data segment you can generate and dispatch the documents that are configured.
- [Review](#)
This topic describes systematic instructions to view all the details of offer issue.

3.11.1 Assessment Summary

This topic provides the systematic instructions to view the assessment summary.

Assessment Summary is the view only data segment of Offer Issue stage.

To view the assessment summary:

1. On acquiring the Offer Issue stage from the FREE Task screen.
The **Assessment Summary** screen displays.

Figure 3-69 Assessment Summary

The screenshot shows the 'Assessment Summary' screen for Offer Issue - 006APP000160861. The interface includes a sidebar with navigation options: Loan Repayment Details, Assessment Summary (selected), Document Generation, and Review. The main content area is divided into several sections:

- Application Details:** Requested Amount: GBP 99,900.00; Tenure: 5 Years 0 Months 0 Days.
- Interest Rate:** A table with columns: Interest Description, Interest Rate (%), Rate Type, Margin / Variance (%), and Effective Rate (%). The data row shows: Interest Rate, 5.4, Fixed, 0, 5.4.
- Auto Decision Details:** Approved Amount: GBP 99,900.00; Total Weighted Score: 91; Grade: A; System Recommendation: Approved; Manual Decision: -.
- Revised Interest Rate:** A table with columns: Interest Description, Interest Rate (%), Rate Type, Proposed Margin / Variance (%), and Effective Rate (%). The data row shows: Interest Rate, 5.4, Fixed, 0.3, 5.7.

At the bottom, there are buttons for Audit, Cancel, Request Clarification, Back, Save and Close, and Next.

2. Specify the fields on **Assessment Summary** screen.
For more information on fields, refer to the field description table.

Table 3-40 Assessment Summary – Field Description

Field	Description
Requested Amount	Displays the requested amount.
Tenure	Displays the tenure.
Base Rate	Displays the interest rate without including margin / variance.
Rate of Interest	Displays the rate of interest.
Margin	Displays the approved margin. This field displays if the Rate Type is selected as Floating .
Variance	Displays the approved variance. This field displays if the Rate Type is selected as Fixed .
Total Weightage Score	Displays the total weightage score.
Approved Amount	Displays the final approved loan amount.

Table 3-40 (Cont.) Assessment Summary – Field Description

Field	Description
Proposed Margin	Displays the proposed margin from Decision Service. This field displays if the Rate Type is selected as Floating .
Proposed Variance	Displays the proposed variance from Decision Service. This field displays if the Rate Type is selected as Fixed .
Effective Rate	Displays the effective rate of interest.
System Recommendation	Displays the system recommendations.
Grade	Displays the grade of the applicant.
Manual Decision	Displays the manual decision.

Note

Before generating the offer letter, the system fetches the most recent interest rate and updates in the **Interest and Charges** data segment accordingly. This ensures that the offer letter and the loan application reflect accurate information.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

3.11.2 Document Generation

In this data segment you can generate and dispatch the documents that are configured.

In the Document Generation data segment, the list of documents that are maintained within the document generation event and fulfills the rule criteria are pre-populated in the tabular format. This document generation events are defined in the **Advice Maintenance** screen. Each documents appears separately to generate and dispatch.

To generate and dispatch the document:

- On acquiring the **Offer Issue** task, the **Document Generation** stage is displayed.

Figure 3-70 Document Summary

Document Name	Receiving Party	Delivery Mode	Delivery Details	Status	Status Details	Action
☐ RPM- Offer Issue_Schedule	Brett G Dalton	Primary	Delivery Mode: Email	Not Generated		
☐ RPM- Offer Issue	Brett G Dalton	Primary	Delivery Mode: Email	Not Generated		
☐ RPM- Counter_Offer_Notice	Brett G Dalton	Primary	Delivery Mode: Email	Not Generated		

2. In the **Document Generation** section, select the check box to select the document from the list. It is mandatory to select at least one document

The below actions can be performed on the selected document:

- **Generate:** Click this button to generate the selected document. On clicking this button, the system invokes a call to the report generation service which generates a PDF output for the advice configured in the **Advice Maintenance** screen. Once the output is generated the documents are stored in the document managed service (DMS) along with the reference ID. This reference ID fetches the document on click the **Generate Document** link in the Document column.
- **Dispatch:** Click this button to dispatch the selected generated documents. User can only dispatch those documents which are not already dispatched. On clicking this button, the system validates whether the document is already generated. Once the validation is successful the system dispatch the document to the default setting defined in the **Advice Maintenance** screen.
- **Reset:** Click this button to reset the action performed on the document.

For more information on fields, refer to the field description table.

Table 3-41 Document Generation – Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. This link appears only if the document is generated.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment. If the primary or joint applicant is minor, the guardian or custodian name will display as the receiving party associated with the minor applicant.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen. The available options are: • Email • Post • Print • e-Sign Remote • e-Sign In-Person
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. • If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. • If the delivery mode is Post then the preferred address of every recipient is displayed. • If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. • If the delivery mode is Print then the Not Applicable text appears.

Table 3-41 (Cont.) Document Generation – Field Description

Field	Description
Status	Displays the status of the documents based on the actions performed on clicking Generate or Dispatch button. Once the dispatch process is initiated for the generated documents, the status appears based on the selected default mode of delivery. - If the mode of delivery is Email then on the successful trigger the status appears as Email Sent. - If the mode of delivery is E-Sign Remote or E-Sign In-Person then on the successful trigger the status appears as E-Signing Initiated. - If the mode of delivery is Post then on the successful trigger the status appears as Dispatched. - If the mode of delivery is Print then on the successful trigger the status appears as Ready for Print. - In case the dispatch process fails due to technical error then the status appears as Failed.
Status Details	Displays the status details of the document. Click the icon to view the generation and dispatched details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. - Click  to edit the delivery mode. - Click  to save the edited delivery mode. This icon appears once you are edit mode.

Note

The generated offer letter displays the latest interest and charge rates that align with the loan application.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

3.11.3 Review

This topic describes systematic instructions to view all the details of offer issue.

The system will display the summary of each of the data segments in as many sections as the number of data segments in the given stage.

To view the summary of all data segments:

- Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Review - Offer Issue** screen displays.

Proceed

Remarks

Cancel Submit

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select **Proceed** outcome from the drop-down list. It will logically complete the **Offer Issue** stage for the Loan Application. The Workflow Orchestrator will automatically move this application to the next processing stage, **Offer Accept/Reject**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - Select the **Return to Application Entry** Stage to make application entry stage available in free task for edit.

