Preface

- Purpose
- Audience

This document is intended for the following audience:

- · Documentation Accessibility
- Critical Patches
- Diversity and Inclusion
- Structure

This manual is organized into the following chapters:

- Conventions
- Related Documents
- · Screenshot Disclaimer
- · Acronyms and Abbreviations
- Basic Actions
- · Symbols and Icons

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management Cloud Service **Guarantee Issuance Islamic** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Abbreviation	Description
ОВТГРМ	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee Issuance

As part of Guarantee Issuance the applicant (importer or customer) approaches a bank and requests the bank to issue a Letter of Credit on their behalf to the beneficiary (exporter).

The various stages involved for issuance of an Guarantee are:

- Receive and verify application and other documents (Non Online Channel) Registration stage
- Input application details
- Upload of related mandatory and non mandatory documents
- Verify documents and capture details (Online/Non Online Channels)- Scrutiny stage
- Check balance availability for amount block
- Input/Modify details of the guarantee Data enrichment stage
- Conduct legal checks
- Check for limit availability
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks during any stage of transaction for other users to check and act
- Draft guarantee copy for legal verification
- Generate acknowledgement and draft guarantee copy to customer
- Notify customer on any negative statuses during any of the stages to the applicant
- Hand off approved transaction to back office

The Guarantee Issuance transaction uses AI technology and allows the user to:

- 1. Read the Guarantee Application / Guarantee Text document and populate whether the basic details are available or not.
- 2. Displays the inconsistencies in data found across the Guarantee Application presented under the Guarantee Issuance.

The AI assisted Guarantee Issuance is available only if AI related parameters are enabled and it is configured in the system.

In the subsequent sections, let's look at the details for Guarantee Issuance process:

This topic contains following sub-topics:

Common Initiation Stage
This topic provides the systematic instructions to initiate the new **Guarantee Issuance** request.

Registration

This topic provides the systematic instructions to initiate the Registration stage of Guarantee Issuance request.

OBTFPM- OBDX Bidirectional flow

This topic provides the systematic instructions to initiate the OBTFPM- OBDX Bidirectional flow.

Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

Scrutiny

This topic provides the systematic instructions to initiate the Scrutiny stage of Guarantee issuance request.

Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee issuance request.

Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

Customer - Acknowledgement

This topic helps you quickly get acquainted with the Customer Acknowledgement process.

Customer - Reject Advice

This topic helps you guickly get acquainted with the Customer - Reject Advice.

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new **Guarantee Issuance** request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On Home screen, click Trade Finance. Under Trade Finance, click Initiate Task.

The **Initiate Task** screen appears.

Figure 2-1 Initiate Task

On Initiate Task screen, specify the fields.

For more information on fields, refer to the field description table below.

Table 2-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
Customer ID	Click Search to search and select the required customer ID of the applicant or applicant's bank.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 2-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of Guarantee Issuance request.

The user initiates the transaction from Registration Stage, if the Guarantee Issuance request is given through branch either by fax, email or physical application form, the Guarantee Issuance process starts from the registration stage.

During registration stage, user can capture the basic details of the application, check the signature of the authorised signatories and upload the related documents of the applicant. It also enables the user to capture some additional product related details as an option. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for a Guarantee Issuance expert to handle the request in the next stage.

Guarantee received from Applicant Bank has following three scenarios:

- 1. Guarantee/SBLC received through SWIFT MT 760 in favour of a beneficiary through an Advising Bank and Advise Through Bank.
- 2. Counter Guarantee/SBLC received through MT 760 in favour of a bank to issue Local guarantee/SBLC which in turn can advise the Local Guarantee/SBLC to the Beneficiary through an Advising Bank.
- Counter Counter Guarantee/SBLC received through SWIFT MT 760, in favour a bank to issue Counter Guarantee/SBLC in favor another bank which in turn has to issue a Local Guarantee/SBLC in favour of the beneficiary.

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 2-2 LogIn Screen

 On Home screen, click Trade Finance. Under Trade Finance, click Bank Guarantee Issuance.

2. Under Bank Guarantee Issuance, click Guarantee - SBLC Issuance.

Figure 2-3 Guarantee - SBLC Issuance

The Guarantee - SBLC - Registration screen appears.

The Guarantee Issuance - Registration stage has two sections Application Details and Guarantee Details. Let's look at the details of Registration screens below:

Figure 2-4 Guarantee - SBLC Issuance - Registration - Application Details

3. On Guarantee - SBLC Issuance - Registration - Application Details screen, specify the fields.

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below. In case of MT798, Application Details are defaulted to SWIFT.

Table 2-3 Guarantee - SBLC Issuance - Registration - Application Details - Field Description

Field	Description

	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Effective Date	The effective date is defaulted from guarantee issuance. The user can change the date.
Tenor	Specify the value for tenor and select the value from the drop-down. The drop down is enabled, if Expiry Type is COND and FIXD .
Date of Expiry	Select the expiry date of the LC. The expiry date can be equal or greater than the issue date. If the Expiry Date is earlier than the issue date, system will provide an error and if the 'Expiry Date is equal to the Issue Date', system will provide a alert message.
	The field is enabled, if Expiry Type is COND and FIXD . If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Expiry Condition/Event	Specify the expiry condition/event. This field specifies the documentary condition/event that indicates when the local undertaking will cease to be available.
	The field is enabled, if Expiry Type is COND and CONU.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Applicant Bank	This field displays the applicant bank details , if Received From Applicant Bank option is enabled.
	If request is not received from applicant bank, this field must be blank.

