Preface

- [Purpose](#)
- [Audience](#)
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)
This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

1.1 Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Export Documentary Collection Booking Update** process.

1.2 Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

- [Access to Oracle Support](#)

1.3.1 Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

1.4 Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

1.5 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.6 Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.7 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

1.9 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.10 Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1-1 Acronyms and Abbreviations

Abbreviation	Description
OBTFFPM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

1.11 Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 1-2 Common Action Buttons and its Definitions

Action Buttons	Description
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance/Limits• R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>

Table 1-2 (Cont.) Common Action Buttons and its Definitions

Action Buttons	Description
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Click Cancel to cancel the transaction input midway without saving any data.
Save & Close	Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.

2

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3

Export Documentary Collection Booking Update

Export Documentary Collection Booking Update process involves update of an existing documentary collection under Export LC.

This topic contains following subtopics:

- [Common Initiation Stage](#)
- [Registration](#)

- [Document Linkage](#)
This topic provides the systematic instructions to initiate the document linkage.
- [Bi-Directional Flow for Offline Transactions Initiated from OBTFPM](#)
This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

3.2.1 Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

Specify **User ID** and **Password**, and navigate to **Registration** screen.

1. On the header of **Registration** screen, click, **Documents**.

The **Document** pop-up screen is displayed.

2. Click the **Add Additional Documents** button/ link.

The **Document** screen is displayed.

Field	Description
Document Type	Select the document type from list. Indicates the document type from metadata.
Document Code	Select the document Code from list. Indicates the document Code from metadata.
Document Title	Specify the document title.
Document Description	Specify the document description.
Remarks	Specify the remarks.
Document Expiry Date	Select the document expiry date.
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.

3. Select the document to be uploaded or linked and click the **Link Document** link.

The link **Document** pop up screen is displayed.

The value selected in **Document Type** and **Document Code** of **Document** screen are defaulted in the **Link Document Search** screen.

3.2.2 Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks **Request Clarification**, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online". In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder.
 3. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

3.3 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection booking update request.

On successful completion of Registration of an Export Documentary Collection Booking Update, the task moves to Data Enrichment stage. At this stage the gathered information during Registration are validated.

Note:

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Task**.
2. Under **Tasks**, click **Free Tasks**.

Let's look at the details for Data Enrichment stage. User can enter/update the fields. Some of the application details that are already having value from Registration/online channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection update booking request.
- [Maturity Details](#)
This topic provides the systematic instructions to capture the maturity details.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Other Details](#)
This topic provides the systematic instructions to capture the other details like Credit Value Date, Debit Value Date, Other Bank charges etc.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details
- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of export documentary collection update booking request.
- [Updated Details](#)
This topic provides the systematic instructions to capture the updated details.
- [Summary](#)
This topic provides the systematic instructions to view the summary of export documentary collection update booking request.

3.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection update booking request.

Main details section has two sub section as follows:

- Application Details
- Collection Details.

Application Details

The fields listed under this section are same as the fields listed under the Application Details section in Registration. For more information on the fields, refer [Table 3-3](#).

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

Figure 3-7 Data Enrichment - Main Details

The screenshot displays the 'Main Details' section of the 'Export Documentary Collection Booking Update' interface. The application number is PK2EDCU000066688. The form is organized into several sections:

- Application Details:** Includes fields for Documentary Collection Number (EUNA221100072510), Drawer (001044), Branch (PK2-Oracle Banking Trade Finz), and Bill Amount (GBP, £10,000.00).
- Financial and Operational Fields:** Includes Amount in Local Currency (GBP, £10,000.00), Process Reference Number (PK2EDCU000066688), Customer Reference Number, Priority (Medium), Submission Mode (SWIFT-Free Format), Update Date (April 20, 2022), and Version Number (1).
- Collection Details:** Includes Documents Received (Second), Tenor Type (Usance), Product Code (EUNA), Product Description (OUTGOING DOCUMENTARY USAN), Operation Type (ACC), Stage (Final), Contract Reference Number (EUNA221100072510), User Reference Number (EUNA221100072510), Drawee (001204), Outstanding Bill Amount (GBP, £10,000.00), Collecting Bank (001041, WELLS FAR), Collecting Bank Reference Number (asdf), Finance Amount (GBP), Acceptance Date, Rebate Amount (GBP), Unlinked FX Rate, Non Acceptance Date, Non Pay Date, and MT410 - 23E OTHR.
- Additional Fields:** Includes Customer Dispatch, Avallization/Co-Acceptance Requested, and Avallized/Co-Accepted.

The interface also features a navigation menu on the left with options like Document Details, Shipment Details, Maturity Details, Other Details, Additional Fields, Advices, Additional Details, Settlement Details, Updated Details, and Summary. At the bottom, there are buttons for 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', and 'Next'.