- Select the **Return to Application Enrichment** Stage to make enrichment stage available in free task.
 - Select the **Return to Application Underwriting** Stage to make underwriting stage available in free task.
 - Select the **Reject Application** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit offer issue stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
 7. Click **Close** to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Loan Account] to the Application Offer Accept / Reject stage.

Note

This application is available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3.12 Offer Accept / Reject Stage

This topic describes the information on the various data segments to accept / reject the offer in the Offer Accept / Reject stage.

After the **Offer Issue** stage, the offer letter will be sent or communicated to the borrower or applicant. The **Offer Accept / Reject** stage will enable the user to record the customer response – Accept or Reject as the case may be. Also, the offer made can be amended based on Customer request – viz., change in Principal Amount, Interest Rate, Margin or Tenure. The post offer amend can be routed back to the relevant previous completed stages like Application Entry / Loan Application Enrichment. If the business wants the Loan Underwriting stage or the Loan Assessment stage to be redone, they can be configured accordingly, post which the new offer with the revised terms will be issued to the borrower or applicant for acceptance.

To perform actions on issued offer:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Offer Accept /Reject** stage is displayed.

In the **Offer Accept / Reject** stage, provide the required details under each data segment. The Offer Accept / Reject stage has the following data segments which user can only view.

- **Offer Issue:** - For detailed information, refer the Offer Issue data segment in the Offer Issue stage.
- **Assessment Summary** - For detailed information, refer the Assessment Summary data segment in the Offer Issue stage.

Refer below chapters for detailed information on data segment that are editable.

- [Document Acceptance](#)
In this data segment user can capture the acceptance of the documents that are already generated and dispatched.
- [Review](#)
This topic provide the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

3.12.1 Document Acceptance

In this data segment user can capture the acceptance of the documents that are already generated and dispatched.

The Document Acceptance data segment populates the list of documents that appeared in the **Document Generation** data segment and are mark as **Yes** in the **Acceptance** field in the **Advice Maintenance** screen.

If the document is marked as **No** in the Acceptance field in the **Advice Maintenance** screen then the e-sign acceptance process is not required for that document and hence it will not appear in this data segment.

To accept the document:

1. On acquiring the **Offer Accept/Reject** task from the **FREE Task** screen.

The **Document Acceptance** screen displays.

Figure 3-73 Document Acceptance

2. In the **Document Acceptance** section, select the check box to select the document from the list and perform appropriate actions.

For more information on fields, refer to the field description table.

Table 3-43 Document Acceptance – Field Description

Field	Description
Refresh Status	Click Refresh Status button to refresh the status of the documents.

Table 3-43 (Cont.) Document Acceptance – Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. • Generated Document: This link appears only if the document is generated at least once. • Accepted Document: This link appears only if the E-Signed document is uploaded.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment. If the primary or joint applicant is minor, the guardian or custodian name will display as the receiving party associated with the minor applicant.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen. The available options are: • Email • Post • Print • e-Sign Remote • e-Sign In-Person
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. • If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. • If the delivery mode is Post then the preferred address of every recipient is displayed. • If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. • If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on the document.
Status Details	Displays the status details of the document. Click the icon to view the generation, dispatched and acceptance details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. • View: User can view the documents only if the Delivery Mode is defined as E-Sign Remote or E-Sign In-Person. • Upload Document: User can upload documents only if the Delivery Mode is defined as Email, Print or Post. • Delete: User can upload documents only if the Delivery Mode is defined as Email, Print or Post.

Table 3-43 (Cont.) Document Acceptance – Field Description

Field	Description
Customer Response	Select the customer response for the documents. The available options are: Accept: Select to accept the application documents. User can select this option only if the acceptance status of all the document is Accepted. Reject: Select to reject the application documents. If the acceptance status of any one of the document is declined then this option appears auto-selected. Amend: Select to amend the application document status.
Date of Response	Select the date on which the customer response is captured. This date should be greater or equal to current date.
Reason	Select the reject reason from the drop-down list.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

3.12.2 Review

This topic provide the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in the given stage.

To view the summary:

- Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Review** screen displays.

Table 3-44 Review - Offer Accept / Reject – Field Description

Data Segment	Description
Assessment Summary	Displays the details of assessment summary.
Document Acceptance	Displays the number of documents in each status within the document acceptance.

- Click **Submit** to reach the **Stage Movement Submission** screen, where the overrides, checklist and documents for this stage are verified.

The **Stage Movement Submission** screen displays.

Figure 3-75 Stage Movement Submission

Stage Movement Submission

Override
No overrides generated for acceptance.

Checklist
No checklists mapped to the current stage.

Outcome

Select an Outcome
Proceed

Remarks

Cancel Submit

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

- In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.

The **Checklist** screen appears.

4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select **Proceed** outcome from the drop-down list. It will logically complete the Offer Accept/Reject stage for the Loan Application. The Workflow Orchestrator will automatically move this application to the next processing stage, Account Approval on Host. The stage movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code.
 - If the **Customer Response** is selected as **Accept** in Offer Accept/Reject screen, then submit of this stage, will move the application into the Account Approval stage.
 - If the **Customer Response** is selected as **Reject** in Offer Accept/Reject screen, then submit of this stage, will terminate the application.
 - If the **Customer Response** is selected as **Amend** in Offer Accept/Reject screen, then submit of this stage, will move the application into the Post Offer Amendment stage.
 - Select the **Return to Application Entry** Stage to make application entry stage available in free task for edit.
 - Select the **Return to Application Enrichment** Stage to make enrichment stage available in free task.
 - Select the **Return to Application Underwriting** Stage to make underwriting stage available in free task.
 - Select the **Return to Assessment** stage to make assessment stage available in free task.
 - Select the **Reject Application** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the Offer Accept/ Reject stage.

The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Loan Account] to the Account Approval on Host stage.

Note

This application is available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

If account creation process is set to be as automatic workflow, then there will not be an Account Creation stage configured at the Business Process level. In this case, when the user submits the Offer Accept/Reject stage, Loan Account creation request will be triggered from Oracle Banking Originations Cloud Service - Account Open Process Management workflow to the HOST.

However, if there is an error encountered while submitting to the host, a new wait task is created and user once acquire the task, Handoff Retry data segment will be displayed with the host errors.

Figure 3-76 Handoff Retry

This stage will have the following outcomes:

- **Retry**
- **Return**

Select **Retry**, for any technical errors or select the **Return**, if user wants to correct any values, wherein the application will move to the Application Entry stage.

