This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Purpose

This chapter explains the steps to create the property file for the gateway components viz. Enterprise Java Bean (EJB), Message Driven Beans (MDB), Web Services and Servlet.

Audience

This guide is intended for anyone responsible for installing Oracle Banking Application.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to

build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning	
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.	
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.	
monospace	Monospace type indicates commands within a paragraph, URLs, code examples, text that appears on the screen, or text that you enter.	

Related Resources

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1 Creating Property File for Gateway Applications

1.1 Creating Property Files

This topic explains systematic instructions to create the property file for the Gateway application.

Follow the steps given below:

1. Start Oracle Banking Trade Finance Solutions Installer - FCUBSInstaller.bat from INSTALLER\SOFT\GUI. Prerequisites screen is displayed.

Figure 1-1	Oracle Banking	Installer

4	DOMAIN NAME	I-FLEX.COM		
5	LDAP SERVER TIMEOUT	0	-	
E	Exit			Back Next

7. Specify the following LDAP server details.

Table 1-3 Property File Creation

Field	Description	
LDAP Server URL	Specify the URL to access the LDAP server where the external user ID and password are maintained.	
LDAP SSL Enabled	Check this box if the LDAP server is SSL enabled. If you check this box, then you need to specify the SSL port also in the field LDAP SERVER URL .	
Security Authentication Type	 SERVER URL. Depending on the authentication mechanism supported by the LDAP server, select one of the following: simple strong Note: Different servers support different authentication mechanisms. By default, the security authentication type is 'Simple'; however, you can change this. 	
Domain Name	Specify the domain name.	

Field	Description
LDAP Server Timeout	Specify the LDAP server timeout in milliseconds. This must be a positive integer value. For example you can specify 1000, 10000 or 5000. If it is zero or less, it indicates that no read timeout is specified. Then the wait for the response infinite until it is received. By default, the LDAP server timeout is zero; however, you can change this.

8. Click 'Next'. The following screen is displayed:

	POSS DataSource OPSS CSF Available	
POSS DataSource	POSSTEST.WORLD	
Distributed Schema	No 💌	
MSG IN log Required	No MSG OUT log Required No	
Exit Log		Back Next

9. Specify the following details.

Field	Description	
XSD Path	Specify the path to the XSD file. File name is not required. File separator must be ' <i>I</i> '. There must be a ' <i>I</i> ' at the end. All the relevant XSD files must be manually copied to this location. Example: For Windows: D:\Kernel11.1\GW_EJB\XSD\	
	For Linux: /Kernel11.1/GW_EJB/XSD/	
Logger File	Specify the path to the ' gw_ejb_logger.properties ' file with the file name. The file must be manually copied to the specified location. Example: For windows: D:\Kernel11.1\GW_EJB\config\gw_ejb_logger.properties For Linux: /Kernel11.1/GW_EJB/config/gw_ejb_logger.properties	
Debug Path	Specify the path to the folder where the application creates the logs. There must be a ' <i>I</i> ' at the end. You need to manually create the specified folder structure. Example:	
	For windows: D:\Kernel11.1\GW_EJB\log\ For Linux: /Kernel11.1/GW_EJB/log/	
Security Key for Encryption	Specify the security key for the Encryption,here in this case it is 'Oraclefinancialsolutions'.	
SMS Pool Name	Specify SMS Pool Name, here in this case it is 'jdbc/fcjdevDSSMS'.	
DataSource	The JDBC data source is an object bound to JNDI tree and provides database connectivity through a pool of JDBC connections.	
POSS Datasource	Check this box if POSS is required. If you check this box, you need to specify the POSS Datasource Name in the field below this.	
OPSS CSF Available	Indicate whether OPSS-CSF is installed or not.	
	✓ Note: Please choose this only if Oracle Platform Security Services - Credential Store Framework (CSF) is installed as per the guidelines in the pre-requisite document. It is recommended that you install CSF for safeguarding application specific security credentials.	
Distributed Schema	If the schema is distributed, select ' Yes '.	
	If the schema is not distributed, select 'No'.	
MSG IN LOG Required	Choose Yes/No from drop down box.	

