Index

Preface

- [Purpose](#)
- [Audience](#)

This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)

This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Guarantee Issuance** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Abbreviation	Description
OBTFFPM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 2 Common Action Buttons and its Definitions

Action Buttons	Description
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>

Table 2 (Cont.) Common Action Buttons and its Definitions

Action Buttons	Description
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Click Cancel to cancel the transaction input midway without saving any data.
Save & Close	Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	Click Next , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

Symbols and Icons

1

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2

Guarantee Issuance

As part of Guarantee Issuance the applicant (importer or customer) approaches a bank and requests the bank to issue a Letter of Credit on their behalf to the beneficiary (exporter).

The various stages involved for issuance of an Guarantee are:

- Receive and verify application and other documents (Non Online Channel) - Registration stage
- Input application details
- Upload of related mandatory and non mandatory documents
- Verify documents and capture details (Online/Non Online Channels)- Scrutiny stage
- Check balance availability for amount block
- Input/Modify details of the guarantee - Data enrichment stage
- Conduct legal checks
- Check for limit availability
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks during any stage of transaction for other users to check and act
- Draft guarantee copy for legal verification
- Generate acknowledgement and draft guarantee copy to customer
- Notify customer on any negative statuses during any of the stages to the applicant
- Hand off approved transaction to back office

In the subsequent sections, let's look at the details for Guarantee Issuance process:

This topic contains following subtopics:

- [Common Initiation Stage](#)
- [Registration](#)
- [OBTFPM- OBDX Bidirectional flow](#)
- [Bi-Directional Flow for Offline Transactions Initiated from OBTFPM](#)
- [Scrutiny](#)
- [Data Enrichment](#)
- [Multi Level Approval](#)
- [Exceptions](#)
- [Customer - Acknowledgement](#)
- [Customer - Reject Advice](#)
- [#unique_36](#)

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the new **Guarantee Issuance** request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of Guarantee Issuance request.
- [OBTFPM- OBDX Bidirectional flow](#)
This topic provides the systematic instructions to initiate the OBTFPM- OBDX Bidirectional flow.
- [Bi-Directional Flow for Offline Transactions Initiated from OBTFPM](#)
This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.
- [Document Linkage](#)
This topic provides the systematic instructions to initiate the document linkage.
- [Scrutiny](#)
This topic provides the systematic instructions to initiate the Scrutiny stage of Guarantee issuance request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee issuance request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.
- [Customer - Acknowledgement](#)
This topic helps you quickly get acquainted with the Customer Acknowledgement process.
- [Customer - Reject Advice](#)
This topic helps you quickly get acquainted with the Customer - Reject Advice.

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new **Guarantee Issuance** request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.
The **Initiate Task** screen appears.

Figure 2-1 Initiate Task

2. On **Initiate Task** screen, specify the fields.

 **Note:**

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
Customer ID	Click Search to search and select the required customer ID of the applicant or applicant's bank.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 2-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of Guarantee Issuance request.

The user initiates the transaction from Registration Stage, if the Guarantee Issuance request is given through branch either by fax, email or physical application form, the Guarantee Issuance process starts from the registration stage.

During registration stage, user can capture the basic details of the application, check the signature of the authorised signatories and upload the related documents of the applicant. It also enables the user to capture some additional product related details as an option. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for a Guarantee Issuance expert to handle the request in the next stage.

Guarantee received from Applicant Bank has following three scenarios:

1. Guarantee/SBLC received through SWIFT MT 760 in favour of a beneficiary through an Advising Bank and Advise Through Bank.
2. Counter Guarantee/SBLC received through MT 760 in favour of a bank to issue Local guarantee/SBLC which in turn can advise the Local Guarantee/SBLC to the Beneficiary through an Advising Bank.
3. Counter – Counter Guarantee/SBLC received through SWIFT MT 760, in favour a bank to issue Counter Guarantee/SBLC in favor another bank which in turn has to issue a Local Guarantee/SBLC in favour of the beneficiary.

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 2-2 Login Screen

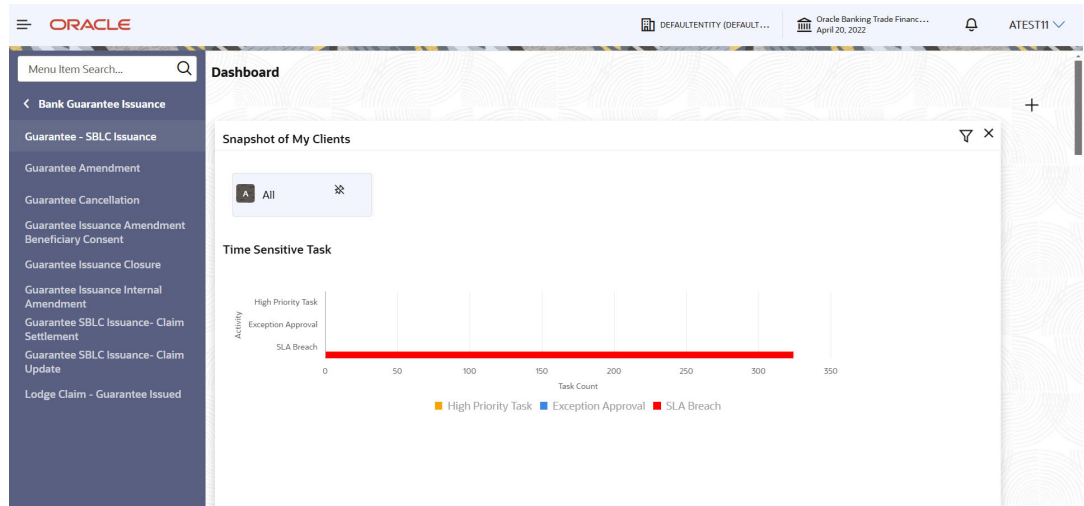

The screenshot shows the Oracle login interface. At the top, the Oracle logo is displayed in red. Below the logo, the text 'User Name' is followed by a text input field containing 'ATEST11'. Underneath, the text 'Password' is followed by a password input field with masked characters '.....'. At the bottom of the form, there is a dark grey button with the text 'Sign In' in white.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Bank Guarantee Issuance**.

- Under **Bank Guarantee Issuance**, click **Guarantee - SBLC Issuance**.

Figure 2-3 Guarantee - SBLC Issuance

The **Guarantee - SBLC - Registration** screen appears. The Guarantee Issuance - Registration stage has two sections Application Details and Guarantee Details. Let's look at the details of Registration screens below:

Figure 2-4 Guarantee - SBLC Issuance - Registration - Application Details

3. On **Guarantee - SBLC Issuance - Registration - Application Details** screen, specify the fields.

 **Note:**

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below. In case of MT798, Application Details are defaulted to SWIFT.

Table 2-3 Guarantees - SBLC Issuance - Registration - Application Details - Field Description

Field	Description
Received from Applicant Bank	Guarantee Issuance request can be received either from the applicant or the applicant's bank. Enable the option, if Guarantee Issuance request is received from applicant's bank. Disable the option, if Guarantee Issuance request is received from applicant.
Received From - Customer ID	Specify the Customer ID of the applicant or applicant's bank. Alternatively, click Search to search and select the Customer ID.

Expiry Type	<p>Select the expiry type for guarantee issuance. This field indicates whether undertaking has specified expiry date or is open-ended.</p> <p>The options are:</p> <ul style="list-style-type: none"> • COND - With Expiry • CONU - Without Expiry • FIXD - Specified expiry date (with/without automatic expansion) • OPEN - No specific date of expiry <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Effective Date	<p>The effective date is defaulted from guarantee issuance. The user can change the date.</p>
Tenor	<p>Specify the value for tenor and select the value from the drop-down. The drop down is enabled, if Expiry Type is COND and FIXD.</p>
Date of Expiry	<p>Select the expiry date of the LC. The expiry date can be equal or greater than the issue date.</p> <p>If the Expiry Date is earlier than the issue date, system will provide an error and if the 'Expiry Date is equal to the Issue Date', system will provide a alert message.</p> <p>The field is enabled, if Expiry Type is COND and FIXD.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Expiry Condition/Event	<p>Specify the expiry condition/event. This field specifies the documentary condition/event that indicates when the local undertaking will cease to be available.</p> <p>The field is enabled, if Expiry Type is COND and CONU.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Applicant Bank	<p>This field displays the applicant bank details , if Received From Applicant Bank option is enabled.</p> <p>If request is not received from applicant bank, this field must be blank.</p>

Table 2-4 (Cont.) Guarantee Issuance - Registration - SBLC/Guarantee Details - Field Description

Field	Description
Applicant	<p>This field displays the applicant details based on the details provided in Application Details section.</p> <p>Specify the applicant or alternatively, click Search to search and select the applicant from the look-up, if Received From Applicant Bank option is enabled.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Beneficiary	<p>Specify the beneficiary or click Search to search and select the beneficiary in whose favor the undertaking (or counter-undertaking) is issued.</p> <p>If beneficiary is not a customer of the bank, then choose WALKIN customer id and provide the beneficiary details. If beneficiary is a customer and KYC status is not valid, then system will display alert message.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), Customer ID to be resolved from incoming message. If required use Walk-in ID. Bene ID/ name should be made amendable by the user.</p>
Advising Bank	<p>Specify the advising bank name or click Search to search and select the advising bank based on Party ID/Party Name.</p> <p>User can also input the party ID and on tab out system will validate and populate the 'Advising Bank' name.</p> <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin: 10px 0;"> <p> Note:</p> <p>In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message "RMA arrangement not available, please change the bank or use MAIL Medium".</p> </div> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>

