# Preface

- [Purpose](#)
- [Audience](#)  
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)  
This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

## Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service **Guarantee Issuance Amendment Islamic** process.

## Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance [Oracle Software Security Assurance](#).

## Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>monospace</code>	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

## Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

## Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

**Table 1 Acronyms and Abbreviations**

Abbreviation	Description
OBTFCPM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency

# Oracle Banking Trade Finance Process Management Cloud Service

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service process.

Welcome to the Oracle Banking Trade Finance Process Management Cloud Service User Guide. This guide provides an overview on the OBTFPMCS application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPMCS:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

## Overview

Oracle Banking Trade Finance Process Management Cloud Service is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management Cloud Service enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

## Benefits

Oracle Banking Trade Finance Process Management Cloud Service helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPMCS allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

## Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

# 2

## Guarantee Issuance Amendment Islamic

Guarantee Amendment enables the user to amend an already issued guarantee to the Beneficiary or to the Bank designated to Advise the Guarantee Amendment to the Beneficiary or to another Advising Bank.

Conventional Guarantee Amendment process enables the user to make an amendment to the Guarantee which had been already issued.

The common amendments that are made to Guarantees are:

- Expiry date
- Increase/Decrease in Guarantee amount
- Change in Terms and Conditions
- The amendments may need consent from the beneficiary of the amendment. In such scenarios, after the processing of amendment, the amended Guarantee is parked awaiting beneficiary consent.

The various stages involved in Amendment of Guarantee Issued are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input amendment application details
- Upload of related mandatory and non-mandatory documents
- Input/Modify details of amendment of Guarantee - Data Enrichment stage
- Check for limit availability Check balance availability for amount block
- Check for sanctions & KYC status Earmark limits/Create amount block for cash margin/ charges
- Capture remarks for other users to check and act
- Generate acknowledgements and draft Amendment copies
- Notify customer on any negative statuses in any of the stages to the applicant
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Issuance Amendment process flow is similar to that of conventional Guarantee Issuance Amendment process flow.

This topic contains following subtopics:

- [Common Initiation Stage](#)
- [Registration](#)
- [Data Enrichment](#)
- [Multi Level Approval](#)
- [Common Initiation Stage](#)

This topic provides the systematic instructions to initiate the new **Guarantee Issuance Amendment Islamic** request.

- [Registration](#)  
This topic provides the systematic instructions to initiate the Registration stage of Guarantee Issuance Amendment - Islamic request.
- [Data Enrichment](#)  
This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee Issuance Amendment Islamic request.
- [Legal Verification](#)

This topic helps you quickly get acquainted with the Multi Level Approval process.

## 2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new **Guarantee Issuance Amendment Islamic** request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance** . Under **Trade Finance**, click **Initiate Task**.  
The **Initiate Task** screen appears.

**Figure 2-1 Initiate Task**

The screenshot displays the Oracle 'Initiate Task' interface. On the left is a sidebar menu with 'Trade Finance' highlighted. The main content area is titled 'Initiate Task' and contains a 'Registration' section. This section has two dropdown menus: 'Process Name' (set to 'Guarantee Issuance Amendme') and 'Branch' (set to 'PK2-Oracle Banking Trade Fine'). At the bottom right of the main area are 'Proceed' and 'Clear' buttons. The top of the screen shows the Oracle logo and user information: '(DEFAULTTENTIVITY)', 'Oracle Banking Trade Financ...', 'April 20, 2022', and 'ADMIN01'.

2. On **Initiate Task** screen, specify the fields.

### **Note:**

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

**Table 2-1 Initiate Task - Field Description**

Field	Description
<b>Process Name</b>	Select a process name from the drop-down list.
<b>Branch</b>	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

**Table 2-2 Action Buttons - Field Description**

Field	Description
<b>Proceed</b>	Task will get initiated to next logical stage.
<b>Clear</b>	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

