Preface

- Purpose
- Audience

This document is intended for the following audience:

- Documentation Accessibility
- Critical Patches
- Diversity and Inclusion
- Structure

This manual is organized into the following chapters:

- Conventions
- Related Documents
- · Screenshot Disclaimer
- Acronyms and Abbreviations
- Basic Actions
- · Symbols and Icons

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Guarantee SBLC Issuance Claim Settlement Islamic** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface: Preface gives information on the intended audience, structure, and related documents for this User Manual.
- Chapters: The subsequent chapters provide an overview to the module.
- Screen Shot Disclaimer The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; information used in the interface or documents are dummy, it does not exist in real world, and its only for reference purpose.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Guarantee SBLC Issuance Claim Settlement

This User Manual describes the various stages of Guarantee SBLC Issuance Claim Settlement Islamic process.

The claim requested for Guarantee/SBLC can be settled through the Settlement Process.

The various stages involved for Claim Settlement of Guarantee Issued are:

- Receive and verify documents (Non Online Channel) Registration stage
- Input application details
- Upload of related mandatory and non-mandatory documents
- Verify documents and capture details (Online/Non Online Channels) Data Enrichment stage
- Check balance availability for amount block
- Check for sanctions & KYC status
- Create amount block for charges
- · Capture remarks for other users to check and act
- Hand off request to back office

The design, development and functionality of the Islamic Guarantee Issuance Claim Settlement process flow is similar to that of conventional Guarantee issuance process flow.

This topic contains following subtopics:

Common Initiation Stage

This topic provides the systematic instructions to initiate the new Guarantee Issuance Claim Settlement Islamic request.

Audit

This button provides information about user initiated the transaction, initiated date, stage wise detail etc.

Table 2-8 Audit - Field Description

Field	Description
Application No.	This field displays the appliation number of the process.
Branch Code	This field displays the branch code.
Initiated Date	This field displays the date on which process is initiated.
Initiated By	This field displays the user ID of the user who had initiated the process.
Process Name	This field displays the name of the process which is initiated.
S. No	This field displays the serial number of the audit record.
Stage Name	This field displays the current stage of the process.
Completed Time	This field displays the time on which the audit of the current stage is completed.
Completed By	This field displays the user ID of the user who had completed the audit.
Outcome	This field displays the outcome of the audit.

2. Click Next.

The task will move to next data segment. For more information refer Advices.

Table 2-9 Main - Action Buttons - Field Description

Field	Description
Clarification Details	Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'.
Documents	Click to View/Upload the required document.
	Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the Guarantee Issuance Claim Settlement. This information can be viewed by other users processing the request.
	Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, Oracle Banking Trade Finance Process Management user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.

Table 2-9 (Cont.) Main - Action Buttons - Field Description

Field	Description
Incoming Message	Clicking this button allows the user to see the message in case of STP of incoming MT 767.
View Undertaking	Clicking this button allows the user to view the undertaking details.
Signatures	Click the Signature button to verify the signature of the customer/bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the signatures
Request Clarification	Clicking this button allows the user to submit the request for clarification to the "Trade Finance Portal" for the transactions that are initiated offline.
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are:
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.
Refer	Select a Refer Reason from the values displayed by the system. Refer Codes are:
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

2.3.2 Advices

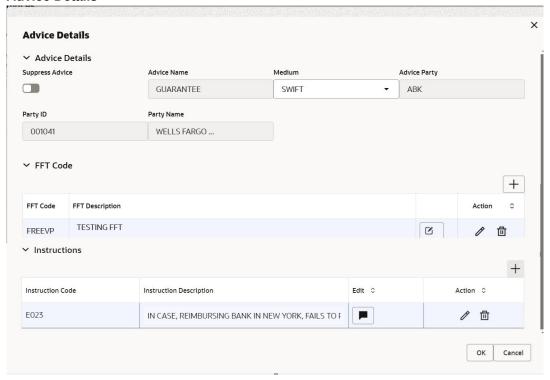

This topic provides the systematic instructions to capture the advices details of Guarantee SBLC Issuance - Claim Settlement Islamic process.

A Data Enrichment user can verify the advices details data segment of the incoming claim Settlement request. This section defaults the advices maintained for the product based on the advices maintained at the product level.

On **Advices** screen, click the 3 dots on any advice tile to view the advice details.

