Preface

- Purpose
- Audience

This document is intended for the following audience:

- Documentation Accessibility
- Critical Patches
- Diversity and Inclusion
- Structure

This manual is organized into the following chapters:

- Conventions
- Related Documents
- · Screenshot Disclaimer
- Acronyms and Abbreviations
- Basic Actions
- Symbols and Icons

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service **Export LC Transfer - Islamic** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to make sure effective security, as strongly recommended by Oracle Software Security Assurance.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Abbreviation	Description
ОВТГРМ	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 2 Common Action Buttons and its Definitions

Action Buttons	Description
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.
	Reject Codes are:
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Table 2 (Cont.) Common Action Buttons and its Definitions

Action Buttons	Description
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	R1- Documents missing
	R2- Signature Missing
	R3- Input Error
	R4- Insufficient Balance/Limits R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.
	This option is used, if there are any pending information yet to be received from applicant.
Cancel	Click Cancel to cancel the transaction input midway without saving any data.
Save & Close	Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	Click Next , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

Symbols and Icons

Oracle Banking Trade Finance Process Management Cloud Service

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service process.

Welcome to the Oracle Banking Trade Finance Process Management Cloud Service User Guide. This guide provides an overview on the OBTFPMCS application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPMCS:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

Benefits

Oracle Banking Trade Finance Process Management Cloud Service is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management Cloud Service enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Oracle Banking Trade Finance Process Management Cloud Service helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPMCS allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export LC Transfer

This chapter is documented to get familiar with the Export LC Transfer process of Oracle Banking Trade Finance Process Management Cloud Service.

Using the Export Transfer LC process, the user can register request for an Export LC Transfer received at the front desk.

This topic contains following sub-topics:

Common Initiation Stage

This topic provides the systematic instructions to initiate the **Export LC Transfer** request.

Registration

This topic provides the systematic instructions to initiate the Registration stage of **Export LC Transfer** request.

Scrutiny

This topic provides the systematic instructions to initiate the Scrutiny stage of Export LC Transfer Amendment request.

Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Transfer request.

Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

Customer - Acknowledgement Format

This topic helps you quickly get acquainted with the Customer Acknowledgement process.

Customer - Reject Advice

This topic helps you quickly get acquainted with the Customer - Reject Advice.

2.1 Common Initiation Stage

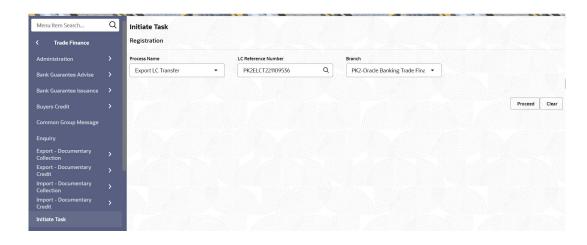

This topic provides the systematic instructions to initiate the **Export LC Transfer** request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On Home screen, click Trade Finance. Under Trade Finance, click Initiate Task.

The **Initiate Task** screen appears.

Figure 2-1 Initiate Task

On Initiate Task screen, specify the fields.

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
LC Reference Number	Click Search to search and select the required LC reference number.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 2-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage
Clear	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

2.2 Registration

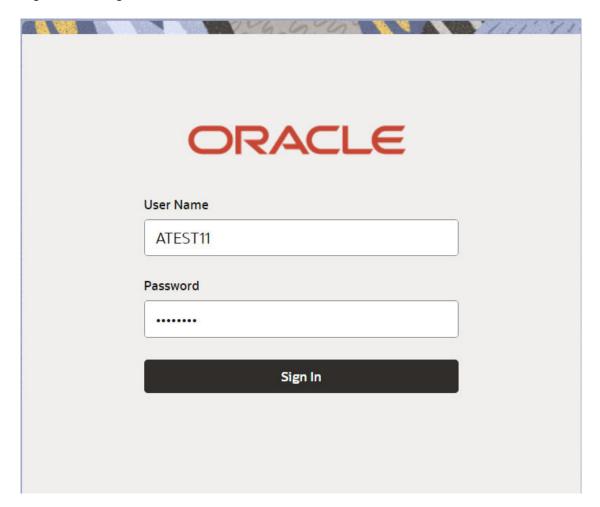

This topic provides the systematic instructions to initiate the Registration stage of **Export LC Transfer** request.

During registration stage, the user can register a request for an Export LC Transfer received at the front desk (as an application received physically/received by mail/fax).

User can capture the basic details of the response, check the signature of the signatory from the advising bank and upload the related documents. On submit of the request, the customer should be notified with acknowledgment and the request should be available for an LC expert to handle in the next stage.

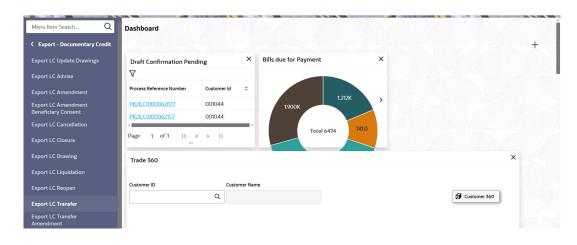

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 2-2 LogIn Screen

- 1. On Home screen, click Trade Finance. Under Trade Finance, click Export Documentary Credit.
- 2. Under Export Documentary Credit, click Export LC Transfer.

Figure 2-3 Export LC Transfer

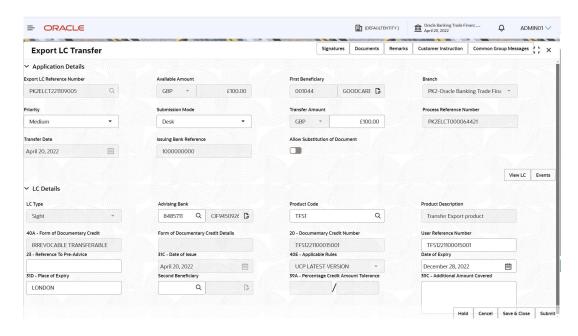

The **Export LC Transfer** screen appears.

