# Preface

- [Introduction](#)
- [Audience](#)  
This document is intended for the following audience:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Structure](#)  
This manual is organized into the following chapters:
- [Related Documents](#)
- [Conventions](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols and Icons](#)

## Introduction

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management 'Import LC Internal Amendment - Islamic' process.

## Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### **Access to Oracle Support**

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance [Oracle Software Security Assurance](#).

## Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

## Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

## Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

**Table 1 Acronyms and Abbreviations**

Abbreviation	Description
OBTFFPM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

## Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

**Table 2 Common Action Buttons and its Definitions**

Action Buttons	Description
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>

Table 2 (Cont.) Common Action Buttons and its Definitions

Action Buttons	Description
<b>Refer</b>	Select a Refer Reason from the values displayed by the system.  Refer Codes are: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Hold</b>	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.  This option is used, if there are any pending information yet to be received from applicant.
<b>Cancel</b>	Click <b>Cancel</b> to cancel the transaction input midway without saving any data.
<b>Save &amp; Close</b>	Click <b>Save &amp; Close</b> to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Next</b>	Click <b>Next</b> , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
<b>Submit</b>	Click <b>Submit</b> to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

## Symbols and Icons

## Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

### Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

### Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

### Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

# 2

## Import LC Internal Amendment - Islamic

Conventional Import LC Internal Amendment enables the user to make the following amendments to the LC which had been already issued.

The common amendments that are made to an Import LC are:

- Change in Limits
- Change in Collateral

The various stages involved for Import LC Internal Amendment are:

- Receive and verify documents and input the basic details (Non Online Channel)-Registration stage
- Input/Modify details - Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks for other users to check and act
- Generate acknowledgements.
- Hand off request to back office

The design, development and functionality of the Islamic Import LC Internal Amendment process flow is similar to that of conventional Import LC Amendment process flow.

This topic contains following subtopics:

- [Common Initiation Stage](#)  
This topic provides the systematic instructions to initiate the new **Import LC Internal Amendment - Islamic** request.
- [Registration](#)  
This topic provides the systematic instructions to initiate the Registration stage of **Import LC Internal Amendment - Islamic** request.
- [Data Enrichment](#)  
This topic provides the systematic instructions to initiate the Data Enrichment stage of import lc internal amendment request.
- [Exceptions](#)  
This topic helps you quickly get acquainted with the Exceptions process.
- [Multi Level Approval](#)  
This topic helps you quickly get acquainted with the Multi Level Approval process.

### 2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new **Import LC Internal Amendment - Islamic** request.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Trade Finance**. Under **Trade Finance**, click **Initiate Task**.  
The **Initiate Task** screen appears.

**Figure 2-1 Initiate Task**

2. On **Initiate Task** screen, specify the fields.

 **Note:**

The fields which are marked as **Required** are mandatory.

For more information on fields, refer to the field description table below.

**Table 2-1 Initiate Task - Field Description**

Field	Description
<b>Process Name</b>	Select a process name from the drop-down list.
<b>LC Reference Number</b>	Click <b>Search</b> to search and select the LC reference number.
<b>Branch</b>	Select the required branch code from the drop-down list.

For more information on action buttons, refer to the field description table below.

**Table 2-2 Action Buttons - Field Description**

Field	Description
<b>Proceed</b>	Task will get initiated to next logical stage.
<b>Clear</b>	Click to clear the contents update and enter the values again.

3. Click **Proceed** to proceed to the next step.

## 2.2 Registration

This topic provides the systematic instructions to initiate the Registration stage of **Import LC Internal Amendment - Islamic** request.

User can register request of new Import LC internal amendment received at the front desk through branch either by fax, mail, or physical application form, the Import LC internal amendment process starts from the Registration Stage.

