This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

# 1 Preface

- Purpose
- Audience
   This manual is intended for the following User/User Roles:
- Documentation Accessibility
- Critical Patches
- Diversity and Inclusion
- Conventions
- Related Resources
- Screenshot Disclaimer
- Acronyms and Abbreviations
- Basic Actions
- Symbols, Definitions and Abbreviations The following are some of the Symbols you are likely to find in the manual:

### 1.1 Purpose

This guide is designed to help acquaint you with the Oracle Banking Payments application. This guide provides answers to specific features and procedures that the user need to be aware of the module to function successfully.

## 1.2 Audience

This manual is intended for the following User/User Roles:

#### Table 1-1 User Roles

Role	Function		
Implementation & IT Staff	Implementation & Maintenance of the Software		

## 1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

#### Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

# **1.4 Critical Patches**

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to make sure effective security, as strongly recommended by Oracle Software Security Assurance.

# 1.5 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## 1.6 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## **1.7 Related Resources**

For more information on any related features, refer to the following documents:

- Getting Started User Guide
- Oracle Banking Security Management System User Guide
- Oracle Banking Microservices Platform Foundation User Guide
- Routing Hub Configuration User Guide
- Oracle Banking Common Core User Guide
- Interest and Charges User Guide
- Oracle Banking Liquidity Management Configuration Guide
- Oracle Banking Liquidity Management File Upload User Guide

### 1.8 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

# **1.9 Acronyms and Abbreviations**

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1-2 Acronyms and Abbreviations

Abbreviation	Description
DDA	Demand Deposit Accounts
ECA	External Credit Approval
EOD	End of Day
IBAN	International Bank Account Number

## 1.10 Basic Actions

The basic actions performed in the screens are as follows:

Actions	Description	
New	Click <b>New</b> to add a new record. The system displays a new record to specify the required data. The fields marked with asterisk are mandatory. - This button is displayed only for the records that are already created.	
Save	Click Save to save the details entered or selected in the screen.	
Unlock	Click <b>Unlock</b> to update the details of an existing record. The system displays an existing record in editable mode. - This button is displayed only for the records that are already created.	
Authorize	Click <b>Authorize</b> to authorize the record created. A maker of the screen is not allowed to authorize the same. Only a checker can authorize a record. - This button is displayed only for the already created records. For more information on the process, refer Authorization Process.	
Approve	Click <b>Approve</b> to approve the initiated record. - This button is displayed once the user click <b>Authorize</b> .	
Audit	Click <b>Audit</b> to view the maker details, checker details of the particular record. - This button is displayed only for the records that are already created.	
Close	Click <b>Close</b> to close a record. This action is available only when a record is created.	
Confirm	Click <b>Confirm</b> to confirm the action performed.	
Cancel	Click <b>Cancel</b> to cancel the action performed.	
Compare	Click <b>Compare</b> to view the comparison through the field values of old record and the current record. - This button is displayed in the widget once the user click <b>Authorize</b> .	
View	Click <b>View</b> to view the details in a particular modification stage. - This button is displayed in the widget once the user click <b>Authorize</b> .	

Table 1-3 Basic Actions
-------------------------

Actions	Description	
View Difference only	Click <b>View Difference only</b> to view a comparison through the field element values of old record and the current record, which has undergone changes. - This button is displayed once the user click <b>Compare</b> .	
Expand All	Click <b>Expand All</b> to expand and view all the details in the sections. - This button is displayed once the user click <b>Compare</b> .	
Collapse All	Click <b>Collapse All</b> to hide the details in the sections. - This button is displayed once the user click <b>Compare</b> .	
ОК	Click <b>OK</b> to confirm the details in the screen.	

Table 1-3 (Cont.) Basic Actions

# 1.11 Symbols, Definitions and Abbreviations

The following are some of the Symbols you are likely to find in the manual:

Table 1-4	Symbols
-----------	---------

lcons	Function
×	Exit
+	Add row
—	Delete row
Q	Option List

Table 1-5 Commor	Icons and i	ts Definitions
------------------	-------------	----------------

lcon Names	Applicable Stages	Operation
Minimize	Initiation, Approval and Hand-off Retry	Users can minimize the transaction input screen. When the screen is minimized, it appears as to a separate tab within the same web page.
Maximiz e	Initiation, Approval and Hand-off Retry	User can maximize the transaction input screen.
Close	Initiation, Approval and Hand-off Retry	Users can close the transaction input screen. The system displays a warning message to the user that any unsaved data would be lost. User can either choose to ignore the message and close the screen or choose to 'save and close' the transaction.

# 2 China National Advanced Payment System-CNAPS

This chapter contains the following sections:

- Overview of CNAPS
- CNAPS Maintenances
- Overview of CNAPS
- CNAPS Maintenances

# 2.1 Overview of CNAPS

Processing of inbound/outbound payments through China's second generation payment system CNAPS2 for the following:

- HVPS High Value Payment System
- BEPS Regular Bulk Electronic Payment System
- BEPS Real- Time

For each of the above mentioned networks, following payment types are supported:

- Customer Transfer
- Bank Transfer

For each of the transaction, the message generation is done at custom layer and sent to middle-ware and the actual message/file generation for the Network happens from the middle-ware.

The transactions/processing considered for HVPS/BEPS are as below:

SI.No.	Transaction Type	Transaction	Transfer Type
1	Outbound	Credit Transfer	Customer transfer
2	Outbound	Credit Transfer	Bank transfer
3	Outbound	Account information inquiry	N.A.
4	Outbound	Receipt of Acknowledgment Messages	N.A.
5	Inbound	Credit Transfer	Customer transfer
6	Inbound	Credit Transfer	Bank transfer
7	Inbound	Sending Acknowledgments (positive/ Negative)	N.A.
8	Inbound	Directory maintenance	N.A.

## 2.2 CNAPS Maintenances

This section lists the key common maintenances that are required for processing of outbound and inbound CNAPS Payments.

- Source Maintenance (PMDSORCE)
- Source Network Preferences (PMDSORNW)
- External System Maintenances for Sanctions, External Credit Approval and Accounting

For more details on above mentioned maintenance screens, refer to Payments Core User Guide.

The other key maintenances are as follows:

- Network Preferences
- Settlement Instruction
- Branch Identifier
- Directory
- Business Type
- Network Cutoff
- CNAPS Common Preferences
- CNAPS Return Code Maintenance
- SWIFT Codeword Mapping for CNAPS

#### 2.2.1 Network Preferences

The CNAPS Network Preferences screen allows users to maintain the CNAPS network preferences for each payment method.

1. On Homepage, specify PHDNWPRF in the text box, and click next arrow.

CNAPS Network Preferences screen is displayed.

Network Code *	Q	Network Description		
Transfer Currency *		Network Type Description		
0	utbound		Inbound	
ayment Preferences		Price Code Details		
Minimum Amount		Customer Transfer	Q	
Maximum Amount		Bank Transfer	Q	
ccounting Codes		Network Account Details		
Debit Liquidation *	Q	Network Account	Q	
Credit Liquidation *	Q	Return GL	Q	

#### Figure 2-1 CNAPS Network Preferences

- 2. Click **New** button on the Application toolbar.
- 3. On CNAPS Network Preferences screen, specify the fields.

Field	Description	
Network Code	Select the Network code from the list of values. All Valid networks maintained with payment type as CNAPS are listed.	
Network Description	System defaults the description on the network selected.	
Network Type Description	System defaults the Network Type Description based on the Network selected.	
Host Code	System displays the Host Code of selected branch of the logged in user on clicking 'New' button.	
Host Code Description	System defaults the description of the Host Code.	
Transfer Currency	Transfer currency is defaulted from the Network Currency restriction data store.	
Payment Method	<ul> <li>Select the payment type from the drop-down list. This is a mandatory field. The list displays the following values:</li> <li>HVPS</li> <li>BEPS</li> <li>BEPS - Real - Time</li> </ul>	
Outbound Payment Preferences	The following fields are available as part of Outbound preferences for the network and payment method combination:	
Payment Preferences		
Minimum Amount	Specify the Minimum amount allowed for the network. This is an optional field.	
Maximum Amount	Specify the Maximum amount allowed for the network. This is an optional field.	
Pricing Code Details		
Customer Transfer	Select the pricing code specific to Customer Transfer from the list of values. All the valid pricing codes maintained in the PPDCDMNT screen are listed.	
Bank Transfer	Select the pricing code specific to Bank Transfer from the list of values. All the valid pricing codes maintained in the PPDCDMNT screen are listed.	
Accounting Codes		
Debit Liquidation	Select the Debit liquidation code from the list of values. This is a mandatory field. Accounting codes maintained in Accounting Template maintenance (PMDACCTL) with transaction type as Debit are listed.	
Credit Liquidation	Select the Credit liquidation code from the list of values. This is a mandatory field. Accounting codes maintained in Accounting Template maintenance (PMDACCTL) with transaction type as Credit are listed.	
Network Account Details		
Network Account	Select the valid Network Account from the list of values. All valid Nostro accounts of currency CNY are listed in this field. it is not a mandatory field. <b>Note</b> : If Clearing GL is maintained in accounting template for credit leg (Offset Account) then system fetches the clearing GL as a Network Account otherwise. System fetches the Network account maintained in this field as credit account.	

### 2.2.2 Settlement Instruction

The CNAPS Settlement Instruction screen allows users to maintain the settlement instructions. The SSI created here can be used as the beneficiary on the outbound payment booking.

1. On Homepage, specify **PHDSSIMT** in the text box, and click next arrow.

CNAPS Settlement Instruction screen is displayed.

New 🟳 Enter Query			
Customer No *	Q	Host Code *

- 2. Click **New** button on the Application toolbar.
- 3. On CNAPS Settlement Instruction screen, specify the fields.

Table 2-2	<b>CNAPS Settlement</b>	Instruction - Fig	eld Description
-----------	-------------------------	-------------------	-----------------

Field	Description
Customer Number	Select the Customer Number from the list of values. All the valid customer accounts for the Host are listed.
Customer Name	System defaults the Customer Name, based on the Customer Number selected.
SSI Label	Specify the SSI Label and this is an user input field. It is mandatory and allowed character length is 35.
Host Code	System displays the Host Code of selected branch of the logged in user on clicking 'New' button.
Host Code Description	System defaults the description of the Host Code.
Settlement Account / Bank Details	
Account	Specify the beneficiary account details here. This is a mandatory field.
Counterparty Name	Specify the Counterparty name. This is an optional field and allows Chines characters.
Address	Specify the Address. This is an optional field and allows Chines characters.

Field	Description	
Bank Code	Select the Bank Code from the list of values. Bank code of Counterparty's bank has to be captured in this field. This is a mandatory field. All Bank codes listed in the CNAPS directory are listed here.	
Bank Name	System defaults the name of the Bank Code displayed.	
Allowed Payment Methods	;	
Payment Method	<ul> <li>Select the payment type from the drop-down list, for which the settlement instruction to be maintained. The list displays the following values:</li> <li>HVPS</li> <li>BEPS</li> <li>BEPS - Real Time</li> </ul>	

#### Table 2-2 (Cont.) CNAPS Settlement Instruction - Field Description

### 2.2.3 Branch Identifier

The CNAPS Branch Identifier screen allows users to maintain the processing branch clearing line number. This is a host level maintenance.

1. On Homepage, specify **PHDBRIDT** in the text box, and click next arrow.

CNAPS Branch Identifier screen is displayed.

Figure 2-3	CNAPS	Branch	Identifier

- 2. Click **New** button on the Application toolbar.
- 3. On CNAPS Directory screen, specify the fields.

For more information on fields, refer to the field description below:

#### Table 2-4 CNAPS Directory - Field Description

Field	Description
Bank Code	Specify a valid Bank Code. This is a mandatory field and allowed character length is 14. For BEPS - Real Time, Bank Code maintained for BEPS to be referred.
Bank Name	Specify a valid Bank Name. This is a mandatory field and allowed character length is 140. This field allows Chinese Characters.
Bank Short Name	Specify a valid Bank Short Name. Allowed character length is 35.
Bank Address	Specify a valid Bank Address. This is a mandatory field and allowed character length is 32.

Field	Description
City Code	Specify a valid City Code. This is an optional field and allowed character length is 60.
Telephone	Specify a valid Telephone number. This is an optional field and allowed character length is 70.
Participant Type	<ul><li>Select the Participant Type from the following:</li><li>Direct (Default)</li><li>Indirect</li></ul>
Direct Participation Code	Specify a Direct Participation Code. This is a mandatory field and allowed character length is 14.
Direct Participation Name	Specify a Direct Participation Name.
Payment Method	<ul> <li>Select the Payment Method from the drop-down values. System defaults the value as 'HVPS'. The options are:</li> <li>HVPS</li> <li>BEPS</li> </ul>
Last Change Date	Specify the Last Change Date.