The Export LC Transfer - Registration stage has two sections Application Details and LC Details. Let's look at the details of Registration screens below:

Figure 2-4 Export LC Transfer - Registration - Application Details

On Export LC Transfer - Registration - Application Details screen, specify the fields.

Note:

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-3 Export LC Transfer - Registration - Application Details - Field Description

Field	Description
Export LC Reference Number	Specify the transfer LC reference number. Alternatively, click Search to search and select the transfer LC reference number. In the lookup, user can search giving Transfer LC Reference Number, Beneficiary, Currency, Amount and User Reference Number. Based on the search result, select the applicable transfer LC reference number.
Available Amount	Read only field. Available amount along with currency for Transfer is auto populated. It must be less than or equals to LC amount.

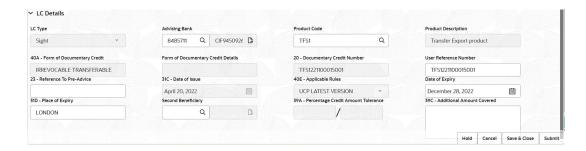

Table 2-3 (Cont.) Export LC Transfer - Registration - Application Details - Field Description

Field	Description
First Beneficiary	Read only field. First Beneficiary details is defaulted from the underlying Export LC.
Branch	Read only field.
	Branch details is auto-populated from LC details.
Priority	System populates the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority.
	User can change the priority populated any time before submit.
Submission Mode	System populates the submission mode of Export LC Transfer request.
	By default the submission mode will have the value as 'Desk'.
	 Desk - Request received through Desk FAX - Request received through Email - Request received through Email Courier - Request received through Courier
Transfer Amount	Specify the Export LC transfer amount. Transfer amount plus tolerance cannot be more than value available in underlying Export LC. User cannot change the currency, it will be default from the underlying Export LC.
Process Reference	Read only field.
Number	Unique sequence number for the transaction.
	This is auto generated by the system based on process name and branch code.
Transfer Date	Read only field.
	By default, the application displays the branch's current date.
Customer Reference Number	Customer reference number is defaulted from the underlying Export LC.
	User can change the Customer reference number.
Allow Substitution of Document	Enable the option to allow the substitution of the export documents received from transferee with the documents from beneficiary during drawing.

LC Details

Details in this screen displays the data from the LC issued.

4. On Export LC Transfer - LC Details screen, specify the fields.

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-4 Export LC Transfer - Registration - LC Details - Field Description

Field	Description
LC Type	Read only field. The LC type value is auto populated from Export LC. The values can be: Sight Usance Multi Tenor
Advising Bank	Specify the advising bank name or click Search to search and select the advising bank from the lookup. System validates whether the Advising Bank is RMA compliant, if not system should display an error message.
Product Code	Read only field. Product Code of the underlying Export LC is displayed. Note: This field is enabled for product code selection from the lookup, if Use Transfer Product flag is set as "Yes" in the bank parameter.
Product Description	Read only field. This field displays the description of the product of the underlying Export LC.
40A - Form of Documentary Credit	Read only field. The type of LC (Documentary Credit) is auto populated from Export LC.
Form of Documentary Credit Details	Specify the value for form of documentary credit details.

Table 2-4 (Cont.) Export LC Transfer - Registration - LC Details - Field Description

Field	Description
Documentary Credit Number	Read only field. Documentary credit number is generated from the back office and displayed in the application number.
User Reference Number	System defaults the user reference number based on the product code.
	The user can change the user reference number.
Reference To Pre-Advice	This field is not applicable.
Date of Issue	Read only field. Application will default the branch's current date in date of issue. User cannot change the defaulted date. Application will populate the Date of Issue field with branch date on approval if date of approval is later than date of Registration.
Applicable Rules	Read only field. The applicable rules for the LC is auto populated from Export LC.
Date of Expiry	Date of expiry is defaulted from the underlying Export LC. User can change the defaulted date of expiry. On change of values, relevant validations will happen. Date of Expiry of Transferred LC cannot be later than the Expiry Date of the underlying Export LC.
Place of Expiry	Place of expiry is defaulted from the underlying Export LC. User can change the defaulted place of expiry. On change of values, relevant validations will happen.
Second Beneficiary	Click Search to search and select the second beneficiary from the look-up based on Party ID/Party Name. The user can select the beneficiary for Export LC Transfer. If beneficiary is not a customer of the bank, then choose WALKIN customer id and provide the beneficiary details. If beneficiary is a customer and KYC status is not valid, then system will display alert message.
Percentage Credit Amount Tolerance	Tolerance Amount to default from the underlying Export LC. User can change the value of tolerance amount.
Additional Amount Covered	Specify any additional amount included in export LC.

5. Click Submit.

The task will move to next logical stage of Export LC Transfer. For more information on action buttons, refer to the field description table below.

Table 2-5 Export LC Transfer - Registration - Action Buttons - Field Description

Field	Description
Documents	Upload the documents received under the Export LC Transfer. System displays the mandatory and optional documents. If mandatory documents are not uploaded, system should display an error on submit. The possible documents submitted under an Export LC Transfer request are:
Remarks	Specify any additional information regarding the Export LC Transfer. This information can be viewed by other users handling the request.