Table 2-4 (Cont.) Guarantee Issuance - Registration - SBLC/Guarantee Details - Field Description

Field	Description
Counter SBLC/Guarantee Issuing Bank	<p>Specify the Counter Guarantee Issuance bank name or click Search to search and select the Counter Guarantee Issuance Bank bank..</p> <p>This field is enabled, if Purpose of Message is ICCO.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message "RMA arrangement not available."</p> </div> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p>
Local SBLC/Guarantee Issuing Bank	<p>Specify the Local SBLC/Guarantee Issuance bank name or click Search to search and select the Local SBLC/Guarantee Issuance Bank bank.</p> <p>This field is enabled, if Purpose of Message is ICCO or ISCO.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>If Local Issuing Bank has value and Counter Issuing Bank has no value, and in case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".</p> </div> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p>
Supplementary Information About Amount	<p>Specify the additional amounts related to undertaking.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), Customer ID to be resolved from incoming message. If required use Walk-in ID. Bene ID/ name should be made amendable by the user.</p>
Accountee	Specify the accountee or click Search to search and select the accountee.
Amount In Local Currency	<p>Read only field.</p> <p>After the tab out of 'Currency Code, Amount' field, system fetches the local currency equivalent value for the transaction amount from back office (with decimal places).</p>
Obligor/ Instructor Party	Specify the Local SBLC/Guarantee Issuance bank name or click Search to search and select the name of the obligor from the lookup.

Table 2-4 (Cont.) Guarantee Issuance - Registration - SBLC/Guarantee Details - Field Description

Field	Description
Obligor Collateral Percentage	Specify the value for obligor collateral percentage. This field is mandatory if the field Obligor/ Instructor Party has value.
Auto Close	Enable the option, if Auto close is required for that transactions. Disable the option, if Auto close is not required for that transactions.
Closure Date	This field displays the "Closure Date" defaulted by the system, with the value "Expiry Date" + No of Closure days maintained in the respective Product in which the contract has been created. System automatically close the contract on the specified "Closure Date" if "Auto Close" is selected as "Yes" for the specific contract. User can modify the system defaulted "Closure Date" and system should validate the same for the below conditions, <ul style="list-style-type: none"> • Closure Date must be after the Issue Date. • Closure Date must be after the Expiry Date. • Closure Date cannot be blank, when the "Auto Close" is checked.
Revenue Sharing Percentage	Read only field. System populates the values from the "Trade Finance Customer Maintenance" if the below conditions are met. <ul style="list-style-type: none"> • Purpose of Message is "ISCO" or "ICCO" • CIB or LIB is captured in the Guarantee Contract. • If CIB and LIB is available in the Guarantee Contract, then system should populate the "Revenue sharing Percentage" maintained against party CIB. • If LIB is only available without CIB in the Guarantee Contract, then system should populate the "Revenue sharing Percentage" maintained against party LIB. • Percentage should be populated after tab out from LIB field.
Limits verification Required	Enable the option to enable limit check during the process flow of this request. Disable the option to disable limit check during the process flow of this request.
Language Code	Specify the language code or click Search to search and select the language code from the look-up.

5. Click **Submit**.

The task will move to next logical stage of Guarantee Issuance. For more information refer [Scrutiny](#).

For more information on action buttons, refer to the field description table below.

Table 2-5 Guarantee Issuance - Registration - Action Buttons - Field Description

Field	Description
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.

Table 2-5 (Cont.) Guarantee Issuance - Registration - Action Buttons - Field Description

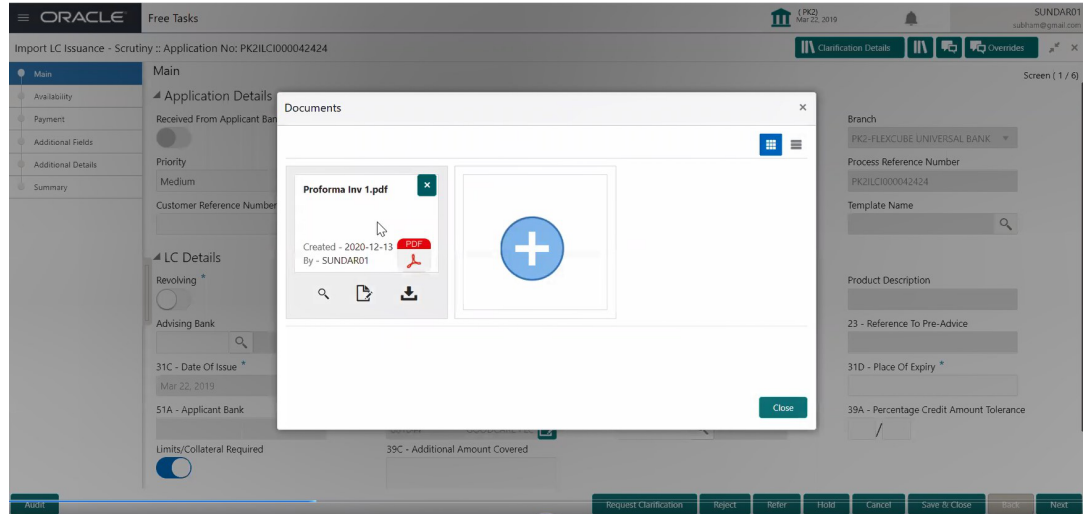

Field	Description
Documents	Upload the documents received. Application displays mandatory documents to be uploaded for Guarantee Issuance. Place holders are also available to upload additional documents submitted by the applicant
Remarks	Specify any additional information regarding the Guarantee Issuance. This information can be viewed by other users processing the request.
Customer Instruction	Click to view/ input the following: <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Guarantee issuance task. Details entered will not be saved and the task will be removed.
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.
Submit	Click Submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. The task will move to next logical stage of Guarantee Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.

2.3 OBTFPM- OBDX Bidirectional flow

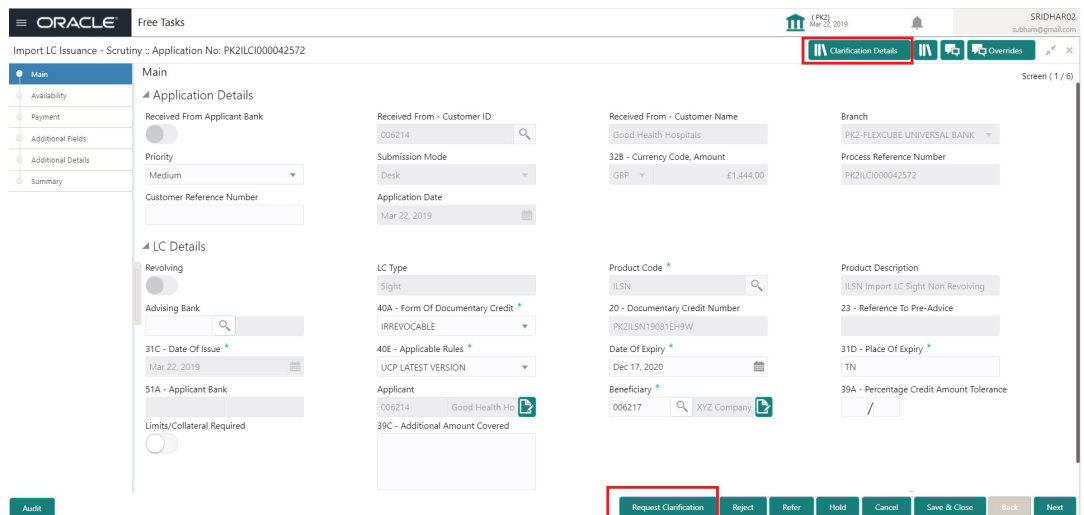

This topic provides the systematic instructions to initiate the OBTFPM- OBDX Bidirectional flow.

As a part of Digital Experience, customers can initiate Trade Finance Transactions from online channels and the respective task will be available in OBTFPM for further handling. Oracle Banking Trade Finance Process Management (OBTFPM) user, for task received from online channel, raise clarification and receive response from the customer.