The following notification will be sent to the user, if the application is initiated from assisted channel, and to the Oracle Banking Digital Experience customer, if application is initiated from self-service.

Figure 3-77 Account Initiation Notification

3.13 Post Offer Amendment Stage

This topic describes the information on the various data segments to request for amendment of loan application in the Post Offer Amendment stage.

Post Offer Amendment stage enables the user to request for amendment of Loan components after the Offer is Issued by the bank. This stage will appear only if the **Customer Response** is selected as **Amend** in **Offer Accept/Reject** data segment.

To perform actions on post offer amendment:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Post Offer Amendment stage is displayed.

The **Post Offer Amendment** stage has the following data segments which user can only view:

- **Offer Issue:** - For detailed information, refer the Offer Issue data segment in the Offer Issue stage.

Refer below chapters for detailed information on data segment that are editable.

- [Post Offer Amendment](#)
This topic provides the systematic instructions to request for amendment of loan components after the Offer is Issued by the bank.
- [Loan Disbursement Details](#)
This topic describes systematic instructions to configure loan disbursement post offer amendment details.
- [Loan Repayment Details](#)
This topic describes systematic instructions to enables the user to capture the loan repayment details.
- [Summary](#)
This topic provides the systematic instruction to view all the data segments in the Post Offer Amendment stage.

3.13.1 Post Offer Amendment

This topic provides the systematic instructions to request for amendment of loan components after the Offer is Issued by the bank.

Post Offer Amendment data segment is the first data segment of Post Offer Amendment stage. The user can acquire the application from **Free Tasks** list.

Only if Customer Response is selected as Amend in **Offer Accept/Reject** data segment.

To perform actions on post offer amendment:

1. On acquiring the post offer amendment stage, the **Post Offer Amendment** screen appears.

Figure 3-78 Post Offer Amendment

Table 3-45 Post Offer Amendment – Field Description

Field	Description
Primary Applicant	Displays the primary applicant name.
Approved Loan Amount	Displays the approved loan amount.
Loan Tenure	Displays the selected loan tenure.
Stage	Select the type of repayment. All type of repayment methods configured in the Business Product Preferences data segments of the Business Product Configuration screens appears in the drop-down list.
Stage Term <Term Unit>	Displays the default stage term configured in the Business Product Preferences data segments of the Business Product Configuration screens. The separate column appears for separate term units.
Repayment Frequency	Select the repayment frequency from the drop-down list. The available options appears based on the configuration set in the Business Product Preferences data segments of the Business Product Configuration screens: - Daily - Weekly - Bi-Monthly - Monthly - Quarterly - Half Yearly - Yearly
Rate Type	Displays the rate type.

Table 3-45 (Cont.) Post Offer Amendment – Field Description

Field	Description
Action	Click  to add the record. Click  to delete the added record. Click  to edit the added record. This field appears when the loan tenure is modified.
Interest Description	Displays the interest description of the selected interest rate code.
Interest Rate (%)	Specify the interest rate. Interest Rate is fetched from host product to which this loan account is mapped via the Business Product configuration. The system validates the Floor and Ceiling rates for each interest component. • If the effective rate is less than the floor rate, the system stamps the floor rate for that component. • If the effective rate is greater than the ceiling rate, the system stamps the ceiling rate for that component.
Rate Type	Select the rate type from the drop-down list. The available options are: • Fixed • Floating
Margin / Variance (%)	Click the link of margin or variance in percentage. It displays the pop-up list of all margins. • Product Margin • Risk based Margin • Discretionary Margin • Relationship Benefit Margin • Bundle Margin The Margin field appears if the Rate Type is selected as Floating. The Variance field appears if the Rate Type is selected as Fixed. The Bundle Margin is displayed in the drop-down list only if loan is opened as part of a bundle application and bundle margin benefit is applicable.
Effective Rate (%)	Displays the amended effective rate. Effective Rate = Rate of Interest + Margin/Variance.
Approval Details	This section displays the following details related to the approval.
Approved Amount	Displays the approved amount. This field will be blank for Manual Assessment.
Approved Tenure	Displays the approved tenure.
System Recommendation	Displays the system recommendations. Available options are: • Approved • Manual • Rejected
Manual Decision	Displays the manual decision details
Total Weighted Score	Displays the total weighted score.
Grade	Displays the grade of the applicant.

Table 3-45 (Cont.) Post Offer Amendment – Field Description

Field	Description
Revised Interest Rate	This section displays the revised interest rate based on the details updated in Amendment Details section.
Proposed Margin/ Variance(%)	Displays the margin or variance rate percentage. This field displays Margin (%) if the Rate Type is selected as Floating . This field displays Variance (%) if the Rate Type is selected as Fixed .
Offer Issue Date	Displays the date of offer issued.
Offer Expiry Date	Displays the date based on the expiry period configuration done at the Business Product level which is used for this loan.
Amendment Details	In this section, user can capture the details in the following fields.
Offer Amend Date	Displays the date of offer amend.
Approved Amount	Specify the approved loan amount. This field will be blank for Manual Assessment.
Loan Tenure	Specify the loan tenure. The stage grid reappears when the loan tenure changes, allowing the user to enter the revised tenure details.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

3.13.2 Loan Disbursement Details

This topic describes systematic instructions to configure loan disbursement post offer amendment details.

The **Loan Disbursement Details** are pushed into the host as a part of account open process data share – API's are provided for the same. The **Loan Disbursement Details** enables the user to capture the various disbursement methods.

To add loan disbursement details:

- Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

If **Account Type** is selected as **Own Internal Account** in **Loan Details** data segment.

The **Loan Disbursement Details - Own Internal Account** screen displays.

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
6. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Post Offer Amendment** stage for the loan application. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- If there is change in Approved Amount or Loan Tenure, then submit of this stage will move the application to **Loan Assessment Stage**.
 - If there is change in Rate of Interest, then submit of this stage will move the application to **Supervisor Approval Stage**.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
7. Click **Submit** to submit the **Post Offer Amendment** stage.
- The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
8. Click **Close** to close the window.
- OR
- Click **Go to Free Task**.
- The system successfully moves the Application Reference Number along with the process reference numbers to the Account Approval stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3.14 Account Approval Stage

This topic describes the information on the various data segments to view the captured details and approve the application in the Account Approval stage

To approve an account opening:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Account Approval stage is displayed.

