## Index

# Preface

- Purpose
- Audience
   This document is intended for the following audience:
- Documentation Accessibility
- Critical Patches
- Diversity and Inclusion
- Structure This manual is organized into the following chapters:
- Related Documents
- Conventions
- Screenshot Disclaimer
- Acronyms and Abbreviations
- Basic Actions
- Symbols and Icons

## Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Import LC Amendment Islamic** process.

## Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

## **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

#### Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## **Critical Patches**

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and BulletinsCritical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security AssuranceOracle Software Security Assurance.

# **Diversity and Inclusion**

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

# **Related Documents**

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

## Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface Boldface type indicates graphical user interface elements asso with an action, or terms defined in text.	
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

# Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

# Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Abbreviation	Description
OBTFPM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange

# Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

#### **Overview**

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels). **Benefits** 

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

#### **Key Features**

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

# 2 Import LC Amendment Islamic

Import LC Amendment Islamic process enables the user to make an amendment to the LC which had been already issued. The common amendments that are made to an Import LC are:

- Expiry date
- Latest Shipment Date
- Increase/Decrease in LC amount
- Tolerance percentage
- Confirmation instruction
- Available with bank
- Port of loading/discharge
- Goods quantity
- Related documents to be submitted

The amendments may need consent from the beneficiary of the amendment. In such scenarios, after the processing of amendment, the amended LC is parked awaiting beneficiary consent.

The various stages involved for Import LC Amendment are:

- Receive and verify documents (Non Online Channel)- Registration stage
- Input amendment application details
- Upload of related mandatory and non-mandatory documents
- Verify documents and capture details (Online/Non Online Channels)- Scrutiny stage
- Input/Modify details of amendment of LC Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks for other users to check and act
- Generate acknowledgements and draft LC copies
- Notify customer on any negative statuses in any of the stages to the applicant I Hand off request to back office

The design, development and functionality of the Islamic Import LC Amendment process flow is similar to that of conventional Import LC Amendment process flow.

This section contains the following topics:

- Common Initiation Stage
- Registration
- Scrutiny

- Data Enrichment
- Customer Response Draft Confirmation
- Exceptions
- Multi Level Approval
- Customer Acknowledgement
- Customer Reject Letter
- #unique\_35
- Common Initiation Stage

This topic provides the systematic instructions to initiate the new Import LC Amendment Islamic request.

Registration

This topic provides the systematic instructions to initiate the registration stage of **Import LC Amendment - Islami**c request.

Scrutiny

This topic provides the systematic instructions to initiate scrutiny stage of import LC amendment Islamic request.

Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of Import LC issuance - Islamic request.

- Customer Response Draft Confirmation This topic helps you quickly get acquainted with the Customer Response - Draft Confirmation process.
- Exceptions
   This topic helps you quickly get acquainted with the Exceptions process.
- Multi Level Approval This topic helps you quickly get acquainted with the Multi Level Approval process.
- Customer Acknowledgement
   This topic helps you quickly get acquainted with the Customer Acknowledgement process.

# 2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new Import LC Amendment Islamic request.

Specify User ID and Password, and login to Home screen.

1. On Home screen, click Trade Finance. Under Trade Finance, click Initiate Task.

The Initiate Task screen is displayed.

Menu Item Search	Q	Initiate Task					
C Trade Finance		Registration

Figure 2-1 Initiate Task

2. On Initiate Task screen, specify the fields.

### Note:

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to field description table below:

 Table 2-1
 Initiate Task - Field Description

Field	Description
Process Name	Select the process name to initiate the task.
LC Reference Number	Select the LC Reference Number.
Branch	Select the branch.

For more information on action buttons, refer to field description table below:

 Table 2-2
 Action Buttons - Field Description

Field	Description
Proceed	Task will get initiated to next logical stage.
Clear	The user can clear the contents update and can input values again.

