1 Preface

- Purpose
- Audience This document is intended for the following audience:
- Documentation Accessibility
- Critical Patches
- Diversity and Inclusion
- Structure This manual is organized into the following chapters:
- Conventions
- Related Documents
- Screenshot Disclaimer
- Acronyms and Abbreviations
- Basic Actions
- Symbols and Icons

1.1 Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Export Documentary Collection Booking Update** process.

1.2 Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

1.3.1 Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

1.4 Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance.

1.5 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1.6 Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

1.7 Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1.8 Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

1.9 Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1.10 Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1-1 Acronyms and Abbreviations

Abbreviation	Description
ОВТЕРМ	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

1.11 Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 1-2 Common Action Buttons and its Definitions

Action Buttons	Description
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.
	Reject Codes are:
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Action Buttons	Description
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	R1- Documents missing
	R2- Signature Missing
	R3- Input Error
	R4- Insufficient Balance/Limits
	R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.
	This option is used, if there are any pending information yet to be received from applicant.
Cancel	Click Cancel to cancel the transaction input midway without saving any data.
Save & Close	Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	Click Next , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels). **Benefits**

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export Documentary Collection Booking Update

Export Documentary Collection Booking Update process involves update of an existing documentary collection under Export LC.

This topic contains following subtopics:

- Common Initiation Stage
- Registration
- Data Enrichment
- Exceptions
- Multi Level Approval
- Reject Approval
- Common Initiation Stage

This topic provides the systematic instructions to initiate the export documentary collection booking update Islamic request.

 Registration This topic provides the systematic instructions to initiate the Registration stage of Export Documentary Collection Booking Update request.

Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection booking update request.

Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

 Multi Level Approval This topic helps you quickly get acquainted with the Multi Level Approval process.

3.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the export documentary collection booking update Islamic request.

Specify User ID and Password, and login to Home screen.

1. On Home screen, click Trade Finance. Under Trade Finance, click Initiate Task.

The Initiate Task screen appears.

3.2.2 Bi-Directional Flow for Offline Transactions Initiated from OBTFPM

This topic provides the systematic instructions to initiate the Bi-Directional Flow for Offline Transactions Initiated from OBTFPM.

Offline Transactions means those transactions which are not initiated by OBDX, but are initiated directly by the bank user in OBTFPM upon request received from the customer. **Pre- Conditions:**

- Customer Maintenance details are replicated from OBTF to OBTFPM.
- Task is initiated in OBTFPM, Customer ID is captured/populated and Process Reference Number is generated.
- 1. Customer Maintenance details are replicated from OBTF to OBTFPM.
- In OBTFPM, user clicks Request Clarification, the system checks if the request is initiated from OBDX by validating the value available in the submission mode field is "Online". In case submission mode is "Online", the user can enter the clarification details in "Clarification Required" placeholder.
- In case submission mode is not "Online", the system will validates if the counterparty is a OBDX customer by checking the flag "Trade Finance Portal" in the Customer Maintenance table replicated from OBTF. In this case, the user can submit clarification.
- 4. In case submission mode is not "Online", and if the "Trade Finance Portal" flag is set to 'No' in Customer Maintenance Table, the system should display the error message that 'The customer is not subscribed to Trade Finance Portal'. Once the request is submitted, the Request Clarification functionality would be applicable to offline initiated transactions also.

3.3 Data Enrichment

This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection booking update request.

On successful completion of Registration of an Export Documentary Collection Booking Update, the task moves to Data Enrichment stage. At this stage the gathered information during Registration are validated.

Note:

For expired line of limits, the task moves to "Limit Exception" stage under Free Tasks, on 'Submit' of DE Stage with the reason for exception as "Limit Expired".

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Trade Finance. Under Trade Finance, click Task.
- 2. Under Tasks, click Free Tasks.

Figure 3-6 My Tasks

Let's look at the details for Data Enrichment stage. User can enter/update the fields. Some of the application details that are already having value from Registration/online channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection update booking request.

- Maturity Details
 This topic provides the systematic instructions to capture the maturity details.
- Additional Fields
 This topic provides the systematic instructions to capture the additional fields.
- Other Details

This topic provides the systematic instructions to capture the other details like Credit Value Date, Debit Value Date, Other Bank charges etc.