Table 2-4 (Cont.) Guarantee Issuance - Registration - SBLC/Guarantee Details - Field Description

Field	Description
Applicant	This field displays the applicant details based on the details provided in Application Details section.
	Specify the applicant or alternatively, click Search to search and select the applicant from the look-up, if Received From Applicant Bank option is enabled.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Beneficiary	Specify the beneficiary or click Search to search and select the beneficiary in whose favor the undertaking (or counter-undertaking) is issued. If beneficiary is not a customer of the bank, then choose WALKIN customer id and provide the beneficiary details. If beneficiary is a customer and KYC status is not valid, then system will display alert message.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), Customer ID to be resolved from incoming message. If required use Walk-in ID. Bene ID/ name should be made amendable by the user.
Advising Bank	Specify the advising bank name or click Search to search and select the advising bank based on Party ID/Party Name.
	User can also input the party ID and on tab out system will validate and populate the 'Advising Bank' name.
	Note: In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message "RMA arrangement not available, please change the bank or use MAIL Medium".
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the
	field is read only and populated from Incoming MT 760.

Table 2-4 (Cont.) Guarantee Issuance - Registration - SBLC/Guarantee Details - Field Description

Field	Description
Counter SBLC/Guarantee Issuing Bank	Specify the Counter Guarantee Issuance bank name or click Search to search and select the Counter Guarantee Issuance Bank bank
	This field is enabled, if Purpose of Message is ICCO .
	Note: In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message "RMA arrangement not available."
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
Local SBLC/Guarantee Issuing Bank	Specify the Local SBLC/Guarantee Issuance bank name or click Search to search and select the Local SBLC/Guarantee Issuance Bank bank.
	This field is enabled, if Purpose of Message is ICCO or ISCO .
	Note: If Local Issuing Bank has value and Counter Issuing Bank has no value, and in case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
Supplementary	Specify the additional amounts related to undertaking.
Information About Amount	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), Customer ID to be resolved from incoming message. If required use Walk-in ID. Bene ID/ name should be made amendable by the user.
Accountee	Specify the accountee or click Search to search and select the accountee.
Amount In Local Currency	Read only field. After the tab out of 'Currency Code, Amount' field, system fetches the local currency equivalent value for the transaction amount from back office (with decimal places).
Obligor/ Instructor Party	Specify the Local SBLC/Guarantee Issuance bank name or click Search to search and select the name of the obligor from the lookup.

Table 2-4 (Cont.) Guarantee Issuance - Registration - SBLC/Guarantee Details - Field Description

Field	Description
Obligor Collateral Percentage	Specify the value for obligor collateral percentage. This field is mandatory if the field Obligor/Instructor Party has value.
Auto Close	Enable the option, if Auto close is required for that transactions. Disable the option, if Auto close is not required for that transactions.
Closure Date	This field displays the "Closure Date" defaulted by the system, with the value "Expiry Date" + No of Closure days maintained in the respective Product in which the contract has been created. System automatically close the contract on the specified "Closure Date" if "Auto Close" is selected as "Yes" for the specific contract. User can modify the system defaulted "Closure Date" and system should validate the same for the below conditions,
	Closure Date must be after the Issue Date. Closure Date must be after the Expiry Date.
	 Closure Date must be after the Expiry Date. Closure Date cannot be blank, when the "Auto Close" is checked.
Revenue Sharing Percentage	Read only field. System populates the values from the "Trade Finance Customer Maintenance" if the below conditions are met. Purpose of Message is "ISCO" or "ICCO" CIB or LIB is captured in the Guarantee Contract. If CIB and LIB is available in the Guarantee Contract, then system should populate the "Revenue sharing Percentage" maintained against party CIB. If LIB is only available without CIB in the Guarantee Contract, then system should populate the "Revenue sharing Percentage" maintained against party LIB.
	Percentage should be populated after tab out from LIB field.
Limits verification Required	Enable the option to enable limit check during the process flow of this request. Disable the option to disable limit check during the process flow of this request.
Language Code	Specify the language code or click Search to search and select the language code from the look-up.

5. Click Submit.

The task will move to next logical stage of Guarantee Issuance. For more information refer Scrutiny.

For more information on action buttons, refer to the field description table below.

 Table 2-5
 Guarantee Issuance - Registration - Action Buttons - Field Description

Field	Description
Signatures	Click the Signature button to verify the signature of the customer/bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.
	If more than one signature is available, system should display all the signatures.

Table 2-5 (Cont.) Guarantee Issuance - Registration - Action Buttons - Field Description

Field	Description
Documents	Upload the documents received. Application displays mandatory documents to be uploaded for Guarantee Issuance.Place holders are also available to upload additional documents submitted by the applicant
Remarks	Specify any additional information regarding the Guarantee Issuance. This information can be viewed by other users processing the request.
Customer Instruction	Click to view/ input the following: Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancels the Guarantee issuance task. Details entered will not be saved and the task will be removed.
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.
Submit	Click Submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. The task will move to next logical stage of Guarantee Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.

2.3 OBTFPM- OBDX Bidirectional flow

This topic provides the systematic instructions to initiate the OBTFPM- OBDX Bidirectional flow.

As a part of Digital Experience, customers can initiate Trade Finance Transactions from online channels and the respective task will be available in OBTFPM for further handling. Oracle Banking Trade Finance Process Management (OBTFPM) user, for task received from online channel, raise clarification and receive response from the customer.

 Customer initiates the Trade Finance transaction in Online channel (OBDX) and upload the necessary documents.

- 2. The task created will land in the Scrutiny stage of OBTFPM for handling by Trade expert for reviewing and identifying mismatch/incomplete data.
- In the Scrutiny, Data Enrichment or Approval the bank user may require clarification from customer, OBTFPM user clicks Request Clarification button to request for online clarification from customer.