3. Click Proceed to the next step.

## 2.2 Registration

This topic provides the systematic instructions to initiate the registration stage of **Import LC Amendment - Islami**c request.

At the Registration stage, User can register a request for an Islamic Import LC amendment received at the front desk (as an application received physically/received by mail/fax). During Registration stage, the user captures the basic details of the amendment application, checks the signature of the applicant and uploads the related documents. On submit of the

amendment request, the customer should be notified with acknowledgement and the request should be available for an LC Amendment expert to handle in the next stage. The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E ( of the MT759 and identifies the

Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process. The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

Specify User ID and Password, and login to Home screen.

# Table 2-4 (Cont.) Import LC Amendment - Registration - LC Details - FieldDescription

Field	Description	
Beneficiary	This field displays the beneficiary details of the selected LC and use can amend if required.	
	Note: If the user amend this field and the selected beneficiary/ party is blacklisted the system displays a warning message.	
Accountee	Specify the accountee details.	
Currency Code, Amount	This field displays the value of LC along with the currency details of the selected LC and user can amend if required.	
	Note: If amendment to the Amount (greater than the Export LC outstanding amount), field in the Import LC, system validates the amended value against the Export LC value and display configurable override.	
Percentage Credit Amount Tolerance	This field displays the percentage credit amount tolerance details of the selected LC and user can amend if required.	
Limits/Collateral Required	Read only field. If enabled indicates, limit check during the process flow of this request is available.	
Additional Amount Covered	Specify the details of additional amount covered of the selected LC.	
Amount In Local Currency	Read only field. After the tab out of 'Currency Code, Amount' field, system populates the Local currency and amount value in this field. System fetches the local currency equivalent value for the LC amount from back office (with decimal places).	
Back to Back LC	Read only field. Flag to check if the Import LC is a back to back LC.	
Closure Date	<ul> <li>System default the "Closure Date" value from the previous version of the contract.</li> <li>User can modify the system defaulted "Closure Date" and system should validate the same for the below conditions,</li> <li>Closure Date must be after the Issue Date.</li> <li>Closure Date must be after the Expiry Date.</li> <li>Closure Date cannot be blank, when the "Auto Close" is checked.</li> </ul>	

# Table 2-4 (Cont.) Import LC Amendment - Registration - LC Details - Field Description

4. On Import LC Amendment - Registration - LC Details screen, specify the fields.

### Revolving

The user can enable the Revolving option for revolving LC. The revolving LC can be time based or value based.

a. Click the **Edit** icon besides the **Revolving** field. The **Revolving Details** screen appears.

Revolving		Revolving In		Revolving Frequency	Revolve Units	
No	*		*			~
Next Reinstatement Date		Cumulative		Automatic Reinstatement		

### Table 2-5 Revolving Details

Field	Description
Revolving	Read only field. System displays, if the LC is revolving or not using the slider button.
Revolving In	Read only field. Displays the mode of revolving for the LC. The values are: • Time • Value
Revolving Frequency	Read only field. Displays the value for the frequency in days and months by which the LC revolves.
Revolve Units	Read only field. Displays the units by which the LC revolves.
Next Reinstatement Date	Read only field. Displays the date of next instatement for the LC based on the revolving frequency selected.
Cumulative	Read only field. This option indicates whether the LC value has to be cumulative or not on reinstatement.
Automatic Reinstatement	Read only field. This option indicates whether to have automatic reinstatement on the reinstatement day without manual intervention.

- b. Click **Close** to close the Revolving Details screen.
- 5. Click Submit.

The task will move to next logical stage of Import LC Amendment.

Field	Description
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.
	If more than one signature is available, system should display all the signatures.
Documents	Upload the documents received under the LC.
Remarks	Specify any additional information regarding the LC. This information can be viewed by other users processing the request.
Customer Instruction	<ul> <li>Click to view/ input the following:</li> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>
View LC	Click to view the details of the LC.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancels the Import LC issuance task. Details entered will not be saved and the task will be removed.
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.
Submit	Click Submit, system will trigger acknowledgment to the customer and give confirmation message for successful submission. The task will move to next logical stage of Import LC issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.

