Preface

- [Purpose](#)
- [Audience](#)
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)
This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Export LC Amendment - Islamic** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to make sure effective security, as strongly recommended by Oracle Software Security Assurance.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>monospace</code>	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Abbreviation	Description
OBTFFPM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 2 Common Action Buttons and its Definitions

Action Buttons	Description
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>

Table 2 (Cont.) Common Action Buttons and its Definitions

Action Buttons	Description
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Click Cancel to cancel the transaction input midway without saving any data.
Save & Close	Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	Click Next , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

Symbols and Icons

1

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2

Export LC Amendment - Islamic

This chapter is documented to get familiar with the Export LC Amendment - Islamic process of Oracle Banking Trade Finance Process Management.

Conventional Export LC Amendment process enables the user to make an amendment to the LC which had been already advised.

The common amendments that are made to an Export LC are:

- Expiry date
- Latest Shipment Date
- Increase/Decrease in LC amount
- Tolerance percentage
- Confirmation instruction
- Available with bank
- Port of loading/discharge & Goods quantity
- Related documents to be submitted
- The amendments may need consent from the beneficiary of the amendment. In such scenarios, after the processing of amendment, the amended LC is parked awaiting beneficiary consent.

The various stages involved for Islamic Export LC Amendment are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input amendment application details
- Upload of related mandatory and non-mandatory documents
- Verify /capture details (SWIFT MT707, 708/Non Online Channels)- Scrutiny stage
- Input/Modify details of amendment of LC - Data Enrichment stage
- Check for limit availability if applicable
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges if applicable
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Export LC Amendment process flow is similar to that of conventional Export LC Amendment process flow.

In the following sections, let's look at the details for Islamic Export LC amendment process.

This topic contains following subtopics:

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the **Export LC Amendment - Islamic** request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of **Export LC Amendment - Islamic** request.
- [Scrutiny](#)
This topic provides the systematic instructions to initiate the Scrutiny stage of Export LC Amendment - Islamic request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Amendment - Islamic request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the **Export LC Amendment - Islamic** request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.

The **Initiate Task** screen appears.

Figure 2-1 Initiate Task

2. On **Initiate Task** screen, specify the fields.

 **Note:**

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
LC Reference Number	Click Search to search and select the LC reference number from the look-up.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 2-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

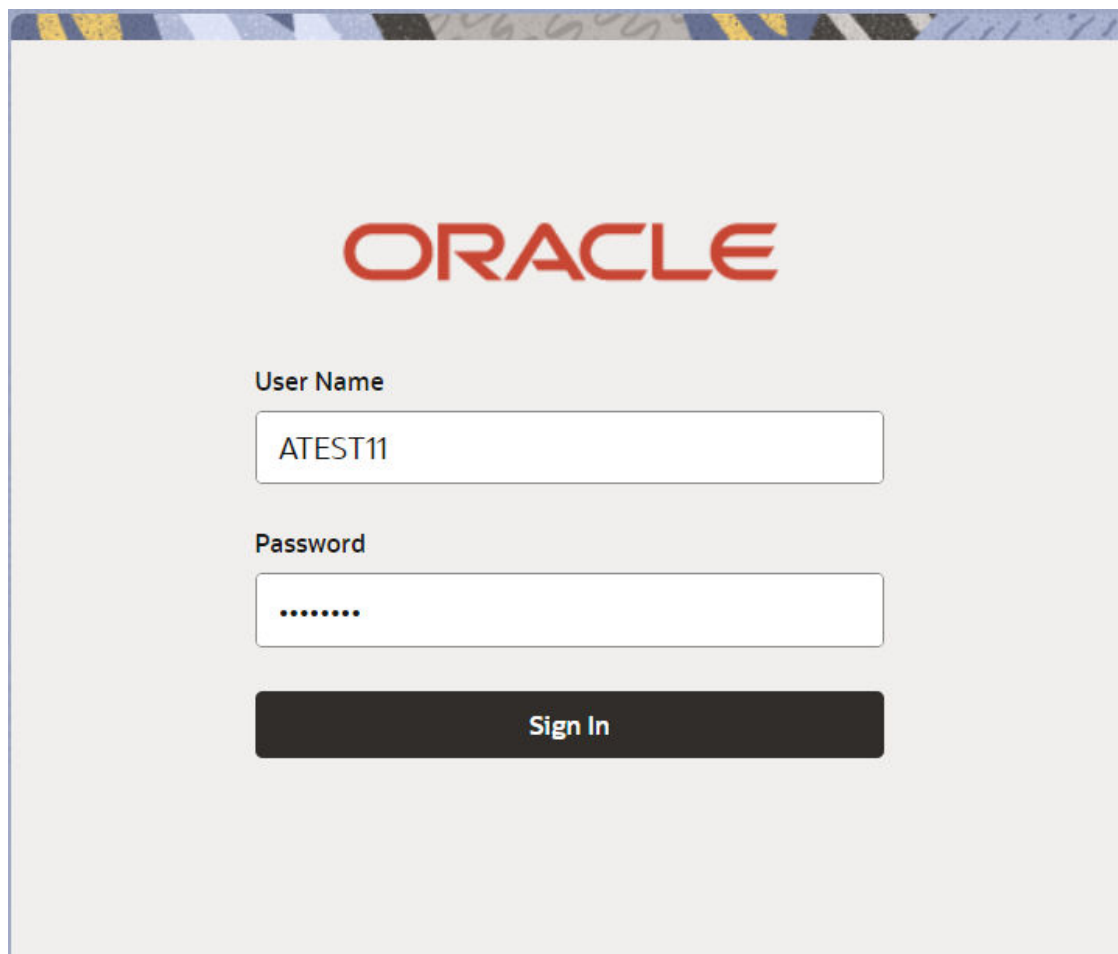

2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of **Export LC Amendment - Islamic** request.

