This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

- [Purpose](#)
- [Audience](#)
This manual is intended for the following User/User Roles:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Conventions](#)
- [Related Resources](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols, Definitions and Abbreviations](#)
The following are some of the Symbols you are likely to find in the manual:

Purpose

This guide is designed to help acquaint you with the Oracle Banking Payments application. This guide provides answers to specific features and procedures that the user need to be aware of the module to function successfully.

Audience

This manual is intended for the following User/User Roles:

Table 1-1 User Roles

Role	Function
Implementation & IT Staff	Implementation & Maintenance of the Software

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to make sure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Resources

For more information on any related features, refer to the following documents:

- *Getting Started User Guide*
- *Oracle Banking Security Management System User Guide*
- *Oracle Banking Microservices Platform Foundation User Guide*
- *Routing Hub Configuration User Guide*

- *Oracle Banking Liquidity Management File Upload User Guide*

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1-2 Acronyms and Abbreviations

Abbreviation	Description
DDA	Demand Deposit Accounts
ECA	External Credit Approval
EOD	End of Day
IBAN	International Bank Account Number

Basic Actions

The basic actions performed in the screens are as follows:

Table 1-3 Basic Actions

Actions	Description
New	Click New to add a new record. The system displays a new record to specify the required data. The fields marked with asterisk are mandatory. - This button is displayed only for the records that are already created.
Save	Click Save to save the details entered or selected in the screen.
Unlock	Click Unlock to update the details of an existing record. The system displays an existing record in editable mode. - This button is displayed only for the records that are already created.
Authorize	Click Authorize to authorize the record created. A maker of the screen is not allowed to authorize the same. Only a checker can authorize a record. - This button is displayed only for the already created records. For more information on the process, refer Authorization Process.
Approve	Click Approve to approve the initiated record. - This button is displayed once the user click Authorize .
Audit	Click Audit to view the maker details, checker details of the particular record. - This button is displayed only for the records that are already created.
Close	Click Close to close a record. This action is available only when a record is created.
Confirm	Click Confirm to confirm the action performed.
Cancel	Click Cancel to cancel the action performed.
Compare	Click Compare to view the comparison through the field values of old record and the current record. - This button is displayed in the widget once the user click Authorize .
View	Click View to view the details in a particular modification stage. - This button is displayed in the widget once the user click Authorize .

Table 1-3 (Cont.) Basic Actions

Actions	Description
View Difference only	Click View Difference only to view a comparison through the field element values of old record and the current record, which has undergone changes. - This button is displayed once the user click Compare .
Expand All	Click Expand All to expand and view all the details in the sections. - This button is displayed once the user click Compare .
Collapse All	Click Collapse All to hide the details in the sections. - This button is displayed once the user click Compare .
OK	Click OK to confirm the details in the screen.

Symbols, Definitions and Abbreviations

The following are some of the Symbols you are likely to find in the manual:

Table 1-4 Symbols

Icons	Function
	Exit
	Add row
	Delete row
	Option List

Table 1-5 Common Icons and its Definitions

Icon Names	Applicable Stages	Operation
Minimize	Initiation, Approval and Hand-off Retry	Users can minimize the transaction input screen. When the screen is minimized, it appears as to a separate tab within the same web page.
Maximize	Initiation, Approval and Hand-off Retry	User can maximize the transaction input screen.
Close	Initiation, Approval and Hand-off Retry	Users can close the transaction input screen. The system displays a warning message to the user that any unsaved data would be lost. User can either choose to ignore the message and close the screen or choose to 'save and close' the transaction.

2

US CHIPS

- [Introduction](#)
- [Maintenance Screens](#)
- [Outbound Transaction Screens](#)
- [Inbound Transaction Screens](#)

Introduction

The Clearing House Interbank Payments System (CHIPS) is the largest private-sector money transfer system in the United States, based on U.S. dollars. A privately operated and bank-owned system transfers and settles electronic payments in US dollars.

