1

Preface

- [Purpose](#)
- [Audience](#)
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Structure](#)
This manual is organized into the following chapters:
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)

1.1 Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Export Documentary Collection Return - Close** process.

1.2 Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

- [Access to Oracle Support](#)

1.3.1 Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

1.4 Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.5 Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

1.6 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.7 Conventions

The following text conventions are used in this document:

| Convention | Meaning |
|-----------------|--|
| boldface | Boldface type indicates graphical user interface elements associated with an action, or terms defined in text. |
| <i>italic</i> | Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values. |
| monospace | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. |

1.8 Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

1.9 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.10 Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1-1 Acronyms and Abbreviations

| Abbreviation | Description |
|--------------|---|
| OBTFFPM | Oracle Banking Trade Finance Process Management |
| LC | Letter of Credit |
| BC | Bankers Cheque |
| FX | Foreign Exchange |
| CCY | Currency |
| LCY | Local Currency |
| FCY | Foreign Currency |
| LOV | List of Values |
| CIF | Customer Information File |
| UDF | User Defined Fields |
| FFT | Free Format Text |
| SBLC | Standby Letter of Credit |

1.11 Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 1-2 Common Action Buttons and its Definitions

| Action Buttons | Description |
|----------------|---|
| Reject | <p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none">• R1- Documents missing• R2- Signature Missing• R3- Input Error• R4- Insufficient Balance/Limits• R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p> |

Table 1-2 (Cont.) Common Action Buttons and its Definitions

| Action Buttons | Description |
|-------------------------|--|
| Refer | <p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others |
| Hold | <p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p> |
| Cancel | <p>Click Cancel to cancel the transaction input midway without saving any data.</p> |
| Save & Close | <p>Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.</p> |
| Next | <p>Click Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p> |
| Submit | <p>Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p> |

2

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

3

Export Documentary Collection Booking Return - Close

Export Collection Return process facilitates the user to close the outstanding bills along with the returned documents or without any documents, when no more payments are expected.

This topic contains following subtopics:

Let's look at the details for Data Enrichment stage. User can enter/update the following fields. Some of the application details that are already having value from Registration/online channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

- **Main Details**
This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection Return - Close request.
- **Closure/Return Details**
This topic provides the systematic instructions to capture the return details to process the Closure/Return.
- **Additional Fields**
This topic provides the systematic instructions to capture the additional fields.
- **Advices**
This topic provides the systematic instructions to capture the advices details.
- **Additional Details**
This topic provides the systematic instructions to capture the additional details.
- **Settlement Details**
This topic provides the systematic instructions to capture the settlement details of export documentary collection return - close request.
- **Summary**
This topic provides the systematic instructions to view the summary of export documentary collection return - close request.

3.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection Return - Close request.

Main details section has two sub section as follows:

- Application Details
- Collection Details.

Application Details

The fields listed under this section are same as the fields listed under the Application Details section in Registration.

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

Figure 3-7 Data Enrichment - Main Details

For more information on fields, refer to the field description table below.

Table 3-6 Export Documentary Collection Return Islamic - Close - Registration - Application Details - Field Description

| Field | Description |
|--------------------------------------|---|
| Documentary Collection Number | Read only field. This field displays the documentary credit number as selected in Registration stage. |

Table 3-6 (Cont.) Export Documentary Collection Return Islamic - Close - Registration - Application Details - Field Description

| Field | Description |
|----------------------------------|---|
| Drawer | Read only field. This field displays the Drawer ID and name based on the selected Documentary Collection Reference. |
| Branch | Read only field. Branch details is auto-populated based on the selected Documentary Collection Reference. |
| Bill Amount | Read only field. This field displays the bill currency and the Bill Amount based on the selected Documentary Collection Reference. |
| Amount In Local Currency | Read only field. System fetches the local currency equivalent value for the LC amount from back office (with decimal places). |
| Process Reference Number | Read only field. Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code. |
| Customer Reference Number | Specify the customer reference number. |
| Priority | Read only field. System populates the priority of the customer based on priority maintenance. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit. |
| Submission Mode | Read only field. System populates the submission mode of Export Collection Return - Close request. By default the submission mode will have the value as 'Desk'. <ul style="list-style-type: none"> • Desk - Request received through Desk • Courier - Request received through Courier |
| Return Date | System displays the return date of the application. By default, the application displays branch's current date. |
| Version Number | Read only field. This field displays the latest version of the bill. |

Data Enrichment - Main Details - Collection Details

The fields listed under this section are same as the fields listed under the Collection Details section in Registration. During Registration, if user has not captured input, then user can capture the details in this section.

Figure 3-8 Data Enrichment - Main Details - Collection Details

For more information on fields, refer to the field description table below.