1. Customer initiates the Trade Finance transaction in Online channel (OBDX) and upload the necessary documents.

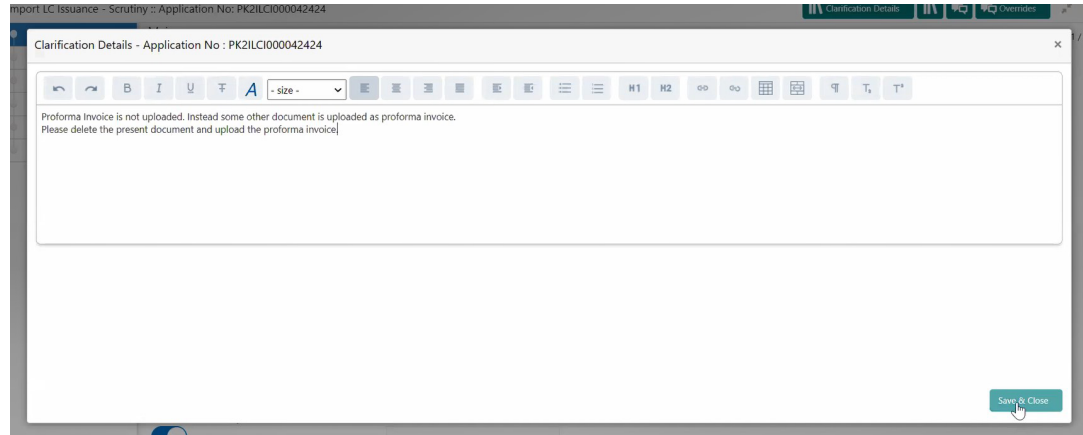

2. The task created will land in the Scrutiny stage of OBTFPM for handling by Trade expert for reviewing and identifying mismatch/incomplete data.
3. In the Scrutiny, Data Enrichment or Approval the bank user may require clarification from customer, OBTFPM user clicks **Request Clarification** button to request for online clarification from customer.

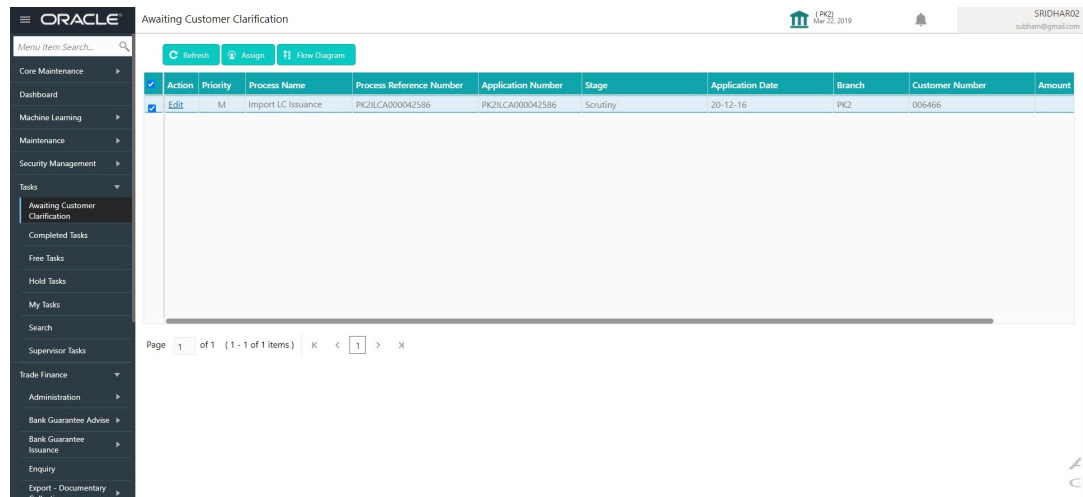

4. On **The Import LC Issuance - Registration - Application Details** screen, specify the fields.
5. The **Request Clarification** detailed screen appears, user enters the information and clicks **Save**, the information should be sent to customer.

- OBTFPM user should be able to see the details in the View Clarification window and the status will be Clarification Requested. The user can click Re clarification if required.

- The task goes to **Awaiting Customer Clarification** state until the response received from the customer.

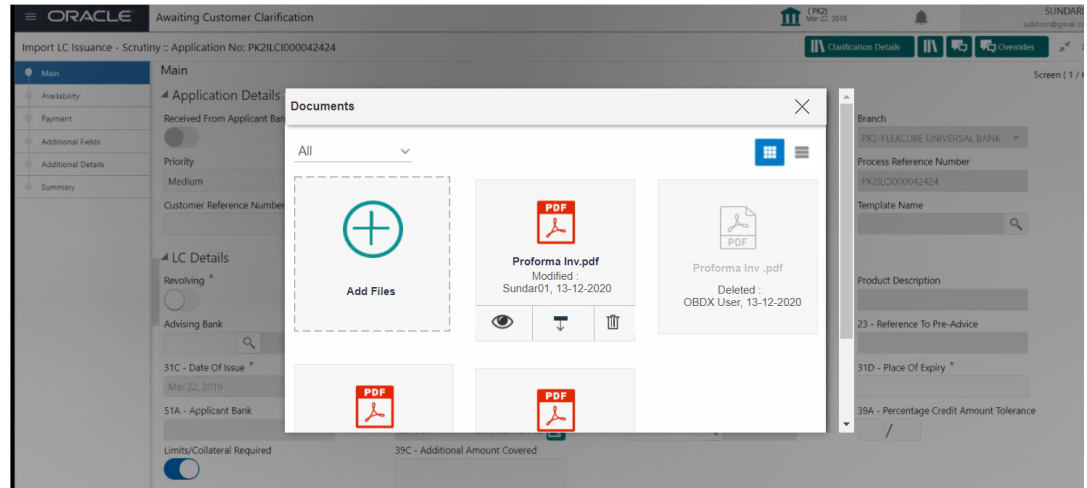

- Click **Edit**.
- The user can click **Accept Clarification** button, if the query raised has been answered by the customer.

The status should change to **Clarification Accepted** on next the task moves to the next logical stage.

- Bank user checks the Clarification and opens the **Documents** Tab. System displays both the new document uploaded and the metadata for deleted document and the deleted document is displayed in a blurred way. User can open the new document, the deleted document cannot be opened. System should also increment the version number of the

documents.

2.4 Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

Pre- Conditions:

- Customer Maintenance details are replicated from OBTF to OBTFPM.
 - Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
 2. In OBTFPM, user clicks **Request Clarification**, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online". In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder.
 3. In case submission mode is not "Online", the system will validate if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

2.5 Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

The user can link an existing uploaded document in any of the process stages. In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored

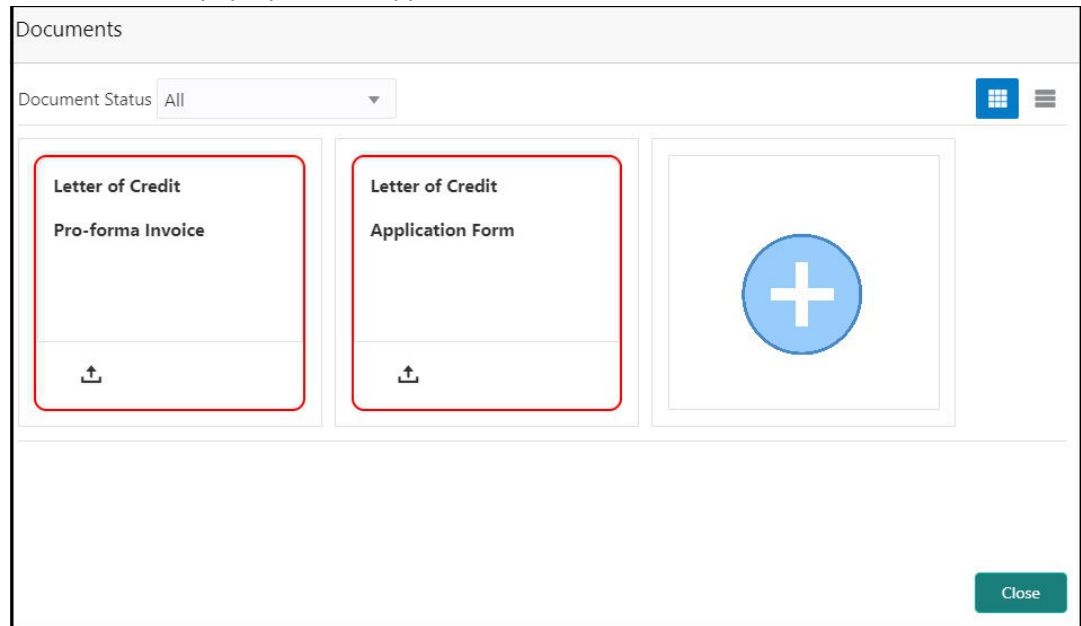

in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

Specify **User ID** and **Password**, and navigate to **Registration** screen.

1. On the header of **Registration** screen, click, **Documents**.

The **Document** pop-up screen appears.