The Account Approval stage has the following data segments which user can only view:

- **Applicants** – For detailed information, refer the Applicantst data segment in the Application Entry stage.
- **Loan Details** - For detailed information, refer the Loan Details data segment in the Application Entry stage.
- **Mandate Details** – For detailed information, refer the Mandate Details data segment in the Application Entry stage.
- **Financial Details**: - For detailed information, refer the Financial Details data segment in the Application Entry stage.
- **Collateral Details** – For detailed information, refer the Collateral Details data segment in the Application Entry stage.
- **Terms and Conditions** – For detailed information, refer the Terms and Conditions data segment in the Application Entry stage.
- **Mortgage Insurance**: For details information, refer the Mortgage Insurance data segment in the Application Enrichment stage.

- **Credit Rating Details:** - For detailed information, refer the Credit Rating Details data segment in the Loan Underwriting stage.
- **Valuation Details** - For detailed information, refer the Valuation Details data segment in the Loan Underwriting stage.
- **Legal Opinion** - For detailed information, refer the Legal Opinion data segment in the Loan Underwriting stage.
- **Assessment Summary:** For details information, refer the Assessment Summary data segment in the Offer Issue stage.
- **Offer Issue:** For details information, refer the Offer Issue data segment in the Offer Issue stage.
- **Offer Accept/Reject:** For details information, refer the Offer Accept/Reject data segment in the Offer Accept/Reject stage.

Refer below chapters for detailed information on data segment that are editable.

- [Collateral Perfection Details](#)
This topic provides the systematic instructions to view the collateral perfection details.
- [Loan Summary Details](#)
This topic provides the systematic instructions to view and approve the application.
- [Review](#)
This topic provides the systematic instruction to view all the data segments in the Account Approval stage.

3.14.1 Collateral Perfection Details

This topic provides the systematic instructions to view the collateral perfection details.

Collateral Perfection Details is the first data segment of Account Approval stage.

To capture collateral perfection details:

1. On acquiring the Account Approval Stage the Collateral Perfection Details data segment appears.

If the **Customer Type** is selected as **Individuals**

The **Collateral Perfection Details - Individuals** screen displays.

Figure 3-90 Collateral Perfection Details

- Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 3-52 Collateral Perfection Details – Field Description

Field	Description
Applicant Name	Displays the applicant name. Note : The field appears only if the Customer Type is selected as Individuals .
Name of Business	Displays the name of the business. Note : The field appears only if the Customer Type is selected as Small and Medium Business (SMB) .
Date of Birth	Displays the applicant's date of birth. Note : The field appears only if the Customer Type is selected as Individuals .
Date of Incorporation	Displays the date of incorporation for the business. Note : The field appears only if the Customer Type is selected as Small and Medium Business (SMB) .
E-mail	Displays the e-mail id of the applicant.
Mobile	Displays the mobile number of the applicant.
Collateral ID	Displays the Collateral ID.
Collateral Description	Displays the description of the collateral.
Liability ID	Displays the Liability ID
Liability Description	Displays the Liability description.
Registration Authority	Specify the name of the registration authority.
Registration Request Date	Select the date when the registration is requested.
Registration Date	Select the date when the registration is completed.
Confirmation Date	Select the date when the registration is confirmed.
Registration Status	Specify the status of registration.
Registration Reference Number	Specify the registration reference number.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

Note

All the fields will be fetched from Oracle Banking Credit Facilities Process Management in read only mode if integrated with Oracle Banking Credit Facilities Process Management.

3.14.2 Loan Summary Details

This topic provides the systematic instructions to view and approve the application.

- Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

If **Customer Response** is selected as **Amend** in **Offer Accept/Reject** data segment.

The **Loan Summary Details** screen displays.

The **Application Details** screen displays separate cards for various products initiated as part of the single application. For more information on fields, refer to the field description table below.

Note

The fields marked as **Required** are mandatory.

Table 3-55 Application Details – Field Description

Field	Description
Application Number	Displays the application number.
Application Date	Displays the date and time on which the application was initiated.
Channel	Displays the channel name.
Source By	Displays the name of the user who has sourced the application.
Priority	Displays the priority of the application. - High - Medium - Low

Table 3-55 (Cont.) Application Details – Field Description

Field	Description
Refresh	Click  to retrieve recent changes or updates made to the application.
Go To	Select an option from the drop-down list to view the application flow. • Simulation This field appears only when the application is initiated from Loan Stimulation.
<Product Name>	Displays the product name. In case on multiple product, different tabs appears with the respective product name. User can click the product names to view the respective application details.
Stage Details	In this section, all account opening stages appears with the status name and it's chronological order of the stage in the process.
Action	To perform below actions on the appeared stages, click the number of specific stage and select an option from the Action drop-down list: • Acquire & Edit Task : Select this option to acquire and edit the selected stage. • Acquire Task: Select this option to acquire the selected stage and it can be edited later. • View Stage Details: Select this option to view the stage details.
User ID Assigned	Displays the User ID of the user currently working on the product process. The label of this field changes dynamically based on whether the selected stage is In Progress or Completed . • When user selects a In Progress stage, the label will display as Assigned To. • When user selects a Completed stage, the label will display as Submitted By. If the task was auto submitted, then the value for such Completed stages will be displayed as Auto Submitted. • For Pending and skipped stages, this field will be hidden. Note: This field appears blank if the product process task is not acquired by any user.
Stage Start Date	Displays the start date of the current stage. It also display time in hours, minutes and seconds.
Time spent	Displays the days, hours and minutes spent on the current selected stage.

Table 3-55 (Cont.) Application Details – Field Description

Field	Description
<Application Tile>	In this tile, user can view the application specific details. Below field appears in this tile with respective details: • <Status of the Application>: Displays the current stage of the application • Expected Account Opening Date: Displays the date on which the account is opened. This field appears once the account opening process is completed. • Account Number: Displays the account number. This field appears once the account opening process is completed. • Expected Account Opening Date: Displays the date on which the account will be opened. • <Amount>: Displays the value based on the product. For example: – For the loan account opening application, the label of this field appears as Loan Amount. – For the saving, term deposit, and current account opting application. The label of this field appears as Initial Funding Amount. • Total Time Spent: Displays the total time spent on the application from the first to last stage.
<Applicant Details Tile>	In this tile, user can view the applicant details. Separate tiles appears for all the applicants that are involved in the application. Below field appears with the respective applicant details: • Role of the Applicant • Applicant Image • Applicant Name • Title • Customer 360 : Click this link to view the 360 degrees view of the customer information. The Customer 360 screen appears with the details. Based on the customer type, refer to the Retail 360 User Guide and Corporate 360 User Guide from the party section. • Date of Birth • Mobile Number • Email ID • CIF Number

Table 3-55 (Cont.) Application Details – Field Description

Details	Click the details icon to view below details of the documents: • Uploaded Time: Displays the uploaded date and time of the document in hours and mins. • Uploaded By: Displays the user name who uploaded the document . • Stage Uploaded: Displays the stage name on which the document is uploaded.
Document	Click  to select the document from machine to upload. You can remove the uploaded document before saving the record from the Action column. Post saving the record you must delete the record to remove the document. Below actions are perform on the uploaded document • You can preview already uploaded document. • You can download already uploaded document.