User can register a request for an Islamic Export LC Amendment received at the front desk through Mail/Courier. During Registration stage, user can capture the basic details of the amendment application, check the signature of authorized signatory of the issuing bank, and then upload the related documents of the applicant. On submit of the request, the request will be available for an LC Amendment expert to handle the request in the next stage.

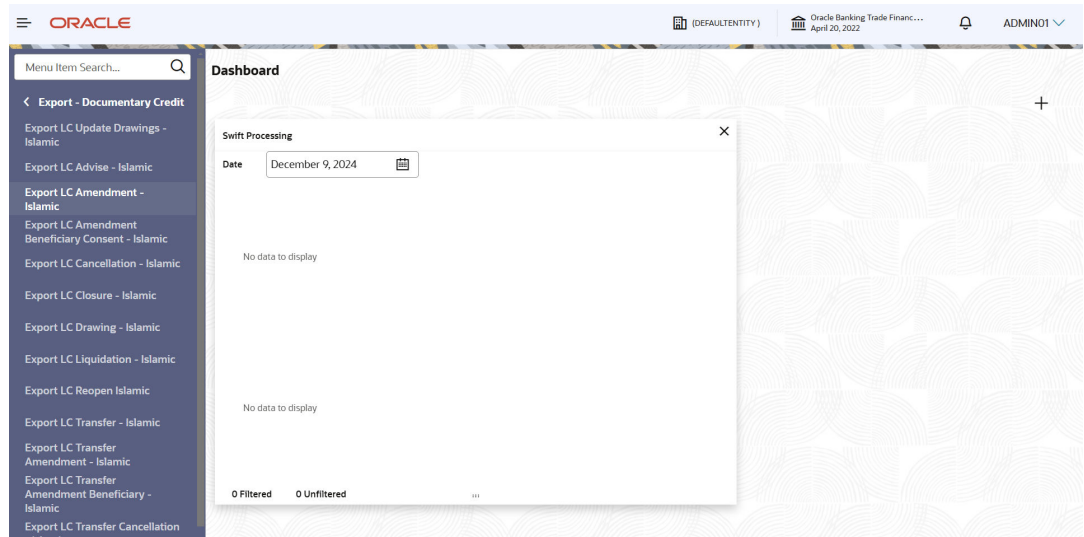

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 2-2 Login Screen

The image shows the Oracle login screen. At the top center is the Oracle logo in red. Below the logo, there are two input fields. The first is labeled "User Name" and contains the text "ATEST11". The second is labeled "Password" and contains seven dots. Below the password field is a dark grey button with the text "Sign In" in white. The background is a light grey gradient with a decorative pattern at the top.

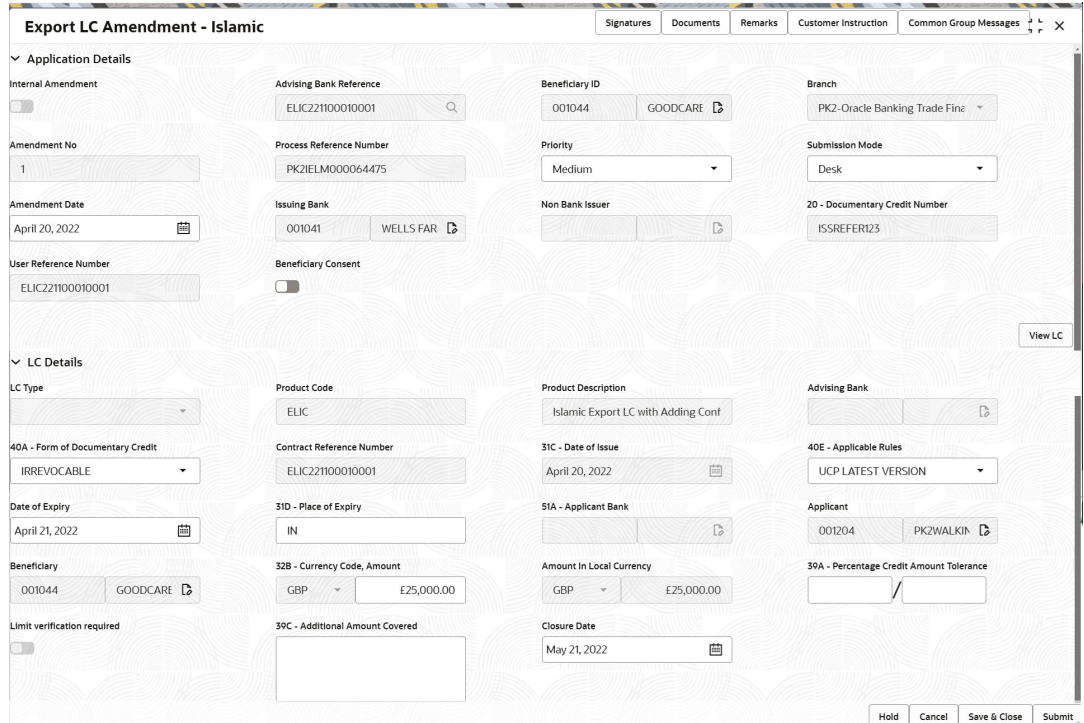

1. On **Home** screen, click **Trade Finance - Islamic**. Under **Trade Finance - Islamic**, click **Export Documentary Credit**.
2. Under **Export Documentary Credi**, click **Export LC Amendment - Islamic**.