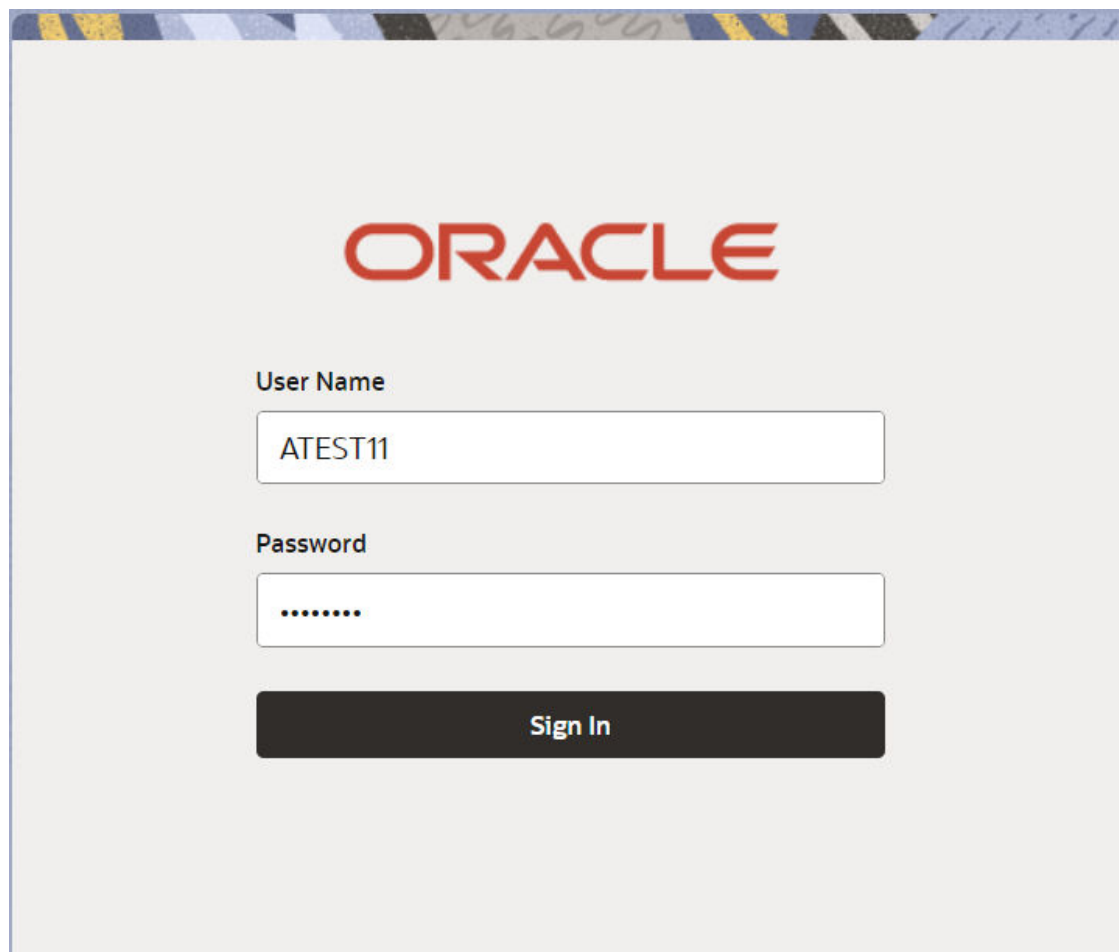

During Registration stage, user can capture the basic details of the amendment application, check the signature of the applicant and upload the related documents of the applicant. On submit of the request, the customer will be notified with an acknowledgment and the request will be available for an LC expert to handle the request in the next stage.

The OBTFPM user can process MT798 with sub messages MT726-MT759 message received through SWIFT. The OBTFPM verifies the field 21 and 26E ( of the MT759 and identifies the Original Contract Reference Number and Amendment Number and invokes the process. The user can cancel the previously received MT798 referenced message which is under process.

The OBTFPM user can process incoming MT798(up to a maximum of 8 messages) with sub messages MT788-MT799 message received through SWIFT and enables the user to cancel the previously received MT798 referenced message which is under process.

Specify **User ID** and **Password**, and login to **Home** screen.

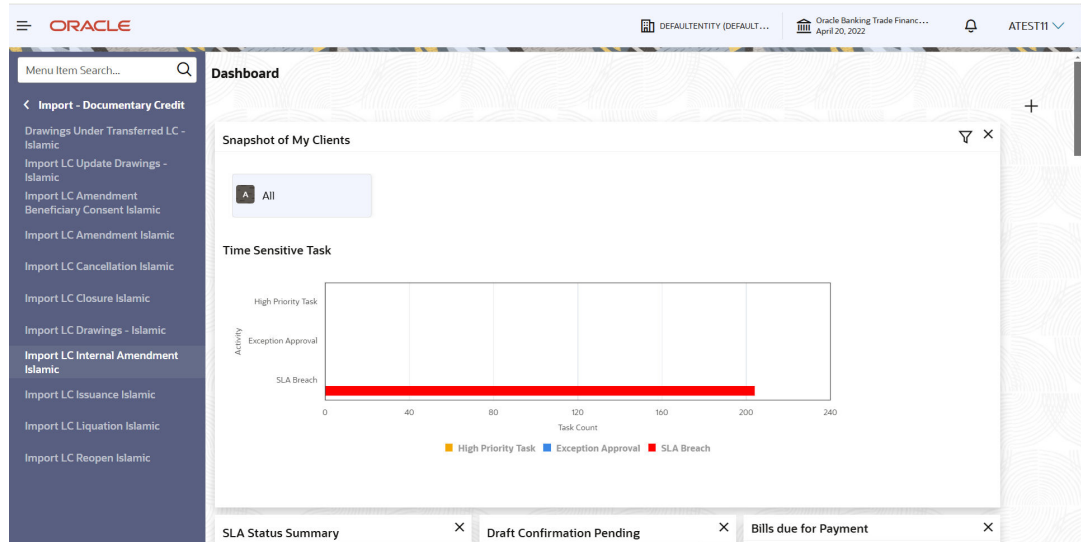

**Figure 2-2** LogIn Screen

The screenshot shows the Oracle login interface. At the top center is the Oracle logo in red. Below it, the text "User Name" is followed by a text input field containing "ATEST11". Underneath that, the text "Password" is followed by a text input field containing seven dots. At the bottom of the form is a dark grey button with the text "Sign In" in white.

1. On **Home** screen, click **Trade Finance - Islamic**. Under **Trade Finance - Islamic**, click **Import Documentary Credit**.
2. Under **Import Documentary Credit**, click **Import LC Internal Amendment - Islamic**.

**Figure 2-3 Import LC Internal Amendment - Islamic**

The checklist items under Registration Stage are: Application signed and stamped Customer signature verified Any correction or alteration initialed by the applicant.

- [Bi-Directional Flow for Offline Transactions Initiated from OBTFPM](#)  
This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

## 2.2.1 Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer.

### **Pre- Conditions:**

- Customer Maintenance details are replicated from OBTF to OBTFPM.

- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
1. Customer Maintenance details are replicated from OBTF to OBTFPM.
  2. In OBTFPM, user clicks **Request Clarification**, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is “Online”. In case submission mode is “Online”, the user can enter the clarification details in “Clarification Required” placeholder.
  3. In case submission mode is not “Online”, the system will validate if the counterparty is a OBDX customer by checking the flag “Trade Finance Portal” in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
  4. In case submission mode is not “Online”, and if the “Trade Finance Portal” flag is set to ‘No’ in Customer Maintenance Table, the system should display the error message that ‘The customer is not subscribed to Trade Finance Portal’. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

## 2.3 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of import LC internal amendment request.

On successful completion of Registration of an Import LC internal amendment - Islamic, the task moves to Data Enrichment stage. As part of Data Enrichment, user can enter/update basic details of the amendment request and can verify if the request can be progressed further.

