# Preface

- **Purpose**  
This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service **Guarantee Advise Cancellation - Islamic** process.
- **Audience**  
This document is intended for the following audience:
- **Documentation Accessibility**
- **Critical Patches**
- **Diversity and Inclusion**
- **Structure**  
This manual is organized into the following chapters:
- **Conventions**
- **Related Documents**
- **Screenshot Disclaimer**
- **Basic Actions**
- **Symbols and Icons**

## Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service **Guarantee Advise Cancellation - Islamic** process.

## Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

## Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

## Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

## Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

**Table 1 Common Action Buttons and its Definitions**

## Oracle Banking Trade Finance Process Management Cloud Service

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service process.

Welcome to the Oracle Banking Trade Finance Process Management Cloud Service User Guide. This guide provides an overview on the OBTFPMCS application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPMCS:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

### Overview

Oracle Banking Trade Finance Process Management Cloud Service is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management Cloud Service enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

### Benefits

Oracle Banking Trade Finance Process Management Cloud Service helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPMCS allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

### Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

# 2

## Guarantee Advise Cancellation Islamic

As part of Conventional Guarantee Advise Cancel, System enables the user to cancel the Guarantee which had been already Advised.

The various stages involved for Guarantee Advise Cancel are:

- Receive and verify documents and Input basic details- Registration stage
- Upload of related mandatory and non-mandatory documents
- Input/Modify details of Cancel of Guarantee - Data Enrichment stage
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Advise Cancel process flow is similar to that of conventional Guarantee Advise Cancel process flow.

This section contains the following topics:

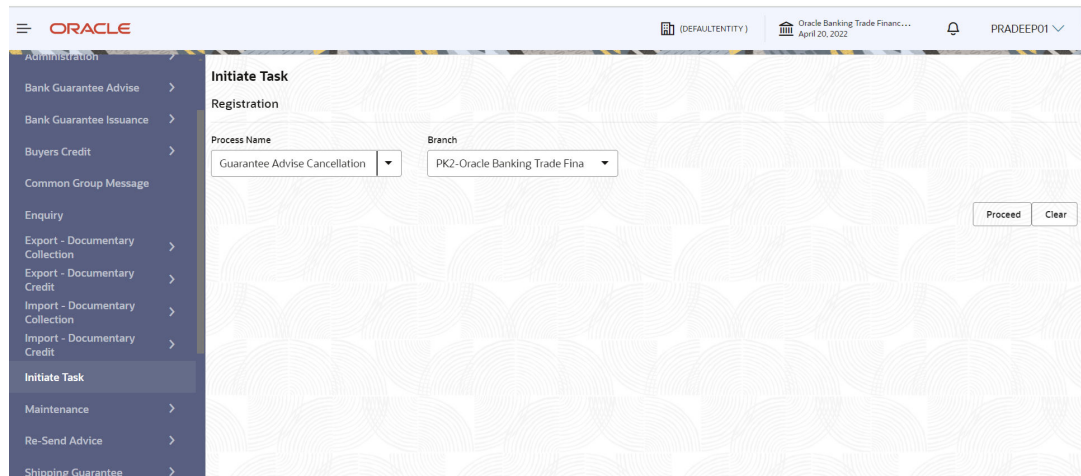

- [Common Initiation Stage](#)  
This topic provides the systematic instructions to initiate the new Guarantee Advise Cancellation Islamic request.
- [Registration](#)  
This topic provides the systematic instructions to initiate the Registration stage of Guarantee Advise Cancellation Islamic request.
- [Data Enrichment](#)  
This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee Advise Cancellation - Islamic request.
- [Multi Level Approval](#)  
This topic helps you quickly get acquainted with the Multi Level Approval process.

### 2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new Guarantee Advise Cancellation Islamic request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.  
The **Initiate Task** screen appears.

2. On **Initiate Task** screen, specify the fields.

 **Note:**

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

**Table 2-1 Initiate Task - Field Description**

Field	Description
<b>Process Name</b>	Select a process name from the drop-down list.
<b>Branch</b>	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

**Table 2-2 Action Buttons - Field Description**

Field	Description
<b>Proceed</b>	Task will get initiated to next logical stage.
<b>Clear</b>	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

## 2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of Guarantee Advise Cancellation Islamic request.

The first stage of Guarantee Advise Cancellation process starts from the Registration Stage. User can register a request for an Islamic Guarantee Advise Cancel received at the front desk (as an application received physically/received by mail/fax). During registration (Ref Fig-2), I will capture the basic details of the Cancel application, check the signature of the applicant and upload related documents. On submit of the Cancel request, the customer should be notified with acknowledgment and the request should be available for the Guarantee expert to handle