For more information on fields, refer to the field description table below.

 **Note:**
The fields which are marked as **Required** are mandatory.

Table 3-6 Main Details - Collection Details - Field Description

Field	Description
Documents Received	Documents Received will be auto-populated from the collection booking. User can change the value.
Tenor Type	Read only field. Tenor details will be auto-populated from the collection booking.
Product Code	Read only field. Product Code will be auto-populated from the Documentary Collection Number.
Product Description	Read only field. This field displays the description of the product as per the product code.

Table 3-6 (Cont.) Main Details - Collection Details - Field Description

Field	Description
<p>Operation Type</p>	<p>Select Operation type from the drop-down list. The options are:</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>Change of Operation from Collection or Acceptance to Free of Payment should be enabled only for Documentary Bills.</p> </div>
<p>Stage</p>	<p>Stage will be auto-populated from the collection booking. User can update the stage to final, if it is set to Initial already.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>For Operation Type, FOP the Stage to be defaulted to Final as Free of Payment is not applicable for Bills in Initial stage.</p> </div>
<p>Contract Reference Number</p>	<p>Read only field.</p> <p>System populates the contract reference number from the back end system once the Documentary Collection Number is selected.</p>
<p>Drawee</p>	<p>Drawee ID will be auto-populated from the collection booking. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>User can change the value of the Drawee for only those bills where Operation Type is COL and ACC.</p> </div>
<p>Outstanding Bill Amount</p>	<p>Read only field. Outstanding Bill Amount will be auto-populated from the collection booking.</p>

2. Click **Next**.

The task will move to next data segment. For more information refer [#unique_44](#).

Table 3-8 Main Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click to send MT799 and MT999 messages from within the task.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.

Table 3-8 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Signatures	<p>Click the Signature button to verify the signature of the customer/bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	<p>User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.</p>
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
Refer	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
Cancel	<p>Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.</p>
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.</p>
Next	<p>On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>

3.3.2 Maturity Details

This topic provides the systematic instructions to capture the maturity details.

1. On **Maturity Details** screen, specify the fields.

Figure 3-9 Maturity Details

For more information on fields, refer to the field description table below.

Table 3-9 Maturity Details - Field Description

Field	Description
Draft Details The user can click + to add multiple Draft Details .	
Draft Code	Specify the draft code or click Search to search and select the draft code.
Draft Amount	Specify the draft amount.
Action	Click Edit icon to edit the draft code/ draft amount. Click Delete icon to delete the draft code.
Maturity and Multi Tenor Liquidation Details In case of multi tenor, user can provide multiple maturity details by clicking the plus '+' icon.	
S. No	Serial number of the tenor record.
Tenor Basis	System defaults the tenor basis, user can update the tenor basis. Click Search to search and select the tenor basis. Note: This field is disabled if the Tenor Type is 'Mixed'.
Tenor Description	The tenor base code description is displayed based on the selected tenor basis. The user to can edit the tenor description.
Start Date	System defaults the tenor date, user can update the same.
Tenor Days	Specify the number of tenor days, if required.

Table 3-9 (Cont.) Maturity Details - Field Description

Field	Description
Transit Days	Specify the transit days, if the tenor is sight.
Maturity Date	<p>System displays the due date for the bill based on tenor and tenor basis.</p> <p>If tenor is sight, system will calculate the maturity date as five working days from Document Received Date. User can change this value to any date earlier than the maturity date up to system date. User cannot change the value to later than maturity date.</p> <p>If tenor is Usance, system will calculate the maturity date based on the tenor basis and populate the maturity date.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>In case if the Operation Type is FOP, Due date (Maturity date) is not applicable in this case and current branch date will be populated in the Maturity date field.</p> </div>
Bill Amount	Specify the bill amount.
Liquidated Amount	Specify the the liquidation amount.
Exchange Rate	Specify the exchange rate.
Liquidation Date	Specify the liquidation date.
Liquidation Amount	Specify the liquidation amount.
Action	<p>Click Edit icon to edit the tenor record.</p> <p>Click Delete icon to delete the tenor record.</p>
Interest From Date	Indicates the interest from date. The interest from date cannot be earlier than branch date and later than maturity date. User can update the Interest From Date.
Interest To Date	Indicates the interest to date. The interest to date cannot be earlier than branch date and later than maturity date. User can update the Interest To Date.
Acceptance Commission From Date	Indicates the accept commission from date.
Acceptance Commission To Date	Indicates the accept commission to date.

2. Click **Next**.

The task will move to next data segment. For more information refer [Other Details](#). For more information on action buttons, refer to the field description table below.

Table 3-10 Maturity Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.