- On The Import LC Issuance Registration Application Details screen, specify the fields.
- 5. The **Request Clarification** detailed screen appears, user enters the information and clicks Save, the information should be sent to customer.

6. OBTFPM user should be able to see the details in the View Clarification window and the status will be Clarification Requested. The user can click Re clarification if required.

The task goes to Awaiting Customer Clarification state until the response received from the customer.

- 8. Click Edit.
- The user can click Accept Clarification button, if the query raised has been answered by the customer.
 - The status should change to **Clarification Accepted** on next the task moves to the next logical stage.
- 10. Bank user checks the Clarification and opens the **Documents** Tab. System displays both the new document uploaded and the metadata for deleted document and the deleted document is displayed in a blurred way. User can open the new document, the deleted document cannot be opened. System should also increment the version number of the

documents.

2.4 Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer. **Pre- Conditions:**

- Customer Maintenance details are replicated from OBTF to OBTFPM.
- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
- Customer Maintenance details are replicated from OBTF to OBTFPM.
- 2. In OBTFPM, user clicks **Request Clarification**, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online". In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder.
- 3. In case submission mode is not "Online", the system will validates if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
- 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

2.5 Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

The user can link an existing uploaded document in any of the process stages. In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored

in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

Specify **User ID** and **Password**, and navigate to **Registration** screen.

1. On the header of **Registration** screen, click, **Documents**.

The **Document** pop-up screen appears.

2. Click the , click Add Additional Documents button/ link.

The **Document** screen appears.

Field	Description
Document Type	Select the document type from list. Indicates the document type from metadata.
Document Code	Select the document Code from list. Indicates the document Code from metadata.
Document Title	Specify the document title.
Document Description	Specify the document description.
Remarks	Specify the remarks.
Document Expiry Date	Select the document expiry date.
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.

3. Select the document to be uploaded or linked and click the Link Document link.

The link **Document** pop up appears.

The value selected in **Document Type** and **Document Code** of **Document** screen are defaulted in the **Link Document Search** screen.

4. Click **Fetch** to retrieve the details from DMS.

System displays all the documents available for the given **Document Type** and **Document Code** for the customer.

Field	Description
Customer ID	This field displays the transaction Customer ID.
Document ID	Specify the document ID.
Document Type	Select the document type from list.
Document Code	Select the document Code from list.
Search Result	
Document ID	This field displays the document ID from metadata.
Customer ID	This field displays the transaction customer ID.
Document Type	This field displays the document type from metadata.
Document Code	This field displays the document code from metadata.
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.

5. Click **Link** to link the particular document required for the current transaction.

Post linking the document, the user can View, Edit and Download the document.

6. Click Edit icon to edit the documents.

The **Edit Document** screen is displayed.

2.6 Scrutiny

This topic provides the systematic instructions to initiate the Scrutiny stage of Guarantee issuance request.

On successful completion of Registration of an Guarantee Issuance, the task moves to Scrutiny stage. At this stage the gathered information during Registration are scrutinized. In case of MT798 message, if the User encounters validation error during handling the task, user can put the task on 'Hold' and resume after getting the correct details from the customer (by manually sending a message through common group messages). The user if required can update the editable fields. The fields that have been changed/updated have to be highlighted by the system and the user can check the incoming message place holder for the original value.

Guarantee Issuance request initiated by Customer having SWIFT for corporates (MT798-MT784/MT760/MT761) will be STP and task will be available in Scrutiny stage for further handling by the Bank User.

The Incoming MT798 message contains three sections.

- MT798 Index Message which contains the Sub message type 784
- MT798 Details Message which contains the Sub Message type 760 (MT700 tags with values)
- MT798 Extension Message which contains the Sub Message type 761 (MT761 Extension message tag values) if applicable.
 - The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

Do the following steps to acquire a task currently at Scrutiny stage:

Specify **User ID** and **Password**, and login to **Home** screen.

- On Home screen, click Task.
- 2. Under Task, click Free Task.

Figure 2-5 Free Task

The **Free Task** screen appears.

- 3. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.
- The acquired task will be available in My Tasks tab. Click Edit to scrutinize the registered task.

Figure 2-6 My Task

The Scrutiny stage has the following hops for data capture:

- Main Details
- Guarantee Preferences
- Local Guarantee

- Additional Details
- Summary

Let's look at the details for Scrutiny stage. User can enter/update the following fields. Some of the application details that are already having value from Registration channels may not be editable.

Main Details

This topic provides the systematic instructions to initiate the main details of Scrutiny stage of Guarantee Issuance request.

Guarantee Preferences

This topic provides the systematic instructions to capture the Guarantee preference details in Scrutiny tage.

Local Guarantee

This topic provides the systematic instructions to capture the local guarantee details of Scrutiny stage.

Additional Details

This topic provides the systematic instructions to capture the additional details

Summary

This topic provides the systematic instructions to view the summary of Guarantee Issuance request.

2.6.1 Main Details

This topic provides the systematic instructions to initiate the main details of Scrutiny stage of Guarantee Issuance request.

Main details section has two sub section as follows:

- Application Details
- Guarantee Details.

Application Details

1. On **Scrutiny - Main Details** screen, specify the fields that were not entered at Registration stage.

Figure 2-7 Scrutiny - Main Details

Audit

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below. In case of MT798, Application Details are defaulted to SWIFT.

Table 2-6 Guarantee - SBLC Issuance - Registration - Application Details - Field Description

Field	Description
Received from Applicant Bank	Read only field. This field displays, if Guarantee Issuance request is received from the applicant or the applicant's bank.
Received From - Customer ID	Read only field. This field displays the Customer ID.

