## Preface

- [Purpose](#)
- [Audience](#)  
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)  
This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

### 1.1 Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service **Export Documentary Collection Booking** process.

### 1.2 Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

### 1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

- [Access to Oracle Support](#)

#### 1.3.1 Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## 1.4 Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

## 1.5 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## 1.6 Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

## 1.7 Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## 1.8 Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

## 1.9 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

## 1.10 Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

**Table 1-1 Acronyms and Abbreviations**

Abbreviation	Description
OBTFFPM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

## 1.11 Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

**Table 1-2 Common Action Buttons and its Definitions**

Action Buttons	Description
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>

Table 1-2 (Cont.) Common Action Buttons and its Definitions

Action Buttons	Description
<b>Refer</b>	Select a Refer Reason from the values displayed by the system.  Refer Codes are: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Hold</b>	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.  This option is used, if there are any pending information yet to be received from applicant.
<b>Cancel</b>	Click <b>Cancel</b> to cancel the transaction input midway without saving any data.
<b>Save &amp; Close</b>	Click <b>Save &amp; Close</b> to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Next</b>	Click <b>Next</b> , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
<b>Submit</b>	Click <b>Submit</b> to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

## 1.12 Symbols and Icons

The list of symbols and icons available on the screens are as follows:

## Oracle Banking Trade Finance Process Management Cloud Service

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service process.

Welcome to the Oracle Banking Trade Finance Process Management Cloud Service User Guide. This guide provides an overview on the OBTFPMCS application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPMCS:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

### Overview

Oracle Banking Trade Finance Process Management Cloud Service is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management Cloud Service enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

### Benefits

Oracle Banking Trade Finance Process Management Cloud Service helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPMCS allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

### Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
- [Document Details](#)
- [Other Details](#)
- [Shipment Details](#)
- [Maturity Details](#)
- [Additional Fields](#)

- [Advices](#)
- [Additional Details](#)
- [Settlement Details](#)
- [Summary](#)

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the application details that are already having value from Registration channels may not be editable.

- [Main Details](#)  
This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection booking request.
- [Document Details](#)  
This topic provides the systematic instructions to capture the details of the documents received.
- [Other Details](#)  
This topic provides the systematic instructions to capture the other details like Credit Value Date, Debit Value Date, Other Bank charges etc.
- [Shipment Details](#)  
This topic provides the systematic instructions to capture the shipment details of export documentary collection booking request.
- [Maturity Details](#)  
This topic provides the systematic instructions to capture the maturity details.
- [Additional Fields](#)  
This topic provides the systematic instructions to capture the additional fields.
- [Advices](#)  
This topic provides the systematic instructions to capture the advices details.
- [Additional Details](#)  
This topic provides the systematic instructions to capture the additional details.
- [Settlement Details](#)  
This topic provides the systematic instructions to capture the settlement details of export documentary collection booking request.
- [Summary](#)  
This topic provides the systematic instructions to view the summary of Export Documentary Collection Booking process.

### 3.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection booking request.

Main details section has two sub section as follows:

- Application Details
- Collection Details.

#### **Application Details**

All fields displayed under Basic details section, would be read only except the 'Customer Reference Number', 'Priority' and 'Submission Mode' fields. For more information on the fields, refer [Table 3-3](#) of **Registration** stage.

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

**Figure 3-6 Data Enrichment - Main Details**

For more information on fields, refer to the field description table below.

**Table 3-6 Export Documentary Collection Booking - Main Details - Application Details - Field Description**

Field	Description
<b>Drawer</b>	Read only field. This field displays the Drawer as selected in <b>Registration</b> stage.
<b>Branch</b>	Read only field. Branch details is auto-populated based on the selected Drawer ID.
<b>Bill Amount</b>	Read only field. This field displays the bill currency defaulted from the <b>Registration</b> stage.
<b>Amount In Local Currency</b>	Read only field. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).
<b>Process Reference Number</b>	Read only field. Unique OBTFPMCS task reference number for the transaction.  This is auto generated by the system based on process name and branch code.
<b>Customer Reference Number</b>	Specify the customer reference number if available.

**Table 3-6 (Cont.) Export Documentary Collection Booking - Main Details - Application Details - Field Description**

Field	Description
<b>Priority</b>	System populates the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority.
<b>Submission Mode</b>	System populates the submission mode of Export Documentary Collection Booking request.  By default the submission mode will have the value as 'Desk'. <ul style="list-style-type: none"> <li><b>Desk</b> - Request received through Desk</li> <li><b>Courier</b> - Request received through Courier</li> </ul> User can change the submission mode.
<b>Booking Date</b>	Read only field. System displays the booking date of the application. By default, the application displays branch's current date.

**Collection Details**

The fields listed under this section are same as the fields listed under the Collection Details section in Registration. During Registration, if user has not captured input, then user can capture the details in this section.

 **Note:**

In case field Operation Type has value FOP (Free of Payment) that is populated from OBDX, system should retain the value and should not allow the user to edit the same.(Display only field if Submission mode is Online).

**Figure 3-7 Collection Details**

For more information on fields, refer to the field description table below.

**Table 3-7 Export Documentary Collection Booking - Main Details - Collection Details - Field Description**

Field	Description
<b>Documents Received</b>	Select the number of sets of documents received from the drop-down list. <ul style="list-style-type: none"> <li>• <b>First</b></li> <li>• <b>Second</b></li> <li>• <b>Both</b></li> </ul>
<b>Tenor Type</b>	Select the tenor type based on the document received. The options are: <ul style="list-style-type: none"> <li>• <b>Sight</b></li> <li>• <b>Usance</b></li> <li>• <b>Multi Tenor</b></li> </ul>
<b>Product Code</b>	Read only field. Product Code is defaulted from the <b>Registration</b> stage.
<b>Product Description</b>	Read only field. This field displays the description of the product as per the product code.
<b>Operation Type</b>	Read only field. This field displays the operation type as per the product code. User can book a documentary collection using the <b>Operation Type</b> as <b>FOP</b> , to indicate if the documents are to be delivered Free of Payment to the Drawee by the Collecting Bank.

2. Click **Next**.

The task will move to next data segment.

**Table 3-8 Main Details - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
<b>Documents</b>	<p>View/Upload the required document.</p> <p>Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application</p>
<b>Remarks</b>	<p>Specify any additional information regarding the collection. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>
<b>Overrides</b>	Click to view the overrides accepted by the user.