Highlights of CHIPS Payments Module:

- Sanctions check by interfacing with an external Sanctions screening system
- External Credit Approval Check
- Accounting
- CHIPS Message generation

Maintenance Screens

- [US CHIPS Network Preferences Detailed](#)
The US CHIPS Network Preferences screen allows users to capture CHIPS network preferences.
- [US CHIPS Network Currency Preferences Detailed](#)
The CHIPS currency network preference screen allows user to capture CHIPS network currency preferences.
- [US CHIPS Network Connectivity Detailed](#)
The screen US CHIPS Network Connectivity allows user to capture CHIPS network connectivity preference.

US CHIPS Network Preferences Detailed

The US CHIPS Network Preferences screen allows users to capture CHIPS network preferences.

1. On Homepage, specify **PSDCHPNP** in the text box, and click next arrow.
US CHIPS Network Preferences Detailed screen is displayed.

Figure 2-1 US CHIPS Network Preferences Detailed

- On the detailed screen of the **US CHIPS Network Preferences**, specify the fields. For more information about the fields, refer to field description below:

Table 2-1 US CHIPS Network Preferences Detailed - Field Description

Field	Description
Network Code	Specify the Network Code from the list of values. The list of values lists US CHIPS network defined in the host.
Network Description	System defaults the Description based on the selected Network Code.
Network Type Description	System defaults the Network Type Description on the Network code selected.
Host Code	System defaults the host code of transaction branch on clicking 'New'.
Host Description	System defaults the Host Code Description on the Host code selected.
Transaction Type	Select the Transaction Type from the following: <ul style="list-style-type: none"> Incoming Outgoing
Exchange Rate Preference	--
FX Rate Type	Specify the FX Rate Type from the list of values that lists Currency Rate Type.
External Exchange Rate Applicable	You can check this box to indicate whether external exchange rate applicable or not.
Cutoff	--
Cutoff Hours	Specify the network Cutoff Hours.
Cutoff Minutes	Specify the network Cutoff Minutes.
Beneficiary Name Match Required	You can check this box to capture whether Beneficiary name validation required or not.
Value Dating Preferences	--
Debit value date basis for outbound payments	Select the applicable values from either Activation Date or Instruction Date.

 **Note:**

- When the Transaction Type is Outgoing, the value Dating preference applies.
- When the Transaction Type is 'Incoming', Beneficiary Name Match is required.
- The Cutoff Hours/Cutoff Mins fields do not allow a value of '0'.

- [US CHIPS Network Preferences Summary](#)

US CHIPS Network Preferences Summary

1. On Homepage, specify **PSSCHPNP** in the text box, and click next arrow.
US CHIPS Network Preferences Summary screen is displayed.

Figure 2-2 US CHIPS Network Preferences Summary

2. You can search using one or more of the following parameters:
 - Authorization Status
 - Record Status
 - Host Code
 - Network Code
 - Transaction Type
3. Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.

US CHIPS Network Currency Preferences Detailed

The CHIPS currency network preference screen allows user to capture CHIPS network currency preferences.

1. On Homepage, specify **PSDCHPNC** in the text box, and click next arrow.
US CHIPS Network Currency Preferences Detailed screen is displayed.

Figure 2-3 US CHIPS Network Currency Preferences Detailed

2. On the detailed screen of the **US CHIPS Network Currency Preferences** screen, specify the fields.

For more information about the fields, refer to field description below:

Table 2-2 US CHIPS Network Currency Preferences Detailed - Field Description

Field	Description
Network Code	Specify the Network Code from the list of values. List of values specifies the Network Code that the US CHIPS network in the host defines. Network code for Payment Type 'high Value' is defined in Network Code Maintenance (PMDNWCOD).
Network Description	System defaults the Description based on the selected Network Code.
Network Type Description	System defaults the Network Type Description on the Network code selected.
Host Code	System defaults the host code of transaction branch on clicking 'New'.
Host Description	System defaults the Host Code Description on the Host code selected.
Transaction Type	Select the Transaction Type from the following: <ul style="list-style-type: none"> • Incoming • Outgoing
Transfer Currency	Specify the Transaction Currency from the list of values. By default, USD is selected.

