Preface

- [Purpose](#)
- [Audience](#)

This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)

This manual is organized into the following chapters:
- [Conventions](#)
- [Related Documents](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Guarantee Issuance Closure** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches](#), [Security Alerts and Bulletins](#) [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Abbreviation	Description
OBTFFPM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 2 Common Action Buttons and its Definitions

Action Buttons	Description
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>

Table 2 (Cont.) Common Action Buttons and its Definitions

Action Buttons	Description
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are: <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Click Cancel to cancel the transaction input midway without saving any data.
Save & Close	Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	Click Next , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

1

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2

Guarantee Issuance Closure

This chapter is documented to get familiar with the Guarantee Issuance Closure process of Oracle Banking Trade Finance Process Management.

Guarantee Issuance Closure process enables the closure of a Guarantee/SBLC after the expiry date but before the auto closure date. Guarantees/SBLC have a pre-scheduled auto closure date, which is a few days after the expiry of undertaking.

In the subsequent sections, let's look at the details for Guarantee Issuance Closure process

This topic contains following subtopics:

- [Common Initiation Stage](#)
This topic provides the systematic instructions to initiate the **Guarantee Issuance Closure** request.
- [Registration](#)
This topic provides the systematic instructions to initiate the Registration stage of Guarantee Issuance Closure request.
- [Data Enrichment](#)
This topic provides the systematic instructions to initiate the Data Enrichment stage of Guarantee Issuance Closure request.
- [Exceptions](#)
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)
This topic helps you quickly get acquainted with the Multi Level Approval process.
- [Customer - Acknowledgement](#)
This topic helps you quickly get acquainted with the Customer Acknowledgement process.

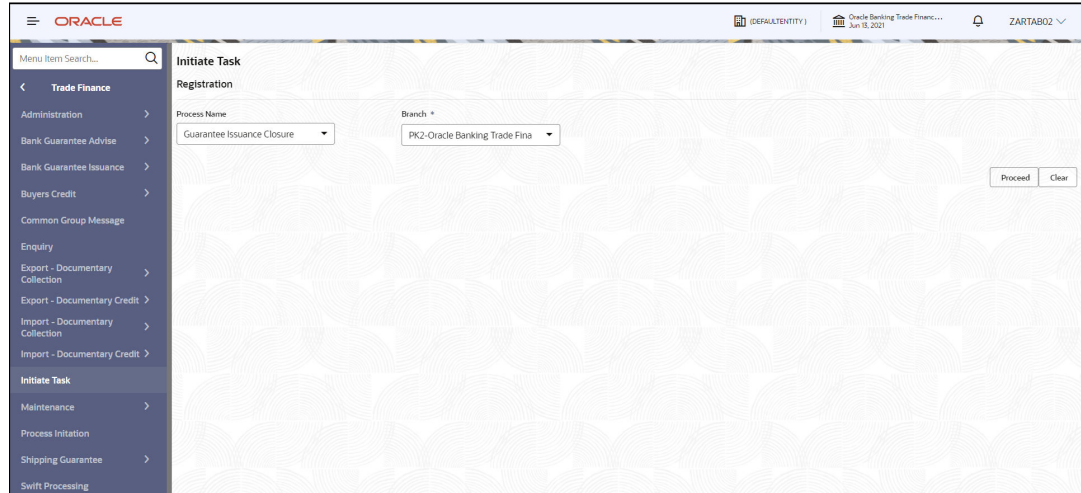

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the **Guarantee Issuance Closure** request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.
The **Initiate Task** screen appears.

Figure 2-1 Initiate Task

2. On **Initiate Task** screen, specify the fields.

 **Note:**

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

Table 2-1 Initiate Task - Field Description

Field	Description
Process Name	Select a process name from the drop-down list.
Branch	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

Table 2-2 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of Guarantee Issuance Closure request.