**Non-Online Channel** - Internal LC Amendment request that were received at the desk will move to Data Enrichment stage post successful Registration. The transaction will have the details entered during the Registration stage.

**Online Channel** - Requests that are received via SWIFT (MT730) are available directly for further processing in OBTFPM from Data Enrichment stage and relevant data should be auto populated.

For MT 730, system should validate the incoming MT 730 based on Related Reference field to identify whether it is Acknowledgment for Import LC or Export LC. If the MT 730 is for Import LC, system should process the MT 730 under Internal Amendment to Import LC.

 **Note:**

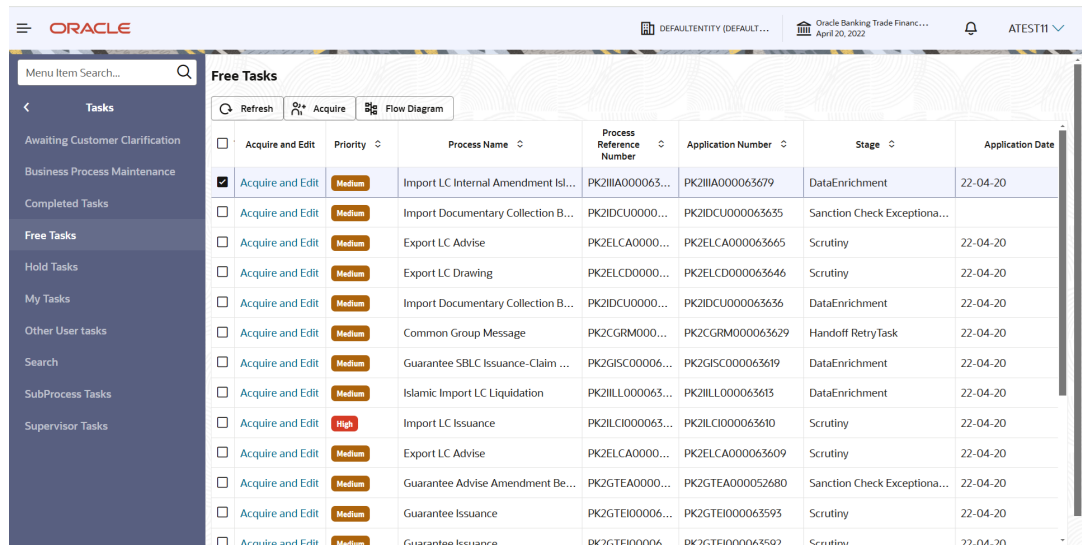

For expired line of limits, the task moves to “Limit Exception” stage under Free Tasks, on ‘Submit’ of DE Stage with the reason for exception as “Limit Expired”.

Do the following steps to acquire a task currently at Data Enrichment stage:

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click, **Tasks**.
2. Under **Tasks**, click **Free Tasks**.

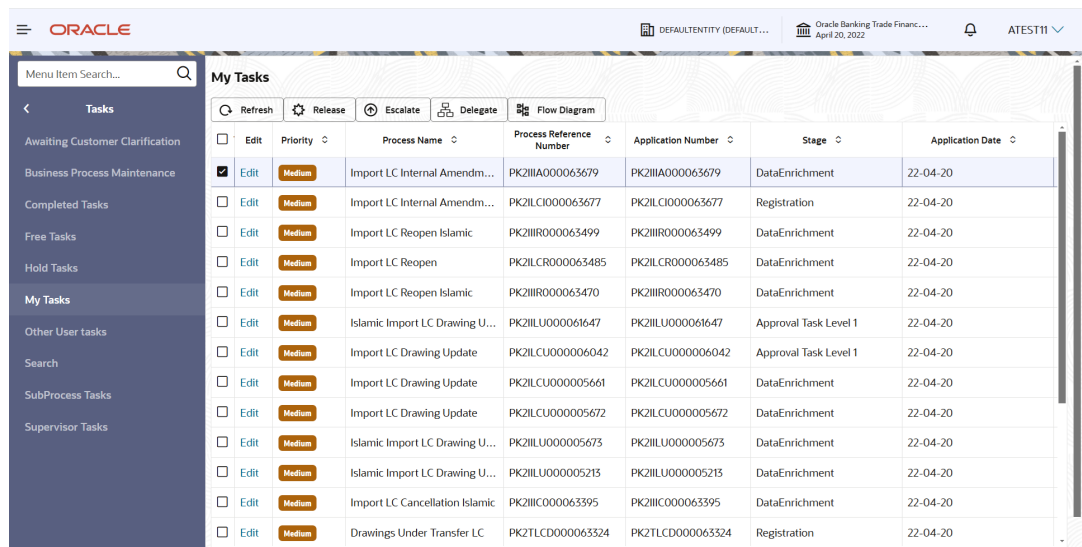

**Figure 2-5 Free Tasks**

The **Free Tasks** gets displayed.

3. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.
4. The acquired task will be available in **My Tasks** tab. Click **Edit** to scrutinize the registered task.

**Figure 2-6 My Tasks**

Let's look at the details for Data Enrichment stage. User can enter/update basic details of the incoming request. Do the following steps to acquire a task at Data Enrichment stage. The Data Enrichment stage has the following hops for data capture:

- **Main Details**  
This topic provides the systematic instructions to initiate the Data Enrichment stage of **Import LC Internal Amendment - Islamic** request.
- **Acknowledgement Details**  
This topic provides the systematic instructions to capture the acknowledgement details.

- [Additional Fields](#)  
This topic provides the systematic instructions to capture the additional fields.
- [Advices](#)  
This topic provides the systematic instructions to capture the advices details.
- [Additional Details](#)  
This topic provides the systematic instructions to capture the additional details.
- [Settlement Details](#)  
This topic provides the systematic instructions to capture the settlement details of **Import LC Internal Amendment - Islamic** request.
- [Summary](#)  
This topic provides the systematic instructions to view the summary of **Import LC Internal Amendment - Islamic** request.