Table 2-4 (Cont.) CNAPS Directory - Field Description

### 2.2.5 Business Type

The CNAPS Business Types screen allows users to maintain business types allowed for CNAPS. This is host-level maintenance.

1. On Homepage, specify PHDBTYPE in the text box, and click next arrow.

CNAPS Business Types screen is displayed.

2. Click New button on the Application toolbar.

3. On CNAPS Network Cutoff Maintenance screen, specify the fields.

For more information on fields, refer to the field description below:

Table 2-6	CNAPS Network	<b>Cutoff Maintenance -</b>	Field Description

Field	Description
Host Code	System displays the Host Code of selected branch of the logged in user on clicking 'New' button.
Host Code Description	System defaults the description of the Host Code.
Network Code	Select the Network code from the list of values. All Valid networks maintained with payment type as CNAPS are listed.
Network Description	System defaults the description on the network selected.
Network Type Description	System defaults the Network Type Description based on the Network selected.
Payment Method	Select the payment type from the drop-down list, for which the Network cutoff to be maintained. The list displays the following values: • HVPS • BEPS • BEPS - Real Time
Network Cutoff Time	
Hour	Specify the network cut-off hour
Minute	Specify the network cut-off in minutes.

#### 2.2.7 CNAPS Common Preferences

The CNAPS Common Preferences screen allows users to maintain the preferences common for the CNAPS Network.

1. On Homepage, specify **PHDCNPRF** in the text box, and click next arrow.

CNAPS Common Preferences screen is displayed.

New 🟳 Enter Query

#### Figure 2-7 CNAPS Common Preference

- 2. Click New button on the Application toolbar.
- 3. On CNAPS Common Preferences screen, specify the fields.

Field	Description
Host Code	System displays the Host Code of selected branch of the logged in user on clicking 'New' button.
Host Code Description	System defaults the description of the Host Code.
Network Code	Select the Network code from the list of values. All Valid networks maintained with payment type as CNAPS are listed.
Network Description	System defaults the description on the network selected.
Network Type Description	System defaults the Network Type Description based on the Network selected.
Exchange Rate Preferences	
FX Rate Type	Select the FX Rate Type from the list of values. Exchange rate pick up for a payment transaction is based on Small FX rate type maintained in Network Preferences. All open and authorized exchange rate types available in core system are listed for this field.
Rate Override Variance	Specify the Rate Override Variance. If exchange rate provided for a payment transaction exceeds the override limit specified, then system logs an override and transaction is saved.
Rate Stop Variance	Specify the Rate Stop Variance. In case the exchange rate specified exceeds the Stop limit specified, the system throws an error.
External Exchange Rate Applicable	Payment details are sent to external system to obtain exchange rate, if this flag is checked.
External FX Cancel	<ul> <li>Select the External FX Cancel from the following:</li> <li>Auto (Default)</li> <li>Manual</li> <li>If FX reference number is available for a transaction and if it is canceled or rolled over from an exception queue, the preference specified here, is applied.</li> </ul>
Small FX Limit	
Small FX Limit Currency	Specify the currency of the small FX limit. All the valid currencies are listed.
Small FX Limit Amount	Specify the amount of the small FX amount. System converts the transfer amount in Small FX limit currency and compares with this limit.
CNAPS Directory XSD Path	
Schema Definition File Path	Specify the Schema Definition File Path.
Holiday Check Preferences	
Branch Holiday Check	By default, this field value is Yes. If the field is Yes, then Branch holidays are considered for Activation Date derivation. If this field is No, then Branch holiday calendar is not considered while deriving the Activation Date
Skip Currency Holiday Check	By default, this field value is No. If the field value is 'Yes', the currency Holiday check is skipped during Instruction Date derivation.

#### Figure 3-1 CNAPS Outbound Transaction Input

- 2. Click **New** button on the Application toolbar.
- 3. On CNAPS Outbound Transaction Input screen, specify the fields.

Table 3-1	<b>CNAPS</b> Outbound	<b>Transaction Input</b>	- Field Descrip	tion
-----------	-----------------------	--------------------------	-----------------	------

Field	Description
Transaction Reference Number	System generates the transaction reference number. For more details on the format, refer the Payments Core User Guide.
	This is a unique identifier of the CNAPS payment transaction and auto-generated by the system based on the common transaction reference generation logic. The same reference is used as Message ID.
Network Code	Select the Network Code from the list of values. All networks of payment type CNAPS are listed based on Network Code maintenance. If only one Network is defined, that Network is defaulted on 'New' operation itself. Payment type gets populated, based on the Network selected.
Payment Method	<ul> <li>Select the payment type from the following:</li> <li>HVPS - High Value Payments System</li> <li>BEPS - Bulk Electronic Payment System</li> <li>BEPS - Real Time - Online Faster Payments</li> </ul>

Field	Description
End to End Identification	Specify the End to end ID provided by the originating customer (debit account owner). This is a mandatory field. If not provided by the customer, system populates the transaction reference number automatically on saving the transaction.
Transfer Type	<ul> <li>Select the transfer type from the drop-down list. System defaults the transfer type as 'Customer Transfer'. The list displays the following values:</li> <li>Customer Transfer</li> <li>Bank Transfer</li> </ul>
Source Reference Number	Specify the Source Reference number. The external system reference can be input in this field. This is optional for manually input transaction and is mandatory for channel input transactions.
Source Code	Select the Source Code from the list if values. All valid source codes maintained in the Source Maintenance are listed.
Transaction Branch	System defaults the transaction branch code with the user's logged in branch code.
Host Code	System displays the Host Code of selected branch of the logged in user on clicking 'New' button.

Figure 3-2 CNAPS Outbound Payments Transaction Input - Main Tab

2. On CNAPS Outbound Payments Transaction Input sub-screen, specify the fields.

Field	Description
Customer Details	
Account Number	Specify the account number. Alternatively, you can select the account number from the option list. The list displays all open and authorized accounts as available in External Account Maintenance (STDCRACC). System allows the account number as GL also. The account number length allowed in CNAPS is 32 and the system validates the same on saving the transaction.
	Note: Prefunded GL functionality is applicable for CNAPS.
Account Currency	System defaults the currency based on the Account number selected.
Account Branch	System defaults the branch based on the Account number selected.
Name	System defaults the Name based on the Account number selected. The name displayed is trimmed to a length of 60 when defaulted. This is not modifiable.
Address	System defaults the Address based on the Account number selected, if available. This is an optional field and you can modify the defaulted address.
Amount	Amount is displayed upon clicking Enrich.
Customer Number	System defaults the customer Number, linked to the debtor account number, if any.
Customer Service Model	System defaults the customer service model, linked to the debtor account number, if any. <b>Note</b> : System does not default Customer Number and Customer Service Model, when GL is selected as Account Number.
Charge Account Number	Specify the Charge Account Number from the list of values.
Charge Account Branch	Account Branch is displayed based on the Account Number selected.

Table 3-2	<b>CNAPS Outbound Payments Transaction Input - Main Tab Field</b>
Description	1

Field	Description
Charge Account Currency	Charge Account Currency is displayed for the Charge Account
	selected.
Payment Details	
Booking Date	System defaults the booking date as current date. This is disabled for modification.
Instruction Date	System defaults the Instruction date as current application server date. This field can be edited by you. This is the requested execution date by the customer. Back dates are not allowed as instruction date. If instruction date is a Network holiday, it is moved to next working day for Network.
Activation Date	Activation date is derived as Instruction Date – Debit Float days as maintained in Process cutoff maintenance. Holiday check is done for Activation date based on Branch holidays maintained.
Instructed Currency Indicator	<ul> <li>Select the Currency indicator from the following:</li> <li>Transfer Currency</li> <li>Debit Currency</li> <li>System defaults the value as 'Transfer Currency' on New action and transfer currency field is defaulted as CNY. You can change Instructed currency indicator to Debit currency if required.</li> <li>If the Instructed currency indicator is 'Transfer currency' Transfer Amount field is enabled for user input.</li> <li>If the Instructed currency field is 'Debit Currency' Amount field</li> </ul>
	(meant for debit amount) under customer details is enabled for input.
Transfer Currency	System defaults the Transaction Currency as 'CNY' for CNAPS payments.
Transfer Currency Name	System defaults the name of the Transfer Currency.
Transfer Amount	Specify the Transfer Amount.
Exchange Rate	Specify the Exchange Rate.If transfer currency & debtor account currency are different then Exchange rate can be provided by you too. System retains the input value and validates the same against override and stop variances maintained at Network Preferences. Exchange Rate Validations:
	<ul> <li>If exchange rate is not a user input, system picks up exchange rate during 'Enrich' provided the transfer amount is less than small FX limit maintained. If exchange rate is not available, system throws error.</li> <li>Based on debit amount/transfer amount input, the other amount is computed by the system.</li> <li>If transfer amount is more than small FX limit and if external exchange rate is applicable, then rate pick up happens during transaction processing.</li> </ul>
Credit Value Date	System derives the credit value date as part of transaction processing on clicking Enrich button. This field is disabled.
Debit Value Date	System would derive the debit value date as part of transaction processing on clicking Enrich button. This field is disabled for user input.

# Table 3-2(Cont.) CNAPS Outbound Payments Transaction Input - Main Tab FieldDescription

Field	Description
Internal Remarks	Specify the internal remarks if any. <b>Note</b> : Accounts of other currencies can be used as debit account CNAPS. Multi-currency accounts also can be used as debit accounts.
Beneficiary/ Counterparty Details	
SSI Label	Select the SSI Label from the list of values. If the Creditor details are maintained in PHDSSIMT for the customer, the same can be selected in this field. Creditor details are populated based on the SSI label details.
	<b>Note</b> : It is optional to input SSI labels. Either you can directly input the beneficiary details or you can select the listed SSI label. If beneficiary details are defaulted from SSI label, it is disabled for further modification.
Account Number	Specify the Beneficiary account number here.
Account Name	Specify the Beneficiary account name here. This is an optional field
Address	Specify the Beneficiary Address here. This is an optional field.
Bank Code	Select the Bank code from the list of values. All open and authorized Bank Codes available in CNAPS directory are listed here, for the payment method chosen.
Bank Name	System defaults the Bank Name, based on the bank code selected.
Business Type	Select the Business Type from the list of values. This lists all the combinations of business type& related business category codes maintained in CNAPS Business Type Maintenance.
Description	System defaults the description based on the business type selected.
Business Category Code	Business Category Code is defaulted based on the business type selected.
Description	System defaults the description based on the business type selected.
Business Priority	System defaults the option as NORM. Other options in the drop down list are: HIGH, URGT.
HVPS Remittance Information	These fields are applicable only for the Payment Method - HVPS.
Remarks 1	Specify the remarks if any, for payment method - HVPS.
Additional Information 1	Specify the additional info if any, for payment method - HVPS.
Remarks 2	Specify the remarks if any, for payment method - HVPS.
Additional Information 2	Specify the additional info if any, for payment method - HVPS. <b>Note</b> : Remittance information line1 & 2 (Remarks 1&2) is disabled if payment method is HVPS & transfer type is bank transfer.
Creditor Identification	
Birth Date	Specify the Birth Date of the Creditor.
City Of Birth	Specify the City of Birth of the Creditor.
Country Of Birth	Specify the Country of Birth of the Creditor.
Creditor Postal Address	
Street Name	Specify the Street Name of the creditor.
Building Number	Specify the Building Number of the creditor.
Post Code	Specify the Post Code of the creditor.
Town Name	Specify the Town Name of the creditor.

# Table 3-2(Cont.) CNAPS Outbound Payments Transaction Input - Main Tab FieldDescription

Lield	Description
Field	
Country	Specify the Country of the creditor.
Payment Details	
Booking Date	System defaults the current date as Booking Date. This will be a disabled field for user modification.
Instruction Date	System defaults the current application server date. This date can be modified by the user. This is the requested execution date by the customer. Back dates are not allowed as instruction date.
Transfer Currency	System defaults the Transfer currency as 'USD'.
Transfer Amount	Specify the Transfer Amount.
Additional Details	
Local Instrument	<ul> <li>Select the Local Instrument from the list of values. All the valid instruments are listed.</li> <li>Identifies the Debtor/Sender as either a business or consumer customer of the Debtor FI. This field also indicates whether the Debtor/Sender is a domestic customer of the Debtor FI or a customer of a foreign branch or affiliate of the Debtor FI.</li> <li>Local Instrument options listed are as follows: <ul> <li>BUSINESS - Business Initiated Payment (domestic)</li> <li>CONSUMER - Consumer Initiated Payment (foreign affiliate)</li> <li>FABUSINESS - Business Initiated Payment (foreign affiliate)</li> <li>INTERMEDIARY - Payment sent through a Payment Service Provider (domestic)</li> <li>ZELLE - Zelle Payment (domestic)</li> </ul> </li> </ul>
Remittance Advice ID	Specify the Remittance Advice ID. This field is used, if a separate Remittance Advice is sent via a remt.001 message. The reference in this element, if included, must be identical to the Remittance Identification provided in the remittance advice message.
Remittance Information	Specify the Remittance Information. Unstructured information up-to length 140 can be entered in this field. <b>Note</b> : Structured Remittance information is applicable if the payment is originated as a result of return of a previous payment received.
Remittance Method	<ul> <li>Select the Remittance method from the following:</li> <li>EMAL - E-Mail</li> <li>URID - Uniform Resource Identifier</li> </ul>
Electronic Address	Specify the electronic address. Electronic address to which, an agent sends the remittance information can be entered in this field.
Remarks	Specify the internal remarks if any.
Enrich Button	On clicking the Enrich button, system computes the Charges, and Tax on Charges if applicable, based on the maintenance for Pricing Code specified in Outbound US RTP preferences (PUMNCPRF).