## 2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of Guarantee Issuance Amendment - Islamic request.

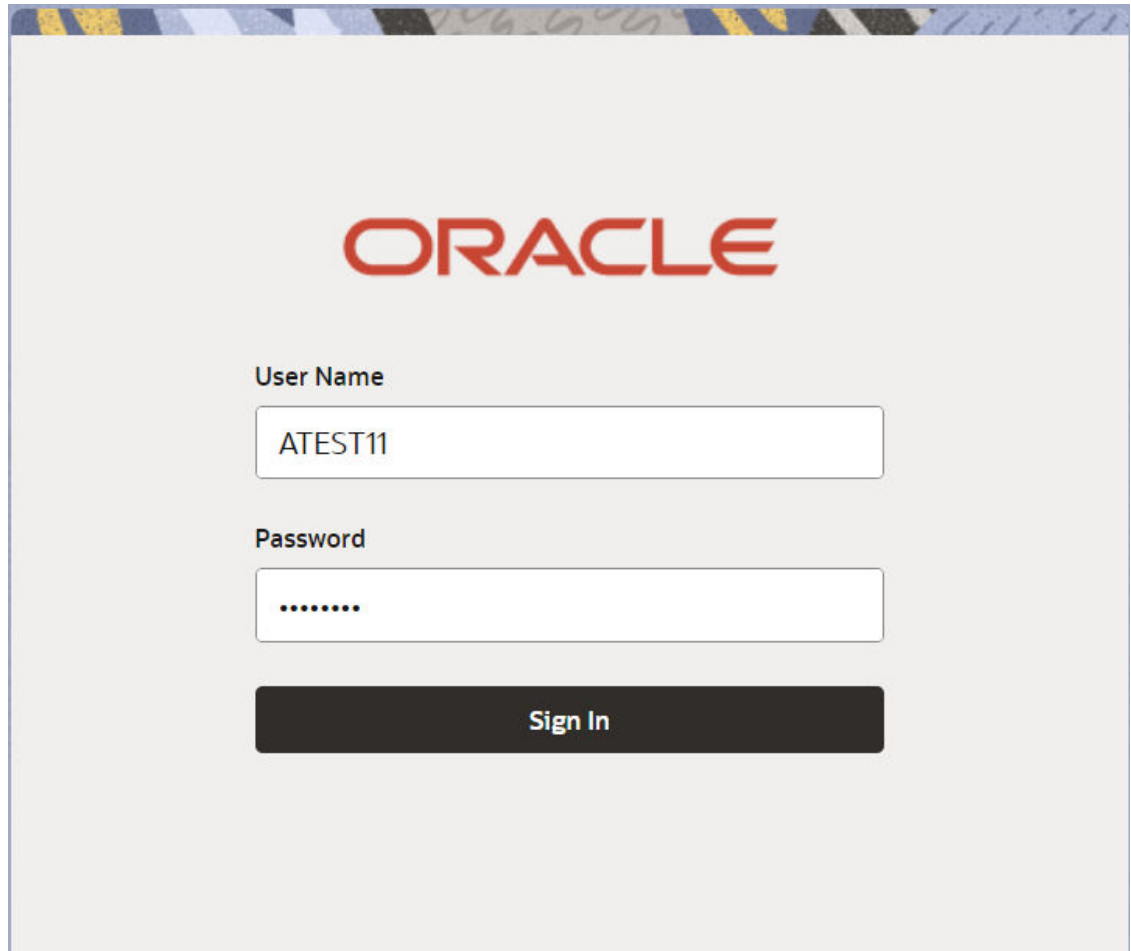

During registration stage, user can register request for an Islamic Guarantee amendment received at the front desk (as an application received physically/received by mail/fax). During registration, user captures the basic details of the application, check the signature of the applicant and upload related documents. On submit of the amendment request, the customer should be notified with acknowledgment and the request should be available for an Guarantee expert to handle in the next stage.

The OBTFPMCS user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPMCS verifies the field 21 and 26E ( of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPMCS user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 2-2 Login Screen

The image shows the Oracle login screen. At the top, the Oracle logo is displayed in red. Below the logo, there are two input fields. The first is labeled "User Name" and contains the text "ATEST11". The second is labeled "Password" and contains a series of dots. Below these fields is a dark gray button with the text "Sign In" in white. The background of the login area is light gray, and there is a decorative header with a pattern of blue, yellow, and black stripes.

1. On **Home** screen, click **Trade Finance - Islamic**. Under **Trade Finance - Islamic**, click **Bank Guarantee Issuance**.
2. Under **Bank Guarantee Issuance**, click **Guarantee Issuance Amendment - Islamic**.

Figure 2-3 Guarantee Issuance Amendment - Islamic

The screenshot shows a web application interface. On the left is a dark blue sidebar with a search bar and a list of menu items under 'Bank Guarantee Issuance'. The main area is titled 'Dashboard' and contains a 'Swift Processing' window. This window has a 'Date' field set to 'December 20, 2024' and two sections, each displaying 'No data to display'. At the bottom of the dashboard, it shows '0 Filtered' and '0 Unfiltered'.

The **Guarantee Issuance Amendment - Islamic** screen appears. The Guarantee Issuance Amendment - Islamic - Registration stage has two sections Application Details and Guarantee Details. Let's look at the details of Registration screens below:

Figure 2-4 Guarantee Issuance Amendment - Islamic - Registration - Application Details

<b>Advising Bank Reference</b>	Specify the advising bank reference number.
<b>Advising Through Bank</b>	Specify or click <b>Search</b> icon to search and select the value of advising through bank defaults from Guarantee/ Standby Issuance.
<b>Counter SBLC/Guarantee Issuing Bank</b>	<p>Read only field.</p> <p>The value of Counter Guarantee Issuing Bank defaults from Guarantee/ Standby Issuance.</p> <p>This field is enabled, if <b>Purpose of Message</b> is <b>ICCO</b>.</p> <div>  <b>Note:</b>            If Counter Issuing Bank has value, and in case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available"         </div>
<b>Local SBLC/Guarantee Issuing Bank</b>	<p>Read only field.</p> <p>The value of Local Guarantee Issuing Bank defaults from Guarantee/ Standby Issuance.</p> <p>This field is enabled, if <b>Purpose of Message</b> is <b>ICCO</b> or <b>ISCO</b>.</p> <div>  <b>Note:</b>            If Local Issuing Bank has value and Counter Issuing Bank has no value, and in case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".         </div>
<b>Supplementary Information About Amounts</b>	This field specifies the supplementary information about amount related to undertaking.
<b>Obligor/ Instructor Party</b>	Specify the Local SBLC/Guarantee Issuance bank name or click <b>Search</b> to search and select the name of the obligor from the lookup.

**Table 2-4 (Cont.) Guarantee Issuance Amendment - Islamic - Registration - SBLC/  
Guarantee Details - Field Description**

Field	Description
<b>Obligor Collateral Percentage</b>	Specify the value for obligor collateral percentage.
<b>Closure Date</b>	This field displays the <b>Closure Date</b> defaulted by the system from the previous version of the contract. User can modify the system defaulted "Closure Date" and system should validate the same for the below conditions, <ul style="list-style-type: none"> <li>• Closure Date must be after the Issue Date.</li> <li>• Closure Date must be after the Expiry Date.</li> <li>• Closure Date cannot be blank.</li> </ul>
<b>Accountee</b>	Read only field. System defaults the accountee name available in Guarantee.
<b>Revenue Sharing Percentage</b>	Read only field. System populates the values from the "Trade Finance Customer Maintenance" if any, from the Guarantee Contract.

5. Click **Submit**.

The task will move to next logical stage of **Guarantee Issuance Amendment Islamic**.  
For more information on action buttons, refer to the field description table below.

**Table 2-5 Guarantee Issuance Amendment - Islamic - Registration - Action Buttons  
- Field Description**

Field	Description
<b>Signatures</b>	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
<b>Documents</b>	Upload the documents received. Application displays mandatory documents to be uploaded for Guarantee Issuance. Place holders are also available to upload additional documents submitted by the applicant
<b>Remarks</b>	Specify any additional information regarding the Guarantee Issuance. This information can be viewed by other users processing the request.
<b>Hold</b>	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
<b>Cancel</b>	Cancels the Guarantee issuance task. Details entered will not be saved and the task will be removed.
<b>Save &amp; Close</b>	Save the information provided and holds the task in 'My Task' queue for working later.  This option will not submit the request.

**Table 2-5 (Cont.) Guarantee Issuance Amendment - Islamic - Registration - Action Buttons - Field Description**

Field	Description
<b>Submit</b>	Click Submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. The task will move to next logical stage of Guarantee Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.
<b>Checklist</b>	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.

- [Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service](#)  
This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service.

## 2.2.1 Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from Oracle Banking Trade Finance Process Management Cloud Service.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in Oracle Banking Trade Finance Process Management Cloud Service upon request received from the customer.