Table 3-56 (Cont.) Upload Document – Field Description

Field	Description
Actions	You can perform below actions on the added record: - Click  to save the record. - Click  to delete the record.

Note

Ensure that mandatory documents are uploaded, as the system will validate the same during the stage submission.

Mandatory documents can only be deleted in the same stage where it is uploaded.

Non-mandatory documents can be deleted in any stage.

3.15.5 Remarks

In this section you can view or post the remarks.

- Click **Remarks** to update any remarks that you want to post for the application that you are working on.

The **Remarks** screen is displayed.

Figure 3-100 Remarks

The screenshot shows a modal dialog box titled "Remarks" with a close button (X) in the top right corner. The main area of the dialog is a large, empty text field with the placeholder text "No Remarks Available". Below the text field is a rich text editor toolbar containing icons for undo, redo, bold (B), italic (I), underline (U), strikethrough (ABC), text color (A), background color (A), and a font size selector (labeled "- size -"). Below the toolbar is a text input area with the placeholder text "Enter text here...". In the bottom right corner of the dialog, there is a small icon of a paper plane inside a square, which is used to submit the remarks.

Remarks posted are updated with your User ID, Date, and are available to view in the next stages for the users working on that application.

3.15.6 Advices

You can view the advices that are shared with customer. Advices are generated post Application Entry stage is submitted.

- Click **Advices** to view the advice linked for the stage.
The **Advices** screen is displayed.

Figure 3-101 Advices

The system will generate the advice on submission of the stage. For Application Entry stage of Product, no advice is configured.

3.15.7 Conditions and Covenants

This topic provides the systematic instructions to add or edit conditions and covenants details for the loan applications.

Conditions

The Conditions are stipulations and constraints recorded in a contract to restrict the usage of funds, in order to ensure proper utilization of funds for the specified purposes and to adhere to a stipulated schedule.

Covenants

Often there are restrictions on borrowers while extending credit facilities. Sometimes, a borrower promises certain future acts to assure the lender that the conduct of business dealings is fair, healthy and in accordance with the best practices. The purpose of covenant is to assist the lender to ensure the health of loan facilities does not deteriorate suddenly or unexpectedly before maturity.

To add conditions:

1. From the **More** option, click the **Conditions & Covenants** to add or remove the conditions details.

The **Conditions & Covenants** page appears.

Table 3-59 (Cont.) Upload Document – Field Description

Field	Description
Actions	User can perform below actions on the added record: - Click  to save the record. - Click  to delete the record.

- Once the details are updated, click **Save**.

Clarification Request once raised moves the application to **Awaiting Customer Clarification** state. The application continues to be assigned to the user who had raised the request. All the applications for which the specified user has requested clarification can be viewed and actioned from the **Awaiting Customer Clarification** sub-menu available under **Task** menu.

- Select the application from the **Awaiting Customer Clarification** sub-menu available under the **Task** menu.
- Click the **Clarification Details** from the header.
- Select the specific clarification to take action on it.

Allowed actions are as following:

- Respond**
- Accept Clarification**
- Withdraw Clarification**

Once the Clarification is either withdrawn or accepted, the application moves back to the **My Task** sub-menu available under **Task** menu, post which the user can edit the application and submit the specified stage. Clarification once raised and actioned are available throughout the application processing by the other users working on the other stages of the application by clicking on **Clarification Details** from the header.

3.15.9 Solicitor Details

You can add the solicitor details using this section.

A solicitor is a legal practitioner who traditionally deals with most of the legal matters in some jurisdictions. A person must have legally-defined qualifications, which vary from one jurisdiction to another, to be described as a solicitor and enabled to practice there as such.

In this section, user can add or remove the solicitor and also view the already added solicitor.

To add solicitor details:

- From the **More** option, click the **Solicitor** to add or remove or edit the already added solicitor.

The **Solicitor Details** page displays.

Instant Retail Loan Account Opening Process

This topic describes the instant account opening process of retail loan product.

Instant personal loan account opening flow is applicable only for the Individual type of customer. The reference origination flow has been optimized to ensure that the loan request is processed with minimal manual intervention.

This personal loan request can be triggered from the Self- Service Channel such as Oracle Banking Digital Experience for both new and KYC compliant existing customers For the Assisted Channel, this loan request can be triggered only for KYC compliant existing customer.

In case of new customer, the self-service channel uses the automatic flow to verify or provide KYC compliance to customer. This automatic flow is indicated as Video KYC in OBDX. The necessary KYC types for compliance verification is configured in Oracle Banking Party Module. Please refer the **Retail Onboarding User Guide** for more details.

Below configuration are set for Instant Personal Loan product in the **Business Product** configuration screen.

- In the **Business Product Details** data segment, the **Application Submission is Mandatory** toggle is selected to capture application details in initiate stage.

Below configurations are set for Instant Personal Loan product in the **Business Process** screen.

- Document and checklist verification is set as non mandatory
- The Offer Issue Advices are configured

Account Opening Process Flow

The Instant Personal Loan account opening process is described below:

1. Application Entry Stage:

- In case the application is initiated through Self-Service Channel, the system automatically triggers the Application Entry stage without any manual intervention and completes the data segment level validation. On successful completion of the validation, the system automatically submits the Application Entry Stage.
OR
- In case the application is initiated through Branch, this stage is automatically submitted, if the application details are captured by clicking the **Application** button from the **Product Details** data segment. On submission of Application Entry Stage, system will perform an Assessment and if the system decision is Approved then the application process in the Offer Accept / Reject stage.

2. The Assessment and Offer issue stage automatically handled and hence the stage are not generated:

- If the offer is successfully generated, then offer letter is communicated to an applicant on email.
- If the automatic offer issue workflow fails, then the **Offer Issue** task is generated to perform manual action on loan application.