Table 2-6 (Cont.) Guarantee - SBLC Issuance - Registration - Application Details - Field Description

Field	Description
Received From - Customer Name	Read only field.
Name	This field displays the name of the customer or applicant. This field will be auto populated based on the selected customer ID.
Branch	Read only field.
	By default, customer's home branch will be displayed based on the customer ID and it can be changed, if required.
	Note: Once the request is submitted, Branch field is non-
	editable.
Currency Code, Amount	Read only field.
	This field displays the currency code and the value of LC (with decimal places) as per currency type.
Priority	Set the priority of the Guarantee issuance request as Essential/ Critical/Low/Medium/High. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit of Registration stage.
Submission Mode	Read only field.
	This field displays the submission mode of Guarantee Issuance request.
	By default the submission mode will have the value as 'Desk'.
	Desk - Request received through Desk
	Fax - Request received through Fax
	Email - Request received through Email SWIFT-Non STP - Request received through SWIFT
	 SWIFT-Non STP - Request received through SWIFT Courier - Request received through Courier
Process Reference	Read only field.
Number	Unique OBTFPMCS task reference number for the transaction.
	This is auto generated by the system based on process name and branch code.

Table 2-6 (Cont.) Guarantee - SBLC Issuance - Registration - Application Details - Field Description

Field	Description
Application Date	Read only field. By default, the application displays the branch's current date.
	Note: Future date selection is not allowed.
Customer Reference Number	Specify a unique Customer Reference Number which is provided by the applicant/applicant bank.
Copy Existing Undertaking	Specify the existing undertaking number, the system populates the details of the guarantee. Alternatively, click Search to search and select the existing undertaking to be copied, if required.
	If an existing undertaking is to be copied, the details of the LC is captured here.
Template Name	Specify the template name if the applicant details are already captured and the data can be reused with the template to reduce the effort. Alternatively, click Search to search and select the Template code.
	The details pertaining to the subsequent screens in scrutiny and data enrichment screens will be persisted and populated when you move to the relevant screens.
	Before populating the screens, application will check if there are any existing values and will display an alert message 'Value exist already in few fields - Do you want to use the template - Yes/No'. If the you click on Yes the existing details will be over-written with the template values
	This is applicable only for the non-online Guarantee Issuance request.
View Guarantee/ SBLC	Click to view the details of the selected template in Template Name.
Use	Click to use the selected template in Template Name.

Guarantee Details

The fields listed under this section are same as the fields listed under the Guarantee Details section in Registration stage. During Registration, if user has not captured input, then user can capture the details in this section.

Figure 2-8 Guarantee Details

Note:

The fields which are marked as **Required** are mandatory.

For more information on action buttons, refer to the field description table below.

Table 2-7 Guarantee Issuance - Registration - Guarantee Details - Field Description

Field	Description
Form of Undertaking	System dafaults the type of LC (Documentary Credit) as per the requirement. By default LC type is Irrevocable. • DGAR - Guarantee • STBY - Standby LC User can change the value of Form of Undertaking.
Type of Undertaking	System dafaults the type of undertaking. User can change the value of type of Undertaking.
Narrative	Specify the narrative in this field. This field is enabled if Type of Undertaking field values is OTHR .
Product Code	Read only field. This field displays the product code . The product codes will be listed based on the selected value in Form of Undertaking.
Product Description	Read only field. This field displays the description of the product as per the product code.

Table 2-7 (Cont.) Guarantee Issuance - Registration - Guarantee Details - Field Description

Field	Description
Undertaking Number	Read only field.
	This field displays the undertaking number available in the guarantee/SBLC.
User Reference Number	This field displays the user reference number, simulated from the back office. Number will be populated on the selection of Product Code.
	User can change the User Reference Number.
Purpose of Message	System dafaults the purpose of message as enetered in Regesitration stage. The values are: ISSU - Issue of Undertaking: In case the Undertaking is sent through SWIFT MT 760, the advising bank has to just advise the Undertaking to the Beneficiary.
	In case the Undertaking is advised through Mail Advice, the guarantee can be directly mailed by the Issuing bank to the Beneficiary.
	This is applicable for Guarantees/ Local Guarantees and SBLC (Standby LC) • ICCO - Issuance of counter-counter-undertaking: Issuance of counter-counter-undertaking and request to issue counter-undertaking.
	The bank receiving the Undertaking (usually through SWIFT MT 760) is required to issue a Counter-undertaking to another bank requesting the third Bank to issue Local Undertaking favoring the Beneficiary. • ISCO - Issuance of counter undertaking: Issuance of counter undertaking and request to issue local undertaking
	The bank receiving the Undertaking (usually through SWIFT MT 760) is required to issue Local Undertaking to the beneficiary.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), Purpose of Message is 'ISCO'. If the Guarantee Issuance is at Local Issuing Bank (LIB), Purpose of Message is 'ISSU'.
	The user can change the purpose of message.