For more information on fields, refer to field description table below. In case of MT798, Application Details are defaulted to SWIFT.

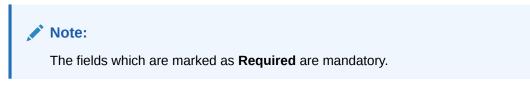

Table 2-7	Main Details - Application Details - Field Description
-----------	--

Field	Description
Documentary Credit Number	Read only field. Documentary Credit Number will be defaulted from <b>Registration</b> stage.
Received From Party	Read only field. Import LC amendment request can be received either from the applicant or the applicant's bank.
Received From - Customer ID	Read only field. Customer ID will be auto-populated based on the selected LC from the lookup.

Field	Description				
Received From - Customer	Read only field.				
	Customer name will be auto-populated based on the selected LC from the lookup.				
Branch	Read only field.				
	Branch details will be auto-populated based on the selected LC from the lookup.				
Amendment No.	Read only field.				
	Amendment number will be auto-populated based on selected LC using documentary credit number. Amendment number increases by 1 for each amendment.				
Process Reference	Read only field.				
Number	Unique OBTFPM task reference number for the transaction.				
	This is auto generated by the system based on process name and branch code.				
Priority	System defaults the Priority as Low/Medium/High based on maintenance. User can change the priority populated any time before submit of Registration stage.				
Submission Mode	Read only field. Submission mode of Import LC Amendment request is defaulted from <b>Registration</b> stage.				
	By default the submission mode will have the value as 'Desk'.				
Application Date	Read only field.				
	This field displays the application date.				
Customer Reference	Read only field.				
Number	Customer Reference number is provided by the applicant/ applicant bank.				
User Reference Number	Read only field. User Reference Number will be auto populated by the system based on selected LC using documentary credit number.				

## Table 2-7 (Cont.) Main Details - Application Details - Field Description

Field	Description
Beneficiary Consent	Beneficiary consent required for the amendment made to the fields.
	Switch on , if amendments are made to the following fields,
	Beneficiary
	Documentary Credit Amount
	Expiry Date
	Tolerance
	Available By
	Tenor
	Mixed/Deferred Payment Detail
	Latest Shipment Date
	Application will display warning message, if the toggle is not enabled
	for the amendments made to the above mentioned fields.
	Switch off , if beneficiary consent is not required for the
	amendments.

### Table 2-7 (Cont.) Main Details - Application Details - Field Description

### LC Details

The fields listed under this section are same as the fields listed under the **LC Details** section in **Registration** stage. During Registration, if user has not captured input, then user can capture the details in this section.

#### Figure 2-18 Deposit Linkage Details

For more information on fields, refer to the field description table below.

Table 2-16 Limit Details - Field Description

Field	Description
View Link	Click View link to view the limit details.
Limit Details	Click View link icon to view the Limit Details.
	Below fields are displayed on the Limit Details pop-up screen, if the user clicks <b>View</b> link.
Customer ID	Read only field. This field displays the applicant's/applicant bank customer ID defaulted from the application.
Linkage Type	Read only field. T linkage type. Linkage type can be: • Facility • Liability