- If the assessment is Auto Rejected, then an application is terminated automatically and an email communication along with the rejection advice is sent to the applicant. As an exceptional case for Insta personal loan, Assessment recommendations which are Manual are also handled.
3. **Manual Credit Assessment stage:**
 - If the Assessment Decision is Manual Queue A or Manual Queue B, then the system proceeds application to the Manual Credit Assessment stage to assess manually.
 - If the application is approved, then the system proceeds and the Manual Credit Decision stage is generated.
 - If the application is rejected, then the application is terminated, and a rejection advice is mailed to the borrowing applicant.
 4. **Manual Credit Decision stage:** On submitting the Manual Credit Assessment stage, the system generates the Manual Credit Decision task to assess the loan application. In this task the assessment officer can either Reject or Approve the application manually.
 - If the application is approved, then Offer Issue is automatically trigger and an email with the attached offer letter is communicate to an applicant. The application proceeds with the next logical referenced stage.
 - If the application is rejected, then the system terminates the application and a rejection advice is sent to the applicant.
 5. **Offer Accept /Reject:** Once the offer is issued successfully, the applications proceeds with the next task which is generated based on action selected in the previous stage.
 - If the application is initiated through branch channel then you can capture the applicant's response. If the application is initiated through the self-service channel, the applicant's response is received from OBDX. In both the cases, once the offer is accepted OBO initiates call and shares data to the host for creation of Instant Personal Loan Account.
 - If the customer response is reject, then the application is rejected.by selecting the **Reject** option from the Outcome screen while submitting the stage. The rejection advice is sent to the applicant through email.
 - If the bank reject the application, then the application is rejected.by selecting the **Reject By Bank** option from the Outcome screen while submitting the stage. The rejection advice is sent to the applicant through email.
 6. **Handoff Retry:** Application moves to this stage and appears in the Free Task only if the Instant Personal Loan Account creation has been rejected by Product Processor. The users with the necessary access rights can pick such task and can retry submission to Host after taking required actions on the Failure reason.

5

Simplified Application

This topic describes the concept and process of single stage application.

What is Simplified Application?

The Simplified Application is introduced to open an account in a smooth single process culminating the long account opening process. In this process the user can directly create and application and update details with multiple data segments in a single view.

How to configure Simplified Application for a product?

To enable a simplified account opening process, select the **Simplified Application** flag in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

Once the product is configured for simplified application, the user can configure the business process such as stages, data segments, document checklist and so on, in the **Business Process Configuration** screen.

How to process the simplified application?

After configuring the product and process, the user can initiate a single-stage application by navigating the menu. Below is the detailed process for opening an account using a simplified application.

To open an account using simplified application process:

1. From the **Menu**, select the **Retail Origination**. The Retail Origination menu appears.
2. From the **Retail Origination**, select the **New Application**. The New Application page appears with list of product types which are configured.
3. Select the appropriate product and click **Apply**.
The Application Entry stage appears. The data segments in this stage appears based on the business process configuration.
 - **Applicant** : In this data segment user can capture applicant details such as basic, address, signature, employment, identification. Multiple applicants are allowed with different roles. Refer **Applicant** data segment from the **Application Entry** stage of this guide.
 - **Relationship**: In this data segment user can capture the relationship details in case multiple applicants. Refer **Relationship** data segment from the **Application Entry** stage of this guide.
 - **Loan Details**: In this data segment user can capture the product details to configure the account. Refer **Account Details** data segment from the **Application Entry** stage of this guide.
 - **Interest and Charges**: In this data segment user can view and edit the interest and charges that are applicable. Refer the **Interest and Charges** data segment from the **Application Enrichment** stage of this guide.

- **Financial Details:** In this data segment user can capture the financial details of all the applicants that are involved in the account opening application. Refer **Financial Details** data segment from the **Application Entry** stage of this guide.
 - **Loan Disbursement Details:** In this data segment user can capture the loan disbursement details. Refer the **Loan Disbursement Details** data segment from the **Application Enrichment** stage of this guide.
 - **Loan Repayment Details:** In this data segment user can capture the loan repayment details. Refer the **Loan Repayment Details** data segment from the **Application Enrichment** stage of this guide.
 - **Qualitative Scorecard:** In this data segment user can capture the qualitative scorecard details which appears based on configuration. Refer the **Qualitative Scorecard** data segment from the **Loan Assessment** stage of this guide.
 - **Term and Conditions:** In this data segment user can capture the term, conditions and consents of the customer. Refer the **Term and Conditions** data segment from the **Application Entry** stage of this guide.
 - **Review:** In this data segment user can review all the details that are captured on clicking on each data segment tile.
4. On submitting the Application Entry stage, next stage is triggered based on the business process configuration.
 5. Below stages are generated in the process of account opening. Refer respective stage pages of this guide for detailed information.
 - a. **Application Document**
 - b. **Loan Assessment**
 - c. **Manual Credit Assessment**
 - d. **Manual Credit Decision**
 - e. **Account Parameter Setup**
 - f. **Supervisor Application Approval Stage**
 - g. **Offer Issue**
 - h. **Offer Accept / Reject**
 - i. **Post Offer Amendment**
 6. The **Account Approval** stage is generated. All the data segments of the Application Entry stage appears. The user can only view those stages. The Approval Details data segment is enabled to capture account approval status. For more information refer the **Approval Details** data segment of the **Account Approval** stage in this guide.
 - If the Rejected option is selected in the Approval Details data segment then this application is terminated.
 - If the Approved option is selected in the Approval Details data segment then the application's payload are proceed for account creation.
 7. An account is created on approving the application in the **Account Approval** stage.
 8. If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.

6

Quick Account Opening

This topic describes the concept and process of single stage application.

What is Quick Account Opening?

Quick Account Opening is launched to simplify the account creation process, making it quicker and more efficient. When this feature is activated for a particular loan product, the system will automatically initiate the account opening process once the Quick Assessment is approved.

How to configure Quick Account Opening?

To streamline the account opening process, check the **Quick Account Opening** option in the **Business Product Preference** section of the **Business Product Configuration** screen.

After the product is set up for fast account opening, the user can align the business product with the factory-installed process for **Quick Account Opening** in the **Business Process Configuration**.

How to process the Quick Account Opening?

After configuring the product and process, the user can initiate a single-stage quick account opening application by completing the loan simulation and quick assessment process. Below is the detailed process for opening an account using a quick account opening.

To open an account using quick account opening process:

1. Refer to the [Loan Simulation and Quick Assessment](#) section.
2. Click Apply in the **Quick Assessment Stage** will automatically start the Quick Account Opening process if the **Quick Account Opening** option is activated for the business product.

Note

The Quick Account Opening process enables instant account openings only for auto-approved applications and prevents Manual/Rejected applications from proceeding forward.