Figure 2-3 Export LC Amendment - Islamic

The **Export LC Amendment - Islamic - Registration** screen appears. The Export LC Amendment - Registration stage has two sections Application Details and LC Details. Let's look at the details of Registration screens below:

Figure 2-4 Export LC Amendment - Islamic - Registration - Application Details

3. On **Export LC Amendment - Islamic - Registration - Application Details** screen, specify the fields.

 **Note:**

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-3 Export LC Amendment - Islamic- Registration - Application Details - Field Description

Field	Description
Internal Amendment	Indicates whether the amendment is internal or not.
Advising Bank Reference	Click Search to search and select the advising bank reference number from the look-up. Alternatively, specify the advising bank reference number. In the look-up search, user can specify the Export LC Reference Number, Beneficiary, Currency, Amount and User Reference to fetch the Export LC details. Based on the search result, select the applicable Export LC to be amended.
Beneficiary ID	Read only field. Beneficiary ID and beneficiary Nname will be auto-populated based on the selected Export LC from the look-up .
Branch	Read only field. Branch details will be auto-populated based on the selected Export LC from the look-up .
Amendment No	Read only field. Amendment number will be auto-populated based on selected Export LC. Amendment number increases by 1 for each amendment.
Process Reference Number	Read only field. Unique sequence number for the transaction. This is auto generated by the system based on process name and branch code.
Priority	System populates the priority of the customer based on priority maintenance, also enables the user to change the priority as per the requirement. The Export LC Amendment request priority can be set as Low/Medium/High.
Submission Mode	System populates the submission mode of Export LC Amendment request. By default the submission mode will have the value as 'Desk'. <ul style="list-style-type: none">• Desk - Request received through Desk• Courier - Request received through Courier User can change the defaulted priority.

Table 2-3 (Cont.) Export LC Amendment - Islamic- Registration - Application Details - Field Description

Field	Description
Amendment Date	System defaults the branch's current date and enables the user to change the date to any back date. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;">  Note: Future date selection is not allowed. </div>
Issuing Bank	Read only field. Issuing Bank details will be auto-populated based on selected Export LC.
Non Bank Issuer	Read only field. Non bank issuer details will be auto-populated based on selected Export LC.
20 - Documentary Credit Number	Read only field. This field displays the Documentary Credit Number of the selected LC.
User Reference Number	Read only field. User reference number will be auto-populated based on selected Export LC.
Beneficiary Consent	Switch to  , if beneficiary consent is required. Switch to  , if beneficiary consent is not required.

LC Details

Details in this screen displays the data from the LC issued.

4. On Export LC Amendment - Islamic - LC Details screen, specify the fields.

 **Note:**

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-4 Export LC Amendment - Islamic - Registration - LC Details - Field Description

Field	Description
LC Type	Read only field. LC type will be auto-populated based on selected Export LC.
Product Code	Read only field. Product code will be auto-populated based on selected Export LC.
Product Description	Read only field. This field displays the description of the product as per the product code.
Advising Bank	Read only field. This field displays the advising bank details of the selected Export LC.
40A - Form of Documentary Credit	Read only field. This field displays the form of documentary credit details of the selected Export LC.
Contract Reference Number	Read only field. Contract reference number will be auto-populated based on selected Export LC.
Date of Issue	Read only field. This field displays the the LC issuance date.
Applicable Rules	System defaults the applicable rule of the selected Export LC. The user can change the applicable rule.
Date of Expiry	System defaults the expiry date of the selected Export LC.  Note: If amendment to the Expiry date (advancing the expiry date before expiry date of the underlying Import LC), system validates the amended value against the Back-to- Back LC value and display configurable override.
Place of Expiry	System defaults the place of expiry of the selected Export LC.

Table 2-4 (Cont.) Export LC Amendment - Islamic - Registration - LC Details - Field Description

Field	Description
Applicant Bank	Read only field. This field displays the applicant bank details of the selected Export LC.
Applicant	Read only field. This field displays the details of the applicant of the selected Export LC.
Beneficiary	Read only field. This field displays the details of the beneficiary of the selected Export LC.
Currency Code, Amount	System defaults the value of Export LC along with the currency details of the selected Export LC. The user can amend the currency code and amount, if required. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: If amendment to the Amount (reduction in amount), field in the Export LC, system validates the amended value against the Back-to-Back LC value and display configurable override.</p> </div>
Amount In Local Currency	Read only field. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).
Percentage Credit Amount Tolerance	System defaults the percentage credit amount tolerance details of the selected Export LC. The user can amend the percentage credit amount tolerance details, if required.
Additional Amount Covered	System defaults the details of additional amount covered of the selected Export LC. The user can amend the details, if required.