**Table 3-8 (Cont.) Main Details - Action Buttons - Field Description**

Field	Description
<b>Customer Instruction</b>	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>
<b>Signatures</b>	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
<b>Request Clarification</b>	<p>Click the Request Clarification button to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.</p>
<b>Save &amp; Close</b>	<p>Save the details provided and holds the task in ‘My Task’ queue for further update. This option will not submit the request.</p>
<b>Cancel</b>	<p>Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.</p>
<b>Hold</b>	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
<b>Refer</b>	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul>

**Table 3-8 (Cont.) Main Details - Action Buttons - Field Description**

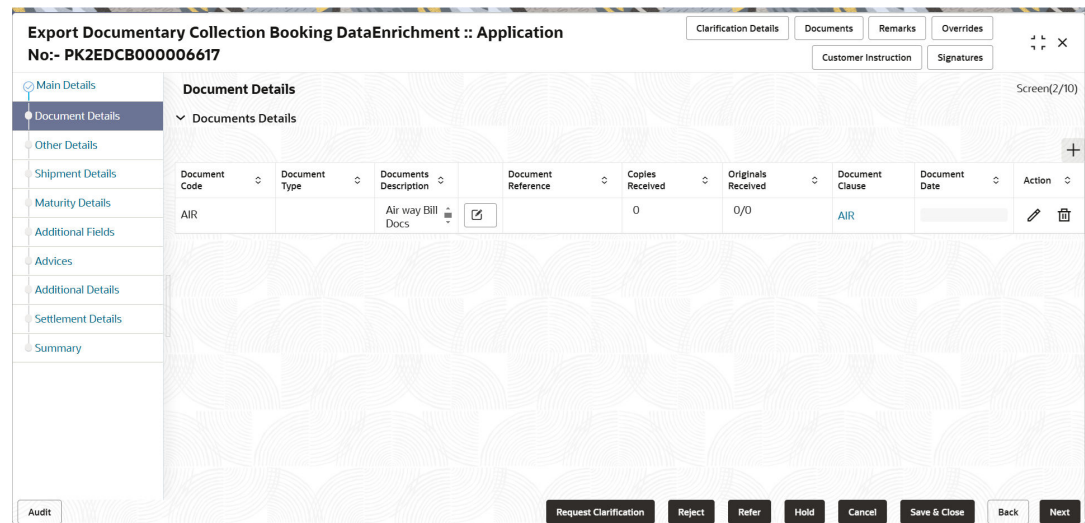

Field	Description
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

### 3.3.2 Document Details

This topic provides the systematic instructions to capture the details of the documents received.

1. On **Document Details** screen, specify the fields.

**Figure 3-8 Data Enrichment - Document Details**

For more information on fields, refer to the field description table below.

**Table 3-9 Document Details - Field Description**

Field	Description
<b>Document Code</b>	<p>System defaults the document code.</p> <p>User can add the document code by clicking the  Click <b>Search</b> to search and select the document code based on the document received.</p> <p>User can add or delete the code by deleting the line on the grid.</p>
<b>Document Type</b>	System dispalys the document type based on the document code. Click the link to view the document type.

**Table 3-9 (Cont.) Document Details - Field Description**

Field	Description
<b>Document Description</b>	System displays the document description based on the document code. User can edit the description. Click the link to view and edit the document description.
<b>Document Reference</b>	Specify the document reference.
<b>Copies Received</b>	Specify the number copies received from the Drawer. User can edit the actual copies received.
<b>Originals Received</b>	Specify the number of original documents received from the Drawer. User can edit the actual originals received.
<b>Document Date</b>	User can edit the date on which the document is received. On click of 'Next' system should validate the value in this field against the transport document/Bill of Lading (MARDOC) against any Outstanding Shipping Guarantees issued for the drawee and is not linked to any Documentary Collection or Import Letter of Credit. System should default the Shipping Guarantee Reference in the next screen.
<b>Action</b>	Click Edit icon to edit the document details.  Click Delete icon to delete the document details.

2. Click **Next**.

The task will move to next data segment. For more information refer [Other Details](#).  
For more information on action buttons, refer to the field description table below.

**Table 3-10 Document Details - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
<b>Documents</b>	View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
<b>Remarks</b>	Specify any additional information regarding the collection. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the overrides accepted by the user.

**Table 3-10 (Cont.) Document Details - Action Buttons - Field Description**

Field	Description
<b>Customer Instruction</b>	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>
<b>Signatures</b>	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
<b>Request Clarification</b>	<p>Click the Request Clarification button to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.</p>
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
<b>Refer</b>	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul>
<b>Hold</b>	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
<b>Cancel</b>	<p>Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.</p>
<b>Save &amp; Close</b>	<p>Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.</p>
<b>Back</b>	<p>Click the Back button, to go back to the previous screen.</p>

**Table 3-10 (Cont.) Document Details - Action Buttons - Field Description**

Field	Description
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

### 3.3.3 Other Details

This topic provides the systematic instructions to capture the other details like Credit Value Date, Debit Value Date, Other Bank charges etc.

1. On **Other Details** screen, specify the fields that were not entered at Registration stage.

**Figure 3-9 Other Details**

For more information on fields, refer to the field description table below.

**Table 3-11 Other Details - Field Description**

Field	Description
<b>Other Details</b>	
<b>Debit Value Date</b>	System defaults the debit value date. The user can change the debit value date.
<b>Credit Value Date</b>	System defaults the credit value date. The user can change the credit value date.

**Table 3-11 (Cont.) Other Details - Field Description**

Field	Description
<b>Value Date</b>	System defaults the value date. The user can change the value date.
<b>Other Bank Charges</b> Specify the other bank charges based on the description in the following table.	
<b>Other Bank Charges - 1</b>	Specify the charges to be collected for the other bank as part of the collection transaction.
<b>Other Bank Charges - 2</b>	Specify the charges to be collected for the other bank as part of the collection transaction.
<b>Other Bank Charges - 3</b>	Specify the charges to be collected for the other bank as part of the collection transaction.
<b>Other Bank Charge Description - 1</b>	Specify the description of charges to be collected for the other bank as part of the drawings transaction.
<b>Other Bank Charge Description - 2</b>	Specify the description of charges to be collected for the other bank as part of the drawings transaction.
<b>Other Bank Charge Description - 3</b>	Specify the description of charges to be collected for the other bank as part of the drawings transaction.
<b>Other Bank Interest</b> The user can enter the Interest details to be captured as a part of "Other Bank Interest" details section	
<b>Start Date</b>	Specify or select the date from which the system starts calculating the Interest.
<b>Other Bank Interest-1, 2 and 3</b>	
<b>Component</b>	This field displays the name of the interest component.
<b>Component Description</b>	Specify the description of the interest component.
<b>Interest Rate</b>	Specify the rate to be applied for the interest component.
<b>Interest Basis</b>	Select the calculation basis on which the Interest to be computed from the drop-down list.
<b>Waive</b>	Select whether the interest to be waived off.  The options are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

2. Click **Next**.

The task will move to next data segment. For more information refer [Shipment Details](#).  
For more information on action buttons, refer to the field description table below.

**Table 3-12 Other Details - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.

Table 3-12 (Cont.) Other Details - Action Buttons - Field Description

Field	Description
<b>Documents</b>	<p>View/Upload the required document.</p> <p>Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application</p>
<b>Remarks</b>	<p>Specify any additional information regarding the collection. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>
<b>Overrides</b>	Click to view the overrides accepted by the user.
<b>Customer Instruction</b>	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. <b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>

**Table 3-12 (Cont.) Other Details - Action Buttons - Field Description**

Field	Description
<b>Refer</b>	Select a Refer Reason from the values displayed by the system.  Refer Codes are: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Hold</b>	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.  This option is used, if there are any pending information yet to be received from applicant.
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Back</b>	Click the Back button, to go back to the previous screen.
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

### 3.3.4 Shipment Details

This topic provides the systematic instructions to capture the shipment details of export documentary collection booking request.