Table 2-2 (Cont.) US CHIPS Network Currency Preferences Detailed - Field Description

Field	Description
Limit Details	--
Minimum Amount	Specify the Minimum Amount.
Maximum Amount	Specify the Maximum Amount.
Pricing Details	--
Transaction Pricing Code	Specify the Transaction Pricing Code from the list of values. List of all valid (Open/Authorized) pricing codes are defined in the host.
Accounting Codes	--
Debit Liquidation	Specify the Debit Liquidation from the list of values. List of all valid (Open/Authorized) accounting codes are defined in the host where Main Transaction Dr/Cr Indicator is 'Debit'.
Credit Liquidation	Specify the Credit Liquidation from the list of values. List of all valid (Open/Authorized) accounting codes are defined in the host where Main Transaction Dr/Cr Indicator is 'Credit'.
Small FX Limit	--
Small FX Limit Currency	Specify the Small FX Limit Currency from the list of values. List of all valid (Open/Authorized) currency codes are defined.
Small FX Limit Amount	Specify the Small FX Limit Amount.
Network Account Details	--
Network Account	Specify the Network Account from the list of values. List of all valid (Open/Authorized) NOSTRO accounts are defined in the host.
Return Accounting	--
Payment Return GL	Specify the Payment Return GL from the list of values.

 **Note:**

Maximum Amount if provided to be maintained more than the Minimum Amount.

- [US CHIPS Network Currency Preferences Summary](#)

US CHIPS Network Currency Preferences Summary

1. On Homepage, specify **PSSCHPNC** in the text box, and click next arrow.

US CHIPS Network Currency Preferences Summary screen is displayed.

Figure 2-4 US CHIPS Network Currency Preferences Summary

The screenshot shows a web application window titled "US CHIPS Network Currency Preferences Summary". At the top, there are navigation links: "Search", "Advanced Search", "Reset", and "Clear All". Below this is a "Case Sensitive" checkbox. The search criteria section includes four input fields: "Authorization Status" (a dropdown menu), "Record Status" (a dropdown menu), "Host Code" (a text input with a search icon), and "Network Code" (a text input with a search icon). Below the search criteria is a table control showing "Records per page" set to 15, "1 Of 1" records, a "Go" button, and "Lock Columns" set to 0. The table has a header row with columns: "Authorization Status", "Record Status", "Host Code", "Network Code", "Transaction Type", and "Transfer Currency". The table body is currently empty. At the bottom right of the window is an "Exit" button.

2. You can search using one or more of the following parameters:
 - Authorization Status
 - Record Status
 - Host Code
 - Network Code
3. Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.

US CHIPS Network Connectivity Detailed

The screen US CHIPS Network Connectivity allows user to capture CHIPS network connectivity preference.

1. On Homepage, specify **PSDCHNCT** in the text box, and click next arrow.
US CHIPS Network Connectivity Detailed screen is displayed.

Figure 2-5 US CHIPS Network Connectivity Detailed

- On the detailed screen of the **US CHIPS Network Connectivity**, specify the fields. For more information about the fields, refer to field description below:

