## Preface

#### Purpose

This topic helps you quickly get acquainted with the **Guarantee/SBLC Isssuance Amendment Beneficiary Consent Islamic** process.

- Audience This document is intended for the following audience:
- Documentation Accessibility
- Critical Patches
- Diversity and Inclusion
- Structure This manual is organized into the following chapters:
- Conventions
- Related Documents
- Screenshot Disclaimer
- Acronyms and Abbreviations
- Basic Actions
- Symbols and Icons

### Purpose

This topic helps you quickly get acquainted with the **Guarantee/SBLC Isssuance Amendment Beneficiary Consent Islamic** process.

## Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

## **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

### Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## **Critical Patches**

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and BulletinsCritical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security AssuranceOracle Software Security Assurance.

## **Diversity and Inclusion**

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

## Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## **Related Documents**

For more information on any related features, you can refer to the following documents:

Getting Started User Guide

Oracle Banking Common Core User Guide

## Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

## Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Abbreviation	Description		
OBTFPM	Oracle Banking Trade Finance Process Management		
LC	Letter of Credit

## Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

#### Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels). **Benefits** 

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

#### **Key Features**

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

## Guarantee Issuance Amendment - Beneficiary Consent -Islamic

As part of Guarantee Issuance Amendment, the amendments may need consent from the beneficiary of the amendment and the amended Guarantee is parked awaiting beneficiary consent. Once the Beneficiary has accepted the amendment, the Guarantee amendment Confirmation will be triggered.

The various stages involved for Islamic Guarantee Issuance Amendment Beneficiary Consent are:

- Input data and Upload of related mandatory and non-mandatory documents in Registration stage
- Input/Modify details of amendment of Guarantee Data Enrichment stage
- · Capture remarks for other users to check and act
- Notify customer on any negative statuses in any of the stages to the applicant
- Hand off request to back office for amendment confirmation

The design, development and functionality of the Islamic Guarantee Issuance Amendment Beneficiary Consent process flow is similar to that of conventional Guarantee Issuance Amendment Beneficiary Consent process flow.

This topic contains following subtopics:

- Common Initiation Stage
   This topic provides the systematic instructions to initiate the new Guarantee Issuance
   Amendment Beneficiary Consent Islamic request.
- Registration

This topic provides the systematic instructions to initiate the Registration stage of Guarantee Issuance Amendment - Beneficiary Consent - Islamic request.

- Data Enrichment
   This topic provides the systematic instructions to initiate the Data Enrichment stage of
   Guarantee Issuance Amendment Beneficiary Consent Islamic request.
- Exceptions This topic helps you quickly get acquainted with the Exceptions process.
- Multi Level Approval This topic helps you quickly get acquainted with the Multi Level Approval process.

## 2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new **Guarantee Issuance Amendment - Beneficiary Consent Islamic** request.

Specify User ID and Password, and login to Home screen.

 On Home screen, click Trade Finance. Under Trade Finance, click Initiate Task. The Initiate Task screen appears.

Figure 2-6 My Tasks

Let's look at the details for beneficiary consent response capture stage. User can enter/ update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

The Data Enrichment stage has the following hops for data capture:

• Main Details

This topic provides the systematic instructions to initiate the main details of Data Enrichment stage of Guarantee Issuance Amendment - Beneficiary Consent - Islamic request.

Additional Fields

This topic provides the systematic instructions to capture the additional fields.

Advices

This topic provides the systematic instructions to capture the advices details of Guarantee ssuance Amendment - Beneficiary Consent - Islamic process.

• Additional Details

This topic provides the systematic instructions to capture the additional details in Data Enrichment stage of Guarantee Issuance Amendment - Beneficiary Consent - Islamic process.

Settlement Details This topic provides the systematic instructions to capture the settlement details of Guarantee Issuance Amendment - Beneficiary Consent - Islamic request.

Summary

•

This topic provides the systematic instructions to view the summary of Guarantee Issuance Amendment - Beneficiary Consent - Islamic request.

## 2.3.1 Main Details

This topic provides the systematic instructions to initiate the main details of Data Enrichment stage of Guarantee Issuance Amendment - Beneficiary Consent - Islamic request.

Main details section has two sub section as follows:

- Application Details
- Beneficiary Response Capture

#### **Application Details**

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

Field	Description
Application No.	This field displays the appliation number of the process.
Branch Code	This field displays the branch code.
Initiated Date	This field displays the date on which process is initiated.
Initiated By	This field displays the user ID of the user who had initiated the process.
Process Name	This field displays the name of the process which is initiated.
S. No	This field displays the serial number of the audit record.
Stage Name	This field displays the current stage of the process.
Completed Time	This field displays the time on which the audit of the current stage is completed.
Completed By	This field displays the user ID of the user who had completed the audit.
Outcome	This field displays the outcome of the audit.

2. Click Next.

The task will move to next data segment.

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	Click to View/Upload the required document.
	Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the Guarantee issuance Amendment - Beneficiary Consent - Islamic. This information can be viewed by other users processing the request.
	Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instructions	<ul> <li>Click to view/ input the following</li> <li>Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this.</li> <li>Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for</li> </ul>
View Undertaking	customer initiated transactions. Clicking this button allows the user to view the undertaking details.