5. Click **Submit**.

The task will move to next logical stage of Export LC Amendment - Islamic.
For more information on action buttons, refer to the field description table below.

Table 2-5 Export LC Amendment - Islamic - Registration - Action Buttons - Field Description

Field	Description
Signatures	<p>Click the Signature button to verify the signature of the customer/bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Documents	Upload the documents received under the Export LC Amendment.
Remarks	Specify any additional information regarding the Export LC Amendment. This information can be viewed by other users handling the request.
Customer Instruction	<p>Click to view/ input the following.</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Export LC Amendment task. Details entered will not be saved and the task will be removed
Save & Close	<p>Save the information provided and holds the task in 'My Task' queue for working later.</p> <p>This option will not submit the request.</p>
Submit	The task will move to next logical stage of Export LC Amendment. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.

 **Note:**

When an amendment to an Export LC which is linked to a Back to Back LC (Import LC) is initiated, system should display a message, the LC is linked to an Import LC.

2.3 Scrutiny

This topic provides the systematic instructions to initiate the Scrutiny stage of Export LC Amendment - Islamic request.

Scrutiny user can scrutinize a request for Islamic Export LC Amendment.

As part of scrutiny, user can enter/update basic details of the Islamic LC Amend request and can verify if the request can be progressed further. The task initiated from the online channel (SWIFT MT707, 708 parsing) should be created in the Scrutiny stage directly as in conventional process flow.

MT707/708 Parsing-Conventional and Islamic Trade finance is applicable

When parsing the MT707/708, OBTFPM should read the SWIFT message,

- If 57A tag (ATB) value is available in the message, the task should be created in the Conventional Export LC Amendment process.
- If 57A tag (ATB) value is not available in the message, based on the Advising Bank Ref found in Tag 21 Receiver reference number, system should identify the product code from the Tag21 and create the task in Conventional/Islamic Export LC amendment.

MT707/708 Parsing-where Islamic Trade finance is applicable

When parsing the MT707/708, OBTFPM should read the SWIFT message and all the tasks should be created in the Islamic Export LC amendment process.

If the incoming message is MT 707, requests that are received via online channels like trade portal, external system and SWIFT should be available directly for further processing in OBTFPM from Scrutiny stage.

Do the following steps to acquire a task currently at Scrutiny stage:

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Task**.
2. Under **Task**, click **Free Task**.

Limit/Liability Currency	This field displays the limit currency, when the user select the Liability Number .
Limits Description	This field displays the limits description.
Limit Check Response	<p>This field displays the limit check response. Response can be 'Success' or 'Limit not Available' based on the limit service call response.</p> <p>The value in this field appears, if you click the Verify button.</p>
Amount to Earmark	<p>This field defaults the amount to earmark.</p> <p>Contribution amount will default based on the contribution %.</p> <p>User can change the value.</p>

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
Expiry Date	This field displays the date up to which the Line is valid.
Limit Available Amount	This field displays the value of available limit, i.e., limit available without any earmark. The Limit Available Amount must be greater than the Contribution Amount. The value in this field appears, if you click the Verify button.
Response Message	This field displays the detailed response message. The value in this field appears, if you click the Verify button.
ELCM Reference Number	This field displays the ELCM reference number.
Limit Details grid	Below fields appear in the Limit Details grid along with the above fields.
Line Serial	Displays the serial of the various lines available and mapped under the customer id. This field appears on the Limits grid.
Edit	Click the link to edit the Limit Details .
Cash Collateral Details	Specify the Cash Collateral Details . Collateral availability needs to be checked if amendment involves increase in amount or tolerance. Provide the collateral details based on the description provided in the following table:
Collateral Percentage	System populates the Collateral % maintained in the Customer / Product for the counter party of the contract. User can modify the collateral percentage.
Collateral Currency and amount	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.
Exchange Rate	System populates the exchange rate maintained. User can modify the collateral Currency and amount. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.
Edit	Click edit link to edit the collateral details.
Collateral Details pop-up screen	Click + plus icon to add new collateral details. Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon.
Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.
Collateral Split %	Specify the collateral split% to be collected against the selected settlement account.
Collateral Contribution Amount	Specify the collateral amount to be collected against the selected settlement account. User can either provide the collateral % where the collateral amount will be auto populated or modifying the collateral amount will auto correct the collateral %.

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
Settlement Account	Click Search to search and select the settlement account for the collateral.
Settlement Account Currency	Read only field. This field displays the settlement account currency defaulted by the system.
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.
Account Available Amount	Read only field. System populates the account available amount on clicking the Verify button.
Response	Read only field. System populates the response on clicking the Verify button.
Response Message	Read only field. System populates the response message on clicking the Verify button.
Verify	Click to verify the account balance of the Settlement Account.
Save & Close	Click to to save and close the record.
Cancel	Click to cancel the entry.
Cash Collateral Details grid	Below fields appear in the Cash Collateral Details grid along with the above fields.
Collateral %	Specify the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Contribution Amount	This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Edit	Click edit link to edit the collateral details.
Account Available Amount	This field displays the account available amount which will be auto-populated based on the settlement account selection.
Deposit Linkage Details	Specify the new deposit linkage details. Click + plus icon to add new Deposit Linkage details. Below fields are displayed on the Deposit Linkage Details pop-up screen, if the user clicks plus icon. In this section which the deposit linkage details is captured. System should allow the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/modification of existing Linkage by calling Back-office system (DDA) system directly.