Table 2-3 US CHIPS Network Connectivity Detailed - Field Description

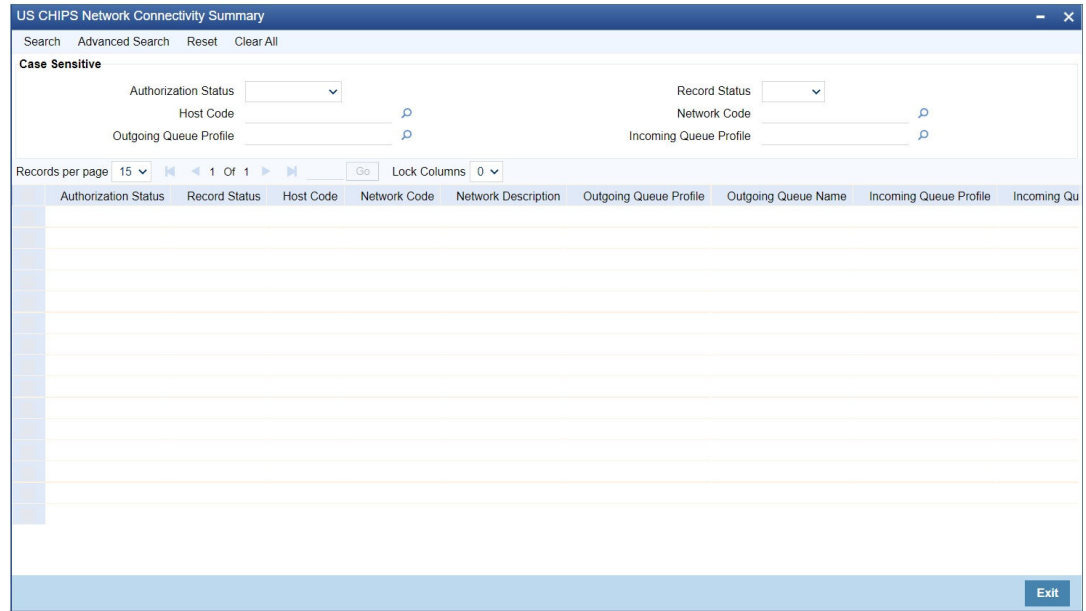

Field	Description
Host Code	System defaults the host code of transaction branch on clicking 'New'.
Host Description	System defaults the Host Code Description on the Host code selected.
Network Code	Specify the Network Code from the list of values. The list of values lists of all valid (Open/Authorized) US CHIPS networks are defined in the host.
Network Description	System defaults the Description based on the selected Network Code.
Network Type Description	System defaults the Network Type Description on the Network code selected.
Outgoing Queue Details	--
Outgoing Queue Profile	Specify the Outgoing Queue Profile from the list of values.
Outgoing Queue Name	Specify the Queue name.
Incoming Queue Details	--
Incoming Queue Profile	Specify the Incoming Queue Profile from the list of values.
Incoming Queue Name	Specify the Queue name.

- [US CHIPS Network Connectivity Summary](#)

US CHIPS Network Connectivity Summary

- On Homepage, specify **PSSCHNCT** in the text box, and click next arrow. **US CHIPS Network Connectivity Summary** screen is displayed.

Figure 2-6 US CHIPS Network Connectivity Summary

2. You can search using one or more of the following parameters:
 - Authorization Status
 - Record Status
 - Host Code
 - Network Code
 - Outgoing Queue Profile
 - Incoming Queue Profile
3. Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.

Address Line 1, 2, 3	Specify the Address.
[303] Business Purpose Tag	--
Business Purpose	Specify the Business Purpose.
References	--
[320] Send Participant Reference	Specify the Send Participant Reference.
[321] Related Bank Reference	Specify the Related Bank Reference.

Charges Information Tab

- On **Charges Information Tab**, specify the fields.

Figure 2-10 US CHIPS Outbound Transaction Input - Charges Information Tab

Enrich / Validations

When you click on enrich button, below validations are done:

- Originator [500 OR 502] details are mandatory.
- For Transfer Type 'Customer Transfer', Beneficiary details [420 thru 422] are mandatory.
- The Originator bank [410] thru [412] information is mandatory, when Instructing bank [520 thru 522] details added.

After successful validation, below processing are done:

- Activation date, Debit Value date, Credit Value date are derived and populated.
- The Exchange Rate is picked up and the Debit Amount and Transfer Amount are derived if the Debit Account currency is different from the Transfer currency.
- Pricing calculation is done and the pricing details are populated in Pricing tab.
- MIS / UDF values are defaulted, if not added.

FI Information Button

- On **FI Information Button**, specify the fields.

Figure 2-11 US CHIPS Outbound Transaction Input - FI Information Button

The screenshot displays the 'FI Information' window, which is organized into a grid of nine sections, each with a specific header and a set of input fields:

- [600] Originator to Beneficiary Information:** Includes Line 1, Line 2, Line 3, and Line 4.
- [610] Receive Information:** Includes Line 1, Additional Line 1, Additional Line 2, Additional Line 3, Additional Line 4, and Additional Line 5.
- [620] Intermediary Information:** Includes Line 1, Additional Line 1, Additional Line 2, Additional Line 3, Additional Line 4, and Additional Line 5.
- [630] Beneficiary's Bank Information:** Includes Line 1, Additional Line 1, Additional Line 2, Additional Line 3, Additional Line 4, and Additional Line 5.
- [640] Beneficiary Information:** Includes Line 1, Additional Line 1, Additional Line 2, Additional Line 3, Additional Line 4, and Additional Line 5.
- [650] Bank to Bank Information:** Includes Line 1, Additional Line 1, Additional Line 2, Additional Line 3, Additional Line 4, and Additional Line 5.
- [631] Beneficiary's Bank Advice Information:** Includes an Advice Code dropdown, Advice Line 1, Advice Additional Line 1, Advice Additional Line 2, Advice Additional Line 3, Advice Additional Line 4, and Advice Additional Line 5.
- [641] Beneficiary Advice Information:** Includes an Advice Code dropdown, Advice Line 1, Advice Additional Line 1, Advice Additional Line 2, Advice Additional Line 3, Advice Additional Line 4, and Advice Additional Line 5.
- [621] Intermediary Bank Advice Information:** Includes an Advice Code dropdown, Advice Line 1, Advice Additional Line 1, Advice Additional Line 2, Advice Additional Line 3, Advice Additional Line 4, and Advice Additional Line 5.