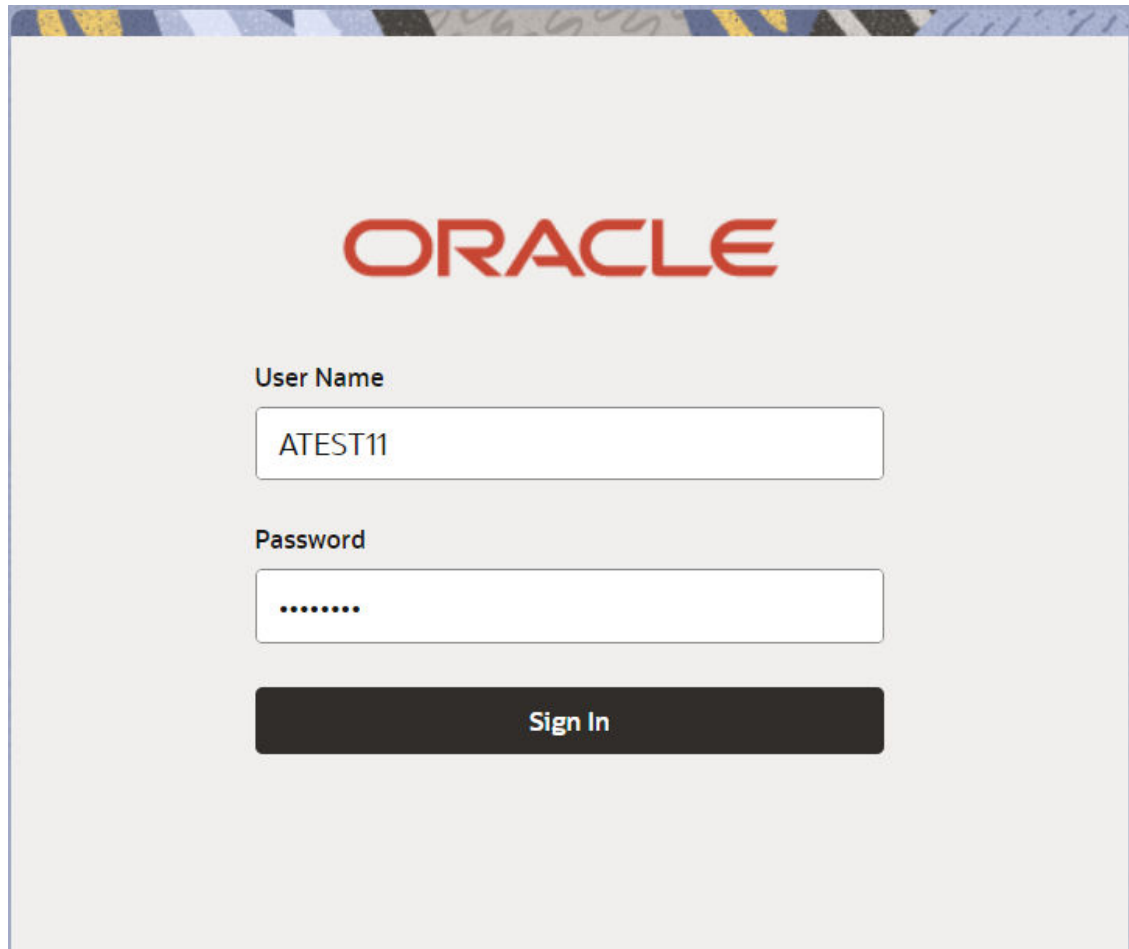

The user can register a request for the Closure of Guarantee/SBLC Issued received at the front desk (as an application received physically/received by mail/fax).

During registration stage, user can capture the basic details of the application, check the signature of the applicant and upload the related documents of the applicant. It also enables

the user to capture some additional product related details as an option. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for a Guarantee Issuance expert to handle the request in the next stage.

Specify **User ID** and **Password**, and login to **Home** screen.

Figure 2-2 LogIn Screen

The screenshot shows the Oracle login interface. At the top, the Oracle logo is displayed in red. Below the logo, the text 'User Name' is followed by a text input field containing 'ATEST11'. Underneath, the text 'Password' is followed by a password input field with masked characters '.....'. At the bottom of the form is a black button with the text 'Sign In' in white.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Bank Guarantee Issuance**.
2. Under **Bank Guarantee Issuance**, click **Guarantee Issuance Closure**.

Figure 2-3 Guarantee Issuance Closure

The screenshot shows the Oracle 'Initiate Task' interface. On the left is a navigation menu with 'Trade Finance' selected. The main area is titled 'Initiate Task' and 'Registration'. It contains two dropdown menus: 'Process Name' set to 'Guarantee Issuance Closure' and 'Branch' set to 'PK2-Oracle Banking Trade Fina'. There are 'Proceed' and 'Clear' buttons on the right.

