Index

Preface

- [Purpose](#)
- [Audience](#)

This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)

This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Guarantee SBLC Issuance Claim Settlement Islamic** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

- [Access to Oracle Support](#)

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface: Preface gives information on the intended audience, structure, and related documents for this User Manual.
- Chapters: The subsequent chapters provide an overview to the module.
- Screen Shot Disclaimer - The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; information used in the interface or documents are dummy, it does not exist in real world, and its only for reference purpose.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2

Guarantee SBLC Issuance Claim Settlement

This User Manual describes the various stages of Guarantee SBLC Issuance Claim Settlement Islamic process.

The claim requested for Guarantee/SBLC can be settled through the Settlement Process.

The various stages involved for Claim Settlement of Guarantee Issued are:

- Receive and verify documents (Non Online Channel) - Registration stage
- Input application details
- Upload of related mandatory and non-mandatory documents
- Verify documents and capture details (Online/Non Online Channels) - Data Enrichment stage
- Check balance availability for amount block
- Check for sanctions & KYC status
- Create amount block for charges
- Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Issuance Claim Settlement process flow is similar to that of conventional Guarantee issuance process flow.

This topic contains following subtopics:

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the new Guarantee Issuance Claim Settlement Islamic request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of Guarantee SBLC Issuance - Claim Settlement Islamic request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee SBLC Issuance - Claim Settlement Islamic request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.

Table 2-6 Main - Application Details - Field Description

Field	Description
Guarantee/SBLC Number	Read only field. System defaults the value from Registration stage.
Claim Serial Number	Read only field. System defaults the claim serial number from Guarantee/ SBLC claim.
Beneficiary ID/Name	Read only field. System defaults the customer ID/ Name from Guarantee/ SBLC claim.
Branch	Read only field. System defaults the branch name from Guarantee /SBLC issuance.
Process Reference Number	Read only field. Unique OBTFPM task reference number for the transaction. This is auto generated by the system based on process name and branch code.

Table 2-6 (Cont.) Main - Application Details - Field Description

Field	Description
Priority	Priority maintained will be populated as either 'Low or Medium or High or Essential or Critical'. If priority is not maintained for a customer, 'Medium' priority will be defaulted. User can change the priority.
Submission Mode	System defaults the submission mode of Lodge Claim Guarantee Issued request. By default the submission mode will have the value as 'Desk'. <ul style="list-style-type: none"> • Desk - Request received through Desk • Fax- Request received through Fax • Email- Request received through Email • Courier - Request received through Courier The user can change the submission mode.
Claim Settlement Date	Read only field. By default, the application will display branch's current date for the claim settlement date.
Beneficiary Reference Number	Specify the Beneficiary Reference Number.
Issuing Bank	Read only field. System defaults the Issuing Bank name from Guarantee/ SBLC claim.
Issuing Bank Reference Number	Read only field. System defaults the Issuing Bank Reference Number from Guarantee/ SBLC claim.
Version	Read only field. System defaults the version number.

Main - Guarantee Details

The fields listed under this section are same as the fields listed under the **Guarantee Details** section in Registration stage. For more information on the fields, refer to **Guarantee Details** of [Registration](#) stage. During registration, if user has not captured input, then user can capture the details in this section.

Figure 2-8 Main - Guarantee Details

For more information on fields, refer to the field description table below.

Table 2-7 Main - Guarantee Details - Field Description

Field	Description
Guarantee Type	Read only field. Guarantee type defaults from Guarantee/ Standby Issuance.
Date of Issue	Read only field. System defaults the date of issue from Guarantee /SBLC issuance.
Purpose of Message	Read only field. System defaults the purpose of message from Guarantee/ Standby Issuance.
Expiry Type	Read only field. System defaults the expiry type from Guarantee/ SBLC Issuance.
Date of Expiry	Read only field. Expiry date of the Guarantee Issuance. System defaults the expiry date from Guarantee/ SBLC Issuance.
Claim Date	Read only field. System defaults the claim date from Guarantee/ SBLC Issuance.
Claim Expiry Date	Read only field. System defaults the claim expiry date from Guarantee/ SBLC Issuance.
Outstanding Currency/ Amount	Read only field. System defaults outstanding currency and amount from Guarantee/ Standby Issuance.
Applicable Rules	Read only field. System defaults the value from Guarantee issuance details.
Applicant Bank	Read only field. This system defaults the applicant bank details available in Guarantee.

Table 2-7 (Cont.) Main - Guarantee Details - Field Description

Field	Description
Applicant	Read only field. System defaults the applicant from Guarantee/ SBLC Issuance.
Beneficiary	Read only field. System defaults the beneficiary as in Guarantee/ SBLC Issuance.
Advising Bank	Read only field. System defaults the advising bank if available.
Advising Through Bank	Read only field. System defaults the advising through bank if available in issuance.
Counter Guarantee Issuing Bank	Read only field. System defaults the counter guarantee issuing through bank, if available in issuance.
Local Guarantee Issuing Bank	Read only field. System defaults the local guarantee issuing bank, if available in issuance.
Accountee	Read only field. System defaults the accountee name, if available in Guarantee.
Claim Amount	Read only field. System defaults the claim amount from the Guarantee Claim.
Claim Payment Amount	System defaults the claim amount from the Guarantee Claim.
Unlinked FX rate	Read only field. If claim currency is different from local currency system displays the unlinked FX rate.