Table 3-10 (Cont.) Maturity Details - Action Buttons - Field Description

Field	Description
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to 'Remarks' field in backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following <ul style="list-style-type: none"> Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.
Request Clarification	Click the Request Clarification button to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.

Table 3-10 (Cont.) Maturity Details - Action Buttons - Field Description

Field	Description
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject description. This reject reason will be available in the remarks window throughout the process.</p>
Refer	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
Cancel	<p>Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.</p>
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.</p>
Back	<p>Click the Back button, to go back to the previous screen.</p>
Next	<p>On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>

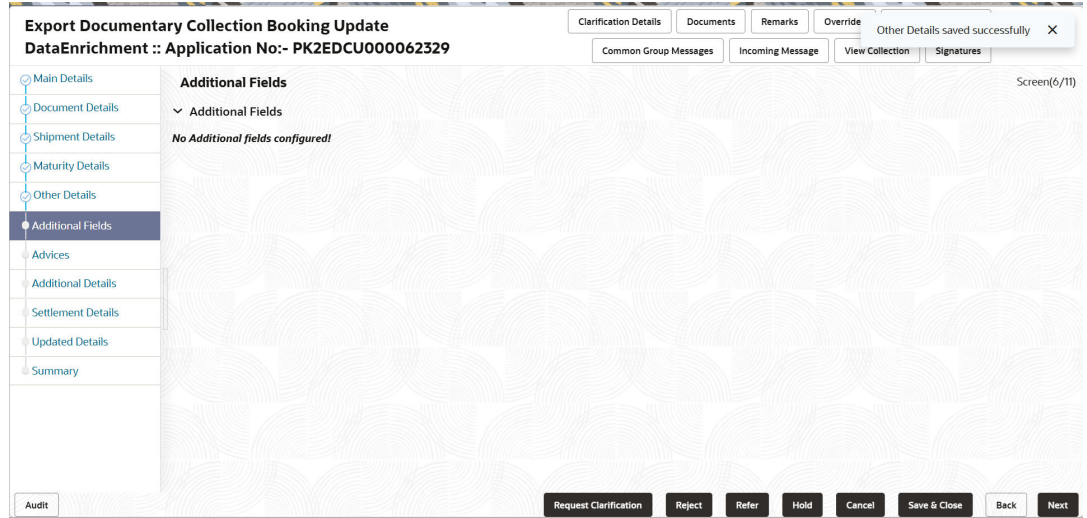

3.3.3 Additional Fields

This topic provides the systematic instructions to capture the additional fields.

Banks can configure user defined fields as per their requirement in the Additional Fields screen.

1. On **Additional Fields** screen, specify the fields, if any.

Figure 3-10 Additional Fields

2. Click Next.

The task will move to next data segment. For more information refer [Advices](#). For more information on action buttons, refer to the field description table below.

Table 3-11 Additional Fields - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.3.4 Other Details

This topic provides the systematic instructions to capture the other details like Credit Value Date, Debit Value Date, Other Bank charges etc.

1. On **Other Details** screen, specify the fields that were not entered at Registration stage.

Figure 3-11 Other Details

For more information on fields, refer to the field description table below.

Table 3-12 Other Details - Field Description

Field	Description
Other Details	
Debit Value Date	Specify the debit value date
Credit Value Date	Specify the credit value date.

Table 3-12 (Cont.) Other Details - Field Description

Field	Description
Value Date	Specify the value date.
Other Bank Charges Specify the other bank charges based on the description in the following table.	
Other Bank Charges - 1	Charges to be collected for the other bank as part of the collection transaction.
Other Bank Charges - 2	Charges to be collected for the other bank as part of the collection transaction.
Other Bank Charges - 3	Charges to be collected for the other bank as part of the collection transaction.
Other Bank Description - 1	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.
Other Bank Description - 2	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.
Other Bank Description - 3	This field displays the description of charges to be collected for the other bank as part of the drawings transaction.
Other Bank Interest The user can enter the Interest details to be captured as a part of "Other Bank Interest" details section.	
Start Date	Specify the date from which the system starts calculating the Interest.
Other Bank Interest-1, 2 and 3	
Component	This field displays the name of the interest Component.
Component Description	Specify the description of the interest component.
Interest Rate	Specify the rate to be applied for the interest component.
Interest Basis	Select the calculation basis on which the Interest to be computed from the drop-down list.
Waive	Select whether the interest to be waived off. The options are: <ul style="list-style-type: none"> • Yes • No

2. Click **Next**.

The task will move to next data segment. For more information refer [Additional Fields](#). For more information on action buttons, refer to the field description table below.

Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Back	Click the Back button, to go back to the previous screen.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.3.6 Additional Details

This topic provides the systematic instructions to capture the additional details

1. On **Additional Details** screen, click  on any Additional Details tile to view the details.

Figure 3-13 Additional Details

The screenshot shows the 'Additional Details' screen for 'Export Documentary Collection Booking Update'. The application title is 'DataEnrichment :: Application No:- PK2EDCU000062329'. The screen is divided into several sections:

- Limit & Collateral:** Limit/Liability, Currency, Limit Contribution, Limit Status, Collateral Currency, Collateral Contribution, Collateral Status.
- Charge Details:** Charge, Commission, Tax, Block Status.
- Preview Message:** Language, Preview Message.
- Payment Details:** Allow Rollover, Auto Change from, Acceptance to Advance, Liquidate using Collateral.
- FX Linkage:** Reference Number, Currency, Contract Amount.
- Interest Details:** Component, Amount, Event.
- Tracer Details:** Payment Tracer, Acceptance Tracer, Charges Details.
- Pre-Shipment Details:** No data to display.
- Linked Loan Details:** Loan Account, Loan Currency, Loan Amount.

At the bottom of the screen, there are several action buttons: Request Clarification, Reject, Refer, Hold, Cancel, Save & Close, Back, and Next.

Limits and Collaterals

Limit availability needs to be checked if amendment involves increase in amount or tolerance or both.

On Approval, system should not release the Earmarking against each limit line and system should handoff the “Limit Earmark Reference Number “to the back office. On successful handoff, back office will make use of these “Limit Earmark Reference Number” to release the Limit Earmark done in the mid office (OBTFFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

Account Available Amount	Read only field. This field displays the account available amount which will be auto-populated on clicking the Verify button.
Response	Read only field. System populates the response on clicking the Verify button.
Response Message	Read only field. System populates the response message on clicking the Verify button.
Verify	Click to verify the account balance of the Settlement Account.
Save & Close	Click to to save and close the record.
Cancel	Click to cancel the entry.
Below fields appear in the Cash Collateral Details grid along with the above fields.	
Collateral %	Specify the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Contribution Amount	This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Account Balance Check Response	Read only field. System populates the Account Balance Check Response on clicking the Verify button.
Edit	Click edit link to edit the collateral details.
	Click delete icon to delete the existing collateral details.
Deposit Linkage Details Click + plus icon to add new Deposit Linkage details.	
	Click plus icon to add new deposit linkage details.
Below fields are displayed on the Deposit Linkage Details pop-up screen, if the user clicks plus icon.	
Customer ID	This field displays the applicant's/applicant bank customer ID defaulted from the application. User can change the customer ID.
Deposit Account	Click Search to search and select deposit for linkage from the list of all the customer Deposits.

Table 3-16 (Cont.) Limit Details - Field Description

Field	Description
Deposit Branch	This field displays the deposit branch which is auto-populated based on the deposit account selection.
Deposit Available Amount	This field displays the deposit available amount and currency which will be auto-populated based on the deposit account selection.
Deposit Maturity Date	This field displays the maturity date of deposit.
Exchange Rate	This field displays the latest exchange rate for deposit linkage. This will be picked up from the exchange rate maintenance from the common core.
Deposit Available In Transaction Currency	This field displays the deposit amount available, after exchange rate conversion, if applicable.
Linkage Percentage %	Specify the value for linkage percentage.
Linkage Amount (Transaction Currency)	This field displays the transaction amount, user can change the value.
Below fields appear in the Deposit Linkage Details grid along with the above fields.	
Deposit Currency	Deposit currency will get defaulted in this field.
Transaction Currency	Transaction currency will get defaulted in this field from the underlying task.
	Click delete icon to delete the existing deposit linkage details.
Edit	Click edit link to edit the deposit linkage details.

Charge Details

This section displays charge details.

The screenshot shows a web interface with three main sections: Commission Details, Charge Details, and Tax Details. At the top, there are buttons for 'Recalculate' and 'Re-default'. The Commission Details section is currently empty, showing 'No data to display.' The Charge Details section contains a table with two rows of data:

Component	Tag currency	Tag Amount	Currency	Amount	Modified	Billing	Defer	Waive	Charge Party	Settlement Account
BCCOUR			EUR	€73.00	€73.00	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		PK20010440017
BCSWIFT			GBP	£333.00	£333.00	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		PK20010440017

The Tax Details section is also empty, showing 'No data to display.' At the bottom right, there are buttons for 'Save & Close' and 'Close'.

For more information on fields, refer to the field description table below.