The **Guarantee Issuance Closure - Registration** screen appears. The Guarantee Issuance Closure - Registration stage has two sections Application Details and SBLC/Guarantee Details. Let's look at the details of Registration screens below:

Figure 2-4 Guarantee Issuance Closure - Registration - Application Details

Let's look at the details for Data Enrichment stage. User can enter/update the fields in Data Enrichment stage. Some of the fields that are already having value from Registration/online channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

- [Main Details](#)
This topic provides the systematic instructions to initiate the main details of Data Enrichment stage of Guarantee Issuance Closure request.
- [Additional Fields](#)
This topic provides the systematic instructions to capture the additional fields.
- [Advices](#)
This topic provides the systematic instructions to capture the advices details of Guarantee Issuance Closure process.
- [Additional Details](#)
This topic provides the systematic instructions to capture the additional details in Data Enrichment stage of Guarantee Issuance Closure process.
- [Settlement Details](#)
This topic provides the systematic instructions to capture the settlement details of Guarantee Issuance Closure request.
- [Summary](#)
This topic provides the systematic instructions to view the summary details in Data Enrichment stage of Guarantee Issuance Closure request.

2.3.1 Main Details

This topic provides the systematic instructions to initiate the main details of Data Enrichment stage of Guarantee Issuance Closure request.

Main details section has two sub section as follows:

- Application Details
- SBLC/ Guarantee Details.

Application Details

The fields listed under this section are same as the fields listed under the SBLC Guarantee Details section in Registration. During Registration, if user has not captured input, then user can capture the details in this section.

1. On **Main Details** screen, specify the fields that were not entered at Registration stage.

Contribution %	<p>System will default this to 100%. User can modify, if contribution is more than 100%. System will display an alert message, if modified. Once contribution % is provided, system will default the amount.</p> <p>System to validate that if Limit Contribution% plus Collateral% is equal to 100. If the total percentage is not equal to 100 application will display an alert message.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message “Defaulted Collateral Percentage modified.”</p> </div>
Liability Number	<p>Click Search to search and select the Liability Number from the look-up.</p> <p>The list has all the Liabilities mapped to the customer.</p>
Contribution Currency	<p>This field displays the contribution currency.</p>
Line ID/Linkage Ref No	<p>Click Search to search and select from the various lines available and mapped under the customer id gets listed in the drop-down. LINE ID-DESCRIPTION will be available for selection along with Line ID. When you click on 'verify', the system will return value if the limit check was successful or Limit not Available. If limit check fails, the outstanding limit after the transaction value will be shown in the limit outstanding amount.</p> <p>The user can click the Line Id link to view the limit details.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>User can also select expired Line ID from the lookup and on clicking the verify button, system should default “The Earmarking cannot be performed as the Line ID is Expired” in the “Response Message” field.</p> </div> <p>This field is disabled and read only, if Linkage Type is Liability.</p>
Limit/Liability Currency	<p>This field displays the limit currency, when the user select the Liability Number.</p>
Limits Description	<p>This field displays the limits description.</p>
Limit Check Response	<p>This field displays the limit check response. Response can be 'Success' or 'Limit not Available' based on the limit service call response.</p> <p>The value in this field appears, if you click the Verify button.</p>
Amount to Earmark	<p>This field defaults the amount to earmark. Contribution amount will default based on the contribution %.</p> <p>User can change the value.</p>

Table 2-13 (Cont.) Limit Details - Field Description

Field	Description
Expiry Date	This field displays the date up to which the Line is valid.
Limit Available Amount	This field displays the value of available limit, i.e., limit available without any earmark. The Limit Available Amount must be greater than the Contribution Amount. The value in this field appears, if you click the Verify button.
Response Message	This field displays the detailed response message. The value in this field appears, if you click the Verify button.
ELCM Reference Number	This field displays the ELCM reference number.
Limit Details grid	Below fields appear in the Limit Details grid along with the above fields.
Line Serial	Displays the serial of the various lines available and mapped under the customer id. This field appears on the Limits grid.
Edit	Click the link to edit the Limit Details .
Cash Collateral Details	Specify the Cash Collateral details.
Collateral Percentage	System populates the Collateral % maintained in the Customer / Product for the counter party of the contract. User can modify the collateral percentage.
Collateral Currency and amount	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.
Exchange Rate	System populates the exchange rate maintained. User can modify the collateral Currency and amount. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.
Collateral Details pop-up screen	Click plus icon to add new collateral details. Below fields are displayed on the Collateral Details pop-up screen, if the user clicks plus icon.
Edit	Click edit link to edit the collateral details.
Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.
Collateral Split %	Specify the collateral split% to be collected against the selected settlement account.
Collateral Contribution Amount	Specify the collateral amount to be collected against the selected settlement account. User can either provide the collateral % where the collateral amount will be auto populated or modifying the collateral amount will auto correct the collateral %.
Settlement Account	Click Search to search and select the settlement account for the collateral.
Settlement Account Currency	Read only field. This field displays the settlement account currency defaulted by the system.