### **Pre- Conditions:**

- Customer Maintenance details are replicated from OBTF to Oracle Banking Trade Finance Process Management Cloud Service.
  - Task is initiated in Oracle Banking Trade Finance Process Management Cloud Service, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to Oracle Banking Trade Finance Process Management Cloud Service.
  2. In Oracle Banking Trade Finance Process Management Cloud Service, user clicks **Request Clarification**, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online". In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder.
  3. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
  4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

## 2.3 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee Issuance Amendment Islamic request.

As part of data enrichment, user can input new Islamic Guarantee Issuance Amendment request. User can enter/update basic details of the incoming request.

### Note:

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

In case of MT798 message, if the User encounters validation error during handling the task, user can put the transaction into hold and seek clarification from the customer in this stage. In DE stage the task is verified and enriched. The user if required can update the editable fields. The fields that have been changed/updated have to be highlighted by the system and the user can check the incoming message place holder for the original value.

Do the following steps to acquire a task which completed the registration and currently at Data enrichment stage.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click, **Tasks**.
2. Under **Tasks**, click **Free Tasks**.

**Figure 2-5 Free Tasks**

Let's look at the details for Data Enrichment stage. The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)  
This topic provides the systematic instructions to initiate the main details of Data Enrichment stage of Guarantee Issuance Amendment - Islamic request.
- [Sequence B \(Continued\)](#)  
This topic provides the systematic instructions to capture the Sequence B (Continued) details in Data Enrichment stage of Guarantee Issuance Amendment Islamic process.
- [Sequence C](#)  
This topic provides the systematic instructions to capture the Sequence C details in Data Enrichment stage of Guarantee Issuance Amendment Islamic process.
- [Acknowledgement Details](#)  
This topic provides the systematic instructions to capture the acknowledgement details of Data Enrichment stage.
- [Additional Fields](#)  
This topic provides the systematic instructions to capture the additional fields.
- [Amendment Snapshot](#)  
This topic provides the systematic instructions to capture the Amendment Snapshot details.
- [Advices](#)  
This topic provides the systematic instructions to capture the advices details of Guarantee Issuance Amendment Islamic process.
- [Additional Details](#)  
This topic provides the systematic instructions to capture the additional details in Data Enrichment stage of Guarantee Issuance Amendment Islamic process.
- [Settlement Details](#)  
This topic provides the systematic instructions to capture the settlement details of Guarantee Issuance Amendment Islamic request.

- [Summary](#)  
This topic provides the systematic instructions to view the summary of Guarantee Issuance Amendment Islamic request.

## 2.3.1 Main Details

This topic provides the systematic instructions to initiate the main details of Data Enrichment stage of Guarantee Issuance Amendment - Islamic request.

Main details section has two sub section as follows:

- Application Details
- SBLC/ Guarantee Details.

### Application Details

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

**Figure 2-7 Data Enrichment - Main Details**

### Note:

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

**Table 2-6 Guarantee Issuance Amendment - Islamic - Registration - Application Details - Field Description**

Field	Description
<b>SBLC/Guarantee Number</b>	Read only field.  This field displays the SBLC/Guarantee number, the user identification of your external bank account.
<b>Received From Party</b>	Read only field.  System will default the party as available in Guarantee.
<b>Received From - Customer ID</b>	Read only field.  Customer ID will be auto-populated from Guarantee /SBLC Issuance.
<b>Received From - Customer Name</b>	Read only field. Name of the customer or applicant will be auto populated based on the customer ID.
<b>Branch</b>	Read only field.  By default, customer's home branch will be displayed based on the customer ID.
<b>Priority</b>	System defaults the priority of the Guarantee amendment request as Essential/Critical/Low/Medium/High. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit of Registration stage.
<b>Amendment Number</b>	Read only field.  Amendment number will be auto-populated based on the system maintenance.  Amendment number increases by 1 for each amendment.
<b>Submission Mode</b>	Read only field.  This field displays the submission mode of Guarantee Amendment request.  By default the submission mode will have the value as 'Desk'. <ul style="list-style-type: none"> <li>• Desk - Request received through Desk</li> <li>• Fax- Request received through Fax</li> <li>• Email- Request received through Email</li> <li>• Courier - Request received through Courier</li> </ul>
<b>Process Reference Number</b>	Read only field.  Unique OBTFPMCS task reference number for the transaction.  This is auto generated by the system based on process name and branch code.

**Table 2-6 (Cont.) Guarantee Issuance Amendment - Islamic - Registration - Application Details - Field Description**

Field	Description
<b>Amendment Date</b>	Read only field.  The application displays the branch's current date by default, and enables the user to change the date to any back date.
<b>Customer Reference Number</b>	Specify a unique Customer Reference Number which is provided by the applicant/applicant bank.
<b>Related Reference</b>	Read only field.  Related reference number will be auto-populated based on the system maintenance.
<b>Beneficiary Consent Required</b>	Enable the option, if beneficiary consent required for the amendment made to the fields. Disable the option, if beneficiary consent is not required for the amendments.

**Guarantee Details**

The fields listed under this section are same as the fields listed under the Guarantee Details section in Registration stage. For more information on the fields, refer to **Guarantee Details** of #unique\_44 stage. During Registration, if user has not captured input, then user can capture the details in this section.

**Figure 2-8 Guarantee Details**

For more information on action buttons, refer to the field description table below.

**Table 2-7 Guarantee Amendment - Registration - Guarantee Details - Field Description**

Field	Description
<b>Form of Undertaking</b>	Read only field.  This field displays the value for form of undertaking.

**Table 2-7 (Cont.) Guarantee Amendment - Registration - Guarantee Details - Field Description**

Field	Description
<b>Type of Undertaking</b>	Read only field. Type of undertaking defaults from Guarantee/ Standby Issuance
<b>Narrative</b>	Specify the narrative in this field. This field is enabled if <b>Type of Undertaking</b> field values is <b>OTHR</b> .
<b>Product Code</b>	Read only field.  This field displays the product code.
<b>Product Description</b>	Read only field.  This field displays the description of the product as per the product code.
<b>Undertaking Amount</b>	This field defaults the undertaking number available in the guarantee/ SBLC.  User can change the undertaking amount.
<b>Amount In Local Currency</b>	Read only field.  This field displays the Local currency and amount value. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).
<b>Purpose of Message</b>	Read only field. System defaults the purpose of message as entered in Registration stage. The values are: <ul style="list-style-type: none"> <li>• <b>ISSU - Issue of Undertaking:</b></li> <li>• <b>ICCO - Issuance of counter-counter-undertaking:</b></li> <li>• <b>ISCO - Issuance of counter undertaking:</b></li> </ul>
<b>File Identification</b>	System defaults the type of delivery channel and its associated file name or reference from the available values. The options are: <ul style="list-style-type: none"> <li>• COUR - Courier delivery</li> <li>• EMAL - Email transfer</li> <li>• FACT - SWIFTNet FileAct</li> <li>• FAXT - Fax transfer</li> <li>• HOST - Host-to-Host</li> <li>• MAIL - Postal Delivery</li> <li>• OTHR - Other delivery channel</li> </ul> User can change the value of File Identification.
<b>Narrative</b>	This field displays the description entered in Registration stage, if any.  User can change the value of narrative, if value of <b>File Identification</b> is <b>OTHR</b> .