Update the goods and shipment details from the documents received.

1. On **Shipment Details** screen, specify the fields.

Figure 3-10 Shipment Details

For more information on fields, refer to the field description table below.

Table 3-13 Shipment Details – Field Description

Field	Description
<b>Shipment Details.</b>	
<b>Transshipment</b>	Select the transshipment details of goods (if any) from the document received from the drop-down list.  The options are: <ul style="list-style-type: none"> <li>• Allowed</li> <li>• Not Allowed</li> </ul>
<b>Partial Shipments</b>	Select the partial shipment details of goods (if any) from the document received from the drop-down list.  The options are: <ul style="list-style-type: none"> <li>• Allowed</li> <li>• Not Allowed</li> </ul>
<b>Date Of Shipment</b>	Select the date of shipment . Shipment date can be back dated but not future dated. This is a mandatory field, an error message will be displayed if not provided.

**Table 3-13 (Cont.) Shipment Details – Field Description**

Field	Description
<b>Place Of Taking In Charge</b>	<p>Specify the details of place of taking in charge from the document received.</p> <p>This field indicates the place of taking in charge (in case of a multi-modal transport document), the place of receipt (in case of a road, rail or inland waterway transport document or a courier or expedited delivery service document), the place of dispatch or the place of shipment to be indicated on the transport document.</p> <div style="border: 1px solid #0070C0; background-color: #E6F2FF; padding: 5px; margin-top: 10px;">  <b>Note:</b> This field is alternate to <b>Port Of Loading</b>.         </div>
<b>Port Of Loading</b>	<p>Specify the details of Port/Airport of Loading from the document received.</p> <p>This field indicates the port of loading to be indicated on the transport document.</p> <div style="border: 1px solid #0070C0; background-color: #E6F2FF; padding: 5px; margin-top: 10px;">  <b>Note:</b> This field is alternate to <b>Place Of Taking In Charge</b>.         </div>
<b>Port Of Discharge</b>	<p>Specify the details of Port/Airport of Discharge from the document received.</p> <p>This field indicates the port of discharge or airport of destination to be indicated on the transport document.</p> <div style="border: 1px solid #0070C0; background-color: #E6F2FF; padding: 5px; margin-top: 10px;">  <b>Note:</b> This field is alternate to <b>Place Of Final Destination</b>.         </div>
<b>Place Of Final Delivery</b>	<p>Specify the details of Place Of Final Destination from the document received.</p> <p>This field indicates the final destination or place of delivery to be indicated on the transport document.</p> <div style="border: 1px solid #0070C0; background-color: #E6F2FF; padding: 5px; margin-top: 10px;">  <b>Note:</b> This field is alternate to <b>Port Of Discharge</b>.         </div>
<b>Carrier Name</b>	Specify the name of the carrier through which the goods were shipped.
<b>Shipping Agent Name</b>	Specify the shipping agent name from the document received.
<b>Shipping Agent Address</b>	Specify the shipping agent address from the document received.
<b>INCO Terms</b>	Click <b>Search</b> to search and select the INCO terms from the document received.

**Table 3-13 (Cont.) Shipment Details – Field Description**

Field	Description
<b>INCO Terms Description</b>	System displays the description of the INCO term.
<b>Description of Goods and/or Services</b> The user can click + to add multiple description of goods and services.	
<b>Goods Code</b>	Click <b>Search</b> to search and select the goods code. Once you select goods code, value will default in Goods Type and Goods Description.
<b>Goods Type</b>	This field displays the goods type depending on selected goods code.
<b>Goods Description</b>	This field displays the description of goods based on goods code.
<b>Figure 3-11 Edit icon</b> 	Click Edit icon to edit the goods description.
<b>Action</b>	Click Edit icon to edit the goods code. Click Delete icon to delete the goods code.
<b>Country of Origin</b>	Specify the country of origin details from the documents received.
<b>Insurance Company Code</b>	Click <b>Search</b> to search and select the Insurance Company Code.
<b>Insurance Company</b>	Read only field. The system displays the insurance company details as per the selected Insurance Company Code from the lookup.
<b>Policy Number</b>	Specify the policy number of the insurance.
<b>Multi-model/ Transshipment details</b> During shipment, if goods are shipped using multiple transports on its way or any transit ports, the details must be captured in this section	
<b>Carrier Name</b>	Specify the details of the carrier as per the documents received, if the goods were shipped via multiple carriers.
<b>Port</b>	Specify the port details as per the document received, if the ship has transit on its way to the destination.
<b>Action</b>	Click Edit icon to edit the goods code. Click Delete icon to delete the goods code.

2. Click **Next**.

The task will move to next data segment. For more information refer [Maturity Details](#) .

**Table 3-14 Shipment Details - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.

Table 3-14 (Cont.) Shipment Details - Action Buttons - Field Description

Field	Description
<b>Documents</b>	<p>View/Upload the required document.</p> <p>Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application</p>
<b>Remarks</b>	<p>Specify any additional information regarding the collection. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>
<b>Overrides</b>	Click to view the overrides accepted by the user.
<b>Customer Instruction</b>	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>
<b>Signatures</b>	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
<b>Request Clarification</b>	Click the Request Clarification button to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>

**Table 3-14 (Cont.) Shipment Details - Action Buttons - Field Description**

Field	Description
<b>Refer</b>	Select a Refer Reason from the values displayed by the system.  Refer Codes are: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Hold</b>	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.  This option is used, if there are any pending information yet to be received from applicant.
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Back</b>	Click the Back button, to go back to the previous screen.
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

### 3.3.5 Maturity Details

This topic provides the systematic instructions to capture the maturity details.

1. On **Maturity Details** screen, specify the fields.

**Figure 3-12 Maturity Details**

For more information on fields, refer to the field description table below.

**Table 3-15 Maturity Details - Field Description**

Field	Description
<b>Draft Details</b> The user can click + to add multiple <b>Draft Details</b> .	
<b>Draft Code</b>	Click <b>Search</b> to search and select the draft code.
<b>Draft Amount</b>	Specify the draft amount.
<b>Action</b>	Click Edit icon to edit the draft code/ draft amount.  Click Delete icon to delete the draft code.
<b>Maturity and Multi Tenor Liquidation Details</b> The user can click + to add multiple <b>Maturity and Multi Tenor Liquidation Details</b> .	
<b>S. No</b>	Serial number of the tenor record.
<b>Tenor Basis</b>	Specify the tenor basis.   <b>Note:</b> This field is disabled if the Tenor Type is 'Mixed'.
<b>Tenor Description</b>	The tenor base code description is displayed based on the selected tenor basis. The user to can edit the tenor description.
<b>Start Date</b>	Select the tenor start date.
<b>Tenor Days</b>	Specify the number of tenor days.
<b>Transit Days</b>	Specify the transit days, if the tenor is sight.
<b>Maturity Date</b>	System displays the due date for the bill based on tenor and tenor basis. If tenor is sight, system will calculate the maturity date as five working days from Document Received Date. If tenor is Usance, system will calculate the maturity date based on the tenor basis and populate the maturity date.   <b>Note:</b> In case if the Operation Type is FOP, Due date (Maturity date) is not applicable in this case and current branch date will be populated in the Maturity date field.
<b>Bill Amount</b>	Specify the bill amount.
<b>Liquidated Amount</b>	Specify the the liquidation amount.
<b>Exchange Rate</b>	Specify the exchange rate.
<b>Liquidation Date</b>	Specify the liquidation date.
<b>Liquidation Amount</b>	Specify the liquidation amount.
<b>Rebate Amount</b>	Specify the rebate amount.
<b>Action</b>	Click Edit icon to edit the tenor record.  Click Delete icon to delete the tenor record.