Table 2-5 (Cont.) Export LC Transfer - Registration - Action Buttons - Field Description

Field	Description
Customer Instruction	Click to view/ input the following. Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.
View LC	Click to view the latest LC values displayed in the respective fields. All fields displayed in LC details section are read only fields.
Events	Click to view the details of the details of LC, amendments (if any), drawings (if any) and liquidations if any under the LC in chronological sequence from LC drawing.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancels the Export LC Transfer task. Details entered will not be saved and the task will be removed
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.
Submit	The task will move to next logical stage of Export LC Transfer. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.

Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

 Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service.

2.2.1 Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

In Oracle Banking Trade Finance Process Management Cloud Service, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/ queried in the Process flow stage screens to link with the task by using the Document ID.

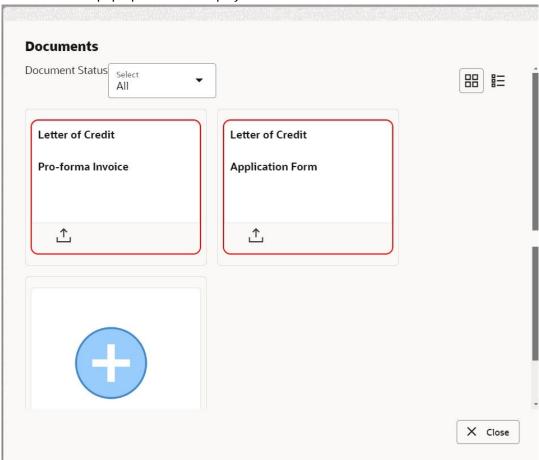

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

Specify User ID and Password, and navigate to Registration screen.

1. On the header of **Registration** screen, click, **Documents**.

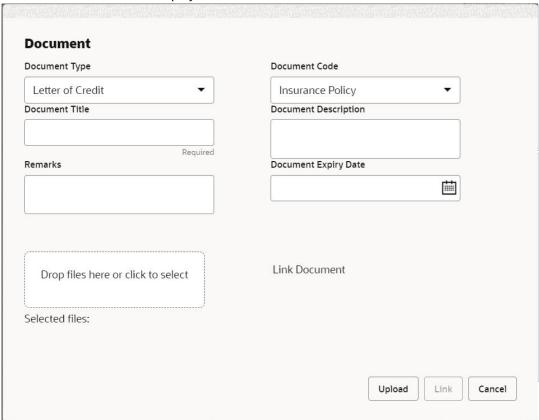

The **Document** pop-up screen is displayed.

2. Click the Add Additional Documents button/ link.

The **Document** screen is displayed.

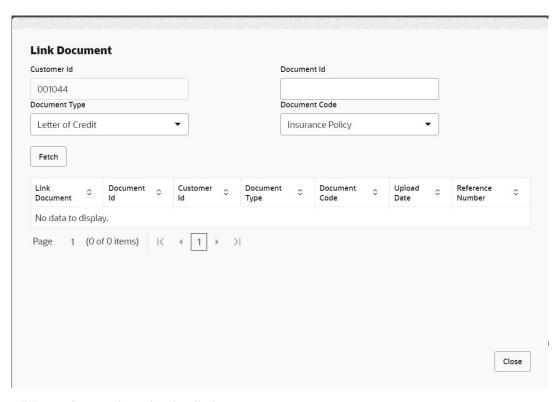

Field	Description
Document Type	Select the document type from list. Indicates the document type from metadata.
Document Code	Select the document Code from list. Indicates the document Code from metadata.
Document Title	Specify the document title.
Document Description	Specify the document description.
Remarks	Specify the remarks.
Document Expiry Date	Select the document expiry date.
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.

3. Select the document to be uploaded or linked and click the **Link Document** link.

The link **Document** pop up screen is displayed.

The value selected in **Document Type** and **Document Code** of **Document** screen are defaulted in the **Link Document Search** screen.

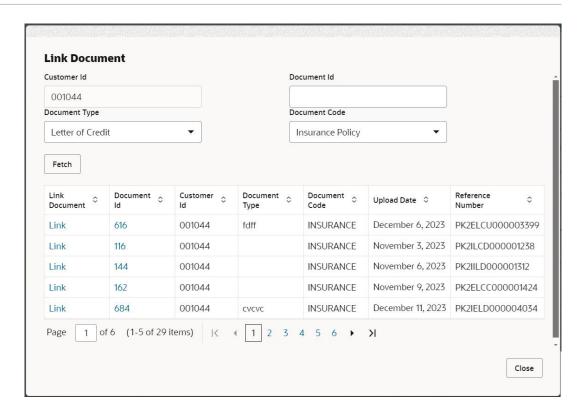

4. Click **Fetch** to retrieve the details from DMS.

System displays all the documents available for the given **Document Type** and **Document Code** for the customer.

Field	Description
Customer ID	This field displays the transaction Customer ID.
Document ID	Specify the document ID.
Document Type	Select the document type from list.
Document Code	Select the document Code from list.
Search Result	
Document ID	This field displays the document ID from metadata.
Customer ID	This field displays the transaction customer ID.
Document Type	This field displays the document type from metadata.
Document Code	This field displays the document code from metadata.
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.
Upload Date	The field displays the upload date of the document.
Reference Number	The field displays the reference number of the document.

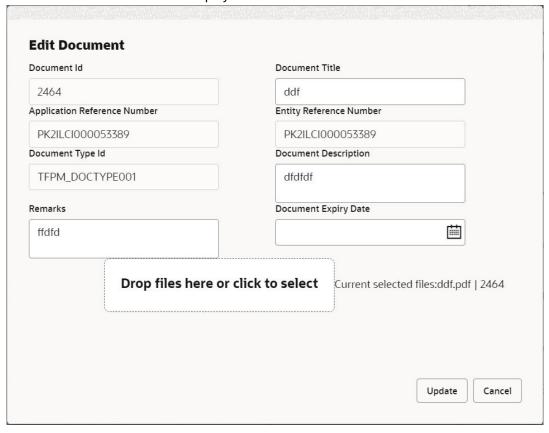

5. Click **Link** to link the particular document required for the current transaction.

Post linking the document, the user can View, Edit and Download the document.