## 2.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of **Import LC Internal Amendment - Islamic** request.

Main details section has two sub section as follows:

- Application Details
- LC Amendment Details.

### **Application Details**

All fields displayed under main details section, would be read only except the **Priority**. For more information on the fields, refer **Application Details** of **Registration** stage .

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

S.No	Stage Name	Pickup Time	Completed Time	Completed By	Outcome
1	Registration	Tue, 26 Nov 2024 06:05:29 GMT	Tue, 26 Nov 2024 07:16:15 GMT	ADMIN01	PROCEED

This button provides information about user initiated the transaction, initiated date, stage wise detail etc.

For more information on fields, refer to the field description table below.

**Table 2-8 Audit - Field Description**

Field	Description
<b>Application No.</b>	This field displays the application number of the process.
<b>Branch Code</b>	This field displays the branch code.
<b>Initiated Date</b>	This field displays the date on which process is initiated.
<b>Initiated By</b>	This field displays the user ID of the user who had initiated the process.
<b>Process Name</b>	This field displays the name of the process which is initiated.
<b>S. No</b>	This field displays the serial number of the audit record.
<b>Stage Name</b>	This field displays the current stage of the process.
<b>Completed Time</b>	This field displays the time on which the audit of the current stage is completed.
<b>Completed By</b>	This field displays the user ID of the user who had completed the audit.
<b>Outcome</b>	This field displays the outcome of the audit.

2. Click **Next**.

The task will move to next data segment.

**Table 2-9 Main Details - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
<b>Documents</b>	Click to View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
<b>Remarks</b>	Specify any additional information regarding the LC internal amendment. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the various overrides that have been generated and accepted.
<b>Customer Instructions</b>	Click to view/ input the following <ul style="list-style-type: none"> <li>• <b>Standard Instructions</b> – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>• <b>Transaction Level Instructions</b> – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>

Table 2-9 (Cont.) Main Details - Action Buttons - Field Description

Field	Description
<b>Common Group Message</b>	Click Common Group Message button, to send MT799, MT999, MT759 and MT79-1,2,5,6,798 messages from within the task.
<b>Incoming Message</b>	This button displays the multiple messages (MT760 + up to 7 MT761. In case of MT798, the User can click and view the MT798 message(770,700/701).
<b>View LC</b>	Click to view the details of the LC.
<b>Signatures</b>	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
<b>Hold</b>	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.  This option is used, if there are any pending information yet to be received from applicant.
<b>Reject</b>	On click of Reject, user must select a Reject Reason from a list displayed by the system.  Reject Codes are: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
<b>Refer</b>	Select a Refer Reason from the values displayed by the system.  Refer Codes are: <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Next</b>	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

## 2.3.2 Acknowledgement Details

This topic provides the systematic instructions to capture the acknowledgement details.

User can scrutinize the incoming MT730 details of an Internal LC amendment request for the different fields under the respective data segments. The user can verify and enter the basic details available in the LC Internal amend request.

At this stage the incoming MT730 details are auto populated. If required, the MT 730 details can also be entered by the user.

1. On **Data Enrichment - Acknowledgement Details** screen, specify the fields.

**Figure 2-9 Acknowledgement Details**

As part of amendment, user can change the values available in the fields based on the description in the following table.

**Table 2-10 Acknowledgement Details**

Field	Description
<b>MT730- Acknowledgement Received</b>	Specify the MT730- Acknowledgement Received details based on the description of following table:
<b>Advising Bank Reference</b>	Specify the advising bank reference details, in case of <b>Non Online</b> channel. This field is read only, in case of <b>Online</b> channel. Details received from the online request/ Incoming MT730 will get auto populated.
<b>Account Identification</b>	Specify or click <b>Search</b> to search and select the account identification details.
<b>Date of Acknowledgement</b>	Select the date of acknowledgement, in case of <b>Non Online</b> channel. This field is read only, in case of <b>Online</b> channel. Details received from the online request/ Incoming MT730 will get auto populated.

**Table 2-10 (Cont.) Acknowledgement Details**

Field	Description
<b>Amount of Charges</b>	Specify the amount of charges and select the currency code, in case of <b>Non Online</b> channel. This field is read only, in case of <b>Online</b> channel. System defaults the amount of charge from the incoming MT730 received.
<b>Account with Bank</b>	Specify the account with bank details, or click <b>Search</b> to search and select the account with bank details, in case of <b>Non Online</b> channel. This field is read only, in case of <b>Online</b> channel. System defaults the account with bank details from the incoming MT730 received.
<b>Charges</b>	Specify the charge details, in case of <b>Non Online</b> channel. This field is read only, in case of <b>Online</b> channel. System defaults the charges from the incoming MT730 received. User can manually enter the details if not processed as STP.
<b>Sender to Receiver Information</b>	Specify the sender to receiver information, in case of <b>Non Online</b> channel. This field is read only, in case of <b>Online</b> channel. System defaults the sender to receiver information from the incoming MT730 received
<b>Narrative</b>	Specify the narrative, in case of <b>Non Online</b> channel. This field is read only, in case of <b>Online</b> channel. System defaults the Narrative from the incoming MT730 received.

2. Click **Next**.

The task will move to next data segment.

**Table 2-11 Acknowledgement Details - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
<b>Documents</b>	Click to View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
<b>Remarks</b>	Specify any additional information regarding the LC internal amendment. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the various overrides that have been generated and accepted.

Table 2-11 (Cont.) Acknowledgement Details - Action Buttons - Field Description

<b>Instructions</b>	Specify the instruction details based on the following table. Click plus icon to add new instruction code.
<b>Instruction Code</b>	Click <b>Search</b> to search and select the instruction code as a part of free text.
<b>Instruction Description</b>	This field displays the instruction description based on the instruction code selected. User can edit the instruction description.
	Click edit icon to edit the existing instruction description.
<b>Action</b>	Click Edit icon to edit the instruction code. Click Delete icon to delete the instruction code.