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
Edit	Click edit link to edit the deposit linkage details.
Deposit Account	Click Search to search and select deposit for linkage from the list of all the customer Deposits. All the Deposits of the customer should be listed in the LOV search. User should be able to select the deposit for linkage.
Deposit Branch	This field displays the deposit branch which will be auto-populated based on the deposit account selection.
Deposit Available Amount	This field displays the deposit available amount and currency which will be auto-populated based on the deposit account selection.
Deposit Maturity Date	This field displays the maturity date of deposit based on the deposit account selection.
Exchange Rate	This field displays the latest exchange rate for deposit linkage. This will be picked up from the exchange rate maintenance from the common core.
Deposit Available In Transaction Currency	This field displays the deposit amount available, after exchange rate conversion, if applicable.
Linkage Percentage %	Specify the value for linkage percentage.
Linkage Amount (Transaction Currency)	This field displays the transaction amount, user can change the value. System validates the linking amount with available Deposit balance and should not allow to link more than the available amount.
Deposit Linkage Details	Below fields appear in the Deposit Linkage Details grid along with the above fields.
Deposit Currency	This field displays the deposit currency.
Transaction Currency	This field displays the transaction currency.

2. Click **Save and Close** to save the details and close the screen.

Commission, Charges and Taxes

This section displays Commission, Charges and Taxes details. On landing the additional tab, charges, commission and tax components mapped to the product from the back office system.

The system also default the Charges/Commission Party maintained for the customer as per defined Class Maintenance in OBTF. System simulates the Charges, Commission and Tax details from the Back office.

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Table 2-16 Charge Details - Field Description

Field	Description
Commission Details	This section displays the commission details.
Component	This field displays the commission component.
Rate	<p>This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.</p> <p>If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.</p>

Table 2-16 (Cont.) Charge Details - Field Description

Field	Description
Modified Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	This field displays the currency in which the commission have to be collected.
Amount	This field displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Amount	From the default value, if the amount is changed, the value gets updated in the modified amount field.
Defer	Switch to  for charges/commissions has to be deferred and collected at any future step.
Waive	Switch to  to waive the charges/commissions. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Split	Switch to  to split the Commission as per the requirement.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settlement Account	Select the settlement account.
Charge Details	This section displays the charge details.
Component	This field displays the charge component type.
Tag Currency	This field displays the tag currency in which the charges have to be collected.
Tag Amount	This field displays the tag amount that is maintained under the product code.
Currency	This field displays the currency in which the charges have to be collected.
Amount	This field displays the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.

Table 2-16 (Cont.) Charge Details - Field Description

Field	Description
Billing	 <p>Switch to  to make the details available for billing engine for further processing, if charges are handled by separate billing engine. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM.</p> <p>The user can not enable/disable the option, if it is de-selected by default.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>
Defer	 <p>Switch to  to defer the charges and collect at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>
Waive	 <p>Switch to  to waive the charges. Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if Defer toggle is enabled.</p>
Split	 <p>Switch to  to split the Charges/Commission as per the requirement.</p>
Charge Party	Charge party is applicant by default. User can change the value to beneficiary.
Settlement Account	Select the settlement account.
Tax Details	This section displays the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/commission will be available on click of Re-Calculate button or on hand off to back-end system.
Component	This field displays the tax component.
Type	This field displays the type of tax component.
Value Date	This field displays the value date of tax component.
Currency	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
Amount	This field displays the tax amount based on the percentage of commission maintained. You can edit the tax amount, if applicable.

Table 2-16 (Cont.) Charge Details - Field Description

Field	Description

Split Settlement Details	Split Settlement details section appears from Back office, when the user clicks on the Recalculate button.
Sequence	The sequence number is auto populated with the value, generated by the system.
Component	The split component type eligible for Split.
Amount	<p>The system splits the respective Charge/Commission amount automatically between counter party and third party with 50% value by default.</p> <p>The bank user can modify the amount.</p> <p>More than two splits are not allowed.</p>
Customer	Indicates the ID of the Customer in Split Settlement Details section.
Account	<p>The system defaults the settlement account.</p> <p>User can modify the settlement account. System initiates a call to common core tables within OBTFPM to select the account.</p>
Account Currency	This field defaults the currency of the account.
Branch	Indicates the branch of the customer where transaction is getting processed.

Table 2-16 (Cont.) Charge Details - Field Description

Field	Description
Percentage	The system splits the respective Charge/Commission percentage automatically between counter party and third party with 50% value by default. More than two splits are not allowed. The bank user can modify the amount. The system should validate that the total percentage of each component doesn't exceed 100 and the total amount of each component doesn't exceed total component amount.
Exchange Rate	System populates the exchange rate maintained.
Original Exchange Rate	System displays the Original Exchange Rate as simulated in split settlement details section.
Party Type	System displays the party type in split settlement details section.
Negotiation Reference	Specify the negotiation reference number.
AR-AP Tracking	Indicates to defer the charge/ commission in Split Settlement Details section. The user can modify the AR-AP Tracking flag as per the requirements.
Loan/Finance Account	Displays the loan account.
Negotiation Rate	Specify the negotiation rate.