Table 3-17 Charge Details - Field Description

Field	Description
Commission Details	
Event	Read only field. This field displays the event name.
Event Description	Read only field. This field displays the description of the event.
Component	This field displays the commission component.
Rate	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	This field displays the currency in which the commission have to be collected.
Amount	This field defaults the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Amount	From the default value, if the amount is changed, the value gets updated in the modified amount field.
Defer	If enabled, charges/commissions has to be deferred and collected at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM. The user can not select/de-select the check box if it is de-selected by default.
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settlement Account	Select the settlement account.
Amendable	The value is auto-populated as the commission can be amended or not.
Charge Details	
Component	This field defaults the charge component type.
Tag Currency	This field defaults the tag currency in which the charges have to be collected.

Table 3-17 (Cont.) Charge Details - Field Description

Field	Description
Tag Amount	This field defaults the tag amount that is maintained under the product code.
Currency	This field defaults the currency in which the charges have to be collected.
Amount	This field defaults the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
Waive	Enable the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if Defer toggle is enabled.
Charge Party	Charge party is applicant by default. User can change the value to beneficiary.
Settlement Account	Indicates the settlement account.
Tax Details The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.	
Component	This field displays the tax component.
Type	This field displays the type of tax component.
Value Date	This field displays the value date of tax component.
Currency	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
Amount	This field displays the tax amount based on the percentage of commission maintained.
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
Settlement Account	System defaults the settlement account. The user can modify the settlement account.

- Click **Save and Close** to save the details and close the screen.

Preview Message

The bank user can view a preview of the outgoing SWIFT message and advise simulated from back office.

For more information on fields, refer to the field description table below.

Table 3-18 Preview - Field Description

Field	Description
Preview SWIFT Message	
Language	Select the language for the SWIFT message.
Message Type	Select the message type.
Message Status	Read only field. Display the message status of draft message of liquidation details.
Repair Reason	Read only field. Display the message repair reason of draft message of liquidation details.
Preview Message	This field displays a preview of the draft message.
Preview Mail Device	
Language	Select the language for the advice message.
Advice Type	Select the advice type.
Message Status	Read only field. Display the message status of draft message of liquidation details.
Repair Reason	Read only field. Display the message repair reason of draft message of liquidation details.
Preview Message	This field displays a preview of the draft message.

3. Click **Save and Close** to save the details and close the screen.

Payment Details

For more information on fields, refer to the field description table below.

Table 3-19 Payment Details - Field Description

Field	Description
Payment Details	
Auto Liquidate	Enable the option as 'On' if the auto liquidation is required. Disable the option as 'Off' if the auto liquidation is not required. Auto Liquidation enables liquidation of the bill on the due date automatically from the back office system.
Allow Rollover	Enable the option to allow rollover.
Auto Change from Acceptance to Advance	Read only field. This flag indicates whether an Acceptance type of bill should be automatically converted into an Advance type of bill on its liquidation date. Note: This option is applicable only for the bills that are co-accepted by the bank.
Liquidate using Collateral	Read only field.
Outstanding Collateral Amount	Read only field. Auto Liquidation enables liquidation of the bill on the due date automatically from the back office system.
Protest Date	Select the protest date.

Table 3-19 (Cont.) Payment Details - Field Description

Field	Description
Split Settlement	Enable the option as 'On' to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill. Disable the option as 'Off' Disables the user to select more than one account for settlement (Split Settlement) for the liquidation of an import or export drawing or collection bill.
Avalization	Enable the option as 'On' for avalization.
Settlement Details - Liquidation	
Component	This field displays the component based on the product selected.
Currency	This field displays the default currency for the component.
Debit/Credit	This field displays the debit/credit indicators for the components.
Account	This field displays the account details for the components.
Account Description	This field displays the description of the selected account.
Branch	This field displays the branch of the selected account.
Account Currency	This field displays the currency for all the items based on the account number.
Original Exchange Rate	System displays the Original Exchange Rate as simulated in settlement details section from OBTF.
Exchange Rate	The exchange rate for the settlement.
Deal Reference Number	The exchange deal reference number.
Split Settlement	
Component	This field displays the component based on the product selected.
Currency	This field displays the default currency for the component.
Amount	This field displays the amount for each component. This is populated from the transaction details of the drawing.
Split Settlement Details The user can click + to add multiple Split Settlement Details .	
Sequence	Indicates the sequence of the settlement details.
Amount	Specify the amount for the split settlement.
Settlement Account	Click Search to search and select the settlement account.
Account Customer	This field displays customer account based on the selected settlement account.
Account Currency	This field displays currency of the account.
Account Branch	This field displays branch of the customer's account
Original Exchange Rate	System displays the Original Exchange Rate as simulated in settlement details section from OBTF.
Exchange Rate	Click the Fetch Exchange Rate button, the field displays the exchange rate for the split settlement.
Deal Reference Number	The exchange deal reference number.
Action	Click Edit icon to edit the Split Settlement. Click Delete icon to delete the Split Settlement.