Table 2-7 (Cont.) Guarantee Issuance - Registration - Guarantee Details - Field Description

	,
Field	Description
File Identification	System dafaults the type of delivery channel and its associated file name or reference from the available values. The options are: COUR - Courier delivery EMAL - Email transfer FACT - SWIFTNet FileAct FAXT - Fax transfer HOST - Host-to-Host MAIL - Postal Delivery OTHR - Other delivery channel User can change the value of File Identification.
Narrative	Specify the narrative in this field. This field is enabled if File Identification field values is OTHR .
Date of Issue	Read only field. This field displays the branch's current date as date of issue defaulted from the application. Application will populate the Date of Issue field with branch date on approval if date of approval is later than date of Registration.
Applicable Rules	System dafaults the applicable rules for guarantee issuance. The options are: URDG - Uniform rules for demand guarantees UCPR - Uniform customs and Practices ISPR - International standby Practices NONE - Not subject to any rules OTHR User can change the value of Applicable Rules.
Narrative	Specify the narrative in this field. This field is enabled if Applicable Rules field values is OTHR .
Expiry Type	System dafaults the expiry type from guarantee issuance. This field indicates whether undertaking has specified expiry date or is open-ended. The options are: COND - With Expiry CONU - Without Expiry FIXD - Specified expiry date (with/without automatic expansion) OPEN - No specific date of expiry User can change the value of Expiry Type.
Effective Date	The effective date is defaulted from guarantee issuance. The user can change the date.
Tenor	Specify the value for tenor and select the value from the drop-down. The drop down is enabled, if Expiry Type is COND and FIXD .
Date of Expiry	Select the expiry date of the LC. The expiry date can be equal or greater than the issue date. If the Expiry Date is earlier than the issue date, system will provide an error and if the 'Expiry Date is equal to the Issue Date', system will provide a alert message.

Table 2-7 (Cont.) Guarantee Issuance - Registration - Guarantee Details - Field Description

Field	Description
Expiry Condition/Event	System dafaults the documentary condition/event that indicates when the local undertaking will cease to be available.
	User can change the expiry condition/event, , if Expiry Type is COND and CONU.
Applicant Bank	Read only field.
	This field displays the applicant bank details, if Received From Applicant Bank option is enabled. If request is not received from applicant bank, this field must be blank.
Applicant	This field displays the applicant details based on the details provided in Application Details section.
	Specify the applicant or alternatively, click Search to search and select the applicant from the look-up, if Received From Applicant Bank option is enabled.
Beneficiary	System dafaults the beneficiary whose favor the undertaking (or counter-undertaking) is issued from the Regeistration stage. If beneficiary is not a customer of the bank, then choose WALKIN customer id and provide the beneficiary details. If beneficiary is a customer and KYC status is not valid, then system will display alert message. User can change the beneficiary.
Advising Bank	Specify the advising bank name or click Search to search and select
	the advising bank based on Party ID/Party Name.
	User can also input the party ID and on tab out system will validate and populate the 'Advising Bank' name.
	Note: In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message "RMA arrangement not available, please change the bank or use MAIL Medium".

Table 2-7 (Cont.) Guarantee Issuance - Registration - Guarantee Details - Field Description

Field	Description
Counter SBLC/Guarantee Issuing Bank	System dafaults the Counter Guarantee Issuance bank name from the Registration stage.
	This field is enabled, if Purpose of Message is ICCO .
	Note: In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message "RMA arrangement not available."
	User can change the Counter SBLC/Guarantee Issuing Bank.
Local SBLC/Guarantee Issuing Bank	System dafaults the Local SBLC/Guarantee Issuance bank name from the Registration stage.
	This field is enabled, if Purpose of Message is ICCO .
	Note: If Local Issuing Bank has value and Counter Issuing Bank has no value, and in case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".
	User can change the Local SBLC/Guarantee Issuing Bank.
Supplementary Information About Amount	Specify the additional amounts related to undertaking.
Accountee	Specify the accountee or click Search to search and select the accountee.
Amount In Local Currency	Read only field.
	This field displays the Local currency and amount value. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).
Obligor/ Instructor Party	Specify the Local SBLC/Guarantee Issuance bank name or click Search to search and select the name of the obligor from the lookup.

Automatic Extension Details	Specify the Automatic Extension Details details based on following table.
Automatic Extension Required	Enable the option, if automatic extension for expiry date is required. Disable the option, if automatic extension for expiry date is not required.
	Note: This field is not applicable if, Expiry Type field in registration stage has value as Open.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), this button is enabled if 23F field has value.
Auto Extension Period	Select the auto extension period for expiry date from the following options. This field is enabled, if Auto Extension Required toggle is set On. Days One year Others
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
	The field displays the content from MT760 and all the applicable MT 761.
Extension Details	Specify the extension details for the expiry date. This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field value is Days/Others .
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Non-Extension Details	Specify the non-extension details for automatic expiry date extension such as notification methods or notification recipient details. This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field has values.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.

Table 2-10 (Cont.) Guarantee Preferences - Field Description

Field	Description
Non-Extension Notice Period	Specify the non-extension notice days. This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field has values.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Auto Extension Final Expiry Date	Specify the final extension date for automatic expiry date extension after which no automatic extension is allowed. This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field has values.
	The user can manually enter the value. This date/duration can be beyond the calculated value provided in the "Auto Extension Period".
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Liability Change Schedule	Specify the details of increase or decrease of liability on a prescheduled date as applicable.
Liability Change Type	Select the liability change type. This field describes the basis for liability change. The options are: Event Based - User can enter the Event details in "Additional Details" field. The actual liability change for Event based type should be operationally handled by the user based on the event details Time Based - The liability change should happen automatically on the pre-scheduled date as given.
Additional Details	Specify the additional details to increase or decrease of liability or both are involved.
Standard Type	Select whether liability change is standard or non-standard. The options are: Standard Non-standard This field is disable if, Liability Change Type is Event Based.
Liability Type	Select whether increase or decrease of liability or both are involved. The options are: Increase Decrease Boths
Number of Periods	Specify the numeric value of the period corresponding to the units.
Units	Select the unit value. The options are:
Amount	Specify the liability amount that should be increased or decreased on the liability change date.