Revolving Details

For more information on fields, refer to the field description table below.

Table 2-17 Revolving Details - Field Description

Field	Description
Revolving	This field displays the revolving details of the LC.
Revolving In	Indicates the mode of revolving in this field. The LC can revolve with Time or Units.
Revolving Frequency	In case the LC revolves with time, then this field should be updated. This field captures the frequency in days and months by which the LC revolves.
Revolving Units	This field indicates the units by which the LC revolves.
Next Reinstatement Date	This field displays the date of next reinstatement for the LC based on the revolving frequency selected.

Table 2-17 (Cont.) Revolving Details - Field Description

Field	Description
Cumulative	This field indicates, if the LC value has to be cumulative or not on reinstatement.
Automatic Reinstatement	This field enables the user to have automatic reinstatement on the reinstatement day without manual intervention.

3. Click **Save and Close** to save the details and close the screen.

FX Linkage

This section enables the user to link the existing FX contract(s) to the LC transactions. User can link multiple forward FX contracts.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the Bill.

The screenshot displays the 'FX Linkage' window. It features a table with the following columns: FX Reference Number, Bought Currency, SOLD Currency, Available Contract Amount, Rate, Linked Amount, Total Utilized Amount, FX Expiry Date, and Action. The table contains one row with the following values: 000FNDF20076A9N9, (empty), (empty), £4,000.00, 1.35, £4,000.00, (empty), March 19, 2020, and edit/delete icons. Below the table is a pagination control showing 'Page 1 of 1 (1 of 1 items)'. There is also an 'Average FX Rate' input field with the value '0'. At the bottom right, there are 'Save & Close' and 'Cancel' buttons.

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Total Utilized Amount	FX Expiry Date	Action
000FNDF20076A9N9			£4,000.00	1.35	£4,000.00		March 19, 2020

For more information on fields, refer to the field description table below.

Table 2-18 FX Linkage - Field Description

Field	Description
FX Reference Number	<p>Click Search to search and select the FX contract reference number. On select and save and close, system defaults the available amount, bot currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows,</p> <ul style="list-style-type: none"> Counterparty of the FX contract should be the counterparty of the Bill contract. Active Forward FX transactions authorized not marked for auto liquidation. <p>Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.</p> <p>The user can click + to add multiple FX Details.</p>
Bought Currency	This field displays the currency from the linked FX contract.
Sold Currency	This field displays the currency from the linked FX contract.
Available Contract Amount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.
Rate	This field displays the rate at which the contract is booked.

Table 2-18 (Cont.) FX Linkage - Field Description

Field	Description
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
Current Utilized amount	This field displays the liquidated /purchased /discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.
Total Utilized Amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.
FX Expiry Date	This field displays the expiry date from the linked FX contract.
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.
Action	Click Edit icon to edit the FX details. Click Delete icon to delete the FX details.
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.

4. Click **Save and Close** to save the details and close the screen.

Assignment of Proceeds

In this tile, assignment details for the applicable processes is displayed. Proceeds can be assigned only if the parties have been assigned during drawing or update drawing process.

Assignment of Proceeds

Assignee Details

Sequence	Assignee Id & Assignee Details	Assignment %	Currency	Assigned Amount	Account	Assignee Account	Account With Institution
1	000322 Trade It	4	GBP	GBP 20,000.00	PKN		

Save & Close Cancel

For more information on fields, refer to the field description table below.

Table 2-19 Assignment of Proceeds - Field Description

Field	Description
Assignment of Proceeds	Specify the Assignment of Proceeds details.
Assignment Paid By Importer	Enable the option, if assignment is paid by importer.

Table 2-19 (Cont.) Assignment of Proceeds - Field Description

Field	Description
Sequence	Specify the sequence number.
Assignee ID & Assignee Details	<p>Click Search to search and select the assignee id. Assignee details appear based on selected assignee ID. User can add multiple assignees to a single Bill under LC with the assignment amount or assignment percentage of parent LC.</p> <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: WALKIN customers is allowed as assignee.</p> </div>
Assignment %	<p>Specify the percentage of LC amount that has be assigned to the assignee. Once the user updates the rate, the system calculates the amount as per assigned rate and default in the assigned amount field. If the user directly captures the assigned amount then the assigned percentage has to calculate the percentage and the same to be populated in the screen. If contribution is more than 100%, system to display an alert message. Once contribution % is input system will default the amount. System to validate that Limit Contribution percentage plus Collateral percentage is equal to 100. Otherwise system to provide override.The assignment percentage should be rounded to two decimal places.</p>
Currency	Click Search to search and select the account currency of the settlement account of the assignee. Only the currencies for which the settlement account is available, only those currency will be displayed.
Assigned Amount	Specify the amount that has to be assigned to the assignee. If the user has already entered the assignment percentage, system to calculate the amount and populate the value.
Assignee Bank Details	Click Search to search and select the assignee bank.
Account with Institution	Click Search to search and select the account number of the Account with Institution.