- Advices This topic provides the systematic instructions to capture the advices details.
- Additional Details
 This topic provides the systematic instructions to capture the additional details
- Settlement Details
 This topic provides the systematic instructions to capture the settlement details of export documentary collection update booking request.
- Updated Details
 This topic provides the systematic instructions to capture the updated details.
- Summary

This topic provides the systematic instructions to view the summary of export documentary collection update booking request.

3.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of export documentary collection update booking request.

Main details section has two sub section as follows:

- Application Details
- Collection Details.

Application Details

The fields listed under this section are same as the fields listed under the Application Details section in Registration. For more information on the fields, refer **Registration** stage.

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

For more information on fields, refer to the field description table below.

✓ Note: The fields which are marked as Required are mandatory.

Table 3-6	Main Details - Collection Details - Field Description
-----------	-------------------------------------------------------

Field	Description
Documents Received	Documents Received will be auto-populated from the collection booking.
	User can change the value.
Tenor Type	Read only field.
	Tenor details will be auto-populated from the collection booking.
Product Code	Read only field.
	Product Code will be auto-populated from the Documentary Collection Number.
Product Description	Read only field.
	This field displays the description of the product as per the product code.

Field	Description
Operation Type	Select Operation type from the drop-down list. The options are:
	Note: Change of Operation from Collection or Acceptance to Free of Payment should be enabled only for Documentary Bills.
Stage	Stage will be auto-populated from the collection booking. User can update the stage to final, if it is set to Initial already.
	Note: For Operation Type, FOP the Stage to be defaulted to Final as Free of Payment is not applicable for Bills in Initial stage.
Contract Reference Number	Read only field. System populates the contract reference number from the back end system once the Documentary Collection Number is selected.
Drawee	Drawee ID will be auto-populated from the collection booking. The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.
	Note: User can change the value of the Drawee for only those bills where Operation Type is COL and ACC.
Outstanding Bill Amount	Read only field. Outstanding Bill Amount will be auto-populated from the collection booking.

Field	Description
Collecting Bank	Collecting Bank Name will be auto-populated from the collection booking.
	Note: In case the selected Bank is not RMA Compliant, the system displays error message "RMA arrangement not available".
	The user can change the parties in Update Collection Processes. Update summary should show both old and new parties.
	User can update the Collecting Bank, if the Operation Type is set to COL and ACC .
Collecting Bank Reference	Read only field.
	Collecting Bank reference will be auto-populated from the collection booking.
Finance Amount	Finance Amount is auto-populated from the collection booking. User can update the Finance Amount, if the Operation Type is set to DIS .
Acceptance Date	Specify the acceptance date.
Rebate Amount	Rebate to the bill outstanding amount is auto-populated from the collection booking.
	User can change the value.
Unlinked FX Rate	Read only field.
	Unlinked FX Rate will be auto-populated from the collection booking.
Non Acceptance Date	Read only field.
	Non Acceptance Date will be auto-populated from the collection booking.
Non Pay Date	Read only field.
	Non Pay Date will be auto-populated from the collection booking.
MT416 - 23E OTHR	Read only field.
	Other details will be auto-populated from the collection booking.

Field	Description
Limit verification required	Switch to enables for limit verification. Switch to one of the finance Amount, the system prompts an override message on Submit.
Customer Dispatch	Displays the value that will be populated from back office based on the maintenance.
Avalization/Co- Acceptance Requested	Enable this option, if the bill is to be avalized. User can enable this option either during the Bill Booking or Amendment. During bill booking, the option can be enabled both INTIAL/FINAL stage and Operation is COL/ACC /DIS. During the Amendment, stage should be Final. By default this option is disabled. Once the option is enabled, it can not be unchecked during any further actions or operations.
Avalization/Co- Acceptance Requested	Switch to , if the bill is to be avalized. User can enable this option either during the Bill Booking or Amendment. During bill booking, the option can be enabled both INTIAL/FINAL stage and Operation is COL/ACC /DIS. During the Amendment, stage should be Final. By default this option is disabled. Once the option is enabled, it can not be unchecked during any further actions or operations.
	Note: Option is not applicable for Sight bills, Multi-tenor and Bills Under LC.

Field	Description
Avalization/Co-Accepted	Switch to , if the bill is Availized/Co Accepted by Collecting Bank. If the "Avalization/Co-Acceptance Requested" flag is not selected, user cannot select the "Availized/Co-Accepted" flag.
	Note: Option is not applicable for Sight bills, Multi-tenor and Bills Under LC.

