Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Export LC Transfer Closure - Islamic** process.

Audience

This user guide is intended for the central administrator of the Bank who controls the system and application parameters and ensures smooth functionality and flexibility of the banking application.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and BulletinsCritical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security AssuranceOracle Software Security Assurance.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Conventions

The following text conventions are used in this document:

Convention Meaning

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels). **Benefits**

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2 Export LC Transfer Closure - Islamic

This User Manual is documented to get familiar with the Export LC Transfer Closure - Islamic process of Oracle Banking Trade Finance Process Management.

This process allows the corporate users to close an Export Transfer LC. Transfer LC can be closed under following scenarios:

- Transfer LC has expired
- There is no bill outstanding

The design, development and functionality of the Islamic Export LC Transfer Closure process flow is similar to that of conventional Export LC Transfer Closure process flow.

In the following sections, let's look at the details for Export LC Transfer Closure - Islamic process.

This topic contains following subtopics:

Common Initiation Stage

This topic provides the systematic instructions to initiate the **Export LC Transfer Closure -**Islamic request.

- Registration
 This topic provides the systematic instructions to initiate the Registration stage of Export
 LC Transfer Closure Islamicrequest.
- Data Enrichment
 This topic provides the systematic instructions to initiate the Data Enrichment stage of
 Export LC Transfer Closure Islamic request.
- Exceptions This topic helps you quickly get acquainted with the Exceptions process.
- Multi Level Approval This topic helps you quickly get acquainted with the Multi Level Approval process.
- Reject Approval This topic helps you quickly get acquainted with the Reject Approval process.

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the **Export LC Transfer Closure -**Islamic request.

Specify User ID and Password, and login to Home screen.

1. On Home screen, click Trade Finance. Under Trade Finance, click Initiate Task.

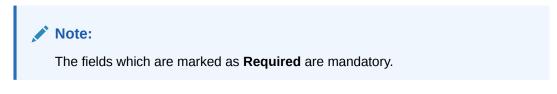

The Initiate Task screen appears.

Figure 2-6 My Tasks

Let's look at the details for Data Enrichment stage. User can enter/update the fields in Data Enrichment stage. Some of the fields that are already having value from Registration/ online channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

Main Details

This topic provides the systematic instructions to initiate the main details of Scrutiny stage of **Export LC Transfer Closure - Islamic** request.

- Additional Fields
 This topic provides the systematic instructions to capture the additional fields.
- Advices

This topic provides the systematic instructions to capture the advices details of Export LC Transfer Closure - Islamic process.

Additional Details

This topic provides the systematic instructions to capture the additional details in Data Enrichment stage of Export LC Transfer Closure - Islamic process.

Settlement Details

This topic provides the systematic instructions to capture the settlement details of Export LC Transfer Closure - Islamic request.

Summary

This topic provides the systematic instructions to view the summary details in Data Enrichment stage of Export LC Transfer Closure - Islamic request.

2.3.1 Main Details

This topic provides the systematic instructions to initiate the main details of Scrutiny stage of **Export LC Transfer Closure - Islamic** request.

The Main details hop provides a quick snapshot of Application details and Transfer LC Details. User can process new request for Transfer LC Closure. Main details section has two sub section as follows:

- Application Details
- Transfer LC Details.

Application Details

This is a sub section of Main details hop. User can enter the details in the following fields. Some of the fields that are already having value from registration/online channels will not be editable.

1. On **Main Details** screen, specify the fields if any, that were not entered at Registration stage.

2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Export LC Transfer Closure - Islamic request, before it reaches the approval stage, the application will validate the Amount Block and KYC. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number "to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block. Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off
- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account

2.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

This stage allows the approver user to review and approve the Export LC Transfer Closure - Islamic transaction.

The user can view the summary of details updated in multilevel approval stage of Transfer LC Closure - Islamic request.

The Approval screen displays the summary tiles. These tiles displays a list all values as entered by the maker. User can drill down from summary tiles into respective data segments where they can verify the details of all fields under the data segment.

Note:

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.

- 1. Log in into OBTFPM application and on Home screen, click, Task.
- 2. Under Task, click Free Task.
- Select the appropriate task and click Acquire & Edit to edit the task or click Acquire to edit the task from My Tasks.
- 4. The acquired task will be available in **My Tasks** tab. Click **Edit** to approve the task.

The Approval Re-Key pop-up screen is displayed.

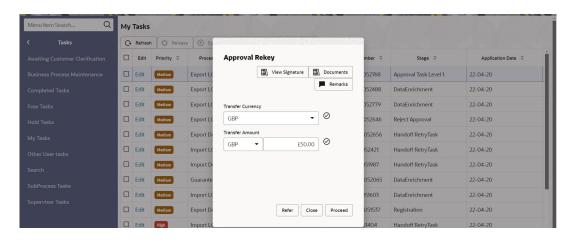

Figure 2-15 Approval Re-Key

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

 Open the task and re-key some of the critical field values from the request in the Approval Re-Key screen.

Some of the fields below will dynamically be available for re-key.:

- Transfer Currency
- Transfer Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

6. Click **Proceed** to proceed for the approval.

The **Approval Summary** screen is displayed. The user can view the Summary tiles which displays list of important fields with values.

7. Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

Note:

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.