Click Edit icon to edit the documents.

The **Edit Document** screen is displayed.

2.2.2 Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in Oracle Banking Trade Finance Process Management Cloud Service upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to Oracle Banking Trade Finance Process Management Cloud Service.
- Task is initiated in Oracle Banking Trade Finance Process Management Cloud Service, Customer ID is captured/populated and Process Reference Number is generated.
- Customer Maintenance details are replicated from OBTF to Oracle Banking Trade Finance Process Management Cloud Service.
- 2. In Oracle Banking Trade Finance Process Management Cloud Service, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online". In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder.
- 3. In case submission mode is not "Online", the system will validates if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
- 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

2.3 Scrutiny

This topic provides the systematic instructions to initiate the Scrutiny stage of Export LC Transfer Amendment request.

At Scrutiny stage, user can scrutinize the Export LC Transfer Amendment request. As part of Scrutiny, the user enters the basic details of the Export LC transfer Amendment request and can verify if the request can be processed further.

Non-Online Channel - Export LC Transfer Amendment request that were received at the desk will move to Scrutiny stage post successful Registration. The requests will have the details entered during the Registration stage.

Online Channel - Requests that are received via online channels like trade portal, external system and SWIFT are available directly for further processing from Scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage should be auto populated.

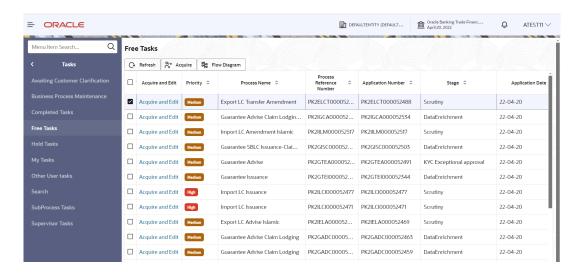

Do the following steps to acquire a task currently at Scrutiny stage:

Specify **User ID** and **Password**, and login to **Home** screen.

- On Home screen, click Task.
- Under Task, click Free Task.

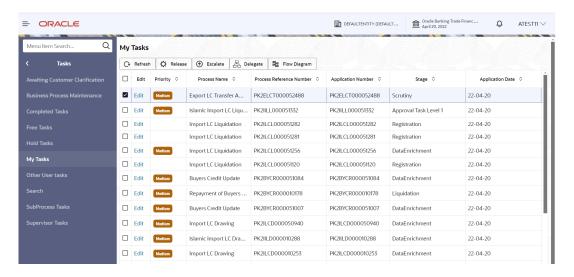

Figure 2-5 Free Task

The **Free Task** screen appears.

- 3. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.
- 4. The acquired task will be available in **My Tasks** tab. Click **Edit** to scrutinize the registered task or provide input for Scrutiny stage.

Figure 2-6 My Task

Let's look at the details for scrutiny stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

The Scrutiny stage has the following hops for data capture:

Main Details

This topic provides the systematic instructions to initiate the main details of Scrutiny stage of Export LC Transfer Amendment request.

Availability

This topic provides the systematic instructions to capture the availability details.

Payment

This topic provides the systematic instructions to initiate the Payment in Scrutiny stage of Export LC Transfer request.

Additional Fields

This topic provides the systematic instructions to capture the additional fields.

Additional Details

This topic provides the systematic instructions to capture the additional details in Scrutiny stage of Export LC Transfer process.

Summary

This topic provides the systematic instructions to view the summary details in Scrutiny stage of **Export LC Transfer** request.

2.3.1 Main Details

This topic provides the systematic instructions to initiate the main details of Scrutiny stage of Export LC Transfer Amendment request.

Main details section has two sub section as follows:

- Application Details
- Transfer LC Details.

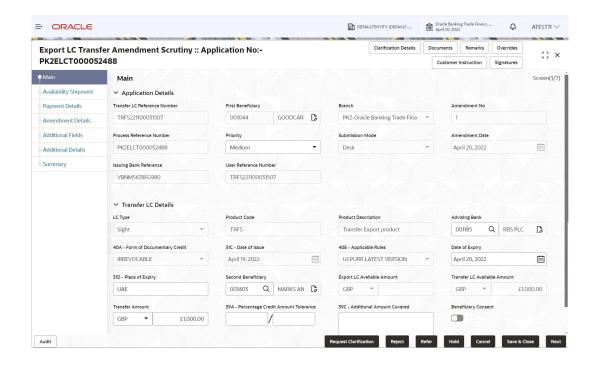

Application Details

This section provides a quick snapshot of details of LC. User can enter the details in the following fields. Some of the fields that are already having value from registration/online channels will not be editable.

Audit

This button provides information about user initiated the transaction, initiated date, stage wise detail etc.

For more information on audit, refer to the field description table below.

Table 2-8 Audit - Field Description

Field	Description
Application No.	This field displays the appliation number of the process.
Branch Code	This field displays the branch code.
Initiated Date	This field displays the date on which process is initiated.
Initiated By	This field displays the user ID of the user who had initiated the process.
Process Name	This field displays the name of the process which is initiated.
S. No	This field displays the serial number of the audit record.

Table 2-8 (Cont.) Audit - Field Description

Field	Description
Stage Name	This field displays the current stage of the process.
Completed Time	This field displays the time on which the audit of the current stage is completed.
Completed By	This field displays the user ID of the user who had completed the audit.
Outcome	This field displays the outcome of the audit.

2. Click Next.

The task will move to next data segment.

Table 2-9 Main Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	Upload the required documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following. Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Signatures	Click the Signature button to verify the signature of the customer/bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.

