2-1

Preface

This document helps you acquaint with the information on inter-connecting Oracle Banking Trade Finance System (OBTF) with Oracle Financial Services Analytical Application (OFSAA).

Besides this user manual, while maintaining the interface related details, you can load the context sensitive help available for each field in OBTF. This help describes the purpose of each field within a screen. You can obtain this information by placing the cursor on the relevant field and striking the <F1> key on the keyboard.

- [Audience](#)
This manual is intended for the following User/User Roles:
- [Organization](#)
This topic is organized into following topics:
- [Acronyms and Abbreviations](#)
- [Glossary of Icons](#)
This User Manual may refer to all or some of the following icons:
- [Related Information Sources](#)

Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office data entry Clerks	Input functions for maintenance related to the interface
End of day operators	Processing during end of day
Implementation Teams	For setting up integration

Organization

This topic is organized into following topics:

Topic	Description
Preface	This topic gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Oracle OBTF - OFSAA Integration	This topic explains the integration between Oracle Banking Trade Finance and Oracle Financial Services Analytical Applications.
Annexure	This topic provides the details of data exchange.

Acronyms and Abbreviations

Abbreviation	Description
System	Unless and otherwise specified, it always refers to Oracle Banking Trade Finance system
OBTF	Oracle Banking Trade Finance
OFSA	Oracle Financial Services Analytical Applications
DIH	Data Integration Hub
Source System	Oracle Banking Trade Finance System (OBTF)
EOD	End of Day
EOF	End of Financial Input
OD	Overdraft

Glossary of Icons

This User Manual may refer to all or some of the following icons:

Icons	Function
	Exit
	Add row
	Delete row
	Option List

Related Information Sources

Along with this user manual you may also refer the following related resources:

- Oracle Banking Trade Finance Installation Manual
- OBTF-OFSA Data Transfer matrix

1

Oracle OBTF - OFSAA Integration

The integration between the Oracle Banking Trade Finance System (OBTF) and the Oracle Financial Services Analytical Applications (OFSAA) enables the financial institutions to:

- Get insights to customer patterns based on the data captured in core banking
- Achieve end-to-end improvement in business delivery
- Achieve effective performance and risk free management using the available customer data

This integration is achieved by handing off OBTF core banking data via staging tables to OFSAA using DIH connector.

This chapter contains the following sections:

- [Scope](#)
- [Prerequisites in Oracle Banking Trade Finance](#)
- [Prerequisites in Oracle Financial Services Analytical Applications](#)
- [Integration Architecture](#)
- [Integration Process](#)

- [Scope](#)

This section describes the scope of the integration with respect to each system, that is OBTF and OFSAA.

- [Prerequisites in Oracle Banking Trade Finance](#)
- [Prerequisites in Oracle Financial Services Analytical Applications](#)
- [Integration Architecture](#)
- [Integration Process](#)

OBTF has pre-defined staging tables required for OFSAA extracts. During EOFI batch, the module wise data is extracted to staging tables in OBTF. OBTF provides a control table to indicate successful data extraction. OFSAA pulls the data from the tables in OBTF using the DIH connector.

1.1 Scope

This section describes the scope of the integration with respect to each system, that is OBTF and OFSAA.

This section contains the following topics:

- [Integration Scope in Oracle Banking Trade Finance System](#)
- [Integration Scope in Oracle Financial Services Analytical Applications](#)
- [Integration Scope in Oracle Banking Trade Finance System](#)
During the integration following data are provided to OFSAA in the OBTF staging table.
- [Integration Scope in Oracle Financial Services Analytical Applications](#)

1.1.1 Integration Scope in Oracle Banking Trade Finance System

During the integration following data are provided to OFSAA in the OBTF staging table.

Module	Hand off Details
Letters of Credit	<ul style="list-style-type: none"> Letters of credit contracts and accounting entries Guarantee contracts Letters of credit documents, goods and parties
Bills and Collections	<ul style="list-style-type: none"> Bills and Collection contracts and accounting entries

1.1.2 Integration Scope in Oracle Financial Services Analytical Applications

Refer 'OBTF Connectors User Guide' and 'Data Integration Hub User Guide' to know about integration scope in OFSAA.