Table 2-13 (Cont.) Limit Details - Field Description

Field	Description
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.
Account Available Amount	Read only field. System populates the account available amount on clicking the Verify button.
Response	Read only field. System populates the response on clicking the Verify button.
Response Message	Read only field. System populates the response message on clicking the Verify button.
Verify	Click to verify the account balance of the Settlement Account.
Save & Close	Click to to save and close the record.
Cancel	Click to cancel the entry.
Cash Collateral Details grid	Below fields appear in the Cash Collateral Details grid along with the above fields.
Collateral %	Specify the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Contribution Amount	This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Edit	Click edit link to edit the collateral details.
Account Available Amount	This field displays the account available amount which will be auto-populated based on the settlement account selection.
Deposit Linkage Details	Specify the Deposit Linkage details. In this section which the deposit linkage details is captured. System should allow the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/modification of existing Linkage by calling Back-office system (DDA) system directly. Click + plus icon to add new Deposit Linkage details.
Edit	Click edit link to edit the deposit linkage details.
Deposit Linkage Details pop-up screen	Below fields are displayed on the Deposit Linkage Details pop-up screen, if the user clicks plus icon.

Table 2-13 (Cont.) Limit Details - Field Description

Field	Description
Deposit Account	Click Search to search and select deposit for linkage from the list of all the customer Deposits. All the Deposits of the customer should be listed in the LOV search. User should be able to select the deposit for linkage.
Deposit Branch	This field displays the deposit branch which will be auto-populated based on the deposit account selection.
Deposit Available Amount	This field displays the deposit available amount and currency which will be auto-populated based on the deposit account selection.
Deposit Maturity Date	This field displays the maturity date of deposit based on the deposit account selection.
Exchange Rate	This field displays the latest exchange rate for deposit linkage. This will be picked up from the exchange rate maintenance from the common core.
Deposit Available In Transaction Currency	This field displays the deposit amount available, after exchange rate conversion, if applicable.
Linkage Percentage %	Specify the value for linkage percentage.
Linkage Amount (Transaction Currency)	This field displays the transaction amount, user can change the value. System validates the linking amount with available Deposit balance and should not allow to link more than the available amount.
Deposit Details grid	Below fields appear in the Deposit Details grid along with the above fields.
Deposit Currency	This field displays the deposit currency.
Transaction Currency	This field displays the transaction currency.

- Click **Save and Close** to save the details and close the screen.

Commission, Charges and Taxes

This section displays Commission, Charges and Taxes details. On landing the additional tab, charges and tax if any will get defaulted from back end simulation. If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Figure 2-16 Charge Details

For more information on fields, refer to the field description table below.

Table 2-14 Charge Details - Field Description

Field	Description
Commission Details	This section displays the commission details.
Component	This field displays the commission component.
Rate	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	This field displays the currency in which the commission have to be collected.
Amount	This field displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Amount	From the default value, if the amount is changed, the value gets updated in the modified amount field.
Defer	If enabled, charges/commissions has to be deferred and collected at any future step.

Table 2-14 (Cont.) Charge Details - Field Description

Field	Description
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settlement Account	Select the settlement account.
Charge Details	This section displays the charge details.
Component	This field displays the charge component type.
Tag Currency	This field displays the tag currency in which the charges have to be collected.
Tag Amount	This field displays the tag amount that is maintained under the product code.
Currency	This field displays the currency in which the charges have to be collected.
Amount	This field displays the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM. The user can not enable/disable the option, if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled.
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
Waive	Enable the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if Defer toggle is enabled.
Charge Party	Charge party is applicant by default. User can change the value to beneficiary.
Settlement Account	Select the settlement account.

Table 2-14 (Cont.) Charge Details - Field Description

Field	Description
Tax Details	This section displays the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.
Component	This field displays the tax component.
Type	This field displays the type of tax component.
Value Date	This field displays the value date of tax component.
Currency	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
Amount	This field displays the tax amount based on the percentage of commission maintained. You can edit the tax amount, if applicable.
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
Settlement Account	System defaults the settlement account. The user can modify the settlement account.

3. Click **Save and Close** to save the details and close the screen.

Preview Messages

The bank user can view a preview of the outgoing message and advise simulated from back office.

The Preview section consists of following.

Figure 2-17 Preview Messages

For more information on fields, refer to the field description table below.