Table 2-9 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.
	Reject Codes are:
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	R1- Documents missing
	R2- Signature MissingR3- Input Error
	R4- Insufficient Balance/Limits
	R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancels the Export LC Transfer task. Details entered will not be saved and the task will be removed
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.
	This option will not submit the request.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.

2.3.2 Availability

This topic provides the systematic instructions to capture the availability details.

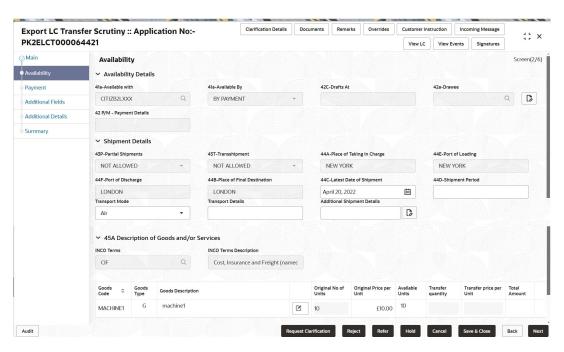

In this section user can input the Availability details for Export LC Transfer. In case the request is received through online channel, the user can verify the details populated. Table 2-17 (Cont.) Summary - Action Buttons - Field Description

Field	Description
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.
	This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Back	Clicking on Back button, takes the user to the previous screen.
Submit	Task will get moved to next logical stage of Export LC Transfer. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided. n case of duplicate documents' system will terminate the process after handing off the details to back office.

2.4 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Transfer request.

As a part of Data Enrichment stage, User can enter/update basic details of the incoming request.

Non Online Channel - Export LC Transfer request that were received at the desk will move to DE stage post successful registration and scrutiny stage. The transaction will have the details entered during the registration/scrutiny stage.

Online Channel - Request that are received via online channels like trade portal, external system and SWIFT are available directly for further processing in OBTFPM from scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage would be auto populated.

The user can select the respective field and will be allowed to edit/update the field.

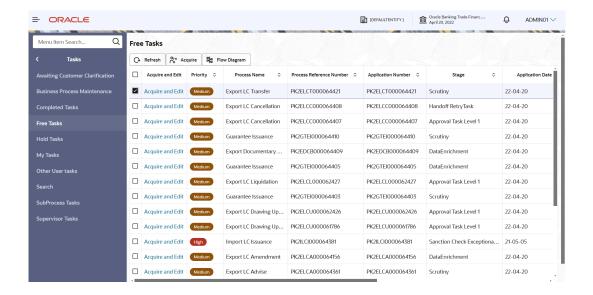

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task which completed the registration and currently at Data enrichment stage.

Specify **User ID** and **Password**, and login to **Home** screen.

- On Home screen, click, Task.
- Under Task, click Free Task.

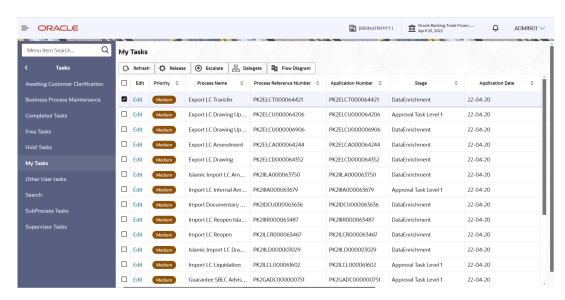

Figure 2-14 Free Task

The **Free Task** screen appears.

- Select the appropriate task and click Acquire & Edit to edit the task or click Acquire to edit the task from My Tasks.
- 4. The acquired task will be available in **My Tasks** tab. Click **Edit** to provide input for Data Enrichment stage.

Figure 2-15 My Task

The Data Enrichment stage has the following hops for data capture:

- Main Details
- Availability
- Payment

- Document and Conditions
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the fields in Data Enrichment stage. Some of the fields that are already having value from Registration/ online channels may not be editable.

Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Transfer request.

Availability

This topic provides the systematic instructions to capture the availability and shipment details.

Payment

This topic provides the systematic instructions to initiate the Payment in Data Enrichment stage of Export LC Transfer request.

Document and Conditions

This topic provides the systematic instructions to capture the details of the documents received.

Additional Fields

This topic provides the systematic instructions to capture the additional fields.

Advices

This topic provides the systematic instructions to capture the advices details of Export LC Transfer process.

Additional Details

This topic provides the systematic instructions to capture the additional details in Data Enrichment stage of Export LC Transfer process.

Settlement Details

This topic provides the systematic instructions to capture the settlement details of Export LC Transfer request.

Summary

This topic provides the systematic instructions to view the summary details in Data Enrichment stage of Export LC Transfer request.

2.4.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Transfer request.

Main details section has two sub section as follows:

- Application Details
- LC Details.

Application Details

 On Data Enrichment - Main Details screen, specify the fields that were not entered at Registration stage.

Figure 2-16 Data Enrichment - Main Details

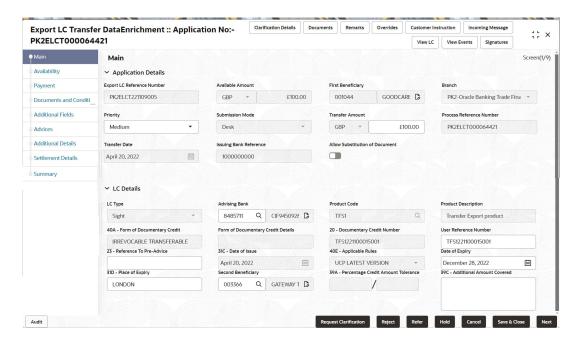

Table 2-18 Export LC Transfer - Main Details - Application Details - Field Description

Field	Description
Export LC Reference Number	Read only field.
	System displays the export LC reference number to be transferred.
Available Amount	Read only field.
	System displays the available amount from earlier stages.
First Beneficiary	Read only field.
	System displays the name of the transferor-applicant from the earlier stages.
Branch	Read only field.
	Branch details is auto-populated from LC details.

