Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Export LC Transfer Cancellation** process.

Audience

This user guide is intended for the central administrator of the Bank who controls the system and application parameters and ensures smooth functionality and flexibility of the banking application.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches](#), [Security Alerts and Bulletins](#) [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

Formore information on any related features, you can refer to the following documents:

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2

Export LC Transfer Cancellation

This User Manual is documented to get familiar with the Export LC Transfer Cancellation process of Oracle Banking Trade Finance Process Management.

Export LC Transfer Cancellation process enables the user to cancel the active Transfer LC that has already been advised:

An active Transfer LC Cancellation request received from First beneficiary can be cancelled in case of below scenarios:

- If further drawings are not expected/required under a Transfer LC.
- Request has been received for Parent Export LC cancellation; hence any issued Transfer LC has to be cancelled as well prior to cancellation of the parent Export LC.

In the following sections, let's look at the details for Export LC Transfer Cancellation process.

This topic contains following subtopics:

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the Export LC Transfer Cancellation request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of Export LC Transfer Cancellation request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Export LC transfer Cancellation request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.
- [Reject Approval](#)
This topic helps you quickly get acquainted with the Reject Approval process.

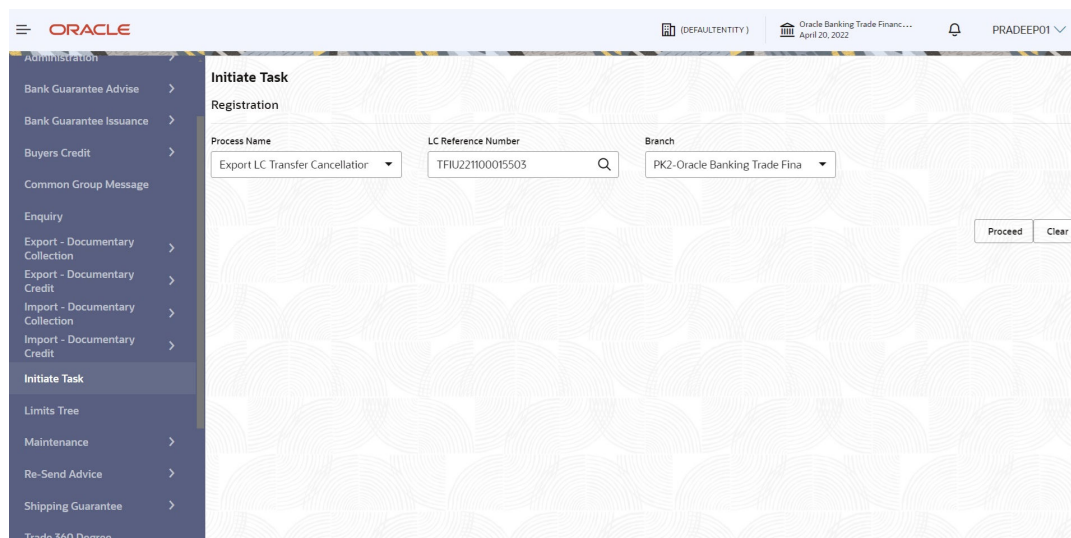

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the Export LC Transfer Cancellation request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.
The **Initiate Task** screen appears.

Figure 2-1 Initiate Task

2. On **Initiate Task** screen, specify the fields.

 **Note:**
The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
LC Reference Number	Click Search to search and select the required LC reference number.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 2-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage..
Clear	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