- Click **Save and Close** to save the details and close the screen.

FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

The screenshot shows a web interface titled "FX Linkage". Below the title is a dropdown menu for "FX Linkage" and a plus sign icon. A table with 10 columns is displayed. The columns are: FX Reference Number, Bought Currency, SOLD Currency, Available Contract Amount, Rate, Linked Amount, Total Utilized Amount, FX Expiry Date, and Action. The table contains one row with the following values: 000FNDF20076A9N9, (empty), (empty), £4,000.00, 1.35, £4,000.00, (empty), March 19, 2020, and a delete icon. Below the table is a pagination control showing "Page 1 of 1 (1 of 1 items)" and a page number "1" in a box. Underneath is a section for "Average FX Rate" with a text input field containing "0". At the bottom right, there are "Save & Close" and "Cancel" buttons.

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Total Utilized Amount	FX Expiry Date	Action
000FNDF20076A9N9			£4,000.00	1.35	£4,000.00		March 19, 2020

Table 3-20 FX Linkage - Field Description

Field	Description
The user can click + to add multiple FX Details .	
FX Reference Number	<p>Click Search to search and select the FX contract reference number. On select and save and close, system defaults the available amount, bot currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> Counterparty of the FX contract should be the counterparty of the Bill contract. Active Forward FX transactions authorized not marked for auto liquidation. <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p>
The user can click + to add multiple FX Details .	
Bought Currency	This field displays the currency from the linked FX contract.
Sold Currency	This field displays the currency from the linked FX contract.
Available Contract Amount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.
Rate	This field displays the rate at which the contract is booked.

Table 3-20 (Cont.) FX Linkage - Field Description

Field	Description
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
Current Utilized amount	This field displays the liquidated /purchased /discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.
Total Utilized Amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.
FX Expiry Date	This field displays the expiry date from the linked FX contract.
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.
Action	Click Edit icon to edit the FX details. Click Delete icon to delete the FX details.
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.

5. Click **Save and Close** to save the details and close the screen.

Interest Details

The user can view and modify the Interest Details Simulated from Back Office system. On update of the Interest rate user has to click on Recalculate button. System will trigger a simulation call to the back office and the updated Interest details will be reflected in this section.

For more information on fields, refer to the field description table below.

Table 3-21 Interest Details - Field Description

Field	Description
Component	This field displays the component maintained in the back office.

Table 3-21 (Cont.) Interest Details - Field Description

Field	Description
Component Description	This field displays the description of the component.
Rate Type	This field displays the rate type maintained for the component in back office. <ul style="list-style-type: none"> • Fixed Floating • Special
Rate Code	This field displays the rate code applicable for the component.
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value, if the Rate Type is Floating .
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value, if the Rate Type is Floating .
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.
Min Rate	This field displays the minimum rate applicable for the Rate Code.
Max Rate	This field displays the maximum rate applicable for the Rate Code.
Rate	This field displays the value applicable for the Rate Code. You can modify the value, if the Rate Type is Fixed . System validates whether the Rate input is between the Minimum and Maximum Rate.
Modified Rate	This field displays the modified rate.
Special Pricing Reference Number	Specify the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component). Special Pricing Reference is not applicable for Penal Interest components. For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>System displays an override as “Special Pricing Applicable”, on clicking “Save” in the Interest Details screen, if Special Pricing Reference number has been provided.</p> </div>
Currency	This field displays the interest currency.
Amount	Specify the interest amount, if the Rate Type is Special . In other cases , the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.

Table 3-21 (Cont.) Interest Details - Field Description

Field	Description
Charge Party	This field displays the Charge Party based on the type of transaction. In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills.
Settlement Account	This field displays the settlement account of the Charge Party for debit of Interest. User can change the value. System displays an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override. In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM).
Settlement Currency	System defaults the currency of the Settlement Account as maintained for the Charge Party.
Settlement Branch	System defaults the branch of the Settlement Account as maintained for the Charge Party.

- Click **Save and Close** to save the details and close the screen.

Tracer Details

This section enables the user to view the default Tracer details from back end application. It also allows the user to add new Tracer details. Add new Tracer details based on the description in the following table:

Acknowledgement Tracer, Acceptance Tracer and Payment Tracer are applicable for this process.

The screenshot shows a 'Tracer Details' window with a close button (X) in the top right corner. Under the 'Payment Tracer' section, there are several input fields:

- Tracer Required:** A toggle switch currently set to 'Off'.
- Number of Tracers:** A text input field containing the value '5'.
- Tracer Frequency:** A text input field containing the value '7'.
- Tracer Medium:** A dropdown menu with 'MAIL' selected.
- Tracer Receiver Party:** A search input field containing 'GUARANTOR'.
- Tracer Start Date:** A date picker field showing 'April 20, 2022'.