2. Click the , click **Add Additional Documents** button/ link.

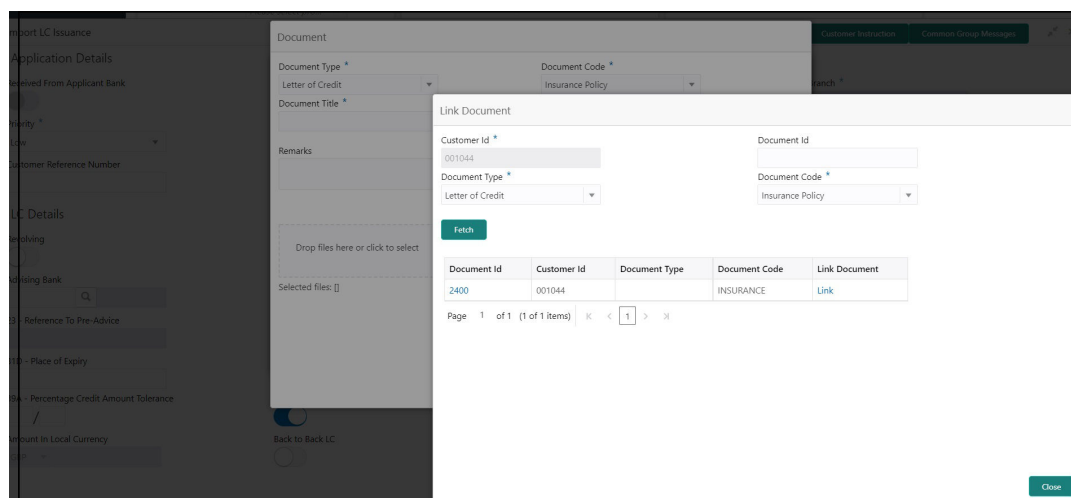

The **Document** screen appears.

Field	Description
Document Type	Select the document type from list. Indicates the document type from metadata.
Document Code	Select the document Code from list. Indicates the document Code from metadata.
Document Title	Specify the document title.
Document Description	Specify the document description.
Remarks	Specify the remarks.
Document Expiry Date	Select the document expiry date.
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.

3. Select the document to be uploaded or linked and click the **Link Document** link.

The link **Document** pop up appears.

The value selected in **Document Type** and **Document Code** of **Document** screen are defaulted in the **Link Document Search** screen.

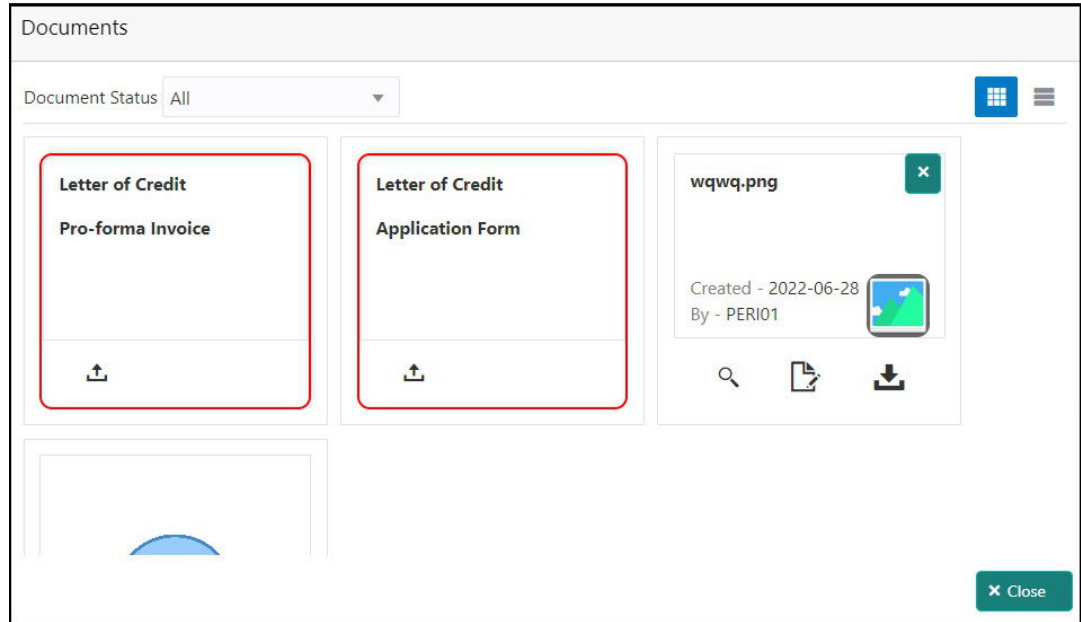

4. Click **Fetch** to retrieve the details from DMS.

System displays all the documents available for the given **Document Type** and **Document Code** for the customer.

Field	Description
Customer ID	This field displays the transaction Customer ID.
Document ID	Specify the document ID.
Document Type	Select the document type from list.
Document Code	Select the document Code from list.
Search Result	
Document ID	This field displays the document ID from metadata.
Customer ID	This field displays the transaction customer ID.
Document Type	This field displays the document type from metadata.
Document Code	This field displays the document code from metadata.
Link Document	The link to link the existing uploaded documents from DMS to the workflow task.

- Click **Link** to link the particular document required for the current transaction.

Post linking the document, the user can View, Edit and Download the document.

- Click **Edit** icon to edit the documents.

The **Edit Document** screen is displayed.

The 'Edit Document' form contains the following fields:

- Document Id:** 2400
- Document Title:** wqwq
- Application Reference Number:** PK2ILCI000019041
- Entity Reference Number:** PK2ILCI000019041
- Document Type Id:** TFPM_DOCTYPE001
- Document Description:** (empty text area)
- Remarks:** (empty text area)
- Document Expiry Date:** Jun 29, 2022

At the bottom, there is a file upload area with the text 'Drop files here or click to select' and 'Current selected files: []'. 'Update' and 'Cancel' buttons are located in the bottom right corner.

2.6 Scrutiny

This topic provides the systematic instructions to initiate the Scrutiny stage of Guarantee issuance request.

On successful completion of Registration of an Guarantee Issuance, the task moves to Scrutiny stage. At this stage the gathered information during Registration are scrutinized. In case of MT798 message, if the User encounters validation error during handling the task, user can put the task on 'Hold' and resume after getting the correct details from the customer (by manually sending a message through common group messages). The user if required can update the editable fields. The fields that have been changed/updated have to be highlighted by the system and the user can check the incoming message place holder for the original value.

Guarantee Issuance request initiated by Customer having SWIFT for corporates (MT798-MT784/MT760/MT761) will be STP and task will be available in Scrutiny stage for further handling by the Bank User.

The Incoming MT798 message contains three sections.

- MT798 Index Message which contains the Sub message type 784
- MT798 Details Message which contains the Sub Message type 760 (MT700 tags with values)
- MT798 Extension Message which contains the Sub Message type 761 (MT761 Extension message tag values) if applicable.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E (of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

Do the following steps to acquire a task currently at Scrutiny stage:

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Task**.
2. Under **Task**, click **Free Task**.

The Scrutiny stage has the following hops for data capture:

- [Main Details](#)
- [Guarantee Preferences](#)
- [Local Guarantee](#)

- [Additional Details](#)
- [Summary](#)

Let's look at the details for Scrutiny stage. User can enter/update the following fields. Some of the application details that are already having value from Registration channels may not be editable.

- [Main Details](#)
This topic provides the systematic instructions to initiate the main details of Scrutiny stage of Guarantee Issuance request.
- [Guarantee Preferences](#)
This topic provides the systematic instructions to capture the Guarantee preference details in Scrutiny stage.
- [Local Guarantee](#)
This topic provides the systematic instructions to capture the local guarantee details of Scrutiny stage.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details
- [Summary](#)
This topic provides the systematic instructions to view the summary of Guarantee Issuance request.

2.6.1 Main Details

This topic provides the systematic instructions to initiate the main details of Scrutiny stage of Guarantee Issuance request.

Main details section has two sub section as follows:

- Application Details
- Guarantee Details.

Application Details

1. On **Scrutiny - Main Details** screen, specify the fields that were not entered at Registration stage.

Figure 2-7 Scrutiny - Main Details

Note:
The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below. In case of MT798, Application Details are defaulted to SWIFT.

Table 2-6 Guarantee - SBLC Issuance - Registration - Application Details - Field Description

Field	Description
Received from Applicant Bank	Read only field. This field displays, if Guarantee Issuance request is received from the applicant or the applicant's bank.
Received From - Customer ID	Read only field. This field displays the Customer ID.