Table 2-18 (Cont.) Export LC Transfer - Main Details - Application Details - Field Description

Field	Description
Priority	System populates the priority of the customer based on priority maintenance. Values are High, Medium and Low. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated.
Submission Mode	Read only field.
	System populates the submission from the earlier stages.
Transfer Amount	System defaults the export LC transfer amount from the earlier stages.
Process Reference Number	Read only field.
Number	Unique sequence number for the transaction.
	This is auto generated by the system based on process name and branch code.
Transfer Date	Read only field. System defaults the branch's current date as LC transfer date.
Customer Reference Number	Customer reference number is defaulted from the underlying Export LC.
	User can change the Customer reference number.
Allow Substitution of Document	Enable the option to allow the substitution of the export documents received from transferee with the documents from beneficiary.

LC Details

The fields listed under this section are same as the fields listed under the **LC Details** section in **Scrutiny** stage. During Registration, if user has not captured input, then user can capture the details in this section.

Figure 2-17 LC Details

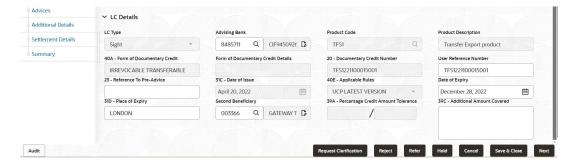

Table 2-19 Export LC Transfer - LC Details - Field Description

Field	Description
LC Type	Read only field. System displays the value used for LC Type as per the latest LC details.
Advising Bank	Specify the advising bank name or click Search to search and select the advising bank from the lookup.
Product Code	Read only field. Product Code of the underlying Export LC is displayed.
	Note: This field is enabled for product code selection from the lookup, if Use Transfer Product flag is set as "Yes" in the bank parameter.
Product Description	Read only field.
	This field displays the description of the product of the underlying Export LC.
40A - Form of	Read only field.
Documentary Credit	System auto-populates the details from previous operation.
Form of Documentary Credit Details	Read only field.
Credit Details	System auto-populates the details from underlying Export LC
Documentary Credit Number	Read only field. This field displays the Documentary Credit Number of the selected LC.
User Reference Number	System defaults the user reference number based on the product code.
	The user can change the user reference number.
Reference To Pre-Advice	This field is not applicable.
Date of Issue	Read only field. Application will default the branch's current date in this field.
Applicable Rules	Read only field. The applicable rules for the LC is auto populated from previous operation. Default rule is UCP Latest Version .
Date of Expiry	Date of expiry is defaulted as per the latest LC details. User can change the defaulted date of expiry.
Place of Expiry	Place of expiry is defaulted as per the latest LC details. User can change the defaulted place of expiry.
Second Beneficiary	Second beneficiary name is defaulted from the Registration stage as selected for Export LC Transfer. In case of online request, system should auto-populate the details. User cannot change the populated value.

Table 2-19 (Cont.) Export LC Transfer - LC Details - Field Description

Field	Description
Percentage Credit Amount Tolerance	Tolerance Amount to default from the underlying Export LC. User can change the value of tolerance amount.
	In case of online request, system should auto-populate the details. User cannot change the populated value.
Additional Amount Covered	Specify any additional amount included in export LC. In case of online request, system should auto-populate the details. User cannot change the populated value.

Click Next.

The task will move to next data segment. For more information refer Availability. For more information on the action buttons, refer Table 2-9 in Main Details section of Scrutiny stage.

2.4.2 Availability

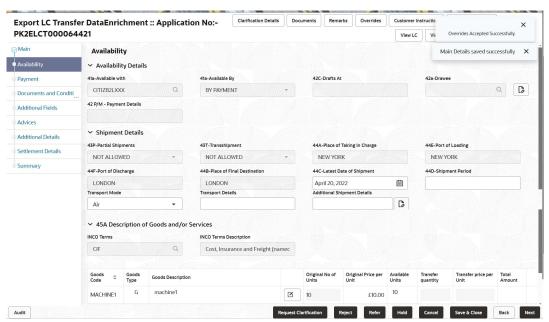

This topic provides the systematic instructions to capture the availability and shipment details.

User can update/review the Availability details for Export LC Transfer.

DE user can select the respective field and should be allowed to edit/update the field. DE user can change only some of the fields received from online channels.

1. On Availability screen, specify the fields.

Figure 2-18 Availability

For more information on fields, refer Table 2-10 of Scrutiny stage.

Click Next.

The task will move to next data segment. For more information refer Payment.

For more information on action buttons, refer Table 2-11 of Scrutiny stage.

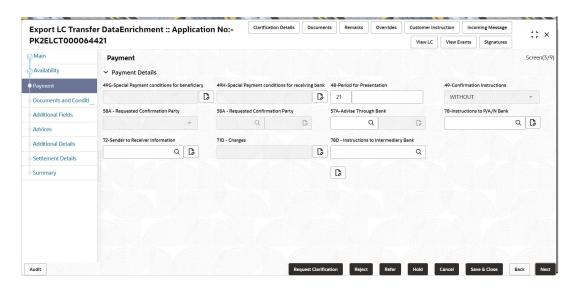

2.4.3 Payment

This topic provides the systematic instructions to initiate the Payment in Data Enrichment stage of Export LC Transfer request.

Data Enrichment user can verify and enter the basic details available in the Export LC Transfer request.

1. On Data Enrichment - Payment Details screen, specify the fields.

Figure 2-19 Data Enrichment - Payment Details

For more information on fields, refer Table 2-12 of Scrutiny stage.