**Table 3-15 (Cont.) Maturity Details - Field Description**

Field	Description
<b>Interest From Date</b>	Select the interest from date. The interest from date cannot be earlier than branch date and later than maturity date.
<b>Interest To Date</b>	Application defaults Maturity Date in this field, if Interest from Date is provided.
<b>Acceptance Commission From Date</b>	Select the accept commission from date.
<b>Acceptance Commission To Date</b>	Select the accept commission to date.

2. Click **Next**.

The task will move to next data segment. For more information refer [Additional Fields](#).  
For more information on action buttons, refer to the field description table below.

**Table 3-16 Maturity Details - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
<b>Documents</b>	View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
<b>Remarks</b>	Specify any additional information regarding the collection. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the overrides accepted by the user.
<b>Customer Instruction</b>	Click to view/ input the following <ul style="list-style-type: none"> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>

Table 3-16 (Cont.) Maturity Details - Action Buttons - Field Description

Field	Description
<b>Signatures</b>	<p>Click the Signature button to verify the signature of the customer/bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
<b>Request Clarification</b>	Click the Request Clarification button to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
<b>Refer</b>	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Hold</b>	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Back</b>	Click the Back button, to go back to the previous screen.
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

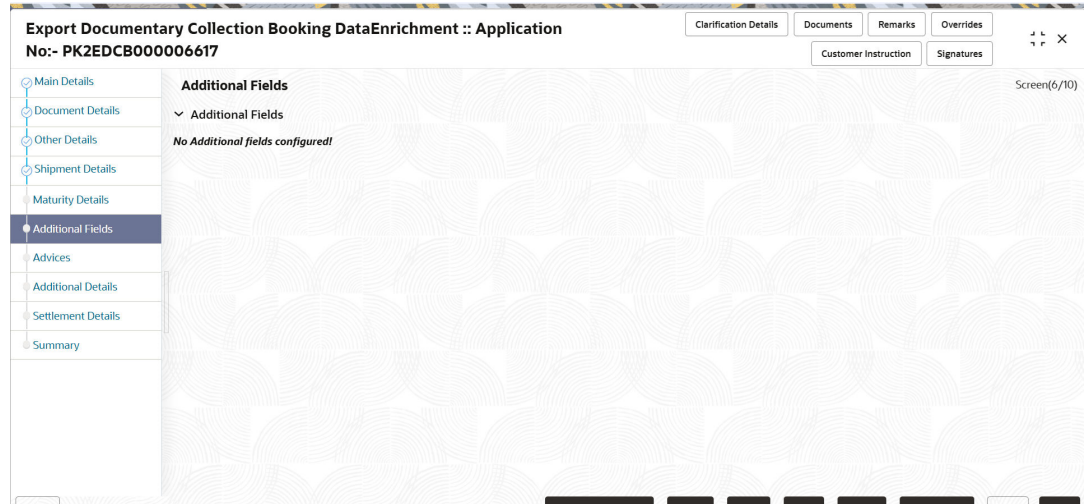

### 3.3.6 Additional Fields

This topic provides the systematic instructions to capture the additional fields.

Banks can configure user defined fields as per their requirement in the Additional Fields Screen.

1. On **Additional Fields** screen, specify the fields, if any.

**Figure 3-13 Additional Fields**

2. Click **Next**.

The task will move to next data segment. For more information refer [Advices](#).  
For more information on action buttons, refer to the field description table below.

**Table 3-17 Additional Fields - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
<b>Documents</b>	View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
<b>Remarks</b>	Specify any additional information regarding the collection. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.

Table 3-17 (Cont.) Additional Fields - Action Buttons - Field Description

Field	Description
<b>Overrides</b>	Click to view the overrides accepted by the user.
<b>Customer Instruction</b>	Click to view/ input the following <ul style="list-style-type: none"> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>
<b>Signatures</b>	Click the Signature button to verify the signature of the customer/ bank if required.  The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.  If more than one signature is required, system should display all the signatures.
<b>Request Clarification</b>	Click the Request Clarification button to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.
<b>Reject</b>	On click of Reject, user must select a Reject Reason from a list displayed by the system.  Reject Codes are: <ul style="list-style-type: none"> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul> Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
<b>Refer</b>	Select a Refer Reason from the values displayed by the system.  Refer Codes are: <ul style="list-style-type: none"> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul>
<b>Hold</b>	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.  This option is used, if there are any pending information yet to be received from applicant.
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.

**Table 3-17 (Cont.) Additional Fields - Action Buttons - Field Description**

Field	Description
<b>Back</b>	Click the Back button, to go back to the previous screen.
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

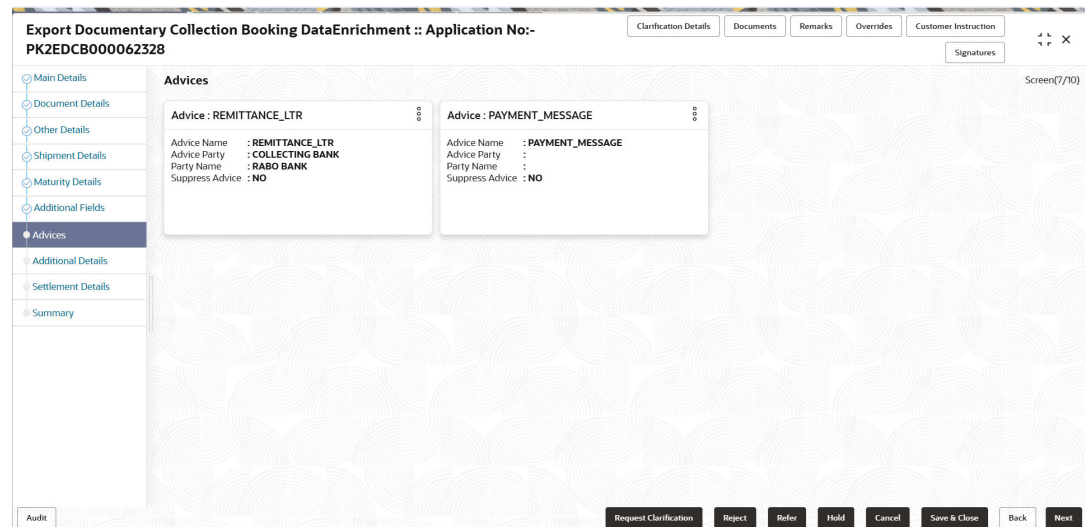

### 3.3.7 Advices

This topic provides the systematic instructions to capture the advices details.