At the bottom right of the window, there are 'OK' and 'Exit' buttons.

Remittance Information Button

- On **Remittance Information** screen, specify the fields.

Figure 2-12 Remittance Information Button - Remittance Parties

The screenshot shows a 'Remittance Information' dialog box with the 'Remittance Parties' tab selected. The form is organized into four columns of fields:

- [820] Additional Payment Data:** Data Size, Data Format Type, Additional Payment Data.
- [825] Related Remittance Information:** Remittance Identification, Remittance Location Method, Remittance Location Electronic Address, Name.
- [830] Remittance Beneficiary:** Identification Type (dropdown), Identification Code, Name, Identification Number, Identification Number Issuer, Date of Birth (YYYY-MM-DD), Place of Birth, Address Type (dropdown), Department, Sub Department, Street Name, Building Number, Post Code, Town Name, Country Sub Division, Country, Address, Country of Residence.
- [830] Remittance Originator:** Identification Type (dropdown), Identification Code, Name, Identification Number, Identification Number Issuer, Date of Birth (YYYY-MM-DD), Place of Birth, Address Type (dropdown), Department, Sub Department, Street Name, Building Number, Post Code, Town Name, Country Sub Division, Country, Address, Country of Residence, Contact Name, Contact Phone, Contact Mobile Number, Contact Fax Number, Contact Electronic Address, Contact Other information.

Buttons for 'OK' and 'Exit' are located at the bottom right of the dialog.

Specify the following field details:

- Remittance Location Details
- Postal Address
- Address Type

Figure 2-13 Remittance Information Button - Remittance Information

The screenshot shows the 'Remittance Information' dialog box with the 'Remittance Information' tab selected. The form is organized into two columns of fields:

- [840] Primary Remittance Document Information:** Document Type Code (dropdown), Proprietary Document Type Code, Document Identification Number.
- [845] Actual Amount Paid:** Currency Code, Amount.
- [850] Gross Amount of Remittance Document:** Document Currency Code, Amount.
- [855] Amount of Negotiated Discount:** Discount Currency Code, Amount.
- [860] Adjustment Information:** Adjustment Reason Code (dropdown), Credit Debit Indicator (dropdown), Currency Code, Amount.
- [865] Date of Remittance Document:** Date (YYYY-MM-DD).
- [870] Secondary Remittance Document Information:** Document Type Code (dropdown), Proprietary Document Type Code, Document Identification Number, Issuer.
- [875] Remittance Free Text:** Line 1, Line 2, Line 3.

A '1 Of 1' indicator is visible at the top right. Buttons for 'OK' and 'Exit' are located at the bottom right of the dialog.

Specify the following field details:

- Structured Remittance Info
- Creditor Reference Information

- Invoicer
- Invoicee
- Garnishment Remittance
- Garnishee
- Garnishment Administrator
- Additional Remittance Info
- Unstructured Remittance Details
- View Details - This button opens a Detail screen to specify the values
- Other Details - This button opens a Detail screen to specify the values

UDF Button

1. This sub-screen defaults values of UDF fields that are part of the UDF group specified for the 'Manual' source.
2. Click the **UDF button** to invoke the 'UDF' sub-screen.
3. On **UDF Button**, specify the fields.