Table 2-6 (Cont.) Guarantee - SBLC Issuance - Registration - Application Details - Field Description

Field	Description
Received From - Customer Name	<p>Read only field.</p> <p>This field displays the name of the customer or applicant. This field will be auto populated based on the selected customer ID.</p>
Branch	<p>Read only field.</p> <p>By default, customer's home branch will be displayed based on the customer ID and it can be changed, if required.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>Once the request is submitted, Branch field is non-editable.</p> </div>
Currency Code, Amount	<p>Read only field.</p> <p>This field displays the currency code and the value of LC (with decimal places) as per currency type.</p>
Priority	<p>Set the priority of the Guarantee issuance request as Essential/Critical/Low/Medium/High. If priority is not maintained for the customer, system will populate 'Medium' as the default priority. User can change the priority populated any time before submit of Registration stage.</p>
Submission Mode	<p>Read only field.</p> <p>This field displays the submission mode of Guarantee Issuance request.</p> <p>By default the submission mode will have the value as 'Desk'.</p> <ul style="list-style-type: none"> • Desk - Request received through Desk • Fax - Request received through Fax • Email - Request received through Email • SWIFT-Non STP - Request received through SWIFT • Courier - Request received through Courier
Process Reference Number	<p>Read only field.</p> <p>Unique OBTFPM task reference number for the transaction.</p> <p>This is auto generated by the system based on process name and branch code.</p>

Table 2-6 (Cont.) Guarantee - SBLC Issuance - Registration - Application Details - Field Description

Field	Description
Application Date	<p>Read only field. By default, the application displays the branch's current date.</p> <div style="border: 1px solid #0070c0; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note: Future date selection is not allowed.</p> </div>
Customer Reference Number	Specify a unique Customer Reference Number which is provided by the applicant/applicant bank.
Copy Existing Undertaking	<p>Specify the existing undertaking number, the system populates the details of the guarantee. Alternatively, click Search to search and select the existing undertaking to be copied, if required.</p> <p>If an existing undertaking is to be copied, the details of the LC is captured here.</p>
Template Name	<p>Specify the template name if the applicant details are already captured and the data can be reused with the template to reduce the effort. Alternatively, click Search to search and select the Template code.</p> <p>The details pertaining to the subsequent screens in scrutiny and data enrichment screens will be persisted and populated when you move to the relevant screens.</p> <p>Before populating the screens, application will check if there are any existing values and will display an alert message ' Value exist already in few fields - Do you want to use the template - Yes/No'. If the you click on Yes the existing details will be over-written with the template values</p> <p>This is applicable only for the non-online Guarantee Issuance request.</p>
View Guarantee/ SBLC	Click to view the details of the selected template in Template Name.
Use	Click to use the selected template in Template Name.

Guarantee Details

The fields listed under this section are same as the fields listed under the Guarantee Details section in Registration stage. During Registration, if user has not captured input, then user can capture the details in this section.

Figure 2-8 Guarantee Details

 **Note:**
The fields which are marked as **Required** are mandatory.

For more information on action buttons, refer to the field description table below.

Table 2-7 Guarantee Issuance - Registration - Guarantee Details - Field Description

Field	Description
Form of Undertaking	System defaults the type of LC (Documentary Credit) as per the requirement. By default LC type is Irrevocable. <ul style="list-style-type: none"> DGAR - Guarantee STBY - Standby LC User can change the value of Form of Undertaking.
Type of Undertaking	System defaults the type of undertaking. User can change the value of type of Undertaking.
Narrative	Specify the narrative in this field. This field is enabled if Type of Undertaking field values is OTHR .
Product Code	Read only field. This field displays the product code . The product codes will be listed based on the selected value in Form of Undertaking.
Product Description	Read only field. This field displays the description of the product as per the product code.

Table 2-7 (Cont.) Guarantee Issuance - Registration - Guarantee Details - Field Description

Field	Description
Undertaking Number	Read only field. This field displays the undertaking number available in the guarantee/SBLC.
User Reference Number	This field displays the user reference number, simulated from the back office. Number will be populated on the selection of Product Code. User can change the User Reference Number.
Purpose of Message	System defaults the purpose of message as entered in Regesitration stage. The values are: <ul style="list-style-type: none"> • ISSU - Issue of Undertaking: In case the Undertaking is sent through SWIFT MT 760, the advising bank has to just advise the Undertaking to the Beneficiary. In case the Undertaking is advised through Mail Advice, the guarantee can be directly mailed by the Issuing bank to the Beneficiary. This is applicable for Guarantees/ Local Guarantees and SBLC (Standby LC) • ICCO - Issuance of counter-counter-undertaking: Issuance of counter-counter-undertaking and request to issue counter-undertaking. The bank receiving the Undertaking (usually through SWIFT MT 760) is required to issue a Counter-undertaking to another bank requesting the third Bank to issue Local Undertaking favoring the Beneficiary. • ISCO - Issuance of counter undertaking: Issuance of counter undertaking and request to issue local undertaking The bank receiving the Undertaking (usually through SWIFT MT 760) is required to issue Local Undertaking to the beneficiary. If the Guarantee Issuance is at Counter Issuing Bank (CIB), Purpose of Message is 'ISCO'. If the Guarantee Issuance is at Local Issuing Bank (LIB), Purpose of Message is 'ISSU'. <p>The user can change the purpose of message.</p>

Table 2-7 (Cont.) Guarantee Issuance - Registration - Guarantee Details - Field Description

Field	Description
File Identification	<p>System defaults the type of delivery channel and its associated file name or reference from the available values.</p> <p>The options are:</p> <ul style="list-style-type: none"> • COUR - Courier delivery • EMAL - Email transfer • FACT - SWIFTNet FileAct • FAXT - Fax transfer • HOST - Host-to-Host • MAIL - Postal Delivery • OTHR - Other delivery channel <p>User can change the value of File Identification.</p>
Narrative	<p>Specify the narrative in this field.</p> <p>This field is enabled if File Identification field values is OTHR .</p>
Date of Issue	<p>Read only field.</p> <p>This field displays the branch's current date as date of issue defaulted from the application.</p> <p>Application will populate the Date of Issue field with branch date on approval if date of approval is later than date of Registration.</p>
Applicable Rules	<p>System defaults the applicable rules for guarantee issuance.</p> <p>The options are:</p> <ul style="list-style-type: none"> • URDG - Uniform rules for demand guarantees • UCPR - Uniform customs and Practices • ISPR - International standby Practices • NONE - Not subject to any rules • OTHR <p>User can change the value of Applicable Rules.</p>
Narrative	<p>Specify the narrative in this field.</p> <p>This field is enabled if Applicable Rules field values is OTHR .</p>
Expiry Type	<p>System defaults the expiry type from guarantee issuance.</p> <p>This field indicates whether undertaking has specified expiry date or is open-ended.</p> <p>The options are:</p> <ul style="list-style-type: none"> • COND - With Expiry • CONU - Without Expiry • FIXD - Specified expiry date (with/without automatic expansion) • OPEN - No specific date of expiry <p>User can change the value of Expiry Type.</p>
Effective Date	<p>The effective date is defaulted from guarantee issuance.</p> <p>The user can change the date.</p>
Tenor	<p>Specify the value for tenor and select the value from the drop-down.</p> <p>The drop down is enabled, if Expiry Type is COND and FIXD.</p>
Date of Expiry	<p>Select the expiry date of the LC. The expiry date can be equal or greater than the issue date.</p> <p>If the Expiry Date is earlier than the issue date, system will provide an error and if the 'Expiry Date is equal to the Issue Date', system will provide a alert message.</p>

Table 2-7 (Cont.) Guarantee Issuance - Registration - Guarantee Details - Field Description

Field	Description
Expiry Condition/Event	<p>System defaults the documentary condition/event that indicates when the local undertaking will cease to be available.</p> <p>User can change the expiry condition/event, , if Expiry Type is COND and CONU.</p>
Applicant Bank	<p>Read only field.</p> <p>This field displays the applicant bank details, if Received From Applicant Bank option is enabled. If request is not received from applicant bank, this field must be blank.</p>
Applicant	<p>This field displays the applicant details based on the details provided in Application Details section.</p> <p>Specify the applicant or alternatively, click Search to search and select the applicant from the look-up, if Received From Applicant Bank option is enabled.</p>
Beneficiary	<p>System defaults the beneficiary whose favor the undertaking (or counter-undertaking) is issued from the Regeistration stage.</p> <p>If beneficiary is not a customer of the bank, then choose WALKIN customer id and provide the beneficiary details. If beneficiary is a customer and KYC status is not valid, then system will display alert message.</p> <p>User can change the beneficiary.</p>
Advising Bank	<p>Specify the advising bank name or click Search to search and select the advising bank based on Party ID/Party Name.</p> <p>User can also input the party ID and on tab out system will validate and populate the 'Advising Bank' name.</p> <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message “RMA arrangement not available, please change the bank or use MAIL Medium”.</p> </div>

Table 2-7 (Cont.) Guarantee Issuance - Registration - Guarantee Details - Field Description

Field	Description
Counter SBLC/Guarantee Issuing Bank	<p>System defaults the Counter Guarantee Issuance bank name from the Registration stage.</p> <p>This field is enabled, if Purpose of Message is ICCO.</p> <div style="border: 1px solid #0070c0; padding: 5px; margin: 10px 0;"> <p> Note:</p> <p>In case the selected Bank is not RMA Compliant, the system prompts the user to use a different advising bank or use non SWIFT Media to transmit the LC and displays error message "RMA arrangement not available."</p> </div> <p>User can change the Counter SBLC/Guarantee Issuing Bank.</p>
Local SBLC/Guarantee Issuing Bank	<p>System defaults the Local SBLC/Guarantee Issuance bank name from the Registration stage.</p> <p>This field is enabled, if Purpose of Message is ICCO.</p> <div style="border: 1px solid #0070c0; padding: 5px; margin: 10px 0;"> <p> Note:</p> <p>If Local Issuing Bank has value and Counter Issuing Bank has no value, and in case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".</p> </div> <p>User can change the Local SBLC/Guarantee Issuing Bank.</p>
Supplementary Information About Amount	Specify the additional amounts related to undertaking.
Accountee	Specify the accountee or click Search to search and select the accountee.
Amount In Local Currency	<p>Read only field.</p> <p>This field displays the Local currency and amount value. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).</p>
Obligor/ Instructor Party	Specify the Local SBLC/Guarantee Issuance bank name or click Search to search and select the name of the obligor from the lookup.
Obligor Collateral Percentage	Specify the value for obligor collateral percentage. This field is mandatory if the field Obligor/ Instructor Party has value.
Auto Close	Enable the option, if Auto close is required for that transactions. Disable the option, if Auto close is not required for that transactions.