Data Enrichment - Main Details - Collection Details

The fields listed under this section are same as the fields listed under the Collection Details section in Registration. During Registration, if user has not captured input, then user can capture the details in this section.

In case field Operation Type has value FOP (Free of Payment) that is populated from OBDX, system should retain the value and should not allow the user to edit the same.(Display only field if Submission mode is Online.

Table 3-7 (Cont.) Main Details - Collection Details - Field Description

2. Click Next.

The task will move to next data segment.

Table 3-8 Main Details - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	View/Upload the required document.
	Application displays the mandatory and optional documents.
	The user can view and input/view application details simultaneously.
	When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request.
	Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	 Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user
	can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click to send MT799 and MT999 messages from within the task.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.

Field	Description
Signatures	Click the Signature button to verify the signature of the customer/ bank if required.
	The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system.
	If more than one signature is required, system should display all the signatures.
Request Clarification	User should be able to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.
	Reject Codes are:
	R1- Documents missing
	 R2- Signature Missing R3- Input Error
	R4- Insufficient Balance/Limits
	R5 - Others
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	R1- Documents missing
	R2- Signature Missing
	 R3- Input Error R4- Insufficient Balance/Limits
	 R4- Insuncient Balance/Limits R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.
	This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

The task will move to next data segment. For more information refer Other Details. For more information on action buttons, refer to the field description table below.

Table 3-10 Maturity Details - Action Buttons - Field Description

Field	Description
	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.

Field	Description
Documents	View/Upload the required document.
	Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the collection. This information can be viewed by other users processing the request.
	Content from Remarks field should be handed off to 'Remarks' field in backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	 Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Common Group Messages	Click Common Group Message button, to send MT799 and MT999 messages from within the task.
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View Collection	Enables the user to view the latest collection values displayed in the respective fields.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures.
Request Clarification	Click the Request Clarification button to submit the request for clarification to the "Trade Finance Portal" User for the transactions initiated offline.

Table 3-10 (Cont.) Maturity Details - Action Buttons - Field Description

Field	Description
	Description
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.
	Reject Codes are:
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others
	Select a Reject code and give a Reject description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.
	This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Back	Click the Back button, to go back to the previous screen.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

Limits and Collaterals

Limit availability needs to be checked if amendment involves increase in amount or tolerance or both.

On Approval, system should not release the Earmarking against each limit line and system should handoff the "Limit Earmark Reference Number "to the back office. On successful handoff, back office will make use of these "Limit Earmark Reference Number" to release the Limit Earmark done in the mid office (OBTFPM) and should Earmark the limit from the Back office.

In case multiple Lines are applicable, Limit Earmark Reference for all lines to be passed to the back office.

Field	Description
Commission Details	-
Event	Read only field. This field displays the event name.
Event Description	Read only field. This field displays the description of the event.
Component	This field displays the commission component.
Rate	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM The user is able to change the rate.
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	This field displays the currency in which the commission have to be collected.
Amount	This field defaults the amount that is maintained under the product code.
	The commission rate, if available in Back Office defaults in OBTFPM The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Amount	From the default value, if the amount is changed, the value gets updated in the modified amount field.
Defer	 If enabled, charges/commissions has to be deferred and collected at any future step. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically checked in OBTFPM.
	The user can not select/de-select the check box if it is de-selected by default.
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settlement Account	Select the settlement account.
Amendable	The value is auto-populated as the commission can be amended or not.
Charge Details	
Component	This field defaults the charge component type.
Tag Currency	This field defaults the tag currency in which the charges have to be collected.

Table 3-17	Charge	Details -	Field	Description
	-			-

Field	Description
Tag Amount	This field defaults the tag amount that is maintained under the product code.
Currency	This field defaults the currency in which the charges have to be collected.
Amount	This field defaults the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.
	The user can enable/disable the option the check box. On de- selection the user has to click on 'Recalculate' charges button for re- simulation.
Waive	Enble the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer.
	This field is disabled, if Defer toggle is enabled.
Charge Party	Charge party is applicant by default. User can change the value to beneficiary.
Settlement Account	Indicates the settlement account.
level. User cannot update	culated based on the commission and defaults if maintained at product tax details and any change in tax amount on account of modification of be available on click of Re-Calculate button or on hand off to back-end
Component	This field displays the tax component.
Туре	This field displays the type of tax component.
Value Date	This field displays the value date of tax component.
Currency	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
Amount	This field displays the tax amount based on the percentage of commission maintained.
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On deselection the user has to click on 'Recalculate' charges button for resimulation.
Settlement Account	System defaults the settlement account.