Table 2-15 Preview Messages - Field Description

Field	Description
Preview SWIFT Message	This section displays the Preview SWIFT Message details.
Language	Read only field. English is set as default language for the preview.
Message Type	Select the message type from the drop-down.
Message Status	Read only field. This field displays the message status of draft message of guarantee details.
Repair Reason	Read only field. This field displays the message repair reason of draft message of guarantee details.
Preview Message	This field displays a preview of the draft message.
Preview - Mail Advice	This section displays the Preview - Mail Advice details. Based on the guarantee amendment captured in the previous screen, the preview message-mail advice is simulated from the back office and the user can view the message.
Language	Read only field. English is set as default language for the preview.
Advice Type	Select the advice type.
Message Status	Read only field. This field displays the message status of draft message of liquidation details.
Repair Reason	Read only field. This field displays the message repair reason of draft message of liquidation details.
Preview Message	This field displays a preview of the advice.

4. Click **Save and Close** to save the details and close the screen.
5. Click **Next**.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

Table 2-16 Additional Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.

Table 2-16 (Cont.) Additional Details - Action Buttons - Field Description

Field	Description
Documents	<p>Click to View/Upload the required document.</p> <p>Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously.</p> <p>When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application</p>
Remarks	<p>Specify any additional information regarding the Guarantee Issuance Closure. This information can be viewed by other users handling the request.</p> <p>Content from Remarks field should be handed off to Remarks field in Backend application.</p>
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	<p>Click to view/ input the following.</p> <ul style="list-style-type: none"> • Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. • Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
View Undertaking	Clicking the button enables the user to view all SBLC/Guarantee details.
Signatures	<p>Click the Signature button to verify the signature of the customer/ bank if required.</p> <p>The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.</p> <p>If more than one signature is required, system should display all the signatures.</p>
Request Clarification	Clicking this button allows the user to submit the request for clarification to the "Trade Finance Portal" for the transactions that are initiated offline.

Table 2-16 (Cont.) Additional Details - Action Buttons - Field Description

Field	Description
Reject	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
Refer	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others
Hold	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
Cancel	<p>Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.</p>
Save & Close	<p>Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.</p>
Back	<p>On click of Back, task moves to previous logical step.</p>
Next	<p>On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>

2.3.5 Settlement Details

This topic provides the systematic instructions to capture the settlement details of Guarantee Issuance Closure request.

The user can view the settlement details during Closure of Guarantee/SBLC Issued request.

1. On **Settlement Details** screen, specify the fields.

Figure 2-18 Settlement Details

For more information on fields, refer to the field description table below.

Table 2-17 Settlement Details – Field Description

Field	Description
Current Event	Select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event
Component	This field displays the components based on the product selected.
Currency	This field displays the default currency for the component.
Debit/Credit	This field displays the debit/credit indicators for the components.
Account	This field displays the account details for the components.
Account Description	This field displays the the description of the selected account.
Account Currency	This field displays the currency for all the items based on the account number.
Netting Indicator	This field displays the applicable netting indicator.
Current Event	This field displays the current event.
Original Exchange Rate	System displays the Original Exchange Rate as simulated in settlement details section from OBTF.
Exchange Rate	This exchange rate.
Deal Reference Number	This exchange deal reference number.

2. Click any component in the grid.

Party Details

Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Back	On click of Back, task moves to previous logical step.

Table 2-22 (Cont.) Summary - Action Buttons - Field Description

Field	Description
Submit	<p>Task will get moved to next logical stage of Guarantee Issuance Closure.</p> <p>If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.</p>

2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Guarantee /Standby Issuance Closure request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval

User can review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Open the task to view the summary tiles. The tiles should display a list of important fields with values.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number" to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off
- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.

- Different collateral to be mapped or utilize lines in place of collateral.
- **Reject:** Reject the transaction due to non-availability of sufficient balance in settlement account Amount Bock Exception This section will display the amount block exception details.

Remarks

Currency

GBP

Contract Amount

GBP £90,000.00

Refer Close Proceed

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

5. Open the task and re-key some of the critical field values from the request in the **Approval Re-Key** screen.

Some of the fields below will dynamically be available for re-key.:

- Currency
- Contract Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

6. Click **Proceed** to proceed for the approval.

The **Approval Summary** screen appears. The user can view the Summary tiles which displays list of important fields with values.

7. Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

 **Note:**

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Approval Summary

This section displays the Approval Summary details.

Figure 2-25 Approval Summary

The screenshot shows the Oracle Approval Summary interface for a task titled "Guarantee Issuance Closure Approval Task Level 1 :: Application No:- PK2GTEC000064840". The interface includes a top navigation bar with the Oracle logo, user information (ADMIN01), and various tabs like Documents, Remarks, Overrides, and Customer Instruction.