Field	Description
View Events	Clicking this button allows the user to view the various events under the Guarantee amendment details.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory Signature image and the applicable operation instructions if any available in the back-office system.
	If more than one signature is available, system should display all the signatures.
Request Clarification	NA for beneficiary consent.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.
	Reject Codes are:
	R1- Documents missing
	R2- Signature Missing
	R3- Input Error
	<ul> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others</li> </ul>
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	R1- Documents missing
	R2- Signature Missing
	R3- Input Error
	R4- Insufficient Balance/Limits
	R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.
	This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

For more information on fields, refer to the field description table below.

<b>Table 2-14</b>	Commission, Charges and Taxes - Field Description
-------------------	---

Field	Description
Commission Details	
Component	This field displays the commission component.
Rate	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	This field displays the currency in which the commission have to be collected.
Amount	This field displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified Amount	From the default value, if the amount is changed, the value gets updated in the modified amount field.

Field	Description
Defer	If enabled, charges/commissions has to be deferred and collected at any future step.
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settlement Account	Select the settlement account.
Charge Details	
Component	This field displays the charge component type.
Tag Currency	This field displays the tag currency in which the charges have to be collected.
Tag Amount	This field displays the tag amount that is maintained under the product code.
Currency	This field displays the currency in which the charges have to be collected.
Amount	This field displays the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	<ul> <li>If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.</li> <li>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM.</li> <li>The user can not enable/disable the option, if it is de-selected by default.</li> <li>This field is disabled, if 'Defer' toggle is enabled.</li> </ul>
Defer	<ul> <li>If charges have to be deferred and collected at any future step, this check box has to be selected.</li> <li>On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.</li> <li>The user can enable/disable the option the check box. On deselection the user has to click on 'Recalculate' charges button for resimulation.</li> </ul>
Waive	Enble the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if <b>Defer</b> toggle is enabled.
Charge Party	Charge party is applicant by default. User can change the value to beneficiary.
Settlement Account	Select the settlement account.

Table 2-14	(Cont.) Commission, Charges and Taxes - Field Description

Field	Description			
<b>Tax Details</b> The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.				
Component	This field displays the tax component.			
Туре	This field displays the type of tax component.			
Value Date	This field displays the value date of tax component.			
Currency	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.			
Amount	This field displays the tax amount based on the percentage of commission maintained. You can edit the tax amount, if applicable.			
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.			
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On de- selection the user has to click on 'Recalculate' charges button for re- simulation.			
Settlement Account	System defaults the settlement account. The user can modify the settlement account.

## Table 2-21 (Cont.) Summary - Action Buttons - Field Description

# 2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Guarantee Amendment request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

#### **Amount Block Exception Approval**

User can review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Open the task to view the summary tiles. The tiles should display a list of important fields with values.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number "to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
  - Settlement amount will be funded (outside of this process)
  - Allow account to be overdrawn during hand-off
- Refer:
  - Refer Refer back to DE providing alternate settlement account to be used for block.
  - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account Amount Bock Exception This section will display the amount block exception details.

### **Amount Bock Exception**

This section will display the amount block exception details.

#### **Exception - Know Your Customer (KYC)**

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

- 1. Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions will be listed in your queue.
- 2. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

#### Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

# Table 2-23 (Cont.) Exception - Know Your Customer (KYC) Summary - Action Buttons -Field Description

Field	Description
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage. If there are more approvers, task will move to the next approver for approval. If there are no more approvers, the transaction is handed off to the back end system for posting.
Back	Task moves to previous logical step.

#### Exception - Limit Check/Credit

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

- **1.** Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for Trade Finance transactions must be listed in your queue.
- 2. Click My Task. The summary tiles displays summary of important fields with values.

## Note:

On Approval of the exception task, system should validate the Limit Availability, Limit Expiry Date in the Limit System and create Earmark in the ELCM system. In case if the Limit is not available or the Limit is expired, then system should display an error message and should not allow the user to approve and proceed.

Limit check Exception approver can do the following actions:

## Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

#### Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

## Reject

The transaction due to non-availability of limits capturing reject reason.

## Limit/Credit Check

This section will display the amount block exception details.

Approve	On approve, application must validate for all mandatory field values, and task must move to the next logical stage.
Back	Task moves to previous logical step.

## Table 2-24 (Cont.) Exception - Limit Check/Credit - Action Buttons - Field Description

# 2.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

The Approval user can review and approve the details updated in approval stage of the Beneficiary Consent response for Amendment under Islamic Guarantee Issued.

- 1. Log in into OBTFPM application and on Home screen, click, Task.
- 2. Under Task, click Free Tasks.
- Select the appropriate task and click Acquire & Edit to edit the task or click Acquire to edit the task from My Tasks.
- 4. The acquired task will be available in **My Tasks** tab. Click **Edit** to approve the task.

The **Approval Summary** screen appears. The user can view the Summary tiles which displays list of important fields with values.

5. Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

The user can view a snapshot of the beneficiary consent response to an amendment made to this transaction as read only.

## Note:

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.