Field	Description
Contribution %	Read only field. System will default this to 100%.
	Once contribution % is provided, system will default the amount.
	System to validate that if Limit Contribution% plus Collateral% is equal to 100. If the total percentage is not equal to 100 application will display an alert message.
Liability Number	Read only field. This field displays the Liability Number.
Contribution Currency	Read only field. This field displays the contribution currency.
Line ID/ Linkage Ref No	Read only field. This field displays the Line ID from the various lines available and mapped under the customer id gets listed in the drop down. LINE ID DESCRIPTION will be available for selection along with Line ID. When you click on 'verify', the system will return value if the limit check was successful or Limit not Available. If limit check fails, the outstanding limit after the transaction value will be shown in the limit outstanding amount.
	<ul> <li>Note:</li> <li>User can also select expired Line ID from the lookup and on clicking the verify button, system should default "The Earmarking cannot be performed as the Line ID is Expired" in the "Response Message" field.</li> <li>This field is disabled and read only, if Linkage Type is Liability.</li> </ul>
Limit/ Liability Currency	Read only field. Limit Currency will be defaulted in this field.
Limits Description	Read only field. This field displays the limits description.
Limit Check Response	Read only field. This field displays the limit check response.
Amount to Earmark	Read only field. Amount to earmark will default based on the contribution %.
Expiry Date	Read only field. This field displays the date up to which the Line is valid.
Limit Available Amount	Read only field.
	This field displays the value of available limit, i.e., limit available without any earmark. The Limit Available Amount must be greater than the Contribution Amount.
Response Message	Read only field.
	This field displays the detailed response message.

<b>Table 2-16</b>	(Cont.) Limit Details - Field Description
-------------------	---

Field	Description
Limit Details grid	Below fields appear in the Limit Details grid along with the above fields.
Line Serial	Read only field.
	Displays the serial of the various lines available and mapped under the customer id.
View	Click the link to view the Limit Details.
Cash Collateral Details	
Collateral Percentage	Read only field. System populates the Collateral % maintained in the Customer / Product for the counter party of the contract.
Collateral Currency and amount	Read only field. System populates the contract currency as collateral currency by default.
Exchange Rate	Read only field. System populates the exchange rate maintained.
	System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.
View	Click View link to view the existing collateral details.
Cash Collateral Details pop-up screen	Click + plus icon to add new collateral details. Below fields are displayed on the <b>Cash Collateral Details</b> pop-up screen, if the user clicks plus icon.
Total Collateral Amount	Read only field. This field displays the total collateral amount provided by the user.
Collateral Amount to be Collected	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.
Sequence Number	Read only field. The sequence number is auto populated with the value, generated by the system.
Collateral Split %	Read only field. Displays the collateral split% to be collected against the selected settlement account.
Collateral Contribution Amount	Read only field. Collateral contribution amount will get defaulted in this field. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Settlement Account	Read only field. Displays the settlement account for the collateral
Settlement Account Currency	Read only field. This field displays the settlement account currency and will be auto- populated based on the Settlement Account.
Exchange Rate	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.

Table 2-16 (Cont.) Limit Details - Field Description

Field	Description
Contribution Amount in Account Currency	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.
Account Available Amount	Read only field. System populates the account available amount.
Response	Read only field. System populates the response.
Response Message	Read only field. System populates the response message.
Cancel	Click to cancel the entry.
Cash Collateral Details grid	Below fields appear in the <b>Cash Collateral Details</b> grid along with the above fields.
Collateral %	Read only field. Displays the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product.
Contribution Amount	Read only field. This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
Account Balance Check Response	Read only field. This field displays the account balance check response.
View	Click View link to view the collateral details.
Deposit Linkage Details	In this section which the deposit linkage details is captured. System should allow the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/modification of existing Linkage by calling Back-office system (DDA) system directly. Click + plus icon to add new Deposit Linkage details.
	Note: New deposit linkage is added in active Import LC amendment (with/without beneficiary confirmation) and amendment where LC status is "closed" and the LC is being reopened (with/without beneficiary confirmation). Below fields are displayed on the <b>Deposit Linkage Details</b> pop-up
	screen, if the user clicks plus icon.
Customer ID	Click <b>Search</b> to search and select the customer ID.