2.2 Registration

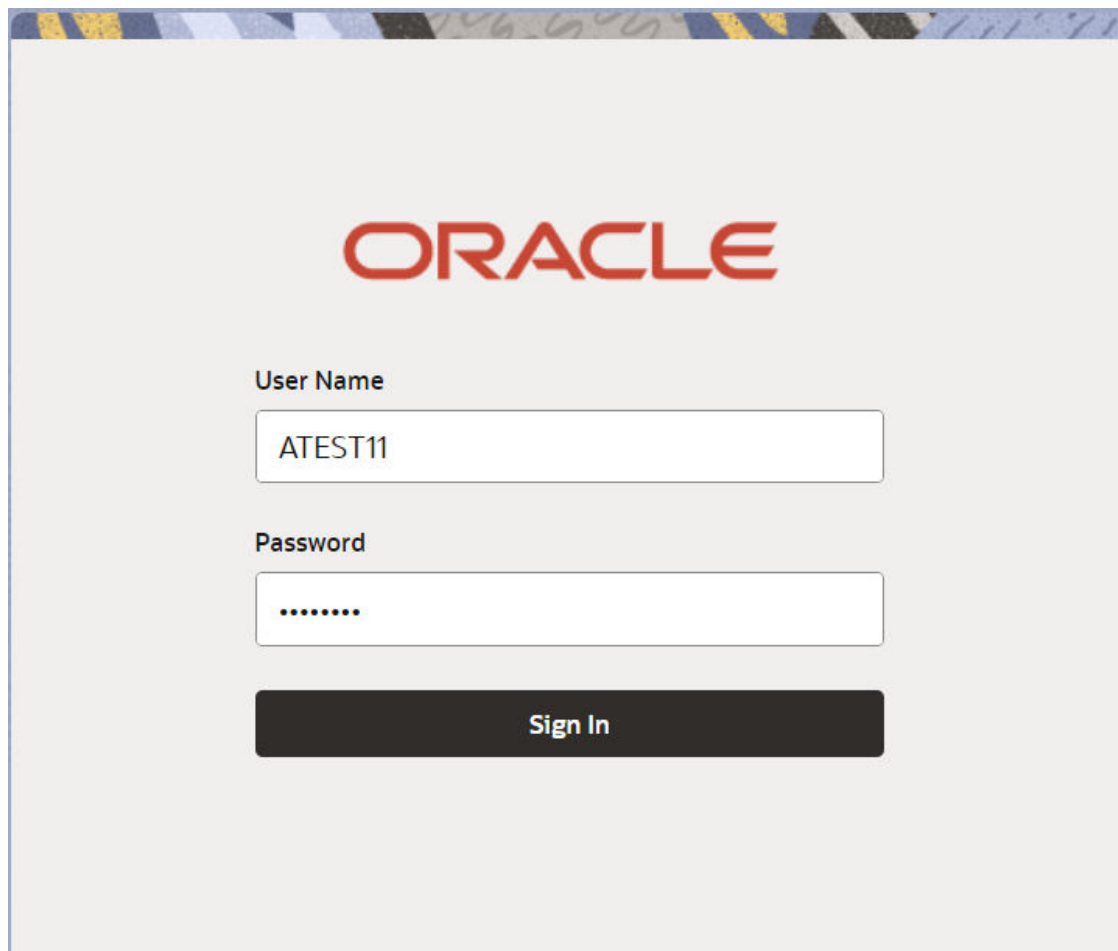

This topic provides the systematic instructions to initiate the Registration stage of Export LC Transfer Cancellation request.

The user can register a request for a Transfer LC cancellation received at the front desk (as an application received physically/received by mail/fax).

During registration stage, user can capture the basic details of the application, check the signature of the First Beneficiary and upload related documents. On submit of the request, the customer should be notified with acknowledgment and the request should be available for an LC expert to handle in the next stage.

Specify **User ID** and **Password**, and login to **Home** screen.