# Table 3-2 (Cont.) CNAPS Outbound Payments Transaction Input - Main Tab Field Description

#### 3.1.1.2 CNAPS Outbound Payments Transaction Input-Payment Details Tab

You can specify any additional details applicable for BEPS-regular or Real-time transactions can be entered in this tab.

This tab is enabled if the Network type is BEPS-Real-time 'or 'BEPS-Regular'.

1. Click on **Payment Details Tab** in the CNAPS Outbound Payments Transaction Input screen.

Payment Details sub-screen is displayed.

ollection Information(A109 HVPS/BEPS)	Bank Draft Information (HVPS/BEPS)	
Bill Type	Bill Date	
Bill Date	Bill Number

Term	Drawer Name	
Payment Type	Cheque Amount	
Additional Information	Cheque Number	
	Amount	

#### Figure 3-3 CNAPS Outbound Payments Transaction Input - Payment Details Tab

2. On CNAPS Outbound Payments Transaction Input\_Payment Details sub-screen, specify the fields.

For more information on fields, refer to the field description below:

Field	Description
Additional Details	Specify the additional details. Chinese characters are allowed and the character length is 256.
Collection Information (A109 HVPS/ BEPS)	
Bill Type	<ul> <li>Select the option from drop down values. This is a mandatory field. The options are:</li> <li>01: Domestic letter of credit</li> <li>02: time certificate</li> <li>03: certificate T-bonds</li> <li>04: off-site current passbook</li> <li>99: Others</li> </ul>
Bill Date	Specify the Bill date. This is a mandatory field. This is modifiable before authorization.
Bill Number	Specify the Bill number. This is an option field with character length 32. This is modifiable before authorization.
Cross -Border Details (HVPS A113)	
Reference Date	Specify the Reference Date. This is an option field.
Charge Whom	System defaults the value as DEBT.
Sender Charges	Specify the Sender Charges. This is an option field.
Receiver Charges	Specify the Receiver Charges. This is an option field.
Payment Service Details (A301 BEPS)	
Serial Number	Specify the Serial Number. This is a mandatory field with allowed character length of 20. This is modifiable before authorization.

# Table 3-3CNAPS Outbound Payments Transaction Input - Payment Details FieldDescription

Field	Description
Term	Specify the Term in numbers. This is a mandatory field with allowed character length of 16. This is modifiable before authorization.
Payment Type	<ul> <li>Select the option from drop down values. This is a mandatory field.</li> <li>The options are: <ul> <li>TP00: cash payment</li> <li>TP01: Transfer in the same city</li> <li>TP02: by cheque</li> <li>TP03: off-site Remittance</li> <li>TP04:Others</li> </ul> </li> </ul>
Additional Information	Specify the additional details. Chinese characters are allowed and the character length is 256.
Bank Draft Information (HVPS/ BEPS)	
Bill Date	Specify the Bill date. This is a mandatory field. This is modifiable before authorization. When collection acceptance information are entered, Bill date and number are mandatory in this section.
Bill Number	Specify the Bill number. This is an option field with character length 32. This is modifiable before authorization.
Payment Amount	Specify the payment amount in numbers. This is a mandatory field and is modifiable before authorization.
Applicant Account	Specify the applicant account. This is an optional field and allowed character length is 32.
Applicant Name	Specify the applicant name. Chinese characters are allowed and the character length is 60.
Settlement Amount	Specify the settlement amount. This is an optional field.
Surplus Amount	Specify the Surplus amount. This is an optional field.
Draft Type	<ul> <li>Select the option from drop down values. This is a mandatory field.</li> <li>System defaults the option as 'Null'. The options are:</li> <li>CT00: Transferable draft</li> <li>CT01: Non-transferable draft</li> <li>CT02: cash draft</li> <li>CT03: Fixed Promissory Note</li> <li>CT04: Irregular promissory note</li> </ul>
Cheque Information (BEPS A201)	
Issue Date	Specify the Issue date. This is a mandatory field.
Drawer Name	Specify the Issue date. This is a mandatory field. Chinese characters are allowed and the character length is 60.
Cheque Amount	Specify Cheque Amount. This is a mandatory field.
Cheque Number	Specify the Cheque Number. This is a mandatory field and allowed character length is 4.
Amount	Specify the Amount.

# Table 3-3 (Cont.) CNAPS Outbound Payments Transaction Input - Payment DetailsField Description

### 3.1.1.3 Pricing Tab

You can view the pricing details populated by system in this screen on clicking Enrich.

1. Click the **Pricing** tab and view the pricing details.

#### Figure 3-4 Pricing

Pricing Component ♀	Pricing Currency 😂	Pricing Amount 💲	Watver 🗘	Debit Amount 🗘	Debit Currency 🗘
lo data to display.					
e 1 (0 of 0 items) K	1 > >				
ige 1 (0 of 0 items)  < ∢	1 > >				

- 2. There may be one or more applicable Charge and Tax components as defined in the Pricing Code maintenance. The fixed amount or rate is fetched from Pricing Value Maintenance screen (PPDVLMNT) for each Charge and/or Tax component, as applicable for the Payment Source code & Customer Service model.
- 3. On **Pricing** screen, the computed charges, and taxes if applicable, are populated for each charge component in the following fields.

For more information on fields, refer to the field description below:

Field	Description
Pricing Component	System defaults the pricing component based on the Pricing code linked in Network Currency Preferences.
Pricing Currency	System defaults the pricing currency of the component from the Pricing code maintenance.
Pricing Amount	System defaults the pricing amount from Pricing Value Maintenance screen (PPDVLMNT) as applicable for the payment value date, Payment Source code and Debit Customer Service Model. However you can modify this value.
	Note: Currency conversions related to charge computation are completed and final amount is populated component wise in the Pricing Tab.
Waiver	System defaults the waiver. However you can modify this value.
	<ul> <li>Note:</li> <li>If charge/tax is already waived at price value maintenances, then you cannot uncheck the waiver flag. This component is still displayed with the value and the waiver flag checked.</li> <li>If a particular Charge component is waived, then system automatically checks the waiver of the associated Tax component.</li> </ul>
Debit Currency	System displays the customer debit currency for charge/tax.
Debit Amount	System displays the amount debited to the selected debit account.

#### Table 3-4 Pricing

#### 3.1.1.4 UDF Button

- **1.** This sub-screen defaults values of UDF fields that are part of the UDF group specified for the 'Manual' source.
- 2. Click the **UDF button** to invoke the 'UDF' sub-screen.
- 3. On UDF Button, specify the fields.

Figure 3-5 UDF Button

Table 3-5 UDF Button - Field Description

Field	Description
Field Label	System displays all fields that are part of the associated UDF group.
Field Value	System displays the default value, where exists for the UDF fields. You can change the default value or specify value for other fields (where default value does not exist).

#### 3.1.1.5 MIS Button

- **1.** You can maintain the MIS information for the Transaction. If the MIS details are not entered for the Transaction the same is defaulted from the product maintenance.
- 2. Click the MIS button to invoke the 'MIS' sub-screen.
- 3. On MIS Button, specify the fields.

Transaction Reference Number *	MIS Group	Q. Default	
Transaction MIS		Composite MIS	
Q		Q	
Q		Q	
Q		Q	
Q		Q	
Q		Q	
Q		Q	
Q		Q	
Q		Q	
Q		0	

### Figure 3-6 MIS Button

### Table 3-6 MIS Button - Field Description

Field	Description
Transaction Reference	System displays the transaction reference number of the transaction.
MIS Group	You can select the MIS group code from the option list, or specify the code for the MIS group in the Source maintenance. The system displays all valid MIS groups for different sources in the MIS group list in the Source maintenance. When booking a transaction from this screen, the MIS group linked to the 'Manual' source is populated by default.
Default button	After selecting a MIS group different from the default MIS Group, click this button to populate any default MIS values and link them to the Transaction MIS and Composite MIS classes.
Transaction MIS	You can populate the default MIS values for Transaction MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.
Composite MIS	You can populate the default MIS values for Composite MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.

# 3.1.1.6 Accounting Details

1. Click the **Accounting Details** tab and view the accounting entries for the transaction initiated.

# 3.1.4 Webservices

The outbound CNAPS can be initiated using Webservice / ReST service.

# **3.2 CNAPS Credit Outbound Payments Processing**

- CNAPS Outbound Payment Validations
- Future Dated Transaction Processing
- Return of Outbound CNAPS Credit Transactions

# 3.2.1 CNAPS Outbound Payment Validations

Outbound payments follows the below listed processing steps:

- Initial validations also Involves with Chinese character validations
- Beneficiary validation request sends to clearing, if not valid transaction gets cancel
- Duplicate Check performs based on duplicate check fields of Source maintenance
- Authorization Limit check performs based on network and source
- · Process cutoff can be maintained per customer & account
- Customer Limit check
- Sanctions Check
- FX Processing
- Pricing
- ECA Check If Auto cancel is enabled, payment gets cancelled for rejected response
- Accounting: Generation of generic notification XML/ IR XML Messaging
- Acknowledgment handling
- Credit confirmation upload only applicable for BEPS Real-time transactions
- SSI Details Population
- Initial Validations
- Beneficiary Validation
- Duplicate Check
- Authorization Limit Check
- Process Cutoff
- Sanction Check
- FX Processing
- Pricing
- ECA Check
- Network Cutoff Check
- Accounting
- Messaging

# 3.2.1.1 SSI Details Population

If a valid SSI label is provided, the beneficiary details are populated on enrich. For a transaction received through services, SSI details are fetched before mandatory validations.

# 3.2.1.2 Initial Validations

- The following processing is covered as part of initial validations:
  - Data enrichment Account / Bank Re-direction
  - Mandatory field validations –As listed in the field mapping sheet
  - Network Limit validations Minimum and maximum amount allowed, if maintained in CNAPS Network Preferences for the payment method, transaction type and currency (CNY)
  - Validation for fields disallowed for Chinese characters are verified
- If Account re-direction or bank re-direction is maintained, then the account / bank details are replaced by the values, based on the account re-direction that is applicable for debtor account only
- Mandatory Fields / Referential data checks are done based on the details received in the payment request and the values populated by system.
- Validation is available to verify whether the Counterparty Bank Code is listed in the CNAPS directory. In case of validation failure, transaction is rejected if in.
- Transfer amount limit check is done for the minimum and maximum amount limits defined for the Network, as maintained in Outbound Payment Preferences (PHDNCPRF).
- The initial validations are done on transaction enrich or save from UI. If there is a validation failure, error is displayed, so that you can do the necessary modifications and re-submit the payment. If the validation fails for channel submitted transactions, transaction is moved to Repair Queue.

# 3.2.1.3 Beneficiary Validation

- An API call is provided for sending the beneficiary account, name, address and bank code details to an external system so that the details can be validated. The response is expected as 'TRUE' or 'FLASE'.
- You can maintain the connectivity path and time-out period in seconds for the external call made. If the request is timed-out, the response is treated as false.
- Beneficiary validation can be initiated from UI or as part of payment processing. If the beneficiary validation is done from UI, the system populates error on saving and it is not repeated during processing
- If the beneficiary validation done during the payment processing fails, the transaction gets auto cancelled. The cancellation remarks are updated as 'Beneficiary validation failed'.
- Beneficiary validation services, have tags for the following details:

Payment Method	HVPS,BEPS or BEPS Real time
SndBankId	Own Branch Clearing Code
RecvBankId	Counterparty Bank Code

Acctld
Acctld

### Transaction Code Validations

The validation is done based on customer transaction restrictions maintenance PMDCRSTR. If the Network is restricted for the customer, the transaction is moved to Business Override queue.