### Table 2-16 (Cont.) Limit Details - Field Description

Field	Description
Deposit Account	Click <b>Search</b> to search and select deposit for linkage from the look- up. All the Deposits of the customer should be listed in the look-up search.
	User should be able to select the deposit for linkage.
Deposit Branch	This field displays the deposit branch which will be auto-populated based on the deposit account selection.
Deposit Available Amount	This field displays the deposit available amount which is auto- populated based on the deposit account selection.
Deposit Maturity Date	This field displays the maturity date of deposit based on the Deposit Account selection.
Exchange Rate	This field displays the latest exchange rate for deposit linkage. This will be picked up from the exchange rate maintenance from the common core.
Deposit Available In Transaction Currency	This field displays the deposit amount available, after exchange rate conversion, if applicable.
Linkage Percentage %	Specify the value for linkage percentage.
Linkage Amount (Transaction Currency)	System to default the transaction amount user can change the value. System validates the linking amount with available Deposit balance and should not allow to link more than the available amount.
Below fields appear in the De	posit Details grid along with the above fields.
Deposit Currency	The currency will get defaulted in this field.
Transaction Currency	The currency will get defaulted in this field from the underlying task.
Edit	Click edit link to edit the deposit linkage details.

The Data Enrichment stage has the following sections for data capture:

#### Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Import LC Amendment Islamic request.

- Availability Shipment
   This topic provides the systematic instructions to capture the availability and shipment
   details.
- Documents and Conditions

This topic provides the systematic instructions to capture the details of the documents received.

• Payment Details

This topic provides the systematic instructions to initiate the Payment Data Enrihment stage of import LC amendment request.

- Amendment Details This topic provides the systematic instructions to capture the amendment details.
- Additional Fields This topic provides the systematic instructions to capture the additional fields.
- Advices This topic provides the systematic instructions to capture the advices details.
- Additional Details This topic provides the systematic instructions to capture the additional details
- Settlement Details
   This topic provides the systematic instructions to capture the settlement details of Import LC Amendment Islamic request.

#### Summary

This topic provides the systematic instructions to view the summary of import LC amendment request.

# 2.4.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of Import LC Amendment Islamic request.

Main details section has two sub section as follows:

- Application Details
- LC Details

#### **Application Details**

All fields displayed under **Application Details** section are same as the fields listed under the **LC Details** section in **Scrutiny** stage.

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

2. Click Next.

The task will move to next data segment.

# 2.4.3 Documents and Conditions

This topic provides the systematic instructions to capture the details of the documents received.

As part of document and conditions screen in DE stage, user must provide the required documents and additional conditions (if applicable) in this section. Document and Conditions section has two sub section as follows:

- Documents Details
- LC Details.

#### **Document Details**

Based on the 'Product' selected, Application will default the documents required under the LC. User can edit the details, delete an existing document and also add additional documents to the defaulted list.

### Note:

Insurance document is available in Documents Details section, if value in the 'INCO Term' field is not 'CFR', 'FOB', 'FCA', 'FAS' or 'EXW' in the Availability stage. If not system gives the warning message.

Online Channel - System will default the details received in the Description column. Based on the details populated, user can pick corresponding values for document code, originals and copy.

Non Online Channel - User can further edit (add or remove) the documents or document description as per requirement. Application will display an alert message, if both Bill Of lading" and 'Airway Bill' are chosen.

1. On Data Enrichment - Document and Conditions screen, specify the fields.

Figure 2-26 Data Enrichment - Documents and Conditions

For more information on fields, refer to the field description table below.

Table 2-22 Documents and Conditions - Field Description

Field	Description
Document Details	Specify the <b>Document Details</b> . The user can click + to add multiple Document Details.
Code	Click <b>Search</b> to search and select the document code based on the document received.
	User can add or delete the code by deleting the line on the grid.
Document Description	System dispalys the document description based on the document code selection. User can edit the description by clicking the edit icon.
Сору	Specify the number copies received from the Drawer. User can edit the actual copies received.
Original	Specify the number of original documents received from the Drawer. User can edit the actual originals received.
Clause Details	System displays the clause details. User can view and edit the clause description by clicking the link.
Original Doc. Required	System defaults the value to display whether the original document is required or not. The user can enable the option, if document is required.

