Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service **Export LC Transfer Cancellation - Islamic** process.

Audience

This user guide is intended for the central administrator of the Bank who controls the system and application parameters and ensures smooth functionality and flexibility of the banking application.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Conventions

The following text conventions are used in this document:

| Convention | Meaning |
|-----------------|--|
| boldface | Boldface type indicates graphical user interface elements associated with an action, or terms defined in text. |
| <i>italic</i> | Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values. |
| monospace | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. |

Related Documents

Formore information on any related features, you can refer to the following documents:

- Oracle Banking SecurityManagement System User Guide
- GettingStarted User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1

Oracle Banking Trade Finance Process Management Cloud Service

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service process.

Welcome to the Oracle Banking Trade Finance Process Management Cloud Service User Guide. This guide provides an overview on the OBTFPMCS application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPMCS:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

Oracle Banking Trade Finance Process Management Cloud Service is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management Cloud Service enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

Oracle Banking Trade Finance Process Management Cloud Service helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPMCS allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2

Export LC Transfer Cancellation - Islamic

This User Manual is documented to get familiar with the Export LC Transfer Cancellation - Islamic process of Oracle Banking Trade Finance Process Management Cloud Service.

Export LC Transfer Cancellation process enables the user to cancel the active Transfer LC which had been already advised:

An active Transfer LC Cancellation request received from First beneficiary can be cancelled in case of below scenarios:

- If further drawings are not expected/required under a Transfer LC.
- Request has been received for Parent Export LC cancellation; hence any issued Transfer LC has to be cancelled as well prior to cancellation of the parent Export LC.

The design, development and functionality of the Islamic Export LC Transfer Cancellation process flow is similar to that of conventional Export LC Transfer Cancellation process flow.

In the following sections, let's look at the details for Export LC Transfer cancellation- Islamic process.

This topic contains following subtopics:

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the **Export LC Transfer Cancellation - Islamic** request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of **Export LC Transfer Cancellation - Islamic** request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC transfer Cancellation - Islamic request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.
- [Reject Approval](#)
This topic helps you quickly get acquainted with the Reject Approval process.

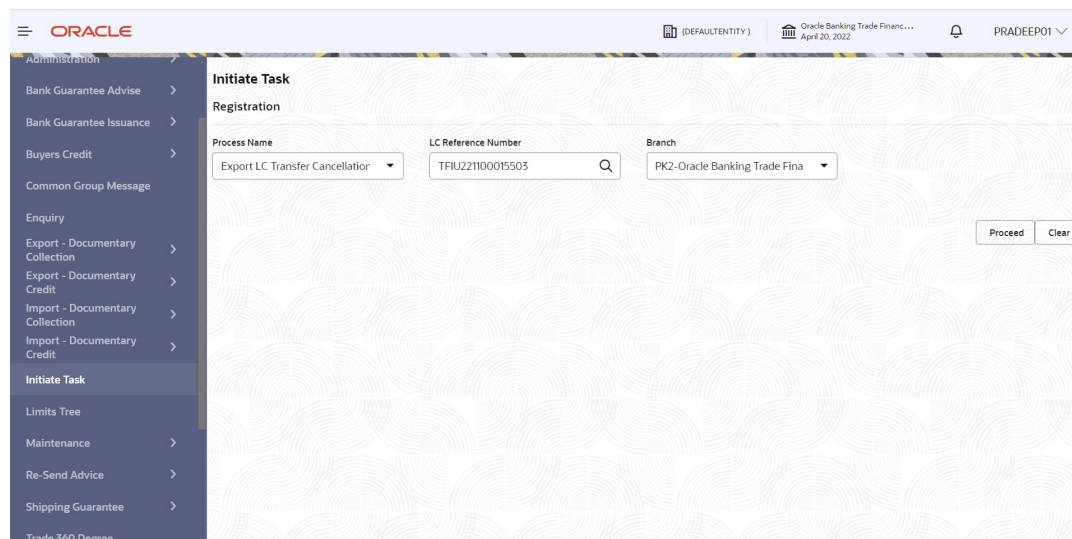

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the **Export LC Transfer Cancellation - Islamic** request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.
The **Initiate Task** screen appears.

Figure 2-1 Initiate Task

Table 2-15 Charge Details - Field Description

| Field | Description |
|---------------------------|--|
| Commission Details | This section displays the commission details. By default, all the charges, commission and margin are collected from the counter-party. |
| Component | Displays the commission component. |
| Rate | Displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field. |
| Mod. Rate | From the default value, if the rate is changed the value gets updated in this field. |
| Ccy | Displays the currency in which the commission have to be collected. |
| Amount | Displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPMCS. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field. |

Table 2-15 (Cont.) Charge Details - Field Description

| Field | Description |
|-----------------------|---|
| Modified | From the default value, if the amount is changed, the value gets updated in the modified amount field. |
| Defer | Switch to  for charges/commissions has to be deferred and collected at any future step. |
| Waive | Switch to  to waive the charges/commissions. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder. |
| Split | Switch to  for splitting the Commission. Switch to  if splitting of commission is not required. |
| Charge Party | Charge party is 'Applicant' by default. User can change the value to Beneficiary. |
| Settl. Account | The settlement account. |
| Amend | Displays if the field is amendable or not. |
| Charge Details | This section displays the charge details. |
| Component | Displays the charge component type. |
| Tag Currency | Displays the tag currency in which the charges have to be collected. |
| Tag Amount | Displays the tag amount that is maintained under the product code. |
| Currency | Displays the currency in which the charges have to be collected. |
| Amount | This field displays the amount that is maintained under the product code. |
| Modified | From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field. |
| Billing | Switch to  to make the details available for billing engine for further processing, if charges are handled by separate billing engine. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPMCS. The user can not enable/disable the option, if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled. |
| Defer | Switch to  to defer the charges and collect at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPMCS. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation. |

2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export LC Transfer Cancellation - Islamic request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPMCS application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPMCS) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block. Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off
- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

1. Log in into OBTFPMCS application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions will be listed in your queue.
2. Open the task, to see summary tiles that display a summary of available updated fields with values.
User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary**Figure 2-14 Know Your Customer (KYC) Exception**