5. Click **Save and Close** to save the details and close the screen.
6. Click **Next**.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

Table 2-20 Additional Details - Action Buttons - Field Description

Field	Description
Documents	<p>Upload the required documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>

Table 2-20 (Cont.) Additional Details - Action Buttons - Field Description

Field	Description
Remarks	Specify any additional information regarding the Export LC Amendment - Islamic. This information can be viewed by other users handling the request.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following. <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767. Clicking this button allows parsing and processing MT 707 along with the MT708 messages.
View LC	Clicking this button enables the user to view the latest LC values displayed in the respective fields.
Signatures	Click the Signature button to verify the signature of the customer/bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others

Let's look at the details for Data Enrichment stage. User can enter/update the fields in Data Enrichment stage. Some of the fields that are already having value from Registration/online channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Amendment - Islamic request.
- [Availability Shipment](#)
This topic provides the systematic instructions to capture the availability and shipment details.
- [Document and Conditions](#)
This topic provides the systematic instructions to capture the details of the documents received.
- [Payment Details](#)
This topic provides the systematic instructions to initiate the Payment in Data Enrichment stage of Export LC Amendment - Islamic request.
- [Amendment Details](#)
This topic provides the systematic instructions to capture the Amendment Details.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details of Export LC Amendment Islamic process.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details in Scrutiny stage of Export LC Amendment - Islamic process.
- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of Export LC Amendment - Islamic request.

- [Summary](#)
This topic provides the systematic instructions to view the summary details in Data Enrichment stage of Export LC Amendment - Islamic request.

2.4.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC Amendment - Islamic request.

Main details section has two sub section as follows:

- Application Details
- LC Details.

Application Details

1. On **Data Enrichment - Main Details** screen, specify the fields, if any that were not entered at Registration stage.

Figure 2-20 Data Enrichment - Main Details

For more information on the fields, refer [Table 2-6](#) of **Scrutiny** stage.

LC Details

The fields listed under this section are same as the fields listed under the **LC Details** section in **Scrutiny** stage. For more information on the fields, refer [Table 2-7](#) of **Scrutiny** stage. During Registration, if user has not captured input, then user can capture the details in this section.

Figure 2-21 LC Details

Audit

This button provides information about user initiated the transaction, initiated date, stage wise detail etc.

For more information on Audit, refer to the field description table below.

Table 2-22 Audit - Field Description

Field	Description
Application No.	This field displays the application number of the process.
Branch Code	This field displays the branch code.
Initiated Date	This field displays the date on which process is initiated.
Initiated By	This field displays the user ID of the user who had initiated the process.
Process Name	This field displays the name of the process which is initiated.
S. No	This field displays the serial number of the audit record.
Stage Name	This field displays the current stage of the process.
Completed Time	This field displays the time on which the audit of the current stage is completed.
Completed By	This field displays the user ID of the user who had completed the audit.
Outcome	This field displays the outcome of the audit.

2. Click **Next**.

The task will move to next data segment.

For more information on the action buttons, refer [Table 2-9](#) in **Main Details** section of **Scrutiny** stage.

2.4.2 Availability Shipment

This topic provides the systematic instructions to capture the availability and shipment details.

User must verify/input/update Availability, Shipment and Goods details of an Export LC request for the different fields under the respective data segments.

1. On **Availability Shipment** screen, specify the fields.

Figure 2-22 Availability Shipment

The screenshot shows the 'Availability Shipment' screen with the following fields and sections:

- Availability Details:**
 - 41a-Available with: BANK
 - 41a-Available By: BY PAYMENT
 - 42C-Drafts At: Test
 - Drawee: HSBCEB2SXXX
- 42 P/M - Payment Details:** (Empty field)
- Shipment Details:**
 - 43P-Partial Shipments: NOT ALLOWED
 - 43T-Transshipment: NOT ALLOWED
 - 44A-Place of Taking in Charge: London
 - 44E-Port of Loading: (Empty)
 - 44F-Port of Discharge: Mumbai
 - 44B-Place of Final Destination: (Empty)
 - 44C-Latest Date of Shipment: (Empty)
 - 44D-Shipment Period: (Empty)
- 45A Description of Goods and/or Services:**
 - INCO Terms: CIF
 - INCO Terms Description: Cost, Insurance and Freight (name:)

For more information on fields, refer [Table 2-10](#) of **Scrutiny** stage.

2. Click **Next**.

The task will move to next data segment. For more information refer [Document and Conditions](#).

For more information on action buttons, refer [Table 2-10](#) of **Scrutiny** stage.

2.4.3 Document and Conditions

This topic provides the systematic instructions to capture the details of the documents received.

User must provide the required documents and additional conditions (if applicable) in this section.