2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Guarantee /Standby Claim settlement request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval

User can review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Log in into Trade Mid Office (TMO) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Open the task to view the summary tiles. The tiles should display a list of important fields with values.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number "to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (Oracle Banking Trade Finance Process Management) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off

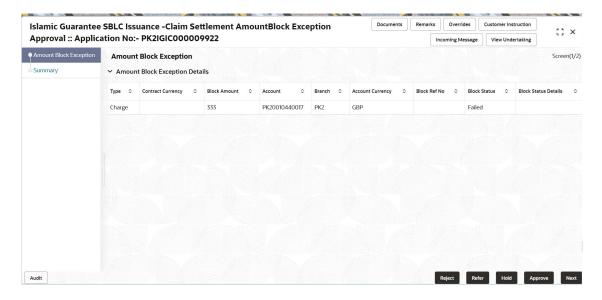

- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account Amount Bock Exception This section will display the amount block exception details

All fields displayed under Application details section, would be read only.

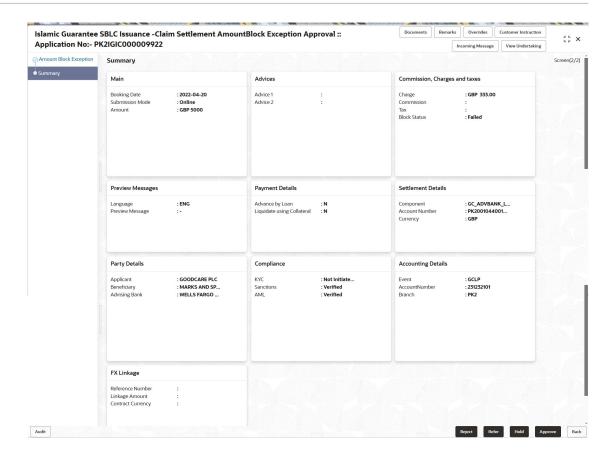

Amount Bock Exception

This section will display the amount block exception details.

2.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

This stage allows the approver user to approve a Claim settlement under Guarantee Issued Islamic transaction. The user can view the Summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

- 1. Log in into Oracle Banking Trade Finance Process Management application and on **Home** screen, click, **Task**.
- 2. Under Task, click Free Task.
- 3. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.
- 4. The acquired task will be available in **My Tasks** tab. Click **Edit** to approve the task.

The **Approval Re-Key** pop-up screen appears.

Figure 2-16 Approval Re-Key

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message and user will not be able to approve the task.

Open the task and re-key some of the critical field values from the request in the Approval Re-Key screen.

Some of the fields below will dynamically be available for re-key.:

- Applicant Name
- Beneficiary Name
- Undertaking Currency
- Undertaking Amount
- Expiry Date

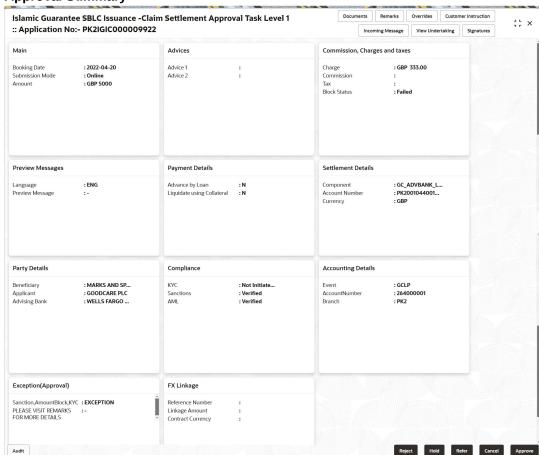

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

6. Click **Proceed** to proceed for the approval.

The **Approval Summary** screen appears. The user can view the Summary tiles which displays list of important fields with values.

7. Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

Approval Summary

Tiles Displayed in Summary:

- Main Details User can view the application and Guarantee details. User can modify the details if required.
- Commission, Charges and Taxes User can view the charge details. User can modify the details if required.
- Preview Messages User can drill down to view the message preview, legal verification and customer draft confirmation details.

- Payment Details User can view the payment details.
- Settlement Details User can view the settlement details.
- Party Details User can view the party details like beneficiary, advising bank etc.
- Compliance The compliance tile has the KYC, Sanctions and AML.
- Accounting Details User can see the accounting details.

When the Value Date is different from the Transaction Date for one or more accounting entries, system displays an Alert Message "Value Date is different from Transaction Date for one or more Accounting entries.

- Limits and Collaterals User can view limits and collateral details.
- FX Details User can view the FX details.