 At the bottom right of the form, there are two buttons: 'Save & Close' and 'Close'.

For more information on fields, refer to the field description table below.

Table 3-22 Tracer Details - Field Description

Field	Description

7. Click **Save and Close** to save the details and close the screen.

Pre-Shipment Details

This section links an existing Preshipment Credit. Liquidation of pre-shipment credit is applicable only if the operation type is PUR or DIS.

For more information on fields, refer to the field description table below.

Table 3-23 Pre-Shipment Details - Field Description

Field	Description
Pre Shipment Details The user can click + to add multiple Pre Shipment Details.	
Loan Account Number	Specify the loan account number or click Search to search and select the loan account number from the look-up. Note: If there are any pre-shipment credits available for the selected pre-shipment credit number, application will display a message, prompting the user that there are earlier pre-shipment credit/s available and whether he wants to continue or not.
Currency	Read only field. Application defaults the currency based on the selected pre-shipment credit number.
Outstanding Amount	Read only field. Application defaults the outstanding amount based on the selected pre-shipment credit number.
Action	Click Edit icon to edit the pre-shipment details. Click Delete icon to delete the pre-shipment details.
Settled Loan	
Sequence Number	This field displays the sequence of the settled loan.
Loan Account Number	This field displays the pre-shipment loan account number.
Currency	This field displays the currency of the pre-shipment loan account number.
Outstanding Amount	This field displays the pre-shipment outstanding amount.
Event	This field displays the event.

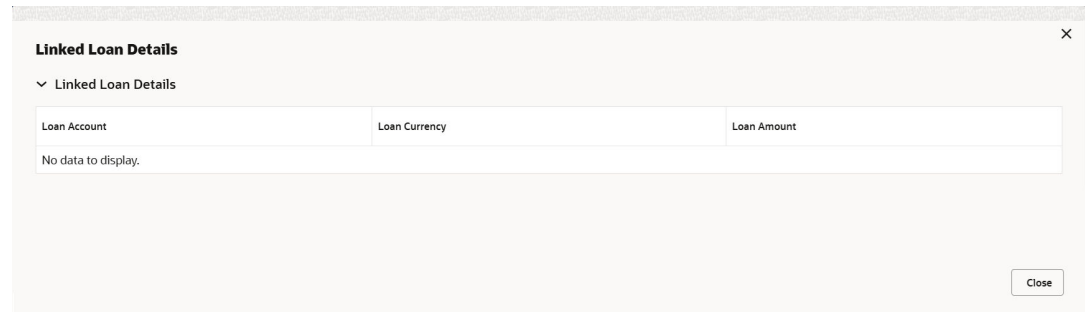

Table 3-23 (Cont.) Pre-Shipment Details - Field Description

Field	Description
Setteled Amount	This field displays the settled amount.

- Click **Save and Close** to save the details and close the screen.

Linked Loan Details

This user can view the details of linked loan accounts.

For more information on fields, refer to the field description table below.

Table 3-24 Linked Loan Details

Field	Description
Loan Account	Displays the details of the linked loan account.
Loan Currency	Displays the loan Currency of the linked loan account.
Loan Amount	Displays the loan amount of the linked loan account.

- Click **Save and Close** to save the details and close the screen.
- Next.**

The task will move to next data segment. For more information refer [Settlement Details](#). For more information on action buttons, refer to the field description table below.

Table 3-25 Additional Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application

Table 3-25 (Cont.) Additional Details - Action Buttons - Field Description

Field	Description
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to 'Remarks' field in backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.
Request Clarification	Click the Request Clarification button to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject description. This reject reason will be available in the remarks window throughout the process.