2. Click **Next**.

The task will move to next data segment.  
For more information on fields, refer to the field description table below.

**Table 2-14 Advices - Action Buttons - Field Description**

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
<b>Documents</b>	Click to View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
<b>Remarks</b>	Specify any additional information regarding the Imort LC Internal Amendment. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the overrides accepted by the user.
<b>Customer Instruction</b>	Click to view/ input the following <ul style="list-style-type: none"> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.</li> </ul>
<b>Common Group Messages</b>	Click Common Group Message button, to send MT799, MT999, MT759 and MT79-1,2,5,6,7,98 messages from within the task.
<b>Incoming Message</b>	This button displays the multiple messages (MT760 + up to 7 MT761. In case of MT798, the User can click and view the MT798 message(770,700/701).
<b>View LC</b>	Click to view the details of the LC.
<b>Signatures</b>	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.  If more than one signature is available, system should display all the signatures.
<b>Request Clarification</b>	Submit the request for clarification to the "Trade Finance Portal" for the transactions initiated offline.
<b>Save &amp; Close</b>	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
<b>Cancel</b>	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.

**Table 2-14 (Cont.) Advices - Action Buttons - Field Description**

Field	Description
<b>Hold</b>	<p>The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.</p> <p>This option is used, if there are any pending information yet to be received from applicant.</p>
<b>Reject</b>	<p>On click of Reject, user must select a Reject Reason from a list displayed by the system.</p> <p>Reject Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul> <p>Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.</p>
<b>Refer</b>	<p>Select a Refer Reason from the values displayed by the system.</p> <p>Refer Codes are:</p> <ul style="list-style-type: none"> <li>• R1- Documents missing</li> <li>• R2- Signature Missing</li> <li>• R3- Input Error</li> <li>• R4- Insufficient Balance/Limits</li> <li>• R5 - Others</li> </ul>
<b>Back</b>	<p>On click of Back, system moves the task back to previous data segment.</p>
<b>Next</b>	<p>On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.</p>

## 2.3.5 Additional Details

This topic provides the systematic instructions to capture the additional details.

1. On **Additional Details** screen, click  on any Additional Details tile to view the details.

Figure 2-12 Additional Details

2. Click **Save and Close** to save the details and close the screen.

### Limits and Collaterals

On Approval, system should not release the Earmarking against each limit line and system should handoff the “Limit Earmark Reference Number “to the back office. On successful handoff, back office will make use of these “Limit Earmark Reference Number” to release the Limit Earmark done in the mid office (OBTFFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office. Provide the Limit Details based on the description in the following table.

Figure 2-13 Limit Details

If limit check fails, the outstanding limit after the transaction value will be shown in the limit outstanding amount.</p> <p>The user can click the Line Id link to view the limit details.</p> <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> <b>Note:</b></p> <p>User can also select expired Line ID from the lookup and on clicking the verify button, system should default “The Earmarking cannot be performed as the Line ID is Expired” in the “Response Message” field.</p> </div> <p>This field is disabled and read only, if <b>Linkage Type</b> is Liability.</p>
<b>Limit/Liability Currency</b>	<p>Read only field.</p> <p>This field displays the limit currency, when the user select the <b>Liability Number</b>.</p>
<b>Limits Description</b>	<p>Read only field.</p> <p>This field displays the limits description.</p>

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
<b>Limit Check Response</b>	Read only field. This field displays the limit check response. Response can be 'Success' or 'Limit not Available' based on the limit service call response. The value in this field appears, if you click the <b>Verify</b> button.
<b>Amount to Earmark</b>	This field defaults the amount to earmark. Contribution amount will default based on the contribution %. User can change the value.
<b>Expiry Date</b>	Read only field. This field displays the date up to which the Line is valid.
<b>Limit Available Amount</b>	Read only field. This field displays the value of available limit, i.e., limit available without any earmark. The Limit Available Amount must be greater than the Contribution Amount. The value in this field appears, if you click the <b>Verify</b> button.
<b>Response Message</b>	Read only field. This field displays the detailed response message. The value in this field appears, if you click the <b>Verify</b> button.
<b>ELCM Reference Number</b>	Read only field. This field displays the ELCM reference number.
<b>Limit Details grid</b>	Below fields appear in the <b>Limit Details</b> grid along with the above fields.
<b>Line Serial</b>	Displays the serial of the various lines available and mapped under the customer id.
<b>Edit</b>	Click the link to edit the <b>Limit Details</b> .
<b>Cash Collateral Details</b>	Specify the Collateral details based on the description of following table:
<b>Collateral Percentage</b>	System populates the Collateral % maintained in the Customer / Product for the counter party of the contract. User can modify the collateral percentage. Specify the percentage of collateral to be linked to this transaction. If the value is more than 100% system will display an alert message. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
<b>Collateral Currency and amount</b>	System populates the contract currency as collateral currency by default. User can modify the collateral Currency and amount.
<b>Exchange Rate</b>	System populates the exchange rate maintained. System validates for the Override Limit and the Stop limit if defaulted exchange rate is modified.
<b>Collateral Details</b>	Below fields are displayed on the <b>Collateral Details</b> pop-up screen, if the user clicks plus icon.
<b>Total Collateral Amount</b>	Read only field. This field displays the total collateral amount provided by the user.
<b>Collateral Amount to be Collected</b>	Read only field. This field displays the collateral amount yet to be collected as part of the collateral split.