Field	Description
Action	Click Edit icon to edit the document details.
	Click Delete icon to delete the document details.

### Table 2-22 (Cont.) Documents and Conditions - Field Description

### Additional Conditions

Additional Conditions section displays the conditions of the issued LC and can be amended if required.

Online Channel - System will default the details received in the description column. System will parse the additional conditions required field into multiple line items based on line delimitter (+) and shall populate each line item as a separate description. User can read the description and make any changes required to the description, also must be able to add more conditions.

Non Online Channel - User can use FFT to capture additional conditions and can edit the description populated from FFT. You should also be able to add additional FFT.

For more information on fields, refer to the field description table below.

#### Table 2-23 Additional Conditions - Field Description

Field	Description
FFT Code	Click <b>Search</b> to search and select the FFT code. The user can click + to add multiple Additional Conditions.
FFT Description	System dispalys the document name based on the document code selection.
Action	Click Edit icon to edit the additional condition details. Click Delete icon to delete the additional condition details.

### 2. Click Next.

The task will move to next data segment.

Table 2-24 Do	cument and Conditions	- Action Buttons	- Field Description
---------------	-----------------------	------------------	---------------------

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	View/Upload the required document. Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application

Field	Description
Remarks	Specify any additional information regarding the lc amendment. This information can be viewed by other users processing the request.
	Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instructions	<ul> <li>Click to view/ input the following</li> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPM user</li> </ul>
	can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Incoming Message	This button displays the multiple messages (MT760 + up to 7 MT761 In case of MT798, the User can click and view the MT798 message(770,700/701).
View LC	Click to view the details of the LC.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.
	If more than one signature is available, system should display all the signatures.
Request Clarification	Specify the clarification details for requests received online.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task.
	This option is used, if there are any pending information yet to be received from applicant.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.
	Reject Codes are:
	R1- Documents missing
	<ul><li>R2- Signature Missing</li><li>R3- Input Error</li></ul>
	R4- Insufficient Balance/Limits
	R5 - Others
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

# Table 2-24 (Cont.) Document and Conditions - Action Buttons - Field Description

Field	Description
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	R1- Documents missing
	R2- Signature Missing
	R3- Input Error
	R4- Insufficient Balance/Limits
	R5 - Others
Back	On click of Back, system moves the task back to previous data segment.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

## Table 2-24 (Cont.) Document and Conditions - Action Buttons - Field Description

# 2.4.4 Payment Details

This topic provides the systematic instructions to initiate the Payment Data Enrihment stage of import LC amendment request.

1. On **Data Enrihment - Payment Details** screen, specify the fields.

Field	Description
Instruction Description	Instruction description is populated based on the instruction code selected. User can edit the instruction description.
	Click edit icon to edit the existing instruction description.
Action	Click delete icon to remove any existing instruction code. Click edit icon to edit the existing instruction code.

### 2. Click Next.

The task will move to next data segment. For more information on fields, refer to the field description table below.

## Table 2-26 Advices - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.

Field	Description							
Documents	View/Upload the required document.							
	Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application							
Remarks	Specify any additional information regarding the lc amendment Islamic. This information can be viewed by other users processing the request.							
	Content from Remarks field should be handed off to Remarks field in Backend application.							
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.							
Overrides	Click to view the overrides accepted by the user.							
Customer Instructions	<ul> <li>Click to view/ input the following</li> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>							
Incoming Message	This button displays the multiple messages (MT760 + up to 7 MT767 In case of MT798, the User can click and view the MT798 message(770,700/701).							
View LC	Click to view the details of the LC.							
Signature	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.							
Request Clarification	Specify the clarification details for requests received online.							
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.							
Cancel	Cancel the Data Enrichment stage inputs. The details updated in thi stage are not saved. The task will be available in 'My Task' queue.							
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task.							
	This option is used, if there are any pending information yet to be received from applicant.							