### 3.2.1.4 Duplicate Check

- Duplicate parameters can be maintained for the source in PMDSORCE. Based on the Duplicate Check Period in days and fields set, duplicate check for the transaction is done. If the transaction is identified as a duplicate transaction, the transaction is moved to Business Override queue.
- The following parameters are available for duplicate check:
  - Debtor Account DBTR\_ACC
  - Creditor Account CRDTR\_ACC
  - Transfer Amount TFR\_AMT
  - Instruction Date VALUE\_DATE
  - Creditor Bank Routing Number CRDTR\_BANK\_CODE
  - Customer CUSTOMER\_NO
  - Debtor Bank Routing Number DBTR\_BANK\_CODE

### 3.2.1.5 Authorization Limit Check

• Two levels of authorization limits can be maintained for a Network and source in PMDSORNW (optional). If the validation fails the transaction is moved to authorization limit queues.

# 3.2.1.6 Process Cutoff

Cutoff time can be maintained for a Network/Source/Transaction Type/Customer Service Model/Customer in Process cutoff maintenance screen PMDCTOFF (optional).

### 3.2.1.7 Sanction Check

- The transaction can be sent for sanction screening to an external system if sanctions screening is enabled for the source and network in Source Network Preferences PMDSORNW and is applicable for the customer.
- If sanction is approved, the transaction is resumed with the further processing. In case of seizure, customer account is debited and the Seizure GL is credited. If the status is rejected or interim, the transaction is moved to sanction check queue.

### Note:

- The sanction requests originated with payment method BEPS Real-time is sent through separate JMS queues maintained for faster payments for the Sanctions System.
- If sanctions is approved on a subsequent date, the preference is applied as maintained for the source
- Ring-fencing of the funds for sanctions pending transaction is not applicable.

# 3.2.1.8 FX Processing

- Auto rate pick up happens only if the transfer amount is within the small FX limit as maintained in CNAPS Network Common Preferences.
- Transfer amount is converted to limit currency maintained using midrate of FX rate type linked and small FX limit check is done.
- If the transfer amount is above the small FX limit specified, system checks whether External Exchange Rate is applicable in Network common Preferences.
- If external system is available the transaction details, then system send exchange rate request to external system for receiving the exchange rate along with FX Reference Number. Based on the response received, exchange rate is populated and further processing of transaction is continued.
- If Small FX limit is not maintained auto rate pick up is done for all cross currency payment transactions without any limit check.
- Payment contract will be moved to Exchange Rate Exception queue in the following cases with proper error code details:
  - Exchange Rate derivation based on core system maintenance fails
  - Small FX limit is breached and no external exchange rate system maintenance is available
  - Response from Exchange Rate system is rejected

### Note:

For transactions received from UI input with exchange rate no processing on exchange rate is done again.

## 3.2.1.9 Pricing

### **Charge /Tax Computation**

Internal /External charge/tax values are applied based on the host preference maintained for External Price system.

# 3.2.1.10 ECA Check

Balance Check with DDA (CASA) System

• If balance check is approved, the transaction is resumed with the further processing. If the response status is rejected or interim, the transaction is moved to ECA queue. If auto cancel is enabled, payment gets cancelled during response. Customer and account status checks will be done by the external ECA system along with account balance check.

### 3.2.1.11 Network Cutoff Check

The payment processing proceeds to accounting only if Network cutoff is not over for the payment method. If Network cutoff is over, payment is moved to Network Cutoff Queue.

### 3.2.1.12 Accounting

Accounting template for debit and credit can be set at Network preferences for the outgoing transactions.

Once the accounting entries are handed off system generates the Notification XML (if notification is applicable for the source as maintained in PMDSORCE) and Information Reporting XML in the generic format as done for other payment types.

Details in Accounting handoff	Debit Liquidation	Credit Liquidation
Accounting Event	DRLQ	CRLQ
Transaction Account	Debit Customer Account	Clearing GL maintained in the Accounting code. If no GL is maintained, the system consider Network Account maintained in PHDNWPRF
Offset Account	This is picked from the Debit Liquidation Accounting code maintenance	This is picked from the Credit Liquidation Accounting code maintenance
Transaction Currency	CNY	CNY
Transaction Amount	Debit Amount	Transfer amount
Value Date	Debit Value Date	Credit Value date
Offset Currency	Transfer Currency	Transfer Currency
Offset Amount	Transfer amount	Transfer amount
Local Currency Amount	Transfer amount	Transfer amount

Following accounting entries are posted on booking the transaction:

# 3.2.1.13 Messaging

### Acknowledgment Processing

- Webservices are provided for external systems to send the acknowledgments for the messages dispatched.
- Required tags and specifications are mentioned below:

Tag Name	Тад	Format/Length	Mandatory
Acknowledgment Identification	<ackid></ackid>	Max20	М
Original Message ID	<orgnlmsgl d=""></orgnlmsgl>		М
Process Status	<prcsts></prcsts>	ProcessCode (Max4Text)	М

Tag Name	Тад	Format/Length	Mandatory
Bank Identification	<ptyld></ptyld>	Max14Text	0
Process Date	<prcdt></prcdt>	ISO Date	0

Message Process codes can have the below values:

Tag Name	Тад	Format/ length	Mandatory
Acknowledgment Identification	<ackid></ackid>		Yes
Original Message ID	<orgnlmsgid></orgnlmsgid>		Yes
Process Status	<prcsts></prcsts>	ProcessCode (Max4Text	Yes
Bank Identification	<ptyid></ptyid>	Max14Text	No
Reject Code	<ptyprccd></ptyprccd>	Reject code Max 4	No
Reject Information	<rjctinf></rjctinf>	Max105 Text	No
Process Date	<prcdt></prcdt>	ISO Date	No

- Process status can have the following values:
  - PR04-Accepted
  - PR09 Rejected
- If the message is rejected, Reject Code is received in <PtyPrcCd> tag and the detailed information is received in <RjctInf>
- The message status has the following values based on the acknowledgment received:

Processing step	Message Status
Message tags populated in dispatch table	Dispatched
On receipt of Acknowledgement1	ACK1 Received
On getting Acknowledgment 2 as Accepted	ACK2 Received
On getting Acknowledgment 2as Rejected	Rejected

# 3.2.2 Future Dated Transaction Processing

- Future dated transactions for CNAPS outbound are allowed. Future value job picks up the transactions on value date and process them from initial validations.
- Any business override exception which is once authorized on booking is not re-checked during value date processing again.

# 3.2.3 Return of Outbound CNAPS Credit Transactions

You can upload and process return messages received for outbound CNAPS transactions. The return entries are moved to an Exception Queue so that you can verify the return reason and take further manual action on the return records. The following actions are possible from the Exception Queue:

- Accept the return by booking an inbound transaction
- Re-initiate the transaction after correcting the details
- Return message upload
- Processing Accept of Return
- Processing Re-initiation

# 3.2.3.1 Return message upload

ReST service is provided for uploading the Return transactions received for Outbound CNAPS Credit transaction. The following fields are available in the service:

- Source Reference
- Return Message ID
- Original Transaction Reference
- Host Code
- Network Code
- Payment Method (H -HVPS, B -BEPS, O- BEPS Real-time)
- Return Currency
- Return Amount
- Customer Account
- Customer Name
- Reason Code
- Return Reason
- Return Remarks

Debit accounting is posted upfront as below:

Event	Dr/ Cr	Account	Account Type	Amount Tag
HSDR	Dr	Nostro/Network Clearing GL	GL	Transfer Amount
HSDR	Cr	Intermediary GL	GL	Transfer Amount

The system tries to match the Original transaction reference with the outbound transaction present in the system and marks the Transaction status of the original transaction as 'Return Received'. If the original transaction is not found in the system with 'Processed' status, appropriate error is logged for the return transaction.

Original transaction is not available in the system or the transaction status is not valid.

If the original transaction is matched and the Customer account is not matching with the original account, the following error is logged:

"Customer Account" received is not matching with the original account

Return transactions are moved to Outbound CNAPS Reject Queue (Function ID: PQDCNRJQ). The Reject Type is 'Return' and Reject Status is 'Unprocessed'

und CNAPS Reject Queue			
Source Reference	Host Code		
Reject Message Identification	Network Code		
Original Transaction Reference	Payment Method	•	
Transfer Amount	Customer Name		
Transfer Currency	Customer Account		
Reject Code

Remarks			

### Figure 3-18 Outbound CNAPS Reject Queue

The following actions are available in CNAPS Reject Queue:

- Accept
- Re-initiate
- Authorize
- Delete
- Reject
- View Queue Action
- View Original Transaction

Every action except the View actions require user Role/Queue access rights enabled. Accept/ Re-initiate actions require authorization.

### Note:

This Queue is common for Outbound CNAPS Credit/Debit. The reject types supported are Return and Network Reject.

# 3.2.3.2 Processing Accept of Return

1. The Accept of Reject Transaction screen allows users to initiate 'Accept' action for all records of Reject Type 'Return' and Reject status 'Unprocessed'.

Accept of Reject Transaction screen is displayed.

### Figure 3-19 Accept of Reject Transaction

Accept of Reject Transaction			- ×
Enter Query			
Original Transaction Reference		Network Code	
Queue Reference		Transfer Currency	
		Transfer Amount	
		Payment Method	
		Customer Account	
Reject Details			
Reject Type			
Received Date	YYYY-MM-DD		
Message ID			
Source Reference			
Reject Reason			
Remarks			
Maker ID	Maker Date Stamp	Authorization Status	Ok Exit
Checker ID	Checker Date Stamp		

2. Only Remarks field is enabled in this screen for the user to input the remarks. The remarks entered are available in the Queue action log Remarks column. 'Accept' action requires authorization.

The length of Remarks field is 256 characters.

- 3. On authorization, The following processing is done for the return transaction:
  - Sanction Check
  - External Account Check
  - Accounting
  - Transaction Status Update
  - Information reporting/Notification XML generation

### 4. Return Accounting

The accounting entries are posted as below reversing the entries posted for the original transaction. The same exchange rate as in the original transaction is used.

Event	Dr/ Cr	Account	Account Type	Amount Tag
HSCR	Dr	Intermediary GL	GL	Transfer Amount
HSCR	Cr	Customer Account	GL	Transfer Amount

On completion of the processing Return record status is marked as 'Processed' and the linked transaction status is updated as Returned.

### 3.2.3.3 Processing Re-initiation

You can 'Reinitiate' any Reject record for which Reject status is 'Unprocessed', Original transaction status is 'Processed ' and the Original transaction value date is current date. Reinitiate actions launches the PHDOTONL screen in input mode by creating a new transaction with the original transaction details.

The following fields are provided in PHDOTONL & PHDOVIEW screens:

- Re-initiation flag
- Originator Details (Originator Account, Name & Address)
- Linked Reference

The new transaction booked can be a Prefunded transaction with Debit Account as Return GL. Re-initiation flag is checked for the new transaction and original Debtor account, Name and address details are populated as Originator Details.

You can edit the data for the following fields only:

- All additional details fields
- Business type and Business Category type
- Customer Name and Address
- Counterparty Name and Address

The authorization of the newly generated transaction is allowed only from Reject queue.

On authorization of Re-initiate action, the following accounting is passed for the Return transaction:

Event	Dr/ Cr	Account	Account Type	Amount Tag
HSCR	Dr	Intermediary GL	GL	Transfer Amount
HSCR	Cr	Return GL	GL	Transfer Amount

Return transaction status and Original transaction status are updated as 'Re-initiated'. For the original transaction, Linked Reference is updated as newly generated transaction reference.

The new Outbound transaction gets authorized and processed from initial validations. Since the Re-initiated flag is checked, while inserting the Dispatch record, Debtor details are replaced with Originator details.

# **3.3 CNAPS Credit Inbound Payments**

This section contains the following topics:

- CNAPS Inbound Payments Transaction Input
- CNAPS Inbound Payment View
- CNAPS Inbound Browser
- CNAPS Inbound Payments Transaction Input
- CNAPS Inbound Payment View
- CNAPS Inbound Browser

# 3.3.1 CNAPS Inbound Payments Transaction Input

The CNAPS Inbound Payments Transaction Input screen allows users to manually create a CNAPS Inbound Payment by providing the details.

1. On Homepage, specify **PHDITONL** in the text box, and click next arrow.

CNAPS Inbound Transaction Input screen is displayed.

### Figure 3-20 CNAPS Inbound Transaction Input

- 2. Click **New** button on the Application toolbar.
- 3. On CNAPS Inbound Transaction Input screen, specify the fields.