FX Linkage

This section enables the user to link the existing FX contract(s) to the Bill. User can link one or more FX deals to a bill. The linked value of an FX deal(s) must not exceed the value of the bill.

FX contract linkage with the Bill booking can happen only for immediate liquidation of sight payment or for Usance. For manual sight payment, the user needs to link the FX contract on the date of liquidation of the bill.

Following are the features of FX Linkage in BC.

- FX linkage cannot be linked at Bills at initial stage.
- When a bill is drawn under LC, the details of forward contract linked as a part of the LC, will be defaulted at bill.
- Linked amount will be defaulted against the corresponding FX sequentially.
- User can delink or modify the defaulted FX details at in the Bill.
- Bill maturity date should be greater than or equal to FX Value date.
- Sum of Linked amount will not be greater than Bill contract amount.
- Linked amount will not be greater than the available amount for linkage.
- Current Utilized amount will display the liquidated/purchased/discounted/negotiated amount of Bill contract. It cannot go beyond the linked FX amount.
- When a bill is drawn under LC, delink of FX at BC is allowed only if the linked FX is not utilized by the bill.
- Multiple forward FX contract could be linked and exchange rate of FX contract vary from each. Hence, effective exchange rate for bill would be arrived using weighted average method and it is utilized during purchase/negotiation/discount or liquidation of the bill. The same will be populated in the Average FX Rate.

Field	Description
Component	This field displays the component maintained in the back office.

Field	Description			
Component Description	This field displays the description of the component.			
Rate Type	This field displays the rate type maintained for the component in back office.Fixed FloatingSpecial			
Rate Code	This field displays the rate code applicable for the component.			
Min Spread	This field displays the minimum spread applicable for the Rate Code. This field have value, if the Rate Type is Floating .			
Max Spread	This field displays the maximum spread applicable for the Rate Code. This field have value, if the Rate Type is Floating .			
Spread	This field displays the spread applicable for the Component in case of Floating Rate Component. User can change the defaulted value. System validates whether the spread input is within the Minimum to Maximum Spread.			
Min Rate	This field displays the minimum rate applicable for the Rate Code.			
Max Rate	This field displays the maximum rate applicable for the Rate Code.			
Rate	This field displays the value applicable for the Rate Code. You can modify the value, if the Rate Type is Fixed . System validates whether the Rate input is between the Minimum and Maximum Rate.			
Modified Rate	This field displays the modified rate.			
Special Pricing Reference Number	Specify the Special Pricing Reference Number, when there is a special Interest rate to be provided for that customer against the interest component (Main Component). Special Pricing Reference is not applicable for Penal Interest components. For transactions initiated from OBDX, the Special Pricing Reference Number will be populated from OBDX and user cannot edit the same.			
	Note: System displays an override as "Special Pricing Applicable", on clicking "Save" in the Interest Details screen, if Special Pricing Reference number has been provided.			
Currency	This field displays the interest currency.			
Amount	Specify the interest amount, if the Rate Type is Special . In other cases , the amount will be calculated by back office immediately only if the Interest is collected in Advance or if Back Dated Interest is collected. In that scenario, the Amount will be populated on Re-simulation from back office. Otherwise Interest will be calculated only in the batch as maintained.			
Waive	User can waive the Interest applicable. System displays an override, if the user has waived the Interest.			

Table 3-21	(Cont.) Interest Details - Field Description

Field	Description
Charge Party	This field displays the Charge Party based on the type of transaction. In case of Export Transactions, Drawer should be the defaulted Charge Party for Collection Bills and Beneficiary for the LC Bills. In case of Import Transactions, Drawee should be the Charge Party for Collection and Applicant for the LC Bills.
Settlement Account	This field displays the settlement account of the Charge Party for debit of Interest. User can change the value. System displays an error if a different customer is chosen. If different account of the Charge Party is selected, system should display a override. In case the user modifies the Interest Rate, the user should click on Recalculate button to get the modified amount from the back office and display the new Amount.(Recalculation is done in back office and not in OBTFPM).
Settlement Curreny	System defaults the currency of the Settlement Account as maintained for the Charge Party.
Settlement Branch	System defaults the branch of the Settlement Account as maintained for the Charge Party.

3.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export Collection Update Booking request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details User can view and modify details about application details and LC details, if required.

3.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

1. Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Note:

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Bill Currency Code
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