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
<b>Sequence Number</b>	Read only field. The sequence number is auto populated with the value, generated by the system.
<b>Collateral Split %</b>	Specify the collateral split% to be collected against the selected settlement account.
<b>Collateral Contribution Amount</b>	Specify the collateral amount to be collected against the selected settlement account. User can either provide the collateral % where the collateral amount will be auto populated or modifying the collateral amount will auto correct the collateral %.
<b>Settlement Account</b>	Click <b>Search</b> to search and select the settlement account for the collateral.
<b>Settlement Account Currency</b>	Read only field. This field displays the settlement account currency defaulted by the system.
<b>Exchange Rate</b>	Read only field. This field displays the exchange rate, if the settlement account currency is different from the collateral currency.
<b>Contribution Amount in Account Currency</b>	Read only field. This field displays the contribution amount in the settlement account currency as defaulted by the system.
<b>Account Available Amount</b>	Read only field. System populates the account available amount on clicking the <b>Verify</b> button.
<b>Response</b>	Read only field. System populates the response on clicking the <b>Verify</b> button.
<b>Response Message</b>	Read only field. System populates the response message on clicking the <b>Verify</b> button.
<b>Verify</b>	Click to verify the account balance of the Settlement Account.
<b>Save</b>	Click to to save and close the record.
<b>Close</b>	Click to cancel the entry.
<b>Cash Collateral Details grid</b>	Below fields appear in the along with the above fields.
<b>Contribution Amount</b>	This field displays the collateral contribution amount. The collateral % maintained for the customer is defaulted into the Collateral Details screen. If collateral % is not maintained for the customer, then system should default the collateral % maintained for the product. User can modify the defaulted collateral percentage, in which case system should display a override message "Defaulted Collateral Percentage modified.
<b>Account Balance Check Response</b>	This field displays the account balance check response.
<b>Edit</b>	Click edit link to edit the collateral details.
<b>Account Available Amount</b>	This field displays the account available amount which will be auto-populated based on the settlement account selection.

Table 2-15 (Cont.) Limit Details - Field Description

Field	Description
<b>Deposit Linkage Details</b>	Specify the deposit linkage details based on the description of following table: System should allow the user to Link one or more existing Deposits as a contribution to secure underlying transactions. On Submit of DE stage, system will create Linkage of the Deposit/modification of existing Linkage by calling Back-office system (DDA) system directly.
<b>Customer Id</b>	This field displays the defaulted from the application. The user can change the Customer ID.
<b>Deposit Account</b>	Click <b>Search</b> to search and select deposit for linkage from the list of all the customer Deposits.  All the Deposits of the customer should be listed in the LOV search. User should be able to select the deposit for linkage.
<b>Deposit Branch</b>	Read only field. This field displays the deposit branch which will be auto-populated based on the deposit account selection.
<b>Deposit Available Amount</b>	Read only field. This field displays the deposit available amount and currency which will be auto-populated based on the deposit account selection.
<b>Deposit Maturity Date</b>	Read only field. This field displays the maturity date of deposit based on the deposit account selection.
<b>Exchange Rate</b>	Read only field. This field displays the latest exchange rate for deposit linkage. This will be picked up from the exchange rate maintenance from the common core.
<b>Deposit Available In Transaction Currency</b>	Read only field. This field displays the deposit amount available, after exchange rate conversion, if applicable.
<b>Linkage Percentage %</b>	Specify the value for linkage percentage.
<b>Linkage Amount (Transaction Currency)</b>	This field displays the transaction amount, user can change the value.  System validates the linking amount with available Deposit balance and should not allow to link more than the available amount.
<b>Deposit Details grid</b>	Below fields appear in the <b>Deposit Details</b> grid along with the above fields.
<b>Deposit Currency</b>	This field displays the deposit currency.
<b>Transaction Currency</b>	This field displays the transaction currency.
<b>Edit</b>	Click edit link to edit the deposit linkage details.

- Click **Save and Close** to save the details and close the screen.

### Charge Details

This section displays charge details, commission and tax components mapped to the product from the back office system. If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

For more information on fields, refer to the field description table below.

**Table 2-16 Charge Details - Field Description**

Field	Description
<b>Commission Details</b>	This section displays the commission details. By default, all the charges, commission and margin are collected from the counter-party.
<b>Component</b>	Displays the commission component. Click the link to view the component details.
<b>Rate</b>	Displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
<b>Mod. Rate</b>	From the default value, if the rate is changed the value gets updated in this field. The user can change the value.
<b>Currency</b>	Displays the currency in which the commission have to be collected.
<b>Amount</b>	Displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
<b>Modified</b>	From the default value, if the amount is changed, the value gets updated in the modified amount field.

**Table 2-16 (Cont.) Charge Details - Field Description**

Field	Description
<b>Defer</b>	Switch to  for charges/commissions has to be deferred and collected at any future step.
<b>Waive</b>	Switch to  to waive the charges/commissions. Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
<b>Charge Party</b>	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
<b>Settl. Account</b>	The settlement account.
<b>Amendable</b>	Displays if the field is amendable or not.
<b>Charge Details</b>	This section displays the charge details.
<b>Component</b>	Displays the charge component type.
<b>Tag Currency</b>	Displays the tag currency in which the charges have to be collected.
<b>Tag Amount</b>	Displays the tag amount that is maintained under the product code.
<b>Currency</b>	Displays the currency in which the charges have to be collected.
<b>Amount</b>	This field displays the amount that is maintained under the product code.
<b>Modified</b>	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
<b>Billing</b>	Switch to  to make the details available for billing engine for further processing, if charges are handled by separate billing engine. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM.  The user can not enable/disable the option, if it is de-selected by default.  This field is disabled, if 'Defer' toggle is enabled.
<b>Defer</b>	Switch to  to defer the charges and collect at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.  The user can enable/disable the option the check box. On de-selection the user has to click on 'Recalculate' charges button for re-simulation.
<b>Waive</b>	Switch to  to waive the charges. Based on the customer maintenance, the charges should be marked for Billing or for Defer.  This field is disabled, if <b>Defer</b> toggle is enabled.
<b>Charge Party</b>	Displays the charge party. By default the charge party is 'Applicant'.