**Table 2-7 (Cont.) Guarantee Amendment - Registration - Guarantee Details - Field Description**

Field	Description
<b>Expiry Type</b>	<p>System defaults the expiry type from guarantee issuance. This field indicates whether undertaking has specified expiry date or is open-ended.</p> <p>The options are:</p> <ul style="list-style-type: none"> <li>• <b>COND</b> - With Expiry</li> <li>• <b>COND</b> - Without Expiry</li> <li>• <b>FIXD</b> - Specified expiry date (with/without automatic expansion)</li> <li>• <b>OPEN</b> - No specific date of expiry</li> </ul> <p>User can change the value of Expiry Type.</p>
<b>Date of Expiry</b>	<p>Select the expiry date of the LC. The expiry date can be equal or greater than the issue date.</p> <p>If the Expiry Date is earlier than the issue date, system will provide an error and if the 'Expiry Date is equal to the Issue Date', system will provide a alert message.</p>
<b>Auto Renewal</b>	<p>Switch to  for auto renewal.</p> <p>This field is enabled if <b>Applicable Rules</b> is <b>URDG - Uniform rules for demand guarantees</b> and <b>Expiry Type</b> is <b>OPEN</b>.</p>
<b>Extension Required</b>	<p>Switch to  if extension is required for guarantee issuance internal amendment.</p>
<b>Expiry Condition/Event</b>	<p>System defaults the documentary condition/event that indicates when the local undertaking will cease to be available.</p> <p>User can change the expiry condition/event, if the value of <b>Expiry Type</b> is <b>COND</b>.</p>
<b>Applicable Rules</b>	<p>Read only field.</p> <p>System defaults the applicable rules for guarantee issuance. The value can be:</p> <ul style="list-style-type: none"> <li>• URDG - Uniform rules for demand guarantees</li> <li>• UCPR - Uniform customs and Practices</li> <li>• ISPR - International standby Practices</li> <li>• NONE - Not subject to any rules</li> <li>• OTHR</li> </ul>
<b>Narrative</b>	<p>Read only field.</p> <p>This field displays the description entered in <b>Registration</b> stage, if any.</p>
<b>Applicant Bank</b>	<p>Read only field.</p> <p>This field displays the applicant bank details, if <b>Received From Applicant Bank</b> option is enabled. If request is not received from applicant bank, this field must be blank.</p>
<b>Applicant</b>	<p>Read only field.</p> <p>This field displays the applicant details based on the details provided in Application Details section.</p>

**Table 2-7 (Cont.) Guarantee Amendment - Registration - Guarantee Details - Field Description**

Field	Description
<b>Beneficiary</b>	<p>System defaults the beneficiary whose favor the undertaking (or counter-undertaking) is issued from the Registration stage. If beneficiary is not a customer of the bank, then choose WALKIN customer id and provide the beneficiary details. If beneficiary is a customer and KYC status is not valid, then system will display alert message.</p> <p>User can change the beneficiary.</p>
<b>Advising Bank</b>	<p>This field displays the details of the advising bank.</p> <p>User can change the Advising Bank, if required.</p> <div>  <b>Note:</b> <p>In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message "RMA arrangement not available, please change the bank or use MAIL Medium".</p> </div>

Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(784,760/761).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
<b>View Undertaking</b>	Clicking this button allows the user to view the undertaking details.
<b>Signatures</b>	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>
<b>Request Clarification</b>	Clicking this button allows the user to submit the request for clarification to the "Trade Finance Portal" for the transactions that are initiated offline.

**Table 2-9 (Cont.) Main Details - Action Buttons - Field Description**

Field	Description
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
<b>Refer</b>	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Hold</b>	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

## 2.3.2 Sequence B (Continued)

This topic provides the systematic instructions to capture the Sequence B (Continued) details in Data Enrichment stage of Guarantee Issuance Amendment Islamic process.

As part of Data Enrichment, the user can verify and enter the basic details available in the Guarantee issuance amendment Islamic. In case the request is received through online channel, the user verifies the details populated. This section lists the amendments made to the issued guarantee. The hop has following three sections:

- Preferences
- Delivery of Original Undertaking
- Others
- Liability Change Schedule

1. On **Data Enrichment - Sequence B (Continued)** screen, specify the fields.

**Figure 2-9 Data Enrichment - Sequence B (Continued)**

For more information on fields, refer to the field description table below.

**Table 2-10 Sequence B (Continued) - Field Description**

Field	Description
<b>Preferences</b>	
<b>Other Amendments To Undertaking</b>	The field displays the content from MT767 and all the applicable MT 775. The user can change the value of requesting bank details.
<b>Delivery of Original Undertaking</b>	
<b>Delivery of Original Amendment</b>	Select the delivery mode by which the original local undertaking is to be delivered from the drop-down. The options are: <ul style="list-style-type: none"> <li>• <b>COLL - By Collection</b></li> <li>• <b>COUR - By Courier (e.g. Fedex, DHL, UPS)</b></li> <li>• <b>MAIL - By Mail</b></li> <li>• <b>MESS - By Messenger - Hand-deliver</b></li> <li>• <b>OTHR - Other method</b></li> <li>• <b>REGM - By Registered Mail or Airmail</b></li> </ul> Additional Information may be present if Code has the value COUR or OTHR, otherwise it is not allowed.
<b>Narrative</b>	Specify the narrative, if <b>Delivery of Original Amendment</b> has the value <b>COUR</b> or <b>OTHR</b> .
<b>Delivery to/ Collection by</b>	Select the value to whom the original local undertaking is to be delivered or by whom the original local undertaking is to be collected from the drop-down. The options are: <ul style="list-style-type: none"> <li>• <b>BENE – Beneficiary</b></li> <li>• <b>OTHR - Specified Address</b></li> </ul>