Table 2-7 (Cont.) Guarantee Issuance - Registration - Guarantee Details - Field Description

Field	Description
Closure Date	This field displays the Closure Date defaulted by the system, with the value "Expiry Date" + No of Closure days maintained in the respective Product in which the contract has been created. System automatically close the contract on the specified Closure Date if Auto Close is selected as Yes for the specific contract. User can modify the system defaulted "Closure Date" and system should validate the same for the below conditions, <ul style="list-style-type: none"> • Closure Date must be after the Issue Date. • Closure Date must be after the Expiry Date. • Closure Date cannot be blank, when the "Auto Close" is checked.

This button provides information about user initiated the transaction, initiated date, stage wise detail etc.

For more information on audit, refer to the field description table below.

Table 2-8 Audit - Field Description

Field	Description
Application No.	This field displays the application number of the process.
Branch Code	This field displays the branch code.
Initiated Date	This field displays the date on which process is initiated.
Initiated By	This field displays the user ID of the user who had initiated the process.
Process Name	This field displays the name of the process which is initiated.
S. No	This field displays the serial number of the audit record.
Stage Name	This field displays the current stage of the process.
Completed Time	This field displays the time on which the audit of the current stage is completed.
Completed By	This field displays the user ID of the user who had completed the audit.
Outcome	This field displays the outcome of the audit.

2. Click **Next**.

The task will move to next data segment.

Table 2-9 Main Details - Action Buttons - Field Description

Field	Description
Documents	<p>Click to View/Upload the required document.</p> <p>Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application</p>
Remarks	<p>Specify any additional information regarding the Guarantee issuance. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.

Table 2-9 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Incoming Message	<p>This button displays the multiple messages (MT760 + up to 7 MT761). Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(784,760/761).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Cancel	Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
Refer	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

2.6.2 Guarantee Preferences

This topic provides the systematic instructions to capture the Guarantee preference details in Scrutiny tage.

1. On **Scrutiny - Guarantee Preferences** screen, specify the fields.

Figure 2-9 Scrutiny - Guarantee Preferences

The screenshot shows the 'Guarantee Issuance Scrutiny' interface for application number PK2GTEI000064742. The main content area is titled 'Guarantee Preferences' and is organized into several sections:

- Preferences:** Includes fields for '77U - Terms and Conditions' (Terms1) and '44J - Governing Law and Jurisdiction'.
- Automatic Extension Details:** Contains 'Automatic Extension Reqd' (checkbox), '23F - Auto Extension Period' (dropdown), 'Extension Details' (text area), '78 - Automatic Extension Non-Extension Notification' (text area), '26E - Automatic Extension Notification Period' (text area), and '315 - Auto Extension Final Expiry Date' (calendar).
- Liability Change Schedule:** Features 'Liability Change Type' (dropdown), 'Additional Details' (text area), 'Standard Type' (dropdown), 'Liability Type' (dropdown), 'Number of Periods' (text area), 'Units' (dropdown), 'Amount' (GBP dropdown and text area), and 'Percentage' (text area). A 'Generate Schedule' button is located below these fields.
- Demand Indicator:** Includes '48B - Demand Indicator' with a dropdown set to 'Multiple demands not permitte'.
- Underlying Transaction Details:** Shows '45L - Underlying Transaction Details' with the value '45LTRNDTLS'.
- Delivery of Original Undertaking:** Contains '24E - Delivery of Original Undertaking' (COLL - By Collection dropdown), '24E - Narrative' (text area), '24G - Delivery to/ Collection by' (dropdown), and '24G - Narrative' (text area).
- Transfer Details:** Includes '48D - Transfer Indicator' (checkbox) and '39E - Transfer Conditions' (text area).
- Others:** Contains '722 - Sender to Receiver Information' (SND2RECM760), '71D - Charges' (text area), '57A - Advise Through Bank' (dropdown), '41a- Available with' (text area), '40 - Confirmation Instruction' (dropdown), '58A - Requested Confirmation Party' (dropdown), 'Confirming Bank' (text area), and '21T - Customer Business Reference' (text area).
- 215 - Bank Business Reference:** A text area at the bottom.

At the bottom of the screen, there is an 'Audit' button and a row of action buttons: 'Request Clarification', 'Reject', 'Refer', 'Hold', 'Cancel', 'Save & Close', 'Back', and 'Next'.

For more information on fields, refer to the field description table below.

Table 2-10 Guarantee Preferences - Field Description

Field	Description
Preferences	Specify the preference details based on following table.
Terms and Conditions	Specify the terms and conditions that are not already mentioned. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760. The field displays the content from MT760 and all the applicable MT 761.
Governing Law and Jurisdiction	Click Search to search and select the applicable governing law and jurisdiction for the undertaking. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Automatic Extension Details	Specify the Automatic Extension Details details based on following table.
Automatic Extension Required	Enable the option, if automatic extension for expiry date is required. Disable the option, if automatic extension for expiry date is not required. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin: 10px 0;"> <p> Note:</p> <p>This field is not applicable if, Expiry Type field in registration stage has value as Open.</p> </div> If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), this button is enabled if 23F field has value.
Auto Extension Period	Select the auto extension period for expiry date from the following options. This field is enabled, if Auto Extension Required toggle is set On. <ul style="list-style-type: none"> • Days • One year • Others If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760. The field displays the content from MT760 and all the applicable MT 761.
Extension Details	Specify the extension details for the expiry date. This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field value is Days/Others . If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.

Table 2-10 (Cont.) Guarantee Preferences - Field Description

Field	Description
Non-Extension Details	<p>Specify the non-extension details for automatic expiry date extension such as notification methods or notification recipient details.</p> <p>This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field has values.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Non-Extension Notice Period	<p>Specify the non-extension notice days.</p> <p>This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field has values.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Auto Extension Final Expiry Date	<p>Specify the final extension date for automatic expiry date extension after which no automatic extension is allowed.</p> <p>This field is enabled if Auto Extension Required toggle is 'On' and Auto Extension Period field has values.</p> <p>The user can manually enter the value. This date/duration can be beyond the calculated value provided in the "Auto Extension Period".</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Liability Change Schedule	Specify the details of increase or decrease of liability on a pre-scheduled date as applicable.
Liability Change Type	<p>Select the liability change type. This field describes the basis for liability change.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Event Based - User can enter the Event details in "Additional Details" field. The actual liability change for Event based type should be operationally handled by the user based on the event details • Time Based - The liability change should happen automatically on the pre-scheduled date as given.
Additional Details	Specify the additional details to increase or decrease of liability or both are involved.
Standard Type	<p>Select whether liability change is standard or non-standard.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Standard • Non-standard <p>This field is disable if, Liability Change Type is Event Based.</p>
Liability Type	<p>Select whether increase or decrease of liability or both are involved.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Increase • Decrease • Boths
Number of Periods	Specify the numeric value of the period corresponding to the units.

Table 2-10 (Cont.) Guarantee Preferences - Field Description

Field	Description
Units	Select the unit value. The options are: <ul style="list-style-type: none"> • Monthly • Quarterly • Half Yearly • Yearly
Amount	Specify the liability amount that should be increased or decreased on the liability change date.
Percentage	Specify the amount of liability to be changed or percentage of liability to be changed. If percentage is chosen, then system should calculate the equivalent amount of liability to be changed.
Schedule Grid	If the Liability Change Type is Time Based , and Standard Type is Non-standard , the user can input the details in the schedule grid. Click '+' sign to add the records in Schedule Grid.
Sequence Number	Displays the serial number of the liability change.
Scheduled Date	Specify the date on which liability change to happen or select the date from the date picker.
Amount	Specify the liability Amount that should be increased or decreased on the liability change date.
Percentage	Specify the amount of liability to be changed or percentage of liability to be changed. If percentage is chosen, then system should calculate the equivalent amount of liability to be changed.
Liability Type	Select whether increase or decrease of liability or both are involved. The options are: <ul style="list-style-type: none"> • Increase • Decrease • Boths
Action	Click Edit icon to edit the schedule record. Click Delete icon to delete the schedule record.
Demand Indicator	Specify the Demand Indicator details
Demand Indicator	Select the demand indicator from the drop-down. This field specifies whether partial and/or multiple demands are not permitted. The options are: <ul style="list-style-type: none"> • Multiple demands not permitted - Partial amount can be claimed • Multiple and partial demands not permitted- Entire amount can be claimed. • Partial demands not permitted - Entire amount can be claimed. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Underlying Transaction Details	Specify the Underlying Transaction Details .