Table 2-10 (Cont.) Guarantee Preferences - Field Description

Field	Description
Percentage	Specify the amount of liability to be changed or percentage of liability to be changed. If percentage is chosen, then system should calculate the equivalent amount of liability to be changed.
Schedule Grid	If the Liability Change Type is Time Based, and Standard Type is Non-standard, the user can input the details in the schedule grid. Click '+' sign to add the records in Schedule Grid.
Sequence Number	Displays the serial number of the liability change.
Scheduled Date	Specify the date on which liability change to happen or select the date from the date picker.
Amount	Specify the liability Amount that should be increased or decreased on the liability change date.
Percentage	Specify the amount of liability to be changed or percentage of liability to be changed.
	If percentage is chosen, then system should calculate the equivalent amount of liability to be changed.
Liability Type	Select whether increase or decrease of liability or both are involved. The options are: Increase Decrease Boths
Action	Click Edit icon to edit the schedule record. Click Delete icon to delete the schedule record.
Demand Indicator	Specify the Demand Indicator details
Demand Indicator	Select the demand indicator from the drop-down. This field specifies whether partial and/or multiple demands are not permitted.
	The options are: Multiple demands not permitted - Partial amount can be claimed Multiple and partial demands not permitted- Entire amount can be claimed.
	Partial demands not permitted - Entire amount can be claimed.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Underlying Transaction Details	Specify the Underlying Transaction Details.
Underlying Transaction Details	Click Search to search and select the underlying business transaction details (for which the undertaking is issued) from the look-up. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Delivery of Loacal Undertaking	Specify the Delivery of Loacal Undertaking details.

Table 2-10 (Cont.) Guarantee Preferences - Field Description

Field	Description
Delivery of Loacal Undertaking	Select the method of the delivery from the following options by which the original local undertaking needs to be delivered. The options are: COLL - By Collection COUR - By Courier MAIL - By Mail MESS - By Messenger - Hand Deliver OTHR - Other Method REGM - By Registered Mail or Airmail This field is not applicable, if Purpose of Message field value is ICCO/ISCO. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Narrative	Specify the description of method of delivery of original undertaking. This field is not applicable, if Delivery of Local Undertaking field value is COUR/OTHR . If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field
	is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Delivery to/Collection by	Select the details of to whom the original local undertaking is to be delivered or by whom the original local undertaking is to be collected. The options are: BENE - Beneficiary OTHR - Other Method
	This field is enabled, if Purpose of Message field value is ICCO/ ISCO .
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Narrative	Specify the description of method of delivery of original undertaking. This field is not applicable, if Delivery to/Collection by field value is OTHR .
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Transfer Details	Specify the Transfer Details.
Transfer Indicator	Select the check box if the undertaking is transferable. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.

Table 2-10 (Cont.) Guarantee Preferences - Field Description

Field	Description
Transfer Conditions	Specify the conditions to transfer the undertaking This field is available, if Transfer Indicator check box is selected.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Others	Specify the Others detail.
Sender to Receiver Information	Click Search to search and select the additional information for receiver from the look-up. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Charges	Specify the value for the charger for the undertaking. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Advice Through Bank	Specify the additional bank to advice the undertaking. This field is enabled only if Advising Bank in Main Details hop has value.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
	The field displays the content from MT760 and all the applicable MT 761.
Available With	This field identifies the bank with which the credit is available of the issued LC.
	User must capture the bank details or any free text. Search the bank with SWIFT code (BIC) or Bank Name.
	On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address gets defaulted.
	Note: This field is applicable only for SBLC.
	,
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
	The field displays the content from MT760 and all the applicable MT 761.

Table 2-10 (Cont.) Guarantee Preferences - Field Description

Field	Description
Confirmation Instructions	Select the confirmation instruction from the available values. The options are: CONFIRM MAY ADD WITHOUT
	Note: This field is applicable, if Form of Undertaking field value is STBY - Standby LC.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Requested Confirmation Party	Select the requested confirmation party from the available options. The options are: Advising Bank Advise Through Bank Others This field is not enabled, if Confirmation Instructions field value is Confirm or May Add.
	Note: This field is applicable only for SBLC.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Confirming Bank	Specify the name of confirming bank . This field is not enabled, if Requested Confirmation Party field value is Others .
	Note: This field is applicable only for SBLC.
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760. The field displays the content from MT760 and all the applicable MT 761.

2. Click Next.

The task will move to next data segment.

Table 2-11 Guarantee Preferences - Action Buttons - Field Description

Field	Description
Al Summary	Documents for Export LC are scanned, and their data is automatically filled into the appropriate fields on the user interface. OBTFPM user uploads documents for Guarantee Application/ Guarantee text at Registration stage. Task moves to Scrutiny stage after basic details including
	product code are entered. Data extraction occurs upon Registration submission.
	Scrutiny user verifies extracted data prompted by system.
	 Al reads documents uploaded based on their classification in DMS, scrutiny ensures accuracy, user updates the data if necessary, confirms and updates findings.
	 The extracted details will then be captured in the respective UI fields.
	Scrutiny user will verify the standard data along with the data available in the document uploaded to ensure that data check is correct.
	 The AI summary screen should display the Application Number with consolidated Result 'Pass' or 'Fail'.
	 User can click Details button to see the detailed questionnaire and the response
	 Click Close button to close the AI summary screen and proceed with the transaction processing.
	 Once the data check is done the findings will be updated in the Al Summary section.
	 The system should be able to read both structured and unstructured data within documents.

	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Delivery of Local Undertaking	Specify the Delivery of Local Undertaking details.
Delivery of Loacal Undertaking	Select the method of the delivery from the following options by which the original local undertaking needs to be delivered. The options are: COLL - By Collection COUR - By Courier MAIL - By Mail
	MESS - By Messenger - Hand Deliver
	• OTHR - Other Method
	• REGM - By Registered Mail or Airmail This field is not applicable, if Purpose of Message field value is
	ICCO/ISCO. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.