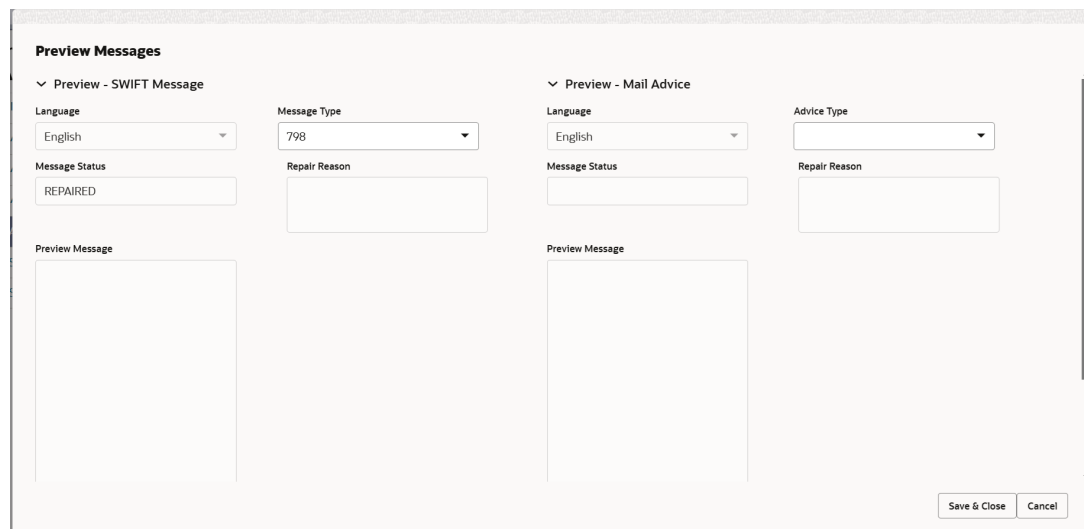

**Table 2-16 (Cont.) Charge Details - Field Description**

Field	Description
<b>Settlement Account</b>	Click <b>Search</b> icon to search and select the settlement account.
<b>Tax Details</b>	This section displays the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.
<b>Component</b>	Displays the tax component.
<b>Type</b>	Displays the type of tax component.
<b>Value Date</b>	Displays the value date of tax component.
<b>Ccy</b>	Displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
<b>Amount</b>	Displays the tax amount based on the percentage of commission maintained. The user can edit the tax amount, if applicable.
<b>Billing</b>	Switch to  to make the details available for billing engine for further processing, if taxes are handled by separate billing engine. This field is disabled, if 'Defer' toggle is enabled.
<b>Defer</b>	Switch to  to defer the taxes and collect at any future step. Switch to  if you do not want to defer the taxes. On disabling the user has to click on 'Recalculate' charges button for re-simulation.
<b>Settl. Account</b>	System defaults the settlement account. The user can modify the settlement account.

- Click **Save and Close** to save the details and close the screen.

**Preview Messages**

The draft LC message from the back office should be simulated and displayed in the Preview Message tile.

For more information on fields, refer to the field description table below.

**Table 2-17 Preview Messages - Field Description**

Field	Description
<b>Preview SWIFT Message</b>	This section displays the preview of SWIFT Messages fields.
<b>Language</b>	Read only field. English is set as default language for the preview.
<b>Message Type</b>	Select the message type.
<b>Message Status</b>	Read only field. Display the message status of draft message of internal amendment details.
<b>Repair Reason</b>	Read only field. Display the message repair reason of draft message of internal amendment details.
<b>Preview Message</b>	This field displays a preview of the draft message.
<b>Preview Mail Advice</b>	This section displays the preview of Mail Advice fields.
<b>Language</b>	Read only field. English is set as default language for the preview.
<b>Advice Type</b>	Select the advice type.
<b>Message Status</b>	Read only field. Display the message status of draft message of internal amendment details.
<b>Repair Reason</b>	Read only field. Display the message repair reason of draft message of internal amendment details.
<b>Preview Message</b>	This field displays a preview of the advice.
<b>Draft Confirmation</b>	This section displays the draft confirmation fields.
<b>Draft Confirmation Required</b>	Switch to  , if draft confirmation is required.
<b>Customer Response</b>	Specify the response received from customer. If the response is received online, the response is auto populated in this field by the system.
<b>Customer Remarks</b>	Read only field. Display the remarks from the customer for the draft.
<b>Response Date</b>	Read only field. Display the customer response received date.
<b>Customer Email ID 1</b>	Click <b>Search</b> icon to search and select the Email ID from lookup. The user can select from the Customer Email Address field of the customer maintenance in Back Office and replicated in OBTFPM. By default this field is blank.

5. Click **Save and Close** to save the details and close the screen.

### Insurance Details

Provide the Insurance details based on the description in the following table.

For more information on fields, refer to the field description table below.

**Table 2-18 Insurance Details - Field Description**

Field	Description
<b>Code</b>	Click <b>Search</b> icon to search and select insurance company code.
<b>Company Name</b>	This field displays the insurance company name as per the selected company code.
<b>Company Address</b>	This field displays the insurance company address details as per the selected company code.
<b>Policy Number</b>	Click <b>Search</b> icon to search and select the policy number of the insurance.
<b>Open Policy</b>	Read only field. If enabled, this field denotes whether the policy is an open policy.
<b>Cover Date</b>	The cover date of the policy.
<b>Expiry Date</b>	The Expiry Date of the Policy. System displays an override if the policy is expired.
<b>Insurance Amount</b>	The insurance amount for the policy.
<b>Utilized Amount</b>	This field displays the utilized amount, if the policy is an Open Policy.

6. Click **Save and Close** to save the details and close the screen.

### Linked Loan Details

The bank user can view the details of linked loan accounts.

For more information on fields, refer to the field description table below.