For more information on fields, refer to the field description below:

Table 3-9	CNAPS Inbound	Transaction	Input - Fi	eld Description
-----------	---------------	-------------	------------	-----------------

Field	Description
Transaction Branch	System defaults the transaction branch code with the user's logged in branch code.
Host Code	System displays the Host Code of selected branch of the logged in user on clicking 'New' button.
Network Code	Select the Network Code from the list of values. All networks of payment type CNAPS are listed based on Network Code maintenance. Based on the Network selected, payment type gets populated. If only one Network is defined, that Network is defaulted on 'New' operation itself.
Payment Method	<ul> <li>Select the payment type from the following:</li> <li>HVPS - High Value Payments System</li> <li>BEPS - Bulk Electronic Payment System</li> <li>BEPS - Real Time</li> </ul>
Transfer Type	<ul> <li>Select the transfer type from the drop-down list. System defaults the transfer type as 'Customer Transfer. The list displays the following values:</li> <li>Customer Transfer</li> <li>Bank Transfer</li> </ul>
Source Code	Select the Source Code from the list if values. All valid source codes maintained in the Source Maintenance, are listed here.

Field	Description
Transaction Reference Number	System generates the transaction reference number. For more details on the format, refer the Payments Core User Guide. This is a unique identifier of the CNAPS payment transaction and auto-generated by the system based on the common transaction reference generation logic. The same reference is used as Message ID.
Sender's Reference	Specify the Sender's Reference.
End to End Identification	Specify the End to end ID provided by the originating customer (debit account owner). This is a mandatory field. If not provided by the customer, system populates the transaction reference number automatically on saving the transaction.
Source Reference Number	Specify the Source Reference number. The external system reference can be input in this field. This is optional for manually input transaction and is mandatory for channel input transactions.

Figure 3-21 CNAPS Inbound Payments Transaction Input - Main Tab

2. On Main Tab, specify the fields.

For more information on fields, refer to the field description below:

Field	Description
Customer Details	
Account Number	Specify the account number. Alternatively, you can select the account number from the option list. The list displays all open and authorized accounts as available in External Account Maintenance (STDCRACC). System allows the account number as GL also. The account number length allowed in CNAPS is 32 and the system validates the same on saving the transaction. <b>Note</b> : Prefunded GL functionality is applicable for CNAPS.
Account Currency	System defaults the currency based on the Account number
	selected.
Account Branch	System defaults the branch based on the Account number selected.
Name	System defaults the Name based on the Account number selected. The name displayed is trimmed to a length of 60 when defaulted. This is not modifiable.
Address	System defaults the Address based on the Account number selected, if available. This is an optional field and you can modify the defaulted address.
Amount	Amount is displayed upon clicking Enrich.
Customer Number	System defaults the customer Number, linked to the debtor account number, if any.
Customer Service Model	System defaults the customer service model, linked to the debtor account number, if any. <b>Note</b> : System does not default Customer Number and Customer Service Model, when GL is selected as Account Number.
Charge Account Number	Specify the Charge Account Number from the list of values.
Charge Account Branch	Account Branch is displayed based on the Account Number selected.
Charge Account Currency	Charge Account Currency is displayed for the Charge Account selected.
Payment Details	
Booking Date	System defaults the booking date as current date. This is disabled for modification.
Instruction Date	System defaults the Instruction date as current application server date. <b>Note</b> : This field can be edited by you. This is the requested execution date by the customer. Back dates are not allowed as instruction date. If instruction date is a Network holiday in PMDNWHOL, it is moved to next working day for Network.
Activation Date	Activation date is derived as Instruction Date – Debit Float days as maintained in Process cutoff maintenance. Holiday check is done for Activation date based on Branch holidays maintained.
Transfer Currency	System defaults the Transaction Currency as 'CNY' for CNAPS payments.
Transfer Amount	Specify the Transfer Amount.

# Table 3-10CNAPS Inbound Payments Transaction Input - Main Tab FieldDescription

Field	Description
Exchange Rate	Specify the Exchange Rate.
	If transfer currency & debtor account currency are different then Exchange rate can be provided by you. System retains the input value and validates the same against override and stop variances maintained at Network Preferences.
	Exchange Rate Validations:
	<ul> <li>If exchange rate is not a user input, system picks up exchange rate during 'Enrich' provided the transfer amount is less than small FX limit maintained. If exchange rate is not available, system throws error.</li> <li>Based on debit amount/transfer amount input, the other amount is computed by the system.</li> <li>If transfer amount is more than small FX limit and if external</li> </ul>
	exchange rate is applicable, then rate pick up happens during transaction processing.
Credit Value Date	System derives the credit value date as part of transaction processing on clicking Enrich button. This field is disabled.
Debit Value Date	System would derive the debit value date as part of transaction processing on clicking Enrich button. This field is disabled for user input.
Internal Remarks	Specify the internal remarks if any. <b>Note</b> : Accounts of other currencies can be used as debit account CNAPS. Multi-currency accounts also can be used as debit accounts.
Counterparty Details	
SSI Label	Select the SSI Label from the list of values. If the Creditor details are maintained in PHDSSIMT for the customer, the same can be selected in this field. Creditor details are populated based on the SSI label details.
	<b>Note</b> : It is optional to input SSI labels. Either you can directly input the beneficiary details or you can select the listed SSI label. If beneficiary details are defaulted from SSI label, it is disabled for further modification.
Account Number	Specify the Beneficiary account number here.
Account Name	Specify the Beneficiary account name here. This is an optional field
Address	Specify the Beneficiary Address here. This is an optional field.
Bank Code	Select the Bank code from the list of values. All open and authorized Bank Codes available in CNAPS directory are listed here, for the payment method chosen.
Bank Name	System defaults the Bank Name, based on the bank code selected.
Business Type	Select the Business Type from the list of values. This lists all the combinations of business type& related business category codes maintained in CNAPS Business Type Maintenance.
Description	System defaults the description based on the business type selected.
Business Category Code	Business Category Code is defaulted based on the business type selected.
Description	System defaults the description based on the business type selected.

### Figure 3-25 MIS Button

Table 3-14	MIS Button -	Field	Description
------------	--------------	-------	-------------

Field	Description
Transaction Reference	System displays the transaction reference number of the transaction.
MIS Group	You can select the MIS group code from the option list, or specify the code for the MIS group in the Source maintenance. The system displays all valid MIS groups for different sources in the MIS group list in the Source maintenance. When booking a transaction from this screen, the MIS group linked to the 'Manual' source is populated by default.
Default button	After selecting a MIS group different from the default MIS Group, click this button to populate any default MIS values and link them to the Transaction MIS and Composite MIS classes.
Transaction MIS	You can populate the default MIS values for Transaction MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.
Composite MIS	You can populate the default MIS values for Composite MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.

# 3.3.1.6 Accounting Details

1. Click the **Accounting Details** tab and view the accounting entries for the transaction initiated.

  - Sender Reference
  - Payment Method
  - Message Status
  - Sender Bank Code
  - Message Date
- 3. Once you specified the parameters, click the **Search** button.

System displays the records that match the search criteria.

## 3.4 CNAPS Credit Inbound Payments Processing

As part of the inbound payment transactions, following message types can be received:

SI.No.	Payment Method	Transfer Type
1	HVPS	Customer transfer
2	HVPS	Bank transfer
3	BEPS	Customer transfer
4	BEPS	Bank transfer

SI.No.	Payment Method	Transfer Type
5	BEPS-Realtime	Customer transfer
6	BEPS-Realtime	Bank transfer

Based on the message type received, the inbound upload tables are populated. On receipt of CNAPS message, system sends the acknowledgment for BEPS Regular/HVPS payment methods. Message Process Code are populated as:

- PR04-Accepted
- PR09 Rejected
- CNAPS Inbound Payment Validations
- Return of Inbound CNAPS Credit Transactions

## 3.4.1 CNAPS Inbound Payment Validations

Inbound payments follows the below listed processing steps:

- Debit Accounting
- Initial Validations
- Transaction block checks & beneficiary name match
- Duplicate Check
- Authorization Limit check
- Sanctions Check
- FX processing
- Pricing
- EAC Check
- Credit Accounting: Notification XML & IR XML generation
- Credit confirmation for BEPS -Real-time
- Debit Accounting
- Initial Validations
- Beneficiary Name Match
- Credit Accounting

## 3.4.1.1 Debit Accounting

Accounting code maintained for Debit Liquidation in CNAPS Network Preferences (Function ID: PHDNWPRF) for inbound transactions is fetched for posting debit accounting entries. The accounting entries are posted for the Transfer Amount of the transaction with value date as transaction value date received:

Event	Dr/ Cr	Account	Account Type	Amount Tag
DRLQ	Dr	Network Clearing GL	GL	Transfer Amount
DRLQ	Cr	Intermediary GL	GL	Transfer Amount

### Note:

There is no upfront posting of DRLQ if payment method is O-BEPS Real-time.

## 3.4.1.2 Initial Validations

- System does the below validations similar to the outbound payments:
  - Account/Bank re-direction IAccount re-direction is done for the credit account
  - Mandatory field checks/ Referential data checks
- Any failure during validation processing results in sending the transaction to Repair queue.

## 3.4.1.3 Beneficiary Name Match

- This is done similar to the existing functionality available for ACH transactions. System first checks whether the beneficiary name match is applicable for the payment type in CNAPS Network Preferences for inbound payments
- If it is applicable, the beneficiary name in the incoming payment message is matched with the customer name linked to beneficiary account number.
- If the names are not matching, system checks the names maintained for the account number in the Customer Name Matching Screen. Only authorized records with Approval status as 'Approved' are considered for matching. If any match is found, the transaction is processed furthers.
- If proper match is not found, the transaction is moved to Repair queue. You can edit the name, from the Repair Queue. On authorization, system does the name match again with the Customer Name linked to the account. If it is matching with the customer name, the transaction proceeds further, else the transaction remains in the repair queue.
- If the name match is successful after the repair, the name received in the inbound message is added as a new record with maintenance status as 'Learned' and approval status as "Not Approved" in Customer Name Match Maintenance.
- You can unlock the maintenance and modify the approval status as approved. On authorization of this modification, the new added name is considered for name matching for transaction received afterwards.

### Note:

Other processing steps are similar to outbound payments except for EAC where credit account details are sent to External DDA system.

## 3.4.1.4 Credit Accounting

Credit liquidation entries are posted at the end of transaction processing in the existing way. Accounting template for Credit Liquidation for inbound transactions are fetched for building the accounting entries:

Event	Dr/ Cr	Account	Account Type	Amount Tag
CRLQ	Dr	Intermediary GL	GL	Transfer Amount

Event	Dr/ Cr	Account	Account Type	Amount Tag
CRLQ	Cr	Customer Account	GL	Transfer Amount

- The process is applicable for the payment methods supported:
  - HVPS
  - BEPS

## 3.4.2 Return of Inbound CNAPS Credit Transactions

If the Originated transaction status is Exception, Invoke 'Cancel' action from the Exception Queue screen and provide the Return Code manually to initiate return processing.

 Click the Cancel action of Inbound transactions, if the original transaction is of Payment type 'CNAPS' and payment method 'H-HVPS' or 'BBEPS".

The screen **Inbound CNAPS Cancel or Return** (PQDCNPRQ) is opened from Exception queue screens

#### Inbound CNAPS Cancel or Return ::× Enter Ouerv Host Code Transaction Reference No Queue Reference Number Network Code Transfer Currency Error Code Transfer Amount Error Description Remarks \* Transaction Type Payment Method Queue Status Cancel by posting to Return GL Process Return Return Code Return Reference Return Reason Return Settlement Date Audit Exit Save

Figure 3-37 Inbound CNAPS Cancel or Return

- Select the Return Codes maintained in CNAPS Return Code Maintenance (PHDRTNCD) for the Network.
- Return Reason field is of length 60 & Remarks field is of length 256. This cancel or Return screen is applicable for cancellation of inbound CNAPS credit HVPS/BEPS transactions from the below queues:
  - Repair Queue
  - Business Override Queue
  - Authorization Limits Queue
  - Sanctions Queue
  - Exchange Rate Queue
  - External Price Queue
  - EAC Queue

### Note:

Return of liquidated inbound HVPS/BEPS are not considered in scope.

### Cancel & Post the inbound transaction to Return GL

- It is possible to cancel the inbound transaction by posting the same to Return GL is supported, if the flag 'Cancel by posting to Return GL' is checked in the Cancel screen.
- Return Reason code input is not allowed in this case.

Event	Dr/ Cr	Account	Accou nt Type	Amount Tag
CRLQ	Dr	Intermediary GL	GL	Transfer Amount
CRLQ	Cr	Customer Account	GL	Transfer Amount

- No return transaction processing & Dispatch are applicable in this case.
- If the flag 'Cancel by Posting to Return GL' is not checked, Return transaction gets processed.
- Return Processing

## 3.4.2.1 Return Processing

Return processing creates a Return transaction with a system generated Return Reference and the status of Return transaction is tracked during the processing. Activation date and settlement date for Return transaction is the processing date. Original transaction status is marked as 'Return Initiated'.