Figure 2-14 UDF Button

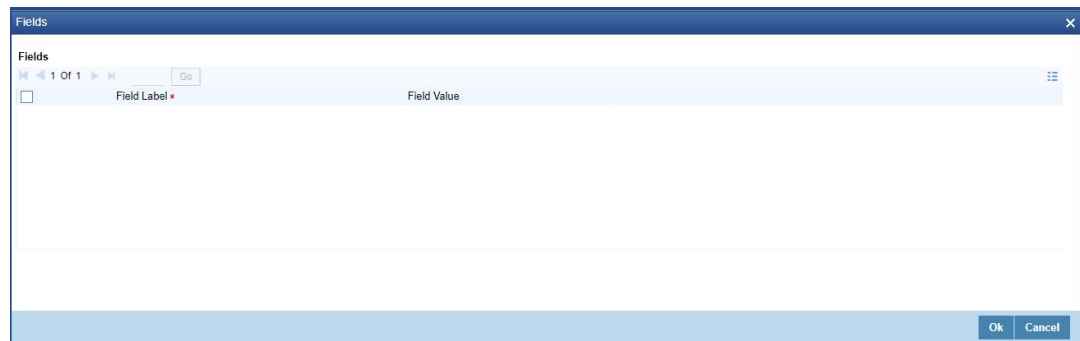

Table 2-7 UDF Button - Field Description

Field	Description
Field Label	System displays all fields that are part of the associated UDF group.
Field Value	System displays the default value, where exists for the UDF fields. You can change the default value or specify value for other fields (where default value does not exist).

MIS Button

1. You can maintain the MIS information for the Transaction. If the MIS details are not entered for the Transaction the same is defaulted from the product maintenance.
2. Click the **MIS button** to invoke the 'MIS' sub-screen.
3. On **MIS Button**, specify the fields.

Figure 2-15 MIS Button

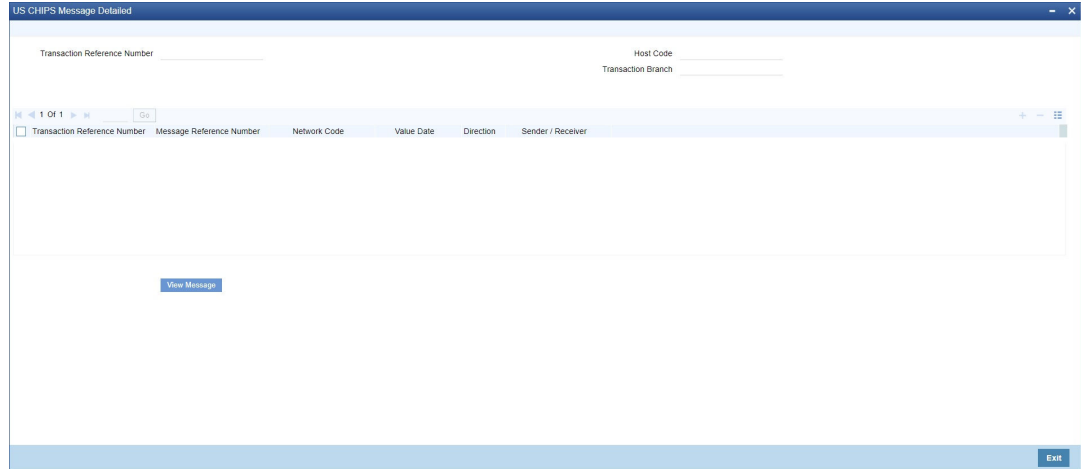

Table 2-8 MIS Button - Field Description

Field	Description
Transaction Reference	System displays the transaction reference number of the transaction.
MIS Group	You can select the MIS group code from the option list, or specify the code for the MIS group in the Source maintenance. The system displays all valid MIS groups for different sources in the MIS group list in the Source maintenance. When booking a transaction from this screen, the MIS group linked to the 'Manual' source is populated by default.
Default button	After selecting a MIS group different from the default MIS Group, click this button to populate any default MIS values and link them to the Transaction MIS and Composite MIS classes.
Transaction MIS	You can populate the default MIS values for Transaction MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.
Composite MIS	You can populate the default MIS values for Composite MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.

All Messages

- You can invoke this screen by clicking 'All Messages' tab in the screen.