Table 2-10 (Cont.) Sequence B (Continued) - Field Description

Field	Description
<b>Narrative</b>	Specify the narrative, if <b>Delivery to/ Collection by</b> has the value <b>OTHR</b> .
<b>Others</b>	
<b>Sender to Receiver Information</b>	Click <b>Search</b> to search and select the additional information for receiver from the look-up.
<b>Customer Business Reference</b>	Click <b>Search</b> to search and select the customer business reference from the look-up.
<b>Bank Business Reference</b>	Click <b>Search</b> to search and select the bank business reference from the look-up.
<b>Liability Change Schedule</b> In this section, user can enter the details of increase or decrease of liability on a pre-scheduled date as applicable.	
<b>Liability Change Type</b>	Read only field. Displays the liability change type.
<b>Additional Details</b>	Specify the additional details, if any.
<b>Standard Type</b>	Select whether liability change is standard or non-standard. The options are: <ul style="list-style-type: none"> <li>• <b>Standard</b></li> <li>• <b>Non-standard</b></li> </ul> This field is disable if, <b>Liability Change Type</b> has the value <b>Event Based</b> .
<b>Schedule Grid</b>	
<b>Sequence Number</b>	Displays the serial number of the liability change.
<b>Scheduled Date</b>	The date on which liability change to happen.
<b>Amount</b>	The liability amount that should be increased or decreased on the liability change date.
<b>Percentage</b>	The amount of liability to be changed or percentage of liability to be changed.
<b>Liability Type</b>	Indicates whether increase or decrease of liability or both are involved. The options are: <ul style="list-style-type: none"> <li>• <b>Increase</b></li> <li>• <b>Decrease</b></li> <li>• <b>Boths</b></li> </ul>
<b>Action</b>	Click Edit icon to edit the schedule record. Click Delete icon to delete the schedule record.

2. Click **Next**.

The task will move to next data segment.

Field	Description
<b>Documents</b>	<p>Click to View/Upload the required document.</p> <p>Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application</p>
<b>Remarks</b>	<p>Specify any additional information regarding the Guarantee issuance. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>
<b>Overrides</b>	Click to view the overrides accepted by the user.
<b>Customer Instructions</b>	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFCMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>
<b>Incoming Messages</b>	<p>This button displays the multiple messages (MT760 + up to 7 MT761. Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(784,760/761).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
<b>View Undertaking</b>	Clicking this button allows the user to view the undertaking details.
<b>Signatures</b>	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>
<b>Request Clarification</b>	Clicking this button allows the user to submit the request for clarification to the "Trade Finance Portal" for the transactions that are initiated offline.

**Table 2-11 (Cont.) Sequence B (Continued) - Action Buttons - Field Description**

Field	Description
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
<b>Refer</b>	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Hold</b>	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
<b>Cancel</b>	<p>Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.</p>
<b>Save &amp; Close</b>	<p>Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.</p>
<b>Next</b>	<p>On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>

### 2.3.3 Sequence C

This topic provides the systematic instructions to capture the Sequence C details in Data Enrichment stage of Guarantee Issuance Amendment Islamic process.

The fields listed under this section are same as the fields listed under the Amendment of Guarantee/SBLC Issued – Sequence C and allow the user to amend them. In case of requests received from online channels (Internet Banking), the details will be populated directly in the screen.

The hop has following three sections:

- Preferences
- Underlying Transaction Details
- Delivery of Original Undertaking

1. On **Data Enrichment - Sequence C** screen, specify the fields.

**Figure 2-10 Data Enrichment - Sequence C**

For more information on fields, refer to the field description table below.

**Table 2-12 Sequence C - Field Description**

Field	Description
<b>Preferences</b>	
<b>Beneficiary</b>	<p>This field displays the beneficiary details of the guarantee.</p> <div> <b>Note:</b> In case of Online requests, the details are auto-populated and user cannot change the value. </div>
<b>Currency Code, Amount</b>	<p>System defaults the currency code and amount from Amendment of Guarantee/SBLC Issued – Sequence B and allow as a read only field.</p> <div> <b>Note:</b> In case of Online requests, the details are auto-populated and user cannot change the value. </div>

Table 2-12 (Cont.) Sequence C - Field Description

Field	Description
<b>Expiry Type</b>	<p>System defaults the expiry type from Amendment of Guarantee/SBLC Issued – Sequence B.</p> <div>  <b>Note:</b> In case of Online requests, the details are auto-populated and user cannot change the value. </div>
<b>Date of Expiry</b>	<p>The date of expiry of the Guarantee Issuance. The maturity date cannot be greater than the expiry date mentioned in Amendment of Guarantee/SBLC Issued – Sequence B and earlier than the application dated.</p> <div>  <b>Note:</b> In case of Online requests, the details are auto-populated and user cannot change the value. </div>
<b>Expiry Condition/Event</b>	<p>System defaults expiry type from Amendment of Guarantee/SBLC Issued.</p> <div>  <b>Note:</b> In case of Online requests, the details are auto-populated and user cannot change the value. </div>
<b>Underlying Transaction Details</b>	
<b>Other Amendments To Undertaking</b>	<p>System defaults the amend values in this field. The field displays the content from MT767 and all the applicable MT 775.</p>
<b>Delivery of Original Undertaking</b>	
<b>Delivery of Original Amendment</b>	<p>Select the delivery mode by which the original local undertaking is to be delivered from the drop-down. The options are:</p> <ul style="list-style-type: none"> <li>• <b>COLL - By Collection</b></li> <li>• <b>COUR - By Courier (e.g. Fedex, DHL, UPS)</b></li> <li>• <b>MAIL - By Mail</b></li> <li>• <b>MESS - By Messenger - Hand-deliver</b></li> <li>• <b>OTHR - Other method</b></li> <li>• <b>REGM - By Registered Mail or Airmail</b></li> </ul> <p>Additional Information may be present if Code has the value COUR or OTHR, otherwise it is not allowed.</p>
<b>Narrative</b>	<p>Specify the narrative, if <b>Delivery of Original Amendment</b> has the value <b>COUR</b> or <b>OTHR</b>.</p>

Table 2-12 (Cont.) Sequence C - Field Description

Field	Description
<b>Delivery to/ Collection by</b>	Select the value to whom the original local undertaking is to be delivered or by whom the original local undertaking is to be collected from the drop-down. The options are: <ul style="list-style-type: none"> <li>• <b>BENE – Beneficiary</b></li> <li>• <b>OTHR - Specified Address</b></li> </ul>
<b>Narrative</b>	Specify the narrative, if <b>Delivery to/ Collection by</b> has the value <b>OTHR</b> .

2. Click **Next**.

The task will move to next data segment.

Table 2-13 Sequence C - Action Buttons - Field Description

<b>Hold</b>	<p>The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.