Manual returns from Exception Queues follows the below processing steps:

- Sanction Check
- Accounting
- Transaction Status Update
- Information reporting/Notification XML generation
- Population of Return Message details in Dispatch Table

### **Return Accounting:**

The following accounting is passed to reverse the debit accounting which is passed upfront during the original receipt transaction processing:

### Table 3-17 Return Accounting

Event	Dr/ Cr	Account	Account Type	Amount Tag
HRCR	Dr	Intermediary GL	GL	Return Amount
HRCR	Cr	Network Clearing GL	GL	Return Amount

### Note:

No pricing is applicable for Return transaction processing. The return amount is same as the Original transfer amount.

### **Transaction Status Update:**

On completion of the Return accounting, original transaction status is updated as 'Returned' and the return transaction status as 'Processed'.

### Information Reporting/Notification XML generation

System generates Information Reporting/Notification XML generation in the existing generic formats on completion of the Return transaction processing.

## 3.5 BEPS Real - Time Processing

 This section details the difference in processing of BEPA Real-time transactions compared to other payment methods:

### **Reject Processing**

- For BEPS inbound messages, queue processing is not applicable. In case of exceptions, reject message is generated based the error encountered. Reject code will be populated in the message based on the error code mapping in CNAPS Reject code maintenance.
- System checks the Network cutoff before the Reject message generation and the message generation is done only if the Network cutoff is not over.
- If cutoff is over, separate outbound transaction is initiated on the next working day with the reject details. This has to be manually controlled.

### **Credit Confirmation**

- On the outbound transaction once the credit confirmation message is received, the Transaction status is updated as 'Credit Confirmed'.
- On the inbound, once the credit liquidation is completed, system generates acknowledgment confirming the credit to the beneficiary. This message is generated only if Network cutoff is not over. The Acknowledgment status is updated as Confirmation Sent.
- For the credit confirmation sent, once ACK/ NACK received from CSM, the acknowledgment status is updated as 'Accepted' or 'Rejected'.

# 4 CNAPS Debit

- CNAPS Debit Outbound Payments
- CNAPS Debit Outbound Processing
- CNAPS Debit Inbound Payments
- CNAPS Debit Inbound Processing

## 4.1 CNAPS Debit Outbound Payments

CNAPS Debits is processed in the system with Payment Type as 'CNAPS Debit' (E) and Payment Method as BEPS-Debit (D).

ReST service is provided for initiating CNAPS Debit Outbound and Inbound transaction.

The key maintenances are as follows:

- Debit Network Preferences
- CNAPS Debit Outbound Transactions Input
- CNAPS Debit Outbound Transaction View

## 4.1.1 Debit Network Preferences

The CNAPS Network Preferences screen allows users to manually create a CNAPS Inbound Payment by providing the details.

1. On Homepage, specify **PEDNWPRF** in the text box, and click next arrow.

Debit Network Preferences screen is displayed.

	Network Description	Q	Network Code *

Figure 4-1 Debit Network Preferences

2. Click New button on the Application toolbar.

3. On **Debit Network Preferences** screen, specify the fields.

For more information on fields, refer to the field description below:

Table 4-1	<b>Debit Network Preferences</b>	- Field Description
-----------	----------------------------------	---------------------

Field	Description
Network Code	Select the Network Code from the list of values. All networks of payment type CNAPS are listed based on Network Code maintenance.
Network Description	System defaults the Network Description based on the network selected.
Network Type Description	System defaults the Network Type Description based on the network selected.
Host Code	System displays the Host Code of selected branch of the logged in user on clicking 'New' button.
Host Code Description	System defaults the description of the Host Code.
Transfer Currency	Transfer currency is defaulted from the Network Currency restriction data store.
Payment Method	Select the payment type from the following: BEPS - Debit
Outbound	The following fields are available as part of Outbound preferences for the network and payment method combination:
Payment Preferences	
Minimum Amount	Specify the Minimum amount allowed for the network. This is an optional field.
Maximum Amount	Specify the Maximum amount allowed for the network. This is an optional field.
Price Code Details	
Transaction Price Code	Select the Pricing Code specific to Customer Transfer from the list of values. All the valid pricing codes maintained in the PPDCDMNT screen are listed.
Bank Transfer	Select the pricing code specific to Bank Transfer from the list of values. All the valid pricing codes maintained in the PPDCDMNT screen are listed.
Accounting Codes	
Suspense Accounting	Specify the Suspense Accounting from the list of values. This is an optional maintenance. If this accounting code is maintained, system posts the Suspense accounting for Outbound CNAPS Debits sent.
Debit Liquidation	Select the Debit liquidation code from the list of values. This is a mandatory field. Accounting codes maintained in Accounting Template maintenance (PMDACCTL) with transaction type as Debit are listed here.
Credit Liquidation	Select the Credit liquidation code from the list of values. This is a mandatory field. Accounting codes maintained in Accounting Template maintenance (PMDACCTL) with transaction type as Credit are listed here.
Network Account Details	

Field	Description
Network Account	Select the valid Network Account from the list of values. All valid Nostro accounts of currency CNY are listed in this field. it is not a mandatory field. <b>Note</b> : If Clearing GL is maintained in accounting template for credit leg (Offset Account) then system fetches the clearing GL as a Network Account otherwise. System fetches the Network account maintained in this field as credit account.

Table 4-1 (Cont.) Debit Network Preferences - Field Description

Table 4-3	<b>CNAPS Debit Outbound Transactions Input - Field Description</b>
Table 4-3	<b>CNAPS Debit Outbound Transactions Input - Field Descriptio</b>

Field	Description
Network Code	Specify the Network Code. The list of values have all the valid CNAPS Debit networks maintained in PMDNWCOD, provided Network preferences are maintained in CNAPS Debit Network Preferences PEDNWPRF. If only one record is defined, that Network is defaulted on 'New' operation itself.
Payment Method	Select the payment type from the following: BEPS - Debit
Source Code	Specify the Source Code from the list of values.
Source Reference Number	Specify the External System Reference in this field. This is optional for manually input transaction and is mandatory transactions received from Channels.
Transaction Reference Number	This is a unique identifier of the CNAPS payment transaction and auto-generated by the system based on the common transaction reference generation logic. The same reference is used as Message ID in for the Outbound Dispatch record.
End to End Identification	Specify the End to End ID. It enables input of End to End ID provided by the originating customer (credit account owner). End to End ID if not provided by the customer is populated as the transaction reference on save.
Transaction Branch	Transaction Branch is auto populated by the system.
Host Code	Host Code linked to the Transaction Branch is defaulted Branch Core parameters (STDCRBRN).

- 2. There may be one or more applicable Charge and Tax components as defined in the Pricing Code maintenance. The fixed amount or rate is fetched from Pricing Value Maintenance screen (PPDVLMNT) for each Charge and/or Tax component, as applicable for the Payment Source code & Customer Service model.
- 3. On **Pricing** screen, the computed charges, and taxes if applicable, are populated for each charge component in the following fields.

For more information on fields, refer to the field description below:

Field	Description
Pricing Component	System defaults the pricing component based on the Pricing code linked in Network Currency Preferences.
Pricing Currency	System defaults the pricing currency of the component from the Pricing code maintenance.

Field	Description
Pricing Amount	System defaults the pricing amount from Pricing Value Maintenance screen (PPDVLMNT) as applicable for the payment value date, Payment Source code and Debit Customer Service Model. However you can modify this value.
	Note: Currency conversions related to charge computation are completed and final amount is populated component wise in the Pricing Tab.
Waiver	System defaults the waiver. However you can modify this value.
	<ul> <li>If charge/tax is already waived at price value maintenances, then you cannot uncheck the waiver flag. This component is still displayed with the value and the waiver flag checked.</li> <li>If a particular Charge component is waived, then system automatically checks the waiver of the associated Tax component.</li> </ul>
Debit Currency	System displays the customer debit currency for charge/tax.
Debit Amount	System displays the amount debited to the selected debit account.

Field Value	System displays the default value, where exists for the UDF fields. You can change the default value or specify value for other fields (where default value does not exist).

## 4.1.2.5 MIS Button

- **1.** You can maintain the MIS information for the Transaction. If the MIS details are not entered for the Transaction the same is defaulted from the product maintenance.
- 2. Click the **MIS** button to invoke the 'MIS' sub-screen.
- 3. On **MIS Button**, specify the fields.

Transaction Reference Number *	MIS Group	(	Q	
		Default		
Transaction MIS		Composite MIS		
Q			Q	
Q			Q	
Q			Q	
Q			Q	
Q			Q	
Q			٩	
Q			Q	
Q			Q	

#### Figure 4-9 MIS Button

Table 4-7	MIS Button - Field Description
-----------	--------------------------------

Field	Description
Transaction Reference	System displays the transaction reference number of the transaction.
MIS Group	You can select the MIS group code from the option list, or specify the code for the MIS group in the Source maintenance. The system displays all valid MIS groups for different sources in the MIS group list in the Source maintenance. When booking a transaction from this screen, the MIS group linked to the 'Manual' source is populated by default.
Default button	After selecting a MIS group different from the default MIS Group, click this button to populate any default MIS values and link them to the Transaction MIS and Composite MIS classes.
Transaction MIS	You can populate the default MIS values for Transaction MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.
Composite MIS	You can populate the default MIS values for Composite MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.

# 4.1.2.6 CNAPS Debit Outbound Transactions Input Summary

1. On Homepage, specify **PESODONL** in the text box, and click next arrow.

CNAPS Debit Outbound Transactions Input Summary screen is displayed.

 Double click a record or click the **Details** button after selecting a record to view the detailed screen.

# 4.2 CNAPS Debit Outbound Processing

- CNAPS Debit Outbound Transaction Processing
- CNAPS Debit Outbound Acknowledgment Processing
- CNAPS Debit Outbound Transaction Response Processing
- Processing Accept of Reject Response
- Processing Re-initiation

# 4.2.1 CNAPS Debit Outbound Transaction Processing

Outbound payments follows the below listed processing steps:

Based on the message type received, the inbound upload tables are populated. On receipt of CNAPS message, system sends the acknowledgment for BEPS Regular/HVPS payment methods. Message Process Code are populated as:

- Initial Validations
- Duplicate Check
- Process cutoff
- Sanctions Check
- Future Value Check
- FX Processing
- Pricing
- EAC Check
- Accounting ;Generation of generic Notification XML / IR XML
- Dispatch details population
- Acknowledgment handling

#### **Initial Validations**

The following processing is covered as part of initial validations:

- Data enrichment Account / Bank Re-direction
- Mandatory field validations
- Network Limit validations Minimum and maximum amount allowed, if maintained in CNAPS Network Preferences for the payment method, transaction type and currency (CNY).
- Validation for fields disallowed for Chinese characters -As listed in the field mapping sheet

#### **Duplicate Check**

Duplicate parameters can be maintained for the source. Based on the duplicate days and fields set, duplicate check for the transaction is done. If the transaction is identified as a duplicate transaction, the transaction is moved to Business Override queue.

The following parameters are available for duplicate check:

- Debtor Account DBTR\_ACC
- Creditor Account CRDTR\_ACC
- Transfer Amount FR\_AMT
- Instruction Date VALUE\_DATE
- Creditor Bank Routing Number CRDTR\_BANK\_CODE
- Customer CUSTOMER\_NO
- Debtor Bank Routing Number DBTR\_BANK\_CODE

#### **Process Cutoff**

Cutoff time can be maintained for a Network/Source/Transaction Type/Customer Service Model/Customer in Process cutoff maintenance screen PMDCTOFF (optional).

#### **Sanction Check**

The transaction can be sent for sanction screening to an external system if sanctions screening is enabled for the source and network in Source Network Preferences PMDSORNW and is applicable for the customer.

#### **FX Processing**

Auto rate pick up is done only if the transfer amount is within the small FX limit as maintained in CNAPS Network Common Preferences. Transfer amount is converted to limit currency maintained using mid-rate of FX rate type linked and small FX limit check is done.

If the transfer amount is above the small FX limit specified, system checks whether External Exchange Rate is applicable in Network common Preferences. If external system is available the transaction details, then system send exchange rate request to external system for receiving the exchange rate along with FX Reference Number. Based on the response received, exchange rate is populated and further processing of transaction continues.

If Small FX limit is not maintained auto rate pick up is done for all cross currency payment transactions without any limit check.

Payment is moved to Exchange Rate Exception queue in the following cases with proper error code details:

- Exchange Rate derivation based on core system maintenance fails
- Small FX limit is breached and no external exchange rate system maintenance is available
- Response from Exchange Rate system is rejected

#### Note:

For transactions received from UI input with exchange rate no processing on exchange rate is done again.

#### **Charge /Tax Computation**

Internal /External charge/tax values are applied based on the host preference maintained for External Price system.

#### External Account Check with DDA (CASA) System

If EAC check is approved, the transaction is resumed with the further processing. If the status is rejected or interim, the transaction is moved to EAC queue.

#### **Network Cutoff Check**

The payment processing proceeds to accounting only if Network cutoff is not over for the payment method. If Network cutoff is over, payment is moved to Network Cutoff Queue.