Advices menu displays the advices available under a product code from the back office as tiles. User can edit the fields in the tile, if required. User can suppress the advice, if required.

1. On **Advices** screen, click the 3 dots on any advice tile to view the advice details.

**Figure 3-14 Advices**

### Advice Details

**Table 3-18 Advice Details**

Field	Description
<b>Suppress Advice</b>	Enable this option to suppress the advice. Disable this option if suppress advice is not required.
<b>Advice Name</b>	This field displays the advice name defaulted from LC issuance.
<b>Medium</b>	This field displays the medium of advices defaulted from the system. User can update if required.
<b>Advice Party</b>	This field displays the advice party defaulted from LC issuance.
<b>Party ID</b>	This field displays the party ID defaulted from LC issuance.
<b>Party Name</b>	This field displays the party name defaulted from LC issuance.
<b>FFT Code</b> Click + to add multiple <b>FFT Code</b> .	
<b>FFT Code</b>	Click <b>Search</b> to search and select the FFT code as a part of free text.
<b>FFT Description</b>	This field displays the FFT description based on the FFT code selected.
<b>Action</b>	Click Edit icon to edit the FFT code.  Click Delete icon to delete the FFT code.
<b>Instruction Code</b> Click + to add multiple <b>Instruction Code</b> .	
<b>Instruction Code</b>	Click <b>Search</b> to search and select the instruction code as a part of free text.
<b>Instruction Description</b>	This field displays the instruction description based on the instruction code selected.
<b>Edit</b>	Click Edit icon to edit the instruction code description.

**Table 3-18 (Cont.) Advice Details**

Field	Description
<b>Action</b>	Click Edit icon to edit the instruction code.  Click Delete icon to delete the instruction code.

2. Click **Next**.

The task will move to next data segment. For more information refer [Additional Details](#).  
For more information on fields, refer to the field description table below.

**Table 3-19 Advices - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
<b>Documents</b>	View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
<b>Remarks</b>	Specify any additional information regarding the collection. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the overrides accepted by the user.
<b>Customer Instruction</b>	Click to view/ input the following <ul style="list-style-type: none"> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. <b>Cash Collateral Details</b>	
	Click plus icon to add new collateral details.
<p>Click + plus icon to add new collateral details. Collateral availability needs to be checked if amendment involves increase in amount or tolerance. Provide the collateral details based on the description provided in the following table: Below fields are displayed on the <b>Collateral Details</b> pop-up screen, if the user clicks plus icon.</p>	
<b>Total Collateral Amount</b>	Read only field. This field displays the total collateral amount provided by the user.
<b>Collateral Amount to be Collected</b>	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.
<b>Sequence Number</b>	Read only field. The sequence number is auto populated with the value, generated by the system.
<b>Collateral Split %</b>	Specify the collateral split% to be collected against the selected settlement account.
<b>Collateral Contribution Amount</b>	Specify the collateral amount to be collected against the selected settlement account. User can either provide the collateral % where the collateral amount will be auto populated or modifying the collateral amount will auto correct the collateral %.
<b>Settlement Account</b>	Click <b>Search</b> to search and select the settlement account for the collateral.
<b>Settlement Account Currency</b>	Read only field. This field displays the settlement account currency defaulted by the system.
<b>Exchange Rate</b>	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.

**Table 3-20 (Cont.) Limit Details - Field Description**

Field	Description
<b>Contribution Amount in Account Currency</b>	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.
<b>Account Available Amount</b>	Read only field. This field displays the account available amount which will be auto-populated on clicking the <b>Verify</b> button.
<b>Response</b>	Read only field. System populates the response on clicking the <b>Verify</b> button.
<b>Response Message</b>	Read only field. System populates the response message on clicking the <b>Verify</b> button.
<b>Verify</b>	Click to verify the account balance of the Settlement Account.
<b>Save &amp; Close</b>	Click to to save and close the record.
<b>Cancel</b>	Click to cancel the entry.
Below fields appear in the <b>Cash Collateral Details</b> grid along with the above fields.	
<b>Collateral %</b>	Specify the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
<b>Contribution Amount</b>	This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
<b>Account Balance Check Response</b>	Read only field. System populates the Account Balance Check Response on clicking the <b>Verify</b> button.
<b>Edit</b>	Click edit link to edit the collateral details.
	Click delete icon to delete the existing collateral details.
<b>Deposit Linkage Details</b> Click + plus icon to add new Deposit Linkage details.	
	Click plus icon to add new deposit linkage details.
Below fields are displayed on the <b>Deposit Linkage Details</b> pop-up screen, if the user clicks plus icon.	
<b>Customer ID</b>	This field displays the applicant's/applicant bank customer ID defaulted from the application. User can change the customer ID.
<b>Deposit Account</b>	Click <b>Search</b> to search and select deposit for linkage from the list of all the customer Deposits.

**Table 3-20 (Cont.) Limit Details - Field Description**

Field	Description
<b>Deposit Branch</b>	This field displays the deposit branch which is auto-populated based on the deposit account selection.
<b>Deposit Available Amount</b>	This field displays the deposit available amount and currency which will be auto-populated based on the deposit account selection.
<b>Deposit Maturity Date</b>	This field displays the maturity date of deposit.
<b>Exchange Rate</b>	This field displays the latest exchange rate for deposit linkage. This will be picked up from the exchange rate maintenance from the common core.
<b>Deposit Available In Transaction Currency</b>	This field displays the deposit amount available, after exchange rate conversion, if applicable.
<b>Linkage Percentage %</b>	Specify the value for linkage percentage.
<b>Linkage Amount (Transaction Currency)</b>	This field displays the transaction amount, user can change the value.
Below fields appear in the <b>Deposit Linkage Details</b> grid along with the above fields.	
<b>Deposit Currency</b>	Deposit currency will get defaulted in this field.
<b>Transaction Currency</b>	Transaction currency will get defaulted in this field from the underlying task.
	Click delete icon to delete the existing deposit linkage details.
<b>Edit</b>	Click edit link to edit the deposit linkage details.

2. Click **Save and Close** to save the details and close the screen.

**Figure 3-19 Charge Details**

For more information on fields, refer to the field description table below.