**Table 2-13 (Cont.) Sequence C - Action Buttons - Field Description**

Field	Description
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Back</b>	Clicking on Back button, takes the user to the previous screen.
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

## 2.3.4 Acknowledgement Details

This topic provides the systematic instructions to capture the acknowledgement details of Data Enrichment stage.

At this stage user can update details for the acknowledgment and response details. This Acknowledgment related section is applicable only for Counter Issuing bank and Local issuing bank.

1. On **Acknowledgement Details** screen, specify the fields.

**Figure 2-11 Acknowledgement Details**

For more information on fields, refer to the field description table below:

**Table 2-14 Acknowledgement Details - Field Description**

Field	Description
<b>MT 768 - Acknowledgment Details</b> (This is applicable in case of Counter Guarantee/Counter Counter Guarantee Issuing Bank).	
<b>Issuing Bank Reference</b>	Specify the value for issuing bank reference.

**Table 2-14 (Cont.) Acknowledgement Details - Field Description**

Field	Description
<b>Account Identification</b>	Click <b>Search</b> to search and select the account which is used for settlement of charges where necessary, from the lookup.  Alternatively user can specify the account identification details.
<b>Date of Acknowledgement</b>	System defaults the current system date as date of message acknowledgment. If the task is approved on a later date, then the date should be updated as the branch date as on approval.  User can select the date on which the message being acknowledged was sent.
<b>Amount of Charges</b>	Specify the total amount of charges claimed by the advising bank and select the currency code.  If the Sender services an account for the Receiver in the currency of the charges, and this System should default the Date of Debit as the branch date as on approval.
<b>Account with Bank</b>	Click <b>Search</b> to search and select account at which the sender wishes to receive credit for charges claimed, from the lookup. Alternatively user can also specify the account with bank details.
<b>Charges</b>	Specify the more details about the charges.
<b>Sender to Receiver Information</b>	Click <b>Search</b> to search and select any additional information the advising bank sends to the Issuing bank, from the lookup.  This can be maintained as an FFT.
<b>Narrative</b>	Click <b>Search</b> to search and select the narrative from the lookup.

2. Click **Next**.

The task will move to next data segment. For more information refer [Additional Fields](#)

**Table 2-15 Acknowledgement Details - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
<b>Documents</b>	Click to View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application

Table 2-15 (Cont.) Acknowledgement Details - Action Buttons - Field Description

Field	Description
<b>Remarks</b>	Specify any additional information regarding the guarantee. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the overrides accepted by the user.
<b>Customer Instructions</b>	Click to view/ input the following <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFSM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>
<b>Incoming Messages</b>	This button displays the multiple messages (MT760 + up to 7 MT761). Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance.  In case of MT798, the User can click and view the MT798 message(784,760/761).  In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.  In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task..
<b>View Undertaking</b>	Clicking this button allows the user to view the undertaking details.
<b>Signatures</b>	Click the Signature button to verify the signature of the customer/ bank if required.  The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.  If more than one signature is available, system should display all the signatures.
<b>Request Clarification</b>	Clicking this button allows the user to submit the request for clarification to the "Trade Finance Portal" for the transactions that are initiated offline.
<b>Reject</b>	On click of Reject, user must select a Reject Reason from a list displayed by the system.  Reject Codes are: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

**Table 2-15 (Cont.) Acknowledgement Details - Action Buttons - Field Description**

Field	Description
<b>Refer</b>	Select a Refer Reason from the values displayed by the system.  Refer Codes are: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Hold</b>	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.  This option is used, if there are any pending information yet to be received from applicant.
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Back</b>	Clicking on Back button, takes the user to the previous screen.
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

## 2.3.5 Additional Fields

This topic provides the systematic instructions to capture the additional fields.

This section displays the additional fields based on the User defined fields maintained in the system.

1. On **Additional Fields** screen, specify the fields, if any.

**Figure 2-12 Additional Fields**

The screenshot shows the 'Additional Fields' screen within the 'Guarantee Issuance Amendment Islamic DataEnrichment' application. The application number is PK2IGTM000062491. The left sidebar lists navigation options: Main, Sequence B (Continued), Sequence C, Acknowledgement Details, **Additional Fields**, Amendment Snapshot, Advices, Additional Details, Settlement Details, and Summary. The main content area is titled 'Additional Fields' and shows a message: 'No Additional fields configured!'. The top right corner has a close button and a screen indicator 'Screen(5/10)'. The bottom of the screen features a series of action buttons: 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

2. Click **Next**.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

**Table 2-16 Additional Fields - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
<b>Documents</b>	Click to View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
<b>Remarks</b>	Specify any additional information regarding the guarantee. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the overrides accepted by the user.
<b>Customer Instructions</b>	Click to view/ input the following <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>
<b>Incoming Messages</b>	This button displays the multiple messages (MT760 + up to 7 MT761. Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance. In case of MT798, the User can click and view the MT798 message(784,760/761). In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task. In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task..
<b>View Undertaking</b>	Clicking this button allows the user to view the undertaking details.
<b>Signatures</b>	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.

**Table 2-16 (Cont.) Additional Fields - Action Buttons - Field Description**

Field	Description
<b>Request Clarification</b>	Clicking this button allows the user to submit the request for clarification to the "Trade Finance Portal" for the transactions that are initiated offline.
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
<b>Refer</b>	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Hold</b>	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Back</b>	Clicking on Back button, takes the user to the previous screen.
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

## 2.3.6 Amendment Snapshot

This topic provides the systematic instructions to capture the Amendment Snapshot details.

Data Enrichment user wants to enter the basic amendment details of the Islamic Guarantee Issuance Amendment Islamic request. At this step user can view all the fields that are amended with the old values and the amended value of the Guarantee/Standby undertaking. The screen displays the latest Guarantee /SBLC value before amendment and the new amended value.

1. On **Amendment Snapshot** screen, specify the fields, if any.

**Figure 2-13 Amendment Snapshot**

For more information on fields, refer to the field description table below.

**Table 2-17 Amendment Snapshot - Field Description**

Field	Description
<b>Sequence B</b>	
<b>Field Name</b>	Displays the fields that are amended.
<b>Amended Value</b>	Displays the Guarantee /SBLC value before amendment.
<b>Value as per Undertaking</b>	Displays the Guarantee /SBLC new amendment value after amendment.
<b>Sequence C</b>	
<b>Field Name</b>	Displays the fields that are amended.
<b>Amended Value</b>	Displays the Guarantee /SBLC value before amendment.
<b>Value as per Undertaking</b>	Displays the Guarantee /SBLC new amendment value after amendment.