#### Accounting

If Suspense Accounting template is maintained in Network preferences PEDNCPRF, the following accounting entries are posted:

Event	Dr/ Cr	Account	Account Type	Amount Tag
INIT	Dr	Suspense GL1	GL	Transfer Amount
INIT	Cr	Suspense GL2	Account	Transfer Amount

Once the accounting entries are handed off system generates the Notification XML (if notification is applicable for the source as maintained in PMDSORCE) and Information Reporting XML in the generic format as done for other payment types.

The message details are inserted into dispatch tables for CNAPS Debit. Message generation is done at the custom layer in the required format.

# 4.2.2 CNAPS Debit Outbound Acknowledgment Processing

Acknowledgments are received in the JMS In Queue and the message status are updated for the transaction.

# 4.2.3 CNAPS Debit Outbound Transaction Response Processing

The Debtor Bank can either accept or reject the Debit request. An input screen (Function ID: PEDDRRES) and the related ReST service is provided for processing the CNAPS Debit response.

The Response screen can be opened from the CNAPS Debit outbound View Summary screen (PESODVEW).

If the Debit is accepted, the system passes the credit accounting entries to customer account. The Suspense entries passed originally passed are reversed.

Event	Dr/Cr	Account	Account Type	Amount Tag
RINT	Dr	Suspense GL2	GL	Transfer Amount
RINT	Cr	Suspense GL1	Account	Transfer Amount
EODR	Dr	Nostro/Network Clearing GL	GL	Transfer Amount
EODR	Cr	Intermediary GL	GL	Transfer Amount
EODR	Dr	Intermediary GL	GL	Transfer Amount
EODR	Cr	Customer Account	Account	Transfer Amount converted in account ccy

If the Debit is rejected, the original debit transaction status is updated as 'Reject Received'. A reject transaction is created and it is moved to CNAPS Reject Queue. You can Accept or Reinitiate the from the Reject queue.

# 4.2.4 Processing Accept of Reject Response

You can initiate 'Accept' for all records of Reject Type 'Reject of Debit' and Reject status 'Unprocessed'. On initiating 'Accept' action, the following screen is opened:

Only Remarks field is enabled in this screen for the user to input the remarks. The remarks entered are available in the Queue action log Remarks column. 'Accept' action requires authorization.

On authorization, The following processing is done for the return transaction:

- Accounting
- Transaction Status Update
- Information reporting/Notification XML generation

#### Accounting

The Accounting entries are posted as below reversing the entries posted for the original transaction in INIT event. If INIT Accounting entries are not posted for the original transaction, no reversal entries are posted.

Event	Dr/Cr	Account	Account Type	Amount Tag
RINT	Dr	Suspense GL2	GL	Transfer Amount
RINT	Cr	Intermediary GL	GL	Transfer Amount
RINT	Dr	Intermediary GL	GL	Transfer Amount
RINT	Cr	Suspense GL1	Account	Transfer Amount

On completion of the processing Reject record status is marked as 'Processed' and the linked transaction status is updated as Rejected.

# 4.2.5 Processing Re-initiation

On initiating Re-initiate action, a new Debit transaction is created with the original transaction details.

You can edit the data for the following fields only:

- All additional details fields
- Business type and Business Category type
- Customer Name and Address
- Counterparty Name and Address

On Authorization of the new transaction, the accounting entries are posted as below reversing the entries posted for the original transaction in INIT event. If INIT accounting entries are not posted for the original transaction, no reversal entries are posted.

Event	Dr/Cr	Account	Account Type	Amount Tag
RINT	Dr	Suspense GL2	GL	Transfer Amount
RINT	Cr	Intermediary GL	GL	Transfer Amount
RINT	Dr	Intermediary GL	GL	Transfer Amount
RINT	Cr	Suspense GL1	Account	Transfer Amount

For the new transaction Re-initiated flag is check and processed from initial validation.

# 4.3 CNAPS Debit Inbound Payments

- CNAPS Debit Agreement Maintenance
- CNAPS Debit Inbound Transactions Input
- CNAPS Inbound Transaction View

# 4.3.1 CNAPS Debit Agreement Maintenance

Debit Agreement is validated for Inbound CNAPS Debit transactions if Agreement validation is enabled in CNAPS Debit Network Preferences (PEDNWPRF).

1. On Homepage, specify PEDDBTAG in the text box, and click next arrow.

CNAPS Debit Agreement Maintenance screen is displayed.

For more information on fields, refer to the field description below:

Table 4-9 CNAPS Debit Inbound Transactions Input - Field Description

Field	Description
Transaction Branch	Transaction Branch is auto populated by the system.
Network Code	Specify the Network Code. The list of values have all the valid CNAPS Debit networks maintained in PMDNWCOD, provided Network preferences are maintained in CNAPS Debit Network Preferences PEDNWPRF. If only one record is defined, that Network is defaulted on 'New' operation itself.
Payment Method	This field is defaulted as BEPS Debit when the Network is selected from the list of values.
Source Code	Specify the Source Code from the list of values.
Source Reference	You can specify the External System Reference in this field. This is optional for manually input transaction and is mandatory transactions received from Channels.
Host Code	Host Code linked to the Transaction Branch is defaulted Branch Core parameters (STDCRBRN).
Transaction Reference Number	This is a unique identifier of the CNAPS payment transaction and auto-generated by the system based on the common transaction reference generation logic. The same reference is used as Message ID in for the Outbound Dispatch record.
Sender's Reference	Specify the Sender's Reference.

Field	Description
End to End Identification	Specify the End to End ID. It enables input of End to End ID provided by the originating customer (credit account owner). End to End ID if not provided by the customer is populated as the transaction reference on save.

2. On **CNAPS Debit Inbound Transactions Input** sub-screen, specify the fields. For more information on fields, refer to the field description below:

Table 4-10	CNAPS Debit Inbound	<b>Transactions Input</b> -	<ul> <li>Main Tab Field Description</li> </ul>
------------	---------------------	-----------------------------	--

Field	Description
Customer (Debtor) Details	
Debit Account Number	Specify the Account Number. All open and authorized accounts maintained in the External Customer Account maintenance (STDCRACC) for the Host are listed for this field.
Account Currency	System defaults the currency based on the Debit Account number selected.
Account Branch	System defaults the branch based on the Debit Account number selected.
Name	The Name is defaulted from External account maintenance STDCRACC.

Field	Description
Address	The Address field is auto populated with customer account address, if available, after concatenating multiple lines with a space in between. If no customer address is available in STDCRACC, the address is defaulted from External Customer maintenance (Function ID STDCIFCR. You can still modify the defaulted address.
Amount	Specify the Amount.
Customer Number	Specify the Customer Number. The Customer linked to the debtor account, if any, is populated in this field.
Customer Service Model	Specify the Customer Service Model. Service Model linked to the customer, if any, is populated in this field.
Counterpart (Creditor) Details	
Agreement Identification	Specify the Agreement Identification of the Debtor.
Account Number	Specify the Account Number.
Account Name	Specify the Beneficiary Name.
Address	Specify the Beneficiary Address.
Bank Code	Specify the Bank Code from the list of values. All open and authorized Bank Codes available in CNAPS directory with payment method 'BEPS' are listed in this field.
Bank Name	Bank name gets defaulted on the Bank Code selected.
Debit Details	
Booking Date	This date indicates the booking date of payment initiation. Booking date is defaulted as current date.
Instruction Date	This field is defaulted to current application server date. You can still modify the date. This is the requested execution date by the customer. Back dates are not allowed as instruction date. If instruction date is a Network holiday, it is moved to next working day for Network.
Activation Date	Specify the Activation Date. System derives the activation date, if not provided.
Transfer Currency	Transfer Currency is populated as 'CNY'.
Transfer Amount	Specify the Transfer Amount.
FX Reference Number	Specify the FX Reference Number.
Exchange Rate	If Transfer currency & Creditor account currency are different then you can specify the Exchange rate. System retains the input value and validates the same against override and stop variances maintained at Network Preferences.
	If exchange rate is not a user input, system picks up exchange rate during 'Enrich' provided the transfer amount is less than small FX limit maintained in CNAPS common preferences (Function ID PHDCNPRF). If exchange rate is not available, system throws error.
	Based on credit amount/transfer amount input, the other amount is computed by the system.
	If transfer amount is more than small FX limit and if external exchange rate is applicable, then rate pick up happens during transaction processing.

Field	Description
Credit Value Date	System derives the Credit Value Date as part of transaction processing on clicking Enrich button. This field is disabled.
Debit Value Date	System derives the Debit Value Date as part of transaction processing on clicking Enrich button. This field is disabled.
Internal Remarks	Specify the internal remarks, if any.
Business Type	Specify the Business Type from the list of values. Business type field lists the combinations of business type& related business category codes maintained in CNAPS Business Type Maintenance.
Description	This field is defaulted based on the list of value selection in Business Type field.
Business Category Code	This field is defaulted based on the list of value selection in Business Type field.
Description	This field is defaulted based on the list of value selection in Business Type field.
Enrich	Click Enrich upon providing the details.

# 4.3.2.2 Payment Details Tab

The Payment Details tab allows users to specify any Payment details.

- 2. On CNAPS Debit Inbound Transaction Input\_Payment Details tab, specify the Bill/ Cheque Details (Business Type B308 B309 B310 B311) by entering the following details:
  - Issue Date
  - Pay Date
  - Number
  - Payment Password
  - Purpose
  - Number of Endorsers
  - Endorser Names
  - Image Type
  - Image Front Name

- Image Back Name
- 3. Specify the Additional Details (Business Type B308 B309 B310 B311) by entering the following details:
  - Bill Currency
  - Bill Amount
  - Maturity Date
  - Seal
  - Acceptance Agreement Number
  - Acceptance Date
  - Acceptance Name
  - Applicant Name
  - Applicant Amount
  - Drawer Name
  - Transaction Contract Number

## 4.3.2.3 Pricing Tab

You can view the pricing details populated by system in this screen on clicking Enrich.

1. Click the **Pricing** tab and view the pricing details.

#### Figure 4-22 Pricing

Pricing Component 0       Pricing Currency 0       Pricing Amount 0       Waiver 0       Debit Amount 0       Debit Currency 0         ico data to display.       age       1 (0 of 0 items) (< (1 > )       > <td< th=""><th>8</th></td<>	8
o data to display. ge 1 (0 of 0 items)  < < 1 > >	
te 1 (0 of 0 items)   < < 1 → >)	

- 2. There may be one or more applicable Charge and Tax components as defined in the Pricing Code maintenance. The fixed amount or rate is fetched from Pricing Value Maintenance screen (PPDVLMNT) for each Charge and/or Tax component, as applicable for the Payment Source code & Customer Service model.
- 3. On **Pricing** screen, the computed charges, and taxes if applicable, are populated for each charge component in the following fields.

For more information on fields, refer to the field description below:

#### Table 4-11 Pricing

Field	Description
Pricing Component	System defaults the pricing component based on the Pricing code linked in Network Currency Preferences.
Pricing Currency	System defaults the pricing currency of the component from the Pricing code maintenance.

Field	Description
Pricing Amount	System defaults the pricing amount from Pricing Value Maintenance screen (PPDVLMNT) as applicable for the payment value date, Payment Source code and Debit Customer Service Model. However you can modify this value.
	Note: Currency conversions related to charge computation are completed and final amount is populated component wise in the Pricing Tab.
Waiver	System defaults the waiver. However you can modify this value.
	<ul> <li>If charge/tax is already waived at price value maintenances, then you cannot uncheck the waiver flag. This component is still displayed with the value and the waiver flag checked.</li> <li>If a particular Charge component is waived, then system automatically checks the waiver of the associated Tax component.</li> </ul>
Debit Currency	System displays the customer debit currency for charge/tax.
Debit Amount	System displays the amount debited to the selected debit account.

Table 4-11 (Cont.) Pricing

## 4.3.2.4 UDF Button

- **1.** This sub-screen defaults values of UDF fields that are part of the UDF group specified for the 'Manual' source.
- 2. Click the **UDF button** to invoke the 'UDF' sub-screen.
- 3. On **UDF Button**, specify the fields.

		8=
Field Label * 0	Field Value 🗢	
No data to display.

Q			Q	

#### Figure 4-24 MIS Button

Table 4-13	<b>MIS Button - Field</b>	Description
------------	---------------------------	-------------

Field	Description				
Transaction Reference	System displays the transaction reference number of the transaction				
MIS Group	You can select the MIS group code from the option list, or specify the code for the MIS group in the Source maintenance. The system displays all valid MIS groups for different sources in the MIS group list in the Source maintenance. When booking a transaction from this screen, the MIS group linked to the 'Manual' source is populated by default.				
Default button	After selecting a MIS group different from the default MIS Group, click this button to populate any default MIS values and link them to the Transaction MIS and Composite MIS classes.				
Transaction MIS	You can populate the default MIS values for Transaction MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.				
Composite MIS	You can populate the default MIS values for Composite MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.				