**Table 3-21 Charge Details - Field Description**

Field	Description
<b>Commission Details</b>	
<b>Event</b>	Read only field. This field displays the event name.
<b>Event Description</b>	Read only field. This field displays the description of the event.
<b>Component</b>	This field displays the commission component.
<b>Rate</b>	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
<b>Modified Rate</b>	From the default value, if the rate is changed the value gets updated in this field.
<b>Currency</b>	This field displays the currency in which the commission have to be collected.
<b>Amount</b>	This field defaults the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPMCS. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
<b>Modified Amount</b>	From the default value, if the amount is changed, the value gets updated in the modified amount field.
<b>Defer</b>	If enabled, charges/commissions has to be deferred and collected at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPMCS. The user can not select/de-select the check box if it is de-selected by default.
<b>Waive</b>	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
<b>Charge Party</b>	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
<b>Settlement Account</b>	Select the settlement account.
<b>Amendable</b>	The value is auto-populated as the commission can be amended or not.

**Table 3-21 (Cont.) Charge Details - Field Description**

Field	Description
<b>Charge Details</b>	
<b>Component</b>	This field defaults the charge component type.
<b>Tag Currency</b>	This field defaults the tag currency in which the charges have to be collected.
<b>Tag Amount</b>	This field defaults the tag amount that is maintained under the product code.
<b>Currency</b>	This field defaults the currency in which the charges have to be collected.
<b>Amount</b>	This field defaults the amount that is maintained under the product code.
<b>Modified</b>	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
<b>Billing</b>	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.
<b>Defer</b>	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPMCS. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
<b>Waive</b>	Enable the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer.
<b>Charge Party</b>	Charge party is applicant by default. User can change the value to beneficiary.
<b>Settlement Account</b>	Indicates the settlement account.
<b>Tax Details</b> The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.	
<b>Component</b>	This field displays the tax component.
<b>Type</b>	This field displays the type of tax component.
<b>Value Date</b>	This field displays the value date of tax component.
<b>Currency</b>	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
<b>Amount</b>	This field displays the tax amount based on the percentage of commission maintained.
<b>Billing</b>	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.
<b>Defer</b>	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.

**Table 3-21 (Cont.) Charge Details - Field Description**

Field	Description
<b>Settlement Account</b>	System defaults the settlement account. The user can modify the settlement account.

- Click **Save and Close** to save the details and close the screen.

**Preview Message**

The bank user can preview the message simulated for correspondence with Remitting Bank.

For more information on fields, refer to the field description table below.

**Table 3-22 Preview - Field Description**

Field	Description
<b>Preview SWIFT Message</b>	
<b>Language</b>	Select the language for the SWIFT message.
<b>Message Type</b>	Select the message type.

**Payment Details**

For more information on fields, refer to the field description table below.

**Table 3-23 Payment Details - Field Description**

Field	Description
<b>Payment Details</b>	
<b>Auto Liquidate</b>	Enable the option as 'On' if the auto liquidation is required. Disable the option as 'Off' if the auto liquidation is not required.  Auto Liquidation enables liquidation of the bill on the due date automatically from the back office system.
<b>Allow Rollover</b>	Read only field.
<b>Auto Change from Acceptance to Advance</b>	Read only field. This flag indicates whether an Acceptance type of bill should be automatically converted into an Advance type of bill on its liquidation date.  <b>Note:</b> This option is applicable only for the bills that are co-accepted by the bank.
<b>Liquidate using Collateral</b>	Read only field.
<b>Outstanding Collateral Amount</b>	Read only field. The outstanding collateral amount along with the currency.

Table 3-23 (Cont.) Payment Details - Field Description

Field	Description
<b>Split Settlement</b>	Enable the option as 'On' to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill. Disable the option as 'Off' Disables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill.
<b>Avalization</b>	Enable the option as 'On' for avalization.
<b>Settlement Details - Liquidation</b>	
<b>Component</b>	This field displays the component based on the product selected.
<b>Currency</b>	This field displays the currency for the component.
<b>Debit/Credit</b>	This field displays the debit/credit indicators for the components.
<b>Account</b>	This field displays the account details for the components.
<b>Account Description</b>	This field displays the description of the selected account.
<b>Branch</b>	This field displays the branch of the selected account.
<b>Account Currency</b>	This field displays the currency for all the items based on the account number.
<b>Original Exchange Rate</b>	System displays the Original Exchange Rate as simulated in settlement details section from OBTF.
<b>Exchange Rate</b>	The exchange rate for the settlement.
<b>Deal Reference Number</b>	The exchange deal reference number.
<b>Split Settlement</b>	
<b>Component</b>	This field displays the component based on the product selected.
<b>Contract Currency</b>	This field displays the default currency for the component.
<b>Amount</b>	This field displays the amount for each component. This is populated from the transaction details of the drawing.
<b>Split Settlement Details</b> The user can click + to add multiple <b>Split Settlement Details</b> .	
<b>Sequence</b>	Indicates the sequence of the settlement details.
<b>Amount</b>	Specify the amount for the split settlement.
<b>Settlement Account</b>	Click <b>Search</b> to search and select the settlement account.
<b>Account Customer</b>	This field displays customer account based on the selected settlement account.
<b>Account Currency</b>	This field displays currency of the account.
<b>Account Branch</b>	This field displays branch of the customer's account
<b>Original Exchange Rate</b>	System displays the Original Exchange Rate as simulated in settlement details section from OBTF.
<b>Exchange Rate</b>	Click the <b>Fetch Exchange Rate</b> button, the field displays the exchange rate for the split settlement.
<b>Deal Reference Number</b>	The exchange deal reference number.
<b>Action</b>	Click Edit icon to edit the Split Settlement.  Click Delete icon to delete the Split Settlement.

- Click **Save and Close** to save the details and close the screen.

#### FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

The screenshot shows a window titled "FX Linkage" with a sub-section "FX Linkage" containing a table. Below the table is a form for "Average FX Rate" and "Save & Close" and "Cancel" buttons.

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Total Utilized Amount	FX Expiry Date	Action
000FNDF20076A9N9			£4,000.00	1.35	£4,000.00		March 19, 2020

For more information on fields, refer to the field description table below.

Table 3-24 FX Linkage - Field Description

Field	Description
The user can click + to add multiple <b>FX Details</b> .	
<b>FX Reference Number</b>	<p>Click <b>Search</b> to search and select the FX contract reference number. On select and save and close, system defaults the available amount, bot currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> <li>Counterparty of the FX contract should be the counterparty of the Bill contract.</li> <li>Active Forward FX transactions authorized not marked for auto liquidation.</li> </ul> <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p>
The user can click + to add multiple <b>FX Details</b> .	
<b>Bought Currency</b>	This field displays the currency from the linked FX contract.
<b>Sold Currency</b>	This field displays the currency from the linked FX contract.
<b>Available Contract Amount</b>	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.
<b>Rate</b>	This field displays the rate at which the contract is booked.

**Table 3-24 (Cont.) FX Linkage - Field Description**

Field	Description
<b>Linked Amount</b>	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
<b>Current Utilized amount</b>	This field displays the liquidated /purchased /discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.
<b>Total Utilized Amount</b>	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.
<b>Amount in Contract Currency</b>	This field displays the amount in contract currency converted from FX currency.
<b>FX Expiry Date</b>	This field displays the expiry date from the linked FX contract.
<b>FX Delivery Period - From</b>	This field displays the date from which the contract is valid for utilization.
<b>FX Delivery Period - To</b>	This field displays the date to which the contract is valid for utilization.
<b>Action</b>	Click Edit icon to edit the FX details.  Click Delete icon to delete the FX details.
<b>Average FX Rate</b>	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.