Table 3-25 (Cont.) Additional Details - Action Buttons - Field Description

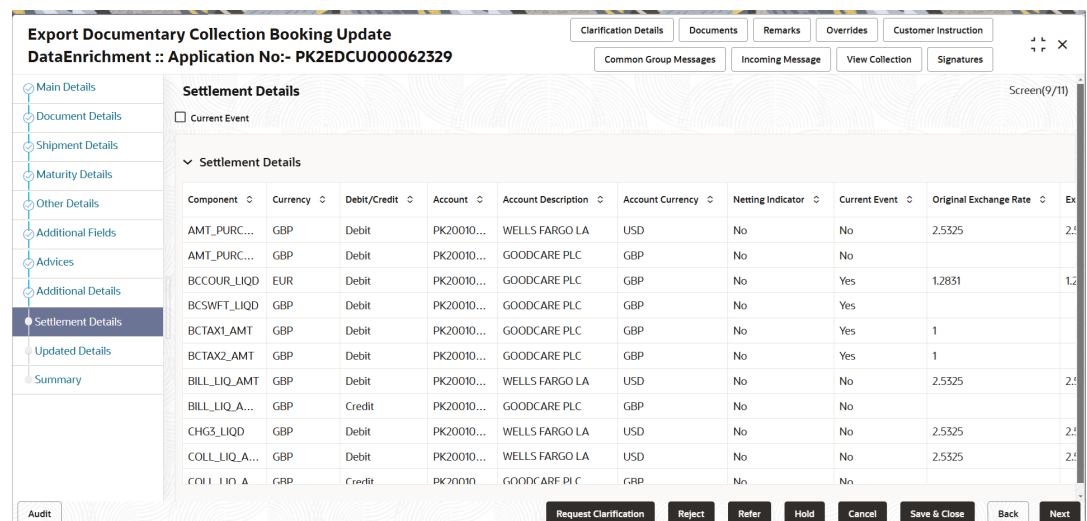

Field	Description
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Back	Click the Back button, to go back to the previous screen.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

3.3.7 Settlement Details

This topic provides the systematic instructions to capture the settlement details of export documentary collection update booking request.

1. On **Settlement Details** screen, specify the fields.

Figure 3-18 Settlement Details

For more information on fields, refer to the field description table below.

Table 3-26 Settlement Details – Field Description

Field	Description
Current Event	Select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event
Component	This field displays the components based on the product selected
Currency	This field displays the default currency for the component.
Debit/Credit	This field displays the debit/credit indicators for the components.
Account	This field displays the account details for the components.
Account Description	This field displays the description of the selected account.
Account Currency	This field displays the currency for all the items based on the account number.
Netting Indicator	This field displays the applicable netting indicator.
Current Event	This field displays the current event.
Original Exchange Rate	System displays the Original Exchange Rate as simulated in settlement details section from OBTF.
Exchange Rate	This field displays the exchange rate.
Deal Reference Number	This field displays the exchange deal reference number.

2. Click **Next**.

The task will move to next data segment. For more information refer [Updated Details](#) .

Table 3-27 Settlement Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to 'Remarks' field in backend application.
Overrides	Click to view the overrides accepted by the user.

3.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export Collection Update Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

Back	Task moves to previous logical step.

3.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

1. Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Note:

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

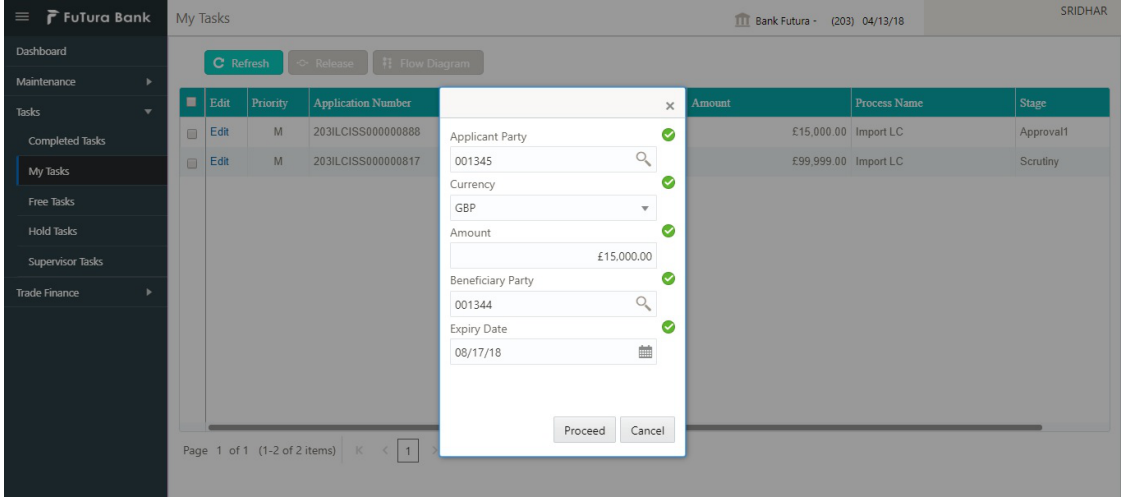

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Bill Currency Code
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.

- [Reject Approval](#)
This topic helps you quickly get acquainted with the Reject Approval process.

3.5.1 Reject Approval

This topic helps you quickly get acquainted with the Reject Approval process.

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Export Documentary Collection Update Booking available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
- Party Details - User can view party details like applicant, Remitting Bank etc.
- Document Details - User can view document details.
- Shipment Details - User can view shipment details.
- Charges - User can view charge details.
- Maturity Details - User can view the maturity details.
- Message Preview - User can view the preview of the simulating message to the remitting bank.

1. Click **Reject Approve** to reject the transaction.