The **Open Account** stage appears. The data segments in this stage appears based on the business process configuration.

- [Loan Disbursement Details](#)
This topic describes systematic instructions to configure loan disbursement details.
- [Loan Repayment Details](#)
This topic describes systematic instructions to enables the user to capture the loan repayment details..
- [Document Generation](#)
In this data segment you can generate and dispatch the documents that are configured.

- [Document Acceptance](#)
In this data segment you can capture the acceptance of the documents that are already generated and dispatched.
- [Summary](#)
This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

6.1 Loan Disbursement Details

This topic describes systematic instructions to configure loan disbursement details.

The **Loan Disbursement Details** are pushed into the host as a part of account opening pay load.. The **Loan Disbursement Details** enables the user to capture the various disbursement methods.

To add loan disbursement details:

1. In the Loan Disbursement stage, update the fields based on the disbursement mode as per the customer's choice..

The **Loan Disbursement** screen displays.

Figure 6-1 Loan Disbursement

The screenshot displays the 'Loan Disbursement Details' form within the 'Open Account - HELAPP000149627' context. The form includes a sidebar with navigation options: Loan Disbursement Det., Loan Repayment Details, Document Generation, Document Acceptance, and Summary. The main form area contains the following fields:

- Settlement Required:** Radio buttons for 'Yes' (selected) and 'No'.
- Requested Loan Amount:** Currency dropdown set to 'GBP' and a value of '10,000.00'.
- First Disbursement Date:** A date field showing 'March 30, 2020'.
- Disbursement Mode:** A dropdown menu set to 'Required'.
- Loan Amount:** Currency dropdown set to 'GBP' and a value of '10,000.00'.
- Split Disbursement:** Radio buttons for 'Yes' and 'No' (selected).

2. Specify the relevant details in data fields. The fields which are marked as **Required** are mandatory. For more information on fields, refer to the field description table below:

Table 6-1 Loan Disbursement

Fields	Description
Settlement Required	Select to indicate whether the settlement required. The available options are: • Yes • No
Requested Loan Amount	Displays the loan amount that is requested to borrow.
Loan Amount	Displays the requested or approved loan amount.

Table 6-1 (Cont.) Loan Disbursement

Fields	Description
Number of Disbursement	Select the number of disbursements for disbursing the loan amount. The value one appears by default.
First Disbursement Date	Select the first disbursement date.
Split Disbursement	Select to indicate the loan amount should be disbursed in multiple modes. The available options are: Yes: If this option is selected then Add Mode button appears to add additional disbursement mode. No: This option indicates that the user wants to continue with the single disbursement mode.
Total Disbursement	Displays the total disbursement amount.
Disbursement Mode	Select the disbursement mode from the drop-down list. Available options are: Own Internal Account Other Internal Account External Account GL Account

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

6.2 Loan Repayment Details

This topic describes systematic instructions to enables the user to capture the loan repayment details..

To capture the loan repayment details:

- Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Loan Repayment** details screen displays.

- Own Internal Account

- Specify the relevant details in data fields. The fields which are marked as **Required** are mandatory. For more information on fields, refer to the field description table below:

Table 6-2 Loan Repayment Details

Fields	Description
Loan Tenure	Displays the selected loan tenure that was captured during Loan Simulation
Maturity Date	Displays the maturity date based on the First Repayment Date and Loan Tenure .
Stage	Displays the Repayment Stage that was considered during Loan Simulation
Stage Term <Term Unit>	Displays the default stage term is captured during loan simulation The separate column appears for separate term units as years, months, and days as per Business product configuration.
Repayment Frequency	Select the repayment frequency from the drop-down list.
Show Repayment Schedule	Click this button to generate the repayment schedule which displays the details of installment amount with the principal and interest break up for the given tenure.
Repayment Mode	Select the repayment mode from the drop-down list. The available options are: • Own Internal Account- If the mode selected as Internal Account, then the system enables the fields for Customer Account and Branch. By default, the system populates the internal account selected in Disbursement data segment. However, if user wishes to have a different account, he/she can select another customer account of the CIF and account branch displays in the branch field. • External Account - If the mode selected is external account, the system creates a Periodic Instruction Maintenance, at host as a part of Loan Account opening process. • Capture Later - If the mode selected is Capture Later, the system will allow to proceed with the loan origination flow without capturing the repayment details. Note: The system defaults to the GL account in the absence of the repayment account.

- Click the Show Repayment Schedule button to generate the repayment schedule which displays the details of installment amount with the principal and interest break up for the given tenure.
- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The User cannot to proceed to the next data segment, without capturing the mandatory data.

6.3 Document Generation

In this data segment you can generate and dispatch the documents that are configured.

In the **Document Generation** data segment, the list of documents that are maintained within the document generation event and fulfills the rule criteria are pre-populated in the tabular format. This document generation events are defined in the Advice Maintenance screen. Each documents appears separately to generate and dispatch.

To generate and dispatch the document:

1. The Document Generation stage is displayed
The **Document Generation** screen displays.

Figure 6-3 Document Generation

2. In the Document Generation section, select the check box to select the document from the list. It is mandatory to select at least one document.

You can perform below actions on the selected document:

- **Generate:** Click this button to generate the selected document. On clicking this button the system invokes a call to the report generation service which generates a PDF output for the advice configured in the Advice Maintenance screen. Once the output is generated the documents are stored in the document managed service (DMS) along with the reference ID. This reference ID fetches the document on click the Generate Document link in the Document column.
- **Dispatch:** Click this button to dispatch the selected generated documents. You can only dispatch those documents which are not already dispatched. On clicking this button the system validates whether the document is already generated. Once the validation is successful the system dispatch the document to the default setting defined in the Advice Maintenance screen.
- **Reset:** Click this button to reset the action performed on the document.

For more information on fields, refer to the field description table.

Table 6-3 Document Generation

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. This link appears only if the document is generated.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment.

Table 6-3 (Cont.) Document Generation

Field	Description
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. - If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. - If the delivery mode is Post then the preferred address of every recipient is displayed. - If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. - If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on clicking Generate or Dispatch button. Once the dispatch process is initiated for the generated documents, the status appears based on the selected default mode of delivery. - If the mode of delivery is Email then on the successful trigger the status appears as Email Sent. - If the mode of delivery is E-Sign Remote or E-Sign In-Person then on the successful trigger the status appears as E-Signing Initiated. - If the mode of delivery is Post then on the successful trigger the status appears as Dispatched. - If the mode of delivery is Print then on the successful trigger the status appears as Ready for Print. - In case the dispatch process fails due to technical error then the status appears as Failed.
Status Details	Displays the status details of the document. Click the icon to view the generation and dispatched details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. - Click  to edit the delivery mode - Click Save to save the edited delivery mode.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

6.4 Document Acceptance

In this data segment you can capture the acceptance of the documents that are already generated and dispatched.