6. Click **Save and Close** to save the details and close the screen.

### Interest Details

The user can view and modify the Interest details simulated from the back office system. On update of the Interest rate user has to click on Recalculate button. System will trigger a simulation call to the back office and the updated Interest details will be reflected in this section.

The screenshot shows a window titled "Interest Details" with a close button (X) in the top right corner. Below the title bar are two buttons: "Recalculate" and "Re-default". Underneath is a dropdown menu labeled "Interest Details" which is currently expanded. Below the dropdown is a table with the following columns: Component, Component Description, Rate Type, Rate Code, Min Spread, Max Spread, Spread, Min Rate, Max Rate, Rate, Modified Rate, Special Pricing..., Currency, Interest Amount, Waive, Charge Party, and Settlement Account. The table is currently empty and displays the message "No data to display." At the bottom right of the window are two buttons: "Save & Close" and "Close".

For more information on fields, refer to the field description table below.

**Table 3-25 Interest Details - Field Description**

Field	Description
<b>Component</b>	This field displays the component maintained in the back office.

**Table 3-25 (Cont.) Interest Details - Field Description**

Field	Description
<b>Component Description</b>	This field displays the description of the component.
<b>Rate Type</b>	This field displays the rate type maintained for the component in back office. <ul style="list-style-type: none"> <li>• Fixed Floating</li> <li>• Special</li> </ul>
<b>Rate Code</b>	This field displays the rate code applicable for the component.
<b>Min Spread</b>	This field displays the minimum spread applicable for the Rate Code. This field have value, if the <b>Rate Type</b> is <b>Floating</b> .
<b>Max Spread</b>	This field displays the maximum spread applicable for the Rate Code. This field have value, if the <b>Rate Type</b> is <b>Floating</b> .
<b>Spread</b>	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.
<b>Min Rate</b>	This field displays the minimum rate applicable for the Rate Code.
<b>Max Rate</b>	This field displays the maximum rate applicable for the Rate Code.
<b>Rate</b>	This field displays the value applicable for the Rate Code. You can modify the value, if the <b>Rate Type</b> is <b>Fixed</b> . System validates whether the Rate input is between the Minimum and Maximum Rate.
<b>Modified Rate</b>	This field displays the modified rate.
<b>Special Pricing Reference Number</b>	Specify the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component). Special Pricing Reference is not applicable for Penal Interest components.  For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same.  <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> <b>Note:</b> System displays an override as “Special Pricing Applicable”, on clicking “Save” in the Interest Details screen, if Special Pricing Reference number has been provided.</p> </div>
<b>Currency</b>	This field displays the interest currency.
<b>Amount</b>	Specify the interest amount, if the <b>Rate Type</b> is <b>Special</b> . In other cases , the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.
<b>Waive</b>	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.

**Table 3-25 (Cont.) Interest Details - Field Description**

Field	Description
<b>Charge Party</b>	This field displays the Charge Party based on the type of transaction. In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills.
<b>Settlement Account</b>	This field displays the settlement account of the Charge Party for debit of Interest. User can change the value. System displays an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override. In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPMCS).
<b>Settlement Currency</b>	System defaults the currency of the Settlement Account as maintained for the Charge Party.
<b>Settlement Branch</b>	System defaults the branch of the Settlement Account as maintained for the Charge Party.

- Click **Save and Close** to save the details and close the screen.

### Tracer Details

This section enables the user to view the default Tracer details from back end application. It also allows the user to add new Tracer details. Add new Tracer details based on the description in the following table:

Acknowledgement Tracer, Acceptance Tracer and Payment Tracer are applicable for this process.

The screenshot shows a 'Tracer Details' window with a close button (X) in the top right corner. Under the 'Payment Tracer' section, there are several input fields:
 

- Tracer Required:** A toggle switch that is currently turned on.
- Number of Tracers:** A text input field containing the value '5'.
- Tracer Frequency:** A text input field containing the value '7'.
- Tracer Medium:** A dropdown menu with 'MAIL' selected.
- Tracer Receiver Party:** A search input field containing 'GUARANTOR'.
- Tracer Start Date:** A date picker field showing 'April 20, 2022'.

 At the bottom right of the form, there are two buttons: 'Save & Close' and 'Close'.

For more information on fields, refer to the field description table below.

**Table 3-26 Tracer Details - Field Description**

Field	Description
<b>Payment Tracer/ Acceptance Tracer</b>	
<b>Tracer Required</b>	Enable the option, if tracer is required. <ul style="list-style-type: none"> <li>Toggle On: Required</li> <li>Toggle Off: Not required.</li> </ul>

**Table 3-26 (Cont.) Tracer Details - Field Description**

Field	Description
<b>Number of Tracers</b>	Specify the number of tracers required.
<b>Tracer Frequency</b>	Select the frequency for generation of the Tracer. The options are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Fortnightly</li> </ul>
<b>Tracer Medium</b>	Select the tracer medium from the drop-down list. The options are: <ul style="list-style-type: none"> <li>• MAIL</li> <li>• EMAIL</li> <li>• SWIFT</li> </ul>
<b>Tracer Receiver Party</b>	Click <b>Search</b> to search and select the tracer receiver party.
<b>Tracer Start Date</b>	Select the tracer start date. Start date cannot be earlier than the branch date.
<b>Template ID</b>	Click <b>Search</b> to search and select the template ID.  <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> <b>Note:</b></p> <p>This field is enabled if <b>Tracer Medium</b> has value as <b>SWIFT</b>.</p> </div>

8. Click **Save and Close** to save the details and close the screen.

**Pre-Shipment Details**

This section links an existing Preshipment Credit.

The screenshot displays the 'Pre-Shipment Details' window. It features a table with the following columns: 'Loan Account Number', 'Currency', 'Outstanding Amount', and 'Action'. Below this table is a 'Settled Loan' section with columns: 'Sequence Number', 'Loan Account Number', 'Currency', 'Outstanding Amount', 'Event', and 'Settled Amount'. The screen includes navigation buttons like 'Save & Close' and 'Close'.

For more information on fields, refer to the field description table below.

**Table 3-27 Pre-Shipment Details - Field Description**

Field	Description
<b>Pre Shipment Details</b>	The user can click + to add multiple Pre Shipment Details.

**Table 3-27 (Cont.) Pre-Shipment Details - Field Description**

Field	Description
<b>Loan Account Number</b>	Click <b>Search</b> to search and select the loan account number.  <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> <b>Note:</b></p> <p>If there are any pre-shipment credits available for the selected pre-shipment credit number, application will display message: There are earlier pre-shipment credit/s. Do you want to continue?</p> </div>
<b>Currency</b>	This field displays the currency of the pre-shipment loan account number. The user can change the currency.
<b>Outstanding Amount</b>	Specify the pre-shipment credit outstanding amount. The user can change the outstanding amount.
<b>Action</b>	Click Edit icon to edit the pre-shipment details.  Click Delete icon to delete the pre-shipment details.
<b>Settled Loan</b>	
<b>Sequence Number</b>	This field displays the sequence of the settled loan.
<b>Loan Account Number</b>	This field displays the settled loan account number.
<b>Currency</b>	This field displays the currency of the settled loan account number.
<b>Outstanding Amount</b>	This field displays the outstanding amount.
<b>Event</b>	This field displays the event.
<b>Settled Amount</b>	This field displays the settled amount.