Table 2-12 (Cont.) Local Guarantee - Field Description

Field	Description
Narrative	Specify the description of method of delivery of original undertaking. This field is not applicable, if Delivery of Loacal Undertaking field value is COUR/OTHR .
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Delivery to/Collection by	Select the details of to whom the original local undertaking is to be delivered or by whom the original local undertaking is to be collected. The options are: BENE - Beneficiary OTHR - Other Method
	This field is not applicable, if Purpose of Message field value is ICCO/ISCO .
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Narrative	Specify the description of method of delivery of original undertaking. This field is enabled, if Delivery to/Collection by field value is OTHR .
	If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.
	If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.

2. Click Next.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

Table 2-13 Local Guarantee - Action Buttons - Field Description

Field	Description
Documents	Click to View/Upload the required document.
	Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the Guarantee. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.

Table 2-13 (Cont.) Local Guarantee - Action Buttons - Field Description

Field	Description
Customer Instruction	Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	This button displays the multiple messages (MT760 + up to 7 MT761. Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance. In case of MT798, the User can click and view the MT798 message(784,760/761).
	In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task. In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.
Signatures	Click the Signature button to verify the signature of the customer/bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Cancel	Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Table 2-13 (Cont.) Local Guarantee - Action Buttons - Field Description

Field	Description
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	R1- Documents missing
	R2- Signature Missing
	R3- Input Error
	R4- Insufficient Balance/Limits
	R5 - Others
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

2.6.4 Additional Details

This topic provides the systematic instructions to capture the additional details

1. On Additional Details screen, click on any Additional Details tile to view the details.

Limits and Collaterals

If the Guarantee Issuance is at Counter Issuing Bank (CIB), the user can enter the details.

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number "to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFPMCS) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

Signatures	Click the Signature button to verify the signature of the customer/bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Cancel	Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Table 2-17 (Cont.) Summary - Action Buttons - Field Description

Field	Description
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	R1- Documents missingR2- Signature Missing
	R3- Input Error
	R4- Insufficient Balance/Limits
	R5 - Others
Back	On click of Back, system moves the task back to previous data segment.
Submit	Task will get moved to next logical stage of Guarantee issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided. n case of duplicate documents' system will terminate the process after handing off the details to back office.
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit

2.7 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee issuance request.

On successful completion of Registration of an Guarantee Issuance, the task moves to Data Enrichment stage. As part of Data Enrichment, user can enter/update basic details of the incoming request.

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Do the following steps to acquire a task which completed the registration and scrutiny and currently at Data enrichment stage.

Specify **User ID** and **Password**, and login to **Home** screen.

- 1. On **Home** screen, click, **Task**.
- 2. Under Tasks, click Free Tasks.

Figure 2-16 Free Tasks

The **Free Tasks** screen is displayed.

- Select the appropriate task and click Acquire & Edit to edit the task or click Acquire to edit the task from My Tasks.
- The acquired task will be available in My Tasks tab. Click Edit to scrutinize the registered task.

Figure 2-17 My Tasks

Let's look at the details for Data Enrichment stage. The Data Enrichment stage has the following hops for data capture:

Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee Issuance request.

Guarantee Preferences

This topic provides the systematic instructions to capture the Guarantee preference details in Data Enrichment tage.

Additional Fields

This topic provides the systematic instructions to capture the additional fields.

Local Guarantee

This topic provides the systematic instructions to capture the local guarantee details of Data Enrichment stage.

Advices

This topic provides the systematic instructions to capture the advices details.

Additional Details

This topic provides the systematic instructions to capture the additional details.

• Settlement Details

This topic provides the systematic instructions to capture the settlement details of Guarantee issuance request.

Summary

This topic provides the systematic instructions to view the summary of Guarantee Issuance request.

2.7.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee Issuance request.

Main details section has two sub section as follows:

- Application Details
- SBLC/Guarantee Details.

Application Details

All fields displayed under Basic details section, would be read only except the **Priority**, **Application Date** and **Customer Reference Number**' fields. For more information on the fields, refer Main Details of **Scrutiny** stage.

 On Data Enrichment - Main Details screen, specify the fields that were not entered at Registration stage.

Figure 2-18 Data Enrichment - Main Details

SBLC/Guarantee Details

The fields listed under this section are same as the fields listed under the **SBLC/ Guarantee Details** section in **Scrutiny** stage. For more information on the fields, refer to **Main Details** section of **Scrutiny** stage. During Registration, if user has not captured input, then user can capture the details in this section.

Figure 2-19 SBLC/Guarantee Details

2. Click Next.

The task will move to next data segment.

Table 2-18 Main Details - Action Buttons - Field Description

Field	Description
Documents	Click to View/Upload the required document.
	Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the Guarantee issuance. This information can be viewed by other users processing the request.
	Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	 Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPMCS user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	This button displays the multiple messages (MT760 + up to 7 MT761. Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance. In case of MT798, the User can click and view the MT798 message(784,760/761). In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task. In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.
Signatures	Click the Signature button to verify the signature of the customer/bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Cancel	Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.

Table 2-18 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Field	Description
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.
	This option is used, if there are any pending information yet to be received from applicant.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: R1- Documents missing R2- Signature Missing
	 R3- Input Error R4- Insufficient Balance/Limits R5 - Others
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.

2.7.2 Guarantee Preferences

This topic provides the systematic instructions to capture the Guarantee preference details in Data Enrichment tage.

1. On Data Enrichment - Guarantee Preferences screen, specify the fields.

Figure 2-20 **Data Enrichment - Guarantee Preferences**

For more information on fields, refer to the field description table of Guarantee Preferences in Scrutiny stage.