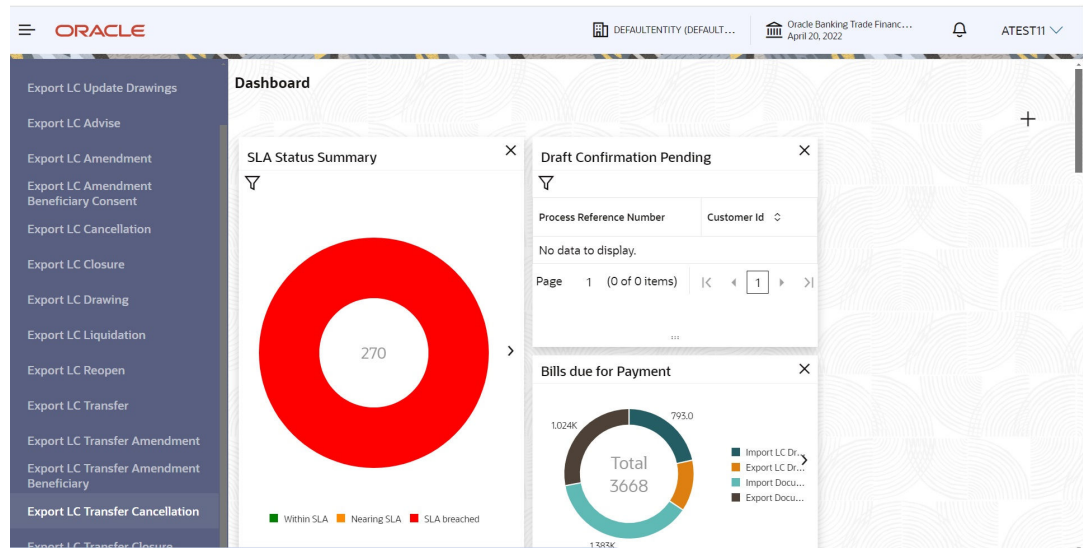

Figure 2-2 LogIn Screen

The screenshot shows the Oracle login interface. At the top, the Oracle logo is displayed in red. Below the logo, the text 'User Name' is followed by a text input field containing 'ATEST11'. Underneath, the text 'Password' is followed by a password input field with seven dots. At the bottom of the form is a black button with the text 'Sign In' in white.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Export Documentary Credit**.
2. Under **Export Documentary Credit**, click **Export LC Transfer Cancellation**.

Figure 2-3 Export LC Transfer Cancellation

Let's look at the details for Data Enrichment stage. User can enter/update the fields in Data Enrichment stage. Some of the fields that are already having value from Registration/online channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
This topic provides the systematic instructions to initiate the main details of Scrutiny stage of Export LC Transfer Cancellation request.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details of Export LC Transfer Cancellation process.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details in Data Enrichment stage of Export LC Transfer Cancellation process.
- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of Export LC Transfer Cancellation request.

- [Summary](#)
This topic provides the systematic instructions to view the summary details in Data Enrichment stage of Export LC Transfer Cancellation request.

2.3.1 Main Details

This topic provides the systematic instructions to initiate the main details of Scrutiny stage of Export LC Transfer Cancellation request.

Main details section has three sub section as follows:

- Application Details
- Transfer LC Details.
- Sender To Receiver

Application Details

This section provides a quick snapshot of Application details. All fields displayed under Application details section, would be read only except for the Priority

1. On **Main Details** screen, specify the fields that were not entered at Registration stage.

Figure 2-7 Main Details

Table 2-7 Export LC Transfer Cancellation - Main Details - Application Details - Field Description

Field	Description
Transfer LC Reference Number	<p>Read only field.</p> <p>System displays the Transfer LC reference number as available from previous/Registration stage.</p> <p>Transfer LC Reference Number is the LC Number for the instrument to be cancelled.</p>
First Beneficiary	<p>Read only field.</p> <p>System displays the name of the first beneficiary as available from previous/Registration stage.</p>
Branch	<p>Read only field.</p> <p>Branch through with the LC is issued. This is usually the home branch of the customer. Displays as available from previous/Registration stage.</p>
Amendment No	<p>Read only field.</p> <p>System defaults the latest amendment number sequence for this Transfer Letter of Credit. The amendment sequence number is simulated from the backend system.</p> <p>Displays the value as available from previous/Registration stage</p>
Process Reference Number	<p>Read only field.</p> <p>Unique sequence number for the transaction.</p> <p>This is auto generated by the system based on process name and branch code.</p> <p>Displays the value as available from previous/Registration stage.</p>
Priority	<p>System populates the priority of the customer as Essential/Critical/Medium/High/Low based on priority maintenance.</p> <p>If priority is not maintained for the customer, system will populate 'Medium' as the default priority.</p> <p>User can change the priority populated.</p>

Table 2-7 (Cont.) Export LC Transfer Cancellation - Main Details - Application Details - Field Description