5. Click **Save and Close** to save the details and close the screen.

FX Linkage

This section enables the user to link the existing FX contract(s) to the Guarantee/SBLC Claim Settlement. FX Linkage call should be triggered on DE-submit.

The screenshot shows a table titled "FX Linkage" with a dropdown menu for "FX Linkage" and a "+" button to add more items. The table has the following columns: FX Reference Number, Bought Currency, SOLD Currency, Available Contract Amount, Rate, Linked Amount, Total Utilized Amount, FX Expiry Date, and Action. The data row shows: 000FNDF20076A9N9, (empty), (empty), £4,000.00, 1.35, £4,000.00, (empty), March 19, 2020, and edit/delete icons. Below the table is a pagination bar showing "Page 1 of 1 (1 of 1 items)" and an "Average FX Rate" input field with the value "0". "Save & Close" and "Cancel" buttons are at the bottom right.

FX Reference Number	Bought Currency	SOLD Currency	Available Contract Amount	Rate	Linked Amount	Total Utilized Amount	FX Expiry Date	Action
000FNDF20076A9N9			£4,000.00	1.35	£4,000.00		March 19, 2020	

Figure 2-12 FX Linkage Details

The screenshot shows the "FX Linkage" details form. It contains the following fields:

- FX Reference Number:** 000FNDF20076A9N9
- Currency:** USD
- Contract Amount:** USD, \$4,000.00
- Available FX Contract Amount:** USD, \$4,000.00
- Linkage Amount:** USD, \$4,000.00
- Rate:** 1.35
- FX Amount in Local Currency:** £2,962.96
- FX Expiry Date:** March 19, 2020
- FX Delivery Period From:** (empty)
- FX Delivery Period To:** (empty)

 "Save & Close" and "Close" buttons are at the bottom right.

For more information on fields, refer to the field description table below.

Table 2-16 FX Linkage - Field Description

Field	Description
	The user can click + to add multiple FX Details .

Table 2-16 (Cont.) FX Linkage - Field Description

Field	Description
FX Reference Number	Click Search to search and select the FX contract reference number. On select and save and close, system defaults the available amount, bot currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows, <ul style="list-style-type: none"> Counterparty of the FX contract should be the counterparty of the Bill contract. Active Forward FX transactions authorized not marked for auto liquidation. Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.
Bought Currency	This field displays the currency from the linked FX contract.
Sold Currency	This field displays the currency from the linked FX contract.
Available Contract Amount	Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.
Rate	This field displays the rate at which the contract is booked.
Linked Amount	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
Current Utilized amount	This field displays the liquidated /purchased /discounted /negotiated amount of BC contract. It cannot go beyond the linked FX amount.
Total Utilized Amount	This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version.
Amount in Contract Currency	This field displays the amount in contract currency converted from FX currency.
FX Expiry Date	This field displays the expiry date from the linked FX contract.
FX Delivery Period - From	This field displays the date from which the contract is valid for utilization.
FX Delivery Period - To	This field displays the date to which the contract is valid for utilization.
Action	Click Edit icon to edit the FX details. Click Delete icon to delete the FX details.
Average FX Rate	Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.

- Click **Save and Close** to save the details and close the screen.
- Click **Next**.

The task will move to next data segment.

Table 2-23 (Cont.) Summary - Action Buttons - Field Description

Field	Description
Back	Clicking on Back button, takes the user to the previous screen.
Submit	Task will get moved to next logical stage of Guarantee /Standby Claim settlement Islamic. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided. In case of duplicate documents' system will terminate the process after handing off the details to back office.

2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Guarantee /Standby Claim settlement request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval

User can review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Open the task to view the summary tiles. The tiles should display a list of important fields with values.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off
- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.

- Different collateral to be mapped or utilize lines in place of collateral.
- **Reject:** Reject the transaction due to non-availability of sufficient balance in settlement account Amount Bock Exception This section will display the amount block exception details.

All fields displayed under Application details section, would be read only.

2.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

This stage allows the approver user to approve a Claim settlement under Guarantee Issued Islamic transaction. The user can view the Summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

1. Log in into OBTFPM application and on **Home** screen, click, **Task**.
2. Under **Task**, click **Free Task**.
3. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.
4. The acquired task will be available in **My Tasks** tab. Click **Edit** to approve the task.
The **Approval Re-Key** pop-up screen appears.

Refer Close Proceed

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message and user will not be able to approve the task.

5. Open the task and re-key some of the critical field values from the request in the **Approval Re-Key** screen.

Some of the fields below will dynamically be available for re-key.:

- Applicant Name

- Beneficiary Name
- Undertaking Currency
- Undertaking Amount
- Expiry Date

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

6. Click **Proceed** to proceed for the approval.

The **Approval Summary** screen appears. The user can view the Summary tiles which displays list of important fields with values.

7. Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.