Table 2-10 (Cont.) Guarantee Preferences - Field Description

Field	Description
Underlying Transaction Details	<p>Click Search to search and select the underlying business transaction details (for which the undertaking is issued) from the look-up.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Delivery of Local Undertaking	Specify the Delivery of Local Undertaking details.
Delivery of Local Undertaking	<p>Select the method of the delivery from the following options by which the original local undertaking needs to be delivered.</p> <p>The options are:</p> <ul style="list-style-type: none"> • COLL - By Collection • COUR - By Courier • MAIL - By Mail • MESS - By Messenger - Hand Deliver • OTHR - Other Method • REGM - By Registered Mail or Airmail <p>This field is not applicable, if Purpose of Message field value is ICCO/ISCO.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Narrative	<p>Specify the description of method of delivery of original undertaking.</p> <p>This field is not applicable, if Delivery of Local Undertaking field value is COUR/OTHR.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Delivery to/Collection by	<p>Select the details of to whom the original local undertaking is to be delivered or by whom the original local undertaking is to be collected.</p> <p>The options are:</p> <ul style="list-style-type: none"> • BENE - Beneficiary • OTHR - Other Method <p>This field is enabled, if Purpose of Message field value is ICCO/ISCO.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Narrative	<p>Specify the description of method of delivery of original undertaking.</p> <p>This field is not applicable, if Delivery to/Collection by field value is OTHR.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Transfer Details	Specify the Transfer Details .

Table 2-10 (Cont.) Guarantee Preferences - Field Description

Field	Description
Transfer Indicator	Select the check box if the undertaking is transferable. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Transfer Conditions	Specify the conditions to transfer the undertaking.. This field is available, if Transfer Indicator check box is selected. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Others	Specify the Others detail.
Sender to Receiver Information	Click Search to search and select the additional information for receiver from the look-up. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Charges	Specify the value for the charger for the undertaking. If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.
Advice Through Bank	Specify the additional bank to advice the undertaking. This field is enabled only if Advising Bank in Main Details hop has value. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760. The field displays the content from MT760 and all the applicable MT 761.
Available With	This field identifies the bank with which the credit is available of the issued LC. User must capture the bank details or any free text. Search the bank with SWIFT code (BIC) or Bank Name. On selection of the record if SWIFT code is available, then SWIFT code will be defaulted. If SWIFT code is not available then the bank's name and address gets defaulted. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: This field is applicable only for SBLC.</p> </div> If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760. If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760. The field displays the content from MT760 and all the applicable MT 761.

Table 2-10 (Cont.) Guarantee Preferences - Field Description

Field	Description
Confirmation Instructions	<p>Select the confirmation instruction from the available values. The options are:</p> <ul style="list-style-type: none"> • CONFIRM • MAY ADD • WITHOUT <p> Note:</p> <p>This field is applicable, if Form of Undertaking field value is STBY - Standby LC.</p> <p>If the Guarantee Issuance is at Counter Issuing Bank (CIB), the field is read only and populated from Incoming MT 760.</p> <p>If the Guarantee Issuance is at Local Issuing Bank (LIB), the field is read only and populated from Incoming MT 760.</p>
Requested Confirmation Party	<p>Select the requested confirmation party from the available options. Response Message	This field displays the detailed response message. The value in this field appears, if you click the Verify button.
ELCM Reference Number	This field displays the ELCM reference number.
Limit Details grid	Below fields appear in the Limit Details grid along with the above fields.
Line Serial	Displays the serial of the various lines available and mapped under the customer id. This field appears on the Limits grid.
Edit	Click the link to edit the Limit Details .
Cash Collateral Details	Specify the Cash Collateral details.
Collateral Percentage	System populates the Collateral % maintained in the Customer / Product for the counter party of the contract. User can modify the collateral percentage.
Collateral Currency and amount	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.
Exchange Rate	System populates the exchange rate maintained. User can modify the collateral Currency and amount. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.
Collateral Details pop-up screen	Click plus icon to add new collateral details. Collateral availability needs to be checked if amendment involves increase in amount or tolerance. Provide the collateral details based on the description provided in the following table: Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon.
Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.
Collateral Split %	Specify the collateral split% to be collected against the selected settlement account.
Collateral Contribution Amount	Specify the collateral amount to be collected against the selected settlement account. User can either provide the collateral % where the collateral amount will be auto populated or modifying the collateral amount will auto correct the collateral %.
Settlement Account	Click Search to search and select the settlement account for the collateral.

Table 2-14 (Cont.) Limit Details - Field Description

Field	Description
Settlement Account Currency	Read only field. This field displays the settlement account currency defaulted by the system.
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.
Account Available Amount	Read only field. This field displays the account available amount which will be auto-populated on clicking the Verify button.
Response	Read only field. System populates the response on clicking the Verify button.
Response Message	Read only field. System populates the response message on clicking the Verify button.
Verify	Click to verify the account balance of the Settlement Account.
Save & Close	Click to to save and close the record.
Cancel	Click to cancel the entry.
Cash Collateral Details grid	Below fields appear in the Cash Collateral Details grid along with the above fields.
Collateral %	Specify the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Contribution Amount	This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Account Balance Check Response	Read only field. System populates the Account Balance Check Response on clicking the Verify button.
Edit	Click edit link to edit the collateral details.
Deposit Linkage Details	Specify the Deposit Linkage details. In this section which the deposit linkage details is captured. System should allow the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/modification of existing Linkage by calling Back-office system (DDA) system directly. Click + plus icon to add new Deposit Linkage details.
Edit	Click edit link to edit the deposit linkage details.

Table 2-14 (Cont.) Limit Details - Field Description

Field	Description
Deposit Linkage Details pop-up screen	Below fields are displayed on the Deposit Linkage Details pop-up screen, if the user clicks plus icon.
Customer ID	This field displays the applicant's/applicant bank customer ID defaulted from the application. User can change the customer ID.
Deposit Account	Click Search to search and select deposit for linkage from the list of all the customer Deposits.
Deposit Branch	This field displays the deposit branch which is auto-populated based on the deposit account selection.
Deposit Available Amount	This field displays the deposit available amount and currency which will be auto-populated based on the deposit account selection.
Deposit Maturity Date	This field displays the maturity date of deposit.
Exchange Rate	This field displays the latest exchange rate for deposit linkage. This will be picked up from the exchange rate maintenance from the common core.
Deposit Available In Transaction Currency	This field displays the deposit amount available, after exchange rate conversion, if applicable.
Linkage Percentage %	Specify the value for linkage percentage.
Linkage Amount (Transaction Currency)	This field displays the transaction amount, user can change the value.
Deposit Details grid	Below fields appear in the Deposit Details grid along with the above fields.
Deposit Currency	Deposit currency will get defaulted in this field.
Transaction Currency	Transaction currency will get defaulted in this field from the underlying task.
Edit	Click edit link to edit the deposit linkage details.

2. Click **Save and Close** to save the details and close the screen.

Charge Details

After payment, click on Default Charges button to the default commission, charges and tax if any will get populated.

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

The system also default the Charges/Commission Party maintained for the customer as per defined Class Maintenance in OBTF. System simulates the Charges, Commission and Tax details from the Back office.

If the Guarantee Issuance is at Counter Issuing Bank (CIB), charges are simulated from back office, user can change the details. If the Guarantee Issuance is at Local Issuing Bank (LIB), charges are simulated from back office, user can change the details

Table 2-15 Charge Details - Field Description

Field	Description
Commission Details	This section displays the commission details.
Component	This field displays the commission component.
Rate	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Mod. Rate	From the default value, if the rate is changed the value gets updated in this field.

Table 2-15 (Cont.) Charge Details - Field Description

Field	Description
Ccy	This field displays the currency in which the commission have to be collected.
Amount	This field displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified	From the default value, if the amount is changed, the value gets updated in the modified amount field.
Defer	If enabled, charges/commissions has to be deferred and collected at any future step.
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settl. Acct	Select the settlement account.
Amend	The value is auto-populated as the commission can be amended or not.
Charge Details	This section displays the charge details.
Component	This field displays the charge component type.
Tag Currency	This field displays the tag currency in which the charges have to be collected.
Tag Amount	This field displays the tag amount that is maintained under the product code.
Ccy	This field displays the currency in which the charges have to be collected.
Amount	This field displays the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM. The user can not enable/disable the option, if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.

Table 2-15 (Cont.) Charge Details - Field Description

Field	Description
Defer	<p>If charges have to be deferred and collected at any future step, this check box has to be selected.</p> <p>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</p> <p>The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>
Waive	<p>Enable the toggle, if charges has to be waived.</p> <p>Based on the customer maintenance, the charges should be marked for Billing or for Defer.</p> <p>This field is disabled, if Defer toggle is enabled.</p>
Charge Party	Charge party is applicant by default. User can change the value to beneficiary.
Settl. Acct	Select the settlement account.
Tax Details	<p>This section displays the tax details.</p> <p>The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/commission will be available on click of Re-Calculate button or on hand off to back-end system.</p>
Component	This field displays the tax component.
Type	This field displays the type of tax component.
Value Date	This field displays the value date of tax component.
Ccy	<p>This field displays the currency in which the tax have to be collected.</p> <p>The tax currency is the same as the commission.</p>
Amount	<p>This field displays the tax amount based on the percentage of commission maintained.</p> <p>You can edit the tax amount, if applicable.</p>
Billing	<p>If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</p> <p>This field is disabled, if 'Defer' toggle is enabled.</p>
Defer	<p>If taxes have to be deferred and collected at any future step, this option has to be enabled.</p> <p>The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.</p>
Settl. Acct	<p>System defaults the settlement account.</p> <p>The user can modify the settlement account.</p>
Split Settlement	Once the user clicks on the Recalculate button to fetch the Split Settlement details from Backoffice, new section "Split Settlement" will appear below the 'Tax' section. The default parties in Split row should be fetched from OBTF.
Select	The option to select the split settlement record.
Component	The split component type eligible for Split .
Currency	The currency of split settlement.
Amount	The amount of split settlement.