1.2 Prerequisites in Oracle Banking Trade Finance

Set up Oracle Banking Trade Finance Application. OFSAA user will have read-only access to this application. The access is provided only to particular extraction tables.

Refer the 'Oracle Banking Trade Finance Installation' manual.

This section contains the following topic:

- [Maintenances](#)
- [Maintenances](#)

1.2.1 Maintenances

Complete the maintenances discussed below.

- [Maintaining Batch Programs](#)
- [Maintaining Extraction Routines](#)

1.2.1.1 Maintaining Batch Programs

You need to maintain the batch program 'TFEXTRACT' using 'Mandatory Batch Program Maintenance' (EIDMANPE) screen. This batch extracts the data from Oracle Banking Trade Finance during end of financial input (EOF1) stage. It is recommended that the extraction of data from OBTF is done from the reporting environment and not the production environment. You also need to maintain the extraction routine.

1.2.1.2 Maintaining Extraction Routines

You can maintain the data extraction routines in the maintenance table called 'ESTM_TF_DEST_TABLES'. This table is used to maintain extraction routines and should be maintained manually with the following values along with other details:

Column Name	Description
ORD_OF_EXT	Order of extraction in which routine will be executed. This should be a unique value.

Column Name	Description
TABLE_NAME	Name of the staging table to be populated with data.
ROUTINE	Routine to be executed. The format should be 'Package.procedure'
INTEGRATION_NAME	OFSA

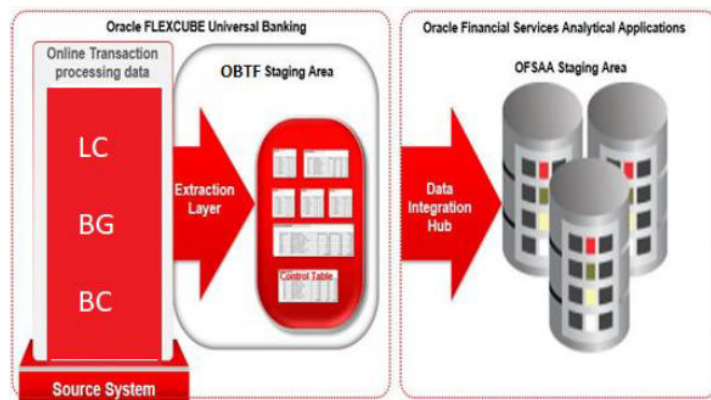

All the parameters such as extraction date, previous extraction date, log required and so on are maintained in maintenance table 'CSTB_TF_EIS_PARAM'. In this table the KEYID is the primary key.

1.3 Prerequisites in Oracle Financial Services Analytical Applications

Refer 'OBTF Connectors User Guide' and 'Data Integration Hub User Guide' for details on the prerequisites in OFSAA.

1.4 Integration Architecture

The following diagram provides information on the integration architecture followed in OBTF-OFSA integration.

1.5 Integration Process

OBTF has pre-defined staging tables required for OFSAA extracts. During EOFI batch, the module wise data is extracted to staging tables in OBTF. OBTF provides a control table to indicate successful data extraction. OFSAA pulls the data from the tables in OBTF using the DIH connector.

The transfer or extraction of data from OBTF to OFSAA differs based on the staging tables as follows:

- Master table - Incremental data between two extraction dates are transferred.
- Maintenances and contract tables - Entire transaction data are transferred in each extraction.
- Transaction table - Data related to the transactions created on the extraction date are transferred.

During data extraction you can check the status of the extraction routines in the table `ESTB_TF_JOB_CONTROL`. The column `STATUS` shows whether the routine is in progress (W) or has failed (F) or has completed successfully (S). At the time of extraction all the routines from maintenance table `'ESTM_TF_DEST_TABLES'` are inserted to `'ESTB_TF_JOB_CONTROL'` for the current extraction date with initial status as 'W'. This status will be updated accordingly when the routine is completed successfully (S) or unsuccessfully (F).