Click Next.

The task will move to next data segment. For more information refer Document and Conditions

For more information on action buttons, refer Table 2-13 of Scrutiny stage.

2.4.4 Document and Conditions

This topic provides the systematic instructions to capture the details of the documents received.

User can enter/ update Documents and conditions details for Export LC Transfer. The below fields can be modified in DE stage.

- Document Details
- Additional Conditions

Document Details

Documents details should default from underlying LC. If Substitute documents allowed is checked, system to give a warning message" Substitution of Documents allowed, please verify the documents".

Online Channel - System will default the details received in the Description column. Based on the details populated, user can pick corresponding values for document code, originals and copy.

Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both Bill Of lading" and 'Airway Bill' are chosen. Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both Bill Of lading" and 'Airway Bill' are chosen

1. On **Document Details** screen, specify the fields.

Figure 2-20 Data Enrichment - Document Details

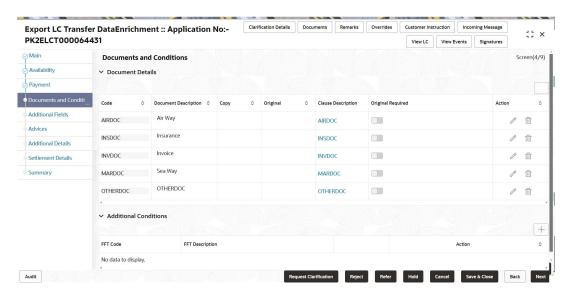

Table 2-20 Document Details - Field Description

Field	Description
Document Code	System defaults the document code. User can add the document code by clicking the plus icon.Click Search to search and select the document code based on the document received.
	User can add or delete the code by deleting the line on the grid.
Document Description	System dispalys the document description based on the document code from the latest LC.
Сору	System defaults the number of duplicate copies of documents as required in LC. User can edit the actual copies received.
	Specify the number copies received.

Table 2-20 (Cont.) Document Details - Field Description

Field	Description
Original	System defaults the number of documents in original as required in LC. User can edit the actual originals received.
	Specify the number of original documents received.
Clause Description	System populates the description of the clause required as per LC. User can view the description of the clause by clicking the link in the 'Document Clause' column.
Original Required	System defaults the value to display whether original document is required or not. Enable the option, if original document is required.
Action	Click Edit icon to edit the document details. Click Delete icon to delete the document details.

Additional Conditions

Online Channel - System will default the details received in the description column. System will parse the additional conditions required field into multiple line items based on line delimiter (+) and shall populate each line item as a separate description. User can read the description and make any changes required to the description, also must be able to add more conditions.

Non Online Channel - User can use FFT to capture additional conditions and can edit the description populated from FFT. User should also be able to add additional FFT.

For more information on fields, refer to the field description table below.

Table 2-21 Additional Conditions - Field Description

Field	Description
FFT Code	Click Search to search and select the FFT code from the look up. The user can click + to add multiple Additional Conditions.
FFT Description	This field displays the description of the FFT code based on the selected FFT code.
Action	Click Edit icon to edit the additional condition details. Click Delete icon to delete the additional condition details.

2. Click Next.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

Table 2-22 Document Details - Action Buttons - Field Description

Field	Description
Documents	View/Upload the required document.
	Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Specify any additional information regarding the export lc Transfer. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
	·
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	 Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	This button displays the multiple messages (MT760 + up to 7 MT761. In case of MT798, the User can click and view the MT798 message(770,700/701).
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.
	In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.
View LC	Click to view the latest LC values displayed in the respective fields. All fields displayed in LC details section are read only fields
View Events	Click to view the details of the details of LC , amendments (if any), drawings (if any) and liquidations if any under the LC in chronological sequence from LC drawing.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.
	Reject Codes are:
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Landing on the additional tab, the default commission, charges and tax if any will get populated.

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Charge Details are auto-populated from the back-end system.

For more information on fields, refer to the field description table below.

For more information on fields, refer Table 2-15of Scrutiny stage.

4. Click **Save and Close** to save the details and close the screen.

Preview Messages

The bank user can view a preview of the message and advice simulated from back office which is based on the guarantee Claim captured in the previous screen.

A bank user can share the Draft SWIFT message to the customer through email, before the actual transmission of SWIFT message to the Advising Bank.

Note:

Preview to have MT 720 as SWIFT and other advices as Mail Advice. This needs to be mentioned under Preview messages heading.

Draft Confirmation

The user can view the draft LC message (outgoing MT720 SWIFT message format) being displayed on the preview message text box.

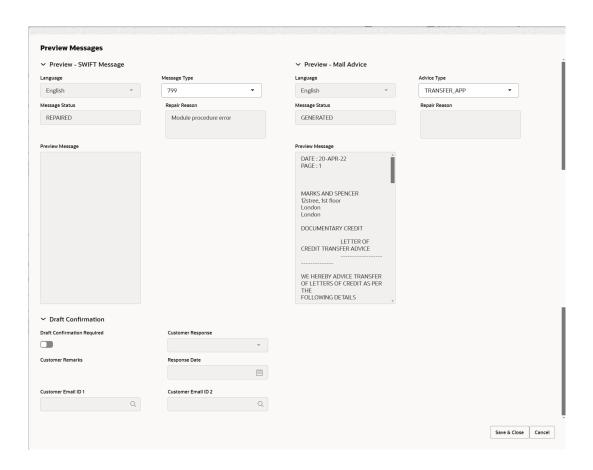

If the user wants to send a copy of the draft LC for customer confirmation, the same can be done by choosing the customer response slider as 'Yes'. On submit of the data enrichment stage the mail message to the customer will be sent.