Click Next.

The task will move to next data segment. For more information on action buttons, refer to the field description Action Buttons of Guarantee Preferences in Scrutiny stage.

2.7.3 Additional Fields

This topic provides the systematic instructions to capture the additional fields.

Banks can configure user defined fields as per their requirement in the Additional Fields Screen.

On **Additional Fields** screen, specify the fields, if any.

Figure 2-21 Additional Fields

Click Next.

The task will move to next data segment. For more information refer Local Guarantee. For more information on action buttons, refer to the field description table below.

Table 2-19 Additional Fields - Action Buttons - Field Description

Field	Description

2.7.6 Additional Details

This topic provides the systematic instructions to capture the additional details.

1. On **Additional Details** screen, click on any Additional Details tile to view the details.

Figure 2-24 Additional Details

2. Click Save and Close to save the details and close the screen.

Limits and Collaterals

For more information, refer to the field description table of Additional Details in **Scrutiny** stage.

3. Click Save and Close to save the details and close the screen.

Charge Details

For more information, refer to the field description table of Additional Details in **Scrutiny** stage.

4. Click **Save and Close** to save the details and close the screen.

Preview Mesage

This screen provides preview of draft guarantee details. If required, the draft can be sent for legal verification to legal team and draft confirmation to customer.

The system sends Draft MT760 along with up to seven MT761 messages as attachment to the customer.

The Transaction Reference Number is masked, before sending the Draft Import LC for Customer approval.

If the Guarantee Issuance is at Counter Issuing Bank (CIB)/ Local Issuing Bank (LIB), preview message is populated with the outgoing MT760 and all the applicable MT761.

Table 2-22 Preview Message - Field Description

Field	Description
Preview SWIFT Message	This section displays the Preview SWIFT Message details.
Language	Read only field. The language to preview the draft guarantee details. English is set as default language for the preview.
Message Type	Select the message type from the drop down.
moonings type	User can choose to see preview of different message like MT 700, MT 740 and MT 701.
Message Status	Read only field. Display the message status of draft message of guarantee details.
Repair Reason	Read only field. Display the message status of draft message of guarantee details.
Preview Message	This field displays a preview of the draft message.
	Based on the guarantee text captured in the previous screen, guarantee draft is generated in the back office and is displayed in this screen.
Preview - Mail Device	This section displays the Preview - Mail Device details.
Language	Read only field.
	The language for the advice message.
	English is set as default language for the preview.
Advice Type	Select the advice type.
Message Status	Read only field. Display the message status of draft message of guarantee details.
Repair Reason	Read only field. Display the message status of draft message of guarantee details.
Preview Message	This field displays a preview of advice.
Draft Confirmation Required	This section displays the Draft Confirmation Required details.
Draft Confirmation Required	Enable the Draft Confirmation Required toggle, if the guarantee message needs to be approved by customer before issue.
	Note: A bank user can share the Draft SWIFT message to the customer through email, before the actual transmission of SWIFT message to the Advising Bank.
Customer Response	Specify the response received from customer.
	If the response is received online, the response is auto populated in this field by the system

Table 2-22 (Cont.) Preview Message - Field Description

Field	Description
Customer Remarks	Read only field.
	Displays the remarks from the customer for the draft.
Response Date	Read only field.
	Displays the customer response received date.
Customer Email ID 1	This field efaults the email address of the customer.
	System fetches the Email ID from Customer Address maintenance in Back office and auto populates the available Email ID.
	This field is enabled if Draft Confirmation Required toggle is enabled.
Customer Email ID 2	Click Search and select the Email ID from lookup from the Customer Email Address field of the customer maintenance in Back Office and replicated in OBTFPMCS.
	By default this field is blank.
	This field is enabled if Draft Confirmation Required toggle is enabled.
Legal Verification	Specify the Legal Verification details.
Legal Verification Required	Enable the Legal Verification toggle, if the guarantee message is to be verified and approved by Legal department before issue.
	The Legal Verification details must be captured in legal verification stage.
Legal Response	Read only field.
	Displays the legal response received from customer.
Legal Remarks	Read only field.
	Displays the legal remarks from the customer for the draft.
Verification Date	Read only field.
	Displays the customer legal response received date.

5. Click **Save and Close** to save the details and close the screen.

Create Template

This option allows user to create a new template with the already captured details and the data can be reused with the template to reduce the effort. The user can enter the template name and create the template, details pertaining to the subsequent screens in scrutiny and data enrichment screens will be persisted and populated.

Figure 2-25 Create Template

For more information on fields, refer to the field description table in **Scrutiny** stage.

- 6. Click Save and Close to save the details and close the screen.
- 7. Next.

The task will move to next data segment.

	R4- Insufficient Balance/Limits
	R5 - Others
Back	On click of Back, system moves the task back to previous data segment.

Table 2-26 (Cont.) Summary - Action Buttons - Field Description

Field	Description
Submit	Task will get moved to next logical stage of Guarantee issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided. n case of duplicate documents' system will terminate the process after handing off the details to back office.
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.

2.8 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Guarantee Issuance request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

Log in into OBTFPMCS application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number "to the back office.

On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPMCS) and should debit the CASA account from the Back office.

If multiple accounts are applicable, Amount Block. Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

	This option is used, if there are any pending information yet to be received from applicant.
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.
Back	Task moves to previous logical step.

2.9 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

- Log in into OBTFPMCS application and acquire the task available in the approval stage in free task queue. The user can view the Summary tiles which displays list of important fields with values.
- 2. Click each tile to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

In case of MT798, on approval the task is handed off to back office system to create a Guarantee contract and generate the required MT760/761 messages.

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Contract Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