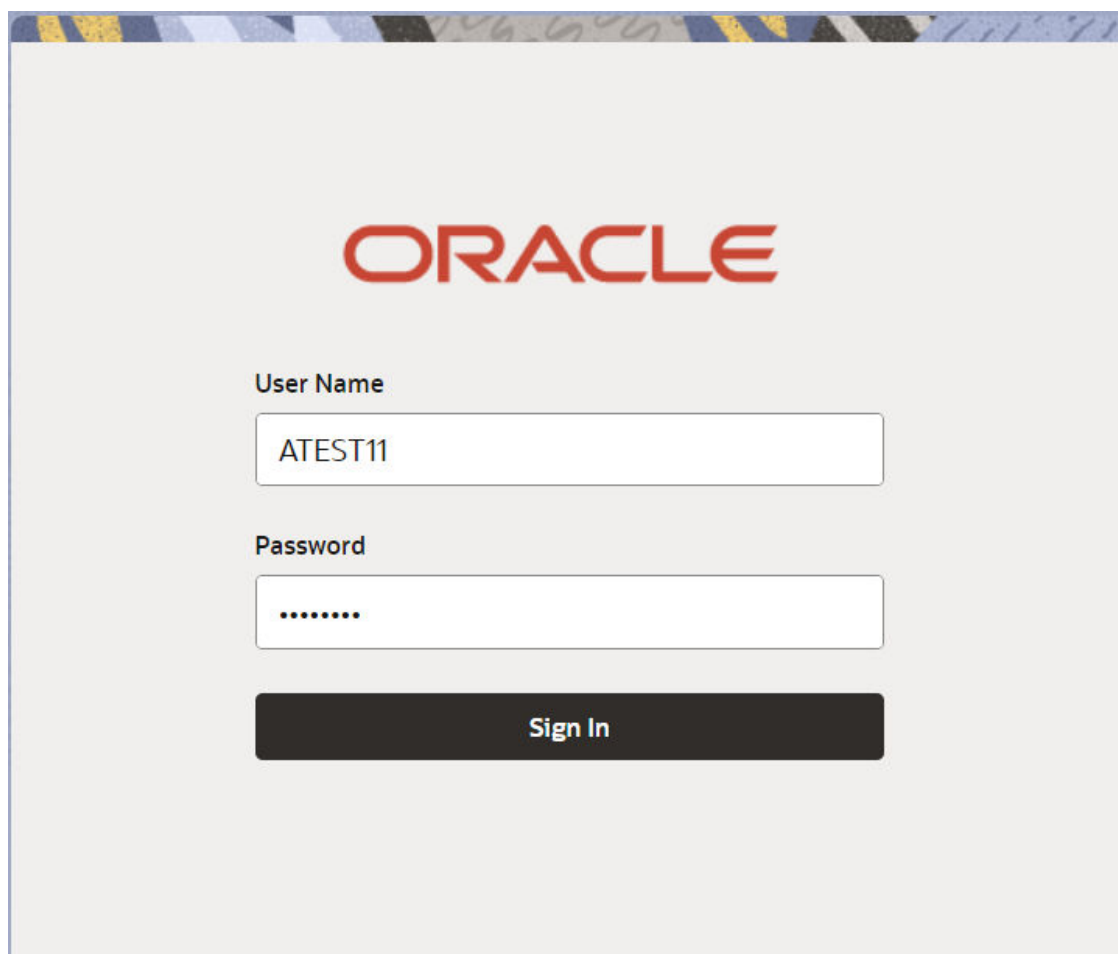

in the next stage. The OBTFPMCS user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPMCS verifies the field 21 and 26E ( of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPMCS user can process incoming MT798 (up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

The user has the option to submit, hold, save and hold and cancel the application.