9. Click **Save and Close** to save the details and close the screen.
10. **Next.**

The task will move to next data segment. For more information refer [Settlement Details](#).  
For more information on action buttons, refer to the field description table below.

**Table 3-28 Additional Details - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be Clarification Requested.
<b>Documents</b>	View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application

Table 3-28 (Cont.) Additional Details - Action Buttons - Field Description

Field	Description
<b>Remarks</b>	Specify any additional information regarding the collection. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the overrides accepted by the user.
<b>Customer Instruction</b>	Click to view/ input the following <ul style="list-style-type: none"> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>
<b>Signatures</b>	Click the Signature button to verify the signature of the customer/ bank if required.  The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.  If more than one signature is required, system should display all the signatures.
<b>Request Clarification</b>	Click the Request Clarification button to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
<b>Reject</b>	On click of Reject, user must select a Reject Reason from a list displayed by the system.  Reject Codes are: <ul style="list-style-type: none"> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul> Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
<b>Refer</b>	Select a Refer Reason from the values displayed by the system.  Refer Codes are: <ul style="list-style-type: none"> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul>

**Table 3-28 (Cont.) Additional Details - Action Buttons - Field Description**

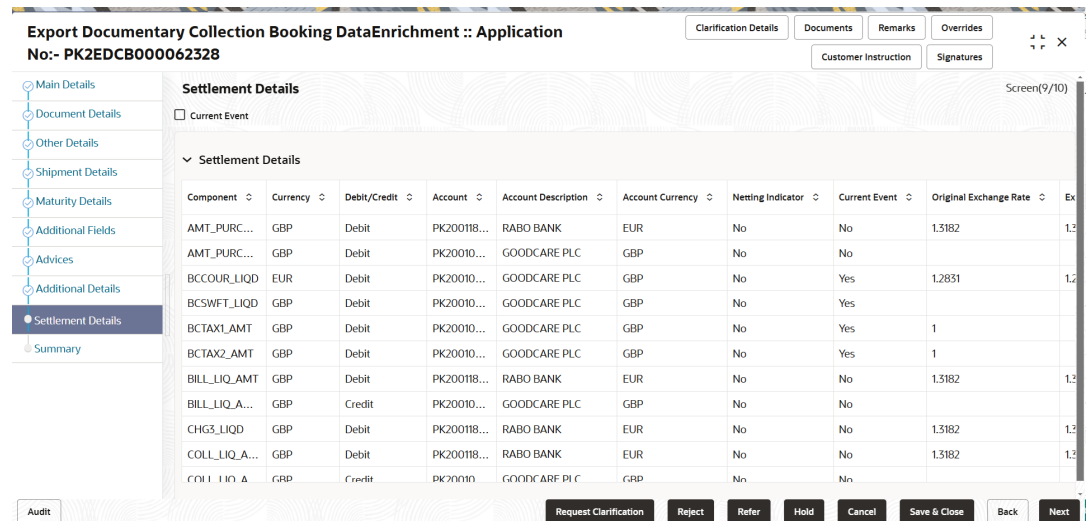

Field	Description
<b>Hold</b>	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.  This option is used, if there are any pending information yet to be received from applicant.
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Back</b>	Click the Back button, to go back to the previous screen.
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

### 3.3.9 Settlement Details

This topic provides the systematic instructions to capture the settlement details of export documentary collection booking request.

1. On **Settlement Details** screen, specify the fields.

**Figure 3-21 Settlement Details**

For more information on fields, refer to the field description table below.

**Table 3-29 Settlement Details – Field Description**

Field	Description
<b>Current Event</b>	Select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event
<b>Component</b>	This field displays the components based on the product selected
<b>Currency</b>	This field displays the default currency for the component.
<b>Debit/Credit</b>	This field displays the debit/credit indicators for the components.
<b>Account</b>	This field displays the account details for the components.
<b>Account Description</b>	This field displays the the description of the selected account.
<b>Account Currency</b>	This field displays the currency for all the items based on the account number.
<b>Netting Indicator</b>	This field displays the applicable netting indicator.
<b>Current Event</b>	This field displays the current event.
<b>Original Exchange Rate</b>	System displays the Original Exchange Rate as simulated in settlement details section from OBTF.
<b>Exchange Rate</b>	This field displays the exchange rate.
<b>Deal Reference Number</b>	This field displays the exchange deal reference number.

2. Click **Next**.

The task will move to next data segment. For more information refer [Summary](#).

<b>Hold</b>	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.  This option is used, if there are any pending information yet to be received from applicant.
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Back</b>	On click of Back, system moves the task back to previous data segment.
<b>Submit</b>	Task will get moved to next logical stage of Export Documentary Collection Booking. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.
<b>Checklist</b>	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit..

## 3.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export Collection Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

### Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage

Log in into OBTFPMCS application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

### Amount Bock Exception

The screenshot shows the Oracle Amount Block Exception Approval application interface. At the top, the title is "Export Documentary Collection Booking AmountBlock Exception Approval :: Application" with the application number "No:- PK2EDCB000051734". There are buttons for "Documents", "Remarks", "Overrides", and "Customer Instruction". The main content area is titled "Amount Block Exception" and contains a table with the following data:

Type	Contract Currency	Block Amount	Account	Branch	Account Currency	Block Ref No	Block Status	Block Status Details
Charge		140	PK20010440017	PK2	GBP		Not Initiated	

At the bottom of the interface, there are buttons for "Audit", "Reject", "Refer", "Hold", "Approve", and "Next".

This section will display the amount block exception details.

**Exception - Know Your Customer (KYC)**

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

1. Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions will be listed in your queue.
2. Open the task, to see summary tiles that display a summary of available updated fields with values.  
User can pick up a transaction and do the following actions:

**Approve**

- After changing the KYC status in the back end application (outside this process).

- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

**Summary**

**Figure 3-23 Exception - Know Your Customer (KYC) Summary**

The screenshot displays the 'KYC Exception Summary' screen for application PK2EDCB000062328. The interface is organized into a grid of data tiles. At the top, there are tabs for 'Documents', 'Remarks', and 'Overrides', along with a 'Customer Instruction' button. The main content area is titled 'Summary' and contains the following tiles:

- Main Details:** Booking Date: 2022-04-20, Submission Mode: Desk, Bill Amount: GBP 10000.

If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.</p>
<b>Back</b>	<p>Task moves to previous logical step.</p>

## 3.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

1. Log in into OBTFPMCS application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

### **Authorization Re-Key (Non-Online Channel)**

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Bill Currency Code
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