The Document Acceptance data segment populates the list of documents that appeared in the Document Generation data segment and are mark as Yes in the Acceptance field in the Advice Maintenance screen.

If the document is marked as No in the Acceptance field in the Advice Maintenance screen then the acceptance process is not required for that document and hence it will not appear in this data segment.

To accept the document:

1. Click **Next** in previous data segment screen to proceed with the next data segment, after successfully capturing the data.

The Document Acceptance screen appears.

Figure 6-4 Document Acceptance

The screenshot displays the 'Document Acceptance' interface. At the top, it shows 'Open Account - HELAPP000149627'. The main area contains a table with the following data:

Document Name	Receiving Party	Delivery Mode	Delivery Details	Status	Status Details	ACTION
BPM Offer Issue Schedule Generated Document	sivadas k r (Primary)	Email	sivadas.k.r@oracle.com	Pending for Acceptance		

Below the table, the 'Customer Response' section includes radio buttons for 'Accept' (selected) and 'Reject', and a 'Date of Accept/Reject' field with the value 'March 30, 2020'.

2. In the Document Acceptance section, select the check box to select the document from the list and perform appropriate actions.

For more information on fields, refer to the field description table.

Generated Document: This link appears only if the document is generated atleast once. Accepted Document: This link appears only if the E-Signed document is uploaded.

Table 6-4 (Cont.) Document Acceptance

Fields	Description
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. • If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. • If the delivery mode is Post then the preferred address of every recipient is displayed. • If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. • If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on the document.
Status Details	Displays the status details of the document. Click the icon to view the generation, dispatched and acceptance details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. • View: You can view the documents only if the Delivery Mode is defined as E-Sign Remote or E-Sign In-Person. • Upload Document: You can upload documents only if the Delivery Mode is defined as Email, Print or Post. • Delete: You can upload documents only if the Delivery Mode is defined as Email, Print or Post.
Customer Response	Select the customer response for the documents. The available options are: • Accept: Select to accept the application documents. You can select this option only if the acceptance status of all the document is Accepted. • Reject: Select to reject the application documents. If the acceptance status of any one of the document is declined then this option appears auto-selected. • Amend: Select to amend the application document status.
Date of Response	Select the date on which the customer response is captured. This date should be greater or equal to current date.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

6.5 Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

To view the summary of all the data segments:

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 6-5 Summary

Each of these summary tiles are click able and the user will have the option to view all the details captured under the given data segment. For more information on data segments, refer to the field description table below.

Table 6-5 Summary-Quick Account Opening

Field	Description
Loan Disbursement Details	Displays the asset details.
Loan Repayment Details	Displays the mandate details.
Document Generation	Displays the document generation.
Documents Acceptance	Displays the document acceptance.

2. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage are verified. The **Overrides** screen is displayed.
3. In the **Override** screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click **Accept Overrides& Proceed** to proceed.

OR

Click **Proceed**. The **Checklist** screen appears.

4. Click **Submit** to submit the Open Account stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
5. Click Close to close the window.

7

Buy Now Pay Later

This topic provides the detailed information about Buy Now Pay Later.

What is Buy Now Pay Later?

The **Buy Now Pay Later** option enables customers to start and obtain small loans directly from merchant websites, online banking platforms, and mobile applications. Banks and financial institutions providing this service can utilize the API from Oracle Banking Originations Cloud Service for easy integration. While origination Buy Now Pay Later loan additional features like quick eligibility assessment, risk-based pricing can also be enabled.

How to configure the Buy Now Pay Later?

To enable a **Buy Now Pay Later** opening process, select **E-Commerce** in channel allowed field of **Business Product Details** screen. Loan simulation, quick assessment, and quick account also needs to be enabled in business product. Additionally, it needs a tailored map for a business process designed specifically for BNPL.

Figure 7-1 Business Process

The screenshot displays the 'Business Process Definition' interface. It contains several fields and sections:

- Business Process Code:** BNPLACCOPEN
- Business Process Description:** Buy Now Pay Later Origination
- Product Category:** Individual
- Business Product Code:** BNPL01
- Lifecycle:** LoanQaoOrig (with a search icon)
- Process Code:** QAOORG (with a search icon)
- Business Product Name:** Buy Now Pay Later
- Lifecycle Description:** Loan Quick Account Opening Lifecy
- Process Description:** Loan Quick Account Opening Proce
- Factory Shipped:** No
- Process Full View:** A button with a right-pointing arrow.

Buy Now Pay Later Flow:

- 1. Buy Now Pay Later Initiation** - A user requests Buy Now Pay Later through a merchant's website by providing applicant details, customer information, loan amount, tenure, currency, bureau call required flag, and schedule type (normal schedule).
- 2. Loan Eligibility and Pricing Decision** - Oracle Banking Originations Cloud Service checks product configuration, customer eligibility, triggers API calls like bureau score, decision, and risk-based pricing (if configured), and returns multi-term loan interest rates and installment amounts to merchant.
- 3. Confirm and Apply** - The user confirms loan terms, merchant send loan application. The system creates Customer ID (if it is a new customer), generates a Loan Simulation ID, and triggers a Quick Account Opening.
- 4. Account Opening and Disbursement** - Oracle Banking Originations Cloud Service initiates a Quick Account opening new loan account will be opened with disbursement and repayments as received from merchant.

Below BNPL API is are called in the sequence.

Table 7-1 API's Called

API's Called	Description
obremo-rpm-lo-loanapplications/ob/obo/v1/loanapplications/bnpl	It is used to fetch Interest and Installment for given terms.
obremo-rpm-lo-loanapplications/ob/obo/v1/loanapplications/bnpl/apply	It is used to initiate the account creation process.
obremo-rpm-projection-services/web/v1/inquiry/applicationsList?applicationNo=<APPLICATION_NUMBER>	It is used to Inquire the application, to fetch the newly created account number and other details.

- Once the application is initiated, the user can inquire view of the completed application with the account number in Application Details dashboard. Once the application is initiated, the user can inquire view of the completed application with the account number in Application Details dashboard. The dashboard will display all relevant information, including the status of the application, pending documents, and estimated processing times.

The Application Details screen is displayed.

Figure 7-2 Application Details