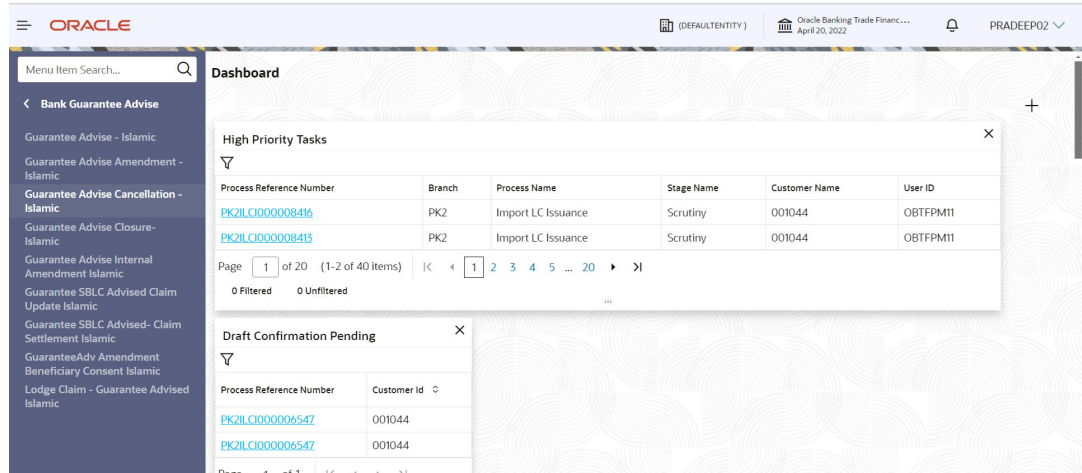

Specify **User ID** and **Password**, and login to **Home** screen.

**Figure 2-1 Login Screen**

The image shows a login screen for Oracle. At the top center, the word "ORACLE" is displayed in a large, red, sans-serif font. Below the logo, there are two input fields. The first is labeled "User Name" and contains the text "ATEST11". The second is labeled "Password" and contains seven dots. Below these fields is a dark grey button with the text "Sign In" in white.

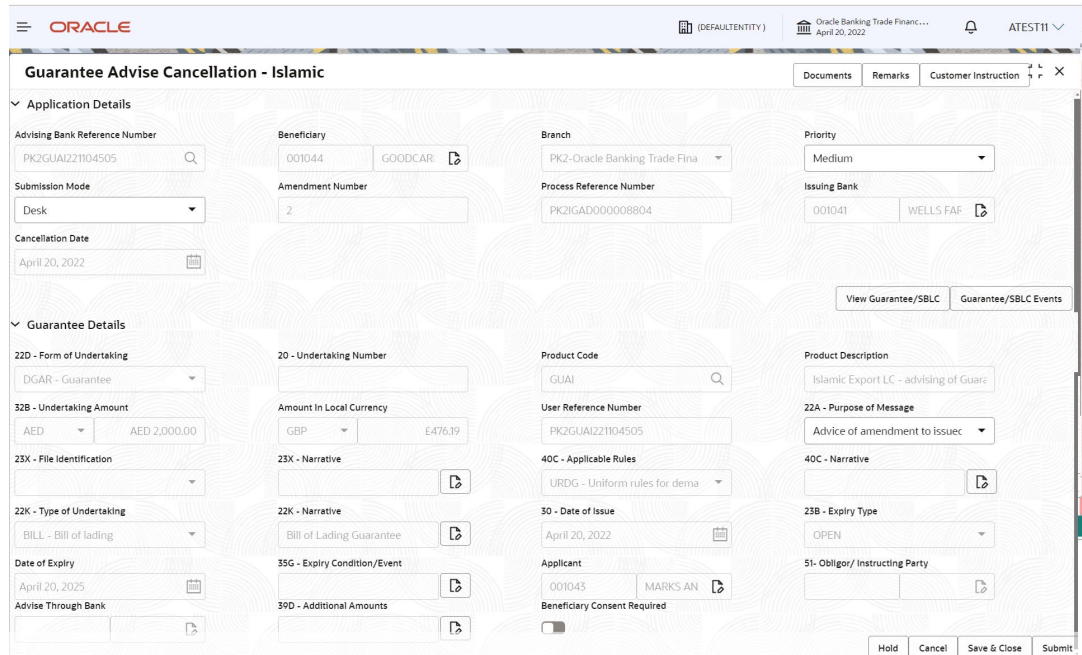

1. On **Home** screen, click **Trade Finance - Islamic**. Under **Trade Finance - Islamic**, click **Bank Guarantee Advise**.
2. Under **Bank Guarantee Advise**, click **Guarantee Advise Cancellation Islamic**.

Figure 2-2 Guarantee Advice Cancellation Islamic

The **Guarantee Advice Cancellation Islamic - Registration** screen appears. The Guarantee Advice Cancellation Islamic - Registration stage has two sections Application Details and Guarantee Details. Let's look at the details of Registration screens below:

Figure 2-3 Guarantee Advice Cancellation Islamic - Registration - Application Details

- On **Guarantee Advice Cancellation Islamic - Registration - Application Details** screen, specify the fields.

 **Note:**

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

**Table 2-3 Guarantee Advise Cancellation Islamic - Registration - Application Details - Field Description**

## 2.3 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee Advise Cancellation - Islamic request.

On successful completion of Registration of an Guarantee Advise Cancellation - Islamic, the task moves to Data Enrichment stage.