Field	Description
Submission Mode	<p>Read only field.</p> <p>System populates the submission mode of Export LC Transfer Cancellation request.</p> <ul style="list-style-type: none"> • Desk- Request received through Desk • Courier- Request received through Courier • Email - Request received through Email • Fax - Request received through Fax <p>By default the submission mode will have the value as 'Desk'</p> <p>User can change the defaulted Submission Mode.</p> <p>Displays the value as available from previous/Registration stage.</p>
Cancellation Date	<p>Read only field.</p> <p>By default, the application will display branch's current date.</p>
Issuing Bank Reference	<p>Read only field.</p> <p>Reference number of the Issuing bank will be auto-populated from the underlying Transfer LC.</p> <p>Displays the value as available from previous/Registration stage.</p>

Transfer LC Details

A DE user will be able to view the latest Transfer LC values defaulted in the respective fields. All fields displayed in **Transfer LC Details** section are read only fields except the **Beneficiary Consent** toggle

Figure 2-8 Transfer LC Details

The screenshot shows a web application interface for 'Transfer LC Details'. On the left, there is a navigation menu with options: 'Advices', 'Additional Details', 'Settlement Details', and 'Summary'. The main content area is divided into several sections:

- 40A - Form of Documentary Credit:** A dropdown menu set to 'IRREVOCABLE'.
- 31C - Date of Issue:** A date field showing 'April 20, 2022' with a calendar icon.
- 40E - Applicable Rules:** A dropdown menu set to 'UCP LATEST VERSION'.
- Date of Expiry:** A date field showing 'December 28, 2022' with a calendar icon.
- 31D - Place of Expiry:** A text field containing 'LONDON'.
- Second Beneficiary:** Two text fields containing '6497001' and 'CIF9941202' with a refresh icon.
- Available Amount:** A dropdown menu set to 'GBP' and a text field containing '£50.00'.
- Transfer Amount:** A dropdown menu set to 'GBP' and a text field containing '£50.00'.
- 39A - Percentage Credit Amount Tolerance:** A text field containing a slash '/'.
- 39C - Additional Amount Covered:** A large empty text area.
- Beneficiary Consent:** A toggle switch currently turned off.

For more information on fields, refer to the field description table below.

Table 2-8 Export LC Transfer Cancellation - Transfer LC Details - Field Description

Field	Description
LC Type	Read only field. Displays the value used for LC Type as per the latest LC details.
Product Code	Read only field. Displays the product code used during Issuance of Transfer LC.
Product Description	Read only field. Displays the description of the product as per the product code as in Transfer LC Issuance.
Advising Bank	Read only field. Displays the advising bank as per the latest LC details.
40A - Form of Documentary Credit	Read only field. Displays the form of documentary credit details value available in LC record.
Date of Issue	Read only field. This field displays the LC issuance date. Application will default the branch's current date in date of issue.
Applicable Rules	Read only field. Displays the applicable rule as per the latest LC details.
Date of Expiry	Read only field.. Displays the expiry date as per the latest LC details.
Place of Expiry	Read only field.. Displays the place of expiry as per the latest LC details.
Second Beneficiary	Read only field. Second beneficiary name, as per the latest Transfer LC details is displayed.
Available Amount	Read only field. Displays the available amount in the Transfer LC. Latest value is displayed from Back Office.
Transfer Amount	Read only field. Currency Code as per the latest LC details is displayed. Transfer LC Amount as per the latest LC details is displayed.
Percentage Credit Amount Tolerance	Read only field. Displays the percentage credit amount tolerance details as per the latest LC.
Additional Amount Covered	Read only field. Additional amount covered as per the latest LC details.

Table 2-8 (Cont.) Export LC Transfer Cancellation - Transfer LC Details - Field Description

Field	Description
Beneficiary Consent	<p>Enable the option, if beneficiary consent is required for cancellation. Disable the option, if beneficiary consent is not required.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin: 10px 0;"> <p> Note:</p> <p>If user wishes to turn OFF the beneficiary consent, an override message is populated as “Beneficiary Consent flag Turned OFF”.</p> </div> <p>Beneficiary Consent is enabled, if the cancellation is for full or part of the LC remaining value where further drawings are expected under the LC.</p> <p>User has to turn OFF Beneficiary Consent flag if all drawings under the LC have already been booked and the cancellation is triggered for the remaining unutilized amount.</p>

Sender To Receiver

This screen captures the Sender To Receiver details, if not entered in 'Registration' stage.