**Table 2-19 Linked Loan Details - Field Description**

Field	Description
<b>Linked Loan Details</b>	This section displays the linked loan details.
<b>Drawing Reference Number</b>	This field displays the drawing reference number of the linked loan account.
<b>Drawing Currency</b>	This field displays the drawing currency of the linked loan account.
<b>Drawing Amount</b>	This field displays the drawing amount of the linked loan account.
<b>Loan Account</b>	This field displays the loan account number.
<b>Loan Currency</b>	This field displays the currency of the loan account.
<b>Loan Amount</b>	This field displays the loan amount.

7. Click **Save and Close** to save the details and close the screen.

### FX Linkage

Following are the conditions of FX Linkage:

- If any LC Amendment is pending for beneficiary confirmation with FX changes, then the system, will not allow another amendment on this contract further.
- FX request will be processed in external system, only after successful amendment confirmation has been done.
- Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
- Delink of linked FX or Reduction of linked amount from the LC is allowed if the same is not attached to any Bills.
- Reduction of LC contract amount with FX, through LC amendment will be restricted, when the contract amount goes below the FX linkage amount. User will be intimated with the message.

For more information on fields, refer to the field description table below.

Table 2-20 FX Linkage - Field Description

Field	Description
<b>FX Linkage</b>	Click + to add multiple <b>FX Details</b> . Below fields are displayed on the <b>FX Linkage</b> pop-up screen, if the user clicks the plus icon.
<b>FX Reference Number</b>	Click <b>Search</b> to search and select the FX contract reference number. On select and save and close, system defaults the available amount, bot currency, sold currency and rate. Forward FX Linkage available for selection at bill would be as follows, <ul style="list-style-type: none"> <li>Counterparty of the FX contract should be the counterparty of the Bill contract.</li> <li>Active Forward FX transactions authorized not marked for auto liquidation.</li> </ul> Bill contract currency should be BOT currency of the FX transaction in case of an export Bill or the SOLD currency in case of an Import Bill.
<b>Currency</b>	Read only field. This field displays the FX SOLD currency from the linked FX contract.
<b>Contract Amount</b>	This field displays the FX SOLD currency and Amount. The user can change the currency.

Table 2-20 (Cont.) FX Linkage - Field Description

Field	Description
<b>Available FX Contract Amount</b>	Read only field. This field displays the available FX contract amount. The value is from the "Available Amount" in FXDLINKG screen in OBTR. Available Amount SOLD currency and Amount is displayed.
<b>Linkage Amount</b>	System defaults the amount available for linkage. The Linkage amount should default the LC Contract Currency and allowed to change the linkage amount alone. The validation "Sum of Linked amount will not be greater than contract amount" or "Linkage amount will not be greater than the available amount for linkage" should be triggered on save of the FX linkage screen when trying to link the single FX or multiple FX.
<b>Rate</b>	Read only field. This field displays the rate at which the contract is booked.
<b>FX Amount in Local Currency</b>	Read only field. This field displays the FX amount in local currency. The value is defaulted as FX BOT currency and Amount from FXDTRONL
<b>FX Expiry Date</b>	Read only field. This field displays the expiry date from the linked FX contract.
<b>FX Delivery Period - From</b>	Read only field. This field displays the date from which the contract is valid for utilization.
<b>FX Delivery Period - To</b>	Read only field. This field displays the date to which the contract is valid for utilization.
<b>FX Linkage grid</b>	Below fields appear in the FX linkage grid along with the above fields.
<b>Bought Currency</b>	Read only field. This field displays the currency from the linked FX contract.
<b>Sold Currency</b>	Read only field. This field displays the currency from the linked FX contract.
<b>Available Contract Amount</b>	Read only field. Available amount will be FX contract amount minus the linked amount. Available amount for linkage should be greater than Zero.
<b>Linked Amount</b>	Sum of Linked amount will not be greater than LC contract amount. Linked amount will not be greater than the available amount for linkage.
<b>Total Utilized Amount</b>	Read only field. This field displays the total amount utilized against the corresponding linked FX. On query, both Utilized and Total Utilized amount holds the amount of latest version. The value is Total Utilized Amount SOLD currency and Amount for Import LC/Guarantee Issuance from FXDLINKG .

Table 2-20 (Cont.) FX Linkage - Field Description

Field	Description
<b>Average FX Rate</b>	Read only field. Multiple forward FX contract could be linked, and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. This will be populated in the Average FX Rate.
<b>Action</b>	Click Edit icon to edit the FX details.  Click Delete icon to delete the FX details.

## 8. Click Next.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

Table 2-21 Additional Details - Action Buttons - Field Description

Field	Description
<b>Clarification Details</b>	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
<b>Documents</b>	Click to View/Upload the required document.  Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
<b>Remarks</b>	Specify any additional information regarding the Import LC Internal Amendment - Islamic. This information can be viewed by other users processing the request.  Content from Remarks field should be handed off to Remarks field in Backend application.
<b>Overrides</b>	Click to view the overrides accepted by the user.

<b>Checklist</b>	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit.

## 2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Import LC Internal Amendment Islamic request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

### Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

### Amount Bock Exception

This section will display the amount block exception details.

### Summary

<b>Back</b>	Task moves to previous logical step.

**Exception - Know Your Customer (KYC)**

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

1. Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions will be listed in your queue.
2. Open the task, to see summary tiles that display a summary of available updated fields with values.  
User can pick up a transaction and do the following actions:

**Approve**

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

**Summary**

**Figure 2-19 Exception - Know Your Customer (KYC) Summary**

Tiles Displayed in Summary:

- Main Details - User can view details about application details and LC details.
- Acknowledgement Details - User can view and modify the MT730 details, if required..

Contract Amount  
GBP £10,000.00 ✓

Refer Close Proceed

For non online channel, the application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message and user will not be able to approve the task.

Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

**Table 2-28 Approval Re-Key - Action Buttons - Field Description**

Field	Description
<b>View Signatures</b>	Click the View Signatures button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.