- Click **Next**.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

**Table 2-18 Amendment Snapshot - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.

Table 2-18 (Cont.) Amendment Snapshot - Action Buttons - Field Description

Field	Description
<b>Documents</b>	<p>Click to View/Upload the required document.</p> <p>Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. <b>Modified Rate</b>	From the default value, if the rate is changed the value gets updated in this field.

Table 2-22 (Cont.) Charge Details - Field Description

Field	Description
<b>Currency</b>	This field displays the currency in which the commission have to be collected.
<b>Amount</b>	<p>This field displays the amount that is maintained under the product code.</p> <p>The commission rate, if available in Back Office defaults in OBTFPMCS. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPMCS.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>
<b>Modified Amount</b>	From the default value, if the amount is changed, the value gets updated in the modified amount field.
<b>Defer</b>	If enabled, charges/commissions has to be deferred and collected at any future step.
<b>Waive</b>	<p>Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.</p> <p>If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.</p>
<b>Split</b>	The user can split the Commission by enabling/ disabling the flag as per the requirement.
<b>Charge Party</b>	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
<b>Settlement Account</b>	Select the settlement account.
<b>Charge Details</b>	This field displays the <b>Charge Details</b> .
<b>Component</b>	This field displays the charge component type.
<b>Tag Currency</b>	This field displays the tag currency in which the charges have to be collected.
<b>Tag Amount</b>	This field displays the tag amount that is maintained under the product code.
<b>Currency</b>	This field displays the currency in which the charges have to be collected.
<b>Amount</b>	This field displays the amount that is maintained under the product code.
<b>Modified</b>	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
<b>Billing</b>	<p>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPMCS.</p> <p>The user can not enable/disable the option, if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>

Table 2-22 (Cont.) Charge Details - Field Description

Field	Description
<b>Defer</b>	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>
<b>Waive</b>	<p>Enable the toggle, if charges has to be waived.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if <b>Defer</b> toggle is enabled.</p>
<b>Split</b>	The bank User can split the Charges/Commission by enabling/disabling the flag as per the requirement.
<b>Charge Party</b>	Charge party is applicant by default. User can change the value to beneficiary.
<b>Settlement Account</b>	Select the settlement account.
<b>Tax Details</b>	The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/commission will be available on click of Re-Calculate button or on hand off to back-end system.
<b>Component</b>	This field displays the tax component.
<b>Type</b>	This field displays the type of tax component.
<b>Value Date</b>	This field displays the value date of tax component.
<b>Currency</b>	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
<b>Amount</b>	<p>This field displays the tax amount based on the percentage of commission maintained.</p> <p>You can edit the tax amount, if applicable.</p>
<b>Billing</b>	<p>If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>
<b>Defer</b>	<p>If taxes have to be deferred and collected at any future step, this option has to be enabled.</p> <p>The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>
<b>Settlement Account</b>	<p>System defaults the settlement account.</p> <p>The user can modify the settlement account.</p>
<b>Split Settlement</b>	Once the user clicks on the Recalculate button to fetch the Split Settlement details from Backoffice, new section "Split Settlement" will appear below the 'Tax' section. The default parties in Split row should be fetched from OBTF.
<b>Component</b>	The split component type eligible for Split .
<b>Currency</b>	The currency of split settlement.
<b>Amount</b>	The amount of split settlement.

Table 2-22 (Cont.) Charge Details - Field Description

Field	Description
<b>Split Settlement Details</b>	Split Settlement details section appears from Back office, when the user clicks on the Recalculate button.
<b>Sequence</b>	The sequence number is auto populated with the value, generated by the system.
<b>Component</b>	The split component type eligible for Split.
<b>Amount</b>	The system splits the respective Charge/Commission amount automatically between counter party and third party with 50% value by default. The bank user can modify the amount. More than two splits are not allowed.
<b>Customer</b>	Indicates the ID of the Customer in Split Settlement Details section.
<b>Account</b>	The system defaults the settlement account. User can modify the settlement account. System initiates a call to common core tables within OBTFPMCS to select the account.
<b>Account Currency</b>	This field defaults the currency of the account.
<b>Branch</b>	Indicates the branch of the customer where transaction is getting processed.
<b>Percentage</b>	The system splits the respective Charge/Commission percentage automatically between counter party and third party with 50% value by default. More than two splits are not allowed. The bank user can modify the amount. The system should validate that the total percentage of each component doesn't exceed 100 and the total amount of each component doesn't exceed total component amount.
<b>Exchange Rate</b>	System populates the exchange rate maintained.
<b>Original Exchange Rate</b>	System displays the Original Exchange Rate as simulated in split settlement details section.
<b>Party Type</b>	System displays the party type in split settlement details section.

Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(784,760/761).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task..</p>
<b>View Undertaking</b>	Clicking this button allows the user to view the undertaking details.
<b>Signatures</b>	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>
<b>Request Clarification</b>	Clicking this button allows the user to submit the request for clarification to the "Trade Finance Portal" for the transactions that are initiated offline.
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description.</p> <p>This reject reason will be available in the remarks window throughout the process.</p>
<b>Refer</b>	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Hold</b>	<p>The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.

Table 2-27 (Cont.) Summary - Action Buttons - Field Description

Field	Description
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Back</b>	Clicking on Back button, takes the user to the previous screen.
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

## 2.4 Legal Verification

The Legal verification stage allows the user to review and approved the guarantee message received under a Guarantee Amendment.

Legal Verification may be required for Guarantee amendment based on guarantee text format (standard vs non-standard) and other factors. In case Legal verification is required, this task is created in the system.

As a legal approver, log in to Oracle Banking Trade Finance Process Management (OBTfPM) system to see the legal verification required tasks for Trade Finance transactions listed in queue. On opening the task, the user views the guarantee text that has to be verified.

- [Legal Verification - Application Details](#)

### 2.4.1 Legal Verification - Application Details

The Legal verification stage allows the user to review and approved the guarantee message received under a Guarantee Amendment.

All fields displayed under Application details section, would be read only.

Provide the Application Details based on the description in the following table:

Table 2-28 Application Details - Field Description

## 2.5 Customer Response - Draft Confirmation

This topic helps you quickly get acquainted with the Customer Acknowledgement process.

In this section, the user can review and handle the customer's response received for the draft confirmation for Guarantee Amendment transactions, which is sent to the customer for their verification and confirmation. The system sends Draft MT767 along with up to seven MT775 messages as attachment to the customer.