Extraction Log

You can have the logs generated as part of EOD for each table. EOD log captures the complete extraction process. The table level extraction log contains the details of each data transfer.

Errors in the data extraction process and the failure reasons are logged in an error data store. These errors are rectified manually and the batch is run again for the failed data.

2

Annexure

2.1 Data Transfer from OBTF to OFSAA

For details on data transfer from OBTF to OFSAA, refer the below table:

This sheet has the following details:

- Source System
- Target System
- Data Transferred
- Source System Module
- OBTF Staging Table Name
- Extraction Package Name
- Target System Table Name
- Extraction Routine
- Data Included in the Extraction

OBTF-OFSAA Data Transfer

OBTF uses FLEXCUBE Information Server framework components to extract data and stores the data in the staging tables of OBTF. During EOFI batch, the module wise data in the FLEXCUBE Information Server are extracted to staging tables in OBTF. OBTF provides a control table to indicate successful data extraction. OFSAA pulls the data from the tables in OBTF using the DIH connector. Source System - OBTF Target System - OFSAA

Table 2-1 OBTF-OFSAA Data Transfer

Data Transferred	Source System Module	FCUBS Staging Table Name	Extraction Package Name	Target System Table Name	Extraction Routine	Data Included in the Extraction
Letter of Credit contracts	LC	AATB_STG_LC_CONTRACTS	AAPKS_EXT_RACT_LC_CONTRACTS	Stg_Lc_Contracts	Daily	Complete Data
Letter of Credit accounting entries	LC	AATB_STG_LC_TXNS	AAPKS_EXT_RACT_LC_TXNS	Stg_Lc_Txns	Daily	New and Modified Data
Guarantee contracts	LC	AATB_STG_GUARANTEES	AAPKS_EXT_RACT_GUARANTEES	Stg_Guarantees	Daily	Complete Data
Guarantee accounting entries	LC	AATB_STG_GUARANTEES_TXNS	AAPKS_EXT_RACT_GUARANTEES_TXNS	Stg_Guarantees_Txns	Daily	New and Modified Data

Table 2-1 (Cont.) OBTF-OFSAA Data Transfer

Data Transferred	Source System Module	FCUBS Staging Table Name	Extraction Package Name	Target System Table Name	Extraction Routine	Data Included in the Extraction
Letter of Credit contract events	LC	AATB_STG_LC_CONTRACT_EVENT	AAPKS_EXTRACT_LC_EVENT	Stg_Trade_Finance_Contract_Event	Daily	Complete Data
Letter of Credit documents	LC	AATB_STG_LC_DOCUMENT	AAPKS_EXTRACT_LC_CONTRACT_DOCS	Stg_Trade_Finance_Document	Daily	Complete Data
Letter of Credit goods	LC	AATB_STG_LC_GOODS	AAPKS_EXTRACT_LC_GOODS	Stg_Trade_Finance_Goods	Daily	Complete Data
Letter of Credit parties	LC	AATB_STG_LC_PARTY_EVENT	AAPKS_EXTRACT_LC_PARTY_EVENT	Stg_Trade_Finance_Party_Event	Daily	Complete Data
Letter of Credit to accounts	LC	AATB_STG_LC_ACCOUNT	AAPKS_EXTRACT_LC_ACCOUNT	Stg_Trade_Finance_Acct	Daily	Complete Data
Bills and Collections contracts	BC	AATB_STG_BC_CONTRACTS	AAPKS_EXTRACT_BC_CONTRACTS	Stg_Bills_Contracts	Daily	Complete Data
Bills and Collections accounting entries	BC	AATB_STG_BC_CONTRACTS_TXNS	AAPKS_EXTRACT_BC_TXNS	Stg_Bill_Contracts_Txns	Daily	New and Modified Data