Table 2-15 (Cont.) Charge Details - Field Description

Field	Description
Split Settlement Details	Split Settlement details section appears from Back office, when the user clicks on the Recalculate button.
Sequence	The sequence number is auto populated with the value, generated by the system.
Component	The split component type eligible for Split.
Amount	The system splits the respective Charge/Commission amount automatically between counter party and third party with 50% value by default. The bank user can modify the amount. More than two splits are not allowed.
Customer	Indicates the ID of the Customer in Split Settlement Details section.
Account	The system defaults the settlement account. User can modify the settlement account. System initiates a call to common core tables within OBTFPM to select the account.
Account Currency	This field defaults the currency of the account.
Branch	Indicates the branch of the customer where transaction is getting processed.
Percentage	The system splits the respective Charge/Commission percentage automatically between counter party and third party with 50% value by default. More than two splits are not allowed. The bank user can modify the amount. The system should validate that the total percentage of each component doesn't exceed 100 and the total amount of each component doesn't exceed total component amount.
Exchange Rate	System populates the exchange rate maintained.
Original Exchange Rate	System displays the Original Exchange Rate as simulated in split settlement details section.
Party Type	System displays the party type in split settlement details section.
Negotiation Reference	Specify the negotiation reference number.
AR-AP Tracking	Indicates to defer the charge/ commission in Split Settlement Details section. The user can modify the AR-AP Tracking flag as per the requirements.
Loan/Finance Account	Displays the loan account.
Negotiation Rate	Specify the negotiation rate.

3. Click **Save and Close** to save the details and close the screen.
4. Click **Next**.

The task will move to next data segment.

Let's look at the details for Data Enrichment stage. The Data Enrichment stage has the following hops for data capture:

- **Main Details**
This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee Issuance request.

- [Guarantee Preferences](#)
This topic provides the systematic instructions to capture the Guarantee preference details in Data Enrichment stage.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Local Guarantee](#)
This topic provides the systematic instructions to capture the local guarantee details of Data Enrichment stage.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details.
- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of Guarantee issuance request.
- [Summary](#)
This topic provides the systematic instructions to view the summary of Guarantee Issuance request.

2.7.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee Issuance request.

Main details section has two sub section as follows:

- Application Details
- SBLC/Guarantee Details.

Application Details

All fields displayed under Basic details section, would be read only except the **Priority**, **Application Date** and **Customer Reference Number** fields. For more information on the fields, refer [Main Details](#) of **Scrutiny** stage .

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

Figure 2-18 Data Enrichment - Main Details

SBLC/Guarantee Details

The fields listed under this section are same as the fields listed under the **SBLC/Guarantee Details** section in **Scrutiny** stage. For more information on the fields, refer to refer [Main Details](#) of **Scrutiny** stage. During Registration, if user has not captured input, then user can capture the details in this section.

Figure 2-19 SBLC/Guarantee Details

2. Click **Next**.

The task will move to next data segment.

Table 2-18 Main Details - Action Buttons - Field Description

Field	Description
Documents	<p>Click to View/Upload the required document.</p> <p>Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application</p>
Remarks	<p>Specify any additional information regarding the Guarantee issuance. This information can be viewed by other users processing the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	<p>Click to view/ input the following</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	<p>This button displays the multiple messages (MT760 + up to 7 MT761. Click to allow parsing of MT 760 along with MT761(up to 7) messages together to create a Guarantee Issuance.</p> <p>In case of MT798, the User can click and view the MT798 message(784,760/761).</p> <p>In case of MT798-MT726-MT759 request, user can view MT798 message(726-759) in this placeholder in Header of the task.</p> <p>In case of MT798_MT788-MT799 request, user can view MT798 message (788-799) in this placeholder in Header of the process-task.</p>
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is available, system should display all the signatures.</p>
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Cancel	Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.

Table 2-18 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
Refer	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Next	<p>On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>
Checklist	<p>Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.</p>

2.7.2 Guarantee Preferences

This topic provides the systematic instructions to capture the Guarantee preference details in Data Enrichment tage.

1. On **Data Enrichment - Guarantee Preferences** screen, specify the fields.

Figure 2-20 Data Enrichment - Guarantee Preferences

The screenshot displays the 'Guarantee Issuance DataEnrichment' interface for application 'PK2GTEI000064498'. The main content area is titled 'Guarantee Preferences' and is organized into several sections:

- Preferences:** Includes '77U - Terms and Conditions' (set to 'WE, FUTURA BANK, LONDON ON BEHALF OF...') and '44J - Governing Law and Jurisdiction'.

Next	<p>On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>

2.7.6 Additional Details

This topic provides the systematic instructions to capture the additional details.

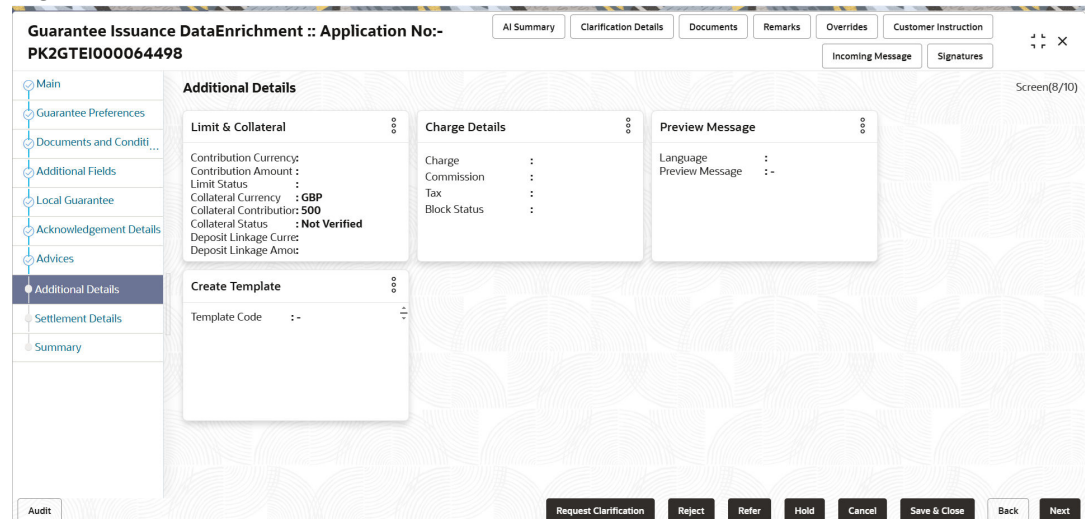

1. On **Additional Details** screen, click  on any Additional Details tile to view the details.

Figure 2-24 Additional Details

- Click **Save and Close** to save the details and close the screen.

Limits and Collaterals

For more information, refer to the field description table of [Additional Details](#) in **Scrutiny** stage.

- Click **Save and Close** to save the details and close the screen.

Charge Details

For more information, refer to the field description table of [Additional Details](#) in **Scrutiny** stage.

- Click **Save and Close** to save the details and close the screen.

Preview Message

This screen provides preview of draft guarantee details. If required, the draft can be sent for legal verification to legal team and draft confirmation to customer.

The system sends Draft MT760 along with up to seven MT761 messages as attachment to the customer.

The Transaction Reference Number is masked, before sending the Draft Import LC for Customer approval.

If the Guarantee Issuance is at Counter Issuing Bank (CIB)/ Local Issuing Bank (LIB), preview message is populated with the outgoing MT760 and all the applicable MT761.

Field	Description
Submit	Task will get moved to next logical stage of Guarantee issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided. In case of duplicate documents system will terminate the process after handing off the details to back office.
Checklist	Make sure that the details in the checklist are completed and acknowledge. If mandatory checklist items are not marked, system will display an error on submit.

2.8 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Guarantee Issuance request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office.

On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office.

If multiple accounts are applicable, Amount Block. Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Back	Task moves to previous logical step.

2.9 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

1. Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. The user can view the Summary tiles which displays list of important fields with values.
2. Click each tile to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

In case of MT798, on approval the task is handed off to back office system to create a Guarantee contract and generate the required MT760/761 messages.

Note:

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Contract Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

Figure 2-30 Authorization Re-Key

The screenshot displays the 'Approval Rekey' interface. At the top, there are three buttons: 'View Signature', 'Documents', and 'Remarks'. Below these, the 'Currency' field is set to 'GBP' with a checkmark icon to its right. The 'Contract Amount' field is set to 'GBP' with a dropdown arrow and '£1,000.00' with a checkmark icon to its right. At the bottom, there are three buttons: 'Refer', 'Close', and 'Proceed'.