# Table 2-26 (Cont.) Advices - Action Buttons - Field Description

Field	Description								
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.								
	Reject Codes are:								
	<ul> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul>								
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.								
Refer	Select a Refer Reason from the values displayed by the system.								
	Refer Codes are:								
	<ul> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul>								
Back	On click of Back, system moves the task back to previous data segment.								
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

4. Click **Save and Close** to save the details and close the screen.

#### **Preview Messages**

User can view the draft LC amendment message (outgoing MT707 SWIFT message format) being displayed on the preview message text box.

A copy of draft LC amendment can be sent for customer confirmation and the same can be done by choosing the customer response toggle as 'yes'. The Draft MT707 message along with up to seven MT708 messages is sent to the applicant by Email as an attachment to the customer.

On submit, the message will be sent to the customer. The task will be moved to 'pending customer response 'stage. Upon receipt of customer's confirmation, the transaction moves to approval.

In case the customer has requested for changes, the transaction will move to Data Enrichment and once the necessary changes made, the request moves to approval stage.

# Note:

A bank user can share the Draft SWIFT message to the customer through email, before the actual transmission of SWIFT message to the Advising Bank.

5. Click Save and Close to save the details and close the screen.

#### **FX Linkage**

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted

average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

For more information on fields, refer to the field description table below.

Field	Description
Current Event	Select the check box to populate the settlement details of the current event associated with the task. On De-selecting the check box, the system list all the accounts under the settlement details irrespective of the current event
Component	This field displays the components based on the product selected.
Currency	This field displays the default currency for the component.
Debit/Credit	This field displays the debit/credit indicators for the components.
Account	This field displays the account details for the components.
Account Description	This field displays the the description of the selected account.
Account Currency	This field displays the currency for all the items based on the account number.
Netting Indicator	This field displays the applicable netting indicator.
Current Event	This field displays the current event.

 Table 2-29
 Settlement Details – Field Description

2. Click Next.

The task will move to next data segment.

### Table 2-30 Settlement Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.

Field	Description			
Documents	View/Upload the required document.			
	Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application			
Remarks	Specify any additional information regarding the LC amendment Islamic. This information can be viewed by other users processing the request.			
	Content from Remarks field should be handed off to Remarks field in Backend application.			
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.			
Overrides	Click to view the overrides accepted by the user.			
Customer Instructions	<ul> <li>Click to view/ input the following</li> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPM use can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>			
Incoming Message	This button displays the multiple messages (MT760 + up to 7 MT76) In case of MT798, the User can click and view the MT798 message(770,700/701).			
View LC	Click to view the details of the LC.			
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.			
Request Clarification	Specify the clarification details for requests received online.			
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.			
Cancel	Cancel the Data Enrichment stage inputs. The details updated in th stage are not saved. The task will be available in 'My Task' queue.			
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task.			
	This option is used, if there are any pending information yet to be received from applicant.			

Table 2-30	(Cont.) Settlement Details - Action Buttons - Field Description

Tiles Displayed in Summary

- Main Details User can view the application and LC details and modify the details if required.
- Availability Shipment User can view and modify availability and shipment details, if required.
- Documents and Conditions User can view and modify the documents required grid and the additional conditions grid, if required.
- Payment Details User can view and modify all details related to payments, if required.
- Amendment Details User can view the amended details of the issued LC.
- Additional Fields User can view the details of additional fields, if required.

- Advices User can view and modify the advice details, if required.
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Commission and Charges and Taxes User can view and modify commission, charge and tax details, if required.
- Revolving Details User can view revolving details on revolving LC, if applicable.
- Settlement Details User can view and modify settlement details, if required.
- Preview Messages User can view and modify preview details, if required.
- Parties Details User can view and modify party details like beneficiary, advising bank etc., if required.
- Compliance Details User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Accounting Details User can view the accounting entries generated in back office.

