- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Conventions](#)
- [Screenshot Disclaimer](#)

Purpose

This manual is designed to help acquaint you with the Deployment of Oracle Banking Trade Finance application on WebLogic.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
`monospace`	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1
Deploying Oracle FLEXCUBE on WebLogic

1.1 Introduction

This chapter explains the steps to deploy Oracle FLEXCUBE UBS application into Oracle WebLogic application server in centralized and decentralized modes. In centralized mode, branch and host are setup in a single PC. In decentralized mode, branch and host are setup in different PCs.

1.2 Building Application

For building Oracle FLEXCUBE Application in centralized and decentralized modes, refer to the following chapters.

1.2.1 Building Application in Centralized Mode

Refer to the chapter 'Building Application in Centralized Mode'. This includes the following details:

- Creating Property File
- Building Centralized EAR File
- Configuring Plug-ins
- Loading Properties File

1.2.2 Building Application in Decentralized Mode

Refer to the chapter 'Building Application in Decentralized Mode'. This includes the following details:

- Creating Property File
- Building Decentralized EAR File
- Configuring Plug-ins
- Loading Properties File

1.3 Deploying Application in Oracle WebLogic

This section explains the method of deploying Oracle FLEXCUBE Application into Oracle WebLogic application server.

- Deploying Integration Adapter EAR from WebLogic Administration Console
  To deploy Oracle FLEXCUBE Application from Oracle WebLogic administration console, follow the steps given below.

- Deploying Dependency Library "Jax-RS"
  This library must be installed before deploying FCUBSApp.ear. Follow the below steps

- Deploying FCUBS Application from WebLogic Administration Console
  To deploy Oracle FLEXCUBE Application from Oracle WebLogic administration console, follow the steps given below.

- Deploying Gateway/Scheduler Applications from WebLogic Administration Console
  To deploy Oracle FLEXCUBE Gateway/Scheduler Application from Oracle WebLogic administration console, follow the steps given below.

1.3.1 Deploying Integration Adapter EAR from WebLogic Administration Console

To deploy Oracle FLEXCUBE Application from Oracle WebLogic administration console, follow the steps given below.

1. Start the Administrative Console of WebLogic application server. You can start this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser.

   Example: http://10.10.10.10:1001/console
   The following screen is displayed:

2. Specify the WebLogic administrator user name and password. Click '**Log In**'.

3. You need to deploy an Integration adapter EAR. For example '`OBCLExtAdapter.ear` or `ExtAdapter.ear`'. Go to '`Deployment`'.

   Click '**Lock & Edit**' button to enable the buttons. This action enables the buttons.

4. Click '**Install**' button. The following screen is displayed:

5. In order to specify the path/location of the enterprise archive file, click the link '**upload your file(s)**'.

6. Specify the EAR file path. You can use the '**Browse**' button to locate the file.

7. Click '**Next**'. The following screen is displayed.

8. Select the application Adapter EAR from the list.

9. Click '**Next**'. Following screen is displayed:

10. Choose the targeting style '**Install this deployment as a library**'.

11. Click '**Next**'. The following screen is displayed.

12. Select the target of the application. You can choose the server '**AdminServer**' or '**Managed Server(s)**'.

13. Click '**Next**'. The following screen is displayed.

14. Check the deployment name.

15. The remaining portion of the screen is shown below:

16. Click '**Finish**' button. The following screen is displayed.

17. Click '**Save**' button. The message '**Settings updated successfully**' is displayed.

18. Click '**Activate Changes**' button on the left pane. The message '**All the changes have been activated. No restarts are necessary**' is displayed.

1.3.2 Deploying Dependency Library "Jax-RS"

This library must be installed before deploying FCUBSApp.ear. Follow the below steps

1. Start the Administrative Console of WebLogic application server. You can start this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser.

Example: http://10.10.10.10:1001/console

2. The following screen is displayed:

3. Specify the WebLogic administrator user name and password. Click '**Log In**'.

The following screen is displayed:

4. Click **Install** button.

Navigate and select jersey bundle under the path "`wlserver\common\deployable-libraries\jax-rs-2.0.war`" and click **Next**.

Select "**Install this deployment as library**", select target server as managed server and click **Next**.