For more information on fields, refer to the field description table below.

Table 2-9 Sender To Receiver - Field Description

Field	Description
Sender to Receiver Information	<p>Click 'Search' icon to search and select a FFT to provide the additional information to receiver.</p> <p>User can enter the Sender to Receiver Information to be sent in outgoing MT707.</p> <p>Click the edit icon to edit the sender to receiver information.</p>

Audit

This button provides information about user initiated the transaction, initiated date, stage wise detail etc.

For more information on audit, refer to the field description table below.

Table 2-10 Audit - Field Description

Field	Description
Application No.	This field displays the application number of the process.
Branch Code	This field displays the branch code.
Initiated Date	This field displays the date on which process is initiated.
Initiated By	This field displays the user ID of the user who had initiated the process.
Process Name	This field displays the name of the process which is initiated.
S. No	This field displays the serial number of the audit record.
Stage Name	This field displays the current stage of the process.
Completed Time	This field displays the time on which the audit of the current stage is completed.
Completed By	This field displays the user ID of the user who had completed the audit.
Outcome	This field displays the outcome of the audit.

2. Click **Next**.

The task will move to next data segment.

Table 2-11 Main Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.

Table 2-11 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Documents	<p>Upload the required documents. Application displays mandatory documents to be uploaded for cancellation. Place holders are also available to upload additional documents submitted by the applicant.</p> <p>The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.</p>
Remarks	<p>Click the Remarks icon to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.</p>
Overrides	<p>Click to view the overrides accepted by the user.</p>
Customer Instruction	<p>Click to view/ input the following.</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Messages	<p>Clicking this button allows the user to see the message in case of STP of incoming MT 767.</p>
View LC	<p>Enables the user to view the latest LC of transfer LC values displayed in the respective fields.</p>
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required. For more information on fields, refer to the field description table below.

Table 2-15 Charge Details - Field Description

Field	Description
Commission Details	This section displays the commission details. By default, all the charges, commission and margin are collected from the counter-party.
Component	Displays the commission component.
Rate	Displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Mod. Rate	From the default value, if the rate is changed the value gets updated in this field.
Ccy	Displays the currency in which the commission have to be collected.
Amount	Displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.

Table 2-15 (Cont.) Charge Details - Field Description

Field	Description
Modified	From the default value, if the amount is changed, the value gets updated in the modified amount field.
Defer	Switch to  for charges/commissions has to be deferred and collected at any future step.
Waive	Switch to  to waive the charges/commissions. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Split	Switch to  for splitting the Commission. Switch to  if splitting of commission is not required.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settl. Account	The settlement account.
Amend	Displays if the field is amendable or not.
Charge Details	This section displays the charge details.
Component	Displays the charge component type.
Tag Currency	Displays the tag currency in which the charges have to be collected.
Tag Amount	Displays the tag amount that is maintained under the product code.
Currency	Displays the currency in which the charges have to be collected.
Amount	This field displays the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	Switch to  to make the details available for billing engine for further processing, if charges are handled by separate billing engine. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM. The user can not enable/disable the option, if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.
Defer	Switch to  to defer the charges and collect at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.

Table 2-15 (Cont.) Charge Details - Field Description

Field	Description
Waive	 <p>Switch to  to waive the charges. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if Defer toggle is enabled.</p>
Split	 <p>Switch to  for splitting the Commission.  <p>Switch to  , if splitting of commission is not required.</p> </p>
Charge Party	Displays the charge party. By default the charge party is 'Applicant'.
Settlement Account	Click Search icon to search and select the settlement account.
Tax Details	This section displays the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.
Component	Displays the tax component.
Type	Displays the type of tax component.
Value Date	Displays the value date of tax component.
Ccy	Displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
Amount	Displays the tax amount based on the percentage of commission maintained. The user can edit the tax amount, if applicable.
Billing	 <p>Switch to  to make the details available for billing engine for further processing, if taxes are handled by separate billing engine. This field is disabled, if 'Defer' toggle is enabled.</p>
Defer	 <p>Switch to  to defer the taxes and collect at any future step.  <p>Switch to  if you do not want to defer the taxes. On disabling the user has to click on 'Recalculate' charges button for re-simulation.</p> </p>
Settl. Account	System defaults the settlement account. The user can modify the settlement account.
Split Settlement	This section displays the Split Settlement. This section is displayed if the user clicks on the Recalculate button to fetch the Split Settlement details from Backoffice. The default parties in Split row should be fetched from OBTF.
Select	The option to select the split settlement record.
Component	Displays the split component type eligible for Split .
Currency	Displays the currency of split settlement.
Amount	Displays the amount of split settlement.