 Table 1-4
 Property File Creation

Field	Description	
MSG OUT LOG Required	Choose Yes/No from drop down box.	
	 Note: The Installer creates two files viz. 'gw_ejb_logger.properties' and 'GW_EJB_Prop.propeties' in the path provided to save the files. 	

 Table 1-4

	For Linux: /Kernel11.1/GW_MDB/XSD/

Field	Description	
Logger File	Specify the path to the ' gw_mdb_logger.properties ' file with the file name. The file must be manually copied to the specified location.	
	Example:	
	For windows: D:\Kernel11.1\GW_MDB\config\gw_mdb_logger.properties	
	For Linux: /Kernel11.1/GW_MDB/config/gw_mdb_logger.properties	
Debug Path	Specify the path to the folder where the application creates the logs. There must be a T at the end. You need to manually create the specified folder structure.	
	Example:	
	For windows: D:\Kernel11.1\GW_MDB\log\	
	For Linux: /Kernel11.1/GW_MDB/log/	
Security Key for Encryption	Specify the security key for the Encryption,here in this case it is 'Oraclefinancialsolutions'.	
SMS Pool Name	Specify SMS Pool Name, here in this case it is 'jdbc/fcjdevDSSMS'.	
DataSource	The JDBC data source is an object bound to JNDI tree and provides database connectivity through a pool of JDBC connections.	
POSS Datasource	Check this box if POSS is required. If you check this box, you need to specify the POSS Datasource Name in the field below this.	
OPSS CSF Available	Indicate whether OPSS-CSF is installed or not.	
	Note: Please choose this only if Oracle Platform Security Services - Credential Store Framework (CSF) is installed as per the guidelines in the pre-requisite document. It is recommended that you install CSF for safeguarding application specific security credentials.	
Distributed Schema	If the schema is distributed, select ' Yes '.	
	If the schema is not distributed, select ' No '.	

Click 'Next'. The following screen is displayed.

With this property a user logs in once and gains access to all systems without being prompted to log in aga at each of them. Conversely, Single sign-off is the property whereby a single action of signing out terminate	s 📃
access to multiple software systems. This screen provides an option for External Authentication. If Externa Authentication is not required, keep the all options unchecked and Click on Next. MSAD/LDAP User Login Required: User can login with MSAD/LDAP user ID as well as FCUBS user ID. External Password Required: The user can login with MSAD/LDAP server password only. The user ID can be either the MSAD/LDAP user ID or FCUBS user ID. Authentication Type: LDAP/MSAD is the type of external server used for authentication.	=

The field 'Authentication Type' is enabled if one of the above check boxes is checked:

6. If you check the box, then the installer navigates to the following screen on clicking 'Next' button.

Oracle FLEXCUBE Universal Installer				
Oracle Banking Installer				
Prope	rty File Creation			
LDAP	Server Details for Gateway			
No.	Name	Value		
1	LDAP SERVER URL	LDAP://10.10.10.10:111	^	
2	LDAP SSL ENABLED			
3	SECURITY AUTHENTICATIO	Simple	=	
4	DOMAIN NAME	I-FLEX.COM		
5	LDAP SERVER TIMEOUT	0	-	
E	Exit			Back Next

7. Specify the LDAP server details.

Field	Description	
LDAP Server URL	Specify the URL to access the LDAP server where the external user ID and password are maintained.	
LDAP SSL Enabled	Check this box if the LDAP server is SSL enabled. If you check this box, then you need to specify the SSL port also in the field LDAP SERVER URL.	
	By default, this check box is unchecked. However, you can change this.	
Security Authentication Type	 Depending on the authentication mechanism supported by the LDAP server, select one of the following: Simple Strong Note: Different servers support different authentication mechanisms. By default, the security authentication type is 'Simple'; however, you can change this. 	
Domain Name	Specify the domain name.	