Table 3-7 Export Documentary Collection Return - Close - Registration - Collection Details - Field Description

| Field | Description |
|----------------------------------|---|
| Documents Received | Read only field. This field displays the documents received from the collection booking. |
| Tenor Type | Read only field. This field displays the tenor details from the collection booking. |
| Product Code | Read only field. This field displays the product code from the Documentary Collection Number. |
| Product Description | Read only field. This field displays the description of the product as per the product code. |
| Operation Type | Read only field. This field displays the operation type. |
| Stage | Read only field. This field displays the stage based on the selected Documentary Collection Number. |
| Contract Reference Number | Read only field. System populates the contract reference number from the back end system once the Documentary Collection Number is selected. |
| User Reference Number | Read only field. This field displays the user reference number. |

Table 3-7 (Cont.) Export Documentary Collection Return - Close - Registration - Collection Details - Field Description

| Field | Description |
|----------------------------------|---|
| Drawee | Read only field. Drawee ID will be auto-populated based on the selected Documentary Collection Number. |
| Outstanding Bill Amount | Read only field. Outstanding Bill Amount will be auto-populated based on the selected Documentary Collection Number. |
| Collecting Bank | Read only field. Collecting Bank ID and Collecting Bank Name will be auto-populated based on the selected Documentary Collection Number. |
| Collecting Bank Reference | Read only field. Collecting Bank reference will be auto-populated based on the selected Documentary Collection Number. |
| Finance Amount | Read only field. Finance Amount will be auto-populated based on the selected Documentary Collection Number. |
| Protest Date | Read only field. Protest Date will be auto-populated based on the selected Documentary Collection Number. |
| Acceptance Date | Read only field. Acceptance Date will be auto-populated based on the selected Documentary Collection Number. |
| Rebate Amount | Read only field. The rebate to the bill outstanding amount. |
| Customer Dispatch | Read only field. Displays the value that will be populated from back office based on the maintenance. |

2. Click **Next**.

The task will move to next data segment.

Table 3-8 Main Details - Action Buttons - Field Description

| Field | Description |
|------------------------------|--|
| Clarification Details | Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'. |
| Documents | View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application |

Table 3-8 (Cont.) Main Details - Action Buttons - Field Description

| Field | Description |
|------------------------------|--|
| Remarks | Specify any additional information regarding the collection. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application. |
| Overrides | Click to view the overrides accepted by the user. |
| Customer Instruction | Click to view/ input the following <ul style="list-style-type: none"> Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. |
| View Collection | Enables the user to view the latest collection values displayed in the respective fields. |
| Request Clarification | Click the Request Clarification button to submit the request for clarification to the “Trade Finance Portal” User for the transactions initiated offline. |
| Reject | On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: <ul style="list-style-type: none"> R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process. |
| Refer | Select a Refer Reason from the values displayed by the system. Refer Codes are: <ul style="list-style-type: none"> R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others |
| Hold | The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant. |
| Cancel | Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue. |
| Save & Close | Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request. |

3.3.5 Additional Details

This topic provides the systematic instructions to capture the additional details.

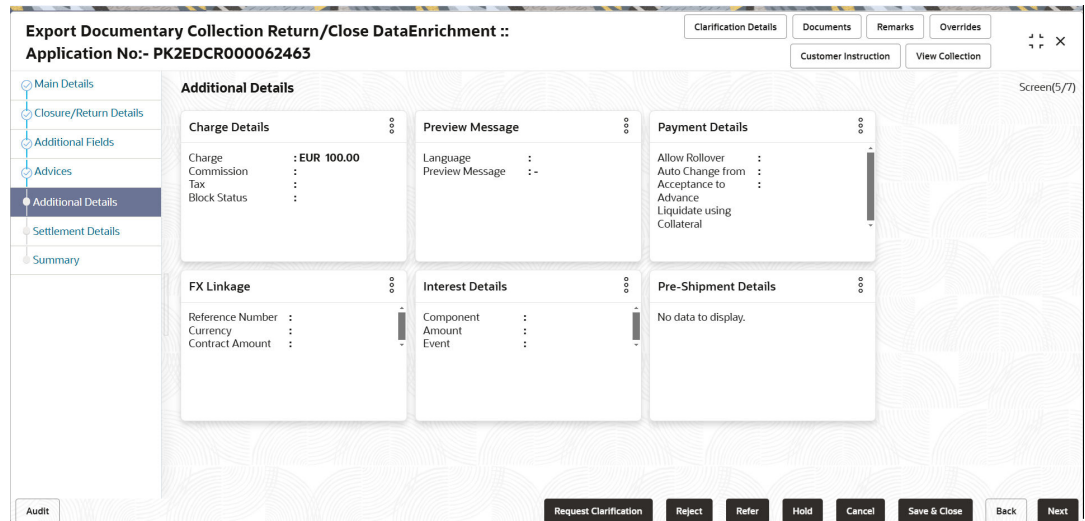

1. On **Additional Details** screen, click  on any Additional Details tile to view the details.

Figure 3-12 Additional Details

Limits and Collaterals

Limit availability needs to be checked if amendment involves increase in amount or tolerance or both.