US CHIPS Processing

- [Outbound Processing](#)
- [Inbound Processing](#)

Outbound Processing

- [Overridable Validations](#)
- [Authorization Limit Checks](#)
- [Sanction Check](#)
- [External Credit Approval Check](#)
- [Accounting](#)
- [Messaging](#)

Overridable Validations

If Duplicate Check fields are defined in the source level, then duplicate check is done against the outbound transactions booked (Till Duplicate Check Days).

Authorization Limit Checks

Authorization Limit currency and Limit 1 and 2 amount values at the Source Network Preference is referred for the Host code, Source code, Network code and Transaction Type as “Outgoing”.

If values are maintained, then

- If Limit currency is same as transfer currency, then the transfer amount of the transaction is compared against the Authorization Limit 1 and Authorization Limit 2 amount respectively. If the transfer amount is more than the limit amount, then the transaction is moved to Authorization Limit 1 Queue (PQDAU1QU) and Authorization Limit 2 Queue (PQDAU2QU) respectively.
- If Limit currency is different from transfer currency, then the transfer amount is converted to limit amount using STANDARD MID rate. The converted transfer amount is compared against the Authorization Limit 1 and Authorization Limit 2 amount respectively. If the transfer amount is more than the limit amount, then the transaction is moved to Authorization Limit 1 Queue (PQDAU1QU) and Authorization Limit 2 Queue (PQDAU2QU) respectively.

If the Authorization Limit check is done on booking date, it is not repeated on Value date processing.

Sanction Check

The transaction can be sent for sanction screening to an external system if sanctions screening is enabled for the source and network in Source Network Preferences PMDSORNW and is applicable for the customer.

If sanction is approved, the transaction is resumed with the further processing. In case of seizure, seizure accounting is posted, if it is applicable. If the status is rejected or interim, the transaction is moved to sanction check queue.

External Credit Approval Check

An amount block request for the transfer amount and for the charges/taxes if applicable is sent to DDA system.

Customer/Account status check is done by the ECA system as part of ECA call.

Accounting

The 'Debit Liquidation' & 'Credit Liquidation' accounting codes from US CHIPS Network Currency Preferences (PSDCHPNC).

Accounting Handoff is prepared based on the accounting codes and sent to Accounting system.

Messaging

After Accounting Hanoff is prepared, Payment Message is generated. The generated message is delivered to the 'Outgoing Queue' message queue defined in the Outgoing Queue Details field of the screen PSDCHNCT.

You can view the generated message from 'All Messages' sub screen of the transaction.

Inbound Processing

- [Authorization Limit Checks](#)
- [Sanction Check](#)
- [External Account Check](#)
- [Accounting](#)

Authorization Limit Checks

Authorization Limit currency and Limit 1 and 2 amount values at the Source Network Preference will be referred for the Host code, Source code, Network code and Transaction Type as "Incoming".

If values are maintained, then

- If Limit currency is same as transfer currency, then the transfer amount of the transaction is compared against the Authorization Limit 1 and 2 amount respectively. If the transfer amount is more than the limit amount, then the transaction is moved to Authorization Limit 1 Queue (PQDAU1QU) and Authorization Limit 2 Queue (PQDAU2QU) respectively.
- When the transfer currency is different from the Limit currency, the transfer amount is converted to a limited amount using the STANDARD MID rate. The converted transfer amount is compared against the Authorization Limit 1 and 2 amount respectively. If the limit amount is exceeded by the transfer amount, then the transaction is moved to the Authorization Limit 1 Queue (PQDAU1QU) and Authorization Limit 2 Queue (PQDAU2QU) respectively.

If the Authorization Limit check is done on booking date, it is not repeated on Value date processing.

Sanction Check

If sanctions screening is enabled for the source and network of Source Network Preferences PMDSORNW and applies to the customer, transactions can be sent for screening to the external system.

If the approval for a sanction is granted, the transaction will resume with further processing. In case of seizure, we post seizure accounting, if applicable. If the status is rejected or interim, the transaction is moved to the sanction check queue for further review.

External Account Check

The DDA system performs validity and status checks on Customer/Accounts during EAC calls. If the status received from the External system is rejected or interim, the transaction is moved to the EAC queue by the DDA system.

Accounting

The 'Debit Liquidation' & 'Credit Liquidation' accounting codes from US CHIPS Network Currency Preferences (PSDCHPNC).

Accounting Handoff is prepared based on the accounting codes and sent to Accounting system.
