Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Preface

This manual is designed to help acquaint you with the integration of Oracle Banking Trade Finance and Oracle FLEXCUBE Document Management System Interface.

- [Audience](#)
This manual is intended for the following User/User Roles:
- [Organization](#)
This topic is organized into following topics:
- [Acronyms and Abbreviations](#)
- [Organization](#)
- [Glossary of Icons](#)
This User Manual may refer to all or some of the following icons:
- [Related Information Sources](#)

Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office data entry Clerks	Input functions for maintenance related to the interface
Implementation Teams	For setting up integration

Organization

This topic is organized into following topics:

Topic	Description
Preface	This topic gives information on the intended audience. It also lists the various topics covered in this User Manual.
Oracle Banking Trade Finance - DMS Integration	This topic explains about Oracle IPM which is an external Document Management System with which Oracle Banking Trade Finance integrates for document processes.

Acronyms and Abbreviations

Abbreviation	Description
DMS	Document Management System
IPM	Imaging and Process Management
OBTF	Oracle Banking Trade Finance

Organization

This document talks about the required maintenance and further processing of data transfer between Oracle Banking Trade Finance and DMS.

Glossary of Icons

This User Manual may refer to all or some of the following icons:

Icons	Function

1

Oracle Banking Trade Finance - DMS Integration

Oracle IPM is an external Document Management System with which Oracle Banking Trade Finance integrates for document processes. Oracle IPM provides image scanning and business process management capabilities for enterprise applications. Oracle IPM is integrated with Oracle Banking Trade Finance to support the existing Oracle FLEXCUBE DMS.

The integration between Oracle Banking Trade Finance and Document Management Systems occurs only in process flows. Therefore, not all modules of Oracle Banking Trade Finance are utilizing the services offered by the integration. The user interface in OBTF makes standard request to the underlying infrastructure and Oracle Banking Trade Finance infrastructure would interact with the DMS and supply the result to user interface in same manner.

This chapter includes the following section:

- [Oracle Banking Trade Finance and external DMS](#)
- [Oracle Banking Trade Finance and external DMS](#)

1.1 Oracle Banking Trade Finance and external DMS

This section contains the following topics:

- [Integrating Oracle Banking Trade Finance with external DMS](#)
- [Adding a Document to DMS](#)
- [Viewing the Document Indexed in the DMS](#)
- [Deleting a Document Indexed in DMS](#)
- [Integrating Oracle Banking Trade Finance with external DMS](#)
- [Adding a Document to DMS](#)

In this operation you can upload a document to a DMS. The paper documents should be scanned into a digital format, which can be uploaded to the DMS. To upload the digital document, you must choose the file using the browse dialog and click upload button to index the document in the DMS. The DMS would register the document and provide a document ID to identify this document for later usage. This document ID can be used to locate the document, for other operations.

- [Viewing the Document Indexed in the DMS](#)

Oracle Banking Trade Finance allows you to view documents stored in a DMS that are referenced by transactions created in Oracle Banking Trade Finance. To view the document captured in DMS, select the document and click View button.
- [Deleting a Document Indexed in DMS](#)

Documents stored in the DMS can be deleted from Oracle Banking Trade Finance if the transaction stores the link to the document. To delete the document captured in the DMS,

select the document and click 'Delete' button to delete the record from the set of document records.

1.1.1 Integrating Oracle Banking Trade Finance with external DMS

You can integrate Oracle Banking Trade Finance with Oracle IPM. OBTF will integrate/interact with one DMS provider at a given time and currently it is integrated with Oracle IPM only. Adapters are kind of service provider which provides the operations as per the Oracle Banking Trade Finance infrastructure.

Oracle Banking Trade Finance supports a set of operations that are common to the DMS solutions supported. The set of operations that would be supported by the integration are:

- Add a document to a DMS
- View a document indexed in the DMS
- Delete a document indexed in the DMS

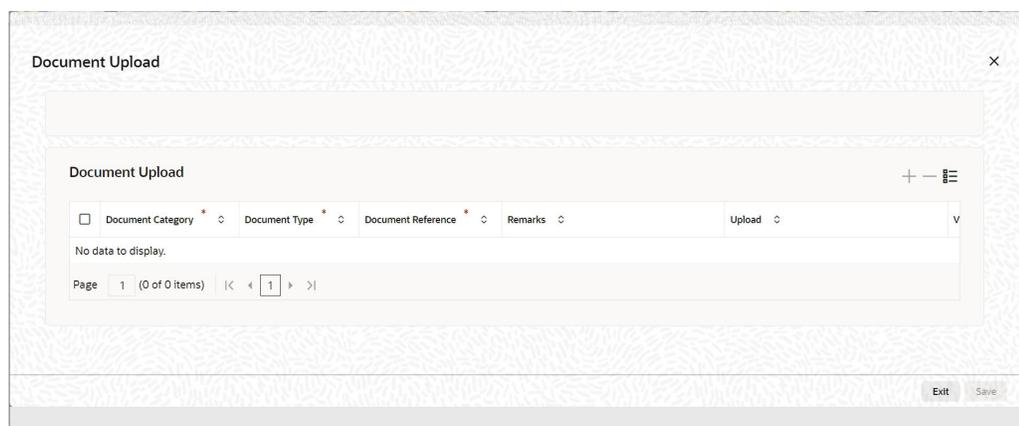

1.1.2 Adding a Document to DMS

In this operation you can upload a document to a DMS. The paper documents should be scanned into a digital format, which can be uploaded to the DMS. To upload the digital document, you must choose the file using the browse dialog and click upload button to index the document in the DMS. The DMS would register the document and provide a document ID to identify this document for later usage. This document ID can be used to locate the document, for other operations.

Oracle Banking Trade Finance stores this document ID to maintain a linkage between the documents stored in the DMS, and the documents pertaining to any transaction. Hence, the documents indexed in the DMS by Oracle Banking Trade Finance, can be opened and viewed at a later stage.

If Oracle IPM is the DMS of choice, then the document ID is stored as an attribute of the document.

The ID can be utilized for searching and locating the document via the search features offered by Oracle IPM.

To delete multiple documents at a time, you have to select the multiple records corresponding to the document and click the delete button. The system displays the message as "The selected documents have been deleted from the Document Manager System."