As part of Data Enrichment, user can register and update the basic details of Guarantee Cancellation Islamic request. If the request is received by mail/Courier, the user should be able to update the request. In case the message is received by SWIFT, then the cancellation task needs to be auto created and available for the user to handle.

The DE user can view the latest Guarantee/SBLC Advise values displayed in the respective fields.

**Note:**

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task which completed the registration and scrutiny and currently at Data enrichment stage.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click, **Task**.
2. Under **Task**, click **Free Task**.

For more information on fields, refer to the field description table below.

Field	Description
<b>Commission Details</b>	Specify the commission details. All charges, commission and margin are collected from the counter-party by default.
<b>Component</b>	This field displays the commission component. Click the link to view the component details.
<b>Rate</b>	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate.  If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
<b>Mod. Rate</b>	From the default value, if the rate is changed the value gets updated in this field.
<b>Currency</b>	This field displays the currency in which the commission have to be collected.
<b>Amount</b>	This field displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPMCS.  If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
<b>Modified</b>	From the default value, if the amount is changed, the value gets updated in the modified amount field.
<b>Defer</b>	If enabled, charges/commissions has to be deferred and collected at any future step.

Field	Description
<b>Waive</b>	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
<b>Charge Party</b>	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
<b>Settl. Account</b>	Select the settlement account.
<b>Amendable</b>	Displays if the field is amendable or not.
<b>Charge Details</b>	Specify the charge details.
<b>Component</b>	This field displays the charge component type.
<b>Tag Currency</b>	This field displays the tag currency in which the charges have to be collected.
<b>Tag Amount</b>	This field displays the tag amount that is maintained under the product code.
<b>Currency</b>	This field displays the currency in which the charges have to be collected.
<b>Amount</b>	This field displays the amount that is maintained under the product code.
<b>Modified</b>	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
<b>Billing</b>	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPMCS. The user can not enable/disable the option, if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.
<b>Defer</b>	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
<b>Waive</b>	Enable the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if <b>Defer</b> toggle is enabled.
<b>Charge Party</b>	Charge party is applicant by default. User can change the value to beneficiary.
<b>Settlement Account</b>	Select the settlement account.
<b>Tax Details</b>	Specify the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/commission will be available on click of Re-Calculate button or on hand off to back-end system.

Field	Description
<b>Component</b>	This field displays the tax component.
<b>Type</b>	This field displays the type of tax component.
<b>Value Date</b>	This field displays the value date of tax component.
<b>Ccy</b>	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
<b>Amount</b>	This field displays the tax amount based on the percentage of commission maintained. You can edit the tax amount, if applicable.
<b>Billing</b>	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.
<b>Defer</b>	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
<b>Settl. Account</b>	System defaults the settlement account. The user can modify the settlement account.

### Preview Message

The bank user can view a preview of the outgoing SWIFT message and advise simulated from back office.

Based on the Guarantee Cancellation details captured in the previous screen, the preview message simulated from the Back Office and the user can view the message

The screenshot displays the 'Preview Message' interface. It is divided into two main sections: 'Preview - SWIFT Message' and 'Preview - Mail Advice'.  
**Preview - SWIFT Message:** Includes dropdowns for Language (English) and Message Type (LC\_ACK\_AMND), a Message Status field (GENERATED), and a Repair Reason field.  
**Preview - Mail Advice:** Includes dropdowns for Language (English) and Advice Type (AMD\_EXP\_CR), a Message Status field (GENERATED), and a Repair Reason field.  
**SWIFT Message Preview:** Shows a message header with details like 'Original Received from Application - Outgoing Draft', 'Priority/Delivery : Normal', and 'Message Header'. The header includes Swift Input (FIN 730 Acknowledgement), Sender Swift address (AAEMNL21XXX), and Receiver Swift address (WFBUI565XXX).  
**Mail Advice Preview:** Shows a simulated mail advice with the date '20-APR-22', 'PAGE:1', and recipient details for GOODCARE PLC (venugopal.t@oracle.com, lane no 4, London). It also includes 'OUR REFERENCE: PK2GUAI21104501'.  
 At the bottom right, there are 'Save & Close' and 'Close' buttons.

For more information on fields, refer to the field description table below.

**Table 2-17 Preview Message - Field Description**

Field	Description
<b>Preview SWIFT Message</b>	Displays the preview of SWIFT Messages.
<b>Language</b>	Read only field. The language to preview the draft guarantee details. English is set as default language for the preview.