The OBTFPM user can send the draft of the message to the registered email id of the corporate customer as an attachment containing PDF. The PDF sent to the corporate customer is protected by a password. Password to be generated with first four digits of Customer Name and last four digits of Customer Number.

The task will not move to approval but to 'Pending customer response stage. Upon receipt of customer's confirmation, the transaction moves to approval.

In case the customer asks for changes, the transaction will move to data enrichment and after necessary changes, it will move to approval.

For more information on fields, refer to the field description table below.

Table 2-26 Preview - Field Description

Field	Description
Preview SWIFT Message	This section displays the Preview SWIFT Message details.
Language	Read only field. English is set as default language for the preview.
Message Type	Select the message type from the drop down. User can choose to see preview of different message like MT 700, MT 740 and MT 701.
Message Status	Read only field. This field displays the message status of draft message of liquidation details.
Repair Reason	Read only field. This field displays the message repair reason of draft message of liquidation details.
Preview Message	This field displays a preview of the draft message.
Preview Mail Device	This section displays the Preview Mail Device details.
Language	Read only field. English is set as default language for the preview.
Advice Type	Select the advice type.

2.5 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

As per regulatory requirement, all tasks are scrutinized for KYC, Compliance and Sanctions. Task. The checks to external system/internal system is initiated after the DE Stage. The amount Block earmark and Limit Earmarks if applicable are also initiated after the DE stage.

If a negative response is received for any of the calls, the task lands in respective exceptional queue which require further manual handling/approval.

Amount Block Exception Approval

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPMCS application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number "to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPMCS) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block. Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off

- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

2.6 Multi Level Approval

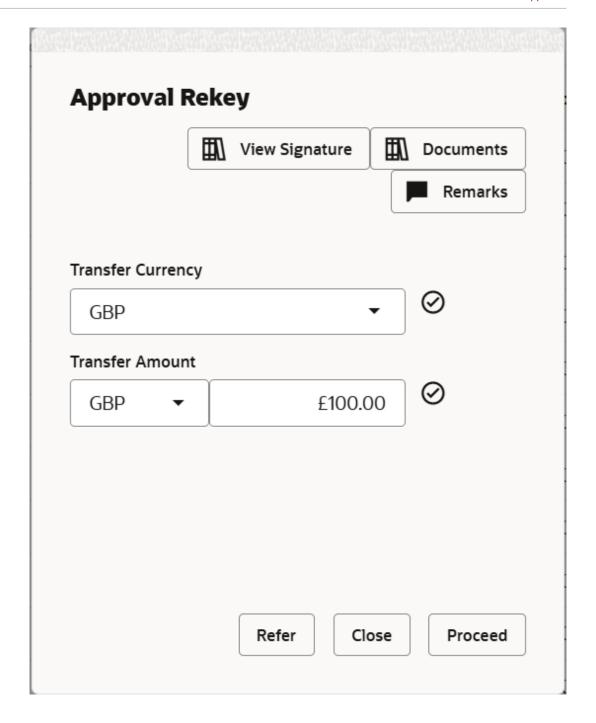

This topic helps you quickly get acquainted with the Multi Level Approval process.

This stage allows the approver user to review and approve the Export LC Transfer transaction.

- 1. Log in into OBTFPMCS application and on **Home** screen, click, **Task**.
- 2. Under Task, click Free Task.
- 3. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.
- 4. The acquired task will be available in **My Tasks** tab. Click **Edit** to approve the task.

The **Approval Re-Key** pop-up screen appears.

Figure 2-30 Approval Re-Key

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

 Open the task and re-key some of the critical field values from the request in the Approval Re-Key screen.

Some of the fields below will dynamically be available for re-key.:

Transfer Currency

- Transfer Amount
- Expiry Date

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

6. Click **Proceed** to proceed for the approval.

The **Approval Summary** screen appears. The user can view the Summary tiles which displays list of important fields with values.

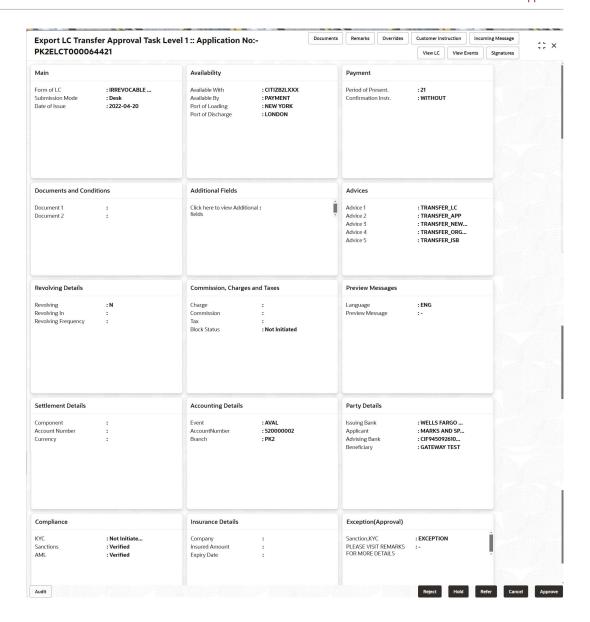

Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Approval Summary

Tiles Displayed in Summary:

- Main Details User can view and modify the application details and Export LC details.
- Availability User can view already captured availability and shipment details. User can modify the details, if required.
- Documents and Conditions: User can to view the details of Documents and Conditions.
- Payment User can view all details related to payments. User can modify the details, if required.
- Additional Fields: Banks can configure the additional fields during implementation.
- Advices: User should be able to view the advice details.
- Revolving Details: User can drill down into revolving details tile to see more information on revolving LC if applicable.
- Commission, Charges and Taxes: User can see the details provided for charges. User should be able to update the details if required.

- Party Details: User can see the party details like beneficiary, advising bank etc.