The customer response can be received both by online and offline mode. In non-online mode, user receives the response in the branch. Log in into OBTFPM application, and open the task to see customer response pending tasks for trade transactions listed in queue. On opening the task, the user views and update the customer response.

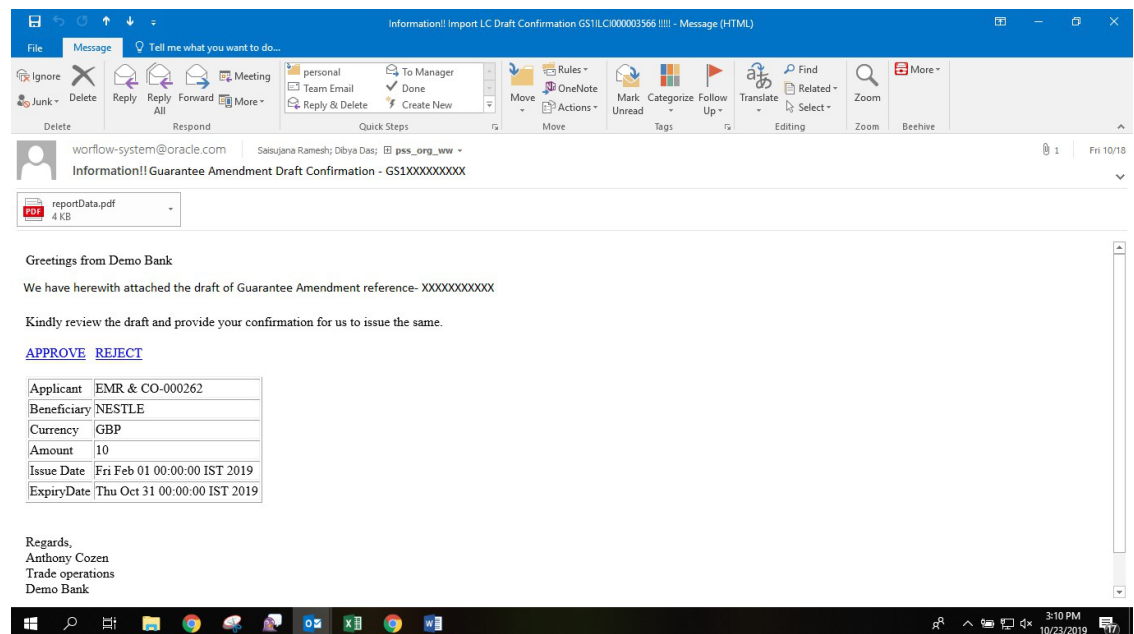

In online mode, the customer would receive a mail notification from the bank with a draft of the Guarantee Amendment. The customer can 'Approve' or 'Reject' post reviewing the draft through mail. The customer response will automatically be updated in OBTFPM. Based on the customer response; the task will move to the next stage or are referred to the previous stage for further update.

The draft mail will be addressed to a primary contact and a secondary contact. On approval or reject, an acknowledgement will be sent to the primary and secondary contacts confirming receipt of response. As the draft mail is sent to more than one recipients, system to follow the below guidelines to register the customer response.

- Approved from Primary Mail, Rejected from Secondary Mail - Application already Approved from Primary mail
- Approved from Primary Mail, Approved from Secondary Mail - Application already Approved from Primary mail
- Rejected from Primary Mail, Approved from Secondary Mail - Application already Rejected from Primary mail

- Rejected from Primary Mail, Rejected from Secondary Mail – Application already Rejected from Primary mail
- Approved from Secondary Mail, Approved from Primary Mail - Application already Approved from Secondary mail
- Approved from Secondary Mail, Rejected from Primary Mail - Application already Approved from Secondary mail
- Rejected from Secondary Mail, Approved from Primary Mail - Application already Rejected from Secondary mail
- Rejected from Secondary Mail, Rejected from Primary Mail - Application already Rejected from Secondary mail

<b>Hold</b>	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
<b>Cancel</b>	Cancel the inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Submit</b>	<p>On submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. Task will get moved to next logical stage of Guarantee/SBLC Amendment.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>

## 2.6 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Guarantee Amendment request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

### **Amount Block Exception Approval**

User can review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Open the task to view the summary tiles. The tiles should display a list of important fields with values.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPMCS) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
  - Settlement amount will be funded (outside of this process)
  - Allow account to be overdrawn during hand-off
- Refer:
  - Refer Refer back to DE providing alternate settlement account to be used for block.
  - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account Amount Bock Exception This section will display the amount block exception details.

### **Application Details**

All fields displayed under Application details section, would be read only.

### **Amount Bock Exception**

This section will display the amount block exception details.

**Table 2-34 (Cont.) Exception - Know Your Customer (KYC) Summary - Action Buttons - Field Description**

Field	Description
<b>Approve</b>	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.
<b>Back</b>	Task moves to previous logical step.

**Exception - Limit Check/Credit**

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

1. Log in into OBTFPMCS application, limit check exception queue. Limit check exception failed tasks for Trade Finance transactions must be listed in your queue.
2. Click **My Task**. The summary tiles displays summary of important fields with values.

 **Note:**

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

**Approve**

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

**Refer**

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

**Reject**

The transaction due to non-availability of limits capturing reject reason.

**Limit/Credit Check**

This section will display the amount block exception details.

**Summary**

Tiles Displayed in Summary:

<b>Approve</b>	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.
<b>Back</b>	Task moves to previous logical step.

## 2.7 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

The Approval user can approve a Guarantee Amendment Transaction.

1. Log in into OBTFPMCS application and on **Home** screen, click, **Task**.
2. Under **Task**, click **Free Task**.
3. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.
4. The acquired task will be available in **My Tasks** tab. Click **Edit** to approve the task.  
The **Approval Re-Key** pop-up screen appears.

Figure 2-23 Approval Re-Key

**Approval Rekey**

View Signature Documents Remarks

**Currency**

GBP

**Contract Amount**

GBP £150,000.00

Refer Close Proceed

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message and user will not be able to approve the task.

5. Open the task and re-key some of the critical field values from the request in the **Approval Re-Key** screen.

Some of the fields below will dynamically be available for re-key.:

- Currency
- Contract Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able to see the summary tiles and the details in the screen by drill down from tiles.

6. Click **Proceed** to proceed for the approval.

The **Approval Summary** screen appears. The user can view the Summary tiles which displays list of important fields with values.

7. Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

In case of MT798, on approval the task is handed off to back office system to create a Guarantee contract and generate the required MT760/761 messages.

 **Note:**

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFPMCS displays the Handoff failure error during the Approval of the task.