**Table 2-17 (Cont.) Preview Message - Field Description**

Field	Description
<b>Message Type</b>	Select the message type from the drop-down.
<b>Message Status</b>	Read only field. Displays the message status of the draft message.
<b>Repair Reason</b>	Read only field. Displays the reason of repair.
<b>Preview Message</b>	This field displays a preview of the draft message.  Based on the guarantee text captured in the previous screen, guarantee draft is generated in the back office and is displayed in this screen.
<b>Preview Mail Device</b>	Based on the guarantee amendment captured in the previous screen, the preview message-mail advice is simulated from the back office and the user can view the message.
<b>Language</b>	Read only field.  The language for the advice message.  English is set as default language for the preview.
<b>Advice Type</b>	Select the advice type.
<b>Message Status</b>	Read only field. Displays the message status of the mail advice.
<b>Repair Reason</b>	Read only field. Displays the reason of repair.
<b>Preview Message</b>	This field displays a preview of advice.

3. Click **Save and Close** to save the details and close the screen.
4. Click **Next**.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

**Table 2-18 Additional Details - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
<b>Documents</b>	Click to View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously.  When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application

**Table 2-18 (Cont.) Additional Details - Action Buttons - Field Description**

Field	Description
<b>Remarks</b>	Specify any additional information regarding the Guarantee Advise Cancellation Islamic. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the overrides accepted by the user.

## 2.4 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

A User can view the summary of details updated in multilevel approval stage of Islamic Guarantee Advise Cancel request.

1. Log in into OBTFPMCS application and acquire the task available in the approval stage in free task queue. The user can view the Summary tiles which displays list of important fields with values.
2. Click each tile to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

 **Note:**

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

### Authorization Re-Key (Non-Online Channel)

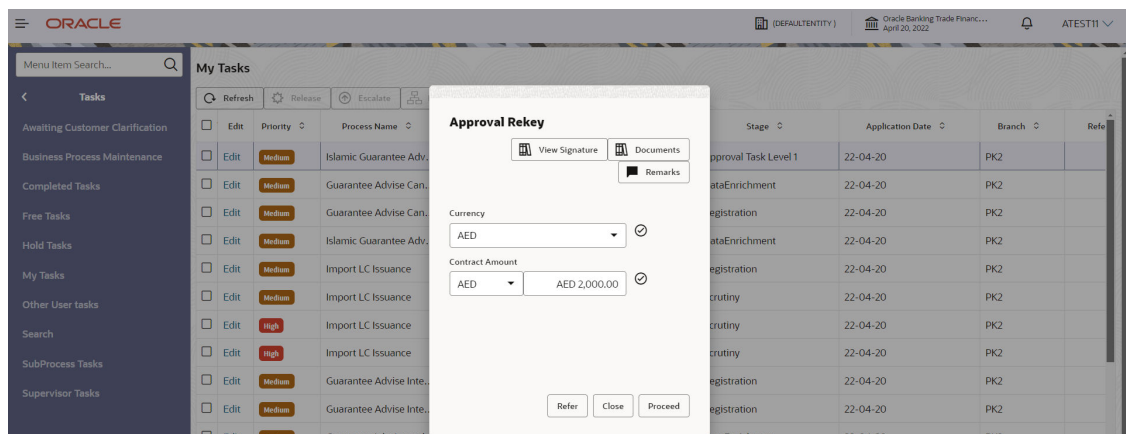

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Contract Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

**Figure 2-17 Authorization Re-Key**

- [Reject Approval](#)  
This topic helps you quickly get acquainted with the Reject Approval process.

## 2.4.1 Reject Approval

This topic helps you quickly get acquainted with the Reject Approval process.

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Guarantee Advise available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

### Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view and modify details about application details and guarantee details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required.
- Charge Details - User can view and modify charge details, if required.
- Guarantee Details - User can view and modify Counter Guarantee details and Guarantee details, if required.
- Advice Preview - User can view and modify draft guarantee details, legal verification and customer confirmation details, if required.
- Compliance - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Remarks - As a Reject approval user, you will be able to view the remarks captured in the process during earlier stages. User also can see the Reject code with reason for rejection in the Remarks column

1. Click **Reject Approve** to reject the transaction.

For more information on Action Buttons, refer to the field description table below.

**Table 2-26 Action Buttons - Field Description**

Field	Description
<b>Reject Approve</b>	On click of Reject Approve, the transaction is rejected.
<b>Reject Decline</b>	On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks.
<b>Hold</b>	User can put the transaction on 'Hold'. Task will remain in Pending state.
<b>Cancel</b>	Cancel the Reject Approval.