# 4.3.2.6 Accounting Details

1. Click the **Accounting Details** tab and view the accounting entries for the transaction initiated.

System displays the records that match the search criteria.

4. Double click a record or click the **Details** button after selecting a record to view the detailed screen.

# 4.4 CNAPS Debit Inbound Processing

- CNAPS Debit Inbound Transaction Processing
- Inbound CNAPS Debit Response Processing

# 4.4.1 CNAPS Debit Inbound Transaction Processing

Inbound Payments follows the listed processing steps:

- Initial Validations
- Debit Agreement Validation
- Duplicate Check
- Sanctions Check
- FX Processing
- Pricing
- ECA Check
- Accounting; Notification XML & IR XML generation
- Sending Accept Response (or reject response in case of exceptions)

#### **Initial Validations**

System performs the below validations similar to the Outbound Payments:

- Account/Bank re-direction 'Account re-direction is done for the credit account
- Mandatory field checks/ Referential data checks

Any failure during validation in Inbound Debit processing results in sending the Reject response to the Creditor Bank.

#### **Debit Agreement Validations**

The following validations related to Debit Agreements are done before further processing the Inward Request for Debit.

System validates the Debit Agreement validation if the same is enabled for Network in Network preferences for the Inbound transaction for the payment method. The system fetches the customer agreement maintenance for the Debit Account, Transfer Currency and Agreement Number received in the Debit Request. The records maintained for the specific Agreement Number are fetched on priority. If no record is maintained for specific Agreement Number, the record maintained with Agreement Number 'ALL' is considered. If no Agreement is found the Debit transaction is moved to Business override Queue. The following error message is displayed for the record:

Error Code	Error Code Description
PE_DI_01	Debit Agreement is not maintained for the Account/ Currency

After fetching the record, system matches of the transaction details received with the Agreement maintained. The validation is done if the filed details is maintained in the Debit Agreement.

- Creditor Account Number
- Credit Name
- Creditor Bank Account
- Business Type
- Business Category Type

If the field value is not maintained in the Debit Agreement, the validation is skipped. If the field matching fails, the Debit transaction is moved to Business Override Queue following Error code is:

Error Code	Error Code Description
PE_DA_01	\$1 field value is not matched with Debit Agreement maintained

If the Debit Agreement validation is successful, the system proceeds with Duplicate Check, Sanctions Screening, FX processing, Pricing External Credit Approval & Accounting.

The following accounting entries are passed Debiting the Customer Account:

Event	Dr/Cr	Account	Account Type	Amount Tag
EIDR	Dr	Customer Account	Account	Transfer Amount
EIDR	Cr	Intermediary GL	GL	Transfer Amount
EICR	Dr	Intermediary GL	GL	Transfer Amount
EICR	Cr	Nostro/Network Clearing GL	GL	Transfer Amount

## 4.4.2 Inbound CNAPS Debit Response Processing

After accounting handoff, the system generates the Acceptance message XML and post the same in the JMS Queue.

# 5 Non-STP Queue

Non-STP Queue Support

# 5.1 Non-STP Queue Support

You can process the following CNAPS Credit transactions as non-STP transactions:

- Outbound CNAPS Credit transactions received through SPS service.
- Inbound CNAPS Credit transaction received through ReST service or received as a SWIFT pass through transaction.

Non-STP Queue support is extended for the following CNAPS credit transactions:

- Outbound transactions received through SPS service
- Inbound transactions received through ReST service
- Inbound transactions received as a SWIFT pass through transaction
- Processing

## 5.1.1 Processing

- CNAPS Credit Outbound transactions-SPS Processing
- CNAPS Credit Inbound transactions received as SWIFT pass through OR through ReST service
- Inbound/Outbound Transaction Processing-Additional Restrictions

## 5.1.1.1 CNAPS Credit Outbound transactions-SPS Processing

After receiving the transaction via Service request or manually booking the transaction using SPS OUT screen transaction is moved to Non STP Queue (PQSNSTPQ) screen in case if transaction satisfies the criteria maintained in the Non STP Rule Detailed (PMDNSRLE) screen.

SPS channel data related to the transaction is populated in the branch table instead of the host table.

The transaction data is populated in the branch table as version 1 with authorization status as Authorized.

# 5.1.1.2 CNAPS Credit Inbound transactions received as SWIFT pass through OR through ReST service

After receiving the incoming SWIFT transaction via EMS, the transaction is moved to Non STP Queue (PQSNSTPQ) screen in case if transaction satisfies the criteria maintained in the Non STP Rule Detailed (PMDNSRLE) screen.

The data related to the transaction is populated in the branch table instead of the host table.

The transaction data is populated in the branch table as version 1 with authorization status as Authorized.

# 5.1.1.3 Inbound/Outbound Transaction Processing-Additional Restrictions

New transaction record gets created in Outbound/Inbound Common Transaction View (PMSOTNVW/PMSITNVW) underlying tables for unauthorized transactions.

Unlock action is not allowed in Transaction Input screen for uploaded transactions.

Restriction is added while 'Amend Non-Critical Fields' from Outbound/Inbound Common Transaction View (PMSOTNVW/PMSITNVW) for NONSTP/Unauthorized transactions.

For more information on Queues, you can refer Exception Queue User Manual.

# 6 MAIL Advice

#### MAIL Advice Generation

# 6.1 MAIL Advice Generation

Advice generation is part of the transaction processing after the accounting step. This is applicable for all customer types. The customer/Advice format pick up is same as the existing support for other payment types:

Customer Advice Preference is verified for the customer & message type. If maintenance is available, Media maintained for the customer account & Network is fetched. If no record is available for the account & Network, the default media maintained for the message type is used for generating advices.

The default Format ID is fetched from Default format maintenance. If Format ID is maintained for the Network and the source, that is considered. If source level maintenance is not available default format for the Network is considered. If Network level maintenance is not available, default Format ID for the media and message type is used.

The Advice is generated in the format maintained for the Format ID and Language combination. Customer's language as maintained in External customer maintenance is considered for this.

Generate Debit and Credit advices for each leg of Debit and Credit accounting entry posted considering the netting flag. If the netting of charges/tax is done- a single Debit/Credit advice can be generated showing all the details of the component wise amount, exchange rate and debit amount if the corresponding advice tags are maintained.

- Advice Tag Mapping
- Return Credit Advice Generation

# 6.1.1 Advice Tag Mapping

The following Advice tags are supported for CNAPS transactions:

Advice Tag Name	Debit/Credit Advice	Payment type /Field mapping
_CUSTOMER_	Debit Advice	Debit Customer for Outbound Cross-border
	Credit Advice	Credit Customer for Inbound Cross-border
_CUSTOMERNAME_	Both	Name of the customer fetched
_ADDRESS1_ to _ADDRESS4_	Both	Address lines 1 to for as in STDCIDCR
_TRNREF_	Both	Transaction Reference
_USERREF _	Both	User Reference
_SOURCEREF_	Both	Source Reference

Advice Tag Name	Debit/Credit Advice	Payment type /Field mapping
_RELATEDREF_	Both	Cross border Outbound/Inbound - Related Reference
_PAYERACCOUNT_	Debit Advice	Cross-border Outbound
	Credit Advice	Cross-border Inbound -Originator Account (Field 50 Account line)
_PAYERACCOUNTCCY_	Debit Advice	Account currency of payer account
_PAYERNAME_	Debit Advice	Cross-border Outbound
	Credit Advice	Cross-border Inbound -Originator Name (Field 50 Address line 1)
_PAYEEACCOUNT_	Credit Advice	Cross-border Inbound -Customer Credit Account
_PAYEEACCOUNTCCY_	Credit Advice	Cross-border Inbound -Customer Credit Account
_PAYEENAME_	Credit Advice	Cross-border Inbound -Customer Credit Account Description
_TRANSFERAMOUNT_	Both	Cross-border -Transfer Amount
_TRANSFERCCY_	Both	Cross-border -Transfer Currency
_DEBITAMOUNT_	Debit Advice	Cross-border Outbound
_CREDITAMOUNT_	Credit Advice	Cross-border Inbound
_VALUEDATE_	Both	Instruction Date
_BOOKDATE_	Both	Booking Date
_ACTIVATIONDATE_	Both	Activation Date
_NETWORKNAME_	Both	Network
_SOURCECODE_	Both	Source Code
_PRICECOMPNAME_	Both	Price Component Description. (Provision to loop for all price components linked)
_PRICECOMPCCY_	Both	Price Component Currency
_PRICECOMPAMT_	Both	Price Component Amount
_PRICEDEBITCCY_	Both	Same as CHARGEACCOUNTCCY
_PRICEDEBITAMT_	Both	Price Component debit amount
_CHARGEACC_	Both	Price Component debit account
CHARGEACCOUNTCCY_	Both	Charge account currency
_REMITTANCEINFO_	Both	Cross-border -Remittance information
_FXRATE_	Both	Exchange Rate
_FXREF_	Both	FX Reference
_BATCHID_	Debit Advice	Batch ID if received in bulk file
_FILEREF_	Debit Advice	File Reference if received in bulk file
_UDFVAL1_ to UDFVAL10_	Both	UDF values
_BANKNAME	Both	Bank Name from STDCRBNK
_BRANCHNAME_	Both	Branch Name from STDCRBRN
_PAYMENTDETAILS1_	Both	Payment Details line 1
_PAYMENTDETAILS2_	Both	Payment Details line 2
_PAYMENTDETAILS3_	Both	Payment Details line 3
_PAYMENTDETAILS4_	Both	Payment Details line 4

Advice Tag Name	Debit/Credit Advice	Payment type /Field mapping
_ORDERINGCUSTOMER1_	Credit Advice	Ordering Customer Line1–Party Identifier
_ORDERINGCUSTOMER2_	Credit Advice	Ordering Customer Line 2 - BIC / Name and Address 1
_ORDERINGCUSTOMER3_	Credit Advice	Ordering Customer Line3 – Address Line 2
_ORDERINGCUSTOMER4_	Credit Advice	Ordering Customer Line3 – Address Line 3
_ORDERINGCUSTOMER5_	Credit Advice	Ordering Customer Line3 – Address Line 4
_ORDERINGINSTACC_	Credit Advice	Ordering Institution Line 1 - Party Identifier
_ORDERINGINSTITUTION2_	Credit Advice	Ordering Institution Line 2 - BIC / Name and Address 1
_ORDERINGINSTITUTION3_	Credit Advice	Ordering Institution Line 3 - Address Line 2
_ORDERINGINSTITUTION4_	Credit Advice	Ordering Institution Line 3 - Address Line 3
_ORDERINGINSTITUTION5_	Credit Advice	Ordering Institution Line 3 - Address Line 4
_ORDERINGINSTBICNAME_	Credit Advice	If Ordering Institution Line 2 is a BIC ,Bank name from ISDBICDE
_AWIACCOUNT_	Debit Advice	Account With Institution Line 1- Account
_AWIID_	Debit Advice	Account With Institution Line 1 - Party Identifier
_AWIBIC_	Debit Advice	Account With Institution Line 2 - BIC / Name and Address 1
_AWINAME_	Debit Advice	Bank Name as available from ISDBICDE
_AWIADDRESS1_	Debit Advice	Account With Institution Line 3 - Address Line2
_AWIADDRESS2_	Debit Advice	Account With Institution Line 3 - Address Line 3
_AWIADDRESS3_	Debit Advice	Account With Institution Line 3 - Address Line 4
_BENEFICIARY1_	Debit Advice	Beneficiary Line1 - Party Identifier
_BENEFICIARY2_	Debit Advice	Beneficiary Line1 - BIC / Name and Address 1
_BENEFICIARY3_	Debit Advice	Beneficiary Line1 - Address Line2
_BENEFICIARY4_	Debit Advice	Beneficiary Line1 - Address Line3
_BENEFICIARY5_	Debit Advice	Beneficiary Line1 - Address Line4

# 6.1.2 Return Credit Advice Generation

The system supports generation of Mail advice when the return of outbound transaction is processed (Original transaction Type -O, Return transaction type -S)

A Message Type 'Return Credit Advice' is added in the following screens:

Default Format ID maintenance Function ID: PMDDFFMT

Customer Advice Preferences Function ID: PMDCSADV

This message is generated when the Return of outbound CNAPS transaction is successfully processed.

All message tags applicable for the Debit advice (Outbound transaction) are applicable for the Return transaction as well. The message tags derives the corresponding values from the Original outbound transaction of the Return transaction.

Additional message tags are provided for

- RETURN\_REF Return Reference generated by the system
- RETURN\_DATE Return Booking Date
- RETURN \_CR\_AMT Return Amount credited to customer account