On Approval, system should not release the Earmarking against each limit line and system should handoff the “Limit Earmark Reference Number “to the back office. On successful handoff, back office will make use of these “Limit Earmark Reference Number” to release the Limit Earmark done in the mid office (OBTFFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

Payment Details

For more information on fields, refer to the field description table below.

Table 3-16 Payment Details - Field Description

| Field | Description |
|---|--|
| Payment Details | Specify the Payment Details based on the description of following table. |
| Auto Liquidate | Read only field. Auto Liquidation enables liquidation of the bill on the due date automatically from the back office system. |
| Allow Rollover | Read only field. |
| Auto Change from Acceptance to Advance | Read only field. This flag indicates whether an Acceptance type of bill should be automatically converted into an Advance type of bill on its liquidation date. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: This option is applicable only for the bills that are co-accepted by the bank.</p> </div> |
| Liquidate using Collateral | Read only field. |
| Outstanding Collateral Amount | Read only field. The outstanding collateral amount along with the currency. |
| Avalization | This flag indicates whether avalization is enabled or not. |
| Settlement Details - Liquidation | Specify the Settlement Details - Liquidation based on the description of following table. |
| Component | This field displays the component based on the product selected. |
| Currency | This field displays the currency for the component. |
| Debit/Credit | This field displays the debit/credit indicators for the components. |
| Account | This field displays the account details for the components. |
| Account Description | This field displays the description of the selected account. |
| Branch | This field displays the branch of the selected account. |
| Account Currency | This field displays the currency for all the items based on the account number. |

2. Click **Save and Close** to save the details and close the screen.

FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

In case of duplicate documents' system will terminate the process after handing off the details to back office.</p> |

3.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export Collection Return - Close request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the

extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

The screenshot displays the 'Amount Block Exception' approval screen. At the top, it shows the title 'Export Documentary Collection Return/Close AmountBlock Exception Approval ::' and the application number 'PK2EDCR000062463'. There are buttons for 'Documents', 'Remarks', 'Overrides', 'Customer Instruction', and 'View Collection'. The main content area is titled 'Amount Block Exception' and includes a 'Summary' tab. Below the summary, there is a table with the following data:

| Type | Contract Currency | Block Amount | Account | Branch | Account Currency | Block Ref No | Block Status | Block Status Details |
|--------|-------------------|--------------|---------------|--------|------------------|--------------|--------------|----------------------|
| Charge | | 100 | PK20010440017 | PK2 | GBP | | Failed | |

At the bottom of the screen, there are buttons for 'Audit', 'Reject', 'Refer', 'Hold', 'Approve', and 'Next'.

This section will display the amount block exception details.

3.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

1. Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

 **Note:**

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Bill Amount
- Bill Currency Code

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

3.6 Reject Approval

This topic helps you quickly get acquainted with the Reject Approval process.

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Export Documentary Collection Return - Close available in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The screen from which the reject was initiated can be seen highlighted in the tile view.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

Summary

The screen up to which data was captured before reject will be available for the user to view in the summary tile. Other fields will be blank when verified from summary tile.

The data segment in which the task was rejected will have the tiles highlighted in a different colour (red).

- Main Details - User can view details about application details and document under collection.
 - Main Details - User can view details about application details and document under collection.
 - Party Details - User can view party details like applicant, Remitting Bank etc.
 - Return Details - User can view return details.
 - Payment Details - User can view payment details. Charges - User can view charge details.
 - Settlement Details - User can view the settlement details.
 - Preview Message- User can view the preview of the simulating message to the remitting bank.
1. Click **Reject Approve** to reject the transaction.

For more information on Action Buttons, refer to the field description table below.

Table 3-29 Action Buttons - Field Description

| Field | Description |
|-----------------------|---|
| Reject Approve | On click of Reject Approve, the transaction is rejected. |
| Reject Decline | On click of Reject Decline, the task moves back to the stage where it was rejected. User can update the reason for reject decline in remarks. |
| Hold | User can put the transaction on 'Hold'. Task will remain in Pending state. |
| Cancel | Cancel the Reject Approval. |