This library must appear in the deployment with Type column as '**Library**'

> ✏ **Note:**
>
> latest Jax-rs version will be jax-rs(2.0,2.22.1.0)

1.3.3 Deploying FCUBS Application from WebLogic Administration Console

To deploy Oracle FLEXCUBE Application from Oracle WebLogic administration console, follow the steps given below.

1. Start the Administrative Console of WebLogic application server. You can start this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser.

   Example: http://10.10.10.10:1001/console

2. Specify the WebLogic administrator user name and password. Click '**Log In**'. The following screen is displayed:

3. You need to deploy an EAR. For example 'FCUBSApp.ear'. Go to 'Deployment'.

   Click 'Lock & Edit' button to enable the buttons. This action enables the buttons.

4. Click 'Install' button. The following screen is displayed:

5. In order to specify the path/location of the enterprise archive file, click the link '**Upload your file(s)**'.

6. Click '**Next**'. The following screen is displayed:

7. Specify the EAR file path. You can use the '**Browse**' button to locate the file.

8. Click '**Next**'. The following screen is displayed.

9. Select the application FCUBS EAR from the list.

10. Click '**Next**'. Following screen is displayed:

11. Choose the targeting style '**Install this deployment as an application**'.

12. Click 'Next'. The following screen is displayed:

13. Select the target of the application. You can choose the server '**AdminServer**' or '**Managed Server(s)**'.

14. Click '**Next**'. The following screen appears.

15. Check the deployment name.

The remaining portion of the screen is shown below:

16. Check whether the deployment location is accessible or not.

   The following screen is displayed.

17. Click '**Finish**' button. The following screen is displayed.

   Change **Deployment Order** to **400** if the application includes **BPEL plug-in**.

18. Click '**Save**' button. The message '**Settings updated successfully**' is displayed.

19. Click '**Activate Changes**' button on the left pane. The message '**All the changes have been activated. No restarts are necessary**' is displayed.

The screen is given below:

Click '**Deployment**' on the left pane. Switch to Control tab. The following screen is displayed.

20. Click '**Start**' drop-down button and select '**Servicing all requests**'.

The following screen is displayed.

21. Click '**Yes**'. The following screen is displayed.

This completes the deployment process.

1.3.4 Deploying Gateway/Scheduler Applications from WebLogic Administration Console

To deploy Oracle FLEXCUBE Gateway/Scheduler Application from Oracle WebLogic administration console, follow the steps given below.

1. Start the Administrative Console of WebLogic application server. You can start this by entering Oracle WebLogic Admin Console URL in the address bar in an internet browser.

Example: http://10.10.10.10:1001/console
The following screen is displayed:

2. Specify the WebLogic administrator user name and password. Click '**Log In**'.

The following screen is displayed:

3. You need to deploy an EAR. For example 'GWEJB.ear'. Go to '**Deployment**'.

Click '**Lock & Edit**' button to enable the buttons. This action enables the buttons.

4. Click '**Install**' button. The following screen is displayed:

5. In order to specify the path/location of the enterprise archive file, click the link '**upload your file(s)**'.

6. Click '**Next**'. The following screen is displayed:

7. Specify the EAR file path. You can use the '**Browse**' button to locate the file.

8. Click '**Next**'. The following screen is displayed.

9. Select the application from the list.

10. Click '**Next**'. Following screen is displayed:

11. Choose the targeting style '**Install this deployment as an application**'.

12. Click '**Next**'.

   The following screen is displayed.

13. Select the target of the application. You can choose the server '**AdminServer**' or '**Managed Server(s)**'.

14. Click '**Next**'. The following screen is displayed.

15. Check the deployment name.

The remaining portion of the screen is shown below:

16. Check whether the deployment location is accessible or not. The following screen is displayed.

17. Click '**Finish**' button. The following screen is displayed.

18. Click **Save** button. The message 'Settings updated successfully' is displayed.

19. Click '**Activate Changes**' button on the left pane. The message '**All the changes have been activated. No restarts are necessary**' is displayed.

Click '**Deployment**' on the left pane. Switch to Control tab. The following screen is displayed.

20. Click '**Start**' drop-down button and select '**Servicing all requests**'.

21. The following screen is displayed.

22. Click '**Yes**'. The following screen is displayed.

This completes the deployment process.

a. Repeat the same steps from 1.3.3 for deploying GWWS (gateway webservices), Gateway MDB & Gateway HTTP servlet.