Document Details

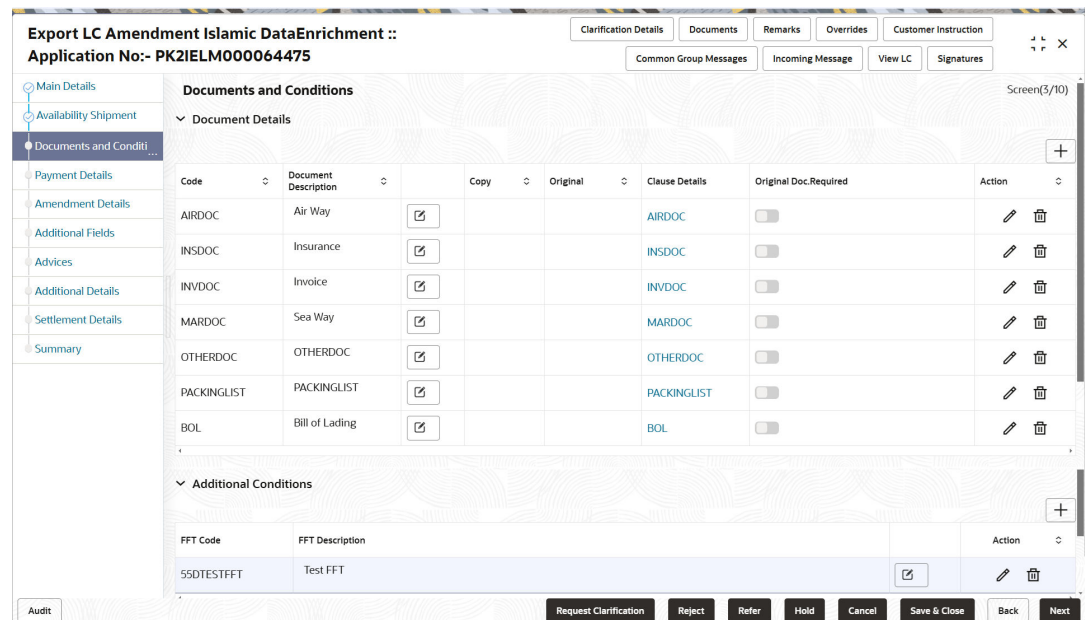

Documents Details section displays the list of documents required as per the issued LC and can be modified if required.

Online Channel - System will default the details received in the Description column. Based on the details populated, user can pick corresponding values for document code, originals and copy.

Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both Bill Of lading" and 'Airway Bill' are chosen. Based on the 'Product' selected, Application will default the documents required under the LC. User can edit the details, delete an existing document and also add additional documents to the defaulted list.

1. On **Document and Conditions** screen, specify the fields.

Figure 2-23 Data Enrichment - Document and Conditions

For more information on fields, refer to the field description table below.

Table 2-23 Document and Conditions - Field Description

Field	Description
Code	System defaults the document code. Click Search to search and select the document code based on the document received. User can add or delete the code by deleting the line on the grid. Click the plus icon to add multiple document details.
Document Description	System displays the document description based on the document code. User can edit the description.
Copy	Specify the number copies received.
Original	Specify the number of original documents received.

Table 2-23 (Cont.) Document and Conditions - Field Description

Field	Description
Clause Details	System will populate the document Clause based on the document code. User can view the document clause by clicking the link in the 'Clause Description' column.
Original Doc. Received	Enable the option, if document is received. Disable the option, if document is not received.
Action	Click Edit icon to edit the document details. Click Delete icon to delete the document details.

Additional Conditions

Additional Conditions section displays the conditions of the issued LC and can be amended if required.

Online Channel - System will default the details received in the description column. System will parse the additional conditions required field into multiple line items based on line delimiter (+) and shall populate each line item as a separate description. User can read the description and make any changes required to the description, also must be able to add more conditions.

Non Online Channel - User can use FFT to capture additional conditions and can edit the description populated from FFT. You should also be able to add additional FFT.

For more information on fields, refer to the field description table below.

 **Note:**

The fields which are marked as **Required** are mandatory.

Table 2-24 Additional Conditions - Field Description

Field	Description
FFT Code	Click Search to search and select the FFT code from the look up. Click plus icon to add multiple Additional Conditions .
FFT Description	This field displays the description of the FFT code as per the latest LC.
Action	Click Edit icon to edit the additional condition details. Click Delete icon to delete the additional condition details.

2. Click **Next**.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

Table 2-25 Document and Conditions - Action Buttons - Field Description

Field	Description
Documents	Upload the required documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Specify any additional information regarding the Export LC Amendment - Islamic. This information can be viewed by other users handling the request.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following. <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.

Tiles Displayed in Summary

- Main Details - User can view and modify the application details and LC details, if required.
- Availability Shipment - User can view and modify availability and shipment details, if required.
- Documents and Conditions - User can view and modify the documents details grid and the additional conditions grid, if required.
- Payment Details - User can view and modify all details related to payments, if required.
- Amendment Details - User can view the amendment details of the issued LC.
- Additional Fields - User can view the details of additional fields of the issued LC.
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Commission, Charges and taxes - User can view and modify Commission, charges and taxes details, if required.
- Revolving Details - User can view and modify revolving details on revolving LC, if applicable.
- Preview Messages - User can view and modify preview details, if required.
- Parties Details - User can view and modify party details like beneficiary, advising bank etc., if required.
- Compliance Details - User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details - User can view the accounting entries generated by back office system.

 **Note:**

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries."

- Assignment of Proceeds - User can view the details of assignment of proceeds.
- FX Linkage - User can view the FX linkage details.
- Settlement Details - User can view the settlement details.

2. Click **Submit**.

The task will move to next logical stage.

For more information on action buttons, refer [Table 2-21](#) of **Scrutiny** stage.

2.5 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export LC Amendment request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the “Amount Block Reference Number “to the back office. On successful handoff, back office will make use of these “Amount Block Reference Number” to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off
- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.