Field	Description
LDAP Server Timeout	Specify the LDAP server timeout in milliseconds. This must be a positive integer value. For example you can specify 1000, 10000 or 5000. If it is zero or less, it indicates that no read timeout is specified. Then the wait for the response infinite until it is received. By default, the LDAP server timeout is zero; however, you can change this.

11. Specify the field details.

For more information on fields, refer the table below:

Table 1-6 Property File Creation

EJB Application Name Specify the name of the EJB application deployed.E.g.: GWEJB.

12. Click '**Next**'. The following screen is displayed.

Ora	acle FLEXCUBE Universal Ins	taller		
0	racle Banking I	nstaller		
	teway Property File Creati	on ption for modifying WebServices Properties		
No	o. Name	Value		
1	EJB JNDI Name	#com.ofss.fcubs.gw.ejb.GWEJBRemote		
2	Application Server URL	http://10.10.10.10:7001		
3	User Name	infra	=	
4	Password	•••••		
5	EJB Look Up		-	

13. Specify the filed details:

Field	Description
EJB JNDI Name If you build the EJB application with GWEJB name, this will create the name with which the EJB EAR file is built.	
	If you select EJB Call Type as REMOTE, this will create ' <ejb_application_name>#com.ofss.fcubs.gw.ejb.GWEJBRemo te. in 'GW_WS_Prop.properties' file</ejb_application_name>
	Example:
	<u>Weblogic/Websphere :</u> GWEJB #com.ofss.fcubs.gw.ejb.GWEJBRemote
Application Server URL Specify the URL of the application server where the webse application is hosted.	
	Example:
	Weblogic: t3://10.10.10.10:7001
	Or
	Websphere: iiop://10.10.10.10:2815
User Name	Specify the user name to access the application server where the EJB application is deployed. Example: infra
Password	Specify the password for the above user name.
EJB Look Up	Specify the EJB look up type from the drop down-list. The options are LOCAL/REMOTE

Field	Description
Application Type	 Specify the Application Type from the drop down list: If the Application type is 'INTEGRATED' then the EJB look up type should be select as 'LOCAL' If the Application type is 'INDIVIDUAL' then the EJB look up type
	should be select as ' REMOTE ' and EJB should configure in any server.(' REMOTE ' only works with combination of EJB & GWWS)
	• The Installer creates two files viz. 'gw_ws_logger.properties' and 'GW_WS_Prop.properties' in the path provided to save the files.

Click 'Next'. The following screen is displayed.

Exit Log Back Next

The property file will be created in a temporary folder.

- 14. Click 'Property File' to view the created property file.
- 15. Click 'Save' to the save the created property file in desire location.
- 16. Click 'Continue' to continue the installation process with gateway application type.
- 17. Click 'Next' to navigate to the installer home screen.

The property file will be created in the specified folder.

 If Application Server is "Websphere" and EJB Look Up is "REMOTE", change below entry in GW_WS_Prop.properties:

EJB_CTX_FACTORY=weblogic.jndi.WLInitialContextFactory

to

 ${\tt EJB_CTX_FACTORY=} com.ibm.websphere.naming.WsnInitialContextFactory$

For Gateway WS EAR Building refer 'OBTF_EAR_Building document'

1.1.5 REST Services Application

Follow the steps given below:

1. Select 'Rest Services' as the application type as shown in the below Screen.

Soracle FLEXCUBE Universal Installer	
Oracle Banking Installer	
Gateway Property File Creation Choose the Gateway Application Type	
Gateway EJB	
Gateway MDB	
Gateway HTTP Serviet	
Gateway Webservices	
REST Services (Applicable to UBS 14.1 and above versions)	
Exit	Back Next

 Click 'Next'. The following screen is displayed to capture Schema details. Enter valid username, password, IP Address, port and TNS descriptor and click on "Test Connection" button.

Solution of the second	iler 12.5.0.0.0