Split Settlement Details

This section displays the Split Settlement details. Split Settlement details section appears from Back office, when the user clicks on the Recalculate button.

Table 2-16 Preview Messages - Field Description

Field	Description
Preview SWIFT Message	This section displays the preview of SWIFT message details.
Language	Read only field. English is set as default language for the preview.
Message Type	Select the message type from the list. User can choose to see preview of different message like MT 799.
Message Status	Read only field. This field displays the message status of draft message of transfer LC details.
Repair Reason	Read only field. This field displays the message repair reason of draft message of transfer LC details.
Preview Message	This field displays a preview of the draft message.
Preview Mail Advice	This section displays the preview of mail advice details.
Language	Read only field. English is set as default language for the preview.
Advice Type	Select the advice type.
Message Status	Read only field. This field displays the message status of draft message of transfer LC details.
Repair Reason	Read only field. This field displays the message repair reason of draft message of transfer LC details.
Preview Message	This field displays a preview of the advice.

2. Click **Save and Close** to save the details and close the screen.
3. Click **Next**.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

Table 2-17 Additional Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	Upload the required documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Click Remarks to provide any additional information. This information can be viewed by other users processing the request. Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following. <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.
Incoming Messages	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View LC	Enables the user to view the latest LC of transfer LC values displayed in the respective fields.
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Table 2-17 (Cont.) Additional Details - Action Buttons - Field Description

Field	Description
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Back	On click of Back, task moves to previous logical step.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

2.3.5 Settlement Details

This topic provides the systematic instructions to capture the settlement details of Export LC Transfer Cancellation request.

The user can view/input the settlement details for Export LC Transfer Cancellation request.

2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export LC Transfer Cancellation request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the “Amount Block Reference Number “to the back office. On successful handoff, back office will make use of these “Amount Block Reference Number” to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block. Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off
- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

The screenshot shows the 'Amount Block Exception Approval' screen in the OBTFPM application. The application number is PK2ELCT000062009. The screen is titled 'Export LC Transfer Cancellation AmountBlock Exception Approval ::'. The main content area shows the 'Amount Block Exception' details for a 'Charge' transaction. The details table is as follows:

Type	Contract Currency	Block Amount	Account	Branch	Account Currency	Block Ref No	Block Status	Block Status Details
Charge	GBP	95	051002520257248	PK1	GBP		Failed	

At the bottom of the screen, there are buttons for 'Audit', 'Reject', 'Refer', 'Hold', 'Approve', and 'Next'. The screen also shows a navigation bar with 'Documents', 'Remarks', 'Overrides', and 'Customer Instruction' tabs, and a 'View LC' button.

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

1. Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions will be listed in your queue.
2. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

Summary

2.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

This stage allows the approver user to review and approve the Export LC Transfer Cancellation transaction.

The user can view the summary of details updated in multilevel approval stage of Transfer LC Cancellation request.

The Approval screen displays the summary tiles. These tiles displays a list all values as entered by the maker. User can drill down from summary tiles into respective data segments where they can verify the details of all fields under the data segment.

 **Note:**

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

1. Log in into OBTFPM application and on **Home** screen, click, **Task**.
2. Under **Task**, click **Free Task**.
3. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.
4. The acquired task will be available in **My Tasks** tab. Click **Edit** to approve the task.
The **Approval Re-Key** pop-up screen is displayed.

Refer Close Proceed

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

5. Open the task and re-key some of the critical field values from the request in the **Approval Re-Key** screen.

Some of the fields below will dynamically be available for re-key.:

- Transfer Currency
- Transfer Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

- Click **Proceed** to proceed for the approval.

The **Approval Summary** screen is displayed. The user can view the Summary tiles which displays list of important fields with values.

- Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

 **Note:**

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Approval Summary