### Note:

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries.

- FX Linkage User can view and modify the details of FX Linkage, if required.
- 2. Click Submit.

The task will move to next logical stage. For more information on action buttons, refer Table 2-20 of **Scrutiny** stage.

# 2.5 Customer Response - Draft Confirmation

This topic helps you quickly get acquainted with the Customer Response - Draft Confirmation process.

The user can review and handle the customer's response received for the draft confirmation for LC amnedment Islamic transactions, which is sent to the customer for their verification and confirmation. The OBTFPM system sends Draft MT700 along with up to seven MT701 messages as attachment to the customer.

The Transaction Reference Number is masked, before sending the Draft Import LC for Customer approval.

The customer response can be received both by online and offline mode. In non-online mode, user receives the response in the branch.

In online mode the customer will share their response online that will be automatically updated in the customer response field in the task, which is available in the customer response pending stage.

#### Customer Response

This topic helps you quickly get acquainted with the Customer Response.

# 2.5.1 Customer Response

This topic helps you quickly get acquainted with the Customer Response.

1. Log in into OBTFPM application and acquire the task to see customer response screen.

Language - Read only field

Draft Message - Read only field.

### **Draft Confirmation**

Draft Confirmation required - Read only field

Customer Response - This field will be available for you to update any of the below response based on the customer's reply

- Accepted
- · Changes Required Change and proceed

For non-online response – User can select customer response from one of the three drop list values mentioned above.

For Online response – Read only

Customer Remarks - Capture the remarks of the customer.

Response Date - Non-Online channel – Update the date on which the customer response has been received.

Online Channel – Read only

### Summary

Tiles Displayed in Summary:

- Main Details User can view the application and LC details and modify the details if required.
- Availability User can view and modify availability and shipment details, if required.
- · Payment User can view and modify all details related to payments, if required.
- Documents and Conditions User can view and modify the documents required grid and the additional conditions grid, if required.
- Additional Fields User can view the details of additional fields.
- Advices User can view and modify the details of additional fields.
- Revolving Details User can view and modify revolving details on revolving LC, if applicable
- Limits and Collaterals User can view and modify limits and collateral details, if required.
- Commission and Charges and Taxes User can view and modify commission, charge and tax details, if required.
- Preview Messages User can view the preview messages.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

• Accounting Details - User can view the accounting entries generated in back office.

### Note:

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries.

- FX Linkage User can view and modify the details of FX Linkage, if required.
- Insurance Details User can view and modify insurance details, if required.
- Settlement Details User can view and modify settlement details, if required.
- Tracer Details User can view and modify tracer details, if required.

For more information on Action Buttons, refer to the field description table below.

Field	Description			
Documents	View/Upload the documents uploaded in the system and upload documents if customer response has been received through non- online channel.			
Remarks	Specify the remarks, if required and must be able to view the remarks captured during earlier stages.			
Cancel	Cancel the Draft Confirmation.			
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task.			
	This option is used, if there are any pending information yet to be received from applicant.			
Reject	<ul> <li>On click of Reject, user must select a Reject Reason from a list displayed by the system.</li> <li>Reject Codes are: <ul> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul> </li> <li>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</li> </ul>

Field	Description
Submit	On submit, task moves to the next logical stage of Import LC Issuance. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

# 2.6 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Import LC Amendment Islamic request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

### **Exception - Amount Block**

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should hand-off the "Amount Block Reference Number "to the back office. On successful hand-off, back office will make use of these "Amount Block

Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account.

#### **Amount Bock Exception**

This section will display the amount block exception details.

Back	Task moves to previous logical step.

### Table 2-34 (Cont.) Exception - Limit Check/Credit - Action Buttons – Field Description

# 2.7 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

**1.** Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

## Note:

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

### Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
